14.♖d2 ♘e6 15.♖ad1! [White had a chance to equalize the material with 15.♙xb8 ♔xb8 16.♖xd7 but now the a6–♖a7 idea pays off. 16...♙e4! 17.♔d2 ♙c6! 18.♖xa7 ♔xa7 Black successfully exchanged his passive rook and the other one will occupy the d-file on the next move.]

15...♘xf4 [15...♙a8 could have been in the spirit of the ♖a7 plan. After Black has overprotected the d7 pawn, he is ready to develop with ♘c6. However, White has a strong compensation here as well. 16.♘d5 (16.a3 is always a useful waiting move, in order to have ♘d5 on ♘c6, but Black also could improve his position first with 16...♖e8) 16...♙xd5 17.♖xd5 ♘c6 18.a3 ♘xf4 19.gxf4 Now this recapture seems to be better in order to keep control over the

d4 square. (19.exf4 ♗f6 ♘d4 is coming next.) 19...♗f6 20.♗h3! with strong compensation and mutual chances.]

16.exf4 The general rule says you should always take towards the center. So, 16.gxf4 would also make sense, but the idea of the Topalov Team (as Cheparinov also took with e-pawn) is to generate the compensation on the central lines.

16...♔c8 [For me, it looked more logical to play 16...♗f6 and on 17.h4 h6 followed by ♖e8. It's not easy to increase the pressure as White.]

17.h4 A useful move. It opens the back-rank and allows Black to always consider the option of ♘g5 ♗xg5 hxg5. For this reason, I believe Black should play h6.

17...d6 [17...h6]

18.a3 Another useful waiting move. White only wants to play ♘d5 when Black puts his own knight c6. Otherwise, Black gets close to a draw after giving up the light-squared bishop, followed by ♘c6. [18.♘g5 was a tempting alternative. 18...♗xg5 (18...g6 19.♘ge4 is good for White.) 19.hxg5 ♘c6 (Black must keep the bishops on the board, since after 19...♗xg2 20.♗xg2 ♘c6 21.♖h1! forces a decisive weakness. 21...g6 22.♘d5+-) 20.♘e4 leads to a slightly better endgame for White almost by force. (20.♖xd6 ♘d4 is all right for Black.) 20...♘d4 21.♘xd6 ♘xc2 22.♘xc8 ♗xc8 23.♖xc2 looks bad because of the threatened penetration on the d-file, but Black is in the game after 23...♖d7! 24.♖xd7 ♗xd7 25.♖d2 ♗e6 26.a3 ♖b8 and ♔f8-e7 next.]

18...♘c6? This is exactly what Topalov was waiting for. [18...h6 should have been played.]

19.♘d5 ♗d8

20.♘e3! White wins back the material soon with ♘f5 and gets a better position.

20...♗f6 [20...♗e7 21.♘f5+=]

21.♖xd6! [21.♘f5 is less clear because of 21...d5!]

21...♘d4 This is what we were speaking about, Black gives back the pawn, but aims for equality through simplifications. However, this time White manages to keep the initiative with active play.

22.♘xd4 ♗xd4

23. ♖xb7 Topalov prefers to play actively instead of getting extra material, or maybe he just missed the nice ♗f5 nuance in the other line. [23. ♖xb6 ♗xg2 24. ♔xg2+/- Black doesn't have enough compensation and the critical 24... ♖b7 is met with the tactical 25. ♗f5!+/-]

23... ♖xb7 24. ♗f5 ♔b8 [24... ♗xb2 is refuted nicely by 25. ♖xb6!+/-]

25. ♔e4? A mistake by Topalov. [The simple 25. ♖d5 would have given a big advantage. 25... ♗f6 (25... ♖d8 26. ♔e4! ♖xd5 27. ♔xd5 also looks pretty bad for Black.) 26. h5+/- White is dominating!]

25... g6! White has a difficult decision again. He must either transfer to a slightly better rook endgame or sacrifice an exchange and continue playing with the initiative. Of course, Topalov remains faithful to his style and decides for the latter. [White can make use of the un-opened back-rank after 25... ♗xb2 26. ♗e7+ ♔h8 27. ♗c6! and after every queen move, ♖d8 decides the game. 27... ♔c7 28. ♖d8+/-]

26. ♗e7+ [26. ♗xd4 ♔xd6 27. ♔xb7 b5! This was Nisipeanu's trick. White can't leave the pin. The maximum he can get is the following endgame: (27... cxd4

28. ♔xa6+/-) 28. ♔c6! ♖d8 29. ♔xd6 ♖xd6 30. ♔f1 cxd4 31. ♔e2 followed by ♔d3, which is of course very unpleasant for Black, but we can't be sure if it will be enough for the win or not.]

26... ♔g7 27. R1xd4! cxd4 28. ♔xd4+ f6 29. ♗c6 White has only one pawn, but he has active pieces. Black's king is weak and the rooks need time to do something useful. White's main idea is to transfer his knight to e6, where it's going to be really disturbing.

29... ♔c8! Tenacious defense. [29... ♔c7 would have lost on the spot. 30. ♗d8!]

30. ♔h2! A high-class prophylactic move against the rook checks on the back-rank.

30... ♖c7 Black tries to sacrifice one pawn in order to get rid of the strong d6 rook. Topalov, obviously, doesn't go for the material.

31. ♔d5! Keeping the Black pieces in the cage. Now, or in the next move, Black should have played the prophylactic ♔h8 in order to get away from the ♗d8/Nd4 and ♗e6 ideas. The game is unclear. [On 31. ♗d8 ♖e7 Black must cover the e6 square. 32. ♔xb6 ♖fe8 33. ♔d4 ♔f5

with mutual chances.; 31.♔xb6 ♖d7! was Black's idea. 32.♖xd7+ ♕xd7 33.♕xa6 ♖c8 Suddenly, White has a material advantage, but Black has a strong initiative.]

31...♖e8 [31...♔h8]

32.♘d4 Nisipeanu was already in huge time trouble, which of course made his job even more difficult. The pressure in the previous part of the game has taken all his time.

32...♖ce7 [32...♔h8! was the computer's defense, and on 33.♖xf6 ♖d7! White is forced to exchange rooks. 34.♖d6 ♖xd6 35.♕xd6 ♕c5 36.♕f6+ ♔g8 Black is not worse.]

33.f5! Very strong, especially in time trouble. Nisipeanu collapses, but I believe most of us would do the same in such positions.

33...♕c1? [33...♖e5 34.♕f3 (34.♖d7+ ♖5e7 White must retreat with the rook.) 34...gxf5 35.♖xb6 White is objectively better; he has threats with ♖b7, the Black king is still really unsafe, but the victory is very far.]

34.♘e6+ The poor rooks are locked again!

34...♔h8 35.♕d4! The decisive move! White wins the f6 pawn, since ♖f7 doesn't work...

35...♕c2 [35...♖f7 has a nice refutation. 36.♖d8! ♕c6 and a small combination against the back-rank. 37.♕c4!+-]

36.♕xf6+ ♔g8 37.fxg6! Defending the f2 pawn.

37...♕xg6 38.♕xg6+ hxg6 Black survived the mating threats, but lost all his pawns.

39.♘f4 ♖g7 [39...♖b7 40.♖xg6+ The three pawns will be automatically promoted.]

40.♖xb6 a5 After reaching the time control, Black chose not to continue playing a hopeless position after 41.♘xg6.

1-0

(4) Cramling,P – Krush,I [D27]

14.11.2012

[Kamil Miton]

1.d4 d5 2.♘f3 ♘f6 3.c4 dxc4 4.e3 e6 5.♙xc4 c5 6.0-0 a6 Black wants to play b5 and develop his bishop on b7. The idea is that if White doesn't allow this with 7.a4, then the b4 square becomes weak. This is very important in positions with an isolated pawn because Black can take control of the d5 square with ♘b4!

7.♘c3 Not the most popular line. Usually, White waits a bit to develop his knight because sometimes the d2 square is better for him. White has many different ways to play: [7.dxc5 ♙xc5 8.♚xd8+ ♔xd8 We can find a lot of games in this endgame where White has tried probably almost all the plans available.; 7.♙d3 ♘c6 8.♘c3 cxd4 9.exd4 ♙e7 10.a3 0-0 11.♖e1 leads to positions with the isolated pawn.; 7.♙b3 ♘c6 (7...b5 8.a4 with the idea of winning control of the c4 square.) 8.♚e2 (8.♘c3) 8... cxd4 9.♖d1 ♙e7 10.♘c3 0-0 (10...e5 11.exd4 exd4 12.♙e3 ♙g4 13.♙a4↑) 11.♘xd4 (11.exd4) 11...♚c7 12.♘xc6 ♚xc6 13.e4 b5 ∞]

7...b5 8.♙b3 [8.♙e2 Recently we have met this move in the top level. 8...♙b7 9.dxc5 ♚xd1 10.♖xd1 ♙xc5 11.♘d2! A logical and good idea by Kramnik used in his game against Tomashevsky. The knight is going to the queenside to support the pressure against Black's structure; White is slightly better. You can find more about this topic in the September 2012 edition of the Chess Evolution book.]

8...♙b7

9.e4 The Black king is still uncastled and thanks to his better development, White can immediately try to get the initiative in the center!

9...cxd4 Correct decision. Black should not accept the sacrifice. [9...♘xe4 10.♘xe4 ♙xe4 11.♖e1 With the tempo, the next White piece comes into the attack. Black is not able to stop the pressure. 11...♙d5 Looks logical but is not enough. Black is going to eliminate the bishop on b3 and avoid hits on e6! Other moves don't help Black either.

a) 11...♙b7 12.♙g5

a1) 12.d5 c4 13.dxe6 ♚xd1 14.exf7+ ♔xf7 15.♘g5+ ♔g8 16.♙xd1 h6 17.♘e6 ♙b4=;

a2) 12.♙xe6 also gives White an advantage. 12...fxe6 13.♖xe6+ ♔f7 14.♘e5+ ♔g8 (14...♙xe6 15.♚g4+-) 15.♚h5 g6 16.♘g6 ♚d5 17.♚g4 ♚xg2+ 18.♚xg2 ♙xg2 19.♘xf8 ♙c6 20.♙h6;

12...♙e7 13.♙xe6! A typical crushing sacrifice that we'll see in a few moments. 13...fxe6 14.♖xe6 0-0 15.♙xe7 ♚d7 16.♙xf8 ♚xe6 17.♙xc5+-;

b) 11... ♖g6 12. ♗g5 (12.d5 c4 13.dxe6 f6 Black managed to limit White's bishop and rook. The position is unclear. 14. ♘h4 ♔xd1 15. ♗xd1 ∞) 12... ♗e7 13. ♗xe6 fxe6 14. ♖xe6 ♖a7 15.d5 0-0 16. ♖xe7 ♖xe7 17.d6 ♘c6 18.dxe7 ♔xd1+ 19. ♖xd1 ♖e8 20. ♖d6 ♘xe7 21. ♖xa6+/-;

c) 11... ♗f5 12.d5 c4 13. ♗g5 ♗e7 14. ♗xe7 ♔xe7 15. ♘d4→; 12.dxc5 ♗xb3 13. ♔xb3 ♗xc5 (13... ♘c6 14. ♗f4 ♗e7 15. ♖ad1 ♔c8 16. ♗d6+/-) 14. ♔c3! Double attack. Black will not escape. 14... ♘d7 (14... ♔b6 15. ♔xg7 ♗xf2+ 16. ♔h1 ♖f8 17. ♖d1+/-; 14... ♗f8 15. ♗g5+/-)

15. ♗g5! (15. ♔xg7 ♔f6 and Black is fighting.) 15... f6 (15... ♗e7 16. ♔xg7 ♗f6 17. ♔xh8+ White is winning material.) 16. ♖xe6+ ♔f7 17. ♔b3!+- White is simply winning because of the weak Black king. 17... ♔f8 (17... fxg5 18. ♘xg5+ ♔f8 (18... ♔xg5 19. ♖xa6+ ♔e7 20. ♖e1+ ♘e5 21. ♔e6+ +-) 19. ♖xa6 ♘e5 20. ♘e6++-) 18. ♗f4 g5 19. ♗d6+ 1-0 Miton,K-Manik,M/Mallorca 2004.]

10. ♘xd4 ♘bd7!? An ambitious move compared to the more often used: [10... ♘c6 11. ♗e3 ♗e7 (11... ♘xd4 12. ♗xd4 ♘xe4?! We see another example of why black shouldn't grab this pawn. 13. ♘xe4 ♗xe4 14. ♖e1 ♗d5 15. ♗e5 ♗xb3 16. ♔xb3 Black has problems with his de-

velopment and with the g7 pawn. 16... ♔b6 17. ♔f3 ♖d8 18. ♖ac1 ♗d6 19. ♖c6 ♔a5 20. ♗c3 b4 21. ♗xg7 ♖g8 22. ♗f6 b3 23. ♖ec1 ♗e7 24. ♗xe7 ♔xe7 25. ♖c7+ 1-0 Fressinet,L-Kapnisis,S/Caleta ENG 2010.) 12. ♘xc6 ♗xc6 13. ♔xd8+ ♖xd8 14.f3 The bishop on c6 is limited (by the e4-f3 structure). The slightly worse Black structure on the queenside just gives White a symbolic advantage. 14...0-0 15. ♖fd1 ♖xd1+ 16. ♖xd1 ♖d8 17. ♖xd8+ ♗xd8 18. ♘e2 ♔f8 19. ♘d4 ♗d7 20. ♗c2 ♗c7= 1/2-1/2 Koneru,H-Movsesian,S/Caleta ENG 2010 (31.)]

11. ♖e1 Logical. White is preparing e5 with the idea of regrouping his pieces to put pressure on the kingside (for example, with ♗c2-♔g4 etc...) [11. ♗xe6 fxe6 12. ♘xe6 ♔b6 13. ♘d5 ♗xd5 14.exd5 ♔f7=+ and White doesn't have enough compensation.]

11... ♘c5 [11... ♔c7

12.e5! ♘xe5 13. ♗f4 ♗d6 14. ♘dxb5+]

12. ♗c2 White has to keep the bishop. [12.e5?! ♘xb3 13.axb3 ♘d7 Without the bishop, it's hard for White to create threats. Black is totally fine.]

12...b4 A very concrete move. [12... ♖c8 13.e5 ♘d5 14. ♔g4 with very complex play.]

13.e5 Suddenly, the position becomes very complex. White had another interesting option as well: [13.♘a4 ♘cxe4 14.♙e3 ♙e7 15.f3 ♘d6 16.♘b6 ♖b8 17.♙a4+ ♔f8 18.♖c1 After this thematic pawn sacrifice, White has some compensation thanks to the bad king on f8 and Black's weak queenside structure.]

13...bxc3 [13...♘fd7 14.♘e4 ♘xe4 15.♙xe4 ♙xe4 16.♖xe4 White should be better.]

14.exf6 gxf6

15.b4!? Nice idea. White is going to expel the strong knight from c5. The simple recapture on c3 leads to an unclear position as well: [15.bxc3 ♔d5 (15...♖g8

16.♘xe6 It's amazing, but it works! 16...♖xg2+ (16...fxe6 17.♔h5+ ♔d7 18.♖d1+ ♙d6 19.♙f4 ♖xg2+ 20.♙f1 e5 21.♖xd6+ ♔xd6 22.♖d1+ ♙d5 23.c4+-; 16...♘xe6 17.♙a4+ ♔e7 18.♙a3+-) 17.♙f1 ♔xd1 18.♘g7+ ♔d7 19.♖xd1+ ♔c8 20.♙f5+ ♔b8 21.♙f4+ ♔a7 22.♘h5+/-) 16.f3 0-0-0 ∞ and it's hard to say which king is safer.]

15...♔d5 Simple but on time! Black develops the queen with tempo to create pressure against g2, preparing to castle long and supporting the e6 square to avoid some sacrifice. [15...♖g8 16.bxc5 ♖xg2+ 17.♙f1 ♙xc5 18.♖xe6+ The idea of sacrificing on e6 works in various occasions. 18...fxe6 19.♔h5+ ♖g6 20.♘xe6 ♙g2+ 21.♔e2 ♔e7 22.♙a4+ ♔f7 23.♙b3 with a huge attack.]

16.f3 0-0-0 17.♙e3 e5 18.bxc5 [18.♘e2 ♔c4 19.♙f5+ ♘e6 20.♔c2 ∞]

18...exd4 19.♙e4 ♔xc5 [19...♔d7!? With the idea of keeping the pawn on c5, which paradoxically, in some cases can help in the protection of the Black king. Also, Black would recapture on c5 with the bishop.]

20.♙xb7+ ♔xb7 In exchange of the dangerous pawns, White has pressure against the king.

21.♖b1+ ♔a8 [21...♔a7 22.♔b3 ♔c8 (22...♔c6!? 23.♔xf7+ ♖d7 24.♔e8 a5 This is not easy to see with human eyes. Black creates an escape route for the king. The queen on c6 is nicely controlling some important squares and White is not able to finish the attack. 25.♙f2 c2 26.♖bc1 ♙c5 27.♔xh8 d3) 23.♔b6+ ♔a8 24.♙xd4

24... Rxd4 25. Re8 and now there are two moves that lead to a draw by force. 25... Rxd1+ (25... Rxd8 26. Qxa6+ Qxa6 27. Rxd8+ Kd7 28. Rxd7+=) 26. Rxd1 Qc5+ 27. Qxc5 Rxe8 28. Qxc8+ Rxc8 29. Qf2= White will win the c-pawn and the game will finish with a draw.]

22. Qa4

22... Qc8?? A huge overlook of the US grandmaster. Now she loses immediately. It's the second time in this event that Krush blunders and changes the result of the game in one move. We hope that Irina forgets about this and manages to equalize the match score. [22... Qa7 23. Qb3 leads to the variations in the previous commentary, where Black was fine.]

23. Qf4 Qd6 24. Rb6 Ka7 25. Qxd6 Qxb6 26. Rb1+ Ka7 27. Qxd4+ Ka8 28. Qd5+ 1-0

Endgame section

(15) Kopylov,M (2573) – Volokitin,A (2724)

German league, 11.11.2012

[Chess Evolution]

In the following rook endgame, Black seems to be completely winning. However, if we take a deeper look, we come to the conclusion that, actually, he has no chance to convert his advantage. Black should try to squeeze the king in the first rank. Obviously, transposing into a 2 vs 1 endgame by exchanging b2 for e7 always leads to a dead drawn position.

53... ♖b2 White has quite an easy job in this part of the game. He must pass with the king on g1–h1 and wait for Black to execute a plan. [After 53... ♜c5 54. ♔g2 Black can't make progress. 54... ♜e5 55. ♔f3 ♔f6 trying to improve the king allows 56. ♜xb5!=]

54. ♔h1 b4 55. ♔g1 ♔e8 56. ♔h1 ♜b3 57. ♔g2 ♔f7 58. ♔h2 ♜b2+ 59. ♔g1 Black plays with good technique. Before starting the final action, he makes some random

moves, which don't change anything on the position. With this clever play, he gains some time to finish off the game.

59... ♜b1+ 60. ♔g2 ♔e8 61. ♔h2 ♜b2+ 62. ♔g1 h4 Sooner or later, Black needs to play this move. [62... b3 63. ♔h1 ♜b1+ 64. ♔g2 b2 Pushing the pawn to b2 is not an option for Black. This leads to a well-known theoretical draw, despite the fact that Black will be two pawns up. 65. ♔h2 ♔f7 66. ♔g2 h4 67. gxf4 gxf4 68. ♔h2 h3 White is in zugzwang, but he can start moving with the rook. 69. ♜b4 ♔xe7 70. ♜b8=]

Black has no chance. When the king gets to c3 to rescue the b1 rook, White gives checks on the 8th rank and then he returns to b8.]

63. gxf4 gxf4 64. ♔h1 b3 65. ♔g1 h3 66. ♔h1 ♔f7 [66... h2 was the other alternative, leaving White in zugzwang again.]

67. ♖b8+ ♔xe7 An important endgame factor saves White, namely the stalemate. 68. ♜e8+! Black can't hide his king from the checks. 68... ♔d6 69. ♜e6+ ♔d5 70. ♜e5+ ♔d4 71. ♜e4+ ♔d3 72. ♜e3+ ♔d2 Now White must be careful, since the king has closed the 2nd rank, but 73. ♜d3+! ♔c1 74. ♜c3+ ♔b1 75. ♜c1+! ♔a2 76. ♜a1+! ♔xa1=]

67. ♔g1! This is not a great sign! White had to allow the ♜g2 possibility, followed by advancing the b-pawn.

67... ♜g2+ 68. ♔h1 b2 [68... ♜g3 leads nowhere. 69. ♔h2 ♜c3 70. ♔h1 Black can't improve his position.]

69. e8 ♔+! ♔xe8 70. ♜b8+ ♔d7 71. ♜b7+ ♔c6 72. ♜b6+! ♔c5 73. ♜b5+ ♔c4 74. ♜b4+ ♔c3 75. ♜b3+ ♔xb3 An instructive endgame. 1/2

(16) Harikrishna,Pentala (2692) – Dominguez Perez,Leinier (2726) [B92]

TCh-ESP CECLUB Div Honor 2012 Leon ESP (6.4), 10.11.2012
[Chess Evolution]

This endgame appeared in one of the main matches in the Spanish league. White is a pawn up and has very good winning chances. Anyhow, rook endgames are always tricky and usually give a lot of drawing resources.

41. ♜a3 h5 After this move, the position is simply lost, but probably Black's position is lost anyway. [41... ♜c2 Let's take a look at how White could win if Black would keep on waiting (of course, Black's dream idea would be to play d5 and exchange the d-pawn for White's e-pawn, but that's just a dream...) 42. ♜a7! forcing the Black king to get away from e6 and leave the d6 pawn unprotected. 42... ♔f6 43. ♜d7 ♜d2 (43... ♜c6 44. ♔f4 followed by g4, with an easy win for White.) 44. e5+! An easy but nice tactic. 44... ♔xe5 45. ♜xg7 and White is totally winning.; Doesn't help either 41... ♜b7 42. ♔g4 followed by f4-g3 and ♜a6.]

42. ♜a5! By putting the rook on g5, White is protecting the g2 pawn and is able to put the king on f4.

42...g6 43.♖g5 ♔f6 44.♔f4 The first part of the plan is done. Now the second part is coming. White will bring the rook to d3, attacking the d6 pawn and protecting the pawn on f3, in order to enter with the king on g5.

44...♖f2 45.g3 Now Black can't avoid White's rook maneuver.

45...♖f1 Black has to wait and see — nothing else to do...

46.♖a5 ♖f2 47.♖a3 The rook is coming to d3.

47...♖g2 [47...♖d2 48.♖a6 and the Black king has to leave the 6th rank. **48...♔f7 49.♔g5** followed by ♖a7+, with a totally winning position.]

48.♖d3 The Black king has to leave the g5-square for the White king.

48...♔e6

49.g4! The position is won! Great technique by White.

49...hxg4 50.fxg4 ♖g1 51.♔g5 ♖g2 Black is still fighting a little, so White must be accurate until the end.

52.♖d5! Nice move. White's plan is to play ♖a5-♖a8-♖g8 next. Why to start with 52.♖d5? To avoid Black's ♔e5.

52...♖e2 53.♔xg6 ♖xe4 54.♖g5 And, of course, the h-pawn decides the game.

54...♖f4 55.h5 ♖f6+ 56.♔g7 ♖f7+ 57.♔g8 ♖a7 58.h6 The position is totally hopeless for Black.

58...♔f6 59.♖g7 Again, the easiest move to avoid any of Black's tricks...

59...♖a8+ 60.♔h7 And White's g-pawn starts its march.

60...d5 61.g5+ ♔e6 62.g6 d4 63.♖b7 White can easily hold the Black pawns.

63...d3 64.g7 d2 65.♖b1 ♔d5 Great technique by Harikrishna...[65...♔f7 66.♖d1 followed by ♖xd2.]

1-0

Clash of the Titans

(17) Fischer, Robert James — Larsen, Bent [B77]

Portoroz Interzonal Portoroz, 1958

[Csaba Balogh]

A real heavyweight game between Robert Fischer and the former World Champion candidate Bent Larsen, who belonged to the elite of the sport for decades.

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 g6 The Sicilian Dragon variation, a clear sign that we'll have an exciting game.

6.♙e3 ♙g7 7.f3 0-0 8.♔d2 ♘c6 We have reached the starting position of the line. White has a choice between the two main setups 9.♙c4 and 9.0-0-0, or the recently popular 9.g4.

9.♙c4

9...♘xd4 This is already a forgotten move because it's known that Black can't fight for equality this way. However, at that time it was a novelty! [9...♙d7 is the right move

and the beginning of the lines, with more than 10000 games in the database.]

10.♙xd4 ♙e6 This was Larsen's idea, creating doubled pawns on the e-file, which is not necessarily bad for Black in the middlegame. The three central pawns cover all the squares, while White can hardly attack them with any piece. Actually, this motif is quite common in many Dragon lines. However, Fischer reacts correctly.

11.♙b3! [11.♙xe6 fxe6 12.0-0-0 ♔a5]

11...♔a5 12.0-0-0 We are facing an opposite side castling position. Both sides are ready to launch an attack against the opponent's king. Black is the first to go.

12...b5 [12...♙xb3 is met with another famous motif in the sharp Sicilian lines. White takes back with 13.cxb3! followed by ♔b1 and h4. Black's task is much harder against this structure.]

13.♔b1 b4 14.♘d5

14...♙xd5 Here comes the only mistake in the game by Fischer, which was based on a miscalculation.

15.♙xd5?! [The right way to play was demonstrated by Mikhail Tal one year later against Larsen. That game

is also very instructive, I will demonstrate it in the next CEWN. 15.exd5!]

15... ♖ac8? Black doesn't make use of the previous inaccuracy. [15... ♘xd5 should have been played. 16. ♕xg7 (16.exd5 ♕xd5 is not an option for White.) 16... ♘c3+! This great tactical blow was missed by both superstars. (16... ♕xg7 17.exd5 This is what both sides have calculated and White has a comfortable advantage after ♖he1 and ♖e4. The rook will stand perfectly on e4, it attacks the b4 and e7 weaknesses and could be switched anytime to the attack with ♖h4.) 17.bxc3 (17. ♕xc3 bxc3 18. ♕xc3 ♕xc3 19.bxc3 ♖fc8= can't be better for White, with such a structure.) 17... ♖fb8!! This is the point! After the following forced moves, we reach an equal endgame. 18.cxb4 ♕xb4+! 19. ♕xb4 ♖xb4+ 20. ♕b2 ♖ab8=]

16. ♕b3! White successfully preserved his bishop and its diagonal remained open as well. Black's only idea is to play ♕b5 and a5-a4, but he must waste a very important tempo in order to do it.

16... ♖c7 [On the direct 16... ♕b5 White can accept the pawn. 17. ♕xa7! taking the main attacker. Black can't create a dangerous attack on the a-file because of the b3 bishop. 17... ♘d7 18. ♕d4+/-; 16... ♘d7 is too slow as well. 17. ♕xg7 ♕xg7 18.h4 h5 If Black allows h5, it's even worse. 19.g4! ♖h8 Black should try to block the kingside, but now White can slightly change the character of the game with 20. ♕d4+ ♕g8 21.g5! The rook is locked on h8 and the new plan is f4-f5 with a crushing attack.]

17.h4 ♕b5 [17...h5 isn't better either. 18.g4! hxg4 (18... ♖fc8 is refuted a bit unexpectedly by 19. ♕g5!+- Black is forced to exchange queens because of the ♕xg6 threat,

but then he loses the h5 pawn.) 19.h5! Typical sacrifices in the Dragon. 19...gxh5 (19... ♘xh5 20. ♕xg7 ♕xg7 21.fxg4+-) 20.fxg4! and Black will collapse soon. If Black can't attack, he must focus on defending, and that usually doesn't lead to anything good. 20...hxg4 21. ♕h2 ♖fc8 22.e5 dxe5 23. ♕xe5+-]

18.h5! White has already reached the front lines, while Black still needs two moves. Taking on h5 would only accelerate the defeat.

18... ♖fc8 [18...gxh5 19.g4!; 18... ♘xh5? nicely loses by force. 19. ♕xg7 ♕xg7 20.g4 ♘f6 21. ♕h6+

21...♔g8 Black seems to hold, but here comes the role of the b3 bishop. 22.g5! ♘h5 23.♖xh5! gxh5 24.g6! hxg6 25.♔xg6+ ♔h8 26.♔h6+ ♔g8 27.♗g1+-]

19.hxg6 hxg6 20.g4! The main defender is the dark-squared bishop, so White has to eliminate it. [20.♗xf6 was also tempting, but the g7 bishop protects the king well. 20...♗xf6 21.♔h6 e6! Black is safe.]

20...a5 21.g5 ♘h5 [White is faster by just one tempo after 21...a4? 22.gxf6 axb3 23.fxf7! bxc2+ 24.♔xc2! ♖xc2 25.♗h8#]

22.♖xh5! This probably arrived without thinking. Such sacrifices are automatic in this level. Fischer opens the way for the g-pawn, in order to destroy the kingside structure.

22...gxh5 This is the decisive mistake. [The position looked already hopeless, but as usual, the computer suggests a stubborn defense: 22...♗xd4! 23.♔xd4 gxh5 24.g6 and Black has 24...♖c4! closing the critical diagonal. Of course, the position remains suspicious, but White must act fast, or otherwise Black arrives with a4. 25.gxf7+ ♔xf7 26.e5! Very strong idea, using the fact that Black

is temporarily pinned. 26...a4! Black is still alive.(26...d5 27.♔d3! The attack will break through.)]

23.g6 e5 A desperate attempt to complicate matters. [23...e6 was losing as well after 24.gxf7+ ♔xf7 25.♗xg7 ♔xg7 26.♗xe6+- followed by ♗g1.]

24.gxf7+ ♔f8 25.♗e3 The two main threats are ♔xd6 and ♗h6. Black can't do anything against them.

25...d5 26.exd5 The next move is d6 and the bishop gets back to the game. [26.♗h6 was also winning.]

26...♖xf7 [26...a4 27.d6!+-]

27.d6 The end is near. From now on, all the moves are winning for White...

27...♖f6 [27...♖d7 28.♗h6+-]

28.♗g5 ♔b7 29.♗xf6 ♗xf6 30.d7 ♖d8 31.♔d6+ [Black resigned in view of 31.♔d6+ ♔g7 (31...♗e7 32.♔h6#) 32.♖g1+- followed by ♔xf6. A nice attacking game!]

Editorial Preface

All the attention is focused on the Women's World Cup. We have seen good games, bad games and a lot of emotions.

The most strange thing about the Grand Prix is that most of the big favorites have already been knocked out from the tournament in the 2nd round! Hou Yifan, Koneru and A.Muzychuk were eliminated by a quite weaker opposition, which they usually beat in other tournaments.

It's hard to say who is going to be the last girl standing, but we are enjoying some great chess fun watching this games, and especially the rapid/blitz games!

A very strong rapid round-robin called "Siberian Bank Cup" was won by Rublevsky. Another tournament was played in the Netherlands and had 3 winners: Van Wely, Fridman and Ernst.

The FIDE Grand Prix in Tashkent has just began, and a lot of the Elite players are participating. We can be sure that there'll be high-level chess and a lot of great novelties.

As usual. we wish You a lot of chess fun with Your weekly edition of CEWN.

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Jakovenko,Dmitry (2741) — Andreikin,Dmitry (2723) [A04]

Siberian Bank Cup Novosibirsk RUS (1), 17.11.2012

[Csaba Balogh]

A nice positional lesson by Jakovenko, with a pretty tactical blow to put an end to the game.

1.♘f3 g6 2.d4 ♗g7 3.c4 d6 4.♘c3 ♗g4 In general, such openings are excellent decisions when Black faces a weaker opponent, who immediately gets confused by finding himself in a non-theoretical territory. However, as we will see, against a player on Jakovenko's level, it doesn't necessarily work well...

5.g3!? I like this move a lot. White would like to fianchetto his bishop, and to change the pawn structure with ♗xf3 has its drawbacks as well. The game shows well that White can make use of the e-file and also obtain the bishop pair in the very early part of the game. [Keeping the healthy structure with 5.e3 is the main line.]

5...♗xf3 6.exf3 ♘f6 [The most often played move 6...e6 is also probably the best one. 7.♗g2 White wants to play 0-0, f4 and d5, achieving a better position with a space advantage. Black's only counterplay is to play d5 himself and to attack the d4 with the knights (on c6 and f5). 7...♘e7 Now Black is ready to push d5, so just as in the game, White has to react with (7...d5 is a bit premature, Black is not well developed for this action yet. 8.cxd5 exd5 9.0-0 (9.♖b3 looks strong as well, but Black has 9...♘c6! 10.♖xb7 ♘ge7 and suddenly the position is unclear.) 9...♘e7 10.♗e1 0-0 11.♗g5! ♘bc6 12.f4! Due to the d5 weakness, Black is forced to close his g7 bishop. 12...f6 (12...♖d7 is met with 13.♖b3!) 13.♗h4+= The bishop on h4 looks a bit awkward, but the one on g7 is even worse. If Black tries to bring it to the game with f5, it strengthens the h4 bishop as well, while trying to trap it with h6, is simply met by g4, ♗g3 and f5 later on.) 8.d5! exd5 9.cxd5 0-0 10.0-0 The d5 pawn gives an space advantage for White. Black's pieces are slightly paralyzed, and sooner or later he should undermine it with c6, but this will be met by dxc6 and f4, when the g2 bishop becomes really powerful. 10...♘d7 11.♗g5! looks like a strong move, forcing a weakness on the kingside. 11...h6 Otherwise, the pin is unpleasant. 12.♗d2 White is slightly better. A possible plan is h4-h5, which looks especially dangerous with the h6 weakness. If Black reacts with h5 on h4, then the effect of f4-f5 is increased. (The computer recommends the unhuman 12.♗xe7 ♖xe7 13.♗e1 ♖d8 14.♗c1 and also claims an advantage by pressing the queenside pawns with ♘b5 or ♖b3.)]

7. ♖g2 c6 Black wants to lock the center with d5 and e6, which would kill the g2 bishop, so the next move is practically forced.

8. d5! You can say that now White himself killed his light squared bishop, but it might get into the game through h3!

8...cxd5 9.cxd5 0-0 10.0-0 ♘a6 [Developing with 10... ♘bd7 is not better. 11. ♖e3 ♘b6 12. ♖d4+= with similar plans as in the game.]

11. ♖e3 Basically the ideal setup for White is ♖d4, ♔d2, f4, ♖h3 and doubling the rooks on the e-file. Black should try to do something on the queenside, but White is well prepared to react against any action properly.

11...♘d7 12. ♖e1 ♖e8 13.f4 White takes control of the e5 square and prepares to take measures against his opponent's king with h4-h5 and f5. [13. ♖h3 was another logical move, but Jakovenko decided to wait for this until Black plays ♖c8.]

13...♘b6 [On 13... ♖c8 14. ♖c1 ♔a5 White can choose between two plans. The positional one with 15. ♖d4 (or the tactical 15. ♖h3!? f5 16.g4! also looks quite good. After

gxf5 gxf5, ♔h5 or ♔h1-Rg1 are very dangerous threats.) 15... ♖xd4 16. ♔xd4 By exchanging the dark-squared bishop, White successfully got rid of the strongest Black piece, and now an attack against the king becomes even more effective. 16... ♖b6 White should keep the queens on the board 17. ♔d2! and f5 or h4-h5 are coming.]

14. ♖d4! Here again, removing the strong bishop leaves the Black king vulnerable.

14... ♖xd4 15. ♔xd4

15... ♖c8 Black urgently needs to create some counterplay on the queenside, but he has the typical problem that he can occupy one weak square only with one piece. We will soon understand what I mean.

16. ♖e2 Before starting concrete actions, White doubles his rooks on the e-file. [16. ♖f1!? to prevent ♖c4 and ♘c4 was also strong.; 16. ♖h3!? also made sense. 16... ♖c4 17. ♔d2 and this is the point. Now the c4 square should be occupied by the knight, but the rook is disturbing.]

16... ♖d7 Black prevents ♖h3. The absence of the light-squared bishops is sensible now.

17. ♖ae1 ♘c5 Black would like to exchange a pair of knights on a4, which would excellently improve his position. White should definitely avoid it, he has a lot of good options for that. [Now again on 17... ♖c4 the simple 18. ♙d2 and the rook is poorly placed on c4.]

18. h4 Jakovenko decided not to waste any more time and start the attack. Of course, he had to foresee how to meet the ♘a4 move. [18. b3 was also fine, depriving Black from his main idea. Its only drawback is that the stability of the c3 knight is gone, but Black needs time to attack it and even if he succeeds, White can consolidate with ♖e3.]

18... ♘ca4 [On 18... h5 the best is 19. ♖h2! with the idea of ♕h3!; 18... ♘ba4 meets by 19. ♘d1! leaving the Black knight useless on a4, while the White one is going to e3, where it supports the f5 plan and is also ready to jump with g4-h6.]

19. ♘e4! White needs the knight. In addition, Black's pieces are disturbing each other. Now, for example, without the knight on a4, Black could try something with ♙a4.

19... ♘c5 [19... ♖c4? loses to 20. ♘f6+ +-]

20. ♘g5 With the last two moves, Black has sent the c3 knight to g5, where it supports the attack and ♕h3. But it was very difficult to suggest something better for him.

20... ♖c7 [On 20... ♙a4 21. b4! keeping the queens, and e7 is under attack.]

21. b4 ♘ca4 In rapid chess, sometimes you need to spare some time by playing the most obvious move, this is the reason why Jakovenko missed an easy winning combination.

22. h5 [22. ♕h3! would have won on the spot. 22... f5 (22... ♙b5 23. ♘xf7! 23. ♘e6 has the same value. 23... ♖xf7 24. ♕e6+ ♖f8 25. ♙h8#) 23. ♘e6 and ♙g7.]

22... ♖c4 23. ♙d2 [Keeping the long diagonal with 23. ♙a1 was also strong.]

23... ♙c7 [23... ♘c3 24. ♖e3 is also hopeless. The knight has to retreat and ♕h3 is coming.]

24. h×g6 h×g6 It's time to finish the game.

25. f5 The end is near. With such a weak king, Black can't resist for long. [25. ♖e6!? was a bit more elegant. 25... fxe6

(25...♖c3 26.♘xf7 ♔xf7 27.f5+- and the queen joins the attack.) 26.♔d3+-]

25...gxf5 26.♘e6! Not the only way to win, but the easiest one.

26...fxe6 27.♔g5+ ♔f8 [27...♔h7 28.♖xe6+- with mate to follow.]

28.♔h6+ ♔f7 [28...♔g8 doesn't change anything. 29.♔g6+ ♔f8 30.dxe6+-]

29.dxe6+ Black resigned in view of ♔g6 next. An instructive game on how to handle the structure that arises from this opening.

1-0

(2) Zhao,Xue (2565)

– Muzychuk,Mariya (2476) [A15]

FIDE WCh Women World Cup

Khanty-Mansiysk RUS (3.4), 18.11.2012

[Arkadij Naiditsch]

We are in the Round of 16 of the Women's World Cup. A great game was played by one of Top favorites for the WWC title, Zhao Xue, who qualified to the Quarter-Finals with this victory.

1.c4 ♘f6 2.♘f3 g6 3.♘c3 d5 The Anti-Grueinfeld has become very popular lately because of a simple reason — White can't manage to achieve an advantage in the main „Gruenfeld lines“.

4.cxd5 ♘xd5 5.♔a4+ White is choosing one of the side-lines. This is not a bad choice when you want to test Your opponent's memory and maybe even use a small novelty to create some opening problems.

5...♘c6

6.♘e5 ♘xc3?! The move in the game probably gives White some advantage. [6...♔d6 This move is probably

the most critical. The current theory shows that White has no advantage in the following endgame: 7.♘xc6 ♔xc6 8.♔xc6+ bxc6 9.b3 ♕g7 10.♕b2 ♘xc3 11.♕xc3 ♕xc3 12.dxc3 a5 and it seems like the position is very close to a draw.]

7.bxc3! This is still theory, but anyway it's good to know the right moves!

7...♕d7?! Again a bad choice in my opinion. White gets the bishop pair „for free“ and Black was not forced at all to take such a radical action. [7...♔d5 would be the right choice... 8.♘xc6 ♔xc6 9.♔xc6+ bxc6 I think White is doing slightly better, but Black is still OK. She'll develop her pieces by playing ♕e6 usually, and then ♖d7 protecting both c-pawns at the same time.]

8.♘xd7 ♔xd7 9.♖b1! A good move by White, developing a rook and at the same time making Black feel the weakness in the light-squares.

9...b6 Black finds a tactical solution. The next move is ♘a5 followed by c6, and this somehow solves the major problem of not losing on the spot, but Black remains with a clearly worse position.

10.h4! Great feel by the Chinese. One might ask, why to include 10.h4 h5 for White? Very simple, in the future his two bishops will give excellent attacking chances; the move h7-h5 is weakening a lot the pawn structure around the king, making it a visible target.

10...h5 [10...♕g7 11.h5 and Black has nowhere to go with his king... White can always count on ♔a4-h4.]

11.e4 Another good move by White. Black is forced to put the knight in a bad position on a5, far away from the place where the action will be.

11...♘a5 12.♕b5 Of course, no exchange of queens...

12...c6 13.♕e2 ♕h6 Black is trying to exchange the dark-squared bishops, which is a very risky decision, weakening even more the king in case of a short castle and, where else to go!? [13...♕g7 Black should agree to stay worse — nothing to do about it. 14.0-0 0-0 15.d4 White is doing clearly better but Black can still fight with e6, ♖ac8 hoping to play c5 at the right time.]

14.0-0 0-0

15.f4! Yet another good move by the Chinese. White doesn't exchange anything and keeps the bishop pair

on the board. Now White not only will play d4-♗e3 with full domination, but also wants to play f5 at the right moment, with a very strong attack. Now we can see how useful it was for White to include the h4-h5 moves.

15...e6?! Black is acting like everything is fine, which is strange. [15...♖ad8! followed by c5 next would give Black some counter-chances.]

16.d4 Of course White is covering the center.

16...♖fd8 17.♗e3 The pawn on d4 must be protected, and at the same time White is acting against Black's only idea in the position, to play c5.

17...♔c7 White has a lot of tempting ideas, but clearly the focus should be on playing f4-f5. To do this, White needs to bring the queen closer to the Black king.

18.♔c2 Not a bad move, but maybe 18.♔d1! followed by ♔e1-Qg3 would have been a strong idea!

18...b5 After this move Black is losing his main idea of playing c6-c5, and this can't be good. [18...c5!? It's better to give a pawn and get some play, than giving the game :). 19.dxc5 ♗f8! That's the key move. Of course 19. ..bxc5 20.♖b5 would just lose 20.cxb6 axb6 and Black can keep on fighting! After playing ♗c5 next, Black's position is still bad, but there are some practical chances.]

19.♖f3 White keeps preparing the move f5 and maybe just wants to play ♖bf1 next, followed by ♔c1 and f5.

19...a6? This is a way too cool move. Black is pretending like nothing is going on and continues the preparation for the c5 move, which could come next, but is there going to be a next move?! White's pieces are prepared for the final action.

20.f5 And finally, White is starting to crush Black's position. The Queen on c2 is also going to help White in the attack by playing e5 and attacking the pawn on g6.

20...♗xe3+ 21.♖xe3

21...e5! Black closes White's possibility of playing e4-e5 and that's the correct way to play. If White manages to open her queen, the game is over.

22.fxg6 fxg6 23.♖g3 ♔h7 As we can see, Black's position is on the edge. The king is open and the knight on a5 is completely out of the game.

24.♗g5! Another strong move by White. The pawn on e5 is hanging, and ♗xh5 can also be a very dangerous sacrifice followed by ♔e2. And if White needs it, she can play ♖f1 bringing one more piece into the attack.

24...exd4? This move loses on the spot. [24...c5 was the only chance, even if the position is probably still lost. However, from a practical point of view, it's the best choice. Against White's 25.♖xe5, cxd4 is coming, and against 25.♗xh5 gxh5, White needs to calculate exactly if the position is winning or not, which puts some pressure on the decision.]

25.e5! And White's dream come true... the pawn on g6 is simply falling.

25...♖g8 26.♗xh5 d3 27.♔xd3 Black made it a bit too easy for White, but this game can be a very good example of what not to try with Black...

1-0

(3) McShane, Luke J (2713)
– Ernst, Sipke (2552) [A11]

Remco Heite Inv Wolvega NED, 17.11.2012

[Csaba Balogh]

Luke McShane was really out of form on this event. He was defeated with a beautiful combination in this game.

1.c4 c6 2.♘f3 d5 3.e3

3...♗g4!? I have also discovered this quite unknown move for Black about a year ago. It avoids many unpleasant theoretical lines. A perfect decision for the players that don't like or have no time to prepare the Meran variation.

4.♔b3 In general, the refutation of the premature bishop moves (Bg4 and ♗f5) in the Slav defense lay behind this move — a quick attack against the b7 and d5 pawns. However, Black is ready to consolidate his position now... [Probably White's best option is to transpose to the Slav with 4.h3 ♗xf3 5.♔xf3 e6 6.d4 ♘f6 This position normally arises from 1.d4 d5 2.c4 c6 3.♘f3 ♘f6 4.e3 ♗g4 5.h3 ♗xf3 6.♔xf3.]

4...♔c7! The d5 pawn is indirectly protected by the c1 bishop that's hanging.

5.cxd5 [5.♘e5 is another typical motif, but Black seems to have no problem after 5...♙e6 6.d4 ♘d7 7.♘xd7 Black can decide to play an open game with 7...dxc4 (or to keep the position closed with 7...♙xd7 8.♘c3 e6) 8.♙xc4 ♙xc4 9.♚xc4 ♚xd7 followed by e6 and ♘f6 with a playable position.]

5...cxd5 6.♘c3 [In a blitz game, Kramnik played 6.♙b5+ and here Eljanov should have reacted with 6...♙d7! 7.♘c3 e6 with easy equality.]

6...♙xf3 Black gives up the bishop pair, but weakens the pawn structure. The following developing moves are quite logical. [Of course not 6...e6?? because of 7.♚a4+ +-]

7.gxf3 e6 8.d4 ♘c6 9.♙d2 ♘f6 10.♚c1 ♙e7 We have reached the first critical position for White. He must choose a plan. To do this he must foresee that Black's main idea is to play 0-0 and e5, opening the position on the weak king, which will be vulnerable even if he castles kingside. The question is which is better: to allow this e5 and play on the queenside as it happened in the game or to lock the center with f4, but it also has the drawback of seriously weakening the e4 square.

11.♘a4 [I personally would have preferred 11.f4 even though White's position is not better at all. The game may continue with 11...0-0 12.♙d3 If White played f4, the bishop belongs on d3 to control the e4 square. 12...g6 A very useful move against f5, getting rid of the doubled pawns and opening the position for the bishop pair. 13.0-0 ♚fc8 In such a closed position the knights are not worse at all. 14.♘a4 ♚d7 15.♘c5 ♙xc5 16.♚xc5 Black can choose between several plans 16...♘e8 transferring the knight to d6 is a good option. (16...♘e7 is also possible,; 16...e5 leads to a perpetual check: 17.dxe5 ♚g4+) 17.♚fc1 ♘d6]

11...0-0 12.♙b5 ♚fc8 Black prepares for the e5 break, first he needed to overprotect the c6 square.

13.♙e2 McShane felt that his king might be safer here than on g1. It's hard to say whether he was right... [13.0-0 is also met with 13...e5! 14.dxe5 ♚xe5 Black is better. ♙d6 is the threat, forcing an f4 weakening after which the f6 knight might jump to e4 or to g4 in connection with ♚h5.]

13...♚ab8 An unnecessary preparation. [13...e5 could have been played immediately. 14.dxe5 ♚xe5 ♘d4 is the threat, and on 15.♙c3, d4 works, so 15.♙xc6 bxc6 and only Black can be better. He is threatening to mobilize his center with c5 and d4.]

14.♚d3 e5! Black goes back to the right track!

15.♙xc6 bxc6 16.dxe5 ♚xe5 17.♙c3 ♚h5 18.♙xf6 White would definitely have preferred to keep his strong bishop, but Black was threatening to play c5. [For example, on 18.♚hg1 c5! Black wants to open the position with d4 and both exd4 ♘d5-f4 or ♚e8 lead to a very dangerous attack. 19.♙xf6 (on 19.♚a6 ♚f5! protecting the f6

knight and refreshing the threat of d4! (19...d4 didn't work immediately because of 20. ♗xd4!) 19... ♗xf6 and the b2 pawn is more important than the c5 one at this moment.]

18... ♗xf6 19.b3 ♖c7 A good move! Black had to look for another plan after c5 was prevented. He wants to activate his rooks through the e-file. The attack doesn't look so dangerous at the moment, but it really is dangerous. It's also hard to recommend a plan for White, since he can't use his h1 rook because of the h2 pawn. McShane consequently continues his plan, playing against the created c6 weakness, but he leaves his king alone.

20. ♖a6? [20. ♘c5 is also met with 20... ♖e7]

20... ♖e8? Black fails to make us of the mistake. [After 20... d4! Black is surprisingly close to winning. 21.e4

a) 21. ♖c5 ♖h3 Black threatens to take on e3 and on fxe3, ♖g2.;

b) 21. ♘c5 ♖e8;

c) 21. ♖xc6 is refuted nicely by 21...d3+! 22. ♔d2 (22. ♖xd3 ♖d5+) 22... ♖xf3 23. ♖xc7 ♖e2+ 24. ♔c1 d2+! 25. ♔b1 and Black can decide to take the queen or to give a spectacular mate with 25...d1 ♖+ 26. ♖xd1 ♖xd1+ 27. ♖c1 ♖xb3+! 28. axb3 ♖xb3+ 29. ♘b2 ♖xb2#;

21... ♖e8! Suddenly, it's really hard to parry the simple ♖xe4 threat. On 22. ♘c5 ♗e7! 23. ♘d3 ♗d6! wins the game. Now there is nothing against ♖xe4. If the king leaves the pin, the f3 square remains unprotected.]

21. ♖xc6 ♖ce7 22. ♖xf6! It seems like the game had a huge turn, but Black has prepared a blow with his last two moves...

22...d4!! The position opens on the naked e2 king and the Black heavy pieces start to attack with full power. [22... gxf6 23. ♖g1+ ♔f8 24. ♖xf6 ♖e6 25. ♖g7+ ♔e7 26. ♖d4 ± White is close to be winning.]

23. ♖f4 dxe3 24. ♖d3? McShane was already in severe time trouble and missed a fantastic combination. We must admit that without the following two moves, Black would have been lost. [24.h4! was the right move to prevent the idea that occurred in the game. This also gives some shelter when the White king reaches the g3 square. Black also needs to play precisely, otherwise he'll end up a piece down. 24... ♖d5! Only move! (24...exf2+ 25. ♔xf2 The queen covers the e2 square.) 25.fxe3! is also the only way to prevent ♖d2. 25... ♖xe3+ 26. ♔f2 and according to the computer, the following line is more or less forced and leads to a draw by perpetual check: 26...h5! 27. ♖c4! ♖d2+ 28. ♔g3 ♖8e6! seems to be over, but... 29. ♔h3! ♖g6 30. ♖xf7+ ♔h7 31. ♖g1! ♖xg1 32. ♖xh5+ ♔g8 33. ♖f7+= Of course, it's not easy to find this line that started with 24.h4 with any color over the board.]

24...exf2+! 25. ♔xf2

cover for the London super-tournament, that starts soon in December.

0-1

25...♖e1!! A brutal and beautiful move! White is lost.

26.♞e4 White tries to resist, but Ernst doesn't allow him to return to the game... [26.♞xe1 loses by force. 26...♔xh2+ 27.♔f1 ♕h1+ 28.♔f2 ♕xe1+ 29.♔g2 ♖e2+ 30.♔h3 ♕h1+ 31.♔g4 ♕g1+ and mate in a few moves.]

26...R8xe4 27.fxe4 ♕h4+! Black covers the d8 square, so the h1 rook is hanging. White has to play

28.♔g2 ♕g5+! The d8 square is still under control, so the next move is forced again...

29.♕g3 [29.♔f2 ♖xh1]

29...♕d2+ 30.♔h3 Now White has threats on b8, so the rook is taboo. Black can win the queen and the game with 30...♖e3, but he has found an even stronger move. [On 30.♕f2 Black can choose between 30...♕xf2+ (or 30...♖e2) 31.♔xf2 ♖xh1]

30...♕d7+! 31.♔g2 [31.♔h4 ♖xe4+; 31.♕g4 ♖e3+ 32.♔h4 ♕e7+ and mate is coming soon.]

31...♖e2+ 32.♔f3 [32.♔f1 ♕d1+]

32...♕d3+ 33.♔g4 ♕xe4+ 34.♔h5 ♕f5+ White resigned! A nice crush. Hopefully, McShane will quickly re-

(4) Sebag,Marie — Stefanova,Antoaneta [C78]

WWCC 2012 Khanty-Mansiysk (41.1), 20.11.2012

[Kamil Miton]

**1.e4 e5 2.♘f3 ♘c6 3.♙b5 a6 4.♙a4 ♘f6 5.0-0 b5
6.♙b3 ♙b7** A rare but interesting line. More often, Black plays 6...♙e7 or 6...♙c5.

7.d3 A simple move which leads to a quiet position. More aggressive is [7.c3 Looks logical as well. White is going to break the position in the center because the Black king hasn't castled yet. 7...♘xe4 8.d4 exd4

a) 8...♘a5 with the idea of getting rid of the pressure against the f7 square. 9.♙c2 exd4 10.b4 ♘c4 11.♙xe4 ♙xe4 12.♖e1 d5 13.♘xd4 Black is not able to solve the problems on the e-file without losing some material. (13.♙xd4 ♙e7 14.♙xg7 ♙f6 15.♙h6 ♖g8 and Black's pieces are very active. 16.♙xh7 ♙d7 17.♙xf7+ ♙c8) 13...c5 14.bxc5 ♙xc5 15.f3 0-0 16.fxe4 dxe4 17.♖xe4 ♙d5 From now on, the play seems to be very forced. 18.♙f3 ♘e5 19.♙f5 ♖ae8 20.♘d2 g6 21.♙f4 b4 22.♙b2 bxc3 23.♙xc3 ♘c6 24.♙h1 ♙xd4 25.♖xd4 ♘xd4 26.♙xd4 ♖e2 27.♘f3 f6 28.h3 The material is equal, but White is better because of the Black king that can potentially be-

come weak. Shirov manages to prove it very easily. 28...♖e4 29.♙d2 ♖d8 30.♙d1 ♖e6 31.♙c3 ♙c6 32.♙b3 ♖dd6 33.♖b1 ♙g7 34.♙b8 ♖e7 35.♙e3 ♖dd7 36.♖b6 ♙c3 37.♙f4 a5 38.♙h2 ♙c4 39.♙g3 ♖e6 40.♖b2 ♖e2 41.♙d6 1-0 Shirov,A-Tomashevsky,E/Khanty-Mansiysk RUS 2009;

b) 8...♙e7 9.♙e2 d5 10.dxe5 0-0 11.♖d1+=;

9.♖e1 d5 10.♘g5

10...♙f6 More often in this line, I met 10...♙d7 which doesn't bring good scores for Black. Objectively, 10...♙f6 should be better and it's hard to give an evaluation after this move. 11.f3 (11.♙xd5 ♙xf2+ 12.♙h1 0-0-0 13.♘xe4 ♙f5 and Black gets a strong initiative. 14.c4 (14.♙xc6 ♙xc6 15.♘g3 ♙f2 16.♖g1 dxc3 17.♙g4+ ♙b8 18.♘xc3 ♙c5 19.♙f4 ♙xb2 20.♘ge2 ♙xg1 21.♖xg1 ♖he8 0-1 Kislik,E-Lorand,N/Budapest 2010/CBM 138 Extra (30).) 14...bxc4 15.♙xc4 ♘e5∞) 11...h6 12.♘h3 (12.♘xf7 ♙xf7 13.fxe4 0-0-0 14.♙xd5 ♖xd5 is not the only possibility for Black. 15.exd5 ♙xd5 16.♙g4+ ♙b8 The bishop on b7 is not worse than the rook. Black has strong pressure on the h1-a8 diagonal.) 12...0-0-0 13.fxe4 dxe4 14.♖f1 ♙e5 15.♙xf7 ♙c5 16.♙h1 e3 17.♘f4 d3 The two passed pawns are crushing White's position. 18.♙e1 e2 19.♖f3 ♘e7 20.♘d2 g5 21.♘e6 g4 22.♘xd8 gxf3 23.♘xf3 ♙xf3 0-1 Palac,M-Bartel,M/Porto Carras

22... ♗xa2 23. ♖xa2 exd4 Good decision. Black changes the structure and gets the b4 square to look for counter-

play. [23...cxd4 24.♘f5 The knight on f5 is always unpleasant. White has the initiative. 24...dxc3? 25.♙xc6+-]

24.cxd4 ♘b4 [24...♖fe8 25.dxc5 dxc5 26.♙c3 White is better.]

25.♙xb4 [25.e5 dxe5 26.dxe5 ♘e4 is correct. (26...♘fd5 27.♘xd5 ♘xd5 28.♙g4 ♙c8 29.e6 fxe6 30.♙xh6 ♙f6 31.♙g5 Because of the weak king and the big amount of weaknesses, Black's position is worse.) 27.♙xb4 ♖xb4 28.♙c2 ♙b7 Black's pieces get activity. The position is unclear.]

25...♖xb4 26.♙c2 ♙b7 [26...♖d8 27.e5 dxe5 28.dxe5 ♘d5 with equal play. Now we see the idea of the 26...♖d8 move.]

27.♘f5

27...♖b8? Big mistake! White's idea was to push e5 in order to look for pressure on the kingside, and Black should do something to prevent this threat. For example: [27...♖c8 28.e5 dxe5 29.dxe5 (29.♘xe7+ ♙xe7 30.♖xe5 ♙f8 With the rook on c8 (not on b8), Black easily manages to recapture the c-pawn. 31.♖xc5 ♖xc5 32.dxc5 ♖b5 33.c6 ♖c5) 29...♘d5 30.e6 ♙f8 A very important prophylactic move to avoid the sacrifice on h6. (30...fxe6 31.♘xh6+

gxh6 32.♙g6+ +-) 31.♘e5 fxe6 32.♘xh6+ gxh6 33.♙g6+ Now white only has a draw. 33...♙g7 34.♙xe6+ ♔h7 35.♙f5+ ♔g8=]

28.e5 dxe5 29.♘xe7+ ♙xe7 30.♖xe5 White is winning the pawn. Black's position is losing.

30...♖b1+ 31.♔h2 ♙d8 32.♖xc5 ♘d5 Black is not able to keep any blockade on d5. Now the additional problem for Black is the weak f7 pawn. [32...♙d6+ 33.g3±]

33.♙f5 ♘e7 34.♙e4 ♘g6 35.♖ac2 ♖a1 36.♘e5 ♖xa5 Final mistake. Black could still fight after [36...♘xe5 37.♙xe5± With a II the heavy pieces on the board and the additional pawns, White should win this position.]

37.♘xf7 The final blow! Now Black doesn't have any chances.

37...♔xf7 38.♙f5+ ♔g8 39.♖xa5 ♙d6+ 40.g3 ♘h4 41.♖c8+ ♖xc8 42.♙xc8+ ♔h7 43.♙c2+ ♔h8 44.♖c5 ♘f3+ 45.♔h1 1-0

Endgame section

(15) Kosintseva,T (2515) – Kosintseva,N (2539)

Women World Championship (3.1), 17.11.2012

[Chess Evolution]

In the 3rd round of the World Championship, we saw a really unfortunate pairing. The Russian Kosintseva sisters (who could both have fought for the World Champion title) had to play each other. They are both true fighters, and they only agree to short draws against each other, which is completely understandable as they always work together with the same coaches. However, now in the KO format, only one of them could qualify to the next round. In the first game, Tatiana got an unpleasant endgame as White, Black threatens to play f5 after which a loss of a pawn is inevitable. White can't protect g4 and if she takes on f5, then h5 falls. The only chance for survival is to look for active counterplay. White holds the draw with an excellent technique, not giving any chance to her opponent.

40.a5! f5 41.♖a3!! This is the key move! White pushes a6 in the next move and creates a c-passed pawn, which is well supported by the king. It was a difficult question whether to take on f5 first or to play ♖a3 immediately. It'll become clear soon why the text move is better.... [Black is probably winning after 41.gxf5? ♜xf5 42.♖a3 ♜xh5 43.a6 bxa6 44.♜xa6+ ♔b7 45.♜d6 and the difference is 45...♜f5! An excellent place for the rook. It protects the f7 pawn, attacks f3 and cuts the White king along the 5th rank.]

41...fxg4 42.fxg4 ♜xg4 Many of us would have been understandably afraid of the connected passed pawns, which are extremely dangerous in rook endgames. However, in this they are too far behind still. White is in time to create counterplay.

43.a6 In similar situations, 43... b5 could be a nice response, but obviously the a6 pawn has to be eliminated now.

43...bxa6 44.♜xa6+ ♔b7

45.♜d6 ♜d7 is threatened and the Black pawns can't move yet. ♔b5 is another idea, with the intention of squeezing the Black king on the 8th rank.

45...♖g5 Black decided to sacrifice her f7 pawn, which allows White to get very close to a draw. [Other moves don't give winning chance either. 45...♔c7 46.♞a6 ♞f4 47.♔b5 transposes to 45...♞f4.; 45...♞f4 46.♔b5 ♔c7 47.♞a6 ♞f1 Otherwise, c5 and ♞a7. Now White can choose between two easy ways to draw: 48.c5 (48.♞a7+ is also possible 48...♔d6 49.c5+ ♔e5 50.c6 If Black's pawns were a bit more far advanced, the winning strategy could be to sacrifice the rook for the c-pawn and then promote his own pawns with the help of the king. But in this case, there is no way to execute this plan.) 48...♞b1+ 49.♔c4= White's pieces are too active, Black can't mobilize his pawns.]

46.♞d7+ ♔c6 47.♞xf7 ♞xh5 After eliminating the f-pawn, the draw is very close, but White still needs to make some precise moves.

48.♞a7 Not the only move, but I like it a lot to refresh all the ideas, which were threatened before exchanging the h- and f-pawns. [After some random moves like 48.♞f6 ♔d6 49.♞g6 Black could get winning chances with 49...♞h1 followed by ♔e5 and pushing the h-pawn.]

48...♞e5 [On 48...♞h1 49.♞a6+ ♔d7 50.♞a7+ secures the draw. Going to the 8th rank is always too passive ,

White simply plays ♔c5-d6, while 50...♔d6 moves into 51.c5+ ♔e5 (51...♔d5 52.♞d7+ ♔e4 53.c6 draws.) 52.♞h7 h5 53.♔b5 h4 54.c6 White is safe.]

49.♔c3 A logical decision in order to take the king closer to the opponent's pawns. White already had many other ways to draw as well.

49...h5 Black's only winning attempt could be to take his rook behind his h-pawn, but of course there is no realistic chance to reach the h8 square.

50.♔d4

50...♞g5 [50...♞e1 51.♞h7 ♞h1 52.♞h6! (52.♔e5 h4 White should not be greedy with 53.♔xe6?? h3 and h2 next.) 52...♔d7 (52...h4 53.♞xe6+ ♔d7 54.♞h6 h3 55.♔e3 h2 56.♔f2=) 53.♞h7+ and for instance on 53...♔e8 54.♔e5 h4 55.♔xe6 White threatens with mate and also has enough time to hide his king ahead of his c-pawn against the threatened h2 ♞e1 check.]

51.♞a6+ ♔d7 52.c5 ♞d5+ [52...h4 53.♞a7+= is an easy draw.]

53.♔c4 ♔e7! Black avoids getting pushed back to the 8th rank.

54.c6 [54.♖a8 was also good enough, transferring the rook to the h-file. 54...♗d8 55.♖a7+ ♗d7 56.♖a8 and ♗h8 next.]

54...♗e5 [54...h4 55.c7; 54...♔d6 55.c7+ In both cases White gets the e-pawn and reaches a draw.]

55.♔d4 ♖e1 56.♖a5 Creating new threats on every move. White deserves the draw for her activeplay.

56...♔d6 Practically agreeing to a draw... The rest needs no comment. [56...h4 makes no difference either. 57.♗h5 ♗h1 58.♖h7+ ♔d8 (58...♔d6 59.c7) 59.♔e5 h3 60.♔d6= White is safe by one tempo, the pawn could not reach the h2 square...]

57.♖xh5 ♔xc6 58.♖e5 ♖d1+ 59.♔e4 ♔d6 60.♖a5 ♖e1+ 61.♔d3 e5 62.♖a8 ♖h1 63.♔e4 ♖h4+ 64.♔e3 ♖h3+ 65.♔e4 ♖h4+ 66.♔e3 1/2

(16) Ju,Wenjun (2501) – Huang,Qian (2465) [E71]

FIDE WCh Women World Cup

Khanty-Mansiysk RUS (4.2), 20.11.2012

[Chess Evolution]

Black is a pawn up, but White has a bishop against a knight, which is good for the defense. Besides, there are only 4 pawns left on the board, which also increases the drawing chances. On the other hand, if Black manages to exchange the knight for the bishop, the rook endgame could become very dangerous for White... if Black manages to put the rook behind the a-pawn.

32.h4! A good move! Fixing Black's pawns on the light squares is always very important having a light-squared bishop. Now Black will have two options: to keep the pawns the way they are or to play g5, but the exchange of pawns is clearly favorable for White.

32...♔g7?! This is the first move of many that will follow where Black plays without a concrete plan. I think the only chance for Black was to take the king closer to a pawn... Of course, before starting this walk, Black's knight should be moved to a better position than b6, maybe to d6.

Then, by bringing the king to b6 or c5, Black would try to take a pawn into the action, while at the same time he would protect the pawns on the kingside with the rook and knight. White has very good drawing chances, but Black also has hopes for a full point.

33.g3 ♖c7 34.♔g2 ♘d7 What is Black's idea? It remains unclear.

35.♖a5 ♘c5 36.♖a3 ♔f8 37.♙c4 h5 38.♙a2 ♘e4 39.♙b1 ♘d6 40.♙d3 ♔e7 In the last few moves not much has happened, the only difference is that the White bishop went from a2 to d3, and this is not much...

41.♔f3 ♘c8 42.♖a6 White keeps waiting because Black doesn't really show that she has an idea of how to improve her position. Another step for White could have been to play: [42.g4 hxg4+ 43.♔xg4 followed by h5 or f4-f5. The defensive side should always go for a pawn exchange if it's possible.]

42...♘b6 43.♖a5 ♘d7 44.♔e3 ♘c5 45.♙c4 ♘d7 46.♙d3 ♘b8

47.♙e4 Once again we see many moves without big changes... and finally:

47...a6 Black had enough of making moves without too much sense and tries to change something.

48.f3! Good move. Now at 48...♖a7, 49.g4! would follow and Black doesn't have time for ♔d6-♔c7-♔b6 because of White's play on the kingside.

48...♖c3+ 49.♔d4 ♖c1 50.♔e3 ♖c3+ 51.♔d4 [51.♔f4 followed by g4 looks like a total draw to me.]

51...♖b3 52.♙d5 ♖b6 53.♖a3 ♘d7 Finally, Black managed to bring the knight out from b8, but is it enough to give real winning chances?!

54.♙c4 ♖d6+ 55.♔e3 ♘c5 56.g4 [Also good was 56.♖a5 ♖c6 57.g4 and Black is completely pinned and can't avoid a draw.]

56...hxg4 57.fxg4 By having a free h-pawn, White will have no problems at all to get a draw. The passed h-pawn always can be easily exchanged, which leaves Black with almost no material to go for a win.

57...♔f6 58.♖a2 Another good move, although White could have kept going with her strategy until the end. [58.♖a5 ♖c6 59.♙d5 ♖c7 60.♙c4]

58...♔g7 59.♖f2 ♘e6 60.h5 And here comes the h-pawn.

60...gxh5 61.gxh5 ♘g5 62.♖a2 A Black pawn is falling — the draw has been achieved.

62...♔h6 Very good defense by White and a good example on how to play similar positions. It looks simple, but it's not that easy to do it in a practical game!

1/2

Clash of the Titans

(17) Tal, Mihail – Larsen, Bent [B77]

Zuerich Zuerich, 1959

[Csaba Balogh]

As I promised you in the previous issue, I present you Tal's improvement over the Fischer-Larsen game in the Sicilian Dragon.

1.e4 c5 2.♘f3 ♘c6 [In that game, they reached the same position from the standard Dragon move order: 2...d6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 g6 6.♙e3 ♙g7 7.f3 0-0 8.♚d2 ♘c6 9.♙c4 ♘xd4 10.♙xd4 ♙e6 11.♙b3]

3.d4 cxd4 4.♘xd4 g6 This move order allows many different setups for both sides. The main alternative for White is 5.c4, transposing into the Maroczy structure.

5.♘c3 ♙g7 6.♙e3 ♘f6 7.♙c4 0-0 8.♙b3 d6 9.f3 Here again, just as in the Dragon 9.♙c4 line, Black's best option is the 9...♙d7 setup, but Larsen sticks to his pet line and plays

9...♘xd4 10.♙xd4 ♙e6 11.♚d2 Now we are back to the Fischer-Larsen game.

11...♙a5 12.0-0 b5 13.♚b1 b4 14.♘d5 ♙xd5

15.exd5! This was a very strong novelty at that time, but it had to be justified with very precise and deep preparation (in our time, the computers suggest the right moves after a few seconds of thinking, but of course, during our current game it was different). The main drawback of the move is the bishop on b3, which seems to be a good target for Black with the ♙b5 a5-a4 plan. On the other hand, the main plus of exd5 is the backward pawn on e7, which becomes a real weakness now. [On Fischer's move 15.♙xd5 Larsen had definitely discovered the novelty which was mentioned in the previous CEWN. 15...♘xd5! 16.♙xg7 ♘c3+! 17.bxc3 ♚fb8!! 18.cxb4 ♚xb4+ 19.♚xb4 ♚xb4+ 20.♙b2 ♚ab8= with an equal endgame.]

15...♚b5 16.♚he1 As it became clear with practice over the years, after this inaccuracy Black has enough resources to obtain a safe defending position. [16.♚d3! is the right move, rescuing the light-squared bishop immediately. 16...♚xd3 17.♚xd3 ♚fc8 18.♚e1

18...Rc7 Black's optimal regrouping would be Nd7, exchanging the dark-squared bishop, but it's never possible (neither after Qf8) because the e7 pawn would hang. White can choose between two good plans now: 19. Qf2 with the idea to overprotect the d5 pawn in order to transfer the bishop to c6 through a4. (Or 19.c3 and White sooner or later must try to win the game on the queen-side, where he's clearly better prepared. 19...a5 20.cxb4 axb4 21. Rdd1! with the idea of taking control of the c-file, so Black should play 21...Rac8 22. Qb6! Rb7 23. Qf2 Again, to cover the d5 pawn with the rook. 23...Rbc7 24. Qa4! with better chances for White. The b4 pawn will be a clear target in the future.)]

16...a5 17. Qe2 Qxe2 18. Rxe2 Black can protect the e7 weakness with concrete play.

18...a4! [18...Rfe8 is bad in view of 19. Qa4!]

19. Qc4 Rfc8 20. Qb5

20...Ra5! Very well played! White is forced to give up his bishop pair, and with it, the biggest part of his advantage as well. [20...Nxd5 leads to an unusual endgame after 21. Qxg7 Rc5! 22.c4! The following line is quite forced. White opened his back-rank with the last move. 22...bxc3 23. Rxd5! Rxd5 24. Qc6 Rd2! (On 24...c2+ White has to react with and only move, but it's actually winning on the spot. 25. Qc1!+- Black ends up a clear piece down.) 25. Qxa8 c2+ 26. Qc1 Rxe2 27. Qc3 Rxc2

28. Qc6 Here we are! Black is materially more than fine, but after losing the a-pawn, he ends up in a really unpleasant endgame. The bishop pair will support the a- and b-passers with great power, while Black's counterplay

with the h-pawn comes too slow. 28...♖xh2 29.♙xa4 h5 30.b4! ♔f8! (30...h4 is too slow. 31.b5 ♖g2 32.b6 h3 33.b7 h2 34.b8 ♔+ ♔h7 35.♔h8#) 31.♙c6 ♖h4! The last two moves were only to stay in the game, but it still looks very suspicious for Black.]

21. ♙xf6 [The bishop could not reach its destination with 21.♙c6? because of 21...♘xd5! 22.♙xg7 ♖xc6]

21... ♙xf6 22. ♙c6 Now the position seems to be dead drawn with the appearance of the opposite-colored bishops. However, White still has some chances to create danger on the queenside. Tal excellently exploits all his possibilities.

22...a3 This is the right move, putting the pawns on dark squares, where they can be protected by the bishop, while White's bishop is unable to attack them. [22...♖b8 23.♖e4 b3 is a mistake, since after 24.axb3 axb3 25.c3 the days of the b3 pawn are counted.]

23.b3 ♔f8

24.c4! Great move! White gets rid of his backward pawn. [24.♖e4 ♙c3 25.♖d3 ♖c5= To prevent any kind of ex-

change sacrifices on c3, after which the queenside pawns could become very dangerous.]

24...bxc3? A serious mistake ! Larsen got too greedy... Instead of aiming for a blockade, he prefers to be a pawn up, but he underestimated the power of the passed b-pawn. [After 24...h5 I don't believe White has enough resources to create any realistic winning chances.]

25. ♔c2 White is ready to mobilize his b-pawn.

25... ♖a7 [25...♖b8 only temporarily stops b4, since White can play 26.♖e4]

26.b4

26...e6? Objectively, this is probably the decisive mistake, but the position was already very unpleasant. Black should have chosen one of the following two ways to defend: [26...♖b8 27.♖e4 ♖b6 28.b5 looks quite bad for Black. The idea is ♖b1–b4–a4, exchanging a pair of rooks, after which the a3 pawn becomes vulnerable. If White manages to get it, the a4–a5 plan would then decide the game.; 26...e5 would have been probably the best chance for survival, with the idea of transferring the bishop to b6. The position remains better for White, as he has many

options to attack the a3 weakness. 27.♔xc3 ♕d8 28.♖d3 followed by ♔c4 and ♖c2-c3 for instance.]

27.b5! This concrete handling of the position was probably missed by Larsen. White threatens to take on e6 now, and on

27...exd5 28.b6! The rook does not have a good square. Black always moves into some kind of tactical motif.

28...♖e7 [28...♖a6 loses to 29.♕b7!+-; 28...♖xc6 29.bxa7 ♖a6 30.♖xd5 ♖xa7 31.♖xd6+- is also hopeless.; 28...♖a5 29.b7 ♖b8 30.♖e8+! decides the game. 30...♖xe8 31.♕xe8+- and the pawn promotes.]

29.♖xe7 ♔xe7 30.♖e1+! Tal continues playing the most direct way! [30.b7 ♖b8 31.♖xd5+- should also lead to a full point after ♖a5.]

30...♕e5 [After 30...♔f8 White promotes his pawn by 31.b7 ♖b8 32.♖e8+!+-]

31.b7 ♖b8 32.f4 White wins a piece and Black gets many pawns for it, but the most important factor is that White can preserve his b7 pawn.

32...♔e6 33.fxe5 dxe5 34.♖b1! The beginning of a strong maneuver, transferring the rook to the a-file. [34.♔xc3? would have been a huge blunder. 34...♔d6 After Black wins the b7 pawn, it's only him the one who can have a better position.]

34...♔d6 35.♖b6! d4 [35...♔c7 36.♖a6+-]

36.♖a6 f5 37.♖a8 ♔c7 White needs to find the last precise moves.

38.♕d5 Before exchanging the rooks, White must win the a-pawn. [38.♖xb8 ♔xb8 seems like a drawn end-game. White should keep his b7 pawn, which avoids Black from activating his king, but it sticks the bishop to the h1-a8 diagonal and White has no winning plan. 39.♕d5 e4 Going for the queenside pawns is only risky for White. 40.♕g8 h6 41.♕h7 e3 42.♔d3 f4 43.♕xg6 ♔xb7 White doesn't have any winning chances, but it looks like he has a perfect blockade against the invasion of the Black king.]

38...e4 39.♖xa3 The game is over. Black tries a last desperate attempt.

39...e3 40.♔d3 g5 41.♔xd4 An instructive game, which shows how tricky this type of positions can be with opposite colored bishops.

Editorial Preface

Let's start with the main news of the week: We already have the 2 finalists of the Women's World Championship by knock-out system: Antoaneta Stefanova from Bulgaria and Anna Ushenina from Ukraine. One of them will be the new World Champion and this could be the second time Antoaneta gets the title in normal chess; she also could get a double WC title because she's already the 2012 World Champion in rapid chess. The winner of the match will qualify to a 200.000 Euro match against the current WC, Hou Yifan.

Hou Yifan herself has already been for quite some time nothing more than a kibitzer, after losing in a very unlucky way against Monica Socko in the 2nd round.

The 2nd Grand Prix started in Tashkent with a really strong line up. In the first rounds, we could easily found out who is in good shape and who isn't... Morozevich is showing some great chess again, winning his first two games. On the other hand, Gata Kamsky is having a horrible tournament.

As usual, we hope You enjoy the chess material that we provide in the CEWN Nr 40!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Carlsen,Magnus (2848) – Bruzon Batista,Lazaro (2706) [B40]

Cuadrangular UNAM 2012 Mexico City MEX (1.1), 24.11.2012
[Csaba Balogh]

A really spectacular rapid game by Magnus Carlsen. The game is full of very interesting and unusual ideas. However, a closer look shows us that there were many mistakes as well.

1.e4 c5 2.♘f3 e6 3.d3 Recently, Carlsen just wants to obtain a playable position out of the opening and avoids the long main lines. A few CEWN ago, we analyzed how he beat Anand in the 2...d6 3.♙b5+ sideline of the Sicilian.

3...♘c6 4.g3 d5 5.♚e2 ♘f6 6.♙g2 ♙e7

7.0–0 A closed system without too much theory, where all the pieces are on the board. Carlsen trusts that this will allow him to outplay his opponent in the middlegame.

7...b5 Bruzon is familiar with the main ideas of White's setup and plays a prophylactic move. [The most com-

mon move is 7...0–0 which is met with 8.e5 ♘d7 9.c4 and ♘c3 next, with a few hundred games in the database.; An interesting alternative is 7...b6!? and on 8.e5 ♘d7 9.c4 d4 with the idea of leaving an option for Black: to castle queenside after ♙b7 and ♚c7.]

8.exd5 This is basically a novelty, a very interesting and concrete one.

8...exd5 [White gets an advantage after 8...♘xd5 9.c4! and the bishop on g2 becomes powerful. 9...bxc4 10.dxc4 ♘f6 11.♚d1 (White can't win material with 11.♘e5 because of 11...♘d4 but instead, a calm development of the pieces guarantees him a clear edge.) 11...♚b6 ♚c7 always moves into ♙f4. 12.♘c3 ♙b7 13.b3 0–0 14.♘a4 ♚a5 15.♙d2 ♚c7 16.♙f4+= and the c5 pawn becomes a long-term weakness after the exchange of the dark squared bishops on d6.]

9.d4! A direct attempt to create a drawback for the 7...b5 pawn. [9.c4 also looked quite logical, in order to open the diagonal of the g2 bishop, but Black has 9...♙g4 which seems to solve all the problems. It's not easy to leave from the pin and the ♘d4 threat.]

9...c4 10.♘e5! This is the whole point behind Carlsen's concept! He tries to make use of the fact that Black hasn't castled yet. Now the game becomes very sharp.

10...♘xd4 Black was forced to go for the complications. [On 10...♙b7 11.♘xc6 ♙xc6 12.♚e1 and Black has huge problems to castle.]

11.♚d1 The first critical position from Black's point of view. He has many possibilities, and at first sight it's not clear what's the problem after any of them. Bruzon had to

decide quickly, as the time control was only of 15 minutes per player.

11...♔b6 Bruzon wanted to control the c6 square, but this moves into other ideas... [11...♞e6 is not enough for equality. 12.♞c6 ♔d7 13.♞xe7 ♔xe7 14.♞c3 White wins back the pawn and obtains a better position. 14...♙b7 15.♞xb5+=; 11...♙c5 probably would have been the best reaction. 12.♙e3 (12.♞c3 ♙b7 13.♙e3 transposes to 12.♙e3.) 12...♞e6 13.♙xc5 ♞xc5 14.♞c3 ♙b7 15.♞xb5 0-0 After this more or less forced line, White seems to have a tiny advantage because of the hole on the d4 square, but Black also has a dynamic position, for instance with ♖e8 and ♔b6.; 11...♞f5 with the idea of taking back the e7 bishop with the knight in order to preserve the extra pawn. This is met with 12.♞c6 ♔d6

13.♞c3!! This pretty combination gives an edge for White in all the lines. 13...♔xc6 (13...♙e6 14.♞xe7 ♔xe7 15.♙g5) 14.♞xd5! Black has nothing better than 14...♙b7 15.♞xf6+ ♔xf6 16.♙xb7+= with a better position because of the pair of bishops.]

12.♙e3 ♙c5 13.♞c3! Good decision! White had two more tempting possibilities, but they were less strong. [13.a4 looked really dangerous with the main idea of a5, winning a piece. 13...♞e6!! Actually, this is the only move, but of course, it's enough to have one good move in each position. :) (13...bxa4 loses to 14.♞c3!+- and ♞a4 next. Black can't avoid losing a piece.) 14.♙xd5 ♞xd5 15.♔xd5 White seems to win, but... 15...♙xe3!! 15...♙b7 didn't work because of ♔d7... (15...♖b8 would have also lost after 16.♙xc5 ♔xc5 17.♔xc5 ♞xc5 18.axb5+-) 16.♔xa8 0-0 White is an exchange up, but the absence of the g2 bishop makes his king so weak that he can only dream about an advantage. 17.♔c6 ♔d4! Black needs the queens on the board to compensate for the material deficit. 18.♞f3 (18.fxe3 ♔xe3+ 19.♔h1 ♔xe5 and only Black can be better. If the bishop occupies the long diagonal, the game is immediately over.) 18...♙xf2+! 19.♖xf2 ♔xb2 Black is fine!; 13.b4 also suggested itself, but Black has 13...cxb3 14.axb3 ♞f5! 15.♙xc5 ♔xc5 and Black seems to hold.]

13...♙e6 [13...♙b7 in order to avoid the tricks on the g2-a8 diagonal. This was a decent alternative, White has to play energetically to get an edge. 14.a4! with the idea of a5! (14.b4 cxb3 15.axb3 ♞e6 Black slips away.) 14...♞e6 15.a5! (15.♞xd5 leads nowhere 15...♞xd5 16.♙xd5 ♙xe3 17.♙xb7 ♔xb7 18.fxe3 0-0 and Black holds.) 15...♔a6 The only move to avoid a6. (15...♔c7? 16.a6 Black's position collapses.) 16.♙xc5 ♞xc5 17.♖e1 0-0 18.♞xd5 ♞xd5

19. ♖xd5 with a small but stable advantage for White due to his active pieces in the center.]

14.a4 [14. ♘xc4!? was also very strong. 14...bxc4 15. ♖a4 ♖c6 16. ♘xc5 ♘f5 (16... ♖xc5 17. ♖xd4± Black can't play against such a "beast" on d4.) 17. ♖d4 ♘xd4 18. ♖xd4+= with an obvious advantage. Black has no compensation for the structural weaknesses and the bad bishop on e6.]

14...b4! Only move.

15.a5! ♖c7 16. ♘a4 [16. ♖xd4 bxc3 17.bxc3 is also slightly better for White, but Carlsen preferred to keep the position dynamic!]

16... ♖d6 [Black will really miss the dark squared bishops after 16... ♖xe5 17. ♘xc5 ♘c6 White gets more than enough compensation with powerful play. 18. ♖e1! ♖d6 Black seems to consolidate, but

19.b3!! Black can't allow the opening of the position with bxc4 19...cxb3 (19...c3 is met with 20. ♘a6! trying to go for ♖c5! 20... ♘e7 21. ♖e2± protecting the knight and refreshing the ♖c5 threat, plus the additional ♖b5 check.) 20. ♘xb3! and Black must forget about castling because of the ♖c5 move.]

17. ♘xc4! White restores the material balance and gets a clear advantage with his active pieces. Until this moment, Carlsen has showed some brilliant chess.

17... ♖xc4 18. ♖xd4+=

18... ♖e7 19.b3 [19. ♖e1 0-0 20.c3+= was the computer's suggestion, in order to bring the a4 knight back to the game, but I prefer Carlsen's move.]

19... ♖c7 20.c4 [Here I believe 20. ♘b2 would have been stronger, transferring the knight to d3. Carlsen continued playing dynamic chess, but he made a huge mistake in his calculation...]

20... ♖d8 [20...bxc3 21. ♘xc3 0-0 22. ♖e1+= isn't a dream for Black either.]

21. ♖xf6? White had foreseen the position after the 26th move, but they both missed an intermediate move. [21. c5! 0-0 22. ♘b2 driving the knight to d3 again. This guarantees a clear advantage.]

21... ♖xf6? [21...dxc4! 22. ♖d4 ♖f6 Black is suddenly winning. Such kind of mutual blunders are possible in rapid chess, even on the highest level.]

22.cxd5! This position was in Carlsen's mind when he started the actions with b3-c4.

22...0-0 [Black can't accept the exchange with 22... ♖xa1 23. ♔xa1 and either e6 bishop or the g7 pawn will fall. Both of them mean the end of the game. 23... ♗xd5 24. ♔xg7+-]

23. ♖c1 ♔xa5 The position is materially balanced, but the powerful d-pawn gives White the upper hand. White immediately squeezes down his opponent.

24. ♘c5! ♗c8 25.d6! Black can't wait for ♔d5 and ♖fd1, since he remains without a single move. Bruzon finds the only chance to create counterplay!

25... ♗c3! 26. ♔d5! The knight on c5 had to be fortified.

26... ♗g4!

27.h3!! Excellent intuitions! We'll speak about this idea a few moves later. [27. ♖c2 was also possible, but Black would keep his disturbing bishops. 27... ♔b6 28.d7 ♔b5∞]

27... ♗e2 28.d7! ♗xf1 29. ♖xf1 Here we are! White doesn't even have a pawn for the exchange, but he is dominating with the d7 pawn. Black's rooks can't be activated because of this factor. The bishop on c3 is well

placed to control the e1 square, but White can go around with ♖d1-d3-e3 and might also transfer his bishop to c4. Black has no active plan, he can only sit and wait to see what happens. It's very important that White should not get tempted to equalize the material with ♘b7, since the knight has a much bigger value than the paralyzed rooks.

29...g6 30. ♖d1 ♖b8 Black tries to jump out with ♖b5, but this just helps White to play the plan that he wanted.

31. ♗f1! The bishop will be more active on c4, as the new main target is the Black king.

31... ♔h8 32. ♗c4 ♖d3-f3 is coming next. Black still can't do anything better than waiting.

32... ♗f6 33. ♖e1! ♗e7 had to be prevented, and the rook can continue his journey to the 3rd rank from here as well.

33... ♔b6 34. ♖e3 a5 Black tries to do something, but a4 is never a threat, as White simply takes it...

35. ♖f3 ♗g7 Black has temporarily parried the concrete threats, so it's time to increase the pressure.

36.h4! Forcing a huge weakening with the h5 threat.

36...h5 37.♞e4 Very logical plan to transfer the knight to g5, but it was played slightly prematurely. [White could have improved his position with 37.♞g2! and Black is in zugzwang anyway. 37...♞a1 What else?! (37...♞bd8 allows the knight to regroup on d6 38.♞b7 ♞b8 39.♞d6+-) 38.♞g5! with the double threat of ♞h6 and ♞f7. 38...♞g7 39.♞xf7 ♞xf7 40.♞xf7+-]

37...♞d4! Probably this move was missed or underestimated by Carlsen. Black manages, at least, to get rid of the queens.

38.♞g5! ♞xd5 39.♞xd5 ♞c3? This blunder finishes the game... [39...f5 was the only move. 40.♞e6 ± White holds his advantage and will probably win with good technique, but with the opposite colored bishops, Black will always retain surviving chances.]

40.♞xf7 1-0

(2) Ponomarev,R (2741) – Morozevich,A (2748) [C07]

FIDE GP Tashkent Tashkent UZB (5), 27.11.2012

[Arkadij Naiditsch]

1.e4 Another game from the FIDE Grand Prix. A great positional win was achieved by Ponomarev over the tournament leader, Alexander Morozevich. Let's take a closer look at Ruslan's great play

1...e6 It's not easy to predict Morozevich's first move, but the French is one of his favorite openings.

2.d4 d5 3.♞d2 This is the „slow“ line in comparison to 3.♞c3, where we recently saw a lot of crazy games after 3...♞b4 4.e5 c5 5.a3 ♞xc3 6.bxc3 ♞e7 or 6...♞c7 with super unclear play.

3...c5 4.♞gf3 This move is not the main one, but I think it's not a bad choice at all... [4.exd5 ♞xd5 5.♞gf3 cxd4 6.♞c4 That's the main line.]

4...cxd4 5.♞xd4 ♞c6 We are still following the theory, of course.

6. ♖b5!? A nice idea. First White is forcing Black to play ♗d7 and only then he'll take on c6. The bishop on d7 will take a worse position than on c8. Not often we can face the case, that a developed bishop is worse than an undeveloped one.

6... ♗d7 7. ♘xc6 bxc6 8. ♖d3 ♖d6 Logical play. If the Black bishop would be on c8, a move like ♗f6 would be very possible, with the idea of going to ♗d7 after White's e5.

9. ♔e2 White wants to play e5.

9... ♔c7 10. ♘f3 And e5 is a threat again.

10... dxe4 11. ♔xe4!? White is taking the queen to h4, not allowing Black to castle short that easily. We can see that probably White is already a bit better because of his better pawn structure, which could be important in the endgame.

11... ♘f6 12. ♔h4 h6 In many cases, White wants to play ♗g5. [12... 0-0 13. ♗g5]

13. 0-0

13... c5 Logical move. Black wants to develop his bishop to c6 and maybe even think about castling long in the future.

14. ♘d2!? Logical and solid play by White. Without waiting for Black's ♗c6, White is taking the knight to a better position on c4 or e4, depending on Black's play. [14. b3 could have been the other try. 14... ♗c6 15. ♗b2!? White is trying to make use of the fact that Black hasn't castled yet. 15... ♗xf3 16. gxf3 It's hard to say if White has an advantage, but I like his position here.]

14... ♘d5 15. ♘c4 I think we can say that we have a +/- position.

15... ♗f4 Usually in these structures Black tries to avoid an exchange of the dark-squared bishop. But it's not possible now. [15... ♗e7 16. ♔g4! and it seems like Black will spend quite some time without castling.]

16. ♔e1 All of Ponomarev's moves look very natural and easy, but they are based on a very good positional understanding.

16... ♖b8 17. ♗e4 Forcing Black to take on c1, so the White rook can join the game.

17... ♗xc1 18. ♖axc1 ♘b6?! Black moves his knight away from the center. I think this isn't the best choice. [18... 0-0 looks solid 19. ♖cd1 and we are in a typical +/- position, because Black's worse pawn structure.]

19. ♘e3! Of course no exchanges! The Black knight on b6 is now completely out of the game.

19... 0-0 20. b3 A typical idea of cutting the knight on b6 with b3-c4.

20...f5 A very dangerous move for Black. It creates a lot of holes and targets in the pawn structure, but on the other hand, to play 20...♖fd8 21.c4 doesn't feel good either.

21.♗d3 e5

22.f3! Another great positional move by White. Black's only idea is to play e4, so why not to block it on the spot?!

22...♖be8 23.♖cd1 ♔h8 The time has come for White to take some action against Black's central pawns.

24.c3?! A good idea, but it gives Black a chance for a tactical solution. [24.a4; 24.♘c4 Both moves would keep a very nice position for White. We can clearly see that almost all the Black pawns are potential weaknesses.]

24...♖f6?! Black misses his chance! [It was the moment for a break-through. 24...e4!? 25.fxe4 fxe4 26.♗c2 (Of course not 26.♗xe4? ♖f4) 26...♗e5 27.c4 ♗c6! followed by ♘d7-♘f6 and Black might hold the game.]

25.♗c2 The position doesn't look that bad for Black, but it actually is. The c5-e5-f5 pawns look pretty nice, but are under the constant attack of White's pieces. It's not easy to realize this at first sight, but if we look deeper, we can see that Ponomarev really knows what he's doing...

25...♗e6 Black has no clear plan...

26.♖d2 a5 27.c4 Cutting the knight on b6 and leaving the options of ♖ed1 or ♖de2 open. A really unpleasant position for Black.

27...♘c8? And here comes the mistake. Under pressure, Morozevich, with no clear plan, tries to bring his knight into the game, which is very logical.. but he overlooks a nice tactical blow.

28.♗xf5! A very nice small tactic!

28...♖xf5 [In case of 28...♗xf5 29.♘d5 ♗c6 30.♘xf6 ♗xf6 31.♗f2 White is winning the second pawn on c5 and probably the game. Black's main disadvantage is his super bad knight on c8, which still is completely out of the game.]

29.♘xf5 ♗xf5 30.♗h5! Exact move. White is forcing the Black rook to leave the e-file, after which the e5 pawn will fall.

30...♖f8 31.♖d5 Black's material disadvantage is not that big, but the horrible position of his knight on c8 plus White's future attacking motives, and the weak c5 pawn, make this position impossible to hold.

31...♔h7 32.♖dxе5 ♘g6 33.♚h4 White wants to play ♚f2.

33...♖d8 34.♚g3 [34.♚f2 ♖d4 and Black keeps fighting.]

34...♙f7 35.♚f4 ♘g6

36.h4! White will take the pawn to h5 and the Black king will be under attack.

36...♖d4 This move loses on the spot, but Black's position is already lost.

37.♚f8! Exact until the end. White wants to play h5 and ♖e8 or ♖e7.

37...♚d7 38.h5 [Of course not 38.♖e7? ♘xe7 39.♖xe7 ♖d1+ 40.♔h2 ♚d4 and Black protects his pawn on g7.]

38...♙f7 39.♚xc5 And here comes the 3rd pawn.

39...a4 40.♖e7 White had a wide choice of winning moves, but this is the simplest one.

40...♘xe7 41.♖xe7 ♖d1+ 42.♔h2 A really wonderful game by Ponomarev, with a lot of very useful positional ideas combined with a nice tactical blow.

1-0

(3) Mamedyarov,S (2764) — Svidler,P (2747) [D94]

FIDE GP Tashkent Tashkent UZB (3), 24.11.2012

[Csaba Balogh]

After a long while, Mamedyarov finally succeeds to show something against the Gruenfeld defense on the highest level.

1.d4 ♘f6 2.c4 g6 3.♘c3 d5 4.♘f3 ♘g7 5.e3 This was considered to be a harmless setup, but in our computer era, we must reconsider many ideas.

5...0-0 6.♙e2

6...e6 This is a sideline, Black would like to continue the development with b6-♙b7, but first he stabilized the center. However, I don't believe this can be enough for equality. [The main move is 6...c5 which is also in the spirit of the Gruenfeld — a quick counterattack against the center. Probably in the near future, we will know what Mamedyarov prepared here. Recently, I have seen some interesting games with 7.dxc5 ♚a5 8.cxd5 This was given as a mistake before in the theoretical books, because of 8...♘xd5 9.♚xd5 ♘xc3+ 10.♙d2 ♖d8 but the machines re-evaluate many things. They recommend 11.♚xd8+!

♔xd8 12.♙xc3 with a completely unclear position. I guess Mamedyarov has a huge amount of analysis here and is ready to go for these complications.]

7.0–0 b6 8.b4! This is basically the main idea of the 5.e3 system, even though we are already more or less in new territory from the opening point of view. White wants to play on the queenside, and the game shows very well the most typical plans.

8...dxc4 Svidler avoids getting squeezed down after c5. This is definitely the right way to play. [White gets a pleasant edge after 8...♙b7 9.c5! Black must suffer long because of the space advantage. The only critical question is whether Black will be able to undermine the queenside pawns or if White can consolidate... 9...a5 10.b5! bxc5 11.♙a3! This is a relevant detail, with which we'll meet in different occasions during the game. 11...♘bd7 12.♘a4! ♘e4 13.♖c1! and White wins the opening battle, so the 9.c5 move is justified!; Black is not well prepared for 8...c5 9.bxc5 bxc5 10.♙a3! This is the motif again! 10...♘a6 11.♔a4 ± Black can't hold his hanging pawns and pieces. cxd5 is the direct threat and the a6 knight is hanging.]

9.♙xc4 ♙b7

10.a4! Very well played! White wants to develop his bishop to a3 in order to fight against Black's main resource, the c5 break, but first he plays a4 to support his future plans on the queenside, which are connected with the moves b5 and a5.

10...♘bd7 11.♙a3 ♖e8 Svidler prepares for his only existing counterplay: the c5 break. First, the rook had to be removed from the pin, because otherwise, White takes twice on c5 and threatens to win an exchange with c6.

12.♔e2 Mamedyarov believes that White is better prepared for c5 and he wants to finish the development with ♖fd1 in order to secure a clear advantage. But things are not that easy... [12.b5!? seriously comes into consideration, with the idea of taking with bxc6 on c5, and White consolidates his center. I believe White is better here and his position looks much easier to play.]

12...c5 Even if it's bad, Black has to try it. [Of course, the previous move were not based on the e5 break, because of 12...e5? 13.♙xf7+! ♔xf7 14.♔a2+ ♔f8 15.b5+ ♖e7 16.♘g5+- wins.]

13.dxc5 [Another motif in such positions is 13.bxc5 bxc5 14.♖ab1 to leave the pin on the h8-a1 diagonal, but now Black seems to have 14...♙xf3! (14...♖b8 15.dxc5 would be a better version than the game for White.) 15.♔xf3 ♔a5 and on 16.♖fc1 cxd4 17.exd4 ♖ab8 White might be better here as well, if he manages to make use of the weak b5 and d6 squares with the minor pieces, but Black also has his counterplay against the isolated pawns on d4 and a4.]

13...bxc5 14.bxc5 [14.b5? To obtain a superior pawn structure would not be the best idea now, because of 14...♘d5]

14... ♙f8 Black decides to fight for the pawn, but his pieces will get pinned soon. [14... ♙xf3 15. ♖xf3 ♘e5 16. ♗e2 ♘xc4 17. ♗xc4 ♘d5 This forced line was the critical one, and Mamedyarov had to check it before taking twice c5. He found the solution in 18. ♖ad1! ♙xc3 19.e4! White wins back the piece and ends up with an extra pawn. There is a hidden detail, that after 19... ♗h4 20.g3! ♗g4 21.f3! ♗h3 22.exd5 exd5 23. ♖xd5 ♙e1 White prevents the ♙xg3 threat by 24. ♗c2! ± and the queen goes to g2.; 14... ♗a5 doesn't give equality either. 15. ♘b5! Black will suffer a long time because of the hole on d6. 15... ♘e4 16. ♘fd4+=]

15. ♙b5! This looks very bad for Black, but Svidler finds a clever way to neutralize the pins.

15... ♖c8! [15... a6? was refuted by 16.c6!+-; 15... ♗c7 was another option, but White retains some advantage after 16. ♖fc1 ♖ec8 17. ♙xd7! Again, White's advantage is based on the d6 hole, which the knight is going to occupy soon (17.c6 was also tempting, but 17... ♙xc6 18. ♘e4 ♙xb5! seems to hold.) 17... ♘xd7 18. ♘b5 ♗a5 19. ♘d6 ♙xd6 20.cxd6 ♗xa4 21. ♙b2 White must be better with the d6 pawn and the a1–h8 diagonal.]

16. ♖fd1

16... ♙xc5! Very suspicious, but Black is alive. The main idea to leave the pins is ♙xa3 ♖xa3 ♗e7 and when the rook moves, to play ♖ed8.

17. ♘e5! Pressing against d7 with full power. [17. ♙xc5 ♖xc5 The attack on the c3 knight gives an important tempo in order to leave the pin.; 17. ♙b2 ♗e7 and ♖ed8 next.]

17... ♙xa3 18. ♘xd7! Black was fighting perfectly so far, but now he failed to find the right direction. Black will end up with a material disadvantage, but in both cases he gets seemingly huge compensation. [18. ♖xa3 doesn't win, because of 18... ♗e7!]

18... ♖xc3? Svidler prefers to give an exchange and keep the queens on the board, but it soon becomes clear that he doesn't have enough. [However, after 18... ♘xd7! 19. ♖xd7 ♖xc3! (19... ♗b6? simply loses to 20. ♖xa3) 20. ♖xd8 ♖xd8 I don't believe that White can win this game. 21.h3

21...a5! Black fortifies his bishop on b4. The rook and the bishop pair combined with the healthy Black's pawn structure give an excellent fortress. White's only chance is to exchange a pair of rooks and then try to attack the f7 pawn with the queen and the bishop from e8. With a good defense, Black should not have any problems to defend against this, and should safely hold the draw.]

19. ♖xf6+ ♜xf6 **20.** ♗xe8 Black can't create enough counterplay; the misplaced bishop on e8 quickly comes back to the game.

20... ♗e4 [After 20... ♖g5 the e8 bishop even becomes a useful piece, because of 21. ♗xf7+! ♜xf7 (21... ♖g7 22.e4+-) 22. ♖d7+ +-]

21. ♖g4 Mamedyarov wants to exchange the queens with ♜d4. [21. ♖d7 was also possible in order to convert the advantage to a pawn. 21... ♗c6 22. ♖xf7 (22. ♗xf7+? is not good. 22... ♖g7 23. ♖xa7 ♗c5 24. ♖c7 ♗d6 25. ♖a7 ♗b8) 22... ♖g5 23. ♗xc6 ♖xf7 but Black has decent drawing chances with the opposite colored bishops.]

21... ♗d5 **22.** ♖d4 ♜xd4 **23.** ♖xd4

23...a6 Black doesn't allow his opponent to rescue the bishop with b5.

24.h3? The only mistake by Mamedyarov in the game, which could have cost the half point. He opens the back-rank, which is of course very useful, but misses a tactical idea at the same time. [24. ♖dd1! was the right move, which is of course very difficult to find. Especially because the idea is the same: White covers the weak back-rank. 24... ♜f8 25. ♗d7 ♜e7 (25... ♗b2 26. ♖ab1 ♖c2 with the idea of ♗a2 trapping the rook, is met with a nice line... 27.a5! ♗a2 28. ♗a4! ♖e2 (28... ♗xb1 29. ♗xc2 ♗xc2 30. ♖d2+-) 29. ♖e1! and the b1 rook escapes. 29... ♖d2 30. ♖bd1+-) 26. ♗c8! is the point! The a3 bishop is also hanging and there is no mate on c1 at the end.]

24... ♜f8 **25.** ♗d7 ♗d6? Svidler spoils his chance. He wants to play ♜e7 and after ♗c8, his bishop is not hanging, but Mamedyarov found a nice idea to save his bishop. [25... ♜e7! 26. ♗c8 ♗b2! 27. ♖b1 ♖c2! would have been really strong. d4 is hanging and ♗a2 threatens to send away the rook, after which c8 is hanging. The best White can get is an extra pawn, but in both versions the opposite colored bishops give excellent drawing chances for

Black. 28. ♖d3 (28. ♖xd5 exd5 29. ♗xa6 d4; 28. ♖b4 ♗a3) 28... ♗a2 29. ♖xb2 ♖xb2 30. ♗xa6]

26.e4! Well played! White sacrifices a pawn in order to get rid of the rooks.

26... ♗c5 [26... ♗e5 27. ♖b4]

27. ♖dd1 ♗xe4 28. ♖ac1! This was the point of 26. e4! Still, White has to work hard for the win, he must try to collect the a6 pawn and keep his a4 pawn alive.

28... ♗b4 29. ♖xc3 ♗xc3 30. ♖c1 ♗d4? [30... ♗d2 was the only move, with the idea of putting the pawn on a5, where the White bishop can't attack it. 31. ♖c8+ ♔e7 32. ♗c6 ♗c2! Black needs to preserve his bishop pair to retain some drawing chances. 33. ♖a8 a5 34. ♖a7+ ♔f8 It's very difficult to evaluate this position. In my personal opinion, Black's drawing chances are bigger than White's winning ones. Black puts his pawn on h5, his bishop on b4 and then starts to wait with the light squared bishop. It's not easy to find a break-through, but White can try for very long.]

31.a5! This was probably missed by Svidler. White has fixed the a6 weakness and Black has no access to the a5 pawn with the bishop.

31... ♔e7 [31... e5 White collects the a6 pawn by 32. ♗c8! ♗d3 33. ♗b7! followed by ♖c8-a8. 33... ♔e7 34. ♖c8+-]

32. ♗c8 ♗b2 [32... ♗d3? doesn't work. 33. ♖d1!]

33. ♖c5! Very precise! White lures the king to d6 in order to get the key ♖b6 check!

33... ♗d3 [33... ♔d6 34. ♖c4! ♗d3 (34... ♗d5 35. ♖h4+- one of the pawns falls.) 35. ♖b4 ♗e5 36. ♗xa6! This was the point of 33. ♖c5!]

34. ♗b7! Just as in the 31...e5 line, White wants to win the pawn with ♖c8-a8, and Black can't prevent it. The game is over.

34... ♗b5 [34... ♔d7 35. ♖c8 ♗e4 36. ♗xa6 ♗d3 37. ♖a8+-]

35. ♖c8 ♗e5 36. ♖a8 ♗c7 37. ♗xa6 ♗c6 38. ♖a7 ♔d6 39. ♗b7 It will be interesting to follow the development of this line with 5.e3.

1-0

(4) Alexander Morozevich – Leinier Dominguez Perez

FIDE Grand Prix Tashkent (6.4), 28.11.2012

[Kamil Miton]

1.d4 ♘f6 2.c4 g6 3.♘c3 d5 4.cxd5 ♘xd5 5.e4 ♘xc3
6.bxc3 ♙g7

7.♚a4+ A rare line which doesn't give White any advantage. The idea of this move is to escape from long theoretical Grünfeld variations. Typical Moro style.

7...♘d7 The main move. Black could also try other plan: [7...♚d7 8.♚b3 0-0 9.♘f3 b6 10.♙e3 ♙b7 11.♙d3 c5 (11...♚g4 12.h3 ♚xg2 13.♙e2 and White traps the queen.) 12.0-0 ♘c6 13.♖ad1 ♘a5 (13...cxd4 14.cxd4 ♘xd4 15.♘xd4 ♙xd4 16.♙b5+-) 14.♚b1 cxd4 15.cxd4 e6 16.h4 A typical move in these structures. White is going to create additional weaknesses around the Black king. 16...f5 Risky move. Black is looking for counterplay on the center, but he's weakening his king by doing so. Safer and more logical was the thematic plan ♖c8-♘c4, with the idea of winning one of White's bishops. (16...♖ac8 17.h5 ♘c4∞) 17.♙b5 ♚d6 18.d5 Nice break. 18...exd5 19.e5

♙xe5 20.♘xe5 ♚xe5 21.♙d4 ♚e4 22.♚c1 with decisive pressure! 1-0 Sokolov,I-Howell,D/London/Crowthorne ENG 2006.]

8.♘f3 c5 9.♙e2 0-0 10.0-0 a6?! Strange move. Dominguez wants to develop the pieces with b5-♙b7. For example, after b5, ♙xb5 doesn't work because of ♘b6. The problem is that after the simple ♚a3, b5 is not possible and the b-file is weakened (after a6). The simplest way to equalize the position was showed by Ivanchuk in a game against me some years ago. [10...cxd4 11.cxd4

11...♘c5 12.♚c2 (12.dxc5 ♙xa1 13.♙f4 ♙c3 (13...♙g7? 14.♖d1 ♚e8 15.♙b5+-) 14.♖c1 ♚a5 15.♚b3 ♙g7 16.♙c4 White has some initiative, but nothing more. For example: 16...♙g4 17.♘g5 e6 18.h3 h6 19.♘xf7 ♖xf7 20.♙e3 ♖af8 21.hxg4 ♖xf2 22.♙xe6+ ♙h8 23.♙xf2 ♖xf2 Thanks to his play on the dark squares, Black is fine.) 12...♘e6 13.♙e3 ♘xd4 14.♘xd4 ♙xd4 15.♖ad1 e5 16.♙xd4 exd4 and Black is totally fine. 17.♚b2 (17.♚a4 ♙e6 18.♖xd4 ♚b6 19.♖fd1=) 17...♙e6 18.♚xb7 Not accurate. I should have taken the other pawn and more importantly, exchange bishops. (18.♖xd4 ♚a5 19.♙c4) 18...♚b6 19.♚xb6 axb6 20.♖xd4 ♖xa2 21.♙b5 ♖c8 22.♖b1 ♖cc2 23.♙f1 ♙g7

24. ♖db4 ♜xf2 25. ♜xb6 h5 26. ♜c6 h4 27. ♜c3 ♔f6 There's not so much material on the board but Black's pieces are completely dominating. I can risk to say that White's position is simply losing. 28. ♜e1 ♔e5 0-1 Miton,K-Ivanchuk,V/ Havana CUB 2007/The Week in Chess 655.]

11. ♙a3 Now b5 doesn't work!

11... ♙c7 12. ♗g5 Moro develops the pieces with tempo.

12... ♜e8 Black also has other possibilities. Let's check them: [12...e6 13. ♜ad1 b5 14. ♗xb5 (14.d5 ♗b7 ∞) 14...axb5 15. ♙xa8 ♗b7 16. ♙a3 ♜a8 17. ♙b2 ♗xe4 seems strange, but Black has good compensation.; 12...♞f6 13.e5 ♞d5 14.dxc5 White's structure is destroyed but it's not easy for Black to avoid the c4 threat. 14... ♗xe5 (14...h6 15. ♗d2) 15. ♗c4 ♗e6 (15...e6 16. ♞xe5 ♙xe5 17. ♗xd5 exd5 18. ♗e3↑ with pressure on the dark squares.; 15...♞f6 16. ♜fe1 ♗f4 17. ♗xf4 ♙xf4 18. ♗b3 ♙c7 19. ♙b4 White has the initiative on the dark squares again.) 16. ♙b3 ♜ad8 17. ♜ad1 ♞f4 18. ♜xd8 ♜xd8 19. ♗xf4 ♗xc4 20. ♗xe5 ♙xc5

21. ♜d1 and thanks to this trick, White is winning!]

13. ♜ad1 Normal move. White could also try to transfer the queen to the other side, but it takes too much time. [13. ♙c1 b5 14. ♙e3 ♗b7 with equal play. 15.a4!]

13... ♜b8 Black prepares b5, but now the rook on b8 creates some disadvantages as well.

14.d5 [14. ♗h4 An interesting idea to force Black to push e5 and change the structure a bit. 14...b5 15. ♗g3 e5 16.dxe5 ♞xe5 17. ♜d5 with initiative for White. 17...b4 18. ♙c1 ♗b7 19. ♜xe5 ♗xe5 20. ♞xe5 ♜xe5 21.cxb4 ♗xe4 22. ♜e1 ±]

14...e6 Not an easy decision, but probably the Cuban grandmaster should have played this before choosing ♜e8. [14...♞e5!]

15.dxe6 [15.d6 ♙c6 16.e5 b5 (16...♞xe5 17. ♞xe5 ♗xe5 18. ♗f3 ♙b5 19.c4 ♙xc4 20.d7 ♗xd7 21. ♜xd7 ±) 17. ♜fe1 ♗b7 18. ♗f1 ♙b6 It's hard to say if the d6 pawn is strong. Now it's not easy to improve White's position. Black also keeps the option of breaking White's pawns after f6. The position looks fine for Black.; 15. ♗h4 b5 16. ♗g3 e5 17.c4 An important move which doesn't allow c4-♞c5. 17... b4 18. ♙c1 Usually these structures with the strong d5 pawn are better for White, but I think that it's unclear in this case. We can say that the knight on d7 is not perfect (it seems better on d6), but on the other hand, it's well placed to fight after the f4-break, which probably is the only plan for White.; 15. ♙c1 with the idea of transferring the queen or to play ♗f4.]

15... ♜xe6 16. ♗h4 [16. ♗c4 ♜xe4 17. ♗d5 (17. ♙b3 ♞f6 and Black is safe.) 17... ♜e8 18. ♙a4 The idea is to transfer the queen to the kingside to support the attack. 18... b5 (18...c4 Logical idea. Black gives the pawn back, but

thanks to this exchange, White's pieces become uncoordinated. 19. ♖fe1 ♜xe1+ 20. ♜xe1 b5 21. ♚b4 ♞c5 22. ♜e8+ ♜f8 23. ♜xf8+ ♜xf8 24. ♜e3 ♜g8 25. ♜xc5 a5 26. ♜d6 ♚b6 27. ♚c5 ♚xc5 28. ♜xc5 ♜b7 29. ♜xb7 ♜xb7 30. a3 f6 31. ♜f1) 19. ♚h4 ♜b7 20. ♜f4 ♞e5 21. ♜xe5 ♜xe5 22. ♞g5 ♜xd5 23. ♚xh7+ ♜f8 24. ♜xd5 ♜g7 25. f4 Unclear, but White has some pressure.]

16... ♖h6? A huge and decisive mistake! Dominguez prepared ♖f4 after ♖g3, but he should have played: [16... ♖xe4 Ok, it wasn't easy to grab this pawn in a practical game, but objectively it leads to a position that's not worse for White. 17. ♖g3 (17. ♖d3 ♖xh4 18. ♘xh4 b5 with fantastic play for Black.) 17... ♘e5 Black's pieces are totally pinned, but White can't take advantage of this. 18. ♖d3 (18. ♖xe5 ♖xe5 19. ♖d3 ♖f4 20. ♘xe5 ♔xe5 21. ♖fe1 ♔c7 22. ♖e8+ ♔g7; 18. ♖fe1 ♖d7) 18... ♘xf3+ 19. gxf3 ♖e5 20. ♖fe1 ♖h3=+]

17. ♖c4 [17. ♖g3 ♜f4 18. ♖c4 ♔e7 19. ♞g5 ♜xg3 20. fxg3 ♞e5 21. ♖d5 ∞]

17...♖xe4 18.♙g3 ♔b6 [18...♙f4

19. ♖xf7+! Maybe Leinier missed this move. 19... ♔xf7
(19... ♔h8 20. ♖d5+-) 20. ♘g5+-]

19. ♔a4 The most accurate. Black's pieces don't cooperate at all. White is easily winning! [19. ♖xb8 ♜xc4 20. ♞e5 ♞xe5 21. ♙xe5 ±]

19...♖e7 20.♙d6 ♔d8 21.♙xe7 ♔xe7 22.♖fe1 ♔f8
23.♖xd7 b5 24.♙xf7+ ♔g7 25.♙d1 [25.♙h4 ♙xd7
26.♖e7+-]

25... ♗xd7 26. ♔xd7 ♖d8 27. ♔c7 ♖c8 28. ♔b7 ♖b8 29. ♔e7 This was the only decisive game in this round. Congratulations to Moro for yet another victory in this tough tournament.

Endgame section

(15) Morozevich,A (2748) – Caruana,F (2786)

Tashkent, 23.11.2012

[Chess Evolution]

Black is slightly worse because of the e5 weakness. White has many ways to strengthen his position, while Black can only passively wait. Caruana was looking for salvation in the rook endgame.

20...♘d5 [20...♘e8 with the idea of consolidating with f6 doesn't help. White can, for instance, play 21.h4 gaining ground on the kingside with g5. 21...f6 White unexpectedly wins a pawn with 22.♖e4! ♔d6 23.♖c4!± and ♘e4 is coming next.]

21.♘xd5 ♔xd5 22.♖xd5 ♖xd5 23.♖de1+= White is definitely slightly better, but it's very important for him not to allow Black to activate his rooks. So, the first step is to keep the e5 pawn under permanent attack and then think about how to improve his position on the queenside.

23...f6 Black wants to play ♖d4-f4, so White must increase the pressure on the e5 pawn.

24.f4! It's time to improve the position of the king for both sides...

24...♔d7 25.c3! White prepares ♔c2 and the future actions with b4...

25...b5 I don't like this move. It eases White's plans on the queenside. [Black should have definitely opted for 25...a5! 26.♔c2 Now d3 is protected, so White threatens to take a pawn with c4, followed by fxe5. 26...♔d6 27.♖e4 (It might make sense to provoke the c6 move with a king march to b5. 27.♔b3 b6 28.♔c4 c6 29.♔b3 ♖e8 30.a4 ♖e7 31.♔c2 ♖e8 and only now the plans start on the kingside) 27...b6 and from now on Black starts to wait with ♖e7-e8. It's not easy to find a breakthrough for White. 28.h4 This looks like the only option for White. 28...♖e8 29.g5 White continues pressing, but it's hard to judge whether it'll be enough to win the game.]

26.♔c2 ♔d6 Unfortunately, time trouble starts to affect the game, and this is the reason for the following inaccuracies.

27.b3 [27.b4! should have been played immediately as Morozevich did it a few moves later.]

27...♖e8 [Black should have prevented the b4 plan again, followed by c6 and the waiting policy. 27...a5!]

28.♖e4 ♖e7

29.b4! Morozevich had the right idea. White threatens to win a pawn as it happened in the game. Black had only one way to prevent it.

29...♖e8! Caruana prefers to play the endgame with a pawn down, but with activity, than suffering in zugzwang with material equality. This is generally the right strategy of the defensive side in rook endgames! [29...♖c6 was the only move to leave from fxe5 and bxc5, capturing with checks... 30.bxc5 (Now on 30.c4 Black has 30...♖d4 31.fxe5 ♖xe4 32.♖xe4 fxe5 and Black is solid.) 30...♖xc5 The position remains really unpleasant. 31.d4+! ♖d6 32.h4! ♖e8 (32...c5 doesn't solve the problems regarding the pressure on the e5-pawn. 33.dxe5+ fxe5 34.g5) 33.g5 hxg5 34.hxg5 Let's see how can White break through if Black just keeps waiting. 34...♖e7 35.♖b3 White wants to penetrate with ♖b4, so Black should play 35...c5 36.dxe5+ fxe5 37.a4 (White can win a pawn anytime with 37.f6 gxf6 38.gxf6

♖f7 39.fxe5+ ♖e6 but probably it's better to improve the position a bit. This possibility will never run away.) 37... ♖e8 38.c4! bxc4+ 39.♖xc4 The game is basically over; White threatens ♖b1–b6. 39...♖d4+ (39...♖e7 40.♖b1+-) 40.♖xd4+ cxd4 41.♖d3! in order to avoid Black's attempt to gain some activity with ♖c8. 41...♖e7 42.♖e4! ♖e8 and now the easiest way to collect the point is 43.g6! ♖e7 44.fxe5+ ♖xe5 45.f6! and Black has to resign.]

30.c4 [It might be objectively better to play 30.bxc5+ ♖xc5 31.d4 ♖d5 32.h4 and playing like in the 29...♖c6 line, but who could restrain himself from taking a pawn for seemingly nothing?!]

30...bxc4 31.dxc4 ♖d4 32.fxe5+! fxe5 33.bxc5+! ♖xc5 34.♖xe5+ ♖xe5 35.♖xe5+ ♖xc4 36.♖e7! Morozevich obviously had foreseen this position before playing 30.c4. It seems to be over, but the saying is applicable again... that all the rook endgames are drawn.

36...c5 Black's hope is the c-pawn.

37.♖xg7 ♖d3 38.h4! White needs to keep his connected passed pawns on the kingside.

38...♖f3! Black could not allow f6 and g5, because the pawns would promote automatically. He tries to squeeze the king to the first rank and support his c-pawn with the king. [38...♖xa3? would have led to a quick defeat. 39.f6 ♖f3 40.g5 hxg5 41.hxg5 ♖f2+ 42.♔d1 ♔d3 43.♖d7++- and f7, g6 next.]

39.♔d2! White tries to send the rook away from the f-file. [The machine recommends 39.♖h7 ♖f2+ 40.♔d1 ♖f4 41.♖xh6 ♖xg4 42.♖xa6 Despite the fact that White is two pawns up, the position is drawn. Black will recover one because of the active configuration of his pieces, and regarding the remaining one, the c-pawn supported by the king gives enough compensation. (42.♔e2 ♖f4) 42... ♔b3! ♖a4 had to be parried first... 43.h5 ♖g5 44.f6 ♖xh5 45.♖b6+ ♔xa3 46.♔d2 ♖f5 If the king goes to support the f-pawn, the c-pawn will also be promoted, so first he should try to capture on c5. 47.♔c3 ♖f3+ 48.♔c4 ♖f5 White can't make progress. Black is not in zugzwang, since if he was the one to move, ♔a2 would be available.]

39...♔d4 40.♔e2 [40.♖g6 ♖f2+ 41.♔d1 ♖f4]

40...♖xa3?? This is a terrible blunder in the last move of the time trouble. From now on, White simply can't go

wrong, all the moves are just winning. [40...♖f4 seems to give an easy draw. Black wants to push his c-pawn. White sooner or later has to give up his connected passed pawns, but it will make the position drawish as the 39.♖h7 line showed us. 41.♖g6 c4 42.f6 is too slow now, with the idea of g5 and ♖g7, escaping with the rook because the c-pawn is too far advanced. 42...c3]

41.f6 ♖a2+ 42.♔f3 ♖a1 43.♔g2 ♖a2+ 44.♔g3 ♖a1 45.g5 hxg5 46.hxg5 ♖f1 47.♖c7 a5 48.f7 a4 49.g6 a3 50.♖a7 ♖f6 51.g7 1-0

(16) Karjakin, Sergey (2775)
– Wang, Hao (2737) [C10]

FIDE GP Tashkent Tashkent UZB (3.6), 24.11.2012

[Chess Evolution]

62...f5 We are in the very end of a game between two very young and very strong chess players, both in the World's Top 10! After a not so promising opening, Black quickly achieved a nice position and with great play managed to slowly improve his chances for a full point. In the current position, we can clearly see that White's position is „on the limit“. If Black manages to get the pawns to g4-f3, the game will be over.

63. ♖d5? White takes a decision that should be based on exact calculation. If he exchanges the rooks, but can't stop Black from playing g4-f4-f3, the position will be lost. [White had a better choice: 63. ♖d3+! This move would force the Black king to make a difficult decision regarding where to go. 63... ♔f4 (in case of 63... ♔g4 64. ♖d5! would win a very important tempo. 64... ♖xd5 65. ♗xd5 ♗b8 66. ♗e6! not allowing Black to go to g3! 66... ♔f4 67. ♔f2 By putting the king on g2, White reaches a very simple drawn

position. 67...g4 68. ♔g2 ♔g5 69. ♗d7 f4 Now Black wants to play f3. 70. ♗c6! ♔f6 71. ♗b7 ♔e5 72. ♗c6 ♔d4 73. ♗d7 draw.) 64. ♖f3+! The only way to force a draw. 64... ♔g4 65. ♗e6 As we can see, all the moves are quite forced... 65... ♗b8 It seems like Black holds everything but...

66. ♖xf5!! Very beautiful... the position is a draw. 66... ♖xf5 67. ♔e3 What a beautiful chess move!]

63... ♖xd5 64. ♗xd5 ♗b8 Black is holding the a-pawn and is ready to start advancing his own pawns.

65. ♗e6 f4 66. ♔d3!? The best chance to save the game, and it seems like this was exactly what Karjakin had in mind when he played 63. ♖d5?. White wants to attack the g-pawn with his king while holding the f-pawn with his bishop.

66...g4 Logical, Black moves closer to his target, and I guess that Wang Hao was 100% sure that he would win.

67. ♔e4 f3 68. ♔f5 Until here all the moves were logical and correct, but now comes the shocking moment.

68...♙a7?? What a blunder! [The only move, and a super strong one was 68...♔h4! would decide the game in Black's favor. White is not in time to stop the pawns... 69. ♙d5 The only move to stop Black from playing f2, because ♙g2 would follow now. 69...♔h3! That's the idea, White is hopeless against Black's f2-g3-g2. 70. ♔e4 f2 71. ♙c4 g3 72. ♔f3

72...g2 73. ♔xf2 ♙a7+ and the g-pawn becomes a queen!; Of course not 68...♔h3 69. ♔g5 and White will capture the g4-pawn.]

69. ♔g5! And the position is a draw!

69...f2 70. ♙c4 ♔f3 71. ♙d5+! The easiest way to get a draw.

71...♔e3 [71...♔e2 72. ♔xg4]

72. ♙g2 g3 73. ♔g4 ♙b8 74.a7 And in the end, White's a-pawn was useful as well!

74... ♙xa7 75. ♔xg3 What a dramatic end of the game!

1/2

Clash of the Titans

(17) Fischer, Robert James — Darga, Klaus [C19]

FRG-USA Berlin West, 1960

[Csaba Balogh]

An incredibly high-level performance by a 17 years old Bobby Fischer...

1.e4 e6 2.d4 d5 3.♘c3 ♘b4 4.e5 c5 5.a3 ♘xc3+ 6.bxc3 ♘e7

7.a4 Fischer always preferred the rather positional systems with 7.a4 and 7.♘f3, instead of the very sharp main line with 7.♙g4.

7...♙c7 [7...♘bc6 8.♘f3 ♙a5 is the most common reaction by Black.]

8.♘f3 b6 Black would like to exchange the „bad French bishop” with ♘a6 in order to make the c4 hole more vulnerable. White avoids this with a well-known reaction.

9.♘b5+! ♘d7 10.♘d3 Here we get the main point of the a4 move. In other lines, where the pawn is still on a3,

Black blocks the queenside with ♘a4. Now, Black must always be ready for the a5 push and the dark squared bishop might occasionally become really powerful on a3, especially if it can occupy the d6 square.

10...♘bc6 11.0–0 c4 Black plays the standard method of undermining the center with c4 and f6. [11...h6 this prophylactic move is the most common and probably the best. Black wants to guarantee the king’s safety on the kingside. 12.♖e1 0–0; The direct 11...0–0? is refuted by the known trick of 12.♘xh7+! ♔xh7 13.♘g5+ ♔g8 14.♙h5+– Black gets mated.]

12.♘e2 f6 After 13. exf6 gxf6, Black achieves what he wanted, while ♘f4 is met with ♘g6. So, what to do as White?

13.♘a3! This great pawn sacrifice is already a well-known motif in this type of positions. However, during this game, Fischer had to find all the ideas over the board!

13...fxe5 14.dxe5 Black didn’t want to feel the bishop in his stomach on d6, so he accepted the sacrifice.

14...♘xe5

15. ♖e1! Black has plenty of moves, but none of them are really satisfactory... [15. ♘xe5 was less good 15... ♙xe5 16. ♖e1 ♙f6 and Black is ready to castle short in the next move.; However 15. ♘d4! was also pretty strong. White wants to play f4 and when the knight retreats, ♙g4. ♘c6 is never possible because of ♘b5. 15... ♘5g6 This is the best defense, to leave from the f4 threat and also to protect the e7 knight, in order to be able to castle next. (15... ♘7g6 leads to a quick loss. 16. f4 ♘f7 17. f5! exf5 18. ♘xf5 ♙xf5 19. ♙xd5! and White wins.) 16. ♙h5 0-0-0 (Black can't hold his center if he starts to mobilize it. 16... e5 17. ♘f3 e4 18. ♙xe7 ♙xe7 Of course, a move like this can't lead to any good. The refutation is nice: 19. ♙xd5! exf3 20. ♖ae1+ ♙f6 21. g4!! with the simple threat of g5, which Black can't really prevent. 21... h6 22. h4!+-) 17. a5 b5 18. ♙g4! Black has only one move. 18... ♘f5 (18... e5 loses to 19. ♘xb5!) 19. ♙xf5 exf5 20. ♙f3 with more than enough compensation. As the rule says, in case of opposite colored bishops, the material does not matter that much. It's more relevant to know who was the more more active bishop. In this case, the one on d7 has no future...]

15... ♘7c6 [Probably the best was 15... ♘5c6 preparing to castle short. 16. ♘g5! (16. ♘d4 only leads to drawish

position after 16...0-0 White can win back the pawn, but his position will not be better. 17. ♙xe7 ♘xe7 18. ♙g4 e5 19. ♙xd7 ♙xd7 20. ♖xe5=) 16...0-0 (16...e5 and just as in the 15. ♘d4 line, Black can't mobilize his center before taking his king into safety. The punishment comes right away... 17. ♙xe7 ♘xe7

18. ♙h5+! forcing a small weakening if Black wanted to castle short. 18...g6 19. ♙f3 e4 and now 20. ♘xe4! dxe4 21. ♖xe4 ♙f7 22. ♙d4 with a huge attack, for instance, after 22... ♖ae8 23. ♙e2! wins!) 17. ♙g4! ♙f4 (17...e5 allows a nice move. 18. ♙e6+! ♙h8 19. ♙xd5! Black collapses.) 18. ♙xe6+! ♙xe6 19. ♘xe6 ♙xf2+ 20. ♙h1 and White has enough compensation for sure, but he must work a lot to convert it into something real.; 15... ♘5g6 is well met with 16. h4! Very unpleasant! The knights don't find their places on the board.; 15... ♘xf3+ is the worst. 16. ♙xf3 Black can hardly prevent ♙xd5, or ♙xe7 first and then ♙xd5...]

16. ♘xe5 ♘xe5 17. f4 Consequent play, but probably White had something even stronger. [17. ♙h5+! g6 (17... ♘g6? 18. ♙xd5+-) 18. ♙d4! gxh5 19. ♖xe5 with a huge advantage. Even the material will be balanced after the h5 pawn falls, but the weakness of the dark squares will forever be there... 19...0-0-0 20. a5! b5 21. a6 ± making the

Black king more vulnerable. The bishop could be now transferred to f4 or e3 through c1.]

17...♘c6 Other retreats were much worse. [17...♘f7 is refuted nicely with 18.♙h5! g6 19.f5! Black ends up in big trouble.; 17...♘g6 moves into 18.f5!]

18.♙g4 0-0-0 19.♙xe6 ♙xe6 20.♖xe6 So, the material is equal now, but White is better because of the control over the e-file. Black can't fight for it with ♖e8 because of the d5 pawn, while White simply wants to play ♙f3 and ♖ae1 with a clear advantage.

20...♖d7 21.f5 [It looked more logical to continue the plan with 21.♙f3 and ♖ae1.]

21...♘d8 22.♖e3 [The computer would have treated the position differently. 22.♙d4! and it's not afraid of 22...♘xe6 23.fxe6 ♖dd8 24.e7 ♖d7 25.♙xg7 ♖e8 26.♖e1! doesn't even allow Black to give back the exchange on e7. Now it wants to collect the h7 pawn and start to advance on the kingside...]

22...♙f4 Black at least succeeded to send the rook away from the e-file, but with his last two moves, he left his king without his defenders...

23.♖f3 ♙e4 [23...♙e5 meets with the same as in the game...]

24.a5! ♘c6? This is objectively the losing move, but it's very easy to miss what's coming now... [On 24...b5 25.♙c5 followed by occupying the e-file with ♙f1 and ♖e1, Black can never play ♖e8 because of ♖e3...; 24...bxa5 meets with the same as in the 24...b5 line 25.♙c5 ♘c6 26.♙f1! and ♖e1 next.]

25.axb6 axb6 26.♙b1! Black can't defend against the upcoming threats...

26...♙c7 [26...♙b7 loses to 27.♙c5+-; 26...♖b7 27.♙d6! transferring the bishop to a more dangerous diagonal. The rook wants to invade on the a-file and the queen on b5. Black can't hold all the threats.]

27.♙c1!! A brilliant regrouping puts the finishing touch to the game. ♙f4 is coming after any move and on ♙b7, ♙b5 decides the game. There is no way to parry this.

27...♙e1+ [27...♘e5 28.♙f4 ♖e8 29.♙b5+-; 27...♙b7 28.♙b5+-]

28.♖f1 ♙xc3 29.♙f4+ ♙b7 30.♙b5! What a game!

1-0

Editorial Preface

Anna Ushenina is the new Women's World Champion! Who would have guessed it before the tournament?! But the 27 years old player from Ukraine made her dream come true. In a dramatic final match against the much more experienced ex-World Champion Antoaneta Stefanova, Anna managed to keep better nerves and win the tie-break by 1.5/0.5! Congratulations!

The main event of this week is the London Chess Classic with an amazing line-up: Carlsen, Kramnik, Anand, Nakamura, Polgar, +3 English players — Adams, McShane, and Jones.

Magnus Carlsen started with 3.5/4 and beat Kasprov's ELO record of 2851!! Carlsen has 2858 Elo points currently. It sounds unreal, looks unreal... but is the truth. Magnus is completely dominating the Chess World. Vladimir Kramnik and M. Adams are doing extremely well too. Things are going differently for Polgar, McShane and Jones, but I think that losing a couple of games in such a field is not a shame.

The FIDE Grand Prix in Tashkent came to a dramatic end, with a lot of crucial results in the very last round, so in the end we had 3 winners, who shared the first place with "only" +2: Karjakin, Morozevich and Wang Hao.

By the way, for the fans of fighting chess, a lot of great games were played in the Grand Prix. It is worth taking a look at them.

As usual, We wish You a lot of chess fun with our weekly edition of CEWN!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Kramnik,V (2795) – Polgar,Ju (2705) [A34]

4th London Chess Classic London ENG (1.2), 01.12.2012

[Csaba Balogh]

A good fighting game. Judit Polgar, true to her style, bravely sacrificed a piece. However, by playing excellent chess, Kramnik showed that there was not sufficient compensation for the material.

1.c4 ♘f6 2.♘c3 c5 3.g3 ♘c6 At this moment, this is not a great move. White gets a good version in any of the possible systems. [3...d5 4.cxd5 ♘xd5 5.♙g2 ♘c7; Or 3...e6 4.♘f3 b6 5.♙g2 ♙b7 are the two main lines, and both are completely playable for Black.]

4.♙g2 d6 5.e3 e5 Quite an ugly move, weakening the d5 square. It's especially bad now that White has already focused his minor pieces around this point. The g1 knight is also heading to e2, where it will support his colleague after it jumps to d5. However, it's already difficult to suggest something clever... [For instance, after 5...g6 6.d4 White gets a good version of the g3 system of the King's Indian.]

6.♘ge2 ♙e6

7.♘d5! This is a known idea! Black was ready to free his position with d5, so White had to parry this threat. It's also important to mention that White only installs his knight on d5 when Black can't take it with the knight, because of the fork after cxd5. [The careless 7.d3 allows Black to get a good position after 7...d5! 8.cxd5 ♘xd5]

7...♙e7 8.0-0 0-0 9.♘ec3 White has successfully taken the d5 hole under control. His next goal is to initiate play on the queenside with d3, a3, ♖b1 and b4. Judit didn't want to wait for this to happen and decided to complicate matters.

9...♘b4 Of course, the d5 knight was very annoying, so it's understandable that Black wants to kick it out.

10.♘xe7+ Taking the advantage of the bishop pair. Classical Russian school.

10...♙xe7 11.d3

11...d5 A brave decision! Black prefers to sacrifice a piece than to suffer in a worse position. However, there is nothing to justify that this offer could be correct... [11...♖ad8 with the idea of freeing the position with d5. This would be met with 12.a3 ♘c6 13.♘d5! The same motif as before, but now Black is forced to give up his bishop. 13...♙xd5 14.cxd5 ♘b8 15.b4 White is better. An unpleasant plan could be ♙b2, followed by e4, f4 and ♙h3. The White center supported by the strong bishop is overwhelming.]

12.a3! Kramnik accepts the challenge!

12...dxc4 13.axb4 cxb4 Black only has two pawns for the piece, but ♜fd8 is coming next, which forces White to push d4, after which the Black pawn phalanx on the queenside becomes really scary...

14.♘e4! [The sacrifice would have been justified after a careless move, for instance 14.♘e2 cxd3 15.♙xd3 ♜fd8 The queen does not find its place. 16.♙b5 and the game could finish with an unusual repetition after (16. ♙b1 allows 16...♙c4) 16...♜ac8! with ♙c4 threats, and on 17.♙xe5

17...♜c5! 18.♙f4 ♜f5! 19.♙h4 ♜h5! 20.♙f4 ♜f5 and draw.]

14...♘xe4 [14...♜fd8? did not work immediately 15.♘xf6+ ♙xf6 16.♙xb7]

15.♙xe4 f5 16.♙g2 ♜fd8! Forcing White to push d4.

17.d4 a5! Judit had foreseen this position before playing d5! Black is intending to play a4, followed by a possible breakthrough with a3 bxa3 b3 and c3 next, or c3 bxc3 b3 and a3 next. White must take it very seriously. [17...e4? would also have been principled, in order to close the strong bishop, but White can open the diagonal with 18.f3! which means that the e4 move is premature.; 17...exd4? is another big mistake, allowing the c1 bishop to escape. 18.exd4]

18.♙e2! Very well played! White threatens to push d5 and collect on c4. Black must hold this pawn, otherwise the position collapses. However, ♜ac8 doesn't work because of the a5 pawn.

18...e4 [18...♙c7 meets by 19.♜d1! with the idea of d5 ♙f7 e4, bringing the c1 bishop to the game. 19...e4 20.f3]

19.f3! Of course, the bishop must be activated.

19...♗d5 Black must try to hold the e4 pawn in order to lock the c1 bishop. [19...exf3 20.♔xf3 and a possible e4 break would destroy Black's resistance.]

20.fxe4 fxe4 21.♖f5! Another great move with a double threat of ♖e5, and winning the e4 pawn and ♖xd5, eliminating the c4 pawn. [On a „normal“ move like 21.♗d2 Black plays 21...a4 with the idea of c3 bxc3 b3 and a3 with very unclear play.]

21...♔d7 [21...b5 was an alternative, but White gets the advantage after 22.♖e5 ♔b7 23.♔h5! a4 24.♗d2! and Black is unable to mobilize the queenside pawns. The dark-squared bishop blocks their way. 24...c3 (24...b3? 25.♗b4 would be a huge success for the bishop.) 25.bxc3 b3 26.♗c1! This is the point, and the bishop becomes a perfect blockader. The active White pieces on the 5th rank deprive Black from creating real threats.]

22.♖e5 Going for the e4 pawn.

22...♖e8

23.♗h3! A great resource to activate the bishop with tempo, since Black can't give up his d5 bishop as it is the piece that holds the whole position together.

23...♔c6 24.♖xe8+ ♔xe8 25.♗d2 Developing and preventing the a4 move at the same time.

25...♔e7? To refresh a4 plan, but this is a huge blunder that allows White to activate his pieces too fast. [25...b5 would have been the only move, although White's position remains clearly better after 26.♔g4 as the break through is not really effective with 26...c3 27.bxc3 b3 28.♗c1! creating the usual strong blockade!]

26.♔h5! This was probably missed by Judit. Now she is unable to keep her position together.

26...♔d8 [26...♗f7 27.♔b5 and one of the pawns will fall soon.]

27.♖f1 [27.♗f5!? was also winning. 27...g6 28.♗xg6! hxg6 29.♔xg6+ ♔h8 30.♖f1! and the rook joins the attack. Black can't defend properly. 30...♖a6 31.♔h5+ ♔g7 32.♖f5 +-]

27...g6 It was already hard to recommend something else...

28. ♖e5 ♜a6 Kramnik finds the most beautiful way to finish the game, to kick the d5 bishop out from its great place.

29. ♘d7!! Really nice line and closing combination.

29... ♘f7 [29... ♖xd7? 30. ♖b8+ ♔g7 31. ♖f8# was the point of the sacrifice.]

30. ♜xf7! After playing ♘d7, Kramnik felt that he had to finish the game in the same style. [30. ♘b5! was even stronger 30... ♜e6 31. ♖f4 +-]

30... ♔xf7 31. ♘b5 Black's position collapses. The pawns start to fall one after another and the bishop pair soon takes control over the board.

31... ♜f6 32. ♘xc4+ ♔g7 33. ♖xe4 The game is practically over. Black can't create any real threats.

33... ♖c7 34. ♖d5! ♜f8 35.e4! And the dark-squared bishop decides the battle. There was no need for the rest of the game.

35...b5 36. ♖xb5 ♖d6 37. ♖b7+ ♔h8 38. ♖a7 ♘h6 and ♘f4-e5 are the main threats.

38...g5 39. ♘xg5 ♖c6 40. ♖e7 1-0

(2) Stefanova,A (2491) – Ushenina,A (2452) [D45]

FIDE WCh Women World Cup Khanty-Mansiysk RUS (6.4), 30.11.2012

[Arkadij Naiditsch]

We are in the last of 4 games that were played in the final match for the World Championship. Ushenina just needs a draw to become the new World Champion, but she is Black and to play under such pressure is never easy, especially if Your opponent is playing great chess.

1.d4 d5 2.c4 c6 3. ♘c3 ♘f6 In the match between Stefanova and Ushenina, we saw a lot of Slav games where White usually created a lot of pressure, which is really a funny thing :) . Usually, with Black You feel safe, and with White You don't know where to get any advantage, but in this match things were very different.

4.e3 e6 5. ♘f3 ♘bd7 6. ♖c2 ♘d6 7. ♘d3 0-0 8.0-0 dxc4 9. ♘xc4 We are in one of the main lines. Thousand and thousand of games were played here.

9...b5 10. ♘d3 ♘b7 11.a3 [11.e4 e5 could lead to the other main line.]

11...a5 12.e4 We have about the same line as the main one, just with the moves a3-a5 included. This could be „positive“ for both colors. Black is losing the chance of playing a6 followed by c5, and on the other hand, in case of b4, White will have to play axb4, which would lead to some exchanges and help Black's defense.

12...e5 13.♖d1 This move was played quite recently in the game Bacrot-Giri. Why to play 13.♖d1? Hmm... this is something we can only understand after analyzing this position for a long time! Many nuances like 13.♖d1 only become understandable after many hours of working on the position.

13...♔c7 [13...♔e7 14.♘e2 ♖fe8 15.♙g5 with a slightly better play for White, Bacrot-Rapport 2012.]

14.h3 A move against Black's exd4.

14...♖fe8 15.♙e3 This position is more or less known as well...

15...exd4 16.♘xd4 ♙h2+?! This is a rare move. One of the top Russian players, Dmitry Jakovenko, preferred to play immediately 16...♙f4, but I think White could reach a small plus in that case too.

17.♔h1 ♙f4 The same idea, but with the White king on h1. This can be double-edged also... In some positions, the king is better on g1, but in some others, on h1, especially if White managed to play f4.

18.♙xf4 ♔xf4 I guess that here both players were out of book. White is doing a bit better and could continue with the rock solid 19.f3. But is it enough to get a full point? A victory would take Antoaneta back into the fight for the World Title.

19.♘ce2! I think this move decided the game. White is playing „all in“ and puts Black in front of a very difficult decision. To take on f2 looks critical, but it allows White to play a very strong attack.

19...♔b8 This move leads to quite an unpleasant position. [19...♔xf2 The only relatively good option to continue the game. 20.♖f1 ♔e3 Black's position looks super dangerous, but what happened in the game is clearly worse! 21.♖f3 ♔g5 22.♘f5 with a very strong initiative for the pawn.]

20.♘g3! White is keeping all pieces on the board. [It would have been a bad moment to get greedy. 20.♘xc6?! ♙xc6 21.♔xc6 ♘e5 All the Black pieces are suddenly in the game. 22.♔xb5 ♘xd3 23.♔xd3 ♘xe4 and probably Black would have enough counterplay for the pawn.]

20...♘e5 21.♙f1 Black is facing serious trouble. White wants to play f4-e5, or just ♘df5 combined with many different threats. It's time for Black to be extremely careful not to get into deep trouble.

21...Rc8? This move just can't be good! White now gets a dream position. [21...Ng6 Black should give up the c6-pawn and accept that it is going to be a hard fight for a draw. 22.Nxc6 Bxc6 23.Qxc6 h5!? with the h4 idea next, and the e4-pawn is going to fall. Black is clearly worse, but he keeps drawing chances.]

22.Ndf5 The clouds are getting darker around the Black king.

22...Rc7 Probably this was Ushenina's idea, but it gives enough time to strike!

23.Qc3! Very strong move! Suddenly, Black is just lost! White wants to play f4 followed by Nxg7 and Black can't do anything about it! I guess both players were shocked by the sudden situation. So close to 2-2 and so far away from the World Championship title.

23...Rd7 24.f4 What a crush by the White pieces!

24...Rxd1 25.Rxd1 Ng6

26.Nh6+! White keeps good nerves and chooses the easiest winning move, giving Black no counter chances. Of course 26.Nxg7 would lead to a winning position as well.

26...gxh6 27.Qxf6 Qf8

28.Nf5? Still a winning move, but what a mistake! Nerves, nerves. The stakes of the game are extremely high and to keep the pressure in these situations is not easy. [28.Rd7 would immediately finish the game. 28...Bb8 29.Nf5 and Black can't defend against Rxf7 Qxf7 Nxh6!]

28...c5! Excellent defense by Black. The position is still lost, but suddenly White needs to be precise.

29. ♖xb5?! And again White doesn't choose the best option. [29. ♖d7 The easiest way to get a winning position. 29... ♗xe4 30. ♖xf7 ♗xf5 (30... ♖xf7 31. ♘xh6+) 31. ♖xf8+ ♖xf8 32. ♖d6 and White should win quite easily...]

29... ♗xe4 30. ♘d6

30... ♖d8! Black is back in the game!

31. ♖d2 ♗b1?? And Ushenina makes a horrible blunder under big pressure. [In case of 31... ♗a8! 32. ♗c4 ♖e7! The only move, which is not too difficult to find. 33. ♗xf7+ ♖f8 34. ♖xe7+ ♘xe7 35. ♗e6 White is still a pawn up, but Black can fight for a draw!]

32. ♘xf7!! A very sweet combination!

32... ♖xd2 33. ♘xh6+ At 33... ♖xh6, 34. ♗c4 is coming. A great victory by Stefanova, but already the next day she had to face very sad news when she lost the tie-break. Anyhow, a great match and a deserved new World Champion. Congratulations to Anna Ushenina!

1-0

(3) Ushenina, Anna (2452) – Stefanova, Antoaneta (2491) [D15]

FIDE WCh Women World Cup Khanty-Mansiysk RUS (6.3),
29.11.2012

[Csaba Balogh]

We are in the final of the Women's World Championship where Anna Ushenina from Ukraine won a flawless game! She was fighting very well in the whole tournament and her White color performance was really extraordinary. In this game, Stefanova mixed up something in her favorite Chebanenko Slav variation and ended up in a complicated, objectively lost position right after the opening.

1.d4 d5 2.c4 c6 3.♘f3 ♘f6 4.♘c3 a6 This is the starting position of the Chebanenko Slav. White has a wide range of choices here. Ushenina went for the most often played move.

5.c5 This is basically the most principled reaction to a6. White obtains a space advantage and makes use of the fact that the undermining with b6 is not effective anymore, as Black can't take back on b6 with the a-pawn. The only drawback of this idea could be the undermining with e5, so the fight starts around this move.

5...♘bd7 6.♙f4 The h2-b8 diagonal is the best place for the bishop. The following maneuvers are quite known and have been played already in hundreds of games.

6...♘h5 7.♙d2 ♘hf6 8.♖c1! A strong prophylactic move against e5, introduced by Topalov in 2006 on the highest level.

8...g6 The bishop on g7 will support excellently the e5 break. [The typical break with 8...e5 leads to a clearly worse position after 9.♘xe5! ♘xe5 10.dxe5 ♘d7 11.♘a4! This is the point of 8.♖c1! 11...♘xe5 12.♘b6 ♖b8 13.♙f4± would be a clear success of White's opening decision.]

9.h3! Another subtle move. White would like to get his bishop back to the h2-b8 diagonal, so he frees the h2 square to meet with ♘h5.

9...♖c7 Black also has his subtle resources. [9...♙g7 10.♙f4 0-0 11.e3+= White would achieve what he wants.]

10.g3! The bishop is ready to occupy the f4 square again, but on the other hand, the h2 refuge doesn't exist anymore.

10...♙g7 [10...e5 appears premature after White's strong reply 11.dxe5 ♘xe5 12.♘xe5 ♖xe5 13.♙f4 ♖f5 14.♖d4! ♙g7 15.♙d6! That's why Black should aim to finish the development before initiating concrete actions.]

11.♙f4 ♖d8 12.♙g2 0-0 13.0-0

13...♘h5 14.♙d2 f5 Black fixes the center, prevents White's e4 idea and is ready for the e5 break. We are still following theory. [The most logical move 14...e5 has never been tried yet, however, in my opinion, it might be an improvement on Black's play. It's not clear to me how White should fight for the advantage.]

15.♔b3!? A very tricky tactical idea to prevent e5. Stefanova probably forgot her preparation and fell in its trap...

15...e5? [The biggest specialist of the variation, Vladimir Malakhov, has already played twice the prophylactic 15...♙h8 His games continued with 16.♘g5 which allows a small tactical trick to solve the opening problems (16.♙f4!? seems to be a decent improvement in order to consolidate the center. Black should sooner or later take on f4, but then he must forever forget about his e5 idea, and without that, he must suffer for a long time in a cramped position.) 16...♙xd4! (16...♘df6 17.♘a4 h6 18.♘f3 ♘e4 happened in Bologan-Malakhov, Konya 2012.) 17.♘xd5 (17.♘e6 ♘xc5! This is the trick! Counterattacking the White queen. 18.♘xc5 ♙xc5) 17...cxd5 18.♘e6 ♘xc5! 19.♘xc5 e6 Black can hardly be worse.]

16.♘g5! Great move! Actually, the idea belongs to the Hungarian GM Ferenc Berkes, who first pointed out the weaknesses on the light squares of Black's camp. The direct threat is ♘e6 and in many occasions, White is aiming to sacrifice on d5, which reveals the idea behind the ♔b3 move. The forthcoming lines are quite complicated, but objectively, Black is already in deep trouble.

16...exd4 [16...♔e7 moves into 17.♙xd5+! cxd5 18.♘xd5+- and the pin decides the game.; 16...♘df6 17.dxe5 ♘e4 is not better either, because of the excellent placement of White's queen. 18.♘cxe4 fxe4 19.♘xe4! +-]

17.♘xd5! cxd5 18.♙xd5+! White needs to play precisely to get an advantage. The exact move order is really relevant. [GM Berkes started with 18.♘e6 but after 18...♔e7 19.♘xf8 (19.♙xd5 now meets 19...♘df6!) 19...♘xf8 20.♙xd5+ ♙h8 The game was not clear at all. The difference can be seen in the 19th move of the game. Berkes-Bacrot, Germany 2008]

18...♙h8 19.♘e6 ♔f6 This is the novelty of the game. From now on, Ushenina had to think. It was another good sign that her opponent had only about 20 minutes left. [Now on 19...♔e7 White is not obliged to take on f8, as the German GM Arik Braun demonstrated. 20.c6! is much stronger, with the idea of ♙b4, increasing the pressure. 20...bxc6 21.♙b4! ♔f6 (21...c5 22.♙xa8 cxb4 23.♘xf8 ♔xf8 Black has three minor pieces for the two rooks, which is normally very good materially speaking, but now he is lacking a lot of coordination between his pieces. The position is completely lost after 24.♔c4! ♘b6 25.♔c7 ♘xa8 26.♔xc8 +- The rooks are going to dominate on the c-file.) 22.♔xc6 ♙b7 23.♘xf8 ♙xc6 24.♘xd7 ♙xd5 25.♔xd5 ♔d8 26.♔c1 After the big massacre, White end-

ed up with a material advantage and a better position; he soon won the game. Braun-Laznicka, Gaziantep 2008.]

20. ♖xf8 ♔xf8 Black only needs a tempo to consolidate her position, and she's still doing fine materially with two minor pieces for a rook and a pawn. White has no time to waste. [20... ♕xf8 is refuted in a nice line: 21.c6! bxc6 22.♖xc6 ♔d8 and now the strongest is 23.♖fc1 ♖b8 24.♔xb8! ♘xb8 25.♖xc8 +- White is crushing on the 8th rank.; 20... ♘xf8 is simply met with 21. ♕xb7 ♖b8 22.c6 +-]

21. ♕xb7! The move is obvious, but it was based on a very deep calculation. If Ushenina doesn't foresee her 25th move, then she would simply drop her very important light-squared bishop.

21... ♖b8 [21... ♘xc5? loses to 22.♖xc5 +-]

22.c6 ♘c5 At first sight, everything is fine for Black. He is going to take with ♘xb7 and ♕xb7, obtaining the powerful bishop pair. What could be in Ushenina's mind when she entered into this position?! [A funny position occurs after 22... ♕xb7 All the c-pawn moves are winning, including both captures, and c7 too!]

23. ♔b6! ♘xb7

24. ♔a7!! A fantastic and kind of shocking move, trapping the rook on b8! On 24... ♕e6, 25.cxb7 wins, as Black can't hold the b7 pawn.

24... ♕e5 **25.c7!** This was the point! Without this move, the whole plan that started with 21. ♕xb7 would have made no sense. We must admit that this was a great calculating performance by Anna Ushenina. Suddenly the game is over, Black can only try some desperate tricks on the queenside, but White is well prepared to meet them properly.

25... ♖a8!? Stefanova prefers to keep the strong e5 bishop, but of course, this is a complete rook for nothing.

26. ♔xa8 ♔e8 [On 26...f4 White simply plays 27.g4 +- and everything is nicely protected.]

27. ♔xa6 White ended up with a huge material advantage and it's only matter of time to convert it.

27... ♘c5 **28.** ♔a8 The queen on a8 perfectly contributes in the defense of the White king. It practically replaces the task of the absent g2 bishop.

28... ♘e4 **29.** ♖c2 It might look a bit scary, but Black is unable to create any real threats against the king. White can simply advance her queenside pawns to convert the advantage.

29... ♘d2 **30.** ♖xd2 ♔g7 Black hides his king on h6 to leave from the pin on the 8th rank. One possible threat could be ♕xg3 followed by ♔e3, as the c8 bishop is not hanging with check anymore, but White calmly parries this idea...

31. ♖c2 ♔h6 **32.b4!** Perfect play! The pawn arrives very quickly to b7...

32...♙d6 [32...♙xg3 leads nowhere 33.fxg3 ♖e3+ 34.♖f2 ♜xg3+ 35.♜g2! and the great protector joins the defense.]

33.♜d5 ♘xg3 A last attempt, but of course, it's not a serious one. [On 33...♙xb4 White wins after, for instance 34.♖b1 ♙c3 35.♖b8 +-]

34.♜xd6 ♘xf1 35.♜xd4 The knight is trapped on f1. [35.♙xf1 ♜e4 was the trick of the 33... ♘xg3 combination, with a double threat on c2 and h1, but even here White wins with 36.♜c6! +- protecting everything.]

35...g5 36.♜f6+ ♔h5 37.♜c6 1-0

(4) Adams,Mi (2710) – Polgar,Ju (2705) [B40]

4th London Chess Classic London ENG (3.4), 03.12.2012

[Arkadij Naiditsch]

1.e4 A great positional victory achieved by M. Adams in front of his home public, and against Judit Polgar, the strongest female player in the history of chess, who was a very stable guest in the world's Top 10 before she became a mother.

1...c5 2.♘f3 e6 3.g3 This move takes Your opening to the „sidelines“. As he does regularly in his latest games, Adams tries to just play chess without getting into theoretical battles.

3...♘c6 4.♙g2 ♘f6 [4...d5 5.exd5 exd5 6.d4 would lead to the main position of the 3.g3 line.]

5.♜e2!? This is probably White's main idea. In case of 5.d3 d5, we would go back to the very known positions, but now White has a better move against Black's d5.

5...d5 6.exd5 That's the point of 5.♜e2. White is forcing Black to take with the knight on d5, and the bishop on c8 is still closed.

6...♘xd5 7.0-0 ♖e7 Both White and Black have a very solid position, but in just 7 moves from now, White will be much better...

8.♖d1!? A nice move! Clearly White's idea is to play d4 here. In case of a modest move like 8.d3, Black is doing perfectly fine.

8...0-0 Black is allowing White to play d4. [8...♙f6 stopping White from playing d4 leads to a slightly worse position. 9.♘c3 (9.d3 0-0 10.♘bd2 ♘d4 11.♘xd4 cxd4 and Black is doing perfectly fine.) 9...0-0 10.♘e4 ♖e7 If White could take on f6, the bishop pair would give a small advantage. 11.d4 cxd4 12.♘xd4 ♘xd4 13.♖xd4 and White is doing a bit better.; 8...♚b6!? This very strange move might not be as stupid as it looks. Black is stopping White from the main threat — d4. 9.♘a3 0-0 10.♘c4 ♚c7 It seems like Black lost a tempo, but on the other hand, White's knight on c4 is not a „hero“ either... I think the position should be close to equal here.]

9.d4 White wants to play c4-d5 next.

9...cxd4 10.♘xd4 ♘xd4 11.♖xd4 ♙f6 12.♖d1 Until now all the Black moves looked logical, but the position is already on the limit of being much worse. Adams will show us in a great way why it is so!

12...♚c7

13.c4! Very strong positional move. The bishop on g2 becomes a very strong piece.

13...♘b4 [It isn't better to play 13...♘b6 14.♘a3 Black's knight on b6 has no perspectives. 14...♙d7 15.♙f4! A very important move in many lines. White is asking Black if he'll play e5, after which the bishop on f6 will be bad and the d5 square will be weakened. 15...e5 16.♙e3 ♙c6 17.c5 with a clear advantage for White.]

14.♘c3 a6

15.♙f4! Very strong move by Adams. White is inviting the move e6-e5, after which Black's position is very hard to hold.

15...e5 16.♙e3 ♙e6 Not a great move to do, but what else to do? White wanted to play a3 followed by ♘d5.

17.♘d5 Simple and good.

17...♘xd5 18.cxd5 ♙f5 19.d6 ♚d7 It seems like Black blocked the d-pawn and wants to exchange rooks on the c-file, but White has an ace in his hands!

20. ♖b6! Adams is showing one more time why, for more than 15 years, he was in the world's Top 10. A very atypical and killing maneuver — ♖b6-♖c7. Black's pawn on b7 will become very weak and Black won't be able to exchange any of the rooks. Even though the position doesn't look that bad, it is very bad!

20... ♜ac8?! I don't see any point in including ♜ac8-♙c7 for Black, so if he wanted to play ♙g4, he should have done it immediately.

21. ♙c7 ♙g4 22. ♙f3 h5 23. ♜ac1 Black's pieces are completely paralyzed...

23... ♜fe8 24. ♙xg4 hxg4 25. ♚e4 What a domination! Black's b7-pawn falling!

25... ♙g5 [An attempt to save the b7-pawn would lead nowhere. 25...b5 26. ♚c6! and White is winning.]

26. ♜c5 ♙d8 27. ♚xb7 White is a clear pawn up and Black still doesn't even have a small idea of how to continue.

27... ♜e6

28. ♜dd5! And once again Mickey chooses the safest and strongest continuation. Basically, the position is winning for White.

28... ♜f6 29. ♚xa6 Why not to take a pawn when you can?!

29... ♚f5 30. ♚e2 ♚b1+ 31. ♜d1 ♚xa2 32. ♜xe5 White is two pawns up and the d6-pawn will become a queen. It was a good time for Polgar to resign the game, but she continued with

32... ♙xc7 33. ♜e8+ ♜xe8 34. ♚xe8+ ♙h7 35. dxc7 ♚a7 36. ♚e4+ A really great positional victory by White with a lot of typical ideas, and a great „special one“ with ♙b6-♙c7!

1-0

Endgame section

(15) Anand,V (2775) – McShane,L (2713) [D10]

4th London Chess Classic London ENG (2.4), 02.12.2012

[Chess Evolution]

71.♔g3 After quite a bad game, we arrived to a drawn rook endgame. Everything looks easy because even the position without White's b-pawn is a theoretical draw, and it should be easy to hold especially for a World Champion, but... let's take a look at what happened.

71...♔f5 Black is going forward with the king — the only chance to play for a win.

72.b5 ♖c3+ 73.♔g2 ♔f4 74.b6 ♖c2+ 75.♔f1 ♖b2 Until here the play is quite logical.

76.b7?! Of course the position is still a draw, but why not to take the h-pawn immediately? [76.♖h8! ♖xb6 77.♖xh7 ♔g3 Black's only chance is not to allow the White king to go to h2, but that's simply impossible to do. 78.♖g7+! ♔f3 79.♔g1 and we are again in a theoretical position with an easy draw.]

76...f5 White's rook is fixed on b8, and the situation doesn't change much if White plays ♖a8. However, White had to be a little careful now...

77.♔g1 ♖b1+ 78.♔g2 ♖b2+ 79.♔g1 ♖b3

80.♔g2?! Not the best again. It was much simpler to play 80.♔f2, not giving Black any extra ideas...

80...♖g3+! Black is bringing his rook to g7!

81.♔f1 ♜g7 82.♔f2 ♔g4 Suddenly, White can't exchange his b-pawn for Black's h-pawn...

83.♔g2 h5 84.♔f2 h4 85.♔g2 h3+ 86.♔h2 f4 87.♜a8
What to do?! White must give up the b7 pawn... The position is still a draw for now...

87...♜xb7 Black wants to play ♜b2 and win...

88.♜g8+! The only defense. In case of 88.♜a2, Black can win with ♜b4-♜e4-f3 and ♜e2+.

88...♔f3 89.♜a8! The only way to hold. White's rook has to stay active

89...♜e7

90.♜a1?? What a horrible mistake by the World Champion... [90.♜b8! just waiting would have been the right choice!]

90...♜e5? Black misses a win in 1 move! [90...♔g4! would end the game on the spot... Black wants to play ♜e2 91.♜a2 ♜e4 followed by f3 and ♜e2 — the game is over!]

91.♜a8! White is back on the right track.

91...♔g4 92.♜g8+ ♔f3 93.♜a8 ♜e1 94.♜a7 ♜d1 95.♜a8 ♔e3 Black can't improve his position and uses his last option.

96.♔xh3 White has finally eliminated the h-pawn.

96...f3 97.♜a3+ Nice technique by the World Champion, now everything seems to be clear.

97...♔f2 98.♜a2+ ♔e3 99.♜a3+ ♔e2 100.♜a2+ ♜d2 101.♜a1 ♔f2 102.♔h2 Black simply can't improve his position. It is a dead draw.

102...♜e2 103.♜a8 ♔e3+ 104.♔g3 ♜g2+ 105.♔h3 ♜d2 106.♔g3 ♜g2+ 107.♔h3 ♜d2 108.♔g3 And once again, we have a great example of how easily we can go wrong in the rook endgames, and that even players like the World Champion make mistakes!

1/2

(16) Karjakin,S (2775) – Morozevich,A (2748)

Women World Championship, 29.11.2012

[Chess Evolution]

We enter this rook endgame right after the time trouble. White is clearly better because of his active rook on b6. If the Black rook leaves the c7 square, White can advance his pawns with b4 and c5, creating the threat of c6 bxc6 ♖xa6. Black seems to be in deep trouble.

42...♔h5 Morozevich decided to give White a tempo. [42...h5 with the idea of playing h4 fails to 43.h4+! ♔h6 44.♔f4 and only White made progress.; An attempt to activate the rook with 42...♖d7 is met with 43.b4! ♖d3+ 44.♔f2 and the rook must go back to passivity, so the action only helped White to continue his plan... 44...♖d4 45.c5 ♖d7 46.c6! bxc6 47.♖xa6 ± with good winning chances.]

43.♔f4 Karjakin tries to squeeze the Black king, but this allows a hidden counterplay. [43.b4! was stronger. 43...♖xc4 44.♖xb7 It's difficult to judge whether it's a draw or it's winning, but definitely, over the board it is almost impossible to hold. White wants to put his rook to b6 and bring his king to protect the b4 pawn in order to take on a6. Black can take the kingside pawns, but White's pawns on the queenside are more advanced, which gives him excellent chances. 44...h6 (44...♖c3+ just helps White. 45.♔f4 ♖c4+ 46.♔e5) 45.♖b6 ♔g5 46.♔e2! f4 Black must hurry to create counterplay, but it seems to be too slow. 47.gxf4+ (Of course not 47.♔d3?? fxg3!) 47...♖xf4 48.♔d3 h5 49.♔c3 White is ready to take on a6. 49...♖f3+ 50.♔c4 ♖xh3 51.♖xa6 and both White pawns have advanced

one rank further, so the position seems to be winning. 51...h4 52.b5 ♖f3 53.♖d6+-]

43...♖f7! Great defensive idea in connection with the g5-g4 moves.

44.♔f3 Karjakin adm its his mistake and tries to transpose to the previous line and play b4 instead of ♔f4, but Morozevich found a better plan for Black... [44.b4 g5+ will be the same as the game.]

44...g5! g4 is coming next. On the other hand, this allows White to continue his plans on the queenside.

45.b4 g4+ 46.hxg4+ [It makes no sense to keep the f-file closed with 46.♔g2 because of 46...♖d7! and Black gets too much activity. 47.hxg4+ ♔xg4]

46...fxg4+ 47.♔e4 ♔g5! This was the point of the ♖f7, g5-g4 idea. Now Black intends to create his own passed pawn with h5-h4. White is still better obviously, but at least Black has something to play for.

48.b5 [48.c5 was an interesting alternative. Black needs to play precisely to hold. 48...♖e7+! Black tries to send the king to the c-file, where it moves into a motif... (48...h5 seems to be too slow 49.c6 bxc6 50.♖xa6 h4 (50...♖b7 is

always met with 51.♖b6; 50...♗f6 loses to 51.b5) 51.gxh4+ ♔xh4 52.♗xc6 g3 53.b5 The connected pawns are promoting with the help of the king. White can sacrifice his rook for the g-pawn. This is a known method of winning this kind of rook endgames.) 49.♔d4 ♖d7+! 50.♔e5 stops covering the 3rd rank, and Black will make use of it later. (The point of the check becomes clear after 50.♔c4 h5 51.c6 where Black has 51...♗c7!; 50.♗d6 ♗c7 Finally, Black successfully prevented the c6 and ♗xa6 idea and can continue his plan with h5-h4.) 50...h5 51.c6 bxc6 52.♗xa6 ♗d3! 53.♗xc6 ♗xg3 Both pawn chains are equally advanced, so the game should be drawn. 54.a6 ♖a3 55.b5 g3]

48...axb5 49.cxb5 h5 50.a6 Morozevich has spent all his time and he fails to find one of the ways to draw.

50...♗e7+ [50...bxa6 51.bxa6 h4 was the most logical reaction and good enough to save the game. 52.♗b5+ (52.♗b7 ♗f1 53.♗b5+ ♔h6 54.♗a5 (54.gxh4 ♗a1 is an easy draw.) 54...h3! It's important that the pawn promotes with check. 55.♗a2 ♔g6! Very nice motif! The king leaves from the h-file and prepares for the h2 push to lure the rook away from behind the a-pawn. 56.a7 h2! 57.♗xh2

♗a1 => 52...♔h6 53.♗a5 (53.gxh4 g3 White's king is cut off along the f-file, so the g-pawn will be traded for the a6-pawn. The draw is inevitable.) 53...h3! It's an important detail to promote with check. Black is safe. (After 53...hxg3 Black gets mated with the queens on the board. 54.a7 g2 55.a8 ♗g1 ♗h6 56.♗h8+ ♔g6 57.♗a6+ ♔g5 58.♗h6#)]

51.♔d3! Very tricky move, which confused Morozevich a lot. The most obvious move, ♔d4, would have allowed the promotion of the g-pawn with check... [51.♔d4 bxa6 52.bxa6 h4 53.♗b5+ ♔h6 54.gxh4 g3 55.♗g5 ♗a7 =]

51...♗d7+ 52.♔c4 [52.♔e2 was a serious attempt to hide the king on g2 from the checks, and at the same time stopping Black's counterplay on the kingside. However, Karjakin rightly pointed out at the press conference that Black holds the draw in a study-like way: 52...♗e7+ 53.♔f2 ♗f7+ 54.♔g2 bxa6 55.bxa6 ♗f5! preventing White from playing ♗b5-a5. It looks like an easy draw as the rook goes behind the a-pawn, but... 56.a7 ♗a5

57.♗b5+! We should never forget this kind of decoying tricks, which are very easy to miss during our games. This time, luckily for Black, the position remains a draw after creating an unbreakable fortress 57...♗xb5 58.a8 ♗h6 ♗f5! =

The position is drawn, as White's king can't join the battle. The queen alone can't make progress, the only idea could be to create some kind of zugzwang, but in this case, the Black king has good squares on h6 and g6, while the rook can pass along the f-file.]

52...♖c7+?? A terrible tactical oversight. [52...bxa6 53.bxa6 h4 would have led to a draw. 54.♖b5+ ♔h6 55.gxh4 (55.♖a5 hxg3 (55...♖a7 is also good, transposing to 55.gxh4.) 56.a7 ♖xa7 57.♖xa7 ♔g5 58.♔d3 g2 59.♖a1 ♔f4 60.♔e2 ♔g3 =) 55...♖a7 56.♖a5 g3 57.♔b5 g2 58.♖a1 ♔h5 59.♖g1 (59.♔b6 ♖xa6+ 60.♔xa6 ♔xh4 =) 59...♖g7 60.♔b6 ♔xh4 (60...♖g6+ also holds. 61.♔b7 (61.♔b5 ♖g7 =) 61...♖g7+=) 61.a7 ♖xa7 62.♔xa7 ♔h3 = Just in time.]

53.♖c6!! Beautiful combination, even with such a small amount of material on the board. White is winning now. As the rule says, if two connected pawns reach the 6th rank, a rook is unable to stop them.

53...bxc6 54.b6 ♖c8 55.b7 ♖b8 56.♔c5! White doesn't promote immediately with a7 in order to avoid any kind of fortresses. Now he simply wants to take on c6 followed by a7, so the next move is forced.

56...h4 And now:

57.a7! ♖xb7 58.a8♔ and White wins the h-pawn in any case. The game is over.

58...♖h7 59.♔g8+ ♔h6 From now on all the moves are winning, Black continues playing as he was nervous to blunder 53.♖c6, instead of making a draw with bxa6 one move before.

60.gxh4 ♖g7 61.♔h8+ ♔g6 62.h5+ ♔f7 63.h6 ♖g5+ 64.♔d6 g3 65.♔h7+ ♔f6 Karjakin finds the most elegant way to finish the game.

66.♔e7+ ♔f5 67.♔xg5+! ♔xg5 68.h7 1-0

Clash of the Titans

(17) Gudmundsson, Arinbjorn
— Fischer, Robert James [D95]

Reykjavik Reykjavik (2), 07.10.1960

[Csaba Balogh]

After the previous week, we examine another nice crush by a 17 years old Fischer. This time, he has the Black pieces.

1.d4 ♘f6 2.♘f3 d5 3.e3 g6 4.c4 ♙g7 5.♘c3 We have reached the 5.e3 system of the Gruenfeld defense from an unusual move order.

5...0-0 6.♙b3 [The main and critical move is definitely 6.♙e2 In the previous issue of CEWN, I have analyzed the convincing victory of Mamedyarov against Svidler with this line.]

6...e6 Black had to fortify his center, as a direct capture on c4 would just develop the f1 bishop without losing a tempo for ♙e2. [6...c6 is an alternative, which transposes to the Schlechter variation of the Slav defense. (1.d4 d5 2.c4 c6 3.♘c3 ♘f6 4.e3 g6)]

7.♙e2 ♘c6 A double-purpose move. The main idea that White has to avoid is ♘a5 and ♘xc4. The other point will become clear in the course of the game. [The main line and perhaps a better move is 7...b6 8.0-0 ♙b7 just like Svidler played in the mentioned game, but as we can remember, Mamedyarov had a very strong plan on the queenside starting with b4. Now the queen on b3 is clearly misplaced.]

8.♙c2 [White can't play for an advantage with 8.cxd5 exd5 9.0-0 Black can, for instance, start a strong regrouping with 9...♘e7 followed by c6 and ♘f5-d6, where the knight has an excellent place. It controls the e4 square and defends against the only White plan — the minority attack with b4-b5.]

8...dxc4 The f1 bishop has already spent a tempo, but still without the next move, it would not be advisable to give up the tension in the center.

9.♙xc4

9...e5! This is the point! It's very useful to remember this motif, we can meet with it in many different openings.

10.dxe5 [White can't win a pawn by 10.♘xe5 ♘xe5 11.dxe5 ♘g4 12.f4? because of the tactical trick 12...♘xe5! 13.fxe5? ♙h4+ and the c4 bishop falls.; 10.d5 is met with another known move from various openings: 10...e4! and Black is doing well everywhere. 11.dxc6 (11.♘xe4 ♘xd5) 11...exf3 12.gxf3 bxc6 White's king isn't safe anymore.]

10...♘g4 11.0-0 [A possible alternative was 11.e6 with the idea of destroying Black's healthy pawn structure, but the open f-file gives enough compensation for Black.

11...♙xe6 12.♙xe6 fxe6 13.0-0 Now, objectively the best move is to force a draw, 13...♖xf3! 14.gxf3 ♔h4 15.fxg4 ♔xg4+ 16.♔h1 ♔f3+ = but of course, Fischer would have preferred to play something else in the 13th move, just to continue the fight.]

11...♘cxe5 12.♘xe5 ♘xe5 13.♙e2 The position in the center is simplified and the game is balanced. White's idea in such positions is to create a strong center with e4, f4 and e5. Black has to fight against this.

13...c6 The most logical move to take control of the important d5 square, as otherwise, ♖d1 followed by ♘d5 could be unpleasant.

14.f4 The idea was correct, but White was not well prepared for that yet. [14.e4 was probably a better start, but here again Black is able to create his counterplay with 14...♔h4! due to the ♘g4 ideas. White has to lose a tempo with 15.h3 and here, as Fischer recommended in his analyses, the strongest move is (On the direct 15.f4 ♘g4 16.h3? ♙d4+ wins.) 15...g5! This is also a known motif to fight against the f4 plan. Of course, we must always be careful with such pawn moves, because it gives up the f5 and h5 squares. For instance, a knight on g3 or e3 could be devastating. However, in this particular case Black is ready to lead an attack with g4 or another possible plan is f5. The Black king will be safe on h8.]

14...♘g4 15.h3

15...♙f5! Probably this move was missed or at least underestimated by White. [After 15...♘f6 16.e4 followed by ♙f3 and e5, White would have got what he was aiming for.]

16.e4? White mis-evaluates the arising position, or just missed the 19th move... [16.♔b3 White should have gone for the b7 pawn. 16...♘f6 17.♔xb7 At least to have a pawn as compensation for the undeveloped queenside and the huge structural weakness on e4. Black has full compensation, but it is just enough for draw, there's no hope to get an advantage. 17...♘e4! 18.♘xe4 (18.♔xc6 would be too greedy because of 18...♖c8 and ♘xc3 next.) 18...♙xe4 19.♙f3 ♙xf3 20.♖xf3 ♔d5 with full compensation.]

16...♔d4+! 17.♔h1 ♘f2+ 18.♖xf2 [18.♔h2? would just drop a pawn. 18...♘xe4]

18...♔xf2 19.exf5 This was the critical position that both players were aiming for. White has a material advantage, but it is easy to feel that the coordination between his pieces is not good enough, and Black should have something. Of course, Black has to act quickly and precisely, as otherwise he'll just end up in a losing position.

19...xc3! A hard psychological decision to give up the strong bishop, but it leads to the invasion of the Black rook on the 1st rank. [The most tempting move 19...fe8 would have been a mistake. 20. e4! e1+ 21. h2 On 21...xf5, White stabilizes with 22. g3, while against other moves, he simply plays b1 and develops his bishop to obtain a big advantage. 21...d4 looks strong at first sight, but White has 22. e3! e1a1 23. xd4 ±]

20.bxc3 ae8 [20...fe8 leads exactly to the same...]

21. d3 e1+ 22. h2 g1+ 23. g3 Very suspicious, but accurate play is required by Black.

23...fe8! Bringing the last piece and preparing the e3 sacrifices. The task of the defensive side is pretty hard — his position is objectively worse.

24. b1 [24. f2? loses on the spot. 24...8e3+! 25. xe3 xe3+; 24.fxg6 hxg6 25. xg6 looking for a perpetual check, but of course, Black is not obliged to accept the sacrifice. (25. b1 f5! is very strong, taking away the escaping squares of the king. White doesn't really have a move because of the pin on the 1st rank and the necessity of guarding the king. An active action like 26. xb7 leads to a forced mate in 8 moves: 26...1e3+! 27. xe3 xe3+

28. h4 e1+! 29. g5 g3+! 30. f6 h4+ 31. xg6 e6+! 32. xf5 f6+ 33. e4 xf4#) 25...1e2! 26. xf7+ h8! The only place to avoid the checks. 27. f5 xg2+ 28. h4 and here Black can choose between several winning moves. The computer recommends as the strongest, the cold-blooded 28...e7! (A bit more human is 28...e1+ 29. h5 g7!! 30. xe8 xe8+ 31. h4 h8+ 32. h5 d8+) 29. f6+ g7]

24...xf5! with the idea of h8 and g8. [24...xc1! was also winning 25. xc1 e3+ 26. g4 (26. h4 is met with 26...h2 where the only defense against g3 runs into a small tactic. 27. f2 xh3+! 28. g5 xd3) 26...h5+! (26...h2 27. f2 xd3 is also good.) 27. g5 (27. h4 loses again to 27...h2 28. f2 xh3+! 29. g5 xd3) 27...g3+ The king gets in trouble in every move, 28. h4 (28. h6 e3 29. a4 e7; 28. f6 c5 and d6.) 28...h2! with multiple threats, for example, g4, xh3 and xf4, or just xg2.]

25. d2 [25. xf5 loses to 25...1e2 26. xh7+ h8; 25.c4 was probably the most tricky, with the idea of xf5 and e2 xh7, and against every king move, White has an unpleasant check with the c1 bishop. Black has to

find the winning combination: 25...♖xc1! 26.♖xc1 ♖e3+ 27.♔h4 ♕h2 28.♔h5 At this moment, Black surprisingly has only two winning moves, and none of them is obvious... (The idea is the same, that on 28.♕f2 ♖xh3+ 29.♔g5 ♖xd3 wins.)

28...f6! Black covers the g5 square to threaten ♖xh3. (28...h6! also wins, with the same idea of taking with ♖xh3. 29.♔xf5 ♕xf4 30.h4 ♖g3 31.♔h7+ ♔g7 32.♕f5 and Black must go to a winning queen endgame. 32...♕xc1 33.♕e5+ ♔xh7 34.♕xg3 ♕xc4) 29.♔xf5 ♕xf4! 30.h4 ♖g3! ♖g5 is threatened. 31.♔xh7+ ♔g7 32.♕f5 ♕h6#! is the final point and the reason why 28...f6 is even stronger than 28...h6.]

25...♖xb1 [The usual motif 25...♖8e3+ was winning here again, but the text is much easier. 26.♔xe3 ♖xe3+ 27.♔h4 ♕h2]

26.♕xb1 ♕xb1 27.♔xb1 ♖e2 White resigned because he'll lose one of the bishops.[27...♖e2 28.♔c1 ♖e1]

0-1

Editorial Preface

London Chess Classic: Carlsen is crushing everything in a very impressive style. For the third time in a row, he managed to win London Chess Classic tournament and this time with a very impressive 5 wins and 3 draws! His live rating is over 2860, breaking Kasparov's all time record of 2851. Can somebody stop Carlsen in the near future? It doesn't seem so...

It also was a great tournament for Vladimir Kramnik with 4 wins and 4 draws, getting to the second place in the live rating and overtaking Aronian who was in a bad shape during the London Classic. The 3rd place went to Nakamura who had ups and downs, but all in all showed a big fighting spirit and a nice 2840 performance.

The Russian Cup was won by "guess who"... Bartosz Socko! A Polish national team member. How is it possible? Don't ask me! It was a knock-out system event and the final match was played between D. Khismatulin and B. Socko, the latter managed to win the first game with White and somehow survive the second game with Black.

In Germany, in the clash of the 2 strongest teams of the current season — Baden-Baden and Muehlheim — the match finished with the score 4,5-3,5 in favor of Baden-Baden.

As usual, we wish You chess joy with Your current issue of CEWN.

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Kramnik,Vladimir (2795)
— McShane,Luke J (2713) [D15]

4th London Chess Classic Olympia, London (5), 06.12.2012
[Csaba Balogh]

A really wonderful crush by Kramnik with a lot of sacrifices.

1.d4 d5 2.c4 c6 3.♘f3 ♘f6 4.♘c3 a6 5.g3 Recently, this 5.g3 line against the Chebanenko Slav was considered to be quite a harmless approach, but this game might change the general opinion.

5...dxc4 6.a4 White wants to recover the c4 pawn, therefore he prevents b5. [6.♙g2 b5 7.♘e5 ♙b7 is the start of the other line, where White tries to find compensation for the pawn in the center with e4.]

6...e6 7.♙g2 c5 8.0–0 [8.dxc5 is the most common move, but after 8...♙xd1+ 9.♘xd1 ♙d7! This very deep novelty was introduced by Karjakin back in 2009 and it seems to solve all of Black's problems. 10.♘e5 ♘c6=]

8...cxd4 9.♘xd4 This could not be a real surprise for McShane that Kramnik chose this line, since he has already played it in two games.

9...♘bd7 10.♘c2! White wants to win back the c4 pawn, so he drives his knight to e3.

10...♙c7

11.♙f4! This is the novelty of our game. Black provokes the e5 move, after which the d5 square becomes a real hole in Black's camp. [Kramnik has deviated from his own game, which continued with 11.♙d4 ♙c5 12.♙h4 ♙e7 13.♘a3 ♘e5 14.♙f4 h6 15.♙xe5 and at this moment, the players agreed to a draw. Kramnik-Gelfand, Linares 1997.]

11...e5 [If Black restrain s himself from giving up the control over the d5 square and plays 11...♙c5 12.a5! was probably Kramnik's preparation with the idea of 12...♙e7 13.♙a4! 0–0 14.♘a3!+= With this cool maneuver, White wins back the pawn and obtains a clear advantage as all his pieces are perfectly placed. The main problem of Black is that he can't protect his pawn with b5 because the a8 rook will hang at the end.]

12.♙d2! [12.♙g5 is much worse because of 12...h6 and the bishop won't be able to return to g5 as it happened in the game.]

12...♘c5 Black would like to preserve his c4 pawn advantage and wants to protect it with ♙e6. In addition, he is ready to jump with the knight to b3. [12...♙e7 is met with 13.♘e3! and ♘cd5 next is going to be really unpleasant.; 12...♙c5 was an alternative, as it was pointed out

by Kramnik at the press conference. He was intending to play 13.♘e3 0-0 14.♖c1 White is very close to restoring the material balance. 14...♙xe3 15.♙xe3 ♖b8 Black is finally ready to push b5, but this still doesn't allow him to equalize: 16.♘d5! ♘xd5 17.♙xd5 b5

18.♙c6! This concrete solution demonstrates well the power of the bishop pair. 18...♙xc6 19.♙xc6 ♙a7 is threatened, and on 19...bxa4 20.♖fd1! suddenly the f8 rook is going to be trapped, 20...♘f6 21.♙c5!]

13. ♙g5! By eliminating the f6 knight, the d5 square becomes even more vulnerable.

13... ♙e6 Black tries to control the d5 square, but this allows White to destroy his pawn structure... [13... ♙e7 is not better either. 14. ♙xf6 ♙xf6 15. ♘d5 ♙d8 16. ♘ce3 ♙e6 17. ♘xc4 ± The power of the minor pieces is just huge. White wants to play ♘cb6 and ♖c1, or just b4 with a big advantage.]

14. ♙xf6 gxf6 15. ♘d5 ♙d8 [The absence of the light-squared bishop will tell after 15... ♙xd5 16. ♙xd5 ♘b3 17. ♖ad1 followed by ♘e3, with complete control on the light squares.]

16. ♘ce3 ♘b3

17.a5!! A shocking move, based on excellent calculation and great intuition! White frees the a4 square for the rook, or for the queen, if the rook is taken. [McShane was expecting 17.♖b1 and after 17...♖c8 he would successfully consolidate his position.]

17... ♖c8? [The critical test was definitely 17...♘xa1 18.♙a4+! (18.♙xa1 is too slow. 18...♙c5) 18...♙d7 Only move. 19.♙xc4 ♘c7 is threatened. 19...♖c8 20.♙h4 ♖c6! 21.♖xa1 Despite the fact that White doesn't even have a pawn for the exchange, it's clear that with such active pieces, it's much easier and better to play the position as White. However, Black also has some chances after 21...f5!]

18. ♖a4! This was the point! Now White is ready to recover the pawn again and if it falls, the Black position collapses.

18... ♘d4 Black indirectly protects the c4 pawn, as the d5 knight is hanging after all. [On 18...♘xa5 19.♘xf6+! looks pretty strong. 19...♙xf6 20.♖xa5 Black has too many weaknesses. Not only the pawns, but also the light squares.]

19. ♖b6! ♖c7

20. ♖xc4!! Another shocking blow, with fantastic intuitions again! In a few moves, we'll get a clear picture of why the absence of the e6 bishop is worth a rook. [20. ♖bxc4 After 20... ♗c5 Black obtains a playable position. Suddenly, the bishop pair and the strong knight on d4 are enough compensation for the weakened structure.]

20... ♗xc4 [Black is worse even if he does not accept the exchange: 20... ♗c5 21. ♖bd5 ♖c8 22. ♔d3 followed by ♖fc1.]

21. ♖exc4 ± White is ready to kick out the d4 knight with e3. It's very nice to see the way White plays on the light squares on the following lines...

21... ♖b5 [21... ♗c5 is met with 22.e3! ♖e6 23. ♖d5 ♖d7 24. ♖f3 White continues dominating even without the queens on the board. 24... ♖xd5 25. ♖xd5 ♖xd5 26. ♗xd5± The b7 pawn is a clear weakness.; 21... ♗e7 22.e3! ♖e6 23. ♖a4+ ♖f8 24. ♖d5! (24. ♖d1 is less precise. 24... ♖e8) 24... ♖c5 25. ♖cb6 ♖g7 26. ♖d1 Black can't move! ♖g4 is coming with a mating attack. ♖d7 is also in the air.]

22. ♖b1! Very nice! Keeping the eyes on the light squares. ♖d1 joins the game next.

22... ♖d4 Otherwise, after ♖d1, the queen would only have one square on b8, which was definitely not a tempting alternative.

23. ♖d1 ♖c5 24.e3 Taking control of the d4 square. [It was also strong to transfer the knight to d5 first. 24. ♖e3 ♖d4 25. ♖ed5 ♖c6 26.e3! with a winning advantage as well.]

24... ♗e7 25. ♖f5! Stormy clouds are approaching. At this moment, McShane had only 3 minutes left against Kramnik's one hour.

25... ♖f8 26. ♗d5! By protecting the c4 knight, White threatens with ♖d7.

26... ♖g7 27. ♖g4+ ♖h6 Obviously, White has several ways to win, but Kramnik continues to play for the spectators!

28.e4! Of course, to give up the d4 square is a potential mistake, but it has a concrete reason — White wants to mate Black with ♖e3-f5. Black has an only way to defend.

28...♘d4 29.♘e3 [29.b4!? was another pretty win. 29... ♖xb4 30.♖xd4! exd4 31.♙f4+ ♔g7 32.♙xc7 +-]

29...f5 Otherwise, ♖xd4 decides the game. Now Kramnik has calculated a very long, forced and spectacular line until the win.

30.♙h3+! [30.♘xf5+ ♘xf5 31.♙xf5 is also winning for White.]

30...♔g7 31.♖xd4! Another exchange sacrifice. This is already the 3rd in the game; McShane rejected to accept the first one on a1.

31...exd4 32.♘xf5+ ♔f8 33.♙h6+ ♔e8

34.♙xf7+! This was the point. Black can't hope for salvation. [34.♙g7 ♖f8 is not clear.]

34...♔d8 [34...♔xf7 35.♙g7+ ♔e6 Now, the best, but not the only way to win is (35...♔e8 36.♙xh8+ +-) 36.♘xd4+ ♔d6 37.♙h6+! ♔e5 this is not a good sign. 38.♘f3+ ♔xe4 39.♙f4+ ♔d3 40.♘e5+ ♔c2 41.♙e4+! After this subtle chess, Black can't avoid losing his queen with ♘d3 check. For instance, after 41...♔b3 42.♙a4+ ♔xb2 43.♘d3+ +-]

35.♙g7 ♖f8 36.♘xd4 Suddenly, ♘e6 threatens mate in one. Quite an unusual picture. [36.♘d5 was also winning.]

36...♖c6 [36...♖xf7 also loses to 37.♙xf7 (37.♘e6+?? only leads to a perpetual check after 37...♔e8 38.♙g8+ ♖f8 39.♘g7+ ♔d8 40.♘e6+=) 37...♙xd4 38.♙g8+ +-]

37.♘xc6+ bxc6 Black seems to have some hopes because of the f2 square, but the next move destroys all the dreams...

38.♙g4! with a double mate threat on d7 and c8. Kramnik admitted that he calculated until this moment when he played 30.♙h3! Impressive!

38...♔c7 39.♙d7+ ♔b8 40.♙d2? The only mistake in the game by White. McShane had only 3 seconds left to make the last move of the time trouble and Kramnik wanted to shock him with this unexpected retreat, with the idea of ♘d7. We'll get the same position two moves later, when White already plays the strongest move.

40...♔c7 [40...♙g5 could have been a small chance, although the position remains lost 41.♘d7+ ♔c8 42.♙d1! (42.♘xc5 ♙xd2 43.♙c4 is also technically winning, but of course, to enter such an endgame when Black is so close to getting mated gives a bad feeling...) 42...♖d8 43.♙g4! These were the best moves, after which White is still winning easily... 43...♖xd7 44.♙e6 +-]

41.♙d7+ ♔b8 42.♙g2! A cool move. Suddenly, Black finds himself in zugzwang as he can't play ♖d8 because of ♙xd8 and ♘d7.

42...♙d6 [42...♖d8 43.♙xd8+ ♙xd8 44.♘d7+; 42...♖xf7 43.♙c8+ ♔a7 44.♙c7#]

43.b4! Now the game is over. Black has to give up his c6 pawn because d6 has to be protected.

43...♔d4 44.♚xc6 ♔a7 All the moves are winning now...

45.♔h3 Kramnik calmly leaves from the ♚xe4 check, after ♘c8 ♚xc8 ♚xc8. Black can resign now.

45...♚d1 [45...♚xf2 46.♚d7+ ♔b8 47.♚xd6+ +-]

46.♘c8+ ♚xc8 47.♚xc8 White ended up with 4 extra pawns and the mating attack continues. [47.♚b6+ ♔a8 48.♙d5+ +- was even easier.]

47...♚f1+ 48.♔g4 h5+ 49.♔xh5 What a brilliant performance by Kramnik! Amazing!

1-0

(2) Kramnik,Vladimir (2795)
– Jones,Gawain C (2644) [A04]

4th London Chess Classic Olympia, London (8.1), 09.12.2012

[Kamil Miton]

1.♘f3 c5 2.b3!? After this move, it's clear that Kramnik says: „Let's play simple chess without a huge amount of theory". It's interesting because I'm sure that in the opening Kramnik is not worse prepared than the English grandmaster. We know that Kramnik plays a lot of lines after ♘f3-c4, where his new improvements and ideas might be decreasing, so he decides to use the original 2.b3 move.

2...d5 Of course, Black has a few different plans. For example, it's possible to play b6-♙b7 or ♘f6-g6-♙g7. Jones uses a logical development as well; he is going to build a strong center.

3.e3 ♘f6 4.♙b2 e6

5.g3 ♘c6 6.♙g2 ♙e7 7.0-0 0-0 8.c4 The first important moment in the center.

8...b6 Jones could change the structure slightly and transpose the position to a Benoni System, with colors reversed. [8...d4 9.exd4 cxd4 In the Benoni structures, the bishop on b7 (in this case, on b2) is badly placed. On the other hand, Black has to lose a tempo to put the pawn on e5. 10.♖e1 Important move. White doesn't allow Black to push e5 too easily. (10.d3 e5 11.♗e1 ♘d7 with a5-f6-♗c5 next. The Bishop on b2 is limited and only Black can be better.) 10...♘e8 Black played a few other moves as well. 11.♘e5 ♗xe5 12.♗xe5 f6 13.♗e1 e5 14.d3 ♘c7 15.♙a3 Logical. 15...♘e6 A mistake. Now Black's pieces are under pressure on the e-file. (15...♙xa3 16.♘xa3 ♖d6 with more or less equal play.) 16.f4 ♙xa3 17.♘xa3 ♖e7 18.♘c2 exf4 19.gxf4 (19.♙d5 ♖g4 is coming next.) 19...♖d6 20.♖c1 ♘xf4 21.c5 ♖c7 1/2–1/2 Dizdar,G-Gustafsson,J/Plovdiv BUL 2008. 22.♘xd4 ♘xg2 23.♙xg2 Black is much better because of the very poorly placed White king.]

9.♘c3 ♙b7 A natural human decision. Another interesting option was: [9...dxc4 10.bxc4 (10.♘e5 ♗xe5 11.♙xa8 ♙a6 12.♙g2 cxb3 13.axb3 ♙xf1 14.♙xf1 ♖d7 Black is not worse.) 10...♖d3 looks crazy but very concrete. 11.♖b3 (11.♘e5 ♗xe5 12.♙xa8 ♘xc4 13.♙c1 ♘d5; 11.♘e1 ♖d7 12.d3 ♙b7 13.♖e2 ♗fd8 White can try to improve his position in the long-term, but Black's position is very solid.)

11...♘a5 12.♘e5 ♗xb3 13.♘xd3 ♗xa1 14.♙xa8 ♙a6 15.♙f3 ♙xc4 16.♘e1 ♙xf1 17.♙xf1 b5 18.♙xa1 ♖b8 and the position is almost equal.]

10.cxd5 exd5 [10...♘xd5 11.♘xd5 (11.d4 ♗xc3 (11...cxd4? 12.♘xd5 exd5 13.♘xd4 with a clear advantage for White.) 12.♙xc3 and here I suppose that Black needs a few accurate moves to equalize the position and be safe. 12...♙f6 (12...cxd4 13.♘xd4 ♖c8 It looks like Black almost equalized, but... 14.♘b5 ♖xd1 (14...a6 15.♖g4 This is the trick. 15...g6 16.♗fd1↑) 15.♗fxd1 ♗fd8 16.♙xc6 ♖xc6 17.♗xd8+ ♙xd8 18.♖d1 ♙f6 19.♖d7! ♙a8 20.♖xa7 ♖c8 21.♖c7 ±) 13.♖c1 ♙a6 14.♗e1 cxd4 15.♘xd4 ♘xd4 16.♙xd4 ♖c8 17.♖xc8 ♙xc8 18.♙xf6 ♖xf6 19.♖d6 ♖b2 and Black is fine.) 11...♖xd5 (11...exd5 12.d4 ♖c8 (12...♙f6 13.♖d2+=) 13.dxc5 (13.♖e2 c4 14.bxc4 ♙a6 15.♖fc1 ♘a5↗ Black avoids the position with hanging pawns and changes the structure. Of course, now d5-pawn will be weak, but maybe in this case, it's not a big deal.) 13...bxc5 14.♖e2 with a similar position to the game where White is slightly better.) 12.d4 is not easy for Black because White has some threats over the h1–a8 diagonal. 12...♖ad8 (12...♖f5!?) 13.♘e5 ♖d6 14.dxc5 ♖xc5

15. ♖d7 ♔f5 In other case ♔g4 16.e4 ♔g5 17.h4 ♔h6 The Black queen doesn't have any good squares because after ♔g6, White has ♖xf8. 18. ♕c1 g5 19.hxg5 ♔g7 20.e5 ♖h8 21. ♕f4↑]

11.d4+= Kramnik did his job. He got a slightly better technical position. Now, Black will get a position with hanging pawns or an isolated pawn. Both options are really unpleasant, especially when You play against Kramnik.

11... ♖e4 12.dxc5 ♖xc3 [12... ♕f6 13. ♖d4 ♖xd4 14. ♖xe4 dxe4 15. ♕xd4 bxc5 16. ♕xc5 ♕xa1 17. ♕xf8 ♔xd1 18. ♖xd1 ♖xf8 19. ♖xa1 ♖c8 20. ♖d1 ♖c2 21. ♕f1 White is better now that Black can't win the pawn. 21... ♖xa2 because 22. ♕b5 and it's curious that Black managed to lose his bishop!]

13. ♕xc3 bxc5 14. ♔e2 Logical. White develops his pieces. Kramnik is going to play ♖d1–Rc1 and put pressure on the hanging c5-d5 pawns. Besides, one of White's idea is to play ♔b2 in order to provoke some weaknesses on the kingside.

14... ♖e8?! It seems logical to put the rook on e8 in order to have some ideas with the d4 push, but Jones doesn't feel the danger. The most important task for him was to take care of the d5 pawn.

[14... ♔d6 15. ♖fd1 ♖fd8 16. ♔b2 f6 doesn't look nice, but what else to do?

a) 16... ♕f8 17. ♖d2 with the idea of ♖ad1, putting pressure on the d5-pawn. Compared to the 16...f6 line, Black will not be able to play ♔e6 because of ♖g5;

b) 16... ♔e6

17.b4! Nice trick. To immediately grab the pawn on g7 is not correct. (17. ♕xg7 d4 18.exd4 ♖xg7 19.d5+ ♕f6) 17...d4 18.exd4 cxb4 19.d5 ♖xd5 20. ♖xd5 ♔xd5 21. ♕xg7 White is clearly better because of the weak Black king;

17. ♖d2 (17. ♖e1 ♔e6 18. ♖d3 d4 Finally it's possible! 19.exd4 cxd4 20. ♕b4 ♖xb4 21. ♕xb7 ♖xd3 22. ♖xd3 ♖ab8 23. ♕f3 Black should easily manage to make a draw.) 17... ♔e6 18. ♖ad1 ♖d7 19. ♖e1 ♖ad8 and somehow, Black managed to defend. 20. ♔c2 ♖e5 21. ♕xe5 fxe5 22.e4 gaining control over the light squares. 22...d4 23. ♕f1 ♖h8 24. ♕c4 ♔g6 25. ♖e2+=]

15. ♖fd1 ♕f8 16. ♔b5! Now Kramnik is going to get a better endgame by force. He had other good options as well: [16. ♖d2 with the idea of creating pressure over the d-file. 16...a5 (16...d4 doesn't work because of 17. ♔d1 and White is winning a pawn. 17... ♔b6 18.exd4 cxd4 19. ♖xd4 ♖e5 20. ♖f3 A strong move that doesn't allow Black to get counterplay on the light squares.) 17. ♔d1 (17. ♖ad1 ♕a6 18. ♔e1 d4 and the queen on e1 can't escape from the pin.) 17... ♖e7 18. ♖e5 ♔c7 19. ♖c1 ♖ad8 20. ♔h5 with a very unpleasant position for Black. 20... ♖g6 21. ♖xg6 hxg6 22. ♔d1 and the d5 pawn is falling. 22... ♖d7 23. ♕xd5 ♖xd5 24. ♖xd5 ♔c6 25.e4 ♖xe4 26.f3 ♖e8

27.♖e5+=; 16.♔d3 Xd5 16...♘b4 17.♙xb4 cxb4 18.♖ac1
The weak d5 pawn and the good square on d4 for the knight give White a strategical advantage.]

16...♔b6 [16...♖b8 17.♔a4+= It's hard to find a good plan for Black.]

17.♔xb6 axb6 18.♖xd5 ♘d4 19.♘xd4 ♙xd5 20.♙xd5 cxd4 [20...♖ad8 21.♘b5 ♖xd5 22.♘c7 +-]

21.♙xd4± The position is very unpleasant for Black. For the exchange, White has two pawns and a strong bishop on d5 that controls many important squares. White's pieces cooperate very well and it's easy for them to improve their positions.

21...♖a5 The idea of this move is to activate the bishop after ♙c5. [21...♖ad8 22.♙c4 (22.e4? ♖xe4 23.♙xe4 ♖xd4 24.♙f3 ♖d2=) 22...♖b8 Black wants to play b5-b4 and fix the a2-b3 pawns, so White plays (22...♙c5 23.♙xc5 bxc5 24.a4 ±) 23.a4 g6 24.♖d1 with the idea of exchanging bishops after ♙g7 and penetrating with the rook on the 7th rank. 24...♖ed8 25.♖c1 ♖dc8 (25...♙g7 26.♙xf7+ +-) 26.♙e5 ♖a8 27.♙g2 ♙g7 28.♙d6 ♙f8 29.♙f4 ♙e7 30.h4+=]

22.e4 ♙c5 Black could try to fix the White pawns again: [22...b5 23.a4 (23.♖c1 ♖xa2 24.♖c7 ♙e7 (24...♖e7 25.♖c8+-) 25.♖b7 ♖d2 26.♙e3 ♖d1+ 27.♙g2 b4 28.♙c6 ♙f8 29.♙xe8 ♙xe8 and Black has enough counterplay against the b3 pawn.) 23...bxa4 24.bxa4 ♖b8 25.♙c3 ♙b4 26.♙e5 ♖c8 White is better, but it's a long way to convert it to a whole point.]

23.♙c3 Of course, White doesn't exchange the bishops.

23...♖a3 24.♙b2 ♖a7 25.a4 ♖c7 The threat now is ♙xf2, so White plays the strong:

26.♖a2! h6 Well, Black has to be careful, but I don't like Jones' plan. My intuition tells me that it's better to keep the king closer to the queenside (Kf8) and try to put the pawns on light squares, like g6-h5. [26...♙b4 When I saw this game, I thought about this move with the idea of activating the rook: 27.♙d4 ♖c1+ 28.♙g2 ♙c5 29.♙xc5 Now it's time to take on c5. 29...♖xc5 30.b4 ♖c7 31.a5 bxa5 32.bxa5 ♖a7 33.a6 h5 An important move if Black needs to hold the rook endgame with 4 against 3 on one side. 34.♙f3 ♖b8 35.♙f4 ♖b6 36.♙c4 (36.♙b7 g6 with ♖xb7 next.) 36...g6 37.f3 ♙f8 38.♙e5 ♙e7 39.♙d4 and Black's position is very unpleasant.]

27.♙g2 ♙h7 28.f4 f6 Strange setup. Now White gets strong play on the light squares.

29.♙f3 ♖d7 30.a5 Kramnik activate the rook. [30.♙c6? ♖d3+; 30.♙a1 f5 31.♖c2 fxe4+ 32.♙xe4+ ♙h8 33.♙e5 White pieces are much stronger. Now the threat is to push a5.]

30...bxa5 31.♖xa5 ♖c8 32.♖b5 ♖d6

33. ♖b7 The engine suggests another winning idea, but it looks bit unhuman. [33.b4 ♙g1 (33... ♖b6 34. ♖xc5 ♖xc5 35.bxc5 ♖xb2 36.c6 White is winning because Black is not able to stop the c-pawn. 36...g6 (36... ♖xh2 37.e5 +-) 37. ♙e3 ♙g7 38. ♙d4 ♖b8 39. ♙c5 +-) 34.e5 fxe5 35. ♙xe5 ♖b6 36. ♙e4+ ♙h8 37. ♖d5 This idea was not easy to see. 37... ♖xb4 38. ♖d6 ♖b6 39. ♖d7 ♖g8 40. ♙d5±]

33... ♖b6 34. ♖f7 ♖f8? The final mistake. Black could have tried to activate the rook in order to look for some counterplay. [34... ♖a6 35. ♙b7 (35.h4 ♖a7 36. ♖xa7 ♙xa7+=) 35... ♖a7 36. ♙xf6 ♙g6 37. ♙xc8 ♙xf7 38. ♙c3 ♖a2 (38... ♖a3 39. ♙b7 White is on time.) 39. ♙b7 ♖xh2 40.b4 ♙e7 41.b5 ♙c5 42. ♙d5+ ♙f8 43.e5± The White king will be easily improved over the light squares and it will help the b-pawn.]

35. ♖c7 ♙d6 36. ♖d7 ♖a6 [36... ♙c5 37.e5 White is crushing.]

37. ♙d4 ♙b8 38. ♙c5 ♖e8 39. ♙g4 ♖a2 40.h4 ♖c8 41.b4 White is totally dominating. Kramnik realized his advantage very nicely from the 21st move.

41... ♖a3 42.h5 ♖c3 43. ♙d4 ♖3c7 44. ♖xc7 ♙xc7 Now the b-pawn is going to win the game and White can even exchange the rook.

45. ♙f5 ♙d6 46.b5 ♖c1 47.b6 ♙b8 48. ♙e6 ♖h1 49. ♙c5 1-0

(3) Jones,G (2644) – Anand,V (2775) [D70]

4th London Chess Classic London ENG, 06.12.2012

[Csaba Balogh]

After 17 games without winning a single game, the World Champion Anand succeeded to score in great style.

1.d4 ♘f6 **2.c4** g6 **3.f3** Recently, the 3. f3 line against the Gruenfeld has been enjoying big popularity. We often meet with it on the highest level. Black has plenty of different setups, and Anand chose one of the sharpest ones.

3...d5 4.cxd5 ♘xd5 **5.e4** ♘b6 **6.♘c3** ♙g7 **7.♙e3 0-0 8.♙d2 e5** Anand has fresh experience with this move, since in the 3rd game of the World Championship match against Gelfand, he played like this. However, in that game Anand was playing with the White pieces! We have analyzed that game in the 12th CEWN. [8...♘c6 is the main line. 9.0-0-0 ♙d6 Two days after this game, Aroonian played like this against Jones. It was another tense battle, which ended in draw.]

9.d5 c6 10.h4 cxd5 11.exd5 ♘8d7 **12.h5** ♘f6 **13.hxg6 fxg6** Until here, we were following the theory, and now Jones deviates with a novelty. I'm not sure if it was a prepared one, it's possible that he was just caught by surprise when Anand played the Gruenfeld defense!

14.♘h3 This is a nice square for the knight, since it's heading to g5, where it contributes to the attack and is ready to jump to e6 and e4. [14.0-0-0 ♙d7 15.♙b1 ♖c8 happened in the mentioned Anand-Gelfand game.]

14...e4! A great reaction and also the most principled move to open the position against the king on e1; it can only look for safety by castling queenside, where it moves into the diagonal of the g7 bishop. [The greedy 14...♘fxd5 was not advisable because of 15.♘xd5 ♘xd5 16.♘g5! (The tempting 16.♙c4? doesn't work. 16...♙h4+!) 16...♘xe3 17.♙xe3 and White has more than enough compensation for the pawn. Suddenly, the king on g8 is much more vulnerable than the one on e1. White threatens ♙c4, for example. 17...♙a5+ is simply met with 18.♙f2 White needs the queens on the board to lead an effective attack.]

15.fxe4 ♘g4 The most logical move again. Black wants to take the e3 bishop, and White can't allow this, as it would lead to a disaster on the dark squares. In addition, the knight is also ready to occupy the e5 square, from where the ♘c4 threats become really annoying. [15...♘h5 is the computer's suggestion with full compensation, but the text move is more human.]

16. ♖f4 This is probably a mistake, but in my opinion, it's almost impossible to play this position well as a human. Black's attack is rolling, while White can stay in the game by finding the only moves, which are not obvious at all. It was not a wise decision by Jones to go for this line without proper preparation. [16. ♖c5 was the right move according to the machine, but to give up the c1-h6 diagonal is really unhuman, as it deprives White from castling queenside because of ♖h6. 16... ♖h6 (16... ♖f7? is bad. 17. ♘g5; 16... ♖d7 is also possible with an exchange sacrifice. 17. ♖xf8 ♖xf8 Black has total domination on the dark squares and the haunt of the king can begin... The computer is not impressed by this at all, but it looks very dangerous to me.) 17. ♖d3 ♖f7 looks terrible for White, but according to the machine, the game is far from clear after, for instance 18. ♖e2 Anyway, I don't suggest anyone to try this in a practical game.; 16. ♖g5 ♖d6 17.0-0-0 ♘e5 is similar to the game. Black has a huge attack. One of the threats is ♖g4 followed by ♖c8 and ♘bc4.]

16... ♘e5! Black prepares for the ♘c4 jumps. White is in deep trouble, and even the computer admits it this time.

17. ♖g5 [17.0-0-0 is not better. 17... ♖g4 Black's pieces are coming with tempo. 18. ♖e1 (18. ♖e2 loses to 18... ♘ec4 19. ♖c2 ♖xh3! and f4 falls.) 18... ♘ec4 19. ♖xc4 ♘xc4 20. ♖d3 ♖c8 21. e5 ♖b6 with a crushing attack.]

17... ♖d6 It's very nice to see how Anand only plays on the dark squares. All these ideas are the fruits of the 14... e4 move!

18. ♘b5 [18.b3 to prevent ♘c4 doesn't really reach its aim. 18... ♘ec4! wins because the c3 knight lost its stability. 19. bxc4 ♖g3+! wins.; 18.0-0-0 ♖g4 is as bad as the 17.0-0-0 line.]

18... ♖c5 19. ♘a3 [19. ♖c1 Black has two ways to win: 19... ♖xf1+ is the easiest and ♖xb5 next. (19... ♘ec4 is even stronger. 20. ♖xc4 ♘xc4 21. ♖e2 ♖b4+ 22. ♘c3 ♘xb2 White collapses.)]

19... ♖xh3! Black wins by force after this move. Anand has precisely calculated everything. White doesn't have a good way to re-capture, as the f3 square must be protected and ♖xh3 leaves the f1 bishop alone.

20. ♖e3 White sends the queen away from the diagonal in order to be able to take back with ♖xh3 and prevent

the ♔g1 ideas, but this loses as well. [20.♖xh3 ♘bc4 (20...♔g1 21.♔e2 ♘g4 is also winning. Black has numerous threats, for example ♖f2, ♘h2 or ♙xb2.) 21.♘xc4 ♘xc4 White can't hold the attack 22.♔c2 (22.♙xc4 ♔g1+ 23.♙e2 ♖f2+ 24.♙e3 ♖f1+ 25.♙d3 ♔d4+ All the pieces start to fall.) 22...♖xf1+ 23.♙xf1 ♘e3+; 20.gxh3 ♘f3+; The most elegant refutation of 20.♖c1 is 20...♖xf1+! 21.♖xf1 (21.♙xf1 ♖f8+ 22.♙e1 ♘d3+! 23.♔xd3 ♔f2+ 24.♙d1 ♙g4+) 21...♔xc1+! 22.♔xc1 ♘d3+ 23.♙d2 ♘xc1 and Black ends up with an extra piece in any case.]

20...♔c8! The first visual mistake, as Anand puts one of his pieces on a light square. The only reason is that Black could win on the spot with a tactical motif.

21.♖c1 [21.♖xh3 ♔xh3! is the point! 22.gxh3 ♘f3+ 23.♙e2 ♘xd2 and the problem is that b2 also falls in the next move, which leads to the loss of another piece.]

21...♔g4 22.♖xh3 ♔xh3! 23.gxh3 ♘f3+ 24.♙e2 ♘xd2 25.♙xd2 ♙xb2 Unfortunately for White, the intermediate move 21.♖c1 didn't change anything, since he loses material in this case again.

26.♘b5 ♙xc1 27.♙xc1 Obviously, everything is winning now, but Anand decided to finish this great tactical game in the same fashion...

27...♘xd5! 28.exd5 ♖ae8+ 29.♙e3 ♖xf1 0-1

(4) Adams,Mi (2710) – Kramnik,V (2795) [C67]

4th London Chess Classic London ENG (9.1), 10.12.2012

[Chess Evolution]

We are in the last round of the London Chess Classic. Usually, we try to comment exciting games with a lot of interesting ideas, but here comes something else. We'll see a game where both players are trying to make a draw. Let's try to think with them and understand their thoughts!

1.e4 e5 2.♘f3 ♘c6 3.♙b5 ♘f6 Kramnik is playing his usual Berlin.

4.0-0 [4.d3 This is the other move that Adams like to play when he is looking for a fight!]

4...♘xe4 5.♖e1 The safest line for White, which lately got quite a lot of attention because White can't find any advantage in the main lines.

5...♘d6 6.♘xe5 ♙e7 7.♙f1 This is the most critical line, where White is looking to get some advantage time after time.

7...♘xe5 [The other main line is: 7...0-0 8.♘f3 ♘f5 9.d4 d5 and Black is solid as well, but White managed to get a clear plus, for example, in the game Kasimdzhanov-Malakhov from ECC 2012.]

8.♖xe5 0-0 9.♘c3 White is using the fact that Black is not developed and getting his knight to d5, and he'll have at least the option of playing with the bishop pair and a minimal plus. I guess that at this moment Adams was very happy with how things went in the opening, 0 risk to lose and maybe a chance of getting a small pressure. On the other hand, Kramnik, who usually is extremely well

prepared, would not go for a position without very good analyses. So, I guess that both players felt very good!

9...♘f6 10.♖e1 ♜e8 Black is playing very solidly. The idea is to play at 11.♜xe8 ♞xe8! followed by d6 with an about equal position.

11.♞d5 A logical move that allows Black to immediately develop his bishop in a different way.

11...♜xe1 12.♞xe1

12...b6! Strong move. Black's knight can't be removed so easily from d6, so Black needs to find other ways to develop his bishop, and what can be better than to play b6-♞b7?

13.g3 Can White be better here? No way! Black is suddenly much better developed and White needs to try not to be worse. A shock for Adams!

13...♞b7 14.♞g2 If I was Black, I would think about trying to get a small advantage, but how to do it?!

14...c6 Interesting move! [Another choice could have been: 14...♞xd5 15.♞xd5 c6 16.♞f3 ♜e8 trying to win the e-file, but White is in time to hold everything together:

17.♞xe8+ ♜xe8 18.♞f1! and, of course, only White can be better here.]

15.♞e3?! Adams is trying to play as solidly as possible, and is putting himself in a worse position. [Of course 15.♞xf6+ ♜xf6 looks dangerous at first sight, but now White has 16.d4! A very strong move, which Adams would find in a normal situation, but while playing for a draw and trying to avoid any complication, it's not a move that You would see easily... 16...♜e8 (16...♞xd4? 17.♞f4 and White has more than enough for a pawn! The bishop pair plus the horrible bishop on b7 give great compensation!) 17.♞d1 and I guess that only White can be better here.]

15...♞e7 16.d3 ♞f5?! Why does Black want to exchange pieces? It's clear that only Black can fight for a win here. [The most logical 16...♜e8 17.c3 White needs to play c3 anyway, otherwise it won't be possible to develop the bishop from c1. 17...♞a6 18.♞d1 ♜e6 with a small and pleasant plus for Black!]

17.c3! ♞d2 is next, followed by exchanges on the e-file.

17...d5 18.♞d2 The exchanges on the e-file are unstoppable and the draw comes closer.

18...♖xe3 19.♔xe3 ♔xe3 20.♙xe3 Tposition is a complete draw, but the tournament rules said that it was not possible to agree to a draw unless there's a 3-times repetition or a theoretical draw. So, what to do for both players? They need to find a safe and not too dubious way to finally shake hands.

20...♙a6 Fixing a symmetrical structure.

21.d4 ♖e8 22.a4 h6 23.h4 In case of 23.a5, Black can always play b5.

23...♙c8 24.b4 ♙f5 25.a5 b5 Completely closing the position! Now it's impossible to make a mistake anymore... The draw is 100% safe here.

26.♖e1 The exchange on the e-file is going to happen very soon.

26...g5 27.hxg5 hxg5 28.f3 ♙d8 29.♔f2 ♙c7 30.♙d2 ♖xe1 With rooks gone from the board, there is not even a theoretical chance of winning for any side.

31.♙xe1 f6 32.♙d2 ♔g7 33.♙f1 a6 34.♙e2 ♔f7 35.♙e3 ♔g7 36.♙d2 ♔f7 37.♙e3 ♔g7 38.♙d2 ♔f7
And a nice 3-times repetition. What a professional draw played by both players. We can see that they were very happy with the outcome of this game!

Endgame section

(15) Naiditsch,A (2704) – Bischoff,K (2519) [C05]

Bundesliga 2012–13 Baden Baden GER (6), 09.12.2012

[Arkadij Naiditsch]

After a fighting game, I managed to achieve a slightly better endgame which is actually not that pleasant to play for Black, even though it seems to be close to a draw.

38.hxg3 ♖fe8? In a slight time trouble, my opponent clearly chooses a defense that's not the best. [38...♖xf2 To exchange one pair of rooks can't be wrong for Black. 39.♔xf2 White wants to play ♖h1. 39...h6!? One of the Black moves Black that avoids tactical blunders, 40.♖c5 b6 41.♖c6 ♔f7 and now we can see why 39...h6 was a useful move. The pawn on h7 would be simply captured now. 42.♔f3 White still keeps some advantage, but there's very small material left on the board and the strong knight on d5 gives Black excellent drawing chances.]

39.♖c5! I can't lose any time now. White's idea is to provoke Black to play b6 and get a great square on c6 for his rook.

39...♞e3?! Too aggressive move by Black. It was clearly a better choice to stick to a passive defense. [39...b6 40.♖c6 ♖e7 and Black's position is still very solid. In the best case scenario, White will get a rook endgame with a pawn up which would still give Black good drawing chances.]

40.♖e2! This move already gives Black big trouble. [Of course not 40.♖xa5?? ♖d1+ 41.♔h2 ♞g4+ and Black is winning an exchange.]

40...b6 [Maybe there were better fighting chances for Black after 40...♖d1+ 41.♔h2 ♞d5 The Black knight belongs to d5 and nowhere else. 42.♖xa5 ♞c3 43.♖e3 ♞xe4 44.♖xe4 White is a clear pawn up, but in a rook endgame, Black might still have some chances to escape.]

41.♖c7 Suddenly, the game is almost over! Black can't keep his position stable anymore.

41...♖d1+ [In case of 41...♞f5 42.g4 trying to cut the Black knight 42...♖e7 (42...♞g7 43.♖f2 Black is completely

paralyzed.) 43. ♖ec2 ♖xc7 44. ♖xc7 Black is on the edge of losing.]

42. ♔h2 ♘f5 43. ♖b7! Cool and good. White is winning an extra pawn, and with it, the game.

43... ♖e7 44. ♖xb6 Finally Black got rid of the rook from the 7th rank, but lost the b6 pawn. This can't be a good deal...

44... ♘d4 45. ♖f2 ♖e1 46. ♖f4 White wants to give a check on b8 and play ♖g4, mating the Black king.

46... h5 47. ♙d3 The Black knight has no moves from d4! The only way to continue for Black was to play 47... ♖f7, but of course, White's position is completely winning after 48. ♔g2. I was happy to win this game that quickly, because in the beginning of the endgame, I wasn't very sure that I would bring a full point home.

1-0

(16) Adams,M (2710) – Carlsen,M (2848)

London, 06.12.2012

[Chess Evolution]

Obviously, the position is pretty much drawish after almost any „legal“ move. However, we are in the last move of the time trouble, when Adams makes a terrible blunder with only 3 seconds on the clock.

40.e4? [For instance 40. ♘d2 was good enough to secure the draw. 40... ♖e1 41. ♖f1+ (41. ♘f1= is also fine. Black can't make progress.) 41... ♖xf1+ 42. ♘xf1 ♔f6 Black seemingly has some chances here because of the more active king and weak White pawns on g3 and h4. The king is aiming to collect the b3 pawn, but White is in time to consolidate his position. 43. ♘d2 ♔e5 44. ♔f3= 44... ♔d5 45. ♘e4 An excellent place for the knight, from where it protects the g3 pawn and prevents ♔c5. 45... ♔c6 46. ♔e2 ♔b5 47. ♔d3 ♔b4 48. ♔c2 ♔e5 49. h5= followed by g4 with an easy draw.; 40. ♘d4 ♖e4+ 41. ♔f2 ♖e5 42. ♘e2= is also dead drawn.]

40...♔b2+ 41.♔h3 ♕f2! Black obtains a queen endgame with an extra pawn after this double attack on g3 and f3.

42.e5 ♕xf3 43.exd6 How to take the d6 pawn? The following plan is really important and also very much principled!

43...♕h1+! 44.♔g4 ♕d1+ 45.♔h3 ♕xd6! Black avoids creating a b-passed pawn for White, as the general rule in all the queen endgame says that an advanced passed can be much more relevant than the amount of the pawns. If we were in the middlegame, than cxd6 would have been the principled capture to create a healthy pawn chain, however, in this case, the duty of the c-pawn is to stop the b-pawn. [45...cxd6 46.b4]

46.h5? This is the decisive mistake. White should have foreseen that Black's idea is to play c5 followed by ♕d5 with a huge improvement on the current position. [Therefore, the right move was 46.b4! with the idea of playing b5, fixing the pawn on c7. A potential exchange of the b- for the c-pawn could also improve White's chances for survival. 46...c6 (46...♕f6 47.b5 e5 48.♔h2 Black will have a much harder time making progress in comparison to the

game, because the c7 pawn restricts the flexibility of the queen.) 47.b5 cxb5 48.♕xb5 Most probably, Black sooner or later would have transferred to this endgame, where I believe the drawing chances are higher than Black's winning ones. When Black starts to advance his e-pawn, the king will always receive thousands of checks...]

46...c5! Of course, Carlsen immediately makes use of the previous mistake.

47.g4 ♕d4 Now the queen is forced to leave its active place, while the Black one on d4 covers the whole board.

48.♕f1+ ♔e7 49.♕f3 ♕d5 50.♕c3 e5! Black takes everything under control. The winning plan is quite easy: he simply drives his king to b5, plays ♕d4 and soon collects the b3 pawn as well. White doesn't have any counterplay.

51.♔g3 ♕d6 52.♕c4 [52.♔h3 ♕c6 53.♔g3 ♕b5 54.♔h3 ♕d4]

52...♕xc4! Yes, the pawn endgame is winning, but requires exact calculation.

53.bxc4 e4! [Of course not 53...♕c6 54.♔f3 ♕b6 55.♔e4 ♕a5 56.♔xe5 ♕b4 57.♔d5 and White wins.]

54.♔f4 e3! Black gives up his material advantage in order to achieve opposition with the king.

55.♔f3! This was the tricky point of Adams with 52.♚c4, however, it doesn't help. White only wants to take the pawn, so when Black plays ♔e5, then he is the one who gets the opposition and makes an easy draw. [55.♔xe3 is hopeless. 55...♔e5 and the Black king will penetrate on either side of the board. 56.♔d3 (56.♔f3 ♔d4) 56...♔f4]

55...♔e6! The e3 and e5 squares are „poisoned“ for the kings. [55...♔e5 56.♔xe3=]

56.♔e2! ♔f6! The king is going to collect the g4 and h5 pawns, but White also takes the one on c5. The question is who will be the faster one.

57.♔f3 [57.♔xe3 still loses to 57...♔e5]

57...♔g5! 58.♔xe3 ♔xg4 59.♔e4 ♔xh5 60.♔d5 g5! Black must push his g-pawn as it promotes with check after ♔xc5.

61.♔xc5 g4 62.♔d4 White wins an important tempo by being in the square of the g-pawn and is ready to promote his own pawn. However, Black wins with a known motif...

62...g3 63.♔e3 ♔g4! [White resigned in view of 63...♔g4 64.c5 ♔h3! 65.c6 g2 and would also arrive with check to c8, but Black is faster. 66.♔f2 ♔h2 Black had to foresee this position before trading the queens on c4. A perfect 15 moves of calculation.]

0-1

Clash of the Titans

(17) Botvinnik, Mikhail — Ragozin, Viacheslav [E40]

Chigorin Memorial Moscow, 1947

[Csaba Balogh]

Botvinnik obtained an advantaged right from the opening and converted it convincingly.

1.d4 ♘f6 2.c4 e6 3.♘c3 ♙b4 4.e3 ♔e7? It's not easy at all to find the point of this move. Black has plenty of interesting setups against the 4.e3 Nimzowitch, but this is definitely not one of them. Black should fight for the center with c5 or d5.

5.♘ge2! This is one of the main ideas of the 4.e3 system. White wants to get the bishop pair by playing a3 and he does not wish to weaken his pawn structure. Here is another drawback of the 4...♔e7 move: Black cannot retreat his bishop to e7 after a3.

5...b6 6.a3 ♙xc3+ 7.♘xc3 Black has no compensation for the two bishops.

7...♙b7

8.d5!? A known move in many openings. White tries to occupy the center and obtain a huge space advantage. If he succeeds to consolidate it by castling kingside and playing e4, he achieved everything he can out of the opening. The critical test of this move is always the undermining d5 move... [8.♙d3 was more calm, followed by 0–0. To take on g2 is not a good deal for Black as he loses g7 and it will be more sensible than the one on g2.]

8...d6 Black simply finishes the development, but this allows the consolidation. [8...exd5 9.cxd5 c6! should have been definitely played, when White must be careful to get some advantage 10.b4! A very difficult move to find a positional pawn sacrifice... Let's first check the alternatives. (10.d6 looks tempting to lock the queenside pieces, but its drawback is that this pawn becomes too weak. 10...♔e6 and White has no good way to prevent the 0–0 and ♘e8 threats... 11.♙e2 0–0 12.0–0 ♘e8!; 10.♙c4 is possible, but it runs into 10...0–0 11.0–0 ♔c5! and Black wins the pawn.; 10.dxc6 is the move that White should avoid. 10...dxc6 The center has disappeared. Black plays 0–0, followed by c5, when the bishop is alive, while the one on c1 is suddenly poorly placed.) 10...cxd5 (We must always consider 10...a5 in case of b4, undermining the pawn, but now the Black queenside becomes vulnerable. 11.bxa5! ♔xa5 12.♔b3!) 11.♙b2 followed by ♙e2, 0–0 and ♙f3. Black can't hold his extra pawn for long.]

9.♙e2 ♘bd7 10.0–0 0–0 [10...exd5 was the last moment for Black if he wants to prevent e4, but it has serious drawbacks as well. 11.cxd5 The b7 bishop is dead and the only way to activate it is 11...c6 12.dxc6 ♙xc6 13.b3 White gets a nice advantage with the bishop pair and the isolated d-pawn.]

11.e4! exd5 12.exd5 White has managed to consolidate. The power of the space advantage starts to tell soon. The only way to reduce it would be c6, but it increases the power of the bishop pair as the position opens up.

12...♖fe8 [12...♘e4 is a logical move. Black would like to get rid of some pieces, which would improve the movements of his pieces. The principle says that the one who has a space disadvantage should always aim to ease his position by trading pieces, while the attacking side should keep the pieces on the board. Knowing this, the right answer is logical: 13.♘b5! a6 14.♘d4 White will push back the e4 knight with f3 and continue enjoying all the advantages he had before.]

13.♗e3! The bishop is heading to d4, where it will rule the position. Black really misses the dark squared bishop on g7 to neutralize it.

13...a6 To prevent the ♘b5 ideas.

14.♖c2 It's time to bring the rook into the game.

14...♘e5 Ragozin tries to play actively, but without the support of the center, his pieces will be pushed back

soon with f4... [14...♘f8 15.♖ae1 ♘g6 is not better either. 16.♗d4 ♘f4

17.♖c1!! A fantastic move. After trading on e2, the queen will jump out to f4 or g5, but the question is, why not ♖d2? (The problem was that the careless 17.♖d2 is met with 17...N6xd5! 18.cxd5 ♖g5! and suddenly Black is winning, because of the double threat on g2 and ♘h3. It's so easy to spoil a good game.) 17...♘xe2+ 18.♖xe2 ♖d8 19.♖xe8+ ♘xe8 20.♖e1 with a clear advantage, mainly because of the difference between the two bishops.]

15.♖ae1! This is more logical than the other rook on e1. The f1 rook might have an important role after the squeeze on the kingside begins.

15...♗c8 Black tries to improve his bishop. Actually, this is quite understandable. [The other option to improve the bishop 15...c6 doesn't work well. 16.♗xb6 cxd5 17.f4! White is better prepared for the opening of the position. 17...♘ed7 18.♗f2 with a clear advantage. 18...dxc4 drops a piece 19.♗f3]

16.♗d4 Finally, the bishop has reached its final destination.

16...♔d7 17.f4! ♘g6

18.g4!? Botvinnik gains space on the kingside as well, but on the other hand, Black gets some counterplay against the weakened pawn structure. [The calm 18.♔d2 was probably better, leaving Black without counterplay. After protecting the e1 rook, the e2 bishop is ready to leave the pin. 18...♔d8 19.♕d3 ± with a huge advantage and long-term pressure.]

18...♔d8? Black was aiming for activity as compensation, but sometimes it's more advisable to stay passively... [18...♔h8! was possible, freeing the g8 square for the knight. 19.♔d2 ♘g8 and the queen goes to h4. Playing g5 would give up the light squares... White is better, but it's not as easy as it could be with 18.♔d2, for example.]

19.g5 ♘g4 20.♔d2! Covering the e3 square and the g4 knight has no way back. The simple threat is h3! Black is in trouble...

20...h6

21.f5! This is the precise way to take the piece. [After 21.h3 Black gets some compensation by playing 21...hxg5 22.♕xg4 ♖xe1 23.♖xe1 gxf4 Objectively, it's not enough, but the text is just much better.]

21...♘6e5 22.h3 A piece for nothing. The game is practically over.

22...♘f6 23.gxf6 ♔xf6 24.♔f4 ♖e7 25.♔h1 Threatening with ♘e4. [25.♘e4 immediately allows 25...♘f3+ and of course White is winning, but it's better to avoid this.]

25...c5 26.♕g1 [26.♘e4 ♔xf5 is also winning for White, but again, it's better to avoid.]

26...g6 27.fxg6 ♔xf4 28.♖xf4 fxg6 29.♖f6 ♕f5 30.♖xd6 ♘xc4 31.♖e6 Elegant move, but it was not necessary. [31.♖c6 is a full piece up.]

31...♖xe6 [31...♕xe6 32.♕xc4 +- was the point of ♖e6.]

32.dxe6 ♕xe6 33.♕f3 [Black resigned, but probably in the last 10 moves he improved his position a lot. Still, of course, it's completely lost... 33.♕f3 ♖f8 (33...♖e8? is easier 34.♖xe6! ♖xe6 35.♕d5 +-) 34.♕b7 +-]

Editorial Preface

The main attention during the last week was clearly focused on the Mind Games, for women and men. We saw the best players of the World playing rapid, blitz and blindfold chess.

In the rapid women's section, the winners were:

Lahno/Hou Yifan/ Koneru.

In the rapid men's section, the winners were:

Fressinet/Nakamura/Grischuk

I guess the biggest surprise until now is the very strong play shown by Laurent Fressinet.

In the blitz women's section:

Kosteniuk/Muzychuk/Paehtz.

In the blitz men's section:

Karjakin/Nakamura/Mamedyarov

These results were more or less expected.

In the blindfold women's section:

Hou Yifan/Cmility/Zatonskih.

In the blindfold men's section:

Aronian/Nakamura/Mamedyarov

No big surprises here either.

As we can see, Nakamura managed to take the 2nd place in all three tournaments, which is clearly a great result, but somehow it feels slightly wrong to get so close to the gold medal and not reach it.

In the current issue, we focus our attention on commenting games from the Mind Games in China!

As usual, we wish You a lot of fun with a new edition of CEWN, the 43rd!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) **Morozevich, Alexander (2748)**
 — **Jobava, Baadur (2711) [E70]**

SportAccord Rapid Men 2012 Beijing CHN (6.4), 15.12.2012

[Arkadij Naiditsch]

We'll see quite a crazy game now. Both players are well known for their creative play and for not being afraid of taking risks.

1.d4 By the way, Jobava started all his games with 1.b3. And this not only in rapid chess, but also in his previous tournament in classical, where he showed quite good results. The moment we see Magnus Carlsen playing 1.b3, it's time to switch!

1...♘f6 2.c4 g6 3.♘c3 ♕g7 4.e4 0-0 We are in the KID. Jobava likes to put his bishop on g7 very much. His main opening is the Benoni.

5.♖e3 5.e5 doesn't bring White anything because Black would play ♘e8, followed by d6 and c5, with an attack against White's center.

5...c6 A very rarely played move and, of course, a huge provocation for White to play e5.

6.f3 Morozevich keeps cool and prepares the standard idea with ♔d2, 0-0-0 and h4. Of course, 6.e5!? ♘e8 7. f4 is definitely an option for White.

6...a6?! And this is clearly already too much... Black should have played 6...d6 and go back to the normal lines.

7.♔d2 White continues playing for the main idea.

7...b5 8.e5 Finally the e5 move, but was it needed!? I don't think so, White could have continued with moves like 8.h4.

8...♘e8 9.♖h6 By exchanging the bishop on g7, Black's future d6 is not going to be so strong and will weaken the Black king at the same time.

9...d6!? Black is starting to play against the center and even if Black's position looks bad, things are very far from being clear.

10.♖xg7 ♘xg7 11.0-0-0?! This move is slightly difficult to understand. Did Morozevich want to exchange queens? What happens after...

11...♘d7?! [11...dxe5! It's hard to find another move for White. 12.dxe5 ♔xd2+ 13.♔xd2 ♘d7 and if someone is better here, then it is Black!]

12.g4!? White is taking control of the f5-square, in order to have the ♔h6-♘e5-♘g5 idea in the pocket.

12...♔b7 [Here, it was also a better option for Black to take first on e5. 12...dxe5]

13.h4

13...dxe5 14.h5 And White is starting his mating attack!

14...exd4 Black doesn't have any more easy decisions. [14...gxh5 could have been the alternative, but here we can clearly see that things around the Black king are getting darker. 15.♘e4 with a strong attack.]

15.hxg6 dxc3 If You start taking, You should not hold back.

16.♔h6 [Of course, in case of 16.gxh7+? ♔h8 17.♔xd7 winning the piece back 17...cxb2+ 18.♔xb2 ♘e6 only Black can be better.]

16...fxg6 17.♔xh7+ ♔f7 18.♔h6 White is attacking with all his pieces! He intends to play 18. ♘h3 as well.

18...cxb2+ 19.♔xb2 ♔g8 [Another defensive option was 19...♔h8 20.♔xg6+ ♔g8 At least, Black is exchanging on of White's rooks. 21.♔xh8+ ♔xh8 22.♘h3! White's idea to play ♘g5 gives him more than enough compensation. I would not like to be Black here...]

20.♘h3! White doesn't hurry to take on g6 and brings one more piece into the attack!

20...♘f8 Entering a forced line. Probably, this is Black's best chance even if it looks like his king should get mated somehow.

21.♘g5+ ♔f6 22.♔xg8 ♔xd1 How to mate the Black king now?!

23.♘e4+! Very strong move. White is defending from a perpetual check with ♔d2 next, and at the same time, simply winning the knight on g7. Silent but very strong.

23...♔e5 24.♔xg7+ ♔f4 25.♔f7+ ♔e3 Once again, White doesn't have a forced win and Morozevich finds the best way to play.

26.♔xe7! Defending from 26...♔xf1 27.♘g3, winning a queen. At the same time, White wants to play 27.♘c3 and this already could be a mate, or at least a way to get some extra material.

26...♔d8 27.♔b4 ♔d4+ 28.♔c2 Mates are threatened from all sides...

28...♔xf3 29.♙d3 A perfect move if You don't want to calculate unnecessary lines. [Immediately winning was 29.♖a3+ ♔xe4 30.♖g3! and the Black king will get mated after White's ♙g2.]

29...♘e6 30.♖e1 With at least 10 mating threats! What a nice game by White! We should learn from this game that provocations usually lead to nothing good...

1-0

(2) Giri,Anish (2720)

– Morozevich,Alexander (2748) [E04]

SportAccord Rapid Men 2012 Beijing CHN (2), 14.12.2012

[Csaba Balogh]

Morozevich has chosen a risky opening to confuse his opponent in this rapid game, but Giri punished him in great style.

1.d4 ♘f6 2.c4 e6 3.♘f3 d5 4.g3 dxc4 5.♙g2

5...b5 A rare sideline against the Catalan. Black would like to preserve his extra pawn, but of course, this gives huge compensation for White in the center.

6.a4! The most logical reaction in such situations. The goal is to lure the c-pawn out of the center in order to use the ♘e5, e4 and d5 ideas more effectively.

6...c6 7.♘e5! ♘d5 Black had to move into the e4 tempo if he wanted to save his pawn. On the other hand, the e4 move closes the diagonal of the bishop.

8.0-0 a6 [8...♙b7 is more logical, with the idea of protecting the c6 pawn and to play ♘d7. However, White

can and should transpose to the game with 9.axb5 cxb5 10.b3! cxb3 11.♔xb3 a6 and we are back in the game.]

9.axb5! [In this kind of positions 9.e4 ♘f6 10.d5!? is another typical motif, trying to make use of the undeveloped Black pieces, but after 10...♔c7! Black seems to be able to consolidate his position. (10...cxd5 11.exd5 exd5 would be met with 12.axb5 and ♘xc4 threatens to get an advantage.) 11.♕f4 (11.♘xc6 is not advisable. 11...♘xc6 12.dxc6 b4! Since the c4 pawn is not hanging anymore, Black could lock the queenside. The c6 pawn is lost and Black has a good position. 13.e5 ♘d5 14.♕xd5 exd5 15.♔xd5 ♕e6! followed by ♖c8.) 11...♕d6 with an unclear position.]

9...cxb5

10.b3! Very well played! White undermines the queenside and forces Black to develop his queen with a loss of tempo. All the tempi wasted by Black in the opening allow White to generate more than enough compensation with some energetic play.

10...cxb3 11.♔xb3 ♕b7 12.e4! ♘f6

13.d5! White has no time to waste. If Black consolidates with ♕e7, 0-0 and ♘bd7, he ends up with a clear extra pawn. The position had to be opened against the e8 king.

13...♕d6 [13...exd5 14.exd5 ♕xd5 taking another pawn. This a way too brave decision. (14...♕d6 allows the unpleasant 15.♘c6 and ♖e1 next.) 15.♔e3! Black has problems in all the lines. 15...♕e7 (15...♔e7 16.♕xd5 ♘xd5 17.♔e4±; 15...♕xg2 16.♘c6+ +-) 16.♖d1±]

14.♘xf7!! The sacrifice is based on an exact calculation and strong intuitions.

14...♔xf7 15.dxe6+ ♔e8 16.e5! This was the point! Of course, after the decision of sacrificing on f7, there is no way back. White must play the most aggressive moves and hope that the attack breaks through.

16...♕xg2 [16...♕xe5 is refuted by 17.♕xb7 ♖a7 18.♕xa6!! and the b5 pawn falls. 18...♕xa1 19.♕xb5+ ♔e7 20.♕a3+±]

17.exf6! ♔xf6 [17...♕xf1? loses to 18.fxg7 ♖g8 19.e7! and the g8 falls, as on 19...♔xe7 20.♕g5+ +- wins the queen.]

18. ♖xg2! Of course, the a1 rook had to be sacrificed. This gives further tempi for White to lead his attack, but on the other hand, he has to play precisely as he's already a full rook down.

18... ♕xa1 19. ♘b2! ♖a4 20. ♕f3 [The double attack with 20. ♕d5!? also looked tempting, but Black is able to give back the material advantage and trade off the queens by 20... ♕c4! 21. ♕xa8 ♕c6+ 22. ♕xc6+ ♘xc6 Black has decent chances of surviving.]

20... ♖a7? [20... ♕c2 with the idea of trading queens on c6. This was the only move according to the computer. The difference with the 20. ♕d5 line is that White can keep the queens. 21. ♕f7+ ♖d8 22. ♘xg7 ♕c6+ 23. ♖g1 ♕e8 24. ♖d1! with a huge attack. In a practical game, Black is basically in a hopeless position, but of course, the machines continue resisting.]

21. ♖c1! Another cool move, despite being a rook down. White activates his rook and Black is hopeless against the threats.

21... ♖d8 [21... ♖c7 doesn't save the day... 22. ♖xc7 ♘xc7 23. ♘xg7 and the rook is lost, given that after 23... ♖g8, 24. ♕f7 wins.]

22. ♘f6+! Finishing the game in style!

22... ♘e7 [22... gxf6 leads to a forced mate. 23. ♕xf6+ ♖e7 24. ♕xh8+ ♖e8 25. ♕f6+ ♖e7 26. ♕f8+ ♖e8 27. ♕xd6+ +-]

23. ♕d5+ ♘d7 [23... ♖d7 24. exd7 +- and ♖c8.]

24. ♘d4 The most unpleasant move, creating the threat of ♘b6, and on ♖e8, ♖c8. [24. exd7 +- was also good enough.]

24... ♖c7 25. ♕a8+ Black resigned! A brilliant crush by Giri!

1-0

(3) Jobava,Baadur (2711) – Mamedyarov,Shakhriyar (2764) [A01]

SportAccord Rapid Men 2012 Beijing CHN (2), 14.12.2012
[Csaba Balogh]

The highly talented Georgian Super GM, Baadur Jobava, has been using a new weapon recently.

1.b3 He wants to avoid the long theoretical lines and wants to play pure chess, where, as we'll see, he is very strong.

1...♞f6 2.♙b2 g6 3.♙xf6!? White creates doubled pawns, but on the other hand, gives up the bishop pair.

3...exf6

4.c4! It's time to fight for the important central squares, before Black occupies them with d5 and takes over the initiative.

4...♙g7 [It would have made sense to open the position with 4...d5!? in order to make the two bishops more effective. 5.cxd5 ♜xd5 6.♞c3 ♜d8 followed by f5 and ♙g7.]

5.♞c3 f5 6.♜c1 White wants to keep his structure and prevent ♙xc3.

6...0-0 7.g3 ♜e8 [The most logical development of Black's pieces would have been 7...d6 8.♙g2 c6 9.e3 The g1 knight should go to f4. 9...♞d7 10.♞ge2 White probably has some edge. A possible plan could be b4-b5 to strengthen the power of the g2 bishop.]

8.♙g2 f4?! Mamedyarov wants to open the position. Black wins back the pawn based on tactical ideas, but it has a huge drawback...

9.gxf4 ♚h4

10.♙f1!! A great move, which forces Black to give up his strong g7 bishop, as otherwise, White protects his pawn with e3. The immediate e3 doesn't do the job because of the pin along the e-file. [10.f5 ♜g5 Black wins back the pawn and keeps his healthy pawn structure.; 10.♞d5 ♞a6 11.♞f3 ♜g4 and c6 next. Black wins back the pawn.]

10...♙xc3 [10...♜xf4 loses a huge amount of material. 11.♞d5! ♜d6 12.c5! c7 and one of the rooks fall because after 12...♜c6 13.♞e7+ +- wins.]

11.♜xc3 ♜xf4

12.h4! Without the dark-squared bishop, the Black king becomes vulnerable. The c1 rook has a perfect place as it could be immediately switched to the attack along the 3rd rank.

12...d6 [12...h5 is met with 13.♘h3! ♔xh4 14.♖g3 and ♘g5 next, with a huge attack.]

13.h5 Without touching the h1 rook, it's already perfectly placed and cooperates in the attack.

13...♘c6 14.♘h3 [14.hxg6 hxg6 15.♖g3 also made sense, followed by bringing the knight to the attack.]

14...♔d4 15.e3 I am not sure if this was the strongest continuation as it closes the c3 rook, but in the game, it worked out well. Jobava estimated that to bring the knight to f4 is more important and the rook could be activated again later. [15.hxg6 hxg6 16.♘g5 looked pretty dangerous as well. Black's kingside is too shaky. ♕d5 and ♖f3 could be unpleasant, but the simple ♖g3 is also quite nice.]

15...♔f6 16.♘f4 ♘e7 17.♔f3 White threatens to win a pawn with ♘xg6, as after ♔xf3, Black has an important intermediate check with ♘xe7.

17...♔g5? [17...g5 Black should have lived with the chance of trading the queens, as the attack was growing with a lot of speed. 18.♘d5 ♔xf3 19.♕xf3 ♘xd5 20.cxd5 Obviously, White is doing better here as well, but it's still preferable than getting mated. The c7 pawn becomes really weak. 20...♖e7 21.♔g2 ♕f5 22.♖hc1 ♖c8 23.d3! to prevent g4 and ♕e4 check, followed by b4-b5. a7 could be a potential target as well. However, Black can hope for survival after playing h6 and driving his king to d8.]

18.♕h3 The c8 bishop had to be exchanged in order to occupy the h-file.

18...c6 19.hxg6 hxg6 20.♕xc8 ♖axc8 It's time to launch the decisive attack.

21.♘h5! Provoking another huge weakness with the threat of ♘f6.

21...f5 [21...gxh5 drops the queen. 22.♖g1 +-]

22.♖d3! Another great move. The rook joins the battle again!

22...♔f7 Black is ready to take on h5 now... [22...♖cd8 is refuted by 23.♖g1 ♔h4 24.♖d4! This is the main point of 22.♖d3. The queen must allow the ♘f6 winning move.]

23.♖f4 with the double threat of ♖h7 and ♖xd6. Black is lost.

23...♖cd8 **24.**♖h7+ ♔f6 **25.**♔d1!! A beautiful finish in a great game. Black has no good defense against the threatened ♔a1 mate! [The game could have been slightly prolonged with 25.♔d1 ♘g8 26.♔a1+ ♖e5 White has several wins here 27.♔d4 and ♔xd6 cannot be parried, because even after (27.♘h3 and f4 is the easiest.) 27...♔g4 28.♔xd6+! works. 28...♖xd6 29.♖xd6+ ♔g5 30.♖xg6#]

1-0

(4) Jobava,Baadur (2711) – Giri,Anish (2720) [A01]

SportAccord Rapid Men 2012 Beijing CHN (5.6), 15.12.2012
[Arkadij Naiditsch]

The nice thing about Jobava is that you never know how his games will be. He can lose in 15 moves or beat almost anybody the same way. Lately he found his passion, 1.b3!

1.b3 b6 It's funny to see 1.b3-b6 in a game between 2 players of more than 2700 ELO.

2. ♖b2 ♖b7 3.e3 White is trying to keep the pawn structure as flexible as possible. The usual moves could be d4-c4 and ♘f3, going back to the normal lines

3...e6 Black keeps repeating moves.

4. ♘c3!? Wow, what a move! To me, this move looks really shocking. Why to put the knight on c3 before playing c4? From a positional point of view, it's a big mistake, but Jobava has an extraordinary plan.

4...c5 A normal move, but maybe the immediate 4...♘f6 followed by ♖e7, 0-0 and simply d5 would have been a better choice. To me, Black's position looks totally fine.

5. ♘ge2 Another shocking move! I guess that of late, it was hard for Giri to focus on the game. Is White a 2700 player?

5...♘f6 6.d4 The funny thing is that probably White is still doing more or less OK. Nothing major has happened, just the knights on c3 and e2 are standing badly.

6... ♖e7 7. ♔d2 0-0 8.0-0-0 Until here, Black's play looked very logical.

8...♞c6?! What a bad decision by Giri! [The simple 8...d5 would give Black great play. The center is under control and White's pieces are badly placed. That's all we wish from the opening.]

9.d5! And the punishment comes immediately. Suddenly, all the White pieces are back in the game, even the bishop from b2 is open and the knight from e2 will have the option of going to d5.

9...exd5 10.♞xd5 The d5 square is in White's control... this is very important.

10...♞xd5 11.♞xd5 ♞f6 Black is trying to exchange the dark-squared bishop, which is certainly a good idea. At the same time, he's defending the pawn on d7 sideways.

12.♞c3!? Once again, we see a very original play by White, and actually this move makes total sense now. White is avoiding the exchange of the dark-squared bishops, and at the same time, bringing the knight closer to d5. The bishop from f1 will be finally developed as well. [Of course not 12.♞xd7? ♞xb2+ 13.♞xb2 ♞f6+! Typical and easy to see. 14.♞c3 ♞ad8 and Black is clearly better.]

12...♞b8 Probably the best way to defend the d7 pawn indirectly.

13.♞f5! Suddenly, White wants to mate Black with ♞d3. [Being greedy would not be the best choice, again. 13.♞xd7 ♞b4! Black wants to take on c3 and a2. 14.♞b1 ♞d8 and we can see that the Black pieces are very active.]

13...♞d8? What a mistake by Giri! [A better move would have been 13...♞e7 14.♞xd7 ♞c6 Black is a pawn down but has some initiative. 15.♞g4 b5 and the position is far from clear. White's extra pawn is probably giving him some advantage, however.]

14.♞d3! Suddenly, Black is just lost! The pawn on h7 can't be protected!

14...♞f8 What to do?

15.♞xh7 d5 Defending from ♞d5.

16.♞b1! If we don't look at the opening, Jobava is playing great chess! This is a very nice prophylactic move that we can often see in sharp Sicilians. The idea is simple, before starting the final action, White is putting his king in a better position.

16...♘e5 17.♙a6!? Very creative play by Jobava until the end of the game. White had a lot of good moves, but this one is really pretty.

17...♙xa6 If Black doesn't take, the position is simply winning.

18.♘xd5 Now ♔h8 is mate!

18...♖xd5 [It doesn't help to play 18...♘g6 19.♘xf6 gxf6 20.♙xf6 and White is simply winning.]

19.♖xd5 ♘g6 The h8 square is covered, but it's not enough to survive here.

20.♙xf6 gxf6

21.h4! Jobava shows great technique once again. White will play h5 next and threaten ♔h8. The h-pawn could become dangerous in the future as well.

21...♔e8 22.h5 ♘e5 23.f4 Pushing the knight away from a great square on e5.

23...♘g4 24.♖hd1 White is bringing the last piece into the attack. By the way, now we can see how useful the move ♔b1 was — there's no ♔xe3 check.

24...♙b5 25.h6 Slowly but surely, Black's end is coming closer.

25...♘f2 26.♖d8! And the last little combo.

26...♘xd1 [In case of 26...♖xd8 27.♖xd8 ♔xd8 28.♔h8+ ♔e7 29.♔xd8+ ♔xd8 30.h7 the h-pawn will give White a new queen!]

27.♖xa8 All in all, Giri made it a bit easy for White, but it was a great crushing game by Jobava anyway!

1-0

Endgame section

(15) Nakamura,H (2786) – Kamsky,G (2755)

SportAccord Rapid Men, 14.12.2012

[Chess Evolution]

The position is obviously drawn, but the g- and f-pawns could be very tricky against the h-pawn. If Black is not familiar with an important defensive idea, he can easily lose the game. I'm quite sure that Kamsky would have managed to hold this with a slower time control, but in rapid, even he can fail.

55. ♖e2 White rescues his king from the 1st rank, as Black can't trade the rooks.

55... ♜a3 56. ♔g2 ♜a4 57. ♜b2 ♜a3 It's a good strategy to keep the rook on the 3rd rank in order to prevent ♔h3 by attacking the f-pawn constantly. White is forced to push f4 sooner or later, in order to make progress.

58. ♜b6+ ♔g7 59. ♜e6 ♜a1 60. ♔f2 ♜a3 61. ♜e1 ♔g6 62. ♔g2 ♔g5?! This is an inaccuracy. [62... ♜b3 It was stronger to wait.]

63. ♜b1 [63. ♜e6!? could have won the h-pawn. White threatens with f4 ♔f5 ♜h6 ♔g4 ♜g6 ♔f5 ♜g5 and ♜xh5 next. There is only one way to hold the draw: 63... ♔f5 64. ♜h6 ♔g5 65. ♜b6 ♔f5]

66.f4! and now **66...h4!** Black must sacrifice his pawn in order to create f- and h-pawns for White. (66... ♜a1 loses to **67. ♜h6! ♔g4 68. ♜g6+ ♔f5 69. ♜g5+ +- with connected passed pawns. White is completely winning, of course.) 67. ♜b5+ ♔g6 (But not 67... ♔e4! because of 68. ♜e5+! +- and gxh4 next. The king is cut along the e-file.) 68.gxh4 and the position is a theoretical draw. We have analyzed this a few CEWNs before in the Anand-McShane game.]**

63... ♔g6 64.f4 Here we are! White has pushed f4 and is ready to play ♔h3-h4. How to defend against it? Black must find a difficult plan to hold.

64...♖a2+? White is winning now. [64...♖a7!! ♖a8, with the same idea, was also good. 65.♔h3 ♜g7!! 66.♔h4 ♔h6! This is the known theoretical drawn position. White can't touch the h-pawn because g3 also falls. Black wants to send the king away with ♜g4. White can't make progress here. 67.♜b6+ ♔h7 68.♜b5 ♜g4+! 69.♔h3 ♔h6=]

65.♔h3 The game is over now.

65...♜f2 [65...♜a6 protecting the 6th rank against ♔h4, and ♜b6 check doesn't help. 66.♔h4 ♜c6 67.♜b5 +–; 65...♜a7 It's too late to get the right defensive setup. 66.♔h4 ♜g7 67.♜b5 +–; 65...♜a5 66.♔h4 ♜c5 67.♜b6+ ♔g7 68.♜e6! +– followed by ♜e5, and White wins the pawn and the game.]

66.♜b6+ ♔g7 67.♔h4 ♜h2+ 68.♔g5 White is ready to advance his f-pawn.

68...♜h3 69.♜b3 ♜h1 [Black can't trade pawns by playing 69...h4 because of 70.♜b7+ ♔f8 71.g4! This is much simpler than creating the f- and h-pawns, although with the Black king squeezed on the 8th rank, it's also a theoretical win. 71...♜h1 72.f5 h3 73.♔f6 +–]

70.f5 Black resigned.

1–0

(16) Giri,Anish (2720) – Leko,Peter (2732) [C88]

SportAccord Blitz Men 2012 Beijing CHN (8.4), 16.12.2012

[Chess Evolution]

In a blitz game from the Mind Games, this funny position appeared. It looks like a draw, but Black still has some winning chances. In case of a queen vs knight+bishop endgame, the only theoretical draw would be to put the king on b1, the bishop on b2 and the knight on d4 — this is a fortress.

57.♘f3 ♔f5 Black is moving his King forward. This is his only chance. Black's idea is to bring his king to e2 and start to play for a zugzwang, or to attack White's g2-pawn.

58.♘h4+?! White keeps waiting and giving the Black king the chance to come very close. [58.h4! would have been the right move, fixing Black's pawn structure. 58...♔e4 59.♘d2+ ♔d3 60.♘f3 and only now the waiting moves should give White an easy draw. 60...♜a5 61.♔h2 ♔e2 62.♔g1 ♜a1+ 63.♔h2 ♔f1 64.♘d2+ ♔e2 65.♘f3 and it seems like Black can't improve his position.]

58...♔e4 59.♘f3 ♔d3?! Giving White a chance to play h4. [59...g5! Now Black will get an extra idea: to bring the

king to e2, then to play ♔d7-g4 and march with his h-pawn to h3. The position should still be a draw, but Black has some practical chances.]

60. ♔h2 [60.h4]

60... ♔e2

61. ♔g3? This is probably already a losing move! The White king's place should be on g1!

61... ♔d6+! This move is simply winning a pawn. The White king can't go back and White is forced to move the bishop from e3.

62. ♗f4 [62. ♔h4 ♔g6 wins on the spot as well.]

62... ♔g6+ 63. ♔h2 ♔xf2 White lost not only a full pawn, but also a stable position for his bishop on e3.

64. ♘h4 ♔f6 65. ♗g3+ ♔f1 Black is already fixing his next target, the g2 pawn.

66. ♘f3 ♔b2 67. ♘e1 The only way for White to defend on g2.

67... ♔e2 The position looks like a zugzwang. No White pieces can move, and Black wants to play g5-h5-h4.

68. h4 h5! Good move. Black wants to play ♔g4 and h4. White is hopeless, he can't do anything.

69. ♔h3 g5 The last hit.

70. hxg5 ♔g4+ 71. ♔h2 h4 And White has lost his piece. As we can see, by playing without a plan White went astray. In such endgames, it's very important to have a clear defensive plan...

0-1

Clash of the Titans

(17) Tal, Mihail (2635)
— Paehtz, Thomas Sr (2480) [B39]

Halle DSV Halle, 1974

[Csaba Balogh]

After analyzing two crushing victories in the games section, I decided to put another crush in the „Titan section” as well. I thought the best solution for such kind of tasks is a game by Mikhail Tal.

1.e4 c5 2.♘f3 ♘c6 3.d4 cxd4 4.♘xd4 g6 5.c4 The Maroczy Bind. This is generally considered to be a very solid opening for Black, where he must suffer in a slightly worse position with a space disadvantage.

5...♙g7 6.♙e3 ♘f6 7.♘c3

7...♘g4 Theory rightly considers this move to be an inaccuracy. [The main lines start with 7...d6 8.♙e2]

8.♙xg4 ♘xd4 9.♙d1! A good reaction, to send away the annoying knight from d4, and at the same time, White prevented the threatened d5 break and ♘c2 check.

9...e5

10.♘b5! A great idea, to get rid of the d4 knight. White uses the fact that by creating doubled pawns, his advantage increases. We'll take a closer look in the ♘xb5 line.

10...0-0 Black uses the fact that taking on d4 is not a threat yet. [10...♘xb5 11.cxb5 0-0 12.♙c4 White got this nice square for his bishop by playing cxb5. He is intending to finish the development with 0-0, ♙d2 and ♖fd1, creating huge pressure on the d6 pawn. The e3 bishop is also excellently placed, restricting Black's mobility because of the a7 pawn. If Black wants to solve this problem, he must play b6, but it gives White another strong idea, to play a4-a5 destroying Black's queenside. In addition we must say that the g7 bishop is really poorly placed and there is no chance to improve it.]

11.♙d2! White already wants to collect the pawn with ♘d4. [11.♘xd4 exd4 12.♙xd4 ♙a5+ White loses the right to castle.]

11...♔e7 Black tries to hold his knight by counter-attacking the e4 pawn. [11...♔h4 is the other main move, but it leads to similar bad positions after 12.♙d3 ♘xb5 13.cxb5+ =]

12.♙e2! The strongest reaction! White is not afraid of losing the bishop pair as Black will still be stuck with his bad structure and poor g7 bishop. [12.0-0-0 is the most common move, but it leads to the triumph of Black's opening play. 12...♘xb5 13.cxb5

13...d5!! Suddenly, Black is jumping out from his passive position. 14.exd5 (14.♙xd5? ♙e6 15.♙d6 is a nice way to lose the game. 15...♖ac8+ 16.♙b1 ♖fd8! wins.) 14...♖d8! and Black has decent compensation. His main ideas are ♙f5 and ♙e6.(On the immediate 14...♙f5 White has 15.♙d3)]

12...b6? Black still indirectly tries to defend his knight, but Tal already refutes this idea tactically. [12...♘xb5 13.cxb5 is the usual bad structure, but at least the bishop can't get to c4. Still, White is clearly doing better. 13...d6 14.0-0 ♙e6 15.a4!? and a5 next.; 12...♘xe2 13.♙xe2± Black has too many holes in his position. The best could be to re-

move his pawn to e6, but unfortunately for him, this is illegal.]

13.♘xd4! exd4 14.♙xd4 ♔xe4 15.♙xg7 ♔xg2 an important tempo because of the ♙f3 threat. 16...♖b8 and White gets a huge advantage after, for instance 17.♖fe1 ♙b7 18.♙f1 ♔c6 19.♖e7± Black can't hold his d7 pawn for long. 19...d5 is met with capturing everything, and the a7 is hanging at the end. Still, this would have been much better than the game.]

16.♖d4!! This double rook sacrifice probably came as a thunder from the clear blue sky for Black. The first one has to be accepted, otherwise he is just a piece down.

16...♖xh1+ 17.♙d2 ♖xh2 [17...♖xa1 is refuted by 18.♖f6!! +- This was the whole point! Black is helpless against the ♙h6 threat.(18.♙h6 was not that easy, because of 18...f6!); 17...♖c6 to prevent the ♖f6 idea leads to a lost position as well. 18.♙xf8 ♙xf8 19.♖e1! the threat is ♖h8 and ♙f3, against which Black has no good defense. For instance 19...♙g8 loses to 20.♙f3 +- and ♖e8 next.]

18.♙xf8 ♙xf8 19.♙f3! At the moment, Black is too pawns up, but his pieces are totally uncoordinated and

the threats against the king with ♖e1 and ♔h8 are decisive.

19...d5 Trying to take the bishop out, but it doesn't help.

20. ♗xd5 ♖b8 21. ♖e1! ♗e6 22. ♖xe6! [A nice crush! Black resigned in view of 22. ♖xe6 fxe6 23. ♔f6+ ♔g8 (23... ♔e8 24. ♗c6#) 24. ♗xe6#]

1-0

Editorial Preface

First of all, we want to wish you all a Merry Christmas and, of course, a great and successful 2013!

In the current issue of CEWN, we'll give You a short look back at the Year 2012 and its most crucial chess moments!

In the sections "games of the week" this week, we have chosen the 4 best games from our last 44 issues of the Year 2012. Some might remember them, but they are mostly already forgotten, and golden games never die J.

Top 5 events of the Year 2012:

- 1). A deserved first place goes to Magnus Carlsen breaking Garry Kasparov's all-time ELO record, getting to 2861!!
- 2). Vishy Anand winning his WCC match against Boris Gelfand in the rapid tie-break.
- 3). Anna Ushenina became the new Women's World Champion, winning her match in tie-break against Antoaneta Stefanova.
- 4). The Armenian Team winning the Chess Olympiad 2012 in Turkey in the men's section, and Russia winning in the female section.
- 5). The biggest Super tournaments of the Year 2012: Wijk ann Zee, Dortmunder Schachtage, London Chess Classic, Bazna Super Tournament, Tal Memorial.

Stay with us for the upcoming events of 2013: Wijk ann Zee, Gibraltar, Aeroflot Open, the Candidates, and many more!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Mamedyarov,S (2726) – Shanava,K (2589) [D45]

Tbilisi, 09.06.2012

[Csaba Balogh]

The game is taken from the Georgia-Azerbaijan friendly match. However, as we will see, the only friendly thing about it is the name — they played really sharp chess. We are facing a very interesting game, especially knowing the circumstances. Mamedyarov „improved” on his previous game in the 13th move with a dubious novelty, which seemed to be a great bluff, but Black fell right into its beautiful idea. If Black would’ve reacted better, he would have obtained a clear advantage.

1.d4 d5 2.c4 c6 3.♘c3 ♘f6 4.♘f3 e6 5.e3 ♘bd7 The starting position of the Meran. White goes for one of its sharpest lines...

6.♚c2 ♙d6

7.g4!? This is Mamedyarov’s favorite move, which enjoyed huge popularity around 5-6 years ago, even on the

highest level. Recently it went a bit out of fashion, mainly because of the strong computers that are suggesting very good ideas for Black. He can choose between many sharp options, and all of them lead to complex positions.

7...dxc4 [7...h6 is another move that is considered to be fine for Black.; White gets very strong compensation if Black accepts the sacrifice 7...♘xg4 8.♚g1 ♘xh2 9.♘xh2 ♙xh2 10.♚xg7 ♘f8 11.♚g2 ♙d6 12.e4 followed by ♙g5 and 0–0–0. White gets a very strong initiative for the pawn. Black’s pieces are undeveloped and the lines are opening towards the king.]

8.g5 [8.♙xc4 is just a transposition to the game after 8...e5 9.g5 ♘d5]

8...♘d5 9.♙xc4 e5 Actually, this is a very logical response. Black opens the center against the attack on the flank.

10.♙d2 [Giving up the light squared bishop for a pawn is not an advisable idea 10.♙xd5 cxd5 11.♘xd5 0–0 12.♙d2 ♚e8! with the threat of e4. The White king gets in trouble.; 10.♘xd5? cxd5 11.♙xd5? does not work because of 11...♚a5+]

10...0–0 11.♘xd5 cxd5 12.♙xd5

12...exd4 Shanava was well-prepared, since Mamedyarov had a game not so long ago in this theoretical position.

13. ♖xd4 White deviates from his previous game, but this is not a novelty yet. [13. ♕e4 dxe3 14. ♕xe3 ♖a5+ 15. ♔f1 (On 15. ♕d2 ♕b4 Black is fine according to the machine.) 15...f5 could be a very strong improvement for Black (probably this was Shanava's idea). (15...♘e5 happened in the game Mamedyarov-Zherebukh, Khanty-Mansiysk 2011.) 16. ♖b3+ is probably the best, but still after (16. ♕d3 meets with 16...♘e5 17. ♘xe5 ♖xe5 followed by f4 or the simple ♕e6 and ♖ac8. Black has a big advantage.; To open the f-file and the diagonal of the c8 bishop would be a serious mistake 16.gxf6? ♘xf6 with a big attack.) 16...♔h8 17. ♕d5 f4 18. ♕d2 ♖c7 only Black can be better. His pieces are coming out with tempo, first the d7 knight, then the c8 bishop.]

13... ♖xg5 14. ♖f5 This is the novelty of the game. White would like to transpose into a superior endgame, but of course, Black keeps the queens on the board.

14... ♖e7! [14... ♖xf5? 15. ♘xf5 ♕e5 White wins a pawn after 16. ♕b4 ♖d8 17. ♘e7+ ♔h8 18. ♕xf7 ±]

15. ♖g1 Very suspicious move. The White queen is pinned. At first sight White could immediately make use of it.

15... ♘b6 [After 15... ♕e5 I think, Black has a clear advantage... 16. ♖g5 is probably White's best option to go for a worse endgame (16. ♕e4 g6 and the d7 knight jumps in the next move.; 16. ♕c3 ♘f6) 16... ♖xg5 17. ♖xg5 h6 18. ♖g1 ♘f6 =+]

16. ♕c3!! This great queen sacrifice is the start of Mamedyarov's ingenious play, but it was not too late for Black to obtain a good position.

16... ♖e5? Just as in the previous move, Black plays the most logical move. After the shocking 16. ♕c3, Black would like to exchange the queens... [16... ♕xf5? simply loses after 17. ♘xf5 The best that Black can achieve is 17... ♖e5 18. ♕xe5 ♕xe5 19. ♘h6+ ♔h8 20. ♘xf7+ ±; Just as in the previous move, Black should have played 16... ♕e5! 17. ♖xe5!! (The elegant 17. ♘c6? would win, if taking on c3 didn't come with check! 17... ♕xc3+ and Black takes the knight.) 17... ♖xe5 18. ♘e2! and Black has nothing better than giving back the queen and simplifying to a drawish endgame 18... ♖xc3+ 19. ♘xc3 ♘xd5 20. ♘xd5 ♕e6 Black is slightly better, but the game should end in a draw.]

17. ♖d3!! After this fantastic and completely unexpected move, White is winning. Black cannot neutralize the power of the c3 bishop connected with the threats around the g7 square.

17... ♘d5 [17...g6 18. ♕b3! Too many threats are in the air. One of the possible winning sequences could be 18... ♖h5 19. ♘f3! ♖d4 and ♖xd6 are threats 19... ♖xf3

20. ♖xg6+! hxg6 21. ♔xg6#; White wins the queen after 17... ♔xd5 18. ♖xg7+! ♔xg7 19. ♘f5+! ♔g6 (19... ♔g8 20. ♘h6#) 20. ♘e7+ +-]

18. ♘f3!! The 3rd incredibly strong move in a row, but not the last one. Only with this double attack against the queen, White can continue pressing the g7 pawn.

18... ♕f5 [18... ♘xc3 19. ♘xe5 +-; On 18... ♘f4 White has many different wins, but the nicest is definitely 19. ♔xd6!! ♔xd6 20. ♖xg7+ ♔h8 21. ♖xf7+ ♔g8 22. ♖g7+ ♔h8 23. ♖g6+ +-]

19. ♔xd5!! This final decisive blow „puts the dot over the i“. White ends up with material advantage after a forced line.

19... ♔xd5 20. ♖xg7+ ♔h8

21. ♖xf7+! First, the f-pawn had to be eliminated to avoid the f6 resource.

21... ♕e5 [21... ♔g8 22. ♖g7+ ♔h8 23. ♖g5+ ♕e5 24. ♘xe5! is the most precise way to win 24... ♖f6 25. ♘d7!! +-]

22. ♕xe5+ ♔g8 23. ♖g7+ ♔h8 24. ♖g5+ Maybe Black could have continued a bit more with two pawns down, but he was so impressed with White's play that he resigned immediately.

1-0

(2) Aronian,L (2825) – McShane,L (2703) [D15]

Tal Memorial (3), 10.06.2012

[Arkadij Naiditsch]

We will see an amazing game! I can't remember Aronian losing with White and especially being crushed in the opening like this! It is the 3rd round of the Tal Memorial, McShane started with a double 00, and Aronian with the solid 1,5/2. Not many would have put money on a victory by the talented Englishman, but things went far from what was expected!

1.d4 d5 2.♘f3 ♘f6 3.c4 c6 4.♘c3 And we have another game in the Slav.

4...a6 McShane chooses a very solid line with a6.

5.♙g5 [5.e3 is the main move in the position.]

5...dxc4!? McShane is going for the most forced line! Strangely, after 5...dxc4 almost no games were played on the high level, so it's hard to say if Aronian knew this move or not, maybe he knew it and made a mistake in the variation?! [5...♘e4; 5...e6 would be the other 2 possibilities.]

6.a4 [6.e4 b5 and we are in the usual unclear positions that appear in a lot of lines, where Black takes on c4 and protects it with b5. White will develop his play in the center, while Black will try to be solid]

6...h6! A very important move that will be very helpful for Black soon. White needs to decide what to do with the bishop on g5.

7.♙h4 The most natural reply. [7.♙xf6 exf6 These positions can never be better for White even if he manages to recover the pawn on c4. Black's bishop pair will always give enough counterplay!; 7.♙d2 Can this be the right move?! 7.♙d2 looks just ugly. Why did White play 5.♙g5?]

7...b5! I don't know if McShane knew this idea or just found it over the board, in any case, it's a very strong move.

8.axb5 this move is a clear sign of huge self confidence of the White player. It was still not too late to switch to moves like 8.e4 with quite an unclear position.

8...cxb5 9.♘xb5 axb5! Otherwise, White is doing much better.

10. ♖xa8 ♜b7 Can it be that Black is doing already better in just 10 moves?... Amazing!

11. ♖a1?! [11. ♖a7 would bring nothing for White 11... ♔b6 12. ♔a1 e6 and White is not in time for ♔a5.; 11. ♖a2!? Maybe this move would have been a better option for White. The rook on a1 will be under attack (Na5- ♘b3), so why not to put the it on a2?]

11...g5!? And here we see why 6...h6 was such an important move. [Anyway, after 11...e6 12. ♜xf6 ♜b4+ 13. ♘d2 ♔xf6 14.e3 0-0 it seems like Black has more than enough compensation for the exchange. His next move could be e6-e5.]

12. ♜g3 e6 13.e3 White doesn't have any other defense against the ♜b4 threat.

13... ♜b4+ 14. ♔e2 White's position looks very ugly. For just an exchange Black managed to put the White king on e2 in front of the bishop on f1 (I can't remember seeing this kind of lack of construction before on the high level), the Black pawn structure is just great and all the pieces are well placed. All Black needs to do is to open some extra lines and the game will be over.

14... ♘c6 A good choice, McShane brings his knight to b3 where it will be perfectly placed!

15. ♘e1 White is trying to develop his pieces a little bit, at least. White's idea is to play ♘c2 forcing the ♜b4 to go away and then develop by playing ♔e1-Be2. But all this plan looks very slow — in fact, too slow...

15... ♘a5 16. ♜e5?! This move probably already leads to big trouble. Much better was: [16. ♘c2 ♜e7 17.f3! A very logical move. White blocks Black from playing ♘e4 and, at the same time, the White king will finally find a more or less safe square on f2 17...0-0 18. ♔f2 ♘d5 Black wants to play f5-f4. The position is quite complicated but we can feel that it should be very nice to play for Black, even if a lot of engines might probably disagree.]

16...0-0! No time to waste, Black needs to play actively.

17.h4 [17. ♜xf6 would not solve White's problems 17... ♔xf6 18. ♘c2 ♘c6 Black is still very active and White has a horrible development. I would prefer to play with Black here.(18... ♔e7?! 19. ♘xb4 ♔xb4 20. ♔c2!)]

17...g4 It's hard to say if the inclusion of 17.h4-g4 is good for White — probably not. Aronian is a very optimistic player and I am sure that in the current position he was not thinking about „how to escape today?“, instead „how to trick my opponent?“.

18. ♘c2 ♜e7 Of course there is no reason for Black to give away the bishop on b4.

19. ♔e1 ♘b3! McShane is playing a great game. [19...h5 would have been possible as well.]

20. ♖a2 [At 20. ♖a7 ♔b6 White would have no better move than to come back to a2.]

20...h5 Looks like an easy move, and in fact it is! White is slowly getting into deep trouble. Black's pieces keep on rolling forward, and it's hard to say how to stop them!

21. ♘e2 White is trying to develop anything he can, but it is too late!

21... ♙d6! Another great move by Black. White only has one active piece, so it is time to exchange it! There is no reason for Black to even look at 21... ♙xg2, which would give White some play on the g-file. Black has to stick to the main idea: to play for domination. McShane is doing it perfectly!

22.f3 White is trying to create something... [22. ♙xd6 ♙xd6 and White simply has no moves!]

22... ♘d5 McShane sees it well, after 22.f3 the weakness is the pawn on e3!

23.fxg4 Maybe this move is already losing, but what else to do? White is trying to search for chances with his active play [23. ♙xd6 ♙xd6 24. ♙f2 f5 and White's position simply looks horrible.]

23... ♙xe5! 24.dxe5

24... ♙b6 White is hopeless against the Black threats. Black wants to play ♘xe3, or ♖d8, winning the Queen on d1. The White rook on a2 is totally out of the game.

25. ♙f3 [25. ♖h3 ♖d8 White has no defense against ♘f4 26.gxh5 ♘f4]

25... ♘xe3?! This move gives White some hopes... [25... ♖d8! would have been the correct play, and it is a bit strange that McShane got away from his main idea 26. ♙xd5 White has no other move... In case of 26. ♙e2, ♘c1 wins the rook on a2 26... ♖xd5 27. ♙f3 ♖d2 and White's position is lost.]

26. ♘xe3 ♙xe3+ 27. ♙e2 ♙c1+ 28. ♙d1 ♙e3+ 29. ♙e2 ♙c1+ Probably Black was in time trouble and decided to repeat the moves.

30. ♙d1 ♙xf3! Of course, continuing the game. White's position is still very very bad.

31.gxf3 ♙e3+ 32. ♙e2 ♙c1+ 33. ♙d1 ♙e3+ 34. ♙e2 ♙f4 Black wants to play ♖d8 next. The White king is still in the center, and the rook on a2 is always in danger of getting caught!

35. ♔h2 [35. ♔f2 would have been a better way to fight, but also here Black is close to winning 35... ♖d8 36. ♖d1 ♔h2+ 37. ♔e3 ♔xe5+ 38. ♔f2 ♔h2+ 39. ♔e3 ♔xh4! Black got 2 pawns for the exchange, and probably the knight on b3 is worth more than the rook on a2. The position should be winning for Black.]

35... ♔xf3! As Kasparov once said, greediness is a positive characteristic in a chess player.

36. ♖f1 ♔e4+ 37. ♔f2 ♖d2 38. ♖g1 ♔f3+ White resigns because of 39. ♔e1 ♔e3! What a game by McShane, I think he will not forget it soon. The same goes for the World's Number 2, this was Aronian's toughest lost in maybe a couple of years...

0-1

(3) Bodnaruk, Anastasia (2415) – Javakhishvili, Lela (2455) [B42]

FIDE WCh Women World Cup

Khanty-Mansiysk RUS (1.28), 11.11.2012

[Arkadij Naiditsch]

Maybe some CEWN readers will remember the great Bodnaruk-Almasi game... Once again the young U-20 Russian Champion strikes in her very aggressive style, with a lot of nice sacrifices. We'll see a really great game!

1.e4 c5 2. ♘f3 e6 3. d4 cxd4 4. ♘xd4 a6 The Paulsen with 4...a6 has been a popular opening for at least 60 years!

5. ♖d3 [5. ♘c3 is the other main line.]

5... ♖c5 6. ♘b3 ♖e7 7. ♔g4 Probably the most critical line. White is trying to provoke 7...g6 and only then to go back with 8. ♔e2. Black's pawn structure would be much worse...

7... ♖f6 This is quite a rare move and I think not the best one. Black is trying to develop the knight with ♘ge7, and then to play 0-0 followed by d5. But of course, White is taking actions against this plan.

8. ♔g3 We are following the game Karjakin-Flores 2012.

8... ♘c6 9. ♘c3 ♘ge7 10. ♖f4 ♘g6?! N It's hard to say if Black has prepared this move. To me, it looks very risky. [10...e5 11. ♖d2 d6 12. 0-0-0 ♖e6 13. ♔b1 ♖c8 14. h4 with better play for White, Karjakin-Flores, Olympiad 2012.]

11. ♖d6! Of course. White should not allow Black to castle and, at the same time, the d5 move is blocked.

11... ♜h4 Black is trying an active plan. [In case of 11... ♜e5 12. ♜xe5 ♞cxe5 13. 0-0 followed by f4-f5, with a clear advantage for White.]

12. ♞e3 A logical reply. White is preparing to castle long and against ♜g5, to have f4 available. [Another logical move would have been 12. ♞h3 ♜e7!? Black is using the slightly unlucky position of the White Queen on h3, in comparison to g3. 13. ♜xe7 ♞xe7 14. 0-0 0-0 15. f4 d6 and White is still a bit better, but nothing too big has happened.]

12... ♞g5? In general it's the right idea for Black to exchange the queens, but here it's just too risky. Black's bishop on h4 is almost trapped and the Black king on e8 could quickly get in trouble. [12... ♜e7 would still give Black a worse position, but a fighting one.]

13. ♞h3! Brave and strong. In a K.O. tournament it's never easy to take the decision of sacrificing when You can choose a safer way. [13. ♞xg5 ♜xg5 14. 0-0 just leads to a better endgame for White.]

13... ♞f4 And we are entering a forced line.

14. ♜xf4 ♞xf4

15. g3! This double exchange sacrifice was the point of playing 13. ♞h3!. The action starts!

15... ♞f3 16. ♞xh4 No way back.

16... ♞xh1+ 17. ♜e2! Not giving the f3 square for the Black queen.

17... ♞d4+ [In case of 17... ♞g2 18. e5! is very strong. White wants to play ♞e4-♞d6, or simply ♜e4 to catch the Black queen.]

18. ♞xd4 ♞xa1

19.e5! A multi-functional move. It stops Black from castling short and prepares the move ♖e4. [It's too early for 19.♗f5? exf5 20.♗d5 0-0! an easy move to blunder...]

19...d5 This move loses, but it seems like nothing helps. [19...♙xb2 20.♗e4 White is going against his target — the Black king. 20...♙xd4 21.♗d6+ ♙xd6 22.exd6 From the material point of view, Black is doing fine, but he has one problem, all his pieces are undeveloped and White is starting a fast mating attack. 22...f6 23.♙h5+ ♖f8 24.♗g6! with the double idea of playing ♗e8 and ♙a5. White's position is winning.]

20.exd6 f6 Nothing else left...

21.♗xh7 This move is winning as well, but would lead to a fast win: [21.♙h5+! with the already known idea of taking the queen over the 5th rank to c7 or e7. 21...♖f8 22.♙c5 d7 is a deadly threat now. 22...♗d7 23.♙c7 ♖e8 24.♗xe6 and Black is completely lost.]

21...♖f8 22.♗e4! Bringing the last piece into the attack. White wants to play ♗xf6 next and there is no escape for Black. We can clearly see how important it is to keep the queen in the game; Black's one on a1 is nothing more than a kibitzer...

22...e5? Black is resigning without a fight. [22...♖xh7! was the only way to continue. 23.♙xh7 ♙xb2 Finally, the queen is back in the game. 24.♖d3! Very strong. Black is completely paralyzed and can only hope for a perpetual check, which is almost impossible to give because of the strong knights on d4 and e4. White's position is close to winning.]

23.♗xf6! What a total crush!

23...♖xh7 24.♗xh7+ ♖g8 25.♗g5 White wants to mate Black from all sides!

25...♙xa2 Avoiding the mate threat ♙h7-♙h8 because of ♗g8.

26.♙h7+ ♖f8 27.b3! Cool and strong, keeping the Black queen out of the game.

27...♗g4+ 28.f3 ♖e8 Any move is winning, but White chooses a very beautiful mate.

29.♙g8+ ♖d7 30.♙f7+ ♖xd6 31.♗e4#

Wow, what a mate! Another great game by Bodnaruk. However, she received bad news already the next day; she lost her second game and later on the very dramatic tie-break.

1-0

(4) Kramnik,Vladimir (2795)
– McShane,Luke J (2713) [D15]

4th London Chess Classic Olympia, London (5), 06.12.2012

[Csaba Balogh]

A really wonderful crush by Kramnik with a lot of sacrifices.

1.d4 d5 2.c4 c6 3.♘f3 ♘f6 4.♘c3 a6 5.g3 Recently, this 5.g3 line against the Chebanenko Slav was considered to be quite a harmless approach, but this game might change the general opinion.

5...dxc4 6.a4 White wants to recover the c4 pawn, therefore he prevents b5. [6.♙g2 b5 7.♘e5 ♙b7 is the start of the other line, where White tries to find compensation for the pawn in the center with e4.]

6...e6 7.♙g2 c5 8.0–0 [8.dxc5 is the most common move, but after 8...♙xd1+ 9.♘xd1 ♙d7! This very deep novelty was introduced by Karjakin back in 2009 and it seems to solve all of Black's problems. 10.♘e5 ♘c6 =]

8...cxd4 9.♘xd4 This could not be a real surprise for McShane that Kramnik chose this line, since he has already played it in two games.

9...♘bd7 10.♘c2! White wants to win back the c4 pawn, so he drives his knight to e3.

10...♙c7

11.♙f4! This is the novelty of our game. Black provokes the e5 move, after which the d5 square becomes a real hole in Black's camp. [Kramnik has deviated from his own game, which continued with 11.♙d4 ♙c5 12.♙h4 ♙e7 13.♘a3 ♘e5 14.♙f4 h6 15.♙xe5 and at this moment, the players agreed to a draw. Kramnik-Gelfand, Linares 1997.]

11...e5 [If Black restrain s himself from giving up the control over the d5 square and plays 11...♙c5 12.a5! was probably Kramnik's preparation with the idea of 12...♙e7 13.♙a4! 0–0 14.♘a3! += With this cool maneuver, White wins back the pawn and obtains a clear advantage as all his pieces are perfectly placed. The main problem of Black is that he can't protect his pawn with b5 because the a8 rook will hang at the end.]

12.♙d2! [12.♙g5 is much worse because of 12...h6 and the bishop won't be able to return to g5 as it happened in the game.]

12...♘c5 Black would like to preserve his c4 pawn advantage and wants to protect it with ♙e6. In addition, he is ready to jump with the knight to b3. [12...♙e7 is met with 13.♘e3! and ♘cd5 next is going to be really unpleasant.; 12...♙c5 was an alternative, as it was pointed out

by Kramnik at the press conference. He was intending to play 13.♘e3 0–0 14.♖c1 White is very close to restoring the material balance. 14...♙xe3 15.♙xe3 ♖b8 Black is finally ready to push b5, but this still doesn't allow him to equalize: 16.♘d5! ♘xd5 17.♙xd5 b5 18.♙c6! This concrete solution demonstrates well the power of the bishop pair. 18...♙xc6 19.♙xc6 ♙a7 is threatened, and on 19...bxa4 20.♖fd1! suddenly the f8 rook is going to be trapped, 20...♘f6 21.♙c5!]

13. ♙g5! By eliminating the f6 knight, the d5 square becomes even more vulnerable.

13... ♙e6 Black tries to control the d5 square, but this allows White to destroy his pawn structure... [13... ♙e7 is not better either. 14. ♙xf6 ♙xf6 15. ♘d5 ♙d8 16. ♘ce3 ♙e6 17. ♘xc4 ± The power of the minor pieces is just huge. White wants to play ♘cb6 and ♖c1, or just b4 with a big advantage.]

14. ♙xf6 gxf6 15. ♘d5 ♙d8 [The absence of the light-squared bishop will tell after 15... ♙xd5 16. ♙xd5 ♘b3 17. ♖ad1 followed by ♘e3, with complete control on the light squares.]

16. ♘ce3 ♘b3

17.a5!! A shocking move, based on excellent calculation and great intuition! White frees the a4 square for the rook, or for the queen, if the rook is taken. [McShane was expecting 17.♖b1 and after 17...♖c8 he would successfully consolidate his position.]

17... ♖c8? [The critical test was definitely 17... ♘xa1 18.♙a4+! (18.♙xa1 is too slow. 18... ♙c5) 18... ♙d7 Only move. 19.♙xc4 ♘c7 is threatened. 19... ♖c8 20.♙h4 ♖c6! 21.♖xa1 Despite the fact that White doesn't even have a pawn for the exchange, it's clear that with such active pieces, it's much easier and better to play the position as White. However, Black also has some chances after 21... f5!]

18. ♖a4! This was the point! Now White is ready to recover the pawn again and if it falls, the Black position collapses.

18... ♘d4 Black indirectly protects the c4 pawn, as the d5 knight is hanging after all. [On 18... ♘xa5 19. ♘xf6+! looks pretty strong. 19... ♙xf6 20. ♖xa5 Black has too many weaknesses. Not only the pawns, but also the light squares.]

19. ♘b6! ♖c7

20. ♖xc4!! Another shocking blow, with fantastic intuitions again! In a few moves, we'll get a clear picture of why the absence of the e6 bishop is worth a rook. [20. ♘bxc4 After 20... ♙c5 Black obtains a playable position. Suddenly, the bishop pair and the strong knight on d4 are enough compensation for the weakened structure.]

20... ♙xc4 [Black is worse even if he does not accept the exchange: 20... ♙c5 21. ♘bd5 ♖c8 22. ♚d3 followed by ♖fc1.]

21. ♘exc4 ± White is ready to kick out the d4 knight with e3. It's very nice to see the way White plays on the light squares on the following lines...

21... ♘b5 [21... ♙c5 is met with 22.e3! ♘e6 23. ♘d5 ♖d7 24. ♚f3 White continues dominating even without the queens on the board. 24... ♖xd5 25. ♚xd5 ♚xd5 26. ♙xd5± The b7 pawn is a clear weakness.; 21... ♙e7 22.e3! ♘e6 23. ♚a4+ ♙f8 24. ♘d5! (24. ♖d1 is less precise. 24... ♚e8) 24... ♖c5 25. ♘cb6 ♙g7 26. ♖d1 Black can't move! ♚g4 is coming with a mating attack. ♘d7 is also in the air.]

22. ♚b1! Very nice! Keeping the eyes on the light squares. ♖d1 joins the game next.

22... ♚d4 Otherwise, after ♖d1, the queen would only have one square on b8, which was definitely not a tempting alternative.

23. ♖d1 ♚c5 24.e3 Taking control of the d4 square. [It was also strong to transfer the knight to d5 first. 24. ♘e3 ♘d4 25. ♘ed5 ♖c6 26.e3! with a winning advantage as well.]

24... ♙e7 25. ♚f5! Stormy clouds are approaching. At this moment, McShane had only 3 minutes left against Kramnik's one hour.

25... ♙f8 26. ♙d5! By protecting the c4 knight, White threatens with ♘d7.

26... ♙g7 27. ♚g4+ ♙h6 Obviously, White has several ways to win, but Kramnik continues to play for the spectators!

28.e4! Of course, to give up the d4 square is a potential mistake, but it has a concrete reason — White wants to mate Black with ♘e3-f5. Black has an only way to defend.

28... ♘d4 29. ♘e3 [29.b4!? was another pretty win. 29... ♚xb4 30. ♖xd4! exd4 31. ♚f4+ ♙g7 32. ♚xc7 +-]

29...f5 Otherwise, ♖xd4 decides the game. Now Kramnik has calculated a very long, forced and spectacular line until the win.

30. ♚h3+! [30. ♘xf5+ ♘xf5 31. ♚xf5 is also winning for White.]

30... ♙g7 31. ♖xd4! Another exchange sacrifice. This is already the 3rd in the game; McShane rejected to accept the first one on a1.

31...exd4 32. ♘xf5+ ♙f8 33. ♚h6+ ♙e8

34. ♖xf7+! This was the point. Black can't hope for salvation. [34. ♔g7 ♖f8 is not clear.]

34...♔d8 [34...♖xf7 35. ♔g7+ ♔e6 Now, the best, but not the only way to win is (35...♔e8 36. ♔xh8+ +-) 36. ♖xd4+ ♔d6 37. ♔h6+! ♔e5 this is not a good sign. 38. ♖f3+ ♔xe4 39. ♔f4+ ♔d3 40. ♖e5+ ♔c2 41. ♔e4+! After this subtle chess, Black can't avoid losing his queen with ♖d3 check. For instance, after 41...♔b3 42. ♔a4+ ♔xb2 43. ♖d3+ +-]

35. ♔g7 ♖f8 36. ♖xd4 Suddenly, ♖e6 threatens mate in one. Quite an unusual picture. [36. ♖d5 was also winning.]

36...♖c6 [36...♖xf7 also loses to 37. ♔xf7 (37. ♖e6+?? only leads to a perpetual check after 37...♔e8 38. ♔g8+ ♖f8 39. ♖g7+ ♔d8 40. ♖e6+ =) 37...♔xd4 38. ♔g8+ +-]

37. ♖xc6+ ♖xc6 Black seems to have some hopes because of the f2 square, but the next move destroys all the dreams...

38. ♔g4! with a double mate threat on d7 and c8. Kramnik admitted that he calculated until this moment when he played 30. ♔h3! Impressive!

38...♔c7 39. ♔d7+ ♔b8 40. ♔d2? The only mistake in the game by White. McShane had only 3 seconds left

to make the last move of the time trouble and Kramnik wanted to shock him with this unexpected retreat, with the idea of ♖d7. We'll get the same position two moves later, when White already plays the strongest move.

40...♔c7 [40...♔g5 could have been a small chance, although the position remains lost 41. ♖d7+ ♔c8 42. ♔d1! (42. ♖xc5 ♔xd2 43. ♔c4 is also technically winning, but of course, to enter such an endgame when Black is so close to getting mated gives a bad feeling...) 42...♖d8 43. ♔g4! These were the best moves, after which White is still winning easily... 43...♖xd7 44. ♔e6 +-]

41. ♔d7+ ♔b8 42. ♔g2! A cool move. Suddenly, Black finds himself in zugzwang as he can't play ♖d8 because of ♔xd8 and ♖d7.

42...♔d6 [42...♖d8 43. ♔xd8+ ♔xd8 44. ♖d7+; 42...♖xf7 43. ♔c8+ ♔a7 44. ♔c7#]

43. ♖b4! Now the game is over. Black has to give up his c6 pawn because d6 has to be protected.

43...♔d4 44. ♔xc6 ♔a7 All the moves are winning now...

45. ♔h3 Kramnik calmly leaves from the ♔xe4 check, after ♖c8 ♖xc8 ♔xc8. Black can resign now.

45...♔d1 [45...♔xf2 46. ♔d7+ ♔b8 47. ♔xd6+ +-]

46. ♖c8+ ♖xc8 47. ♔xc8 White ended up with 4 extra pawns and the mating attack continues. [47. ♔b6+ ♔a8 48. ♔d5+ +- was even easier.]

47...♔f1+ 48. ♔g4 h5+ 49. ♔xh5 What a brilliant performance by Kramnik! Amazing!

1-0

Editorial Preface

Let's start the first issue of 2013 with a short review of a great amount of tournaments that just came to an end:

The winner of the World Cities Championship in UEA was the team of Netherlands, playing almost with the national team.

The Open in Geneva was won by Etienne Bacrot. The Zürich Open was surprisingly won by Levente Vajda. Anton Korobov won the round robin tournament AICF-AAI in India with a very convincing 6,5/10.

Timur Gareev won the North American Open.

The Pirenka rapid/blitz in Russia was won by Karjakin.

The Final Rapid Grand Prix of Russia was won by Dreev.

In the next issues of CEWN, we are already very happy to announce that we will cover the stellar upcoming event of the month: Tata Steel in Wijk aan Zee with Magnus Carlsen, Leven Aronian, Sergey Karjakin, Hikaru Nakamura and many more leading grandmasters.

Stay updated with Your usual issues of CEWN and have fun with CEWN Nr45!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Vachier-Lagrave, Maxime (2711)
— Grigoryan, Karen H (2513) [C02]

Al Ain Classic 2012 Al-Ain UAE (5.3), 26.12.2012

[Balogh Csaba]

1.e4 c6 2.d4 d5 3.e5 c5 [3... ♖f5 is clearly the mainline, but the text move also has many followers.]

4.dxc5 e6

5.♔g4 A very sharp move in order to make Black's development a bit more difficult, thanks to the pressure against the g7 pawn. [The main, and probably the best, is 5.♙e3 with hundreds of games in the database.]

5...h5! Well played! If we are familiar with the following developments of both sides, it will become clear that the queen must be sent away from the 4th rank.

6.♔g3 ♘d7 7.♘f3 ♘xc5 8.♘c3 White's main idea is to play ♙e3 and 0-0-0, creating a dangerous attacking po-

sition, when different kind of sacrifices, such as ♘xd5 will always be in the air.

8...h4? Black only improves the queen's position. On g3, it was standing in the way of the ♘e7-f5 tempo, while on the 4th rank it can be very useful because it can be switched to the other side. In addition, Black only weakens his own pawn. [8... ♙d7 9.♙e3 ♖c8 was the right way to play. After Black has protected his c5 knight, he is ready to play ♘e7-f5 next. 10.0-0-0 ♘e7 Black seems to be fine, but of course, the position is playable for both sides.]

9.♔g4 h3 10.g3! White wants to take the h3 pawn without destroying his pawn structure. Black must try to create some tactical counterplay.

10...♘h6 11.♔xh3 ♖b6 12.♙b5+ [The simple 12.♙e2 followed by 0-0 was also good.]

12...♙d7 13.♙xd7+ ♘xd7 14.0-0

14...♖c8! [14...0-0-0 with the idea of a potential attack with opposite side castling is not dangerous at all. 15.♔h4 White drops his queen to the queenside and has enough defensive pieces to protect the king.]

15. ♖e3! A brilliant idea! Instead of trying to defend the c2 pawn passively, Vachier-Lagrave leads the game to tactical waters.

15... ♖xb2 16. ♘xd5!! This was the point! Of course it's impossible to calculate all the lines until the end, we must have very good intuitions to make such sacrifices.

16... ♖b5 [16...exd5 is met with 17.e6! fxe6 18. ♖xe6+ ♕e7 Here White has many tempting moves, but only one of them leads to a clear advantage.

19. ♗g5! (19. ♗d4 ♖xc2 20. ♗xg7 is not easy because of (20. ♖fe1 ♘f5 Very suspicious, but Black is still alive.) 20... ♖c6!) 19... ♘g8 Very subtle play is required. 20. ♖g6+! (On the most logical 20. ♖fe1 Black has 20... ♖b6! 21. ♗xe7 ♖xe6 22. ♖xe6 ♘xe7 23. ♖ae1 and now 23...0-0! solves Black's problems. 24. ♖xe7 ♖xf3 25. ♖xd7 ♖xc2 => 20... ♗f8 (20... ♗d8 is refuted by 21. ♖ab1! ♖xc2 22. ♖f7! Black can't parry the threats. All the White pieces are attacking. (22. ♖xg7 allows 22... ♖h7!) 22... ♘gf6 (22... ♗xg5 23. ♘xg5 +-) 23. ♖fe1 ♖e8 24. ♘d4! and ♘e6 next is a spectacular mate.) 21. ♖e6!! White seemingly wants to make a draw by repetition, but actually he just deprived Black from castling kingside. 21... ♗e8 (21... ♖d8 22. ♖fe1 +-; 21... ♘gf6 22. ♗xf6

Black drops a piece after all the captures.) 22. ♖fe1! ♖b6 23. ♗xe7 ♖xe6 24. ♖xe6 ♘xe7 25. ♖ae1! Now, in comparison to the 20. ♖fe1 line, Black doesn't have 0-0 anymore. 25... ♖xc2 26. ♖xe7+ ♗d8 27. ♖xg7 +-]

17. ♖ad1! White keeps all the tactical motifs alive by keeping his knight on d5.

17... ♗a3 [17...exd5 is much worse now, because the queen on b5 falls to the ♘d4 tempo. 18.e6 fxe6 19. ♖xe6+ ♗e7 20. ♗g5 ♘g8 21. ♖g6+ ♗f8 22. ♘d4 +-; On 17... ♗c5 both 18. ♘g5 (and 18. ♘f4 are very strong. Both moves are connected with sacrifices on e6.)]

18. ♖fe1 White wants to increase the power of the e6 move after exd5. [18. ♖d3! was even stronger, activating the rooks with tempo. ♖fd1 is coming next.]

18... ♖c6 19. ♖d3 ♗b2 20. c3! Another great move, locking the b2 bishop. The knight on d5 is hanging for 5 moves. Black could not stand the pressure anymore...

20...exd5

21.e6! Obviously, White must open the lines on the king.

21...fxe6 [21...♔xe6 22.♘d4 wins the queen.; 21...♘f6 22.♘d4 Black is lost. Too many threats are in the air.]

22.♘d4 ♘f7 [22...♔f7 loses to 23.♖xe6! ♔xe6 24.♘g5+ +-]

23.♖xe6+ ♔d8 This counterattack on the queen was Black's idea. He hoped that this tempo could give enough time to hide his king on the queenside. [23...♔f8? 24.♖xc6 ♖xh3 25.♖xc8+ +-]

24.♔f5 ♘d6 [24...♔c4 leads to a nice finish: 25.♔xf7 ♔xd3 26.♔e7+ ♔c7 27.♘e5# Quite a picturesque mate!]

25.♔g5+ ♔c7

26.♘e5! Perfect calculation! I am quite sure, that White had foreseen the main idea, which comes in the 26... ♘xe5 line.

26...♘a3 [26...♘xe5 27.♘xe5 ♔a6 (27...♔c5 28.♔e7+ Black must move into ♘d7 check!) 28.♖xd5 ♘a3 and now 29.♖e7+! ♔b8 30.♖a5!! The queen is trapped!! ♘d7 wins in any case. 30...♔xa5 31.♘d7+ +-]

27.♘xd6+ ♘xd6 28.♖xd5 ♔xc3 [28...♖h6 doesn't save the piece 29.♖dxd6 +-]

29.♖dxd6 ♔xf3 30.♖xd7+! After a nice tactical battle, White ended up with an extra pawn, but it's more important that his attacking chances are still excellent, while the g5 queen covers the c1 square.

30...♔b8 [30...♔xd7 31.♔e7#]

31.♖ee7 ♖c2 32.♔e5+ [The cold-blooded 32.♖f7 was also winning.]

32...♔a8 33.♖e8+ ♖c8 34.♖xc8+ ♖xc8 35.♔c7! A neat finish!

1-0

(2) Halkias,Stelios (2561) – Fedorchuk,Sergey A (2661) [A15]

World Cities Team GpC Al-Ain UAE (2.7), 23.12.2012

[Arkadij Naiditsch]

1.♘f3 Directly after the opening, the game develops into a very sharp tactical battle and ends with a nice final calculation by Stelios Halkias. Let's see how the game developed...

1...♘f6 2.c4 b6 Usually, early moves like 2. ..b6 don't bring anything good, but this leads just to a different move order.

3.♘c3 ♘b7 4.d4 e6 5. ♘g5 h6 [5... ♘b4 would lead us to other main lines...]

6. ♘h4 ♘e7 7. ♔c2 d5 8. ♘xf6 This move looks strange, but is a normal way to continue the game. White's idea is to play against the „bad" bishop on b7. [In case of 8.cxd5 ♘xd5 the position could be evaluated as about equal.]

8... ♘xf6 9.cxd5 That's the point of White's 8. ♘xf6.

9...exd5 10.e3 [10.g3 could be other standard way to continue the game, but we are not very far away from getting a pretty equal game. Of course, all of this is still theory.]

10...0-0

11.0-0-0! White chooses a very double edged line! The sharp part of the game is starting. White will push his g- and h-pawns forward; Black will try to start his play on the queenside.

11...a5 A usual way to play for Black, but this is clearly not the most critical. [11...c5!? Black has no time to lose and has to start his counterplay as fast as possible. 12.dxc5 ♘d7! and this is the key move! Now all the Black pieces are joining the game very quickly. 13.♘xd5 ♘xc5 Black is a pawn down but has very active play. His chances are pretty good. 14. ♘c4 ♔c8 15. ♔b1 b5 with a very unclear position.]

12.h4 White is starting his play on the kingside. His next move could be g4.

12... ♘c8 Stopping the g4 move and at the same time bringing the bishop back to life. This is a good idea, but Black is losing too much time...

13. ♘e2 ♘a6 14.a3 c5 Black has finally played c5, but White can counter with...

15.g4! [An attempt to win a pawn would lead to nothing: 15.dxc5? ♘xc3! 16. ♔xc3 ♘xc5 and only Black can be better here because of the bad position of the White king.]

15...g6?! Black doesn't choose the critical continuation once again. [Would lead to a very sharp position to play 15... ♘xg4 16. ♘g5!? I guess this was Halkias' idea. 16... ♘xg5 17.hxg5 ♘xe2 18. ♔xe2 and White's attack looks dangerous at first sight, but on the other hand, White „just" wants to play gxh6, and Black will counter with g6. The position is very unclear.]

16. ♘e5 [16.g5 could have been another good move to continue White's attack.]

16...cxd4 17.exd4?! [17. ♘c6! ♔d7 18. ♘xd4 seems to lead to a position with a clear plus for White.]

17... ♘c7 Black tries to bring his pieces to better squares, and as we know, ♔g8 and ♙g7 are a great combination for the defensive side.

18.f4 White let all his options open: to play g5, f5, or even h5 next.

18...b5! Black starts his own play. The position is really unclear.

19.f5 b4 20. ♘a4 In a very complicated position, Black gives his opponent a huge chance...

20...g5?! [20...bxa3! Logical and right decision. Black has no time to lose and must try to open the White king's position as much as possible. 21. ♔b1! and Black's attack is getting very dangerous. (Of course not 21.bxa3? ♔d6)]

21.hxg5?! White returns the present. [The simple 21. ♘b6! seems to win an exchange. It's hard to guess why White didn't play it...]

21... ♙xg5+ 22. ♔b1 bxa3 23. ♔c6? It seems like White has blundered Black's next move. [23. ♖h3! would keep the position very dynamic and unclear.]

23...f6! Very strong. The White knight can't go back from e5 because of ♙d7.

24. ♘c5 White plays for all or nothing. He's defending the knight on e5 indirectly and bringing one more piece into the attack, but leaving the b2 pawn unprotected...

24... ♖b8! Another excellent move by Black. The position is very sharp, but Fedorchuk keeps his cool and brings his rook from a8 to b8 into the attack.

25.b3 Of course, White can't allow Black to play ♖xb2.

25...a4! Black is playing great chess! White can't take with any of his pieces on a4 and, as we can see, he doesn't even have a clear threat against the Black king. Things seem to be turning in Black's favor.

26. ♘f3 Already now, it's not easy to give White a good advice. At least, Halkias is trying to exchange the bishop on g5, which is like a „stone wall“ for White's attacking attempts.

26...♔e8 Once again, Fedorchuk acts cool and makes the correct decision. He is forcing a queen exchange.

27.♔xe8 ♖xe8 Let's take a fresh look at the position. Black is a pawn up, his king is safe and White's bishop on e2 and pawn on b3 are hanging.. . White's pluses: maybe a future attack over the h-file and nothing more. We can clearly see how quickly White got into deep trouble from a clearly better position by not choosing the most dynamic actions.

28.♘xg5 White must try his chances in some concrete play. [In case of the slow 28.♙d3 ♙f4! it seems like Black is just winning. White absolutely has no play...]

28...♖xe2 29.♖xh6 fxe5 30.♖dh1 White is going all-in, and what else is there to do... Even though the engines show a clear advantage for Black, to play such a position at the board is not an easy thing to do. White threatens to play ♖h8-♖1h7, which is very concrete and scary.

30...♘e8! And once again, Black finds the best way to continue the game. [It would lead to a funny mate to play 30...axb3?? 31.♖h8+ ♔f7 32.♖1h7+ ♔f6 33.♖f8#]

31.♖g6+ White has no better tries to continue his attack...

31...♔f8 32.♖h8+ ♔e7 33.♖gg8 We probably reached the critical moment of the game. White's attack seems to be quite dangerous and Black needs to be precise to get a full point!

33...a2+ Still OK but more forced was [33...♙xf5+ 34.gxf5 It's easy to be a hero here with the help of an engine, but it's very hard to find this during a practical game. 34...a2+ (An easy mistake could be 34...axb3? 35.♖h7+ ♔d8 36.♘e6+ and suddenly White is on the winner's side.)

35.♔a1 axb3 36.♘xb3 (Right now, the same ♖h7 doesn't work because of 36.♖h7+ ♔d8 37.♘e6+ ♖xe6 38.fxe6 b2+! and Black is queening with check.)

36...g4!! What an amazing position! White has no moves and can't defend from g3-g2 and ♖e1+ g1♔. Chess can be very beautiful sometimes! :)]

34.♔a1 ♔d8?? This terrible blunder probably occurred in deep time trouble. Still, 34...♙xf5 would lead to the winning variation we already showed.

35.♘e6+! And... White is winning.

35...♖xe6 [Of course, after 35...♙xe6 36.♖xe8+ ♔c7 37.♖xb8 Black can just resign as well...]

36.fxe6 axb3 37.♖xe8+ ♔c7 38.♔b2 White easily blocks the Black pawns...

38...♖a8 39.♖h1 The pawns are blocked and White is an exchange up. The position is winning.

39...♔d6 40.♖c1 a1D+ This is not a real try to save the game, but there's nothing left...

41.♖xa1 ♖xa1 42.♔xa1 ♙xe6

43. ♖xe6+!! A very nice way to finish the game! Halkias knows how to win the pawn endgames with the rule of opposition!

43... ♔xe6 44. ♖b2 ♔d6 45. ♖xb3 If Black could play **45... ♖b7** now, the position would be a draw, but this is not allowed by the rules of chess.

45... ♖c7 46. ♖a4! The last exact move. Black can't stop White's king from reaching the c5 square, winning the d5-pawn.

46... ♖c6 47. ♖a5 A very fighting game, where the fortune was clearly on White's side!

1-0

(3) Korobov,A (2702) – Negi,P (2641) [B90]

AICF-AAI Cup 2012 New Delhi IND (9), 29.12.2012

[Balogh Csaba]

A nice fighting game. An interesting detail to mention is that Korobov played 1.e4 for the second time in his life.

1.e4 c5 2. ♘f3 d6 3.d4 cxd4 4. ♘xd4 ♘f6 5. ♘c3 a6 The Sicilian Najdorf is the main repertoire of Korobov as Black too, so he had to be familiar with the arising positions. From a psychological point of view, it was not a clever opening decision by Negi, who plays many other lines as well...

6.h3 ♘c6 A sideline. 6...e6 and 6...e5 are the two main moves.

7.g4 ♘xd4 8. ♖xd4 e5 9. ♖d3 ♘e6 10.g5 ♘d7

11.f4 There was only one game on this position in the database before, and Korobov was leading the Black pieces in it.

11... ♖c8 This is new! Black allows to be completely squeezed after f5, but he is hoping for dynamic counterplay with d5 later on. [11...exf4 12. ♘xf4 ♘e7 happened

before. 13.0-0-0 (13.♔e3 might be an improvement, followed by 0-0-0 and ♖d5.) 13...♙xg5 14.♙xd6 ♙xf4+ 15.♙xf4 0-0 16.♖g1 ♖c8 17.♘d5 ♙h8 18.♙e2 White's chances seem to be preferable, although Black was able to hold the draw on Kuzubov-Korobov, Plovdiv 2012.]

12.f5 ♙c4 13.♙f3 ♘b6 This is too slow. [13...d5 was the only critical move from the opening point of view. We can see this break in many different lines. 14.♙xc4 (The main point of Black's idea comes after 14.exd5 ♙b4! 15.♙d2 ♙xc3 16.♙xc3 ♙xg5 and Black has jumped out and overtook the initiative!) 14...♖xc4 15.♘xd5 is the correct reaction. The knight is extremely strong on d5. 15...♖xc2 White should objectively be better, but he has some problems to find safety for his king as he will not be able to castle queenside. (15...♘c5 is met with the simple retreat 16.♘c3 and ♙d2 0-0-0 next with a clear pawn up.)]

14.♙xc4 ♘xc4 15.b3 This brings Black back to the game. [15.f6! would have been much stronger! Black is doomed without the d5 counterplay. The game could continue, for instance, with 15...♙a5 (15...gxf6 16.♘d5 is the point!) 16.fxg7 ♙xg7 17.0-0! 0-0! 18.♘d5 with an overwhelming advantage!]

15...♘b6 16.♙d2

16...d5! Only move! Black has to try this even if it's losing, otherwise, he will suffer the whole game in a passive position.

17.exd5 ♙b4 Thanks to the b3 inaccuracy, White has some problems because he'll lose the stability of the c3 knight.

18.♖d1 White would like to play ♘e4, so the next move is forced. [18.0-0-0 allows 18...♙c7! 19.d6 ♙xd6 with mutual chances.]

18...♙xc3 19.♙xc3 ♙xg5 [19...0-0!? also came into consideration. Black has some different ideas, for instance e4 followed by ♘xd5, or just ♙xg5. Suddenly, the Black king is safe, while the White one has no safe shelter on the board.]

20.♙xe5 ♖xc2! [20...0-0 was also tempting in order to bring the rook to e8, but suddenly after 21.♙f1! the Black king becomes vulnerable as well. ♖g1 is unpleasantly coming next!]

21.♙d4! Creating the double threat of ♙xb6 and ♖g1. [Now on 21.♙f1 ♖c1! is very strong. White has problems with the f5 and d5 pawns.]

21...♘d7 22.♖g1 ♘e5! Nice intermediate move! [After 22...♙h4+ 23.♙f1 Black's king becomes the weak one. White is pressing the g7 pawn and can consolidate his position with ♖g4! anytime. Despite having no pawns around the king, White's pieces provide an excellent defense.]

23.♙g3

23...♔h5? This is a blunder, which throws away the half point. [23...♔h4!! would have been the fantastic saving move! White has to force a draw because of the ♕e4 threat. 24.♔xh4 (24. ♖xe5 ♕e4+; 24.♔f1 loses to 24...♔h5! There's a huge difference compared to the game. Both the d1 rook and the f5 pawn are hanging with check. 25.♔xe5+ ♔d7 Black wins.) 24...♖f3+ 25.♔f1 ♖h2+ = with perpetual check to follow.; 23...♔xg3+ 24.♖xg3 The endgame is bad for Black after the g7 pawn falls.]

24.♔xe5+ ♔d7 25.♖d2! After this nice defensive move, Black's heavy pieces are unable to create any serious threats.

25...♖e8 [25...♖c1+ 26.♔f2 +-]

26.♔xe8+! ♔xe8 27.♖xc2 ♔h4+ 28.♖f2 White ended up with an extra piece and the d-pawn has huge power as well.

28...♔xh3 29.f6! g6 [29...gxf6 is refuted by 30.♖c7! with a mating net around the Black king.]

30.♖g3 ♔h1+ 31.♔e2 ♔d7 [31...♔xd5 is poisoned. 32.♖e3+ +-]

32.♖e3 ♔h5+ 33.♔e1 ♔h1+ 34.♔d2 ♔h2 35.♔c1 One single queen can't make wonders. The only problem for White was to make the last 5 moves of the time trouble without blundering. Then, his position is automatically winning.

35...♔f4 36.♔b1 [36.d6! was even stronger. 36...♔xd6 (36...♔xd6 37.♖g3 +-) 37.♖d2 +-]

36...♔xf6 37.♖d3 White wants to advance his d-pawn.

37...♔f5 38.♖dd2 g5 39.d6 g4 40.♔c1 The last move of the time control. The end is near!

40...♔e5 41.♖c7+ ♔d8 42.♖b6 ♔a1+ 43.♔c2 ♔xa2+ 44.♔c3 ♔a1+ 45.♔b4 The queen has no more checks, so it's time to resign the game.

1-0

(4) Short, Nigel D (2692)
– Salem, A.R. Saleh (2536) [A16]

World Cities Team GpA Al-Ain UAE (3.5), 24.12.2012

[Arkadij Naiditsch]

1.c4 Nigel Short was one of the Top players in the 90s, when he even played a World Championship match against Kasparov in 1993. Nowadays, only time to time we can see him playing a strong chess event, even when his rating is still close to 2700. In the current game, already on move 8, the position gets pretty wild and Short manages to outplay his opponent in a nice style.

1...Nf6 2.Nc3 d5 3.cxd5 Nxd5 4.g3 g3 is by far not the main move in the Anti-Gruenfeld, but Short likes to take out his opponents from the main lines.

4...b6 A slightly strange move by Black, even though it's very possible. One of the main moves is the direct 4...g6.

5.Bg2 g6 6.d3 Bg7

7.Be3!? Quite a tricky move. White doesn't hurry with Nf3 — we'll see why in the game. If Black would play

7...0-0 8.0-0 d2, followed by Bh6 and a bishop exchange, this could give White some small advantage.

7...Nc6 8.Bxc6+!? That's White's opening idea. At first sight, it doesn't look great to give up such a bishop, but White is gaining a very big positional plus: Black's pawn structure is going to be horrible. Objectively speaking, the position should be very complicated.

8...bxc6 9.0-0 White wants to play Bh6.

9...h5 And of course, Black doesn't allow White to play it. On the other hand, if Black castles short, Bh6 will be possible again. That's why 9...h6 could have been an option, with g5 next.

10.Nf3! The White knight will have a great position on g5!

10...Bh3 Of course, Black doesn't allow White to castle short. If White could castle, and then play Rfc1, creating pressure on the c-file, his position would be clearly better.

11.Ng5 Bg2 12.Rg1 Bd5 We are in quite an interesting position. White can't castle short, and to castle long is not a great option, because Black would quickly get a lot of counterplay on the b-file. On the other hand, Black's bishop is quite badly placed on d5 — he must move it somewhere.

13.f3! Very good move by White. In the future, White could play Qf2 and finally connect the rooks. Besides, to play Bh2 followed by e4 could be a threat.

13...0-0?! Sometimes the most obvious moves are not the best ones... [It was time to make use of the h-pawn. 13...h4! would force White to take some decisions. To open the h-file for the Black rook might not be the best, and at 14.g4 ♖d6 the position seems to remain pretty unclear.]

14.g4!? Very creative play by Short. White is starting an attack against the Black king. Much more „standard” for White would have been to play ♔f2, followed by ♖gc1 to put pressure on the c-file, with a clear advantage.

14...hxc4 15.♖xc4 Not an easy position for Black. There is no clear plan... and White can improve his position very easily in many ways.

15...f5 A very risky move. Now the knight on g5 will be a monster-piece forever. Probably a better way to continue would have been to keep the structure more flexible by playing 15... ♖d6, and only if it's really needed, to continue with f5.

16.♖g2 ♖d6 17.♖c1 [The immediate 17.♔f1 could have been an option as well.]

17...♖ad8 A move without any plan. [A way to go on for Black could be 17...♘d7!? 18.♔f1 ♖fb8! creating pressure

on the b-file and at the same time getting the knight to f8 — a great defensive position.]

18.♔f1 A silent move with a very strong idea.

18...♘f7? Black doesn't pay attention...

19.♔e1! This was White's „secret „ plan. Suddenly, Black almost has no way to defend against ♖h4 next!

19...♘e8 [It wouldn't be very helpful to play 19...♘f6 20.♖h4 ♘xc5 21.♘xc5 White has total domination on the dark squares. Besides, the attack against the king should normally be enough for a full point.]

20.♖h4 ♖f6 Black is „just” holding, but how to finish him? Short continues the game in great manner.

21.b4! By putting the bishop on c5, White is bringing one more piece into the attack and the clouds around the Black king got a bit darker.

21...♔e5 22.♘c5 ♖fd6 To give an exchange would already be a success for Black, but the destruction of the Black position continues.

23.f4 Slowly, Black's pieces got no more moves...

23...♖f6 24.♖h7+ ♔f8 25.♖h3 ♘h7 is a nasty threat.

25...♔g8 26.e4! The last exact move. Black is losing material — a lot of it.

26...♘d7 Maybe it was a good moment for Salem to resign, but the game continues. [26...♖xd3 27.♚h7+ ♔f8 28.e5 and the Black queen is trapped on f6.]

27.e5 Winning a piece.

27...♘xe5 28.fxe5 ♚xe5 29.♙xd6 And now White is a full rook up.

29...♖xd6 30.♘e2 Finally it was enough for Salem to resign. A really great positional victory with some tactical motives. Such games are fun to play, from the White side :).

Endgame section

(15) Fressinet, Laurent (2700)
– Guseinov, Gadir (2628) [E94]

World Cities Team KO Al-Ain UAE (1.2), 25.12.2012

[Chess Evolution]

White is a clear pawn up in a knight endgame. This, of course, gives White a clear advantage, but on the other hand, the „extra“ pawn is a doubled one on the a-file, which gives Black some realistic drawing chances. Let's take a look if, in this endgame, the rule that says, „knight endgames are the same as pawn endgames“ can be applied.

37. ♖xc5 ♜d5? This logical move already is a serious mistake. [The right choice for Black would have been to play 37... ♖f5! 38.g3 h5! trying to block White's pawn structure. Now, if White plays 39. ♖f2, h4 is coming, and in case of 39.h4, White will not be able to get a free passed pawn on the kingside that easily. The position should give Black very good chances to draw.]

38.g3 ♖e7?! And Black is acting too slowly once again. [38...h5! with the already known idea of playing h4 should be the right decision.]

39. ♖f2 White is in time to play ♖f3 against Black's h5-h4.

39... ♜c3 40. ♖e3 White's winning idea is to get a free pawn on the kingside, in order to force the Black king to hold it, and then get his own king to b7 and capture the a7-pawn. It doesn't sound that easy, but Fressinet will show us how to do it very nicely.

40...h5 Too late...

41. ♜d3! Good move! By bringing the knight to e5, White is forcing the Black knight to go back to e7. Otherwise, one of the Black pawns, on g6 or c6, will fall.

41... ♖d6 42. ♜e5 ♜d5+ 43. ♖e4 ♜e7 White has obtained the maximum out of the position, but what next?

44. ♜d3! I like this move a lot. Of course, 44.g4 would have been a good choice as well, but why to give Black any chance to play ♖c5-♖b5?

44... ♜f5 Black has no other choice than to be passive.

45.g4 hxg4 46.hxg4 ♖e7 47.a6! Another good move. White is not in a rush to play f5, and to fix the Black pawn on a7 can be very useful.

47...c5 Black's only chance lies with the c-pawn, but it can't go too far...

48.♞e5 Another exact move by Fressinet. White takes his knight to c4 before starting the final stage of his plan with f5.

48...♔c7 49.♞c4 Of course, no ♔b6 for Black.

49...♔c6 50.a4 And no ♔b5 either.

50...♞d5 51.♔e5 ♞c3 Black's knight is active, but by capturing the a4-pawn, nothing major changes. White's a6 pawn is still alive and White has time to get a free pawn on the kingside.

52.g5 It seems like the game is completely over, but Black keeps on fighting.

52...♔d7 53.♔f6?! After showing very good technique in the last 13 moves, White doesn't choose the most precise way to finish the game. [53.♞b6+! would end the game in nice style. 53...♔d8 (53...♔c7 54.f5) 54.f5! Black can't stop White from playing ♞c8-♞xa7 any longer. 54...gxf5 55.g6 ♔e8 The Black king needs to leave the c8 square unprotected. 56.♞c8 and the a7 pawn is falling. Black can resign.]

53...♞d5+ 54.♔xg6 ♞xf4+ 55.♔f5 ♞h5 The position looks quite winning, but a few exact moves are still needed. Black wants to give up the knight for the g-pawn and after taking the king to d5, move fast with the c-pawn in order to have enough time to capture both of White's a-pawns.

56.♔e5 ♔c6 57.g6 ♔d7

58.♞b6+ ♔c6 59.♞c4 ♔d7 60.♞b6+ ♔c6 Of course, White will not repeat the position 3 times...

61.♞d5 It's funny, but almost any move seems to win at the end, but in a practical game, I guess Fressinet was a bit afraid of miscalculating something.

61...♞g7 62.♞e7+ ♔d7 63.♞d5 ♔c6 64.♞f4 Finally White found a concrete way to finish the game. By placing the knight on f4, White is taking away the square h5 from the Black knight, while the White king is going over e7 to b7.

64...♞e8 65.♔e6 c4 66.♞e2 ♔c5 [Also loses 66...♞g7+ 67.♔f7 ♞h5 68.♞f4! A small but very nice tactic. 68...c3 69.♞e2! and White is winning the c-pawn!]

67.♔d7 Finally, the White king reaches its final destination.

67...♞f6+ 68.♔c7 ♞e8+ 69.♔b7 ♔d6 70.♞c3 All in all, a great example of how to win a better/ winning end-game. There is no reason to hurry the win and it's very important never to lose control over the position!

1-0

(16) Tiviakov,S (2663) – Romanov,E (2616)

World Cities KO, 26.12.2012

[Chess Evolution]

White has a winning endgame, but the technical part is not obvious at all. The main problem is the wrong corner square on a8. If Black succeeds to sacrifice his bishop for the f-pawn, they can immediately agree to a draw.

46.a6 ♖c6 47. ♙e3 Sooner or later, White has to play this move to deprive Black from the ♖b6 possibility. [47. ♖g2!? was a tricky start. The point is that 47... ♖b6 loses to 48. ♙a5+! +- a cool trap.]

47...h5 48. ♖g2 ♙d8 Black had to allow f4 sooner or later, as White was intending to play ♖h3-h4, collecting the h5 pawn. [48... ♙d6 49. ♖h3 ♙e7 50.f4 transposes to the game.]

49.f4 White has to advance his pawns as far as possible.

49...♖c7 50.f5 ♖b8 The Black king remains ready to collect the a-pawn. This means that it must be able to play ♖a7 or ♖b6 at any moment, when the bishop leaves the g1–a7 diagonal.

51. ♖h3! The start of the winning plan. White can only make progress if he advances his f-pawn. But in order to do this, he must send away the d8 bishop from its diagonal. [51. ♖f3 ♖a8 52. ♖e4 doesn't make sense, as White can never push f6 with the bishop on d8.]

51...♙a8 52. ♙f2! With the idea of ♙h4.

52... ♙f6 53. ♙h4 ♙c3 White seems to get nowhere with his brilliant idea, since the Black bishop still controls the f6 square and Black already wants to collect the a6 pawn. However by sending away the bishop from the right diagonal, White can advance his king to h4.

54. ♙g5! ♖a7 [54... ♙e1 doesn't help. 55. ♙e3 preventing ♖a7 and the threat is f6-f7. 55... ♙c3 56. ♖h4 wins.]

55. ♖h4 ♖xa6 56. ♖xh5 ♖b7 It's very useful to remember this position. It seems to be dead drawn, but actually White can promote his pawn using clever maneuvers with his bishop.

57. ♔g6 ♕c6 58. ♖h6! The first step is to play ♖g7, which allows f6-f7.

58... ♕d7 59. ♖g7 ♖b4 60.f6 ♔e6 61.f7 ♖d6 Black still seems to be in control. The question is how to send away the bishop from the a3-f8 diagonal. The answer can be quickly found, White must drive his king to g8 and play ♖f8!

62. ♖h6! Preparing for ♔g7-g8, Black can't parry this.

62... ♖b4 63. ♔g7 ♕f5 Black transfers his king to g6, but it doesn't help. [Waiting with 63... ♖c5 doesn't change the final outcome 64. ♔g8 ♖b4 65. ♖f8 ♖d2 66. ♖c5 ♖h6 67. ♖d4! followed by ♖g7, and the pawn promotes. That is why Black preferred to have his king on g6.]

64. ♔g8 ♕g6 65. ♖f8 ♖c3 [65... ♖d2 leads to the same. 66. ♖d6 ♖h6 67. ♖e5! +- Black is in zugzwang. He must allow ♖g7 with a king move.]

66. ♖a3 ♖g7 67. ♖c1! Black resigned as he found himself in another zugzwang. An instructive endgame!

1-0

Clash of the Titans

(17) Botvinnik, Mikhail — Bednarski, Jacek B [E87]

Palma de Mallorca Palma de Mallorca (8), 1967

[Balogh Csaba]

We'll see a nice positional win by Botvinnik against a King's Indian structure.

1.d4 g6 2.e4 ♗g7 3.c4 d6 4.♘c3 ♘d7 5.♙e3 e5

6.d5 White obtains the space advantage, a typical drawback of the opening. Black has to create active counterplay, which is usually connected to the f5 move. It doesn't work right away because of exf5, and ♖h5 wins the pawn. However, a logical plan could have been ♗h6, trading the bad g7 bishop.

6...a5 7.♙d3 ♘c5 The dark-square d bishop is a key piece in the position, so Black never needs to be afraid of the doubled pawns arising after ♗xc5.

8.♙c2 This was the last moment to play ♗h6.

8...♘f6 9.f3 Preventing ♘g4, the g1 knight develops to e2.

9...0-0 10.♙d2 ♘h5 11.♘ge2 f5

12.0-0-0! Very good decision. On the queenside, Black has no chance to create an attack against the king. White can decide on which flank he wants to play. In some positions, exf5 gxf5 g4 might lead to a dangerous attack, but despite being castled queenside, the b3-a3-♙b2 and then b4 plan seriously comes into consideration as well.

12...fxe4 By giving up the tension, Black admits his disadvantage from the opening, but his position was already worse.

13.♘xe4 ♘xe4 14.♙xe4! ♙f5 [14...♘f6 was more logical, although White is better after 15.♘c3 ♘xe4 16.♘xe4 followed by h4-h5. The g7 bishop is a really bad piece now.]

15.♘c3 ♘f6 [15...♙xe4 16.♘xe4 +=]

16. ♗g5! Botvinnik had a clear picture in his eyes. He wanted to get a position with a strong e4 knight against the poor g7 bishop.

16... ♖d7 17. ♗xf6 ♗xf6 18. ♔b1 Leaving from ♗g5. Just in case.

18... ♖e7 19. ♖e2 ♗g5 20. ♖e1 White has found the right plan, to play h4-h5! [20.g3 was also possible with the same idea.]

20... ♖g7 21. h4! ♗e7 22. ♖e3 White is not in a hurry to push h5. First, he improves his queen.

22... ♖f7 [22...h5 would increase the chance for a successful attack. 23. ♖dg1 and g4 next.]

23. h5 ♖f6 [Avoiding the opening of the h-file with 23...g5?! would lead to positional disaster on the light squares, as Black can't take back on f5 with the g-pawn anymore.]

24. hxc6 hxc6 25. ♖h2 Black can't allow the doubling of the rooks. He is forced to exchange a pair of them.

25... ♖h7 26. ♖xh7 ♔xh7 27. ♖h1+ ♔g8 28. g4! Forcing Black to exchange the bishop. White has achieved his aim and got a typical huge advantage with a good knight versus the bad bishop.

28... ♗xe4+ 29. ♘xe4 [Actually, in this concrete position 29.fxe4 might be even stronger. 29... ♖f8 30. ♖h3 ♖g7 31. ♘b5 ♗d8 32. g5 The game is over, Black is practically in zugzwang, as he can't take on g5 32... ♗xg5 because of 33. ♘xc7! ♖xc7 34. ♖h8+ ♔f7 35. ♖h7+ +-]

29... ♖g7 White's position is clearly better, but still not easy to win. Botvinnik tries to provoke new weaknesses. [The endgame after 29... ♖f4 30. ♖xf4 exf4

31. ♔c2 is also pretty much hopeless in the long run. White's king goes to a4, followed by, for instance, a rook transfer to b3, forcing crucial weaknesses with b6, after which the king penetrates on b5-c6.]

30. ♖b3! Creating holes on the light squares, just as in the previous line with 29... ♖f4. After b6, all the endgames will be easily won for White.

30...b6 31. ♖a4 Trying to penetrate on d7.

31... ♖f8 32. ♖h3 ♗d8 33. a3 Opening the back-rank, just in case! White can do whatever he wants. Black can only passively wait for his destiny. Still, it's not easy to break through.

33...♔f7 34.♕c2 ♖g7 35.♙a2 ♔f7 36.♕h2 ♔g8
37.♕h1 ♖f4 38.♖h2

38...♖f8 White has to mobilize his last „unemployed” piece on the board. The king is coming to defend the f3 pawn in order to free the rook and the queen.

39.♙b1 ♖f4 40.♙c2 ♖f8 41.♙d3 ♖f4 42.♙e2 ♖f8 The next moves are good from a practical point of view. White is not in a hurry at all, he makes some seemingly senseless moves and meanwhile, he is looking for the winning plan.

43.♖h3 ♖f4 44.♙b3 ♖f8 45.♖h6 ♖f4 46.♖h2 ♖f8 47.♕g2 ♖f4 48.♕h3 ♖f8 49.♕g2 ♖f4 50.♕h1 ♖f8 51.♖h6 ♖f4 It's time to make a decision.

52.g5!! A committing move, giving up the f5 square and creating a potential target for the poor bishop. However, White wants to occupy the h3-c8 diagonal with the queen and as we'll realize, despite the fact that Black can temporarily close it with ♖f5, he finds himself in zugzwang.

52...♖f8 ♕h3 is always possible, but Botvinnik wants to play it only when the rook goes to f5.

53.♕h4 ♖f4 54.♕g3 ♖f8 55.♕g4! ♖f5

56.♕h3! Here is the zugzwang! The rook can't move because of ♕e6, and against any king or queen moves, ♖h5 wins. So, there's only one move left.

56...♙e7 but now

57.♖g3! ♖xg5 [57...♙xg5 58.♖xf5 gxf5 59.♖h5 +- is also hopeless. 59...e4 leads only to a few checks. 60.♕xf5 ♕b2+ 61.♙f1 ♕c1+ 62.♙g2 +-]

58.♕e6+ ♙f8 [58...♕f7 is refuted by 59.♖h8+! ♙g7 60.♖h7+! +-]

59.♕c8+ ♙f7 60.♖h8! And Black is forced to sacrifice his queen to prevent the threatened ♕e6 mate.

60... ♔xh8 **61.** ♔xh8 ♖xg3 **62.** ♔f2! The last precise move to deprive Black from any kind of counterplay with e4, and taking the b3 pawn. Black resigned because of the upcoming ♔c8 move.

1-0

Editorial Preface

Most of the chess events were played over Christmas and New Year, and next week the Tata Steel Tournament is starting. In the mean time, we are in a sort of “chess pause”. Just a few Opens are going on and non of the very Top chess players seem to be active...

The Hastings Open was won by Gawain Jones with 7,5/9. Bosnjaci had 2 winners: Delchev and Sedlak shared the first place with 7/9. Vandoevre-les-Nancy was slightly surprisingly won by A.Wirig,I with 7,5/9 points as well.

A few words about Tata Steel: I guess that, right now, it's THE event of the Year. A round robin tournament with 14 players is nowhere else to find, which makes the A group extremely interesting. Having Carlsen, Aronian, Karjakin, Anand and Nakamura in the tournament, competing against L'ami, Hou Yifan, Sokolov, Van Welly and Giri gives an amazing contrast and a lot of fighting games. Also, the B group with an average of about 2630 ELO and the C group with a lot of young and talented players make Tata Steel probably the most spectacular event of the Year. Next to the Top events, a lot of small opens for club players are on the way. So, if You have time, Wijk ann Zee is definitely a place to visit (except for the weather — rain, rain and rain)

In the next issue of CEWN You will already be able to find Fresh annotated games from the Tata Steel with Your “up to date” commentator from Holland, and at the same time participant of the B group, Arkadij Naiditsch J.

As usual, we wish You a lot of chess fun with the current issue of CEWN, the Nr 46.

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Jones, Gawain C B (2644)
— Panjwani, Raja (2402) [E33]

88th Hastings Masters Hastings ENG (3.4), 30.12.2012

[Arkadij Naiditsch]

Let's take a look at a short win by the Hasting Masters champion, Gawain Jones.

1.d4 ♘f6 **2.c4** e6 **3.♘c3** ♙b4 **4.♙c2** The Nimzo with 4.♙c2 has been a popular opening, at least for the last 70 years!

4...♘c6 A relatively rare move. In my opinion, White is doing a bit better here. The main lines are 4...d5 and 4...0-0.

5.♘f3 d6 Black's idea is to exchange the bishop on b4 and to play e5 closing the center, which would make White's bishop pair not that effective.

6.♙d2 White doesn't hurry with a3 and prepares to take with ♙xc3, which would bring the bishop to a nice square.

6...0-0 **7.a3** ♙xc3 **8.♙xc3** ♖e8 **9.e3** Until here, everything is known.

9...♙e7?! This move looks strange to me. Of course, Black had to play the logical 9...e5, and after 10.♙e2, White has a small plus.

10.♙e2 a5 To block the b4 move is not a bad idea.

11.0-0 a4?! This already is too much. Black should have finally played 11...e5, even though White is doing clearly better after 12.d5 ♘b8 13.b4.

12.d5! Good move by White! Enough is enough! It's time for some action.

12...♘d8 [12...exd5 13.♙xf6 ♙xf6 14.cxd5 is, of course, very bad for Black.]

13.♙fd1 Another good move by White, keeping all the options open. By keeping the pawn on d5, White is completely paralyzing Black's knight on d8.

13...♘d7 [13...e5 14.♘d2 followed by e4 and Black almost has no moves. The knight on d8 is very badly placed. It should be on b8 to be able to play ♘d7-♘c5.]

14.♙d3 A slightly strange move to me. [14.♘d4 seems to be logical and good. White is clearly better.]

14...h6 **15.dxe6?! After this move White is still doing better, but why to allow the Black knight to leave d8?**

15...♘xe6 **16.♘d4** ♘dc5? This allows White to reach a winning attack. [16...♘f6 would have been almost the only move to continue. Things are looking bad for Black, but there's still a lot of fight. White is „only“ doing better because of the bishop pair.]

17. ♙h7+! A sudden and lethal strike.

17...♔f8? Yet another mistake by Black. [17...♔h8 would have been the right direction. 18.♘f5 ♕f8 19.♘xh6 It seems like White won a pawn, but... 19...f6! An amazing move which is very hard to find during a practical game. Black is more or less still fighting now.]

18. ♖f5 ♔d8 Now the Black queen will be very badly placed on d8, facing White's rook on d1.

19.f4 Nice move. White is putting more pressure against Black by securing the e5 square in case of $\text{♞d7}-\text{♞e5}$.

19...g6 Another unlucky move by Black that ends the suffering in a nice way.

20. ♙xg6! A beautiful move.

20...fxg6 21. ♖xh6 The idea is that Black can't do anything against ♔xg6 next!

21...♔e7 22.♖xg6♜f8 White has 3 pawns plus a mating attack — it's the end...

23.f5 The winning move.

23...♔e8 24.f6+ ♚d7 25.f7 I guess that Black should have resigned by now, but the game goes on.

25...  **e7** **26.**  **f6** The Black queen is trapped!

26...**f4 27.****f5+ e6 28.****xf4** White is 3 pawns up and has a mating attack.

28...  **e4** **29.**  **g7** This was too much even for Panjwani.
A nice game that shows how not to play with Black...

1-0

(2) Grachev, Boris (2688)
– Vajda, Levente (2603) [E69]

Basel SUI Basel SUI, 03.01.2013

[Csaba Balogh]

The decisive battle for the first place in the New Year Open in Basel.

1.d4 ♘f6 **2.c4** g6 **3.♘c3** ♙g7 **4.g3** 0–0 **5.♙g2** d6 **6.♘f3** ♘bd7 [Recently, the lines with 6...♘c6 7.0–0 a6 are more popular, but of course, the text move is another huge main line.]

7.0–0 e5

8.e4 c6 **9.h3** White usually develops his bishop to e3 and this move is prophylactic against ♘g4. We are still at just the beginning of theory...

9...a6 [9...♙b6 is the main line.]

10.♙c2 Grachev deviates from his own game; before, he had played 10.♙e3.

10...b5 **11.c5!** This is a known motif in the King's Indian g3 system. White tries to undermine the central pawns until they are not supported by the pieces. On the other

hand, we must always think twice before making such moves, because one mistake in the calculation might immediately give Black the advantage.

11...♘e8! [On 11...exd4 the point is that after 12.♘xd4 dxc5 13.♘xc6 ♙c7 14.e5! Black is in trouble.; 11...dxc5 12.dxe5 ♘e8 also has a direct refutation. 13.♙g5! On 13...♙c7 (13...f6 14.exf6 ♙xf6 15.♙f4 ± is very bad for Black, as he collapses in the center.) 14.♙e7! wins an exchange!]

12.d5 This is new, but it drops the advantage against Black's best reaction. [12.♙g5 happened in the previous games. 12...f6 13.♙e3 dxc5 14.dxc5 White is slightly better with the space advantage. Later on, he must play on the queenside with b4 and a4.]

12...cxd5?! Missing the chance. [12...dxc5?! doesn't equalize either. The concrete reason is: 13.dxc6 ♘b6 14.♙d1! and Black must move into ♘d5 14...♙c7 15.♘d5 with a big advantage. 15...♙xc6? 16.♘e7+; However 12...♙b7! would have gotten an even position. White can't hold his center and after the exchanges, Black has no problem at all. 13.dxc6 ♙xc6 14.cxd6 ♘xd6 15.♙d1 ♙e7 =]

13.c6! White obtains a very dangerous protected passed pawn.

13...♘df6 [13...dxe4 loses a piece. 14.cxd7 exf3 15.dxe8 ♔! This is the right way to take. (15.dxc8 ♔ ♖xc8 16.♙xf3 b4!) 15...♖xe8 16.♙xf3 ±]

14.♘xd5 ♘c7 [14...♘xd5 15.exd5 ♘c7 16.♖d1 transposes to the analysis of the game.]

15.♖d1 [15.♘xf6+ might be even stronger. White can create a very strong pressure against the d6 pawn, while Black has no access to c6. 15...♙xf6 16.♖d1 ♙e6 17.♙e3±]

15...♘cxd5 I don't like this move at all. Black should have kept his c7 knight as a good blockader of the passed pawn. [Although, after 15...♘fxd5 White is also clearly better. 16.exd5 ♙f5 (16...f5 looks active, but doesn't lead anywhere. White can simply continue his plans on the queenside. 17.a4! f4 (17...e4 18.♘d4± 18...♘xd5? 19.♔b3) 18.g4!±) 17.♔e2 ♙e3 and a4 are coming next. Black has problems on the queenside.]

16.exd5 ♖e8 The c6 pawn is very nice of course, but it doesn't win the game. White must open another „battlefield“, and it should be on the side where he is clearly stronger.

17.♙e3 [The move 17.a4! suggested itself. 17...b4 is met with 18.a5! and ♙e3-b6 next. The b4 pawn will fall soon.]

17...♙f5 18.♔b3 ♔c8 19.♔h2 ♙e4 20.♖ac1 Sooner or later, White should play a4. He decides to improve his position to the maximum before doing that, as he believes Black can't do anything useful.

20...♔c7 21.♘d2 Exchanging the only active piece is again a logical approach.

21...♙xg2 22.♔xg2 h6

23.♘b1! Nice maneuver. White wants to play ♘c3 followed by a4!

23...♖eb8 24.♘c3 [It might be more circumspect to play 24.a3 to prevent the counterplay that occurred in the game, followed by ♘c3.]

24...b4!? It was enough of waiting passively. Black decides to look for counterplay, but it has a drawback as well — he weakens his own pawn structure.

25.♘a4 ♖b5 To harass the d5 pawn is in Black's mind.

26.♔c4! ♔a5 27.b3 Good calculation, because the d5 square is protected indirectly.

27...♖c8 [27...♘xd5? 28.♖xd5 ♖xd5 29.♘b6 +-]

28. ♖d2 White is ready to play ♖cd1 and the d5 pawn is still indirectly protected, although the line is more difficult this time.

28... ♔h7 [28... ♘xd5 29. ♖xd5 ♖xd5 30. ♘b6 Black has the pretty tactical blow

30... ♖c5! 31. ♘xc8!! (31. ♙xc5? ♖xc6 would be fine for Black.) 31... ♖xc4 32. ♖xc4 and the c-pawn decides the game. 32... ♙c7 33. ♘e7+! is the last key move! 33... ♙xe7 (33... ♔h7 34. ♘d5) 34. c7 +-; 28... ♖xd5 29. ♘b6 ♖xd2 30. ♘xc8 +- The c-pawn has no blockader.]

29. ♖cd1 ♖e8 How to improve the position? Grachev found a very clever plan — to transfer the knight to c4, where it'll be clearly better placed.

30. ♘b2! ♖c8 [30... ♙xa2? would be too greedy. 31. ♘a4 ♙a3 32. c7! ♖c8 33. ♘b6 +-]

31. ♔h2 Approaching the time trouble.

31... ♖e8 32. ♔g2 ♖c8 33. ♔h2 ♖e8 34. ♙h4! Another great move! White frees the the c4 square for the knight and creates a small tactical threat with ♙xh6 as well.

34... ♘h5 [34... ♖xd5 has a nice refutation: 35. ♖xd5 ♘xd5 36. ♘c4 ♙b5 37. ♘xd6 ♙xc6 38. ♖xd5! (But not 38. ♘xe8 ♘xe3! 39. ♖xe3 ♙c2+) 38... ♖e6 and the final blow is (38... ♙xd5 39. ♘xe8 +-) 39. ♘xf7! ♙xd5 40. ♘g5+ ♔g8 41. ♘xe6 ♙xe6 42. ♙xb4 +- with a winning endgame.]

35. ♘c4 ♙c7

36. a4! Excellent positional move, based on good calculation.

36... ♖xa3 [36... ♖bb8? would be hopeless. 37. a5 +- ♙b6 next.]

37. ♘xa3 ♖a5? This loses to a nice tactical blow! [37... ♖xb3 was the only move. 38. ♙a4 ♖eb8 39. ♖d3! seems to be strong. (In case of the most logical 39. ♙xa6 Black gets some counterplay on the kingside with 39... f5) 39... ♖3b4 40. ♙xa6 f5 and the difference is that White has 41. ♙d2! leaving from the f4 tempo and going to a5, sending away the last blockader.]

38. ♔b4! It seems like this blunders a piece after ♖b8, but...

38... ♖b8 39. ♕b6!! White actually wins an exchange.

39... ♖xb6 [39... ♖xb6 40. ♖xb6 ♖xb6 41. ♘c4 ♖bb5 42. ♘xa5 ♖xa5 43. ♖c2 +- There is no way to stop the pawn.]

40. ♖xa5 ♖xc6 Black at least succeeded to eliminate the most dangerous pawn, but his position remains hopeless — he's an exchange down.

41. ♖xc7 ♖xc7 42. ♘c4 ♕f8 43. ♖a2 ♘f6 44. ♖xa6 ♘e4 Black doesn't have enough pieces to create counterplay. The rest is a matter of technique.

45. ♔g2 ♖b7 46. ♖e1 f5 47. ♘a5 [47. ♖b6 ♖a7 48. ♖e2 +- was also good, followed by advancing the b-pawn.]

47... ♖b5 48. ♖c1!? White decides to create a mating net, which combined with the dangerous b-pawn, should be enough to decide the game.

48... ♖xd5 49. ♖c7+ ♔g8 50. ♘c4 The White rooks are ready to occupy the 8th rank.

50... f4 51. gxf4 exf4 52. ♖a8 ♖g5+ 53. ♔f3 d5 54. ♘b6 ♘d2+ 55. ♔e2 ♘xb3 Black managed to get rid of the b-pawn, but it's not enough to save the game. The knight will find itself trapped soon.

56. ♘d7 ♘d4+ [After 56... ♖f5 the prettiest way to win is 57. ♔d3 ♖f7 58. ♘xf8! ♖xf8 (58... ♖xc7 59. ♘e6+ +-) 59. ♖a3! ♖b8 60. ♖c3! +- and the knight is lost!]

57. ♔d3 ♘e6 58. ♘f6+ and ♖h7 next.

1-0

(3) Krasenkow, Michal (2628) – Volodin, Aleksandr (2506) [A70]

Rilton Cup 2012–13 Stockholm, 04.01.2013

[Csaba Balogh]

We'll see a nice positional game by the tournament winner.

1. d4 ♘f6 2. ♘f3 c5 3. d5 d6 4. c4

4... b5 Black would like to transpose to the Volga/ Benko gambit, but in this move order, White has some alternatives to obtain a positional advantage without accepting the pawn sacrifice.

5. ♖c2!? with the idea of occupying the center after e4. [5. cxb5 a6 6. bxa6 ♕xa6 transposes to the main lines of the opening.]

5... g6 6. e4 bxc4 7. ♕xc4 The c4 square became an excellent outpost for the minor pieces. Black should try the pieces there, but White has both knights as a reserve to occupy it.

7... ♕g7 8. 0-0 0-0 9. h3 A useful move against ♕g4, and to open the back rank as well. It's Black's turn to find a plan.

9...♘a6 [9...♞fd7 is also typical in these positions, but it doesn't lead to equality either. 10.♙d2! trying to exchange the strong dark-squared bishop on g7. In my opinion, White should have tried this plan in the game. 10...♞b6 11.♙e2 ♘a6 12.♙c3! followed by taking control over the c4 square with ♞a3 and ♞d2. 12...♙xe2 13.♚xe2 +=]

10.♞a3! The d2 square had to be left alone for the other pieces.

10...♙xc4 It helps White to occupy the ideal square with tempo, but on the other hand, Black could not finish the development with the b8 knight before taking on c4.

11.♞xc4 ♞bd7

12.♙g5 This is not the right plan. Krasenkow wanted to force a weakness on h6 before driving his bishop to c3, but Black is not forced to send it away. [12.♙d2 seems to be stronger with the main idea of playing ♞a5-a6. Black has to prevent this threat by 12...a5 but this is a weakening move, which might be telling later in the middlegame. (12...♞b6 13.♞a5 +=) 13.♙c3 += and ♞fd2 next, with an advantage.]

12...♞b6 13.♞fd2 ♞xc4 14.♞xc4 ♞d7! Consequent and strong. Black is trading the minor pieces on c4. He gets close to equality, but as we'll see, he still didn't reach it completely.

15.♚ab1! Preparing for the following actions on the b-file.

15...♞b6 16.b3 Krasenkow wants to take back with the pawn on c4 and obtain a marginal advantage. [16.♞a5 didn't work tactically this time. 16...♞xd5! 17.♞c6 and Black has the elegant intermediate move 17...♞b4! counterattacking the queen.; However 16.b4! seems to be very strong. This is also quite a typical way to increase the initiative in such situations. 16...cxb4 17.♚xb4 ♞c8 18.♚b3 ♞xc4 19.♚xc4 ♞xc4 20.♚xc4 White has a small but stable advantage, because of the a7 weakness. Sooner or later, Black has to send back the g5 bishop to ease the pressure on the e7 pawn, but then it will be excellently placed on e3. Besides, the rook is coming to occupy one of the open files on the queenside. 20...h6 (20...♚d7 21.♚c1 +=) 21.♙e3+=]

16...♚d7 [16...♞xc4 17.bxc4 will be the same as in the game.]

17.f4 I'm not sure at all if this plan with f4-f5 is the best in the position, but in the game it perfectly paid out.

17...♞xc4 18.bxc4

18... ♖ab8 Black has reached full equality now, but with his next two moves, he gives back the initiative again.

19.f5 ♗e5?! [19... ♖b6 was very logical. White must either allow to double the rooks or to strengthen the pawn structure with axb6. This is a known motif in fighting for a file. Probably, White should do the same with ♖b3 and ♖fb1 and soon they will agree to a draw.]

20. ♗h6 ♗g7? After this move, White wins the fight for the b-file. [20... ♖fc8 should have been played.]

21. ♗xg7 ♖xg7

22. ♖b3! Because of the ♗b2 threat, Black must give up the control of the only open file.

22... ♖xb3 23. ♗xb3 ♖c7 24. ♖b1 ♗a5 Black is looking for counterplay, but White easily neutralizes the active attempts.

25. ♗c2 White covers all the invading squares.

25... ♖c8 [25... ♗c7 is met with 26. ♖b5! += consolidating the b-file.]

26. ♖f2! White wants to play ♖b7 and takes the e1 square under control.

26... ♗a6 Only temporarily prevents the threat. [26... ♖c7 is not advisable, since after 27. ♖b8 the c7 rook is dead.]

27. ♖b5 ♗a3 28. ♖b7 ♖e8 White is better, but Black doesn't have too many weaknesses and the queen is always ready to find counterplay. Before starting any concrete plans, Krasenkow, as a strong practical player, reaches the time control at move 40.

29. ♖b3 ♗a4 30. ♖e2 White takes his king to d3 in order to free his queen from protecting the c4 pawn. However, the king might get vulnerable there, so he changes his mind soon.

30...f6 31. ♖d3 ♗d7 32. ♖e3 ♖f7 33. ♖f2 ♗a4 34. ♗e2 ♖g8 35. ♖g1 ♗a6 36. ♖h2 ♗c8 [It would be interesting to know how White was intending to increase the advantage if Black continues his waiting policy with ♗a4-a6, keeping the c4 and a2 pawns always under attack. 36... ♗a4 37.h4 ♗a6 38.h5 is a possible plan, but Black can react with 38...g5 39.h6 ♖c8 when ♗h5 is not a threat at all.]

37. ♗g4 ♖f8? [37... ♖g7]

38. ♔f4 [White could have obtained a winning pawn end-game by force: 38.fxg6! ♕xg4 39. ♖b8+! ♔g7 40. ♖xg8+ ♕xg8 41.gxh7+! 3 intermediate checks before recapturing the queen. 41...♔xh7 42.hxg4 ♕g6 43.♔g3 ♕g5 44.♔f3 ♕h6 45.♔f4 ♕g6 and now, White has an extra tempo, which is enough to get Black into zugzwang! 46.g3 a6 47.a3 a5 48.a4 +- and Black must allow ♔f5, which means the end of the game.]

38... ♖g7 [38...♔g7 was probably the way to defend.; 38...g5 is not good, because after 39.♕g4 and ♕h5, White can always undermine the g5 pawn with h4.]

39.a4!! A great move! White wants to advance his pawn to a6 and penetrate with the rook on b7.

39... ♔f7 40.a5 ♖g8 What else to do?!

41. ♕h6! ♖g7 42.a6! Basically, the game is over, as Black can't take on a6. It was very instructive to see how easily White converted his small advantage.

42...gxf5 [42...♕xa6 is refuted by 43.♖b8 and Black can't prevent the threats. 43...♕a2 44.fxg6+ hxg6 (44...♖xg6 45.♖f8#) 45.♕h8 +-]

43. ♕h5+ ♔g8 44. ♕xf5! A spectacular final position. Despite the material equality, Black must resign the game.[44.♕xf5 ♕xf5 (44...♕xa6 leads to mate: 45.♕e6+ ♖f7 46.♖b8+ ♔g7 47.♕g4+ ♔h6 48.♖g8 and ♕h4 next.) 45.exf5 The rook endgame is hopeless, Black loses the a7 pawn. 45...♔f7 46.♖b7 ♖g8 47.♖xa7 +-]

1-0

(4) Loetscher,R (2395)
– Vachier Lagrave,M (2711) [D85]

Hilton Master Open 2013 Basel SUI (4.2), 03.01.2013

[Arkadij Naiditsch]

A huge difference in ELO finally made the result clear. However, White fought quite well during the first 25 moves. It's quite usual to see the young French Top GM not playing the best openings, getting a sort of slightly worse/unclear position and striking without mercy when it comes to tactics. Yes, Loetscher should have known better...

1.d4 ♘f6 2.c4 g6 3.♘c3 d5 Vachier is playing the Gruenfeld with Black in almost all of his games, and showing really fantastic results in it. If somebody that knows the reputation of the Gruenfeld tells him, this would be really bad news for the French :).

4.cxd5 ♘xd5 5.e4 ♘xc3 6.bxc3 ♙g7 7.♘f3 We are in the main line...

7...c5 White has a strong center, but Black starts to play quickly against the central pawns...

8.♖b1 This move is very well analyzed as well.

8...0-0 9.♙e2 ♔c7!? ♔c7 is clearly not the best, but we are getting into quite an unclear position and Black avoids all the theoretical lines. [9...cxd4 10.cxd4 ♔a5+ 11.♙d2 ♔xa2 12.0-0 This is the main line. The current evaluation is about equal, with a lot of forced draws. It's quite clear that Maxime didn't want to give his opponent any chances for a „gift“, like a forced draw out of the opening.]

10.0-0

10...b6 Black has to develop his bishop somewhere, and b7 is a standard place. Another option could be to play 10...♙g4, but Maxime wants to keep as many pieces on the board as possible.

11.♙g5! Good move by White! The bishop on g5 takes a perfect position for the future battle. Another logical move like 11.♙e3 could be an option too, but 11.♙g5 is usually a better place.

11...♙b7 12.♔d3! Another very good move by White. White is bringing the queen to e3, where it will take a perfect position. White wants to play d4-d5 next.

12...e6 Almost the only way to avoid White's d5, but now the dark squares are getting weaker...

13.♔e3 ♘d7 14.e5! Loetscher chooses a strong move once again. By fixing the structure, White is clearly going to develop his play on the kingside with ♙h6-♔f4-♔h4-♘g5, for example. Black's pieces are standing a bit passively and White has more space. White is doing a bit better here and wants to play ♙h6 next, with a bishop exchange that would weaken the Black king even more.

14...♖fc8 Black wants to play cxd4 cxd3 and ♔c3 trying to exchange the queens. At the same time, against White's ♕h6, ♕h8 is possible now.

15.♖fc1 A logical move, but White's plan should be to play on the kingside, so why did he take the rook away from f1? I think 15.♖bc1! would be a better option now.

15...♖ab8

16.h4 A logical move, creating „air“ for the king, and at the same time, preparing to play h5.

16...♕d5! Very strong move by Maxime. It wasn't easy to find a clear idea with Black, but with 15...♕d5, he's giving White the responsibility to take decisions.

17.♕a6 [In case of 17.a4 cxd4! 18.cxd4 ♔b7 we see that the bishop made space for the queen on b7! By exchanging both rooks, Blacks should be doing fine. And if White needs to play 19.♖e1 — well, it's hard to imagine that by losing a tempo like this, White could reach any advantage.]

17...♖f8 18.a4 White managed to avoid Black's main idea, but now...

18...♖be8! What a surprise. After not being able to create counterplay on the queenside, Black suddenly switches to another plan — to play f6 next! The game is starting to get sharp. If White can avoid Black's f6, he should be much better, otherwise, Black is good!

19.♖e1? This move doesn't stop Black from playing f6 at all... Meanwhile, White had a lot of nice options. [Another bad choice would have been to play 19.h5 f6 20.exf6 ♘xf6 and Black is again very active.; But why not to play 19.♕b5! This almost stops Black completely from playing f6, and in case of 19...♕c6, f6 is by far not that effective without the bishop on d5...]

19...f6! Of course... The beginning of White's fall.

20.exf6 ♘xf6 21.♕f4 [In case of 21.♗e5 ♗e4 seems to be very strong.]

21...♖e7 22.♕g5 It's strange, but to play with White is super difficult here. Black just wants to get active and White's pieces somehow are standing in very unlucky places.

22...cxd4! Another very good move by Black.

23. ♖xd4 [After 23.cxd4 h6! White can't take on h6 because of ♗g4. 24. ♕xf6 ♖xf6 White's position is still solid, but Black is doing better.]

23... ♖f7! Another great move by Black who is playing in a very dynamic way — this fits perfectly with the position. Black wants to play ♗g4 or e5 next.

24.f3 Stopping ♗g4, but not e5.

24...e5 25. ♗b5 ♖e6 As we can see the position got very sharp, but I feel that Black's pieces are much better placed. White's bishop on a6 is completely out of play, and the knight on b5 is not in perfect shape either. Black wants to play e4 next.

26. ♖bd1?! Does this move stops Black from playing e4?! [White had a very strong option: 26.c4! would get White back into the game. 26... ♕xc4 27. ♖bc1! White is getting great counterplay over the c-file by playing ♖c7, and in case of 27... ♕xb5, 28. ♕xb5 followed by ♕c4.]

26...e4! White's position is falling apart...

27. ♗d4 This move loses against the next tactical blow. [It doesn't help to play 27.f4 h6 28. ♕xf6 ♖xf6 and Black is much better.]

27...exf3! The winning blow...

28. ♗xe6 ♗g4 This is Black's key idea! He not only attacks the queen on e3, but threatens to play f2 as well...

29. ♗xf8 f2+ 30. ♖h1 ♗xe3 31. ♖xe3 ♕xf8 After the exchanges, White has 2 squares for the Queen, which is not bad, but the f2 pawn makes his life pretty hard.

32. ♕f1 h6! Exact until the end. White's king is in a lot of danger as well. Black always had in mind that the h4 pawn could fall very easily.

33. ♖e5 ♕b3 This finishes the game on the spot...

34. ♖d8 hxg5 35. ♖ee8 White achieved a bishop endgame — but with 2 pawns down...

35... ♕xa4 36. ♖xf8+ ♖xf8 37. ♖xf8+ ♖xf8 38.hxg5 a5 A nice game by Maxime, who is simply a better player!

0-1

Endgame section

(15) Istratescu,A (2654) – Grachev,B (2688)

Basel, 04.01.2013

[Chess Evolution]

It's really difficult to evaluate the following endgame. Probably, with perfect play, Black should be able to hold, but in a practical game White has better chances to win than Black to get a half point. The fact that there are 4 rooks on the board increases Black's defensive chances. For instance, if we take the c4 and b6 rooks off the board, the win would be fairly easy — White would bring his king to c4. The first move is principled, it creates a weakness on g2 in order to have some counterplay with the 2 rooks.

46...g5 [46...♖f6 with the idea of preventing White's plan — to transfer his king to c3 and free one of his rooks, for example with ♖c5. However, this allows 47.♖c5! when Black is forced to retreat his rook along the b-file, but this

would allow the advance b5 and Black must forget about playing g5 forever.]

47.hxg5+ ♔xg5 [47...♖xg5 was probably slightly better as the game will show. After 48.♖f4 giving shelter for the king against the rook's checks and preparing for ♔f2-e3, we get a very similar position to the game.]

48.♔f2 ♔h6 Freeing the g-file for the rooks. [48...h4? was quite principled as well, fixing the g2 weakness, but this is refuted by a subtle plan...

49.♔g1!! Suddenly, the White king is changing his mind as the h-pawn became a weakness. 49...♔h5 50.♔h2 ♖g5 To have ♖g3 on ♔h3, but this allows the activation of the b2 rook. 51.♖f2! ♖ff4 is a threat.]

49.♔e3 ♖g5 50.♖f4 ♖bg6 51.♖ff2! [51.b5 leads to an easy draw: 51...♖xg2 52.♖xg2 ♖xg2 53.♖b4 ♖g8 54.b6 ♖b8 55.b7 ♔g5 Black's king wants to collect the b-pawn, and after 56.♔d4 ♔g4 57.♔d5+ ♔g3 58.♔c6 h4 White's king is too far to catch the h-pawn.]

51...h4 [51...♖d6! would have been the right way to defend. The idea is clear, Black cuts the king. It's not easy to make progress now for White... 52.♗fd2 suggests itself, in order to send away the rook, but it's met with (52. b5 drops the pawn. 52...♗b6) 52...♗g3+! 53.♕f2 (53.♕f4 ♗xd2 54.♗xd2 ♗g4+ =) 53...♗xd2+! 54.♗xd2 ♗b3! Black successfully activated his rook and has no chance to lose. 55.♗d4 ♕g5 =]

52.♕d4 White's king reaches the pawn. Now it's very difficult for Black to defend.

52...♗d6+ [52...♗g4+ was probably the best try. 53.♕c3 (53.♕c5 ♗4g5+ 54.♕c4 ♗g4+ will be the same as 53.♕c3.) 53...♗g3+ 54.♕c4 ♗3g4+ 55.♕b3 ♗b6 56.♕a4 ♗a6+ 57.♕b5 ♗a8

I came to the conclusion that this is the best defensive setup for Black, when he's ready to harass both of the pawns, and also to give many annoying checks to the king. Probably he should be able to hold the draw this way, but he still needs to produce many only moves...]

53.♕c4 ♗c6+ 54.♕b3 ♕h5 [Being familiar with the defensive method in 52...♗g4, Black should have aimed for the same with 54...♗g3+ 55.♕a4 ♗a6+ 56.♕b5 ♗a8 although it remains very unpleasant after 57.♗fd2!]

55.♗bc2! ♗b6

56.♗c4! Now the game is objectively over. White succeeded to activate his rook and his king supports the b-pawn. Trading the g2 pawn for the h4 one is also a very good chance to win, as the Black king is too far from the b-pawn.

56...♗bg6 57.♗ff4! [57.♗c5!? was also very tempting, but probably only leads to a draw. 57...♕g4 58.♗e2 ♕g3 59.♕a4 and now (59.♗xg5+ ♗xg5 60.♕a4 ♗g4!! Only move! Black prepares for ♕h2 and prevents ♗e4! (60... ♕h2 loses to 61.♗e4! ♗h5 62.♗g4 +-) 61.♕a5 ♕h2 62.b5 ♗xg2 =) 59...♗xc5! (59...♕h2? loses to 60.♗xg5 ♗xg5 61.♗e4! ♕g3 (61...♗h5 62.♗g4 +-) 62.b5 ♗h5 63.♗e2 +-)

60.bxc5 ♖g4+ he uses the same motif to prevent ♜e4 after ♔h2. 61.♔b5 ♔h2 62.c6 ♜xg2 63.♜xg2+ ♔xg2 64.c7 h3 65.c8♖ h2 = Just in time with a theoretical draw!]

57...♜xg2 58.♜xh4+ ♔g5 59.♜h8 ♔f5 [I was trying to rush with the king to the b-pawn, but it runs into a different kind of mate net with the two rooks. 59...♔f6 60.b5 ♔e7 61.♜c7+ ♔d6 62.♜c6+ ♔d7 63.♜h7+ ♔d8 The only move to win is

64.♜a6!! with a ♜a8 threat. Still, Black has a brilliant idea to save the game. Unfortunately for him, it doesn't work. 64...♜2g3+! (64...♜xa6 65.bxa6 +- The pawn promotes anyway.) 65.♔b4 ♜g7! White wins after 66.♜xg7! (66.♜a8+ It looks like White wins the rook, but a stalemate idea saves Black: 66...♔c7!! 67.♜a7+ ♔b6! 68.♜axg7 ♜xg7 69.♜xg7= Amazing!) 66...♜xg7 67.♜c6! Cutting the king and the b-pawn promotes. 67...♜c7 68.♔c5 +-]

60.b5 White is completely winning now, but at this moment the players were already exhausted and were both in serious time trouble...

60...♔e5 61.♔b4 [61.♜h5+ was quite an easy win. 61...♔d6 62.♜c6+ ♔d7 63.♜d5+ ♔e7 64.♜xg6 ♜xg6 65.♔b4+- with an automatic win.]

61...♜b2+ 62.♔c5 ♜g5 63.♜h6? Giving chances for Black. [63.b6 ♔e6+ 64.♔c6 +- Or; 63.♔b6 ♜g6+ (63...♔d6 64.♜h6+ ♔d7 65.♜c7+ +-) 64.♜c6 White should slowly but surely bring home the full point in both cases.]

63...♜g8!

64.b6? A blunder which leads to a forced draw. [64.♜c3 with the idea of sending the king further away from the b-pawn with ♜e3 was still a decent try 64...♜c8+ 65.♜c6 ♜d8 66.♜e3+ ♔f4 67.♜h3 The final result is still pretty unclear.]

64...♜c8+! 65.♜c6 ♜d8! Great defense! White must disappointingly agree to a draw.

66.♜c1 [66.♜c7 ♜d5+ 67.♔c6 ♜d6+ =]

66...♜d5+ 67.♔c4 ♜d4+ 68.♔c5 [68.♔c3 ♜db4 wins the pawn.]

68...♜d5+ 69.♔c4 ♜d4+ 1/2

(16) Alsina Leal,D (2511) – Sulskis,S (2550) [C53]

88th Hastings Masters Hastings ENG (5.1), 01.01.2013

[Chess Evolution]

After a very fighting game, White is so close to his target — a full point. Two pawns with knight against bishop should be enough, right?!

81.♔d4 To put the king on d4 can't be wrong...

81...♔c6 Only move. [In case of 81...♔a6? the White king can be nicely placed on c5. 82.b4 ♕f3 Black only has waiting moves now... 83.♔c5 ♕g2 White needs to find a winning plan, but it's not that difficult anymore. One of the possible plans is to get the king to c7 and the knight to c5, forcing the Black king to go to b5, and White will be able to play a6 and queen the a-pawn. The next moves show the example in action: 84.♖b5 ♕f3 85.♖c7+ ♔b7 86.♔d6 White wants to play b5. 86...♕e2 87.♖e6 ♔a6

88.♔c6! White still needs to be precise. As in many end-games, everything is decided by one move. 88...♕f3+ 89.♔c7 ♕g2 90.♖c5+ Finally, White reaches the desired position. 90...♔b5 91.a6 and Black can't stop Whites a-pawn.]

82.♔c4? White doesn't find a win after the most logical 82.b4 — but, was there a win? Let's take a look. [82.b4! ♕f1 Black, of course, has to stop White from playing b5. 83.♔e5 White's king is going to d8 and maybe he'll be able to go to a7. To avoid this, the Black king will have to make space and lose control of the b5 square... 83... ♕d3 84.♔e6 ♕f1 85.♔e7 ♕h3 (85...♔b7 86.♔d6 and we already know this position, it's winning for White.) 86.b5+ ♔c5 87.♔d8! and White is easily winning.]

82...♕f1+ 83.♔b4 ♕d3 Black keeps waiting, and it's hard to understand White's idea. Clearly, it's not possible to win without playing b2-b4.

84.♖a4 ♕b5 85.♖b6 ♕e2 86.♖c4 The last maneuvers of the White knight are hard to understand... Black keeps waiting.

86...♕f1 87.b3 We finally see a pawn move, but the b-pawn hasn't reached the right square on b4 still.

87...♙e2 88.♘d2 ♔d5 89.♘b1 ♔c6 90.♘a3 ♙a6 91.♘c4 Still nothing happens... The bishop on a6 is a bit blocked, but it doesn't matter much.

91...♔d5 92.♘e3+ ♔c6 93.♘f5 ♙d3 94.♘d4+ ♔d5 95.♔c3 ♙f1 96.b4 White has to finally put the pawn on b4!

96...♙c4 Now White's idea should be to come back almost to the starting position. This means to first put the knight on c3, to force Black to move his king back to c6, and then bring the king to e7.

97.b5?? What a horrible blunder! After this move, the position is a draw... [One of the possible ways to bring the knight to c3 would have been: 97.♘c2 ♙a6 98.♘e3+ ♔e4 99.♘d1 followed by ♔b3 and ♘c3.]

97...♔c5! And the position is a draw!

98.a6 [Nothing helps anymore... 98.b6 ♙a6]

98...♙d5 99.♔b2 ♔b6 Black has blocked the pawns and White has no way to improve.

100.♔a3 ♙c4 Followed by ♙xb5 and ♔xa6. Conclusion: White had quite an easily winning position, but chose the

wrong plan. Still, it was not too late to come back, but another blunder led the game to a draw.

1/2

Clash of the Titans

(17) Kristinsson, Jon — Tal, Mihail [B48]

Reykjavik Reykjavik, 1964

[Csaba Balogh]

The following fighting game was typical of Mikhail Tal's brave style. He has led the game to a very sharp position, which objectively might not be good for him, but he knew that sooner or later he would outplay his opponent in the tactical complications.

1.e4 c5 2.♘f3 e6 3.d4 cxd4 4.♘xd4 a6 The Paulsen/ Kan variation is considered to be a good decision for fighting players, as White doesn't have direct lines to force a draw.

5.♘c3 ♖c7 6.♙d3 ♘f6 7.0-0 ♘c6 8.♙e3

8...b5 [Theory considers 8...♘e5 to be the best option for Black. The main line starts with 9.h3 ♙c5 ...]

9.a3 [9.♘xc6 ♖xc6 10.a3 ♙b7 11.♖e2 is the reason why strong players restrain from playing 8...b5.]

9...♙b7 10.♖e2 ♘e5 This move seems to be slightly hasty, because of concrete reasons. Black would like to get the bishop pair, but we must know that ♘xd3 cxd3 favors White, as the game will demonstrate. The main threat is ♘eg4 — White needs to parry this, and if he does, Black should carry out the ♘c4 move. [10...♙e7 followed by normal development with 0-0 and d6 gives a playable position.]

11.h3! ♖c8 Black overprotects the c4 square and prepares for the forthcoming combination...

12.f4 ♘c4 [12...♘xd3 13.cxd3 This change of the structure favors White generally in all the Sicilians. White has no more problem with the e4 pawn, and the open c-file plus the weakened dark squares on the queenside give him better chances 13...♙e7 14.♖ac1 ♖b8 15.b4! 0-0 16.♘b3 += followed by ♖f2.]

13.♘dxb5! Very nice tactical motif, making use of the temporarily uncoordinated Black pieces. [13.♙xc4 ♖xc4 Black would have achieved his aim. He already overtook the initiative with the bishop pair and has a lot of pressure against the e4 pawn.]

13...axb5 14.♘xb5 ♔c6 The only square to cover the c4 knight, but this moves into...

15.♗a7 ♘xe3? This is a really brave queen sacrifice. Objectively speaking, it doesn't work, but Tal always took such risky decisions and his opponents most often collapsed under the tension. [15...♔c7 should have been played, where White can either force a draw by repetition with 16.♘b5 (or play for a win, which is probably justified in the current position. 16.♕f2! The game could continue, for instance, with 16...♖b8 17.♕xc4 ♘xe4 18.♘b5 and White's chances seem to be preferable.; 16.♘xc8? is bad 16...♘xe3 and ♕c5 next.)]

16.♘xc6 ♕c5 17.♔h2? It's hard to explain this move. Black didn't have any special threat with the discovered check, so White could have simply saved his knight. [17.♘e5! The maximum Black can do is to take one of the rooks, but he'll end up with a material disadvantage in both cases. 17...♘xc2+ (17...♘xf1+ 18.♔xf1+-) 18.♔h2 ♘xa1 19.♖xa1 +-]

17...♘xf1+ 18.♖xf1 ♕xc6 We have reached this really unusual position. White has a queen and two connected passed pawns against a rook and two minor pieces. An important detail is that White can hardly mobilize his queenside pawns as one of the bishops will be able to stand between the pawns. Objectively, the game is probably even, but of course, in a practical game, in a position like this, the draw has the smallest probability of occurring.

19.c4 White wants to push e5 and control the d5 square. It's also principled to advance the queenside pawns, but it has a huge drawback as well — that it gives up the control of the d4 square. We'll see that the bishop will become incredibly strong soon.

19...d6 Reducing the power of e5.

20.♔c2 This is a slightly mysterious move. It's hard to get its point. [20.e5 was quite logical, to create a third passer on the queenside. 20...dxe5 21.fxe5 ♘d7 22.♕e4 getting rid of the bishop pair, but at the cost of a pawn. 22...♘xe5 23.♕xc6+ ♘xc6 24.b4 ♕e7 It's very hard to evaluate the position, but most probably Black will sacrifice a piece for the dangerous pawns and will escape to a drawish end-game.; 20.b4 ♕d4 will be similar to the game.]

20...♕d4 21.b4 e5 Fortifying the d4 bishop.

22.f5 ♔e7 Tal already thinks about the attack that will be seen later in the game. [However, the prophylactic 22...♖a8! was much stronger. Now White can't hold his structure and must create a hole between them, for instance with 23.b5 ♕b7 24.a4 Black immediately makes use of the weakness: 24...♘d7! Black's chances are better.]

23.a4

23...g6 Black opens the g-file for the rooks. At first, it doesn't seem so dangerous, but...

24.b5 ♖a8 25.♔e2 [25.a5 With his 25th move, White probably wanted to avoid 25...d5!? 26.exd5 ♞xd5 and the knight goes to e3, but this whole action with d5 was not necessarily in Black's mind, as he weakens his own king by doing so.]

25...♞cg8 26.a5 h5 [26...gxf5 27.♞xf5 ♞g6 was also possible, but Tal probably wanted to prevent 28.g4 and White is always ready to push g5 when Black plays h5.]

27.g3 [27.b6 gxf5 28.♞xf5 ♞g6 We can see now that the Black bishops are excellently blockading the a- and b-pawns.]

27...♞h7 White can't avoid opening the g-file, so Black decides to double his rooks first.

28.♔g2? This is a huge mistake, moving into many tactical motifs. White was afraid of some ♞g4 ideas, when the opening of the h-file might lead to a quick mate. However, after ♞g4 White is not forced to accept the sacrifice. [28.b6 ♞hg7 was coming anyway.]

28...♞hg7 29.fxg6 ♞xg6 30.♞f3

30...♞h7! with the double threat of ♞g5 and the more hidden f5!!

31.♞e1 [31.h4 would have been met by 31...f5!! with the idea of playing ♞f6 or simply f4. White is lost. 32.♞xf5 ♞xg3+]

31...♞g5 32.♞f1 Black's pieces are ready for the final strike. Of course, Tal doesn't miss the tactical chance.

32...♞xe4! 33.♞xe4 ♞xg3+! 34.♔h2 [34.♞xg3 also leads to a hopeless endgame. 34...♞xe4+ 35.♔h2 ♞xg3 36.♞xg3 ♞d3 37.♞c1 The bishops and the king are block-

ing the a- and b-pawns, but there will be no one to stop Black's central pawns. 37...f5]

34...♖g2+! This and the next move were important details, which Black had to foresee before taking on e4.

35.♔h1 [35.♙xg2 leads to a forced mate. 35...♖xg2+ 36.♔h1 ♜e2+]

35...♖g1+! **36.♖xg1** [36.♔h2 ♜8g2+ 37.♙xg2 ♖xg2+ 38.♔h1 ♜e2+]

36...♖xg1+ 37.♔xg1 ♙xe4+ Black ended up with a winning material advantage.

0-1

Editorial Preface

The whole chess world has its eyes on Wijk aan Zee.

The chess Elite with Carlsen, Aronian, Anand, Nakamura, Karjakin combined with the female World Champion Hou Yifan and many other Top GMs make the field extremely interesting.

What we can already say is: Anand is back. After not having a great 2012 and dropping to the 7th position in the world ranking, Vishy is back; he's showing very good play and a bit of necessary luck. His game in the 4th round against Aronian is really very nice. We have analyzed it for You.

The B group is exciting as well, but of course, in comparison to the "main" event, they seems to be a bit "gray".

The traditional rapid event in Estonia was won one more time by Alexei Shirov.

As usual, we wish You a lot of chess fun with the current CEWN Nr 47

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Aronian, Levon (2802)

— Anand, Viswanathan (2772) [D47]

75th Tata Steel GpA Wijk aan Zee NED (4.5), 15.01.2013

[Arkadij Naiditsch]

How many times have we seen Aronian losing with White in under 25 moves? I can't remember any. We'll now see one of the most spectacular chess games. How much was Anand's analyses? This is hard to say, but probably almost until the end of the game. After the game, he admitted this was his preparation against Gelfand. All in all: super strong novelty, great play, very beautiful finish. A fantastic game.

1.d4 d5 2.c4 c6 Lately, the Slav became Anand's favorite opening.

3.♘f3 ♘f6 4.♘c3 e6 5.e3 ♘bd7 6.♙d3 dxc4 7.♙xc4 b5 8.♙d3 ♙d6 9.0-0 0-0 10.♚c2 ♙b7 11.a3 ♖c8 Everything is theory until here and this is one of the most popular lines of the Meran.

12.♘g5 A fresh idea, which was introduced by Wojtaczek. [The main idea of the Black's move 11...♖c8 becomes visible after 12.b4 c5! This amazing move was played by Anand's second Kasimdzhanov in his game against Topalov. 13.bxc5 ♙xf3 14.gxf3 ♘xc5 15.dxc5 ♖xc5 16.f4 ♘d5 17.♙b2 ♘xc3 18.♙xc3 ♚c7 19.♖fc1 ♖c8 Black is winning back the piece, the position is a draw,]

12...c5! A very strong novelty! Now the game is very tricky and pretty forced... [To win a pawn by playing 12...♙xh2+ 13.♙xh2 ♘g4+ 14.♙g1 ♚xg5 and it seems like Black is just a pawn up, but White is getting great play for it. 15.f3 ♘gf6 16.b4! White's bishop pair, plus his strong center and the very bad Black bishop on b7 is gives White better play.]

13.♘xh7 A very logical move. White needs to take the pawn on h7 — nothing else to do! [Another way to get the h7 pawn was to play 13.♙xh7+ ♙h8 14.♙e4 but now Black can equalize very easily by playing 14...♘xe4 15.♘gxe4 ♙b8 and Black is even more than fine. He has the bishop pair, an open position and an eventual attack on the White king. This is great compensation for just a pawn.]

13...♘g4 The beginning of a great mating idea!

14.f4 Aronian runs head first into Anand's preparation. [14.g3? would be a bad way to defend. 14...cxd4 (14...♚h4) 15.exd4 ♘xh2 and Black is easily winning. White can't take on h2 because of ♚h4.; 14.h3 would have been a very possible reply, but here Black has excellent play as well. 14...♚h4 with a dangerous attack.]

14...cxd4 15.exd4 It seems like White is pretty solid and the Black rook on f8 is under attack. How to proceed?

Anand has an amazing move in his pocket. What a level of preparation!

15...♙c5!! A really amazing move, and a winning one. I guess it might become the move of the Year 2013!

16. ♙e2 [If White takes the bishop, it wouldn't help much. 16.dxc5 ♘xc5 Black wants to take on d3 and, at the same time, to give a check on d4. White has no decent defense against this. 17. ♙e2 ♔d4+ 18. ♖h1 ♘f2+ and Black is giving mate.; 16. ♘xf8 leads to a beautiful mate: 16... ♙xd4+ 17. ♖h1 ♔h4 18.h3 ♔xh3#]

16...♘de5!! Another wonderful move! Black creates multiple threats and keeps the knight on g4 alive. A really beautiful position.

17. ♙xg4 [17.fxe5 and Black is mating after 17... ♔xd4+ 18. ♖h1 ♔g1+ 19. ♖xg1 ♘f2#]

17... ♙xd4+ 18. ♖h1 ♘xg4 As we can see, things turned out terrible for White. At the moment, we have equal material and Black is attacking the White king with all his pieces.

19. ♘xf8 If it's impossible not to die, at least let's get some material.

19...f5! Another very good move! Black wants to mate after ♔h4. [Of course not 19... ♔h4? 20. ♔h7+!]

20. ♘g6 White has protected from ♔h4 for a moment.

20... ♔f6 And the game is basically over. Black wants to play ♔xg6 and ♔h5 next. White has no defense against this.

21.h3 ♔xg6 22. ♔e2 Nothing helps White anymore...

22... ♔h5 23. ♔d3 ♙e3 What a great finish to a really amazing crush by Black. Anyway, it would be very interesting to know if Anand made any of the moves himself or if it was his preparation until the very end!

0-1

(2) Carlsen,M (2861) – Van Wely,L (2679) [E75]

Wijk aan Zee, 14.01.2013

[Csaba Balogh]

A nice positional lesson by the World Nr.1.

1.c4 g6 2.d4 ♘f6 **3.** ♘c3 ♙g7 Van Wely used to be a Gruenfeld player, but on this tournament, he employed the King's Indian. It's interesting that Carlsen himself also chose this opening against Aronian in the previous round with the Black pieces.

4.e4 d6 5. ♙e2 **0–0 6.** ♙g5 This is the main alternative to the main line with **6.** ♘f3. Black has various different setups, and van Wely went for the most common line.

6...c5 7.d5 e6 [It's better to include 7...h6 followed by the moves played in the game. The game demonstrates the difference excellently. The bishop on g5 is very annoying from Black's point of view.]

8. ♙d2! Black must forget about h6 after this move, and the pin is very annoying.

8...exd5 9.exd5! After this typical recapture, White has a better position due to the space advantage given by the d5 pawn gives. Black has some difficulties finishing the development. The main idea, which could ease his position, would be the exchange of the f6 knight with ♘e4, but now the g5 bishop makes it more difficult to execute this plan.

9...♙b6 This concrete attempt to play on ♙f5 and ♘e4 was played by Mikhail Tal back in 1956. Carlsen knew exactly how to react against it. [9...♖e8 10. ♘f3 ♙g4 11.0–0 ♘bd7 12.h3 ♙xf3 13. ♙xf3 happened in hundreds of

games. Black succeeded to develop his pieces, but it cost him the bishop pair, and now he must suffer with the space disadvantage.]

10. ♘f3 ♙f5

11. ♘h4! After this great move, Black can't achieve his plans comfortably as the bishop gets into some trouble. ♙d7 would be too passive, leaving Black with a long-term suffering. [After a careless move like 11.0–0 Black solves his problems with 11...♘e4! 12. ♘xe4 ♙xe4 =]

11...♘e4 12. ♘xe4 ♙xe4 13.f3! This is the point! Black can temporarily win a pawn on b2, but he must give up his light squared bishop and destroy his pawn structure.

13...♙xb2 14. ♖c1! This is an important detail, as otherwise, the bishop could be saved via c2-a4.

14... ♙f5 This is a kind of positional resignation. Black should have tried to find counterplay in one of the following lines. [14...h6 is probably the critical test of the variation, although Boleslavsky has already showed in 1970 that White gets an advantage after 15. ♙xh6 ♙xd2+ 16. ♙xd2 ♙f6! 17.g3 ♙xh4 18.gxh4 ♙f5 19. ♙f4 ♖d8 20. ♖g1± with a better endgame for White. We can be sure that Carlsen was familiar with all these lines and

played without thinking so far, while van Wely has already spent almost an hour. A huge difference between the preparations, which is slightly surprising because van Wely usually knows his lines with very deep details.; 14... ♖xd2+ 15. ♔xd2 ♙xd5 has been played in several games, but Black clearly doesn't have enough compensation for the sacrificed piece. 16.cxd5 ±]

15. ♘xf5 gxf5 16. ♔xb2 ♙xb2 17. ♖b1 ♙c3+ 18. ♔d1± Black is a pawn up at the moment, but b7 is hanging. ♙e7 threatens to win the d6 pawn and ♙d3 is always in the air to collect the f5 pawn.

18... ♖e8 [18...b6 was a more stubborn defense, after which White should play 19. ♙d3 (Of course, it would be more important to take on d6, than the doubled f-pawn, but there is a concrete idea that White should avoid. 19. ♙e7 ♖e8 20. ♙xd6 ♘c6! This is the point. Suddenly, the knight becomes very active on d4, while 21.dxc6 is met with ♖ad8.) 19... ♖e8 20. ♙xf5 ± with a clear advantage, although Black can resist for long.]

19. ♖xb7 ♘a6 20.a3! Carlsen deprives Black from any kind of counterplay by preventing ♘b4.

20... ♖ab8 21. ♖xb8 ♘xb8 [21... ♖xb8 was probably a slightly more stubborn defense, but the position re-

mains bad here as well. 22. ♔c2 ♙e5 (22... ♖b2+ can't be played. 23. ♔xc3 ♖xe2 24. ♙f4! +- and d6 falls. The knight on a6 is dead and the d-pawn will advance soon.) 23. ♙c1 Controlling the invading square, followed by playing on the kingside. 23... ♔g7 24. ♙d3 f4 (24... ♔f6 25.g4 fxg4 26.fxg4±) 25.g3! fxg3 26.hxg3 ± is a favorable exchange for White. He's intending to push f4 and g4. The a6 knight is terribly placed. This is the reason why Black chose to take back with the knight on b8.]

22. ♙d3 ♘d7 Black is looking for counterplay against the c4 pawn, but Carlsen doesn't give him any chance...

23. ♔c2! [23. ♙xf5 would have been premature, because of 23... ♘e5 24. ♔c2 ♙d4 25. ♙d3 is the only move to protect c4, but Black has 25... ♖b8! 26. ♙c1 ♘xd3 27. ♔xd3 ♖b3+ and ♖c3 next, with equality.]

23... ♙d4 [23... ♙f6 was probably the only move, but still after 24. ♙xf6 ♘xf6 25. ♖b1± and invading in the b-file. Black has huge problems.]

24. ♖b1! Another accurate move! White lures the knight to b6 with the threat of ♖b7, which deprives Black from his main counterplay with ♘e5.

24...♖b6 [24...♘e5 is simply met with 25.♙b7 ♘xd3 26.♙xd3 ± All these endgames are horrible for Black.]

25.♙f4! ♙e5 26.♙e1 [26.♙xe5!? ♙xe5 27.a4! was the tactical way to win the game. 27...♘xa4 28.♙a1 ♘b6 29.♙xa7 The f5 and d6 pawns will automatically fall. Black will collapse soon. 29...♙g7 30.♙a6 ♘c8 31.f4 +-]

26...♙g7 27.♙g3! ♙e7 was the only way not to lose material because of the pin, but this leads to a won endgame by force. [27...f4 is met with 28.♙xf4!]

28.f4! ♙f6 29.♙xe7 ♙xe7 30.♙e1! White wants to play ♙b3, protecting c4 and then taking on f5.

30...h5 Black wants to protect f5 with ♙g6 and he prevented g4. ♙f6 was not possible because of ♙h4.

31.g3! Black can't avoid losing the pawn. ♙f6 will meet ♙c3, and on ♙g6, White simply plays h3-g4. Black can't do anything against it.

31...♙f6 32.♙b3 ♙g6 33.h3! A painful final position! Van Wely decided not to suffer anymore and resigned the game as g4 wins the pawn in the next move. If he had enough time to play ♙d4 and ♙f6, he could have hoped for salvation, as White doesn't have ♙c3 check. **1-0**

(3) Anand,V (2772) – Caruana,F (2781) [C84]

Wijk aan Zee, 14.01.2013

[Csaba Balogh]

A typical Ruy Lopez game. After some subtle maneuvering from both sides, the game turned into a tactical battle.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 a6 4.♙a4 ♘f6 5.0-0 ♙e7 6.d3 We can say that, recently, this move has become much more popular than the main lines starting with 6.♙e1. The main idea is to avoid the long theoretical struggles and it has many subtle points, where it is possible to outplay your opponents.

6...b5 7.♙b3 d6 8.a3 However, this might be the new direction, since in almost all the games White tries 8.a4. The idea is to give a free square for the bishop against the ♘a5 threat.

8...0-0 9.♘bd2 Black can choose between several different setups here.

9...♙e8 Caruana, as a Zaitsev player in the main Ruy Lopez lines, sticks to his usual setups. The main problem of Black is the misplacement of the c6 knight. We can see in the following lines. and also in the game, that Black tries to improve it somehow. [Aronian played 9...♘a5 against Anand in a rapid game in 2007. 10.♙a2 c5 11.♙e1 ♘c6 12.♘f1 ♙e6 13.♙xe6 fxe6 14.c3 ♙d7 with a typical Ruy Lopez middlegame.; 9...♘b8 is another playable plan in such positions. 10.♙e1 ♘bd7 11.♘f1 ♘c5 12.♙a2 ♙e6 Black is about to equalize, but of course, a long fight is still ahead, because almost all the pieces are on the board.]

10...e1 f8 11...f1 White employs the standard maneuver to improve his knight.

11...h6 12...e3 The knight is heading to d5. Other ideas could be h4-f5 (also h4-g6) and h3 followed by h2-g4. These are known maneuvers in this type of positions.

12...e6 Usually, Black should aim for the exchange of the light squared bishops, but it doesn't lead to equality this time. [12...e7 was an alternative to prevent d5 and to transfer it to g6, where it is clearly better placed.]

13...xe6 xe6 14...d5! Using the fact that Black can't take on d5, White occupies the nice central square. The main problem is still the c6 knight. Without it, Black could take on d5 or kick it out with a c6 push.

14...e8 15.c4! A great move to fortify the knight and to initiate play on the queenside, where White has more potential. Black can't use the weakened d4 square, because he is lacking the light squared bishop to eliminate the f3 knight with g4.

15...b8 Caruana tries to solve the problem of the c6 knight.

16...d2 Natural development with the idea of a5.

16...xd5 [16...c6 doesn't equalize either. 17.xf6+ xf6 18.c1 and White can create problems on the c-file.]

17.cxd5 c6 The previous move was based on this idea. Otherwise, White plays a5 and doubles the rooks on the c-file with huge pressure on the weak c7 pawn. Black also had to undermine the d5 pawn to win some space.

18...b3! Another excellent move by Anand. The hardest thing was to evaluate Black's c5 move.

18...cxd5 [On 18...c5 White should try to weaken the strong Black pawn structure and he can most effectively do it with b4. So, probably the best is 19.a2 d7 20.b4! and the game could continue, for instance, with 20...b6 21.ec1 ec8 22.e3 followed by d2-b3. White also has the a4 resource, which can cause some difficulties for Black. White's chances are preferable.]

19...xd5 d7

20...ac1 Black can't fight for the c-file and his f8 bishop is poor. His only chance is a d5 break to activate the bishop and to create open lines for the rooks.

20...b8 Black prepares for f6. [20...f6 immediately, would be answered by 21.b7 e7 22.c6 and doubling

the rooks on the c-file.; 20...♖c8 21.♙e3! ± is unpleasant, threatening ♖b7 and preventing ♘c5.]

21.♖c3? Until here, Anand has played a perfect game and achieved an advantage, but with this inaccuracy, he basically spoils it all. [Probably the strongest was 21.♖c6! which seems to be a small, but in fact, is really a huge difference compared to the game. As we'll see, the fight for the c6 square is key in the game. If Black tries 21...♘f6 22.♖b3 ♖b7 23.♖ec1 ♖ac8 24.♖c2 ± he's not in time to counterplay with d5.]

21...♘f6 22.♖b3 ♖b7 23.♖ec1 ♖ac8 Black is safe now. White is ready to take control over the c-file, but the d5 break solves all his problems.

24.h3! A useful move. Black has to take on c3, so there was no need to waste a tempo with ♖c2. [24.♖c2 ♖xc3 25.♖xc3 d5! = Black jumps out from his squeezed position.]

24...♖xc3 25.♖xc3 d5! The World Champion tries his only chance to fight for the advantage.

26.♘xe5 dxe4 27.d4! Still, if White could play ♖c6, the position would remain unpleasant with the weakness on a6, but Black keeps neutralizing all the deep ideas.

27...♖d5! The d4 pawn has to be protected before playing ♖c6. [The natural 27...♘d5 would have led to White's advantage. 28.♖c6 ♖xc6 29.♖xc6 ±]

28.♙e3 ♙d6! Another precise move. Now Black has no problems at all, but another key factor of the game starts to play a main role, namely the time factor. Suffering in that cramped position right from the beginning has taken all the thinking time of Caruana, and he starts to make mistakes... This is quite typical in practical chess.

29.♘g4 ♖e6?! The first mistake. [Black could have played 29...♘xg4 30.hxg4 and for example 30...♖d8 followed by ♙e7-f6 is equal.]

30.♘xf6+ ♖xf6

31.♙h1!? A really unpleasant move in time trouble. White would like to play ♖c6, but first he had to leave from the ♙h2 discovered check. [Objectively, it was stronger to play 31.♖c8+! ♙h7 32.♖e8 with the idea of ♖c8, and Black has difficulties.]

31... ♖e7?! Another mistake. [After 31... ♖f4 Black seems to be all right.]

32. ♖c7 [32. ♖c8+ with the same idea as in the previous move was stronger again. 32... ♖h7 33. ♖e8! White wants to penetrate with ♖c8, followed by ♖h8 and ♖g8. 33... ♖d8 The exchange of the queens doesn't help, because 34. ♖c8! ♖xe8 35. ♖xe8 and the e4 pawn falls, while on 35... ♖e6 Black wins the endgame by force. 36.d5 ♖e5 37. ♖c5! ♖f6 38. ♖xe5 ♖xe5 39.d6 and the pawn promotes anyway. 39... ♖xb2 40.d7 ♖f6 41. ♖b6 +-]

32... ♖e6 33. ♖b8+ ♖h7 34. ♖c8 Anand had the same idea, but it was more effective with the queen on e8 and the rook on c8.

34... ♖d6? [34... ♖g5 would have still led to equality, but this is very hard to find with only 30 seconds on the clock. 35. ♖h8+ (35. ♖c5 ♖d6 is equal.) 35... ♖g6 36. ♖g8 In comparison to the game, Black has (On 36. ♖g3 Black has 36... ♖d6 neutralizing the pin. On 37. ♖g4, f5 works.) 36... ♖xe3 37.fxe3 ♖c4 and the perpetual check with ♖c1-c7 is inevitable after any kind of attacking moves. 38. ♖h7 ♖c1+ 39. ♖h2 ♖c7+=]

(4) Sveshnikov,E (2521) – Fridman,D (2667) [C43]

Paul Keres Mem 2013 Tallinn EST (8.2), 13.01.2013

[Arkadij Naiditsch]

1.e4 We are in the traditional rapid tournament in Estonia, which usually collects the best players from the Baltic countries. Now we see a really funny game between the „old „ Grandmaster Evgenij Sveshnikov and his younger — German resident — rival, Daniel Fridman.

1...e5 2.f3 f6 3.d4 One of the main lines in the „Russian“, which is usually a very solid opening.

3...xe4 4.dxe5 e5 This move is, of course, a very risky one and it leads to a „crazy“ position. [4...d5 would be the main continuation here...]

5.e4 The main answer for White.

5...xf2 [To take 5...e4xf2+? would be a wrong decision for Black. 6.f1 and Black is losing some material because of the threat e5d5.]

6.e4xf7+! This is probably the strongest White's reply. Even if the position is quite unclear, it's very hard to play for Black with his king walking all over the board.

6...xf7 7.e5d5+ g6 I don't think many players would like the king on g6, but it seems like Fridman was not very bothered by this...

8.xc5 xh1 White is a full rook down, so it's time to develop fast and attack the Black king with „all that You got“.

9.c3 h6 Black tries to escape with the king to a safer position...

10.c4 e4 is threatened.

10...h7 11.d5 [Another attacking option would have been to first play 11.e4+ g6 12.d5 followed by the silent moves e3 0-0-0, with a very strong attack.]

11...f8 12.e4+ h8 The Black king escaped, but White has one more „joker“ in his pocket.

13.xh6! Great play. White continues what he started and is going for the Black king.

13...d6 [The main White's idea is evident after 13...gxh6 14.g6! Silent but deadly move. Black has no defense against the White knights.; It doesn't help to play 13...xf3 14.gxf3 gxh6 15.f6 and White is winning.]

14. ♗g5 A nice way to finish the game...

14... ♔e8 **15.** ♕h4+ ♔g8 **16.** ♘e7+ Of course, Black can give away the queen, but then, maybe a resignation would be the strongest move.

16... ♔f7 **17.** ♕h5+ And White is mating by force.

17... ♔e6 **18.** ♕g4+ ♔f7

19.e6+! Wow! What a crush!

1-0

Endgame section

(15) Nakamura,H (2769) – Sokolov,I (2663)

Wijk aan Zee, 13.01.2013

[Chess Evolution]

Black is winning, but the way to do it is really instructive and hard to find over the board.

59...h2! [59...♔g3? doesn't work. 60.♙e1+-; 59...♖f5 makes no progress, since the e5 pawn is not hanging because of f7. 60.♔h2]

60.f7! White is forced to give up his dangerous connected passed pawn to parry the mate threat of ♔h3. [60.♙c5 ♖e2 61.f7 would have lost on the spot. 61...♔h3! 62.f8♗ ♖e1+]

60...♖xf7 61.♔xh2 The endgame seems to be very close to a draw, as the bishop is well placed: it protects both pawns and Black is slightly restricted, because if White manages to push e6-e7, they can immediately agree to draw. However, Black is winning, he can make use of

the squeezed situation of the White king. The following moves are necessary...

61...♖f2+! 62.♔g1 ♖e2! The pawn had to be stopped.

63.♙d6 ♔f3! 64.♔f1 ♖e4 65.♔g1 [65.♙c7 loses to 65...♖c4 attacking the bishop and threatening with mate.]

65...♖e1+ 66.♔h2 This is the critical position, which Black could get in many different ways. What to do now? If we study endgames, then we know that very often we must ask ourselves what would happen if it was our opponent's turn. If we do this, we can easily realize that Black is in zugzwang, as he can't move with the king, so the bishop must give up the protection of one of the pawns... The first target should be to pass the move to White...

66...♖d1 67.♙b4 [67.♙c5 would have made the job easier. 67...♖d5 68.♙d6 ♖d2+ 69.♔h3 (69.♔g1 ♖d1+ 70.♔h2 ♖e1 Black achieved what he wanted.) 69...♔f4! and White is in zugzwang again! Only his bishop can move, but then he drops one of the pawns. 70.♙c7 ♖d3+ 71.♔h2 ♖xa3 72.e6+ ♔f5 73.e7 ♖e3]

67...♖d4! Very nice move! It seems like Black allows White to advance his e-pawn, but this is met with a tactical refutation.

68.♙d6 [68.e6 ♖h4+! Very important intermediate check in order to promote the a-pawn with check. 69.♔g1 ♖xb4! 70.axb4 a3 Despite White is the one who queens first, he gets mated by force.... 71.e7 a2 72.e8♙ a1♙+ 73.♙h2 ♙b2+ 74.♙h3 ♙g2+ 75.♙h4 ♙g4#]

68...♖h4+ 69.♔g1 ♖h6! Sokolov is using the method of zugzwang again! White is forced to move with the bishop.

70.♙f8 ♖h8 This is just to gain some time.

71.♙d6 ♖h6 72.♙f8 ♖b6! 73.♙d6 This allows Black to get his zugzwang position. Let's see what happens on other moves... [The king can't escape from the 1st rank with 73.♙h2 because of 73...♖b2+ 74.♙h3 ♖b8 and White gets mated. 75.♙g7 ♖b7; 73.♙c5 ♖c6 74.♙b4 (74.♙d6 transposes to the game...)]

74...♙g6+! Very subtle chess, after which there is no good square for the king. 75.♙h2 (75.♙f1 allows 75...♖b6 and ♖xb4 wins next as the bishop can't go away.) 75...♙g2+ 76.♙h1 (76.♙h3 ♖g5 wins the pawn.) 76...♙g4 Black can

always win a tempo with this trick of taking on b4. 77.♙c5 ♖c4 78.♙d6 ♙f2 and the king in the corner has decisive problems. 79.e6 ♖h4+ 80.♙h2 ♖h7! White must sacrifice his pawn, as he has no other moves.]

73...♖b1+ 74.♙h2 ♖e1! Here we are! The bishop has to leave its ideal square. However, Black still has to find some really difficult moves.

75.♙c7

75...♖a1? Sokolov fails to find the winning plan. [75...♖e2+! 76.♙h3 (76.♙g1 is met with 76...♙g2+! forcing the king into the corner, where different kind of mate threats can be created. 77.♙h1 (77.♙f1 ♖c2 wins.) 77...♙f2! 78.e6 ♖g6 79.e7 ♖h6+ 80.♙h2 ♖h8! and the pawn must be sacrificed, which means the end of the game.) 76...♙f4!! This is the key move! Black threatens with ♖e3 and ♖xa3, so the next move is forced. 77.♙d6 and now 77...♖d2! the final zugzwang! White loses one of the pawns, and the game. 78.♙c7 ♖d3+ 79.♙g2 ♖xa3 The e-pawn can be easily stopped. 80.e6+ ♙f5 81.e7 ♖e3]

76.♙d6 ♖d1 77.♙b4 ♖d4 78.♙d6 ♖g4? This is the final mistake. Black should have gone back to the beginning,

put White in zugzwang and then find the winning plan, given in the 75...♖e2 line.

79.e6! The pawn reaches the 7th rank. The game is drawn.

79...♖g2+ 80.♔h1 ♖e2 [It's too late to create the usual mating net with 80...♔f2 81.e7 ♖g8 82.♙c5+ ♔f1 83.♔h2 and the king escapes from the corner...]

81.e7 ♔g4 82.♔g1 ♔f5 83.♔f1 ♖e6 84.♔f2 ♔g6 85.♔f3 ♔f7 86.♙b4 ♔e8 87.♙c5 ♔d7 Black is still aiming for a zugzwang. He wants to attack the bishop to threaten with ♖xb4 and try to send it away from the b4-c5-d6 squares. However, he is unable to do so... quite an unlucky position.

88.♙b4 ♖b6 89.♙c5 ♖c6 [89...♖b5 90.♙d6! is the point! The bishop can hold the diagonal with this small tactical trick.]

90.♙b4 ♖c4 91.♙d6! A hard-fought draw! **1/2**

(16) Nakamura,Hikaru (2769) – Karjakin,Sergey (2780) [E15]

75th Tata Steel GpA Wijk aan Zee NED (4.4), 15.01.2013

[Chess Evolution]

Black was quite lucky to survive this far and had a few very critical moments, but what is the best way to go on?!

40.♙xe2 ♙c3! Very good play by Black. The idea of most queen endgames is the same: try to bring Your pawn as far as it goes and don't care about the other pawns. This is the strange thing about these endgames, one pawn can be stronger than 4 if it's more advanced. And what clearly doesn't lead to anything good is to choose a passive tactic in a queen endgame!

41.♙e7+ White is going to eat all the Black pawns, but will this be enough for a full point!?

41...♔g8 42.♙e4

42...d3! And again, Black is choosing the right way to play the position — to bring the passed pawn as far as possible.

43. ♔xg6+ ♕f8 44.f5 White is trying to be as fast as possible with his free pawn. [44. ♔xh6+ ♕e8 would not bring White anything and there is no way of holding Black's d-pawn...]

44... ♕c2+ The last accurate move, not to give White even a chance for f6...

45. ♕f3 d2 Black reached what he wanted. The pawn is on d2 and White has nothing better than to „save“ himself with a perpetual check.

46. ♔xh6+ ♕e8 47. ♕e6+ ♕d8 48. ♕d6+ ♕c8 49. ♕e6+ ♕c7 50. ♕e7+ ♕b6 A nice example, from a strategical point of view, on how to play queen endgames. **1/2**

Clash of the Titans

(17) Alekhine, Alexander — Koenig, Imre [A50]

Vienna Vienna, 1922

[Csaba Balogh]

A short but beautiful crush by Alekhine, who made use of the early castling of his opponent.

1.d4 ♘f6 **2.c4 b6** We can't see such moves nowadays, but of course 91 years ago theory was not that developed.

3.♘c3 ♖b7 4.♙c2! Very logical play! White would like to occupy the center with e4!

4...d5 Black plays some kind of reversed Gruenfeld defense with the b7 bishop instead of g7. [White also gets a better position after 4...e6 5.e4 ♖b4 6.f3± consolidating the strong center.]

5.cxd5 ♗xd5 6.♘f3 [6.e4 immediately was also possible, but it only leads to a transposition to the game. 6... ♗xc3 7.bxc3 e6 White hardly has anything better than 8.♗f3 and we are in the game.]

6...e6 7.e4 ♗xc3 8.bxc3 ♖e7

9.♖b5+!? This is a known idea in many openings, mainly in the Queen's Indian Defense. White tries to confuse his opponent's development, as ♗d7 loses to ♗e5.

9...c6 [On 9... ♖c6 the idea is 10.♖d3 and the bishop is clearly misplaced on c6. This also prevents Black's only active plan to fight for the center with c5!]

10.♖d3 0-0? Who would believe, that this absolutely normal looking move might be the decisive mistake of the game? Alekhine punishes Black with a fascinating attack! [10...c5! was the way to play, setting pressure on the center. 11.0-0 (11. ♖b5+ makes no sense anymore, because of 11... ♖c6) 11...0-0 White can still achieve an advantage with the typical break

12.d5! White would like to push c4 and obtain a better position with the protected passed pawn on d5, and if Black takes on twice on d5: 12...exd5 13.exd5 ♖xd5 (13... ♗xd5 is even worse 14. ♗xh7+ ♔h8 15. ♖d1! Black can't leave the pin.) 14. ♖e1! comes this strong intermediate move, to prepare for ♗e4! 14... ♘c6 15. ♗xh7+ ♔h8 16. ♗e4 ♕d6 and here, probably the strongest is 17. ♗g5± White's attack is rolling. The rook is coming with tempo to d1 and the queen might create a decisive attack with ♕e2-h5.]

11.e5! h6 [11...g6 is very bad. White is crushing after 12.h4! and Black can't parry the simple h5 threat. On 12... h5 13. ♗xg6! wins the game 13...fxg6 14. ♕xg6+ ♔h8 15. ♘g5! is the easiest 15... ♗xg5 16.hxg5 and mate to follow.]

12.h4!! Brilliant move! The idea becomes clear after seeing the next move! Black is unable to defend his king.

12...c5 Black plays principally: against a flank attack, you must open the center! But it doesn't help this time.

13. ♖h3!! This was the point of the previous move! Suddenly, all the White pieces are focused against the Black king. The main threat is ♗xh6 gxh6 ♖g3 ♔h8 and ♕d2 with an inevitable mate.

13... ♔h8 [13...f5 is a typical defensive method in such situations, but it doesn't help either. 14.exf6 ♗xf6 15. ♗h7+! ♔h8 16. ♘g5! Too many threats are in the air. Black can't take on g5, since the opening of the h-file would be suicidal. For instance, after 16...cxd4

17. ♗g8!! is a neat win. Black can hardly parry ♕h7. 17...d3 only delays the end 18. ♖xd3 +- and the rook goes away, creating the ♕h7 threat again.; 13...cxd4 is met with 14. ♗xh6!! ♖g3 is a threat and if Black accepts the sacrifice 14...gxh6 15. ♖g3+ ♔h8 16. ♕d2 wins 16... ♗g5 17. ♘xg5! hxg5 18. ♖xg5 ♖h5 followed by ♕h6 mates Black.]

14. ♗xh6! The decisive blow!

14...f5 [14...gxh6 15.♔d2! wins. Black can't parry the threats.]

15.exf6 ♟xf6 16. ♟g5 White is a pawn up and his attack continues to roll. The game is basically over.

16...cxd4

17.♞e5! This is the stylish finish! Black can resign. From now on, all the moves are winning for White, but it's worth to take a look at the end of the game.

17...♞c6 [17...♔g8 18.♟h7+ ♔h8 19.♟e4 +-]

18.♔e2! Creating the threat of ♔h5!

18...g6 [18...♔e8 19.♟g6 +-]

19.♟xg6 ♔g7 20.♟h6+! The last shock for Black.

20...♔g8 [20...♔xh6 21.♔h5+ ♔g7 22.♔h7#]

21.♞xc6 ♟xc6 22.♔xe6+ ♔h8 23.♟xf8 ♔xf8

24.♔xc6 Black resigned! It was amazing how effectively Alekhine punished his opponent for the slightly careless move 10...0-0.

1-0

Editorial Preface

I guess we are enjoying one of the most exciting chess months, with Wijk aan Zee and Gibraltar on the way.

Let's begin with Wijk aan Zee: In the A group, it's a "one man show", and the name of the man is Magnus Carlsen. It seems like nobody can stop the young chess genius, and that he's climbing to reach the 2900 rating after this tournament. He started with 8/10 and a performance of over 3000 ELO. We are very curious about what he will do in the last 3 rounds.

Vishy Anand is finally having a good tournament, playing solid chess and being quite "lucky" in his openings. He crushed, for example, Aronian with the Black pieces, in a fantastic game that we commented for You in the last CEWN Nr 47.

Hou Yifan is also doing "surprisingly" well, winning her second game in the tournament against Harikrishna.

In the B group, the fight is quite exciting with many people close to the top, so the last 3 rounds will decide the winner.

Gibraltar: One of the biggest opens of the World has begun with a lot of 2700+ Elo players participating. Already in the first round, there were a lot of surprises: the two first seeds made draws against players with an Elo rating 500 points lower! In chess, everything is possible!

In the current issue, we comment the best highlights from Wijk ann Zee for You. Enjoy!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Naiditsch, Arkadij (2708)
— Grandelius, Nils (2572) [B91]

75th Tata Steel GpB Wijk aan Zee NED (6.4), 18.01.2013

[Arkadij Naiditsch]

I managed to win a nice and short game over the young Swedish grandmaster Nils Grandelius. After the game, Nils told me that he used his preparation until the 17th move. I was a bit surprised because I evaluated my position as being better. I think that we shouldn't always trust the evaluation of a computer engine, especially in structural positions.

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♗xd4 ♘f6 5.♗c3 a6 6.g3 The Najdorf with 6.g3 is not just a sideline anymore. Lately, it has gotten more and more attention even on the highest level. The idea of the move is simple, to put the bishop on g2 and play f4.

6...e6 [6...e5 is probably the main reply here. It's hard to say if White got an advantage here, but many of the positions haven't been well analyzed yet, which makes the play less dependent on preparation.]

7.♗g2 ♗e7 We are getting into a position that we can very often see in the classical Sheveningen, where White usually plays f4, ♗f3, g4, ♗g2. In comparison to that variation, White is obviously saving a full tempo by playing g3-♗g2. [7...♗d7 followed by ♗c6 deserves attention, in my opinion.]

8.0-0 ♖c7 9.f4 ♘c6 A normal looking move that immediately leads to a very forced series of moves. [9...0-0 would have been a more solid setup for Black.]

10.♗xc6! I thought for a while before taking on c6 — a big decision to make. Things get very forced afterwards and the simple 10. ♗e3 could be a normal way to continue the game.

10...bxc6 11.e5 Of course. Only this move can be the idea after taking with 10.♗xc6. If I don't play e5, Black's pawn structure is very good. For example, in case of 11. ♗e3 d5!, Black is completely fine.

11...dxe5 [11...♗d5?! simply leads to a clearly worse position for Black. 12.exd6 ♗xd6 13.♗e4 followed by c4 and White is very good.]

12.fxe5 ♗d7 Black's pawn structure looks horrible, but White's e5 pawn is going to fall. This makes the position pretty forced.

13.♗f4 To develop the bishop and, at the same time, to protect the e5 pawn can't be a bad idea.

13...0-0 Now Black wants to take on e5. He also has another idea to win this pawn connected with the g5 move.

14. ♘e4 When I played this move, I was a bit afraid of blundering something. Until here, my opponent played all his moves instantly, but it seemed to me that White should be better. I didn't see any move other than taking on e5 for Black. My next move could be ♙h5.

14... ♖xe5 My opponent kept playing very fast, which was slightly irritating for me. Is this a good position for Black?!

15. ♙d4 Forcing Black into a horrible pawn structure.

15... ♜f6 There's no other normal way to defend the knight on e5.

16. ♘xe5 The first critical moment of the game. What piece should take on e5?

16... ♜xe5 This was the first time that my opponent spent some of his time. [In case of 16... ♙xe5 17. ♙xe5 ♜xe5 18. ♖ad1 I think White should have a better endgame. White's plan is simple: to play b3 and c4, and then to bring the king to e3. The bishop on c8 is really a horrible piece, and it doesn't seem like the bishop will be able to escape. Even if Black manages to exchange both pairs of rooks — which is not easy — I think White would still keep some winning chances in the endgame.]

17. ♜xf8+ ♘xf8 **18. ♙c4!** A nice but not very difficult move to make. Mainly, I thought about playing 18. ♙d3 or 18. ♙c4, and both of these moves seemed to be promising. If we look at the position, White is a pawn down, but has a very strong knight on e4 and is better developed — this always gives hopes for an attack. Black's pawn structure is really bad and the bishop on c8 is a „dead“ piece. All of this should give White a clear plus, but the

computer still gives a 0.00 evaluation here. I guess that's why my opponent chose to enter into this position.

18... ♙b6+ Nils is playing „all or nothing“ and I think this is the right choice for Black here, even though it probably leads to a lost position. He's going to win a second pawn, to make „sure“ that, at least, he is suffering with two extra pawns.

19. ♖h1 ♙xb2 **20. ♜f1** Things are getting darker around the Black king...

20... ♙b4 [During the game, I was more concerned about other Black's continuations: 20... ♙b5 21. ♙c3 White is transferring the queen closer to Black's king. 21... ♖a7! A typical and strong defensive idea. Black's rook is back into the game. 22. ♙f3 ♙b4 Here I wasn't sure about how to go on, to play ♙h5 or 23.c4 I was happy when I saw this move. Black can't stop White from playing c5 next. 23... ♙e7 24.c5 White's position looks really nice! I was sure that I had „at least enough“ compensation for two pawns.]

21. ♙d3! Not getting tempted by capturing a third pawn... [21. ♙xc6 ♘b7 22. ♙xe6+ ♖h8 23. ♙xe5 would have been another way, but I think Black had pretty good

chances to make a draw. I can't stop Black from playing ♗xe4 and the opposite colored bishop position is always likely to end in a draw.]

21...♔e7 White wanted to play ♘g5 next...

22.h4 Simple and good. I want to continue with ♘g5, creating at the same time a better place for the White king on h2. Also, the idea of playing ♕h3 is getting stronger.

22...h6 When I saw Nils playing this, I thought „Yes“ :). Now the game will have a pretty finish. [More fighting, and harder to find, was 22...♖a7! 23.♘g5 g6 24.♖f7 and it seems like White is winning, but 24...♗d7! keeps Black in the game 25.♖xe7 ♖xd3 26.♖c7 and White has a big advantage in this endgame because of the horrible bishop on c8.]

23.♘g5! What a nice finish!

23...e4 To give up the e-pawn doesn't change anything.

24.♖xe4 hxg5 25.♖g6 Black can't stop White from playing ♕e4. My opponent made it slightly „too“ easy for me, but games like this inspire :). I guess this is what I like most about playing chess!

1-0

(2) Leko, Peter (2735)

– Caruana, Fabiano (2781) [C84]

75th Tata Steel GpA Wijk aan Zee NED (5.1), 17.01.2013

[Csaba Balogh]

We are facing a nice strategical victory by Leko. He had a positional idea in mind, which he succeeded to bring through in the game.

1.e4 e5 2.♘f3 ♘c6 3.♕b5 a6 4.♕a4 ♗f6 5.0-0 ♕e7 6.d3 Another game in the Ruy Lopez with 6.d3. The huge main line, 6.♖e1, is almost forgotten.

6...b5 7.♕b3 d6 8.a4 ♕d7 9.c3 0-0 10.♕c2 Theory is just about to develop here, Black has many different set-ups. Caruana follows the latest fashion, which was played by Aronian against Karjakin a month ago. [10.♘bd2 is the main, but here Black can fight for the center with 10...♘a5 winning a tempo 11.♕c2 and 11...c5!]

10...b4 11.♖e1 ♖e8 12.♘bd2 ♘a5 [12...♖b8 was played by Aronian in the mentioned game. Probably, Leko prepared thenovelty 13.h3 ♕f8 14.d4 and it looks like White has an initiative.]

13.d4! Logical reaction, After the Black knight has left control over the central squares, White doesn't need to worry about motifs like $\text{exd4 cxd4 } \text{g4}$. Of course, by playing 6.d3 , White doesn't forget about playing d4 , he just wants to do it in a better version after developing the pieces. [13.cxb4 is a mistake, because of 13...c6 Black wins back the pawn and White loses control over the center.]

13...f8 14.h3 Both h3 and h6 are very useful in general in this kind of positions. On the other hand, it was not necessary. White could have played d3 immediately.

14...h6 15.d3! By pushing b4 , Black weakened his a6 pawn and the c4 square. d3 tries to make use of this.

15...bxc3 [15...c5 immediately would have been an inaccuracy. White plays 16.cxb4! and Black has to take away from the center. 16...cxb4 White can look for an advantage in two different ways: 17.d5 A closed game with a space advantage.(Or 17.b3 b2 next is also good.)]

16.bxc3 c5

17.d5! A strong move! White has the space advantage now. The game demonstrates well the difficulties of

Black's mobility problems. The next task for White is to create an outpost on c4 for the knight. To do this, he needs to trade it once and transfer the other one from f3 .

17...c7 18.c4! xc4 19.xc4 eb8 20.d2! Everything goes according to the strategy.

20...e8 Black tries to bring his knight to b6 , in order to kick out its colleague from c4 .

21.d3 d7 [21...a5 to prevent the next move is a mistake. White gets the b5 square. $\text{22.e2! } \pm$ and b5 next.]

22.a5! White needs to keep his knight, so it can go to c4 . However, this is an achievement for Black as well: he got the b5 square for the bishop. Lacking space, Black has to move his pieces weirdly, so that they can get to their ideal places.

22...f6 23.c4 b5 24.b6! It's still important to keep the knight on the board.

24...a7 25.e2 [$\text{25.c2!?$ was also very interesting, following the principle that you shouldn't exchange pieces with a space advantage. 25...e8 (Black can't play 25...d7 as it drops a piece after $\text{26.c4! xb6 27.axb6!}$) 26.e3! transferring the rook to g3 . 26...d7 27.c4! and of course, White keeps his knight once again. Black has to waste a move again, in order to play b5 , while White can always improve his position.]

25...xd3 26.xd3 d7 27.c4! Finally White has reached his goal. Black can't touch the c4 knight, which is very annoying for him.

27...ab7 28.d2 b5 This shows very nicely that the only open file is occupied by the Black rooks, but he can't do anything with it. The c4 knight neutralizes all the ide-

as. The next step for White is to open a new front for the battle.

29. ♖f1! The plan is f4!

29... ♜e7 30. f4! ♜f6 Black must try to hold the e5 square. [30...exf4? is not an option, as the d6 pawn becomes too weak. 31. ♜xf4 ♚g3 is a threat.]

31. g3 White prepares to improve his position. Black doesn't have a useful plan anyway.

31... ♜8b7 32. ♚g2 ♞f8 33. ♜f2! Doubling the rooks.

33... ♞g6 34. ♜af1 White holds the tension! [34.f5 would be premature 34... ♞f8 and Black builds up a kind of fortress.]

34... ♚e7 [34...exf4 is still a mistake 35. ♜xf4! ♞xf4+ 36.gxf4 ± and White is going to break through with e5!]

35. ♚h2 ♜b8 It's time to make a new plan for White. How to improve his position?! It must be definitely connected with a kingside attack. [35...exf4 is met this time with 36.gxf4! The previous ♚h2 move was prophylactic for this position. White left from different kind of threats, like the moves ♞h4 and ♜h4.(36. ♜xf4 is a mistake, because Black can consolidate the e5 square. 36... ♜e5)]

36. ♜g2! The idea will become clear soon.

36... ♚c7 37. ♜fg1! ♜b3 38. f5! With his previous rook moves, White has prepared to close the position, followed by an attack with g4-g5.

38... ♞f8 39. h4! This is the right move order of the attack. [On 39.g4 Black wanted to react with 39... ♜g5 locking the position.]

39... ♚d7? [39... ♞h7 was necessary, although White is better here as well, after 40. ♞b6! Suddenly the Black pieces are focused on the kingside, and White might think about plans on the queenside. a6 is weak and the b3 rook could be trapped.]

40.g4!! After this nice pawn sacrifice, the game is over. Black can't stop the attack.

40...g5 [40...♙xh4 is refuted by 41.g5! hxg5 42.♙xg5 ♙xg5 43.♖xg5 f6 (43...g6 loses to 44.♔h3! +- and ♖h5 next!) 44.♖h5 Black gets mated after ♔h3.]

41.fxg6 fxg6 [41...♘xg6 also leads to a hopeless position: 42.g5! hxg5 43.♙xg5 ♙xg5 44.♖xg5 ♔f8 45.h5 ♘f4 46.♔g3 ♔e7

The most precise and elegant way to conclude the game is 47.♖xe5+! dxe5 48.♔g5+ f6 (48...♔e8 49.♔xe5+ ♔f8 50.♔xf4 +- is over. The knight on c4 dominates both of the rooks still.) 49.d6+ ♔d8 50.♔xf6+ ♔c8 51.♖g8+ ♔b7 52.♖g7 +-]

42.g5 The g-file is opening on the king.

42...hxg5 43.♙xg5 ♙g7 [43...♙xg5 44.♖xg5 +- followed by h5 is also lost for Black.]

44.h5 ♖8b4 45.hxg6 Black resigned. A really high level performance by Leko.

1-0

(3) Grandelius,Nils (2572)
– Ipatov,Alexander (2587) [B60]

75th Tata Steel GpB Wijk aan Zee NED (5.3), 17.01.2013

[Csaba Balogh]

An extraordinary game with many nice tactical ideas.

1.e4 c5 2.♘f3 ♘c6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 d6 6.♙g5

6...g6 A very interesting surprise weapon. If White is not well prepared, the initiative might quickly pass to Black.

7.♙xf6 exf6 Black's healthy pawn structure got destroyed, but he got the bishop pair as compensation. Black's idea is to play ♙g7, 0-0 and f5, getting rid of the doubled pawns and opening the diagonal for the g7 bishop.

8.♙c4 [8.♙b5 ♙d7 9.♔d2 ♙g7 10.0-0-0 is another critical line from the opening's point of view.]

8...♙g7 9.♘db5 White chooses the most direct way to punish Black for his opening choice. Black has no choice, he must sacrifice the d6 pawn and try to look for counterplay.

9...0-0 10. ♖xd6

10...f5! This is the right move, Black must activate the bishop pair. We are still at the beginning of theory.

11.0-0-0 ♖b6! Black tries to win a tempo in order to develop the initiative by attacking the f2 pawn. [Mainly 11... ♖a5 was played before, but the text move seems to be stronger. The young Carlsen showed in a blitz game how to get an advantage for White. 12. ♖c7! ♙xc3 13.bxc3 a6 Black seems to be all right, but a brilliant move causes real problems.

14. ♖d8!! Of all the hanging pieces, Black can only take the queen, but it also leads to a worse endgame. 14...

♙xc7 (14... ♖xd8 15. ♖xf7+ ♔h8 16. ♖f6#) 15. ♖xf8+ ♔xf8 16. ♘xc7 ♖a7 17. ♙d3 ± Carlsen-Gurevich, blitz 2006.]

12.f4 fxe4 13. ♘d5 [13. ♘xe4 ♙f5 would yield more than enough compensation for Black.]

13... ♖a5 14. ♘f6+ ♔h8 15. ♘c7 Only this move is a novelty, but probably it still existed in Black's preparation, as this is the computer's recommendation.

15... ♙e6!! Excellent decision. The game becomes incredibly sharp and entertaining. [15... ♖b8 allows 16. ♘ce8!! An unusual idea, after which White takes the strong bishop and the king becomes vulnerable. A threat could be ♘xg7 ♙xg7 ♖d5, and on ♖b6, ♘h5 gxh5 ♖g5 ♔h8 ♖f6 mate.]

16. ♙xe6 fxe6 [16... ♖ad8! would have been even stronger. 17. ♙d7 White preserves his extra piece, but the attack seems to be more than dangerous. 17... ♖xa2 e3 threatens with ♖a1 mate. 18. ♘cd5 ♖a1+ 19. ♙d2 ♖xb2 White could hardly hold the pressure in a practical game.]

17. ♘xa8 ♖xa2! [17... ♖xa8? is too slow. 18. ♖xe6 White protects his a2 pawn and enjoys being an exchange up.]

18. ♖c7 Grandelius takes the challenge and keeps all his pieces on the board. [Probably, most of the players would have preferred 18. ♖a3 when Black is forced to trade queens. 18... ♖xa3 19. bxa3 ♙xf6 20. ♖c7 White's prospects are slightly better.]

18... ♖a1+! 19. ♔d2 ♖xb2 Black is a rook down at the moment, but there are many threats in the air, like ♖d8 or simply ♖xf6, when, even materially, Black is fine.

20. ♖ce8! [20. ♖xe6 ♖xf6 The knight protects both queen checks on the back-rank.]

20... ♖d4!? The most ambitious move. [Objectively, Black should have forced a draw by playing 20... ♖xe8! although the point of the sacrifice is only clear for computers. 21. ♖xe8 ♙c3+ 22. ♔e3 ♙b4!! This is extremely strong. It frees the c3 square for the queen, with tempo. Now it's White the one who needs to find only move. 23. ♖d7! (23. ♖xe6 leads to a forced mate. 23... ♙c5+ 24. ♔xe4 (24. ♔d2 ♖d4+! 25. ♔e1 (25. ♔c1 ♙a3+ 26. ♔b1 ♖b2#) 25... ♖f2#) 24... ♖xc2+ 25. ♔f3 ♖f2+ 26. ♔e4 Black has several ways to win, but the most precise is 26... ♖xg2+ 27. ♔d3 ♖b4+ 28. ♔c4 ♖c2+ 29. ♔b5 a6+ 30. ♔a5 b6+ 31. ♖xb6 ♖a2# This is the end of the journey.) 23... ♙c5+ 24. ♔xe4 ♖xc2+ 25. ♖d3! This is the reason why the queen had to

go to d7. Now Black doesn't have more than a perpetual check. 25... ♖xg2+ 26. ♖f3 ♖c2+ 27. ♖d3 ♖g2+ =]

21. ♖xg7 The g7 knight becomes the key piece in White's defense. It controls the f5 square against the knight checks...

21... ♖c8? Black is lost after this move, but of course, in a practical game things are not clear at all. [21... ♖xc2+ 22. ♔e3 +- is not enough. Here is an example of the usefulness of the g7 knight, ♖f5 is not mate.; 21... ♔xg7 was the best. White can only get a slightly better endgame after all. 22. ♖c7+ ♔xf6 23. ♖b1 Probably Ipatov stopped calculating here, because if the queen moves, ♖e5 and ♖b7 finishes the game. However, he has 23... ♖b3+! 24. ♔e2 ♖d4+ 25. ♔f2 ♖xc2+ 26. ♖xc2 ♖xc2 27. ♖hc1 ± with a small edge.; 21... ♖xf6 Now, the strongest is the cold-blooded 22. ♖he1! ♔xg7 23. ♖c7+ ♖f7 24. ♖c3 ±]

22. ♔e3!? This is the human move! [The machine suggests 22. ♖xe4!! ♖xc2+ 23. ♔e1! It looks really suspicious, but Black has no real threats. 23... ♖e2+ 24. ♔f1 The check are over, Black has to sacrifice. 24... ♖f2+ 25. ♖xf2 ♖b5+ (25... ♖e2+ 26. ♔g1 +- The rook is protected.) 26. ♖d3! and game over. (However, not 26. ♔g1?? because of 26... ♖e2+! 27. ♔f1 ♖g3+ 28. ♔g1 ♖f1+! 29. ♖xf1 ♖e2#

with an amazing final position. Black is basically a full chess set down, but he gives mate with a single knight!)]

22...♔c3+ [22...♘xc2+ 23.♔xe4 ♔c4+ 24.♔f3 +- wins for White.]

23.♔d3 This is the human decision, once again. [However, the computer is not afraid again, and plays 23.♔f2! e3+ 24.♔g3! (24.♔g1?? would change the final outcome 24...♔xc2 and White gets mated, for instance, after 25.h3 ♔f2+ 26.♔h2 ♘f3#) 24...e2+ 25.♔d3 e1♔+ 26.♔xe1 ♔xe1+ 27.♔h3 +- White is out of the danger zone.]

23...exd3 24.♔xd4 White is two knights up and Black can only get one back if he trades queens, but it would lead to a lost endgame. So, he must try a desperate attack.

24...♔xc2 [24...♔xd4+ 25.♔xd4 ♔xg7 26.♘e4 dxc2 27.♔c1 +- White has a technical win.]

25.♔e1! Preventing ♔e2 and activating the rook.

25...d2 26.♔xd2 ♔b3+ [26...♔c3+ 27.♔e2 +- White is safe.]

27.♔e4!! White is not afraid. Excellent calculation!

27...♔c4+ 28.♔e5 ♔c5+ [28...♔b5+ is refuted by 29.♔xe6 ♔c6+ 30.♔f7! +- and White is ready to cover the checks from e7 and e6.]

29.♔d6! There is no way back!

29...♔b6+ 30.♔e7 ♔c7+ 31.♘d7! And the king has found its shelter. The game is over.

31...♔xg7 32.♔xe6 ♔c5+ 33.♔d6! Quite a picturesque position! Black should exchange the queens, but that would also be a kind of resignation. Other moves lead to mate, and the Black king gets it.

33...♔c4 34.♔e5+ ♔g8 35.♔f6! ♔e8 is the threat.

35...♔c6 36.♔b8+ ♔c8 37.♔e8+ What an amazing game!

1-0

(4) Sokolov,Ivan (2663) — Leko,P (2735) [E53]

75th Tata Steel GpA Wijk aan Zee NED (10), 23.01.2013

[Arkadij Naiditsch]

Peter Leko doesn't win too many games in general, and especially not with Black, but this time Ivan Sokolov pushed Peter practically into doing so! We'll now see a nice tactical win by the Hungarian who, not so long ago, was the number 2 in the world and played a WCC match against Kramnik.

1.d4 ♘f6 **2.c4** e6 **3.♘c3** ♙b4 **4.e3** Lately, many players have started to play the Nimzo against Peter Leko. Maybe nobody can find a way to hit him anywhere else...

4...0-0 **5.♙d3** c5 **6.♘f3** We are in the very main line of the Nimzowitsch variation.

6...d5 **7.0-0** cxd4 One of the most popular lines nowadays.

8.exd4 dxc4 **9.♙xc4** Now the structure is fixed. White has an isolated pawn on d4 and Black will try to make sure that White's move d4-d5 won't be possible. In such positions, Black's major idea is to exchange as many pieces as possible; White's idea is to play for an attack trying to keep the pieces on the board, of course.

9...b6 Obviously, the best place for the Black bishop is on b7.

10.♙g5 ♙b7

11.♖c1 A quite important move. Now White is prepared to take with the rook on c3 if Black tries to exchange a piece. The rook on c3 could quickly be transferred to g3 in order to help in the attack.

11...h6 This is still a theoretical position. Leko didn't play h6 against me here, and started immediately with ♘c6. We'll see if h6 is a good or bad improvement later.

12.♙h4 Of course White doesn't exchange on f6 because this would lead to a good position for Black.

12...♘c6 As we can see, ♘c6 is a better option this time, followed by ♘bd7, which could be other logical move. Why?! Because White doesn't have the option of playing ♘e5 in the future.

13.♙d3 Another logical move for White, with the idea of playing ♙b1 and ♖d3 next...

13...♙e7 **14.♙b1** ♖c8 We are in the first critical position. White needs to start playing dynamically, there's no time to lose! Black is ready to play ♘h5-♘d5, or ♘b4 followed by ♘bd5.

15.♖e1 Ivan is actually following my game — which I didn't remember, but looked up :).

15...♘h5! A strong novelty by Leko! [In my game against Eljanov, this was the continuation: 15...♖e8 16.a3 ♘h5 17.♔d3 Now we can see the idea behind ♗b1–Qd3. 17... ♗xh4 18.♔h7+ ♔f8 19.d5 with a very strong attack for White.]

16.♔c2 Ivan is going into complications. [Of course, in case of 16. ♗xe7 ♘xe7 followed by ♘f4, only Black can be better.]

16...g6 17.♖xe6 It seems like White is doing fine! To take on e6 is not possible because of ♗xg6, and White threatens to play ♖xg6 next.

17...♘f4! That's Black's key idea! Protecting against ♖xg6 and, at the same time, the rook on e6 and the bishop on h4 are hanging.

18.♖xe7 An interesting exchange sacrifice by White. It's a pity that Ivan didn't know that Leko was prepared many moves ahead... [It isn't good to play 18. ♗xe7 ♘xe7 19.♖e3 ♘f5 and Black is doing great.]

18...♘xe7 19.♔d2 For a human, this is a very complex position that looks pretty promising for White, but in fact, Black is doing good here. And he need to find:

19...g5! Only move. It seems like White doesn't even have enough initiative for being an exchange down.

20.♘e5 [Against the tempting 20.♘xg5 Black also has a strong response: 20...♗eg6! attacking the h4 bishop. And White is not on time again.]

20...♗eg6 A ♗eg6 is very strong! Once again...

21.♘xg6 [It would lead to a slightly better fight to play 21. ♗xg6 fxg6 22. ♗g3 but here Black has the easy move „for a computer” 22...♘xg2! Why not to take a pawn when you can... 23.♘xg6 ♖f6 Black is clearly much better here. He's an exchange up and the attack should be enough to win the game.]

21...fxg6 22. ♗g3 ♘xg2 I guess Leko knew everything until here... The position is winning for Black in an easy looking game, but for a human to see and judge the complications after 15...♘g5! is very-very difficult

23.♔c2 The last attack on g6 is getting stopped by Black as well.

23...♖f6! The simple st and safest... Black wants to play ♘h4 or ♘f4 next, and White has nothing to stop Black from doing it.

24. ♖e5 [It doesn't help to play 24. ♔xg6+ ♔xg6 25. ♖xg6 ♘f4 and Black should win the game quite easily...]

24... ♔f7 **25.a3** White's bishop finally got activated on a2, but it's already too late...

25... ♘h4 **26.** ♖a2 ♔xa2 A very nice game by Black, and I guess Leko knew everything at least until the move 19... g5!. Once again, a good example which shows that to work on chess definitely makes sense! [26... ♔xa2 27. ♘xa2 ♖xc2 28. ♖xc2 ♘f3+ 29. ♔f1 ♖a6+ 30. ♔g2 ♘e1+-+]

0-1

Endgame section

(15) Caruana,F (2781) – Nakamura,Hi (2769) [A56]

75th Tata Steel GpA Wijk aan Zee NED (10), 23.01.2013

[Chess Evolution]

We got to this position after the time trouble. Thanks to the bishop pair, the weak dark squares and the better structure, Black is much better. Let's see how Naka converted his advantage.

40...Kf7 41.Rb2 Bf6 The bishop came here to avoid any pawn exchange.

42.Rb1 Kf6 43.Rf1 Ke7 44.Be4 Rg8 45.Rh1 h4 To make moves like this, we have to be sure about everything, but Naka probably has already seen many winning ideas.

46.Bf3 Rf8 47.Rd1 Rd8 48.Rf1 Bg6 49.Be4 Bh5 Of course, Black keeps the pair of bishops.

50.Bf3 Rf8 51.Nf2 Bg6 Naka didn't improve his position so much, but he's winning time. This is a typical strategy to convert a long-term advantage.

52.Ne4 Caruana decides to change the way to defend. He found the other setup with a knight on e4. What would happen if he puts the knight on d3? [52.Nd3 Bc5+ (52... Bf4+ 53.Kf2 Rd8 54.Rd1 Bg3 55.c5 (55.Kf3 e5 56.Bd5 (56.Be4 Bf4+ 57.Kf3 Bh5+) 56... Rd6 An important place for the rook, in order to push e4. 57.Rf1 e4 58.Nc1 Bf4+ 59.Kd4 Rf6) 55...e5 56.Bg4 bxc5 57.Nxc5 Rxd1 58.Kxd1 Bf2 and White has problems with the knight.) 53.Nxc5 I suppose Caruana wanted to avoid the positions after the exchanges on c5. (53.Kf2 Bd4 54.Kd2 (54.Rd1 e5 55.Kd2 Kd6 But not 55...e4, because of 56.Bxe4! 56.Rf1

56...g4 A similar idea to the one we'll see in the game. **57.Be4 (57.hxg4 h3; 57.Bxg4 e4) 57...gxh3 58.gxh3** Black

should easily win this position. For example, the winning plan can be to grab the weak h3 pawn after ♖e8-♖d7 or ♖g8-♖g3.) 54...♖d8 55.♔e2 ♖d6 56.♗b7 ♗c3 57.♖d1 e5 58.♜f2 (58.c5 ♖f6; 58.♗d5 ♖xd5 59.cxd5 ♗h5+) 58...♗d4 59.♗e4 ♖f6 60.♗xg6 ♖xf2+ 61.♔d3 ♖xg2 62.♗f5 ♖g3+ 63.♔e4 ♖xb3 With two pawns less, the opposite colored bishops won't help.) 53...bxc5 54.♖f2 ♖b8 (54...e5 55.♖d2 ♖d5 is coming.; 54...♖d8 55.♗e4 ♗xe4 56.♔xe4 ♖d1 57.♖e2 ♖d4+ 58.♔e3 e5 59.♖f2 ♖f4 60.♖d2 ♗) 55.♗d1 ♖d8 56.♗c2 From a logical point of view, without bishops, White should have more chances. 56...♗xc2 57.♖xc2 ♔f6 (57...♖d4 58.♖c1 e5 59.♖f1 ♔e6 60.♖f8 ♗) 58.♖f2+ ♔e5 59.♖f1 ♖b8 60.♖b1 ♖b7 61.♖b2 ♖f7 62.♖d2 ♖f1 63.♖d8 ♖b1]

52...♗c5+ 53.♔d3 [53.♜xc5 bxc5 This position has to be lost because White is simply „a pawn down“.; 53.♔e2 ♖f4 54.♜xg5 (54.♜xc5 bxc5 55.♖c1 ♖d4 56.♖c3 e5 57.♗g4 ♔f6 58.♖f3+ ♖f4) 54...e5 Now White can't move the rook because after ♔f6, he'll lose the knight. (54...♔f6 55.♜e4+ =) 55.♗d5 ♗d3+ 56.♔xd3 ♖xf1]

53...♖d8+! Black's idea now is to force White to exchange on c5. Then, it will be easier to improve his position. [53...♖f4 This move should be enough as well. 54.♖e1 ♗f5 55.♖e2 (55.♖h1 ♔f7 56.♖e1 ♔g7 Black doesn't need to hurry with the final hit on h3. First, he can place his pieces on optimal squares. 57.♖h1 e5 58.♖e1 ♗d4 59.♖h1 ♔h6 60.♖e1 ♗xh3) 55...♗xh3 56.♜xg5 ♗f5+ 57.♗e4 (57.♜e4 h3; 57.♔d2 ♖d4+ 58.♔e1 ♗d6 59.♜e4 ♗f4) 57...♔f6 58.♗xf5 exf5 59.♜e6 (59.♜f3 h3) 59...♖g4 ♖b3]

54.♔c2? Caruana could still fight after: [54.♔e2 ♖d4 55.♜xc5 bxc5 But as we said before, this position is just lost.]

54...g4!! A fantastic tactical idea overlooked by Caruana in his long calculation! White's setup is crushed now! [54...♖d4 55.♖e1 ♗b4 56.♖e2 This position is what Caruana expected. His setup now is very solid and it's not easy for Black to improve because the knight on e4 won't allow the Black king to go to b4 or g3. 56...e5 57.♔c1 ♔e6 with the idea of taking the king to g3, but now comes 58.♗g4+ ♗f5 59.♗f3 =; 54...♗b4 55.♖d1]

55.hxg4 h3 56.♖d1 [56.gxh3 ♖f8 57.♔d3 ♖f4 and White is losing material.]

56...♖f8 57.♔d3 h2 58.♖h1 ♗g1 Without the rook, White can't fight anymore.

59.♔e2 ♗xe4 60.♗xe4 ♔f6 61.♗f3 ♖d8 0-1

(16) Ribli,Z (2554) – Sebenik,M (2543)

Austrian league, 18.01.2013

[Chess Evolution]

The position is a very easy theoretical draw, but the Hungarian legend, Zoltan Ribli, sets a very deep trap to his opponent.

86. ♖a7+! ♔d6? Very interesting, but after this obvious move, Black's position seems to be lost. [Black should have defended passively, 86... ♖e8 After this, Black basically only needs to keep the e4 pawn under attack; if the White king wants to get access to the f6 pawn, the rook should cut it along the file... 87. ♔f3 ♖f1+ 88. ♔g4 ♖g1+ 89. ♔h5 ♖f8= followed by passing on the g-file. White can't make progress.]

87. ♔f3! The king is heading to g6.

87... ♖f1+ [Preventing ♔g4 with 87... ♖g1 is refuted by 88. ♖f7! ♔e5 89. ♖e7+ ♔d4

90. ♖d7+! After this eck, the Black king can't go back to e5, because the f6 pawn would fall. 90... ♔e5 (90... ♔c5 91. ♖f7+-) 91. ♖d5#]

88. ♔g4 ♖g1+ [88... ♔e5 is met with 89. ♖e7+ ♔d4 90. ♔h5 ♖g1 is a must against ♔g6, but the same plan that was seen in the game wins for White as well. 91. ♔h6! ♖g2 92. ♖g7! will transpose to the game...]

89. ♔h5 ♔e5 90. ♖e7+ ♔f4 Black seems to be all right, as he cut the king and is ready to trade the e4 pawn for the f6 one, but...

91. ♔h6!! Black can't prevent ♖g7, followed by ♔g6. The position is lost.

91...♖g2 92.♖g7! ♖a2 93.♔g6 ♔xe4 [93...♖a6 loses to 94.♖e7 +- and ♖e6 next.]

94.♖e7+ ♔f4

95.♖e6! An important preparation before collecting the pawn. [95.♔xf6? ♖a5 =]

95...♖g2+ [If Black waits with 95...♖a1 96.♖b6! +- is relevant. White already wants to take with ♔xf6, as on ♖a5, he has ♖b4 check.; 95...♖a5 96.♖xf6 ♖e5 (96...♔g4 97.♖f8+-) 97.♖b6 +- The f-pawn promotes automatically.]

96.♔xf6 ♖g8 97.♖a6 ♖f8+ 98.♔g6 The pawn can't be taken, which means the end of the game.

98...♖g8+ 99.♔f7 ♖b8 100.f6 An instructive rook end-game!

1-0

Clash of the Titans

(17) Yates, Frederick — Capablanca, Jose Raul [B29]

Moscow Moscow, 1925

[Csaba Balogh]

Capablanca quickly outplayed positionally his opponent, who was also one of the best chess players at that time.

1.e4 ♞f6 The Alekhine defense.

2.e5 ♞d5 **3.♞c3** Black immediately equalizes after this move. [White has to play 3.d4 to fight for the advantage, but of course, this is just the beginning of the theory.]

3...♞xc3 **4.dxc3**

4...d5! Black is playing for a healthy development with c5 and ♞c6. He already has the better pawn structure.

5.♞f3 **c5** **6.♞f4** White decides to play a sharp game with ♞d2 and 0–0–0, however, it turns out to be a bad decision.

6...♞c6 **7.♞d2** [7.♞e2 and 0–0 was more solid, with an even position.]

7...♞g4! Logical move. Black has to play e6 to stabilize the d5 pawn and finish the development, but he didn't want to lock his light squared bishop.

8.0–0–0! The drawback of this move becomes clear soon. [White should have opted for castling kingside with 8.♞e2 e6 9.0–0 although Black has a comfortable position here as well. 9...♞c7 10.♞fe1 ♞e7 11.h3 ♞h5 Black has the initiative, but a long fight is ahead.]

8...e6 **9.h3?** [9.c4 would have been the only move to keep the pieces active. Black has to keep the position closed with 9...d4 but, at least, White gets the e4 square for his bishop. 10.♞d3 ♞e7 11.♞e4 ♞c7 Black should be better here as well. ♞h5–g6 appears to be a strong plan, exchanging the powerful bishop on e4, followed by an attack with a6–b5.; 9.♞e2 is met, similarly to the game, with 9...♞xf3! 10.♞xf3 c4! and the f3 wn is dead. White has no chance to open the position, while Black is ready for a dangerous attack with b5–b4!]

9...♞xf3 **10.gxf3** ♞c7?! The only one inaccuracy in the game by Capablanca, which could have allowed some counterplay to his opponent. [10...c4! was the right move immediately.]

11.♞g3? [11.c4 was necessary again. 11...d4 and g6 ♞g7 next. Black is better.]

11...c4!! A great move, which basically kills the f1 bishop. It has no chance to enter the game. His colleague on g3 is not better either. On the other side, Black has a clear plan to push b5-b4, launching a strong attack.

12.f4 g6! Necessary prophylaxis against the threatened f5.

13.♔b1 h5 14.♙h4 [14.h4 would be a complete disaster for the bishop pair!]

14...♙e7 Capablanca, t want to give any chance. He's trading the bishops and wants to play against the poor piece on f1.

15.♙g5?! Yates decided to give a pawn, at least to open the position a bit, but he gets no compensation at all for it. Black's still dominating. [15.♙xe7 ♔xe7 and b5-a5-b4 next. White can only see what Black is doing with him.]

15...♙xg5 16.fxg5 ♘xe5 [16...b5 17.f4 a5 was also possible, but why not to accept the pawn?!]

17.♔e3 0-0! The king is safe on g8.

18.♙e2 ♘c6 19.f4 ♘e7! This even prevents the f5 sacrifice. White has no chance to create counterplay.

20.♖hg1 ♘f5 21.♔f2 ♖fe8 There was no need for this move. Black could have started his attack with b5 immediately.

22.♖ge1 b5 23.♙f1 a5 24.♖e5 b4 The end is near!

25.♔e1 ♖eb8 26.♔a1 ♖b6 Black can do whatever he wants. He doubles his rooks on the b-file.

27.♔d2 ♖ab8 28.♖b1 White tries to defend, but Capablanca brings another piece to the attack.

28...♖d6! 29.♙g2 ♘b5 The winning threat is bxc3 and ♘a3.

30.cxb4 c3 The final breakthrough. Black succeeds to open the lines in front of the White king.

31.bxc3 ♘xc3 32.♖b3 axb4 33.a3 ♖a6 34.♖e3 ♖ba8 35.♖ex3 Instead of resignation.

35...bxc3 36.♔c1 ♔c5 37.♔a2 ♔c4 38.♔a1 ♔xb3 A pretty finish. The key move was 11...c4, and the play against the light squared bishop was really instructive.

0-1

Editorial Preface

Another amazing week of chess came to an end with the final results of 2 amazing chess events, the Wijk aan Zee Tournament and the Gibraltar Open.

Let's start with Wijk ann Zee:

In the A group, already one round before the end, the winner was known, and it was Magnus Carlsen! The last round didn't bring big changes either, so Magnus the Wijk aan Zee A Group with an amazing 10/13 points, gaining another 10 ELO points. It seems like nobody can even come close to stop the young Chess Super Mind. The second place went to Aronian with 8,5/13. The 3rd and 4th places were taken by Anand and Karjakin, both with 8/13.

In the B group, it was a dramatic finish. Before the last round, 3 players were in the lead and all of them could have won the tournament. Movsesian made a draw against Ipatov, Rapport won against Nicolic and Your weekly commentator Naiditsch won his game against Sipke Ernst. Thanks to a better tie-break score, Arkadij Naiditsch got his promotion to the next year's A group with 9/13 points.

In the C group, things were extremely exciting as well. Before the last round, both Brunello and Peralta had 10/12. Brunello managed to win his last game and Peralta just made a draw. With this amazing result of 11/13 points, Brunello got his promotion to the Wijk aan Zee B group of 2014.

Gibraltar:

After a very exciting tournament, 4 players shared the first place with 8/10. They were Vituigov, Vachier La Grave,

Short and Sandipan. So the tie-break began. Short managed to win against Vachier and Vituigov eliminated Sandipan. In the final match between Vituigov and Short, for the 20.000 Pounds, the lucky winner was Vitiugov, who managed to beat Short 1,5/0,5 in the very final stage!

As usual, we commented the freshest games from these events for You. We wish You a lot of chess fun with Your weekly issue of CEWN.

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Giri, Anish (2720) – Caruana, Fabiano (2781) [D31]

75th Tata Steel GpA Wijk aan Zee NED (11.6), 25.01.2013

[Csaba Balogh]

Caruana had a horrible tournament in Wijk aan Zee. He was doing very badly and, typically, he was risking too much in the opening to save some rating points. This led to another disaster from his point of view. On the other hand, Giri played a great attacking game.

1.d4 d5 2.c4 e6 3.♘f3 c6 4.♘c3 dxc4 Such kind of lines are generally a good way to fight for the win as Black. He takes a pawn and White must fight for compensation; if he doesn't succeed, he'll end up with a material disadvantage.

5.a4 ♗b4 Black would like to defend his pawn with b5 after pinning the knight. [5...♘f6 leads to the Slav by transposition.]

6.g3 Giri plays in Catalan style and fianchettoes his bishop.

6...♘f6 7.♗g2 ♘bd7 8.0-0 0-0 9.♔c2

9...♔a5 Caruana deviates from the main line, he tries to get his opponent out from his preparation. [9...♔e7 is the main move, with the idea of freeing the position with e5! White should prevent it if he wants to fight for an advantage. 10.♗f4! followed by e4, ♖fe1, ♖ad1 and d5. This is a typical method of finding counterplay in such structures. On 10...♘d5 11.♗g5! White provokes a weakness. 11...f6 12.♗d2 and e4 is coming next with strong compensation.]

10.♘a2 ♗d6 11.♔xc4 White won back the pawn, but it allowed Black to free his position with e5.

11...♘b6? This is the move that would never happen if Caruana was doing well on the tournament. However, he is now going to grab a poisoned pawn on a4. [11...e5 was necessary, although White got an edge in a game between two Serbian GMs. 12.b3 ♘b6 13.♔c2 The difference between 9...♔e7 and this is the queen, which is misplaced on a5. Black has to waste some time to get it out from the danger zone. 13...exd4 14.♘xd4 ♔h5 15.e4! White is in time to build a nice center. 15...♗h3 16.♗xh3 ♔xh3 17.f3! Everything is protected and the pawn structure guarantees an advantage for White. 17...♗e5 18.♗b2 ♖fd8 19.♖ad1 ± After finishing the development, White had only one thing to do: to improve the a2 knight, but this could be easily achieved by ♘c1-e2. Ilincic-Blagojevic game.]

12.♔c2 ♔xa4 13.b3 ♔a5 White has to play fast to create counterplay. He must make use of the a5 queen, which is almost trapped. It can only run to h5.

14. ♘e5!? Cutting the queen's route to h5. [14.e4! was even better. White threatens to play e5, and on 14... ♙e7 15. ♘g5!! is very strong. The main idea is to push e5, but this time it's connected with the h7 mate; the second point is the queen on a5, which can't go to h5 now. 15... h6 The hunt for the queen can start now. 16. ♙d2! ♚b5 (16... ♚a3 17. ♘c3 ♚b4 transposes to ♚b5.) 17. ♘c3 ♚b4 18. ♘f3! +- simply retreating the knight and Black can't avoid the e5 and ♘d5 ideas. He is losing a piece.]

14... ♘bd7 Black finally frees his queen, but this allows the capture of the important dark-squared bishop. [14... ♙xe5 would have been met with 15. ♙d2! ♚b5 16. ♘c3! ♚b4 17. dxe5 ± and the White knight is ready to occupy the d6 square.]

15. ♘c4! ♚c7 16. ♘xd6 ♚xd6 17. ♚d1 Black is really missing his bishop. White has much more than enough compensation on the dark squares. The main ideas are ♘c3, ♙a3 and e4. Black has serious problems with the development as well, it's difficult to imagine a future for the c8 bishop.

17...e5 This is the best practical move, trying to get the c8 bishop into the game, but actually it only helps White to increase his advantage. [Passively waiting with 17... ♚d8 and ♘f8, ♙d7-e8 was objectively better, but it also guarantees a long-time suffering.]

18. ♘c3! Creating the threat of ♙a3!

18...exd4 19. ♙a3 c5 20.e3! This was the point of 18. ♘c3. Now all the diagonals and lines are opening on Black. The bishop pair starts to work extremely well.

20...d3 Otherwise, exd4 and dxc5 were also very bad for Black.

21. ♚xd3 ♚b8 Ugly, but it was hard to find a good square for the queen. Caruana was thinking about an exchange sacrifice with b6 and ♙b7, and after ♙xa8, he might get some counterplay on the light squares. [21... ♚e6 moves into 22. ♘b5 when ♘c7 and ♘d6 are in the air.; 21... ♚e7 is met by 22. ♘a4! and ♘xc5.]

22. ♘d5! White launches a very strong attack against the king.

22... ♘xd5 23. ♚xd5 b6

24. ♖b2! Logical and strong! Black has no pieces to defend the king. ♖b7 doesn't work because of the d7 knight, which has no place to move, while the attack is just rolling automatically.

24...a5 [24...♖e8 with the idea of ♘f8 is also hopeless. White can win, for instance, with 25. ♖ad1 ♘f8 26. ♖d8+- winning a lot of material.]

25. ♖a4! Nice move, switching this rook to the kingside as well. [The computer win was really beautiful with 25. ♖h5 g6 26. ♖f5!! Amazing move, with the idea of ♖xh7, and on ♖xh7, ♖h3-♖h8 mates. The queen can't be taken because of ♖g5. 26...♖d6 27. ♖xh7! and mate in a few moves.]

25...♖e8 26. ♖g5 g6 A crucial weakening on the dark squares. [On 26...♘e5 the easiest is 27. ♖xe5 ♖xe5 28. ♖xe5 ♖xe5 29. ♖xa8 +-]

27. ♖d5 White threatens with ♖c3 after preventing f6.

27...♖f8 28. ♖f4

It's enough! Nice crush by Giri. Such a final position rarely occurs against a 2780 opponent.

1-0

(2) Yu, Yangyi (2688) – Zatonskih, Anna (2491) [C02]

11th Gibraltar Masters Caleta ENG (3.7), 24.01.2013

[Csaba Balogh]

A spectacular game, which I have mainly chosen because of its final position.

1.e4 e6 2.d4 d5 3.e5 White decides to use the Advance Variation against the French Defense.

3...c5 4.c3 ♖b6 5.♘f3 ♙d7 This is one from the numerous Black's setup, with the main idea of exchanging the „bad French bishop” with ♙b5.

6.♙d3 cxd4 [On the direct 6...♙b5 White has to play energetically to get an advantage. 7.dxc5! In general, it's not advisable to take away from the center, but White can create a very nice outpost on d4 for his minor pieces. 7...♙xc5

8.b4! This is the point and the bishop can't take on f2, because it will have no way out. 8...♙xd3 (8...♙xf2+? 9.♙e2 and ♖f1 traps the bishop.) 9.♙xd3 ♙e7 10.0-0 ± followed by occupying the d4 square with ♘d2-b3-d4. Black also

has developing problems with the g8 knight because of the e5 pawn.]

7.♘xd4! White plays with a similar strategy to the 6...♙b5 line. [7.cxd4 allows 7...♙b5 Black equalizes.]

7...♘c6 8.♘xc6 bxc6 [On 8...♙xc6 9.♙e2 it's important to avoid ♙b5, followed by ♘d2-f3 and occupying the d4 square.]

9.0-0 c5 [9...♘e7 10.♘d2 ♘g6 11.♘f3 ♙e7 12.♖e1 with a complex fight ahead. Probably White's chances are slightly preferable. The e5 pawn gives many potential attacking ideas. 12...c5 13.♖b1 ♙b5 14.♙c2! It's important to preserve the bishop for the attack. 14...a5 15.♘g5! followed by ♙h5 or ♙f3. This happened in an Ehlvest-Ibragimov game.]

10.c4! Logical move. Black is behind in development, so White tries to open the position on the king.

10...dxc4 [Keeping the position closed with 10...d4 weakens the e4 square. 11.♘d2 ♘e7 12.♘e4 ♘g6 13.♙h5! White builds up a dangerous attacking position here as well.]

11. ♖e4!? Nice idea. White would like to take back the c4 pawn with the knight, which arrives there with tempo, attacking the queen.

11... ♖d8 12. ♘d2 ♗a6 Leaving from the tempo and temporarily defending the pawn. [12... ♖c6 doesn't equalize either 13. ♗c2 ♘e7! (13... ♖xe4 14. ♘xe4 Black has difficulties with the g8 knight, since it never can go to e7 because of ♘d6, and on h6, it will always be taken.) 14. ♘xc4 ♖xe4 15. ♗xe4 ♗c6 This is Black's point. Now the knight's development problem is solved, because ♘d6 loses to ♖xd6, but White can get an advantage in a concrete and unusual way. 16.f3! ♗xe4 (16... ♘d5 17. ♖g5! is unpleasant, because ♖e7 gives up the d6 square...) 17.fxe4 ♘c6 18. ♖e3 ♖e7 19. ♘d6+! This was the whole idea of 16.f3!. 19... ♖xd6 20.exd6 ♖xd6 21. ♖xc5 ± with a better endgame. The bishop is superior to the knight. The Black king can't castle and White can create a dangerous passed pawn on the queenside.]

13.b3 An ambitious try, which perfectly pays out in the game, but objectively I don't believe in it. [The simple 13. ♗c2 ± gave an edge for White.]

13... ♖b5? With the idea of c3, but it exactly moves into White's trap. [13...c3 14. ♘c4 would be fine for White. The c3 pawn falls soon.; 13...cxb3! should have been played. 14. ♗xb3 ♖b5 15. ♖e1 ♘e7! looks suspicious, but it seems like Black can finish the development and White will be only able to fight for compensation. 16. ♖b1 ♖c6 17. ♘c4 ♖xe4 ♘d6 can be taken and the b1 rook is hanging. 18. ♖xe4 ♘f5 Black seems to be all right.]

14.a4! c3 Consequently played, but this is the decisive mistake.

15.axb5! ♗xa1 16. ♖c6+ The king on e7 has a much higher value than the sacrificed exchange.

16... ♖e7 17. ♗c2!? [17. ♘c4!! would have been more beautiful. 17... ♖xd1 18. ♖xd1 White only has a bishop for the queen, but Black is lost. 18... ♘f6 (18... ♗xc1 19. ♖xc1 f6 20. ♖xc3 fxe5 21. ♖c1 is also hopeless after ♖a1, and the b-pawn promotes.; 18...f6 is refuted by 19. ♖d7+ ♖e8 20. ♖xa7+ ♖d8 21. ♖xa1 +-) 19.exf6+ ♖xf6 20. ♖g5+! ♖xg5 21. ♖xa1 +- with an extra piece for White.]

17... ♗a5 The queen must try to rescue. [17...cxd2? 18. ♗xc5+ +-]

18. ♘c4 ♗c7 19. ♗xc3 Black has the usual problem with the lack of development. On the other hand, he is an exchange up, so White has to play powerfully.

19...f6 Trying to play ♖f7, freeing the e7 square for the minor pieces.

20. ♖f4 ♖f7 [20...f5 loses to 21. ♖g5+ +-]

21.g3 Threatening to take on f6 after protecting the bishop and White also opens his back-rank, which is an important factor. As we'll see, White is going to penetrate with his rook.

21...f5 22.♖a1! White wants to play ♘d6, followed by ♙xc5 and ♖xa7, which actually can't be prevented.

22...♔g6 [22...♘h6 23.♘d6+ ♙xd6 (23...♔g8 24.♙xc5+- ♖a7 next.) 24.exd6 ♙b6 25.♖a6 ♙b8 26.♙xc5 +- and again, ♖a7 decides in the next move.]

23.♘d6 ♖xd6 Allows a nice finish, but the game was over anyway. [23...♘e7 24.♙xc5 +- with the threats of ♖xa7 and ♙e8, winning the queen.]

24.♙e8+! Not an ordinary mate with the bishops.

1-0

(3) Dzagnidze,N (2555) – Georgiev,Ki (2643) [E32]

11th Gibraltar Masters Caleta ENG (9), 30.01.2013

[Arkadij Naiditsch]

A nice win in the 9th round (from 10) went to Kiril Georgiev. Many have forgotten already, but Kiril was one of the World Top players 10 some years ago, and still, from time to time, he shows his very high class.

1.d4 ♘f6 2.c4 e6 3.♘c3 ♙b4 4.♙c2 The Nimzo with 4.♙c2 is a very safe opening for White, but of course, it's very hard to get any advantage here...

4...0-0 5.a3 ♙xc3+ 6.♙xc3 d6 Kiril chooses a sideline with more „fight“ in it. [6...d5; 6...b6 are the usual main moves here.]

7.♙g5 Before playing e3, White develops his bishop to g5.

7...♘bd7 8.e3 b6 9.♘e2 A slightly unusual move by White. It would have been simpler to play: [9.♙d3 ♙b7 10.f3 A typical move against the b7 bishop.(10.♘e2!? is also typical. It's usually very dangerous for Black to take the pawn on g2.)]

9...c5 Black is starting to play against the White center. Of course, 9... ♙b7 wouldn't have been a mistake either.

10.♖d1?! A logical move, but an inaccuracy anyway.

10...Kc7! Quite a tricky play by Kiril, who keeps the option of playing Qa6 followed by Rac8, getting quick pressure on the c-file and, at the same time, pretending to play Ne4 next.

11. Qf4 It's already hard to play with White and the move in the game looks pretty logical.

11...e5! Black starts playing dynamically, which is exactly the right reaction! White's pieces are still quite undeveloped and Black shouldn't miss his chance to take advantage of it.

12.dxe5 dxe5 13. Qg3 Ne4 Black has no time to lose. If White is on time with Kc2-Nc3, or even to play f3, Black's position could become quite unpleasant very quickly. We shouldn't forget that White has the bishop pair, which could be a long-term advantage.

14. Kc2 f5 Black is pushing!

15.f3 Ng3 16. Nfg3 What to do now? White is close to finish his development and the f5 pawn is hanging. To play f4?! doesn't look too good because it gives away the e4 square.

16...Nf6! Another very good move by Black. [The logical 16...g6 leads to an unclear position for Black after 17. Qd3 Nf6 18.e4! and it's hard to say who is doing better here.]

17. Nxf5 White needs to accept the challenge. [In case of 17. Qd3 e4! seems to be very strong. 18.fxe4 Ng4 and Black's activity is very dangerous.]

17...e4! Kiril continues playing in a very dynamic way — that's the way to go. Now the White king is getting „open” and Black is getting a very dangerous initiative for the pawn down.

18. Nd6 [Of course not 18.fxe4? Ng4 and Black is crushing.]

18...exf3 19.gxf3 Ke7 White is a pawn up, but Black's threats are coming from all sides... Suddenly, White's position, which was so solid, is on the limit of being very dangerous.

20. Kc3 Nh5 Black's knight now has the option to go to f4, and Kh4 is a dangerous threat as well.

21. Qe2! A good defense by White. Now against 21... Kh4, 22.Qd2 followed by Qc1 is good for White, and at the same time, to castle short is a „half threat”.

21... ♖h3 No more short castle for White and Black wants to play ♖ad8 next. As we can see, the game is very unclear!

22. ♖d5! Another good move by White! Attacking the knight on h5 and threatening to escape with the king from e1 to c1.

22... ♘f6 23. ♘f5 ♖xf5 24. ♖xf5 ♖ae8 It's very hard to say who is doing better here. White is a pawn up, but Black has dangerous play for it. The position remains very exciting!

25. ♖f2?? What a blunder... [White should have continued with 25.e4 because this secures having an extra pawn, but the dark squares are weak and the Black knight could end up on d4. 25...g6 26. ♖g1 ♘d7 The Black knight is going over e5-c6 to d4, to take the position of a „master“. On the other hand, a pawn is a pawn. I think the position should be objectively balanced.]

25... ♘e4+!! A very beautiful tactical blow. The game is over.

26. fxe4 ♖xe4 27. ♖f3 [It doesn't help to play 27. ♖xf8+ ♖xf8+ 28. ♖g1 ♖g6+]]

27... ♖xf3+ 28. ♖xf3 ♖f8 A very interesting game on the Nimzo with 4. ♖c2. Black tried an active plan by sacrificing a pawn and was eventually rewarded for that.

0-1

(4) Adams,Mi (2725) – Ehlvest,J (2605) [C62]

11th Gibraltar Masters Caleta ENG (9), 30.01.2013

[Arkadij Naiditsch]

Sometimes it's hard to say what Michael does exactly to win his games. All the moves look so logical and easy, and his opponents resign eventually. We'll now see one more game on the topic.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 d6 Ehlvest is a very experienced Grandmaster, but he often chooses rare lines to avoid theoretical discussions, and in this game he is chose a rare line in the Spanish.

4.d4 ♙d7 5.♘c3!? I like 5.♘c3!? a lot. It seems to give White a small plus. [5.d5 is the other main move in this position. 5...♘b8 6.♙xd7+ ♘xd7 7.c4 g6 8.♘c3 ♙g7 9.0-0 ♘e7 leads to quite an unclear position.]

5...exd4 6.♘xd4 g6 That's the main idea of the line: to put the bishop on g7 early. Another option for Black is to play: [6...♘xd4 7.♙xd7+ ♙xd7 8.♙xd4 ♘f6 followed by simple moves like ♙e7 and 0-0. I think that White should be slightly better as well, but of course, Black's position is very solid.]

7.0-0 ♙g7 This is the first critical moment. What to take on c6 with? Both possibilities look interesting.

8.♙xc6 A standard decision. [I guess that after 8.♘xc6 bxc6 9.♙c4 ♘e7 10.♙g5 Black's slightly worse pawn structure, plus White's future play in the center with ♙d2, ♙ae1, f4 give him a stable plus.]

8...bxc6

9.♙e1! Good move, but of course, such things are „too“ easy for Michael who was for more than 15 years in the Top 10 of the world. White's main idea is to play e4-e5 basically crushing the whole Black pawn structure. This is a very typical idea that can be used in many similar types of positions.

9...♘e7 10.♙f4 And the e5 threat is very real.

10...c5?! A logical move by Black, but it also leads to trouble. Black fights against White's e5, but in order to do this, he gives away the d5 square and weakens his pawn structure. [In any case, Black had to play 10...0-0 11.e5 ♘f5! This is the key defensive idea of Black! The d6 pawn is going to fall, but the bishop pair in an open position gives him good chances to hold the draw.]

11.♘f3 Now the e5 move is a „killer“.

11...f6 This move looks bad, but it's not stupid at all. If Black has time to castle short, play ♙e6, ♙d7 and ♙b8, things will be far from clear.

12.♙d2! Another very good positional decision by White. The dark-squared bishops need to be exchanged; this

gives White many pluses and some of them will be seen just a few moves later in the game.

12...0-0 13. ♖h6 a5?! Another unlucky decision by Ehlvest. It was time to play more carefully. [Black should have gone for a safe move, but of course, he would get a worse position after 13... ♖g4! It's important to exchange the light-squared bishop because it's often a „stupid“ piece in this kind of structure. 14. ♖xg7 ♔xg7 15. ♔f4 ♖xf3 16. ♔xf3 White is doing a little better, but nothing too dramatic has happened.]

14.h3 No more ♖g4.

14...a4 15. ♖ad1 White is clearly preparing some blow in the center.

15... ♖e6?! Once again, Black is not careful, but the position is already quite worse.

16. ♖xg7 The beginning of a nice winning idea.

16... ♔xg7

17.e5! And the final blow! Black's position is falling apart. If we look at the White moves, everything is so simple and logical, and suddenly Black can just resign.

17...fxe5 18. ♖xe5 As we can see, a lot of Black's pieces are hanging in the center, and the Black king is quite open.

18... ♔c8 [It doesn't help to play 18... dxe5 19. ♔e3! and Black is losing material on the e-file.]

19. ♖g4! Exact until the end. White wants to win a piece on the e-file and, at the same time, to mate the Black king.

19... ♖g8 20. ♖e4 White wants to play ♔c3 next — this was too much for Jan Ehlvest. What a nice final position. All the White pieces are perfectly placed.

1-0

(5) Markos,J (2581) – Varga,Z (2455)

Endgame section

(15) Hou Yifan (2603) – Anand,V (2772)

Wijk aan Zee, 25.01.2013

[Chess Evolution]

Black has a very easy technical win. For the World Champion, it shouldn't be a problem to convert the extra pawn, but as we will see, he is also a human.

42...♞f5?? Terrible blunder, which leads directly to an instructive draw. [42...h5! was the easiest win, creating the weakness on g3 and what is more important, preventing White's only idea to push g4, restricting the mobility of the kingside pawns. 43.a4 ♞d5 White is lost and he is in zugzwang now. 44.♞g2 drops the g3 pawn. (44.♞c3 moves into 44...♞e4+; 44.♞e3 allows 44...♞c4) 44...♞f5]

43.♞xf5! Probably Anand was expecting resignation, but unexpectedly, Hou Yifan simplifies to a seemingly hopeless pawn endgame. However, if we take a slightly deeper look into the position, the game becomes a dead draw.

43...♞xf5 44.a4! ♞e6 Black had to run back to catch the pawn, but it allows White to play:

45.g4!! Excellent reaction! One pawn on g4 neutralizes two Black pawns on f6 and h6... they can't create a passed pawn.

45...♞d5 46.♞c3! The Black king can't be allowed to go to c4 and the queenside pawns can't be touched until Black pushes e4.

46...♞e4 [46...e4 as soon as Black weakens his pawn structure, White is ready to sacrifice the queenside pawns to collect all the pawns on the other side. 47.b5! axb5 48.axb5 ♞c5 49.b6 ♞xb6 50.♞d4 ♞c6 51.♞xe4 ♞d6 52.♞f5 ♞e7 53.♞g6 =; 46...♞d6 47.♞c4 ♞c6 48.♞d3 Black can't make progress this way.]

47.♔c2!? A good waiting move for Black to push e4. [47. b5 was another instructive way to get the draw. 47...axb5 48.axb5 ♔d5 49.♔b4 ♔d6 50.♔c4 ♔c7 51.♔c5 ♔b7 52.♔c4 ♔b6 53.♔b4 White only waits with ♔c4-b4. The only winning attempt for Black is to push e4, but then the White king collects the pawns just like in the 46...e4 line. 53...e4 54.♔c4 =]

47...♔d4 48.♔b3 e4 The time has come for White to play:

49.b5! axb5 50.axb5 e3 51.♔c2! ♔e4!? The last trick by the World Champion, but Hou Yifan doesn't fall for it.

52.♔d1! White blocks the pawn, so Black is forced to go back to the b-pawn. [On 52.b6? Black retains his winning chances after 52...♔f3! 53.b7 e2 54.b8♔ e1♔]

52...♔d5 [The draw was agreed in view of 52...♔d5 53.♔e2 ♔c5 54.♔xe3 ♔xb5 55.♔e4 ♔c5 56.♔f5 ♔d4 57.♔xf6 ♔e4 58.♔g6 ♔f4 59.♔xh6 ♔xg4 =]

1/2

(16) Short, Nigel D (2690) – Cernousek, Lukas (2453) [A16]

11th Gibraltar Masters Caleta ENG (5.14), 26.01.2013

[Chess Evolution]

43.♔e3 In this equal endgame, Black's play was not accurate.

43...♔e6 44.♔d7+! Nice trick!

44...♔xd7 45.♔xf5 ♔h1 46.♔xd4 The position is still drawish, but now Black has to solve some practical problems to stop the White pawns.

46...♔d6 Black activates the king. The other way to defend was attacking the White pawns immediately, so that they don't advance too far. [46...♔f1+ 47.♔g4 (47.♔e4 ♔g1 48.♔e2 ♔b1 49.♔c3 ♔g1 50.♔f3 ♔c1 51.♔e4 ♔b1 52.f5 ♔xb5 53.♔f4 ♔e7 54.g4 ♔b4 55.g5 ♔f7 =) 47...♔d1 48.♔f5 ♔b1 49.♔h6 ♔xb5 50.f5 ♔b3 51.♔f4 ♔e7 52.g4 ♔f6 53.g5+ ♔g7 =]

47.g4 ♔c5 A slightly risky plan. Black is going to grab the b-pawn with the king, but then the king might get too far from the kingside. [47...♔d5 Another interesting option

to save the position was to play with an active king after 48.♖e2 ♜f1+ 49.♙e3 (49.♙g3 ♙e4 50.♘c3+ ♙d4 51.♘e2+ ♙e3 52.f5 ♙xe2 53.b6 ♙e3 54.b7 ♜b1 55.f6 ♜xb7 56.g5 ♜f7 57.♙g4 ♙e4 58.g6 ♜xf6 59.♙g5 =) 49...♜a1 50.g5 (50.f5 ♙e5) 50...♜a3+ 51.♙f2 ♙e4 =]

48.♘f5 ♙d5 [48...♜f1+ 49.♙e4 (49.♙g3 ♙xb5 50.g5 ♙c5 51.♘e3 ♜e1 52.♙f2 ♜a1 53.g6 ♜a6 54.g7 ♜g6 55.♘f5 Funny position. The Black king can't get closer to the pawns because of ♘e7 check. However, White is not able to improve the king either. The position is drawish.) 49...♜e1+ 50.♘e3 ♙xb5 51.g5 ♙c6 52.g6 ♙d7 53.f5 ♙e7 (53...♙d6 54.♙f4 ♜g1 = Not allowing ♙g5.) 54.♙f4 ♜g1 55.♙e5 ♜e1 56.f6+ ♙f8 57.♙f4 ♜a1 58.♘d5 (58.♙g5 ♜a5+ 59.♘f5 ♜b5 60.♙f4 ♜b4+ 61.♙f3 ♜b3+ 62.♙e2 ♜b2+ 63.♙d3 ♜g2 =) 58...♜a4+ 59.♙e5 ♜a5 60.♙e6 ♜a6+ 61.♙f5 ♜a5 62.♙e5 ♜c5 and it's not easy to find a winning setup for White.; 48...♙xb5 49.g5 ♙c6 50.g6 ♙d7 51.g7 ♜g1 52.♘g3 +-]

49.g5 ♜b1

50.♙g4 [50.g6 ♙e6 (50...♜xb5 51.g7 ♜b8 52.♘e7+ +-) 51.♘d4+ ♙f6 52.f5 ♜e1 53.♙f4 ♙g7 Black need to control the e-file in order not to allow ♙e4-♙d5. 54.♘f3 ♜b1 55.♙g5 ♜xb5 56.♘d4 ♜b6 57.♘e6+ ♙g8]

50...♙e6 [50...♜xb5 51.g6 +-]

51.♘d4+ ♙d5 52.♘f5 ♙e6 53.♘h6 ♜b4 [53...♜xb5 54.f5+ ♙e7 55.♙h5 ♙f8 56.♙g6 ♜b7 57.f6 ♜b5 58.♘f5 ♜d5 59.♘e3 ♜b5 60.♘g4 ♙g8 (60...♜a5 61.♙h6 ♜f5 62.g6 ♙g8 =) 61.♙h6 ♜a5 62.g6 ♜f5 Very important move. 63.g7 ♙f7 =]

54.b6 ♙e7 55.b7 White is giving up the b-pawn in order to come with the king to h5 and advance the pawns.

55...♙f8 56.♙h5 ♜xb7 57.f5 ♙g7 58.f6+ ♙h7? This is a mistake! The king will be badly placed on h8. [58...♙f8 59.g6 ♜a7 60.♘f5

White is almost ready to promote the g-pawn and win the game, but now comes 60...♜a1! 61.g7+ (61.♘e7 ♜g1) 61...♙f7 62.♘h6+ ♙xf6 63.g8 ♜h1+ 64.♙g4 ♜g1+ Draw!]

59.g6+ ♙h8 60.♘f5 ♜b5 61.♙g4 1-0

Clash of the Titans

(17) Dunaev – Petrosian, Tigran V [B84]

URS-ch U18 Leningrad, 1946

[Balogh Csaba]

A nice example from the famous exchange sacrifices of Tigran Petrosian.

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♗xd4 ♘f6 5.♗c3 e6

Despite having a highly positional style, Petrosian often chose the sharp Sicilian lines.

6.♖e2 a6 7.a4 ♖e7 8.♖e3 ♔c7 Both sides are developing logically, and the game was heading to the Scheveningen variation, when White suddenly takes a strange decision.

9.♘b3?! The knight was better placed on d4. This move usually only comes into consideration when Black has played ♘c6 and ♖d7, and he is ready to play ♗xd4 followed by ♖c6. Without these moves, this looks like a waste of time.

9...b6! This is the right setup of the pieces. The bishop goes to b7 and the knight to d7.

10.f4 ♖b7 11.♖f3 ♗bd7 12.0-0

12...♖c8 I like this idea a lot: to make all the useful moves before castling. As we'll see, in some positions, the king is better placed in the center.

13.g4? This is exactly the case when, having the king on e8, Black can make use of this early attack.

13...♗c5?! Black prepares for the g5 move by freeing the d7 square for the knight. [However 13...h6! was much stronger, with the idea of g5. This is a known counter-blow against the g4 attack. Let's see an illustrative line: 14.♔d2

14...g5! Black sacrifices a pawn, but creates an important hole on e5, where the knight will be very strong. 15.fxg5 hxg5 16.♙xg5 ♖g8 17.h4 ♘e5! with a dangerous attack.]

14.♘xc5 bxc5 15.g5 ♘d7 16.a5 [White should have continued consequently with 16.f5! trying to put pressure on the e6 pawn. 16...♘e5 17.fxe6 fxe6 18.♙g4! ♔d7 19.♙h3 with the threat of ♘d5! The game is unclear.; If Black was castled, the known attacking motif would be 16.♙g2 with the idea of ♖f3-h3 and ♗h5, but now Black can play 16...h6! and he has the attacking chances.]

16...♖b8 Petrosian activates his rook again.

17.♔d2 Now, and in the following moves, Black could have played h6, opening the line for the rook with a strong attack. However, Petrosian had a different idea in mind.

17...♙c6 [17...h6]

18.♘a4 ♖b4 [Here again 18...h6 was possible.]

19.b3

19...♖xe4!? I am not sure at all whether this was the strongest move in the position, but definitely, it's the most spectacular one. Black sacrifices an exchange for

a central pawn and the important light-squared bishop. [19...♙xe4 20.c3 was White's intention.]

20.c4 White prefers to keep the f3 bishop and take the rook with the knight after ♘c3, but Black can also improve his position. [If White accepts 20.♙xe4 ♙xe4 Black will create a battery with ♙b7 and ♗c6, followed by h6 with a huge attack.]

20...h6! Activating the h8 rook.

21.g6 White would like to keep the h-file closed. [21.♘c3 is met with 21...♖xe3! 22.♗xe3 hxg5 23.♙xc6 ♗xc6 24.fxg5 ♘e5 The e5 knight is really powerful. Black wants to play ♖h4-g4. White can hardly hold his g5 pawn for long, so Black will be fine even materially, with two pawns for the exchange.]

21...f5 22.♘c3 ♘f6 Black prepares to create an unstoppable center with d5-d4.

23.♙xe4 [It was more logical to preserve the bishop, although Black is doing fine after both recaptures. 23.♘xe4 The computer prefers now 23...♘xe4 (23...fxe4 24.♙g2 d5 is the human way to play. 25.cxd5 exd5 with a strong initiative.) 24.♗c2 ♙f6 looks very good for Black.]

23...fxe4 Black is ready to march with his central pawns, which will swap away White's forces.

24.♖ad1

24...d5! There is no defense against d4.

25.cxd5 exd5 26.f5 White frees the f4 square for the bishop, but it doesn't help him to save the game.

26...d4 27.♖f4 ♔c8 The knight and the f5 pawn are hanging. If any of them falls, White will collapse as well.

28.♘e2 ♔xf5 29.♙g3 ♔xg6 Black is ready to push e3, opening the diagonal for the bishop, followed by occupying it with the queen.

30.♘f4 ♔f7 31.♔c2 All the moves are winning for Black. Petrosian chose the most direct one.

31...g5 32.♘e2 d3 It's nice to notice that the king has never left the e8 square in the whole game.

0-1

Editorial Preface

The main event of the week is clearly the beginning of the Grenke Chess Classic in Baden Baden. Anand, Caruana and Adams are fighting with the Top 3 German players — Naiditsch, Fridman and Meier — in a double round robin.

In the German Bundesliga, the club Baden-Baden is continuing its domination.

In Russia, the Moscow Open is on his way, with a lot of fighting chess and great games. The star of the tournament is the top seeded Ian Nepomniachtchij, who is heading with 4,5/5 in the leaders group.

In the current issue, we comment a slightly unusual loss of a GM in just 10 moves!

As usual, we bring You the freshest games with top analyses combined with a lot of different chess fun material.

Enjoy the CEWN Nr 50.

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Prusikin,M (2545) – Aronian,L (2821) [E92]

Bundesliga 2012–13 Berlin GER (8), 03.02.2013

[Arkadij Naiditsch]

There are different Grandmasters of different strengths, and this game is a great example. We'll see a game where White is trying to force a draw out of the opening and loses like a „baby“. I always ask myself, why do people like Prusikin try to force a draw? Do they play so often against the World's Nr.2?! Why not to go into a fight instead of being hunted down like a chicken?

1.♘f3 ♘f6 2.c4 g6 3.♘c3 Aronian is playing a lot of openings, but lately he's been choosing the King's Indian. A fighting opening which is a good choice against a much lower rated player.

3...♙g7 4.e4 d6 5.d4 0–0 6.♙e2 e5 So, we are in the main line of the KID. And what comes now is just shocking!

7.dxe5? A „dirty“ attempt to make a draw out of the opening instead of playing a full game. Prusikin is giving a lot of lessons in Germany, and I wonder if such a trainer can do any good to his pupils, while facing big psychological problems against a stronger player.

7...dxe5 8.♙xd8 ♖xd8 9.♙g5 Now Black can't avoid to make a big amount of exchanges — all of this is well-known theory.

9...♘a6 The main move for Black.

10.♘d5 ♖d6 11.♘xf6+ Prusikin is exchanging piece after piece in hope for mercy — but the game will be over much sooner than it might seem at the moment.

11...♙xf6 12.♙xf6 ♖xf6 13.♘xe5 ♖e6 14.♘g4?! Quite an inaccuracy by White. White should have continued with what he started — making a forced draw. [14.f4 would force things much more. 14...♖e8! Black needs to play quite exactly to equalize. (14...f6? 15.♘g4) 15.0–0–0 f6 and it seems that the position is a forced draw... 16.♘d7 ♙xd7 17.♖xd7 ♖ac8! Cool and strong, White has no defense against ♘c5. 18.♙f3 ♘c5 19.♖d2 ♘xe4 and even Aronian would not be able to avoid the drawish outcome of the game.]

14...♙g7!? Aronian tries to make things a bit more „complicated“. [14...h5 15.♘e3 ♖xe4 and the position is about equal.]

15.♘e3 Prusikin acts with „fear“ again. [More principled would have been 15.f3 White is trying to keep his pawn. 15...♖b6 attacking b2 and, at the same time, ♙xg4. 16.0–0–0 ♙xg4 17.fxg4 It's hard to say if White got any advantage here, but for sure he should not be forced. On the

other hand, Black has big positional pluses for the pawn and has good practical chances to outplay his opponent.]

15...♖xe4 16.0-0-0 Can You imagine, that just in 14 moves from now, White will simply resign? The Great Levon shows us how.

16...c6 Good positional move. Black is protecting from ♘d5 and wants to play ♘c7 next.

17.♖d8 Solid move. Now another exchange of rooks seems to be unavoidable.

17...♖e7 18.h4 This is a very solid move for White as well. To put pawns on the dark squares can't be wrong.

18...♘c7 19.♖hd1?! and again Prusikin shows amazing respect for his opponent. [Why not just 19.h5 ♗e6 What else to do?! White wants to play h6 ♖h8, or just hxg6. 20.♖xa8 ♘xa8 21.♙d2 and White should be doing slightly better here.]

19...a5! I like this move a lot! Many others would just have played 19...♘e6 and, of course, Black is totally fine, but with 19... a5 Black wins a bit of space for the future and doesn't give White any easy decision.

20.b3?! and White chooses a safe but „not great“ move again. The pawn on b3 only gives Black a chance to open the a-file with a4 in the future.

20...♘e6 21.♖8d6 ♘c5 As we can clearly see, Black is completely outplaying his opponent. Now 21...♘e4 is already a dangerous threat.

22.♗f3 Now the bishop on f3 is pretty badly placed and looking at the pawn on c6.

22...♗d7 finishing the development before starting the action on the queenside.

23.♙b2

23...f5! Another excellent positional move. Winning a bit of space in the center and making a place for the Black bishop on f7. Of course, the position is still around equal, but White is getting in trouble little by little.

24.a3?! and another „strange“ move by White. Why to weaken the queenside? [A solid move like 24.♘c2 would have kept White's position very solid.]

24...♗e8 25.g3 ♗f7 26.b4? What a shocking move! White is absolutely opening his own king without any reasons. [26.♙c3 and the position remains around equal,

even thought I would have chosen to play with Black here.]

26... ♖a4+ [26...axb4 27.axb4 ♖a4+ would just lead to a different move order.]

27.♔c2? and Prusikin is resigning without any fight. [A much better square for the king would have been 27.♔b3 axb4 28.axb4 ♖b6 and of course Black is doing better, but White is far away from being lost]

27...axb4 28.axb4

28...♖b6! This last exact move is easy to find but simply finishes the game on the spot. White can't defend against ♖a2 check next, and protect the c4 pawn at the same time.

29.c5 ♖a2+ 30.♔b1 ♖xf2 Aronian spent around 20 minutes for the full game, which reminds me a lot of a game from a simul.

0-1

(2) Harikrishna,P (2688) – Efimenko,Zahar (2689) [C84]

Schachbundesliga 2012/2013 (8.2), 03.02.2013

[Csaba Balogh]

Despite the tactical oversight in the time trouble by Black, we're in front of a really high-quality game.

1.e4 e5 2.♖f3 ♖c6 3.♔b5 a6 4.♔a4 ♖f6 5.0-0 ♔e7 6.d3 Black decided to go for the Ruy Lopez, while White chose the nowadays very popular 6.d3 system.

6...b5 7.♔b3 0-0 8.a4 b4 9.♖bd2 d6 [9...♔c5 is an alternative, which was introduced by Aronian last year.]

10.♖c4

10...♔e6 We are in a known position, where White usually plays c3, ♖e1 and d4 at a good moment, but Harikrishna tries another plan, which was recently used by Grischuk.

11.h3 h6 12.♔e3 ♖c8 After many different attempts, the Black players found the ♖c8-♖d8 setup for Black in the positions with c3, which gave them satisfactory games. He prepares a d5 break and sometimes the sacrifices with ♔xh3 might be annoying.

13. ♖e1 ♜d8 14. ♔e2 ♚b7 [The mentioned Grischuk game continued with 14...a5 15. ♖ad1 ♚a6 16. ♔h1 ♙f8 17. ♗f1 and after a long maneuvering, it ended in draw. Grischuk-Inarkiev, 2012. Of course, there are plenty of plans in such positions, and Harikrishna has definitely worked out something in his home preparation.]

15. ♖ad1 ♞d7 I don't like this move. It reduces the pressure on the e4 pawn. White can effectively take advantage of this. [The standard 15... ♙f8 was better in my opinion, and now the difference is that if White plays 16.d4 exd4 17. ♞xd4 ♞xd4 18. ♙xd4 ♚xe4! seems to work and leads to an equal endgame 19. ♚xe4 ♞xe4 20. ♖xe4 d5 21. ♖xe6 dxc4 22. ♖ee1 cxb3 23.cxb3 After the simplification, there is no advantage left.]

16.d4! This was the whole idea of White's setup. He's opening the center and his pieces are better prepared for a concrete play, while Black's are still in the maneuvering phase of the game.

16...exd4 17. ♞xd4 ♞xd4 18. ♙xd4 a5 Black had to prevent the ♞a5-c6 threat. [Going for the e4 pawn with 18...c5 doesn't work well. 19. ♙e3 The d6 pawn became a weakness. 19... ♚xe4 20. ♞xd6 ♙xd6 21. ♖xd6 White is better because Black can't lock the bishop with 21... c4 22. ♖d4!± wins the pawn.; 18... ♙f6? is the principled move to exchange the strong bishop, but it allows the concrete 19. ♞a5! and Black must let the knight to jump to c6.]

19. ♖d3! Very nice plan, lifting the rook to the 3rd rank in order to be able to switch it to the attack at any time.

19... ♚c6 [19... ♙f6 had concrete problems again 20. ♙xf6 ♞xf6 21.e5! seems to be very strong, and suddenly the a5 pawn is the main problem in Black's position. 21...dxe5 22. ♞xa5! ♚b6 23. ♖xd8+ ♖xd8 24. ♞c4±]

20. ♞e3! White wants to transfer his knight to d5 or f5, which would be very nice of course, but what happens if Black grabs the e4 pawn? [20. ♖g3 is not so dangerous yet because of 20... ♙f6!]

20... ♚xe4 [20... ♙xb3 is met with the intermediate moves 21. ♞f5! ♙f8 22. ♙xg7!+- and the attack is decisive with ♚g4 or ♖g3.]

21. ♖d5! ♟xd5 [21... ♞xe2 is bad in view of 22. ♖xe7+ ♔f8 23. ♜xe2 ♖xe7 24. ♜de3 White gets a big advantage, since 24... ♖e5 runs into (24... ♖f8 25. ♟xg7) 25.f4±]

22. ♞f1! Very nice discovered attack on the queen. White wants to capture one of the bishops, either on d5 or e7. The g2 pawn had to be protected. [22. ♞xe4 doesn't get any advantage 22... ♟xe4 23. ♜xe4 ♖e5! =]

22... ♞f5 [22... ♞xe1!? was objectively the best move 23. ♞xe1 ♟xb3 24.cxb3 ♟f6 Black tries to create a fortress. It's hard to say if White is going to have any chance to break through, since Black has no weaknesses.; 22... ♞xg2+? 23. ♞xg2 ♟xg2 24. ♜xe7 White penetrates on the 7th rank.]

23.g4! White is hunting the d5 bishop! He'll succeed to take it, but at the cost of a weakened kingside.

23... ♞g5 24.f4! The queen can't protect it anymore.

24... ♞h4 25. ♟xd5 This was the position that Harikrishna had to foresee before playing 20. ♖e3!. Very deep calculation and understanding of the position. White is a pawn down, but the active bishop pair and the misplacement of the Black queen gives more than enough compensation.

25... ♞c6 With this small combo, Black temporarily activates his rook.

26. ♟xc6 ♜ac8 27. ♟d5 ♜xc2 28. ♟b3! Of course, such an active rook must be sent out from the 2nd rank.

28... ♜cc8 We are in a critical position. White has two tempting ways to continue. Harikrishna decides to repeat once to approach the time control, and then tries one of the critical moves.

29. ♟f2 ♞f6 30. ♟d4 [30. ♞e2!? was the alternative, which also looks very dangerous. 30... ♟f8 (30... ♜e8 moves into the deadly pin 31. ♜e3) 31. ♟d4! ♞xf4 is the only move. It seems to be a blunder, but... (The difference is that after 31... ♞h4 32. ♟xf7+! works! 32... ♖h8 (32... ♖xf7 33. ♞e6#) 33. ♟d5± with a big advantage.) 32. ♜f1 ♜c1! is another only move, but White gets the advantage after 33. ♟d1! ♞g5 (33... ♜xd1 is only better for White.) 34. ♟e3! wins the rook.]

30... ♞h4 31.g5! The e7 bishop is attacked and g6 is another unpleasant threat.

31... ♟f8 [On 31... ♜e8 32.g6 is more effective.]

32.g6 ♞h8 33. ♟xf7?! This is the only mistake by White in the game. [To implement a pawn on f7 could have been very dangerous. White always threatens with ♜e8 and the g-file is also opened for a potential attack against the g7 pawn. 33.gxf7 ♖c5 34. ♟xc5 Black has no good recapture, White enters on e8 in both cases 34... dxc5 (34... ♜xc5 35. ♜e8±) 35. ♜xd8± and ♜e8 next.]

33... ♖c5! 34. ♜de3

34...d5! Black creates an e4 outpost for his knight, which would completely neutralize the rooks. White has to fight against it.

35. ♖f3! ♞b3! A nice tactical fight is about to start. Both players were in time trouble at this moment and Black is going to blunder soon...The knight is indirectly protected because the e1 rook is hanging in that case. [Now on 35... ♞e4 36. ♙xd5 was the idea.]

36. ♙b6!

36...♞d6? This is the decisive mistake, but it was very hard to calculate all the complications with only 30 seconds on the clock. [36... ♙c5!! was the right move 37. ♙xc5 (37. ♙xd8 ♞xe1+! is the whole point!) 37... ♞xc5 and Black is fine 38. ♙xd5 ♞d3! Black makes use of the hanging e1 rook again and overtakes the initiative.]

37. ♞e8!! The game is over. White attacks the b3 knight and creates deadly threats on the back-rank.

37...♞xb6 38. ♞xc8! ♞xe1+ 39. ♙g2 Black has only one move to protect the bishop, which is hanging with mate.

39...♞e7

40. ♞e3!! This pretty deflection of the queen at the last move of the time trouble finishes the game.

40...♞xg6+ [40... ♞d6 41. ♞xb6!+-; 40... ♞xe3 41. ♞xf8#]

41. ♙xg6 ♞f6 42.f5 1-0

(3) Ernst,Sipke (2554)
– Bartel,Mateusz (2635) [A46]

Schachbundesliga 2012/2013 (8.2), 03.02.2013

[Csaba Balogh]

An entertaining game with many nice tactical motifs.

1.♘f3 d5 2.d4 e6 3.g3 b5!? A very strange-looking move, but I actually believe it's quite a good one. We'll see its main ideas during the game.

4.♙g2 ♘f6 Usually we get this position with a different move order, but in any case, we arrived to a huge theoretical line.

5.0-0

5...♘bd7 With the b5 move, Black has prevented White's main idea: to play c4. His standard setup is ♙b7 and c5, creating a comfortable position. White has various plans to fight against it, but it's not easy to prove an advantage anywhere. In this game, White tries to execute the c4 idea in order to open the position and, especially, the diagonal for the g2 bishop.

6.b3 ♙a6!? Another extravagant move, but again a logical one to fight against c4. Black is ready to occupy the center with c5 in the next move. [Several games have been played with 6...♙b7 7.c4 bxc4 8.bxc4 dxc4 and a quick c5 usually leads to equality.]

7.♘bd2 White consequently stuck to his plan and prepares for c4.

7...c5! 8.c4! We are at the beginning of the complications.

8...♖c8 Black leaves from the h1–a8 diagonal and brings an important piece to the center, where the fight is about to begin. [Taking everything is not a great idea with an undeveloped kingside. 8...bxc4 9.bxc4 dxc4 White can create a strong attack now. 10.♘e5 ♘d5

11.♙xd5!! This move works because of concrete reasons, otherwise, it's never advisable to give up the strong bishop. 11...exd5 12.♙a4 ♙c8 (12...♙b7 is strongly met with 13.♖b1) 13.♙c6 ♖b8 14.♙xd5! and Black is in trouble. The point is that after 14...♘xe5 15.♙xe5+ ♙e6 16.d5!+ White wins the bishop.]

9.♙b2?! White calmly fianchettoes his bishop, but he should have acted concretely. [9.b4!

This spectacular tactical break to create a protected passed pawn on c5 was the strongest move. White gets very strong compensation after every move. For instance: 9...cxd4 10.c5 e5 11.♘h3! and the plan is ♘b3 — e3, undermining the center. White seems to have more than enough compensation.]

9...cxd4 Black would like to win the c4 pawn with bxc4 and ♙xc4, so White has to take somewhere first. [9...bxc4 now is a much better version than in the previous move. 10.bxc4 dxc4 11.♖a4 ♗b6 Black is very close to finish his development. 12.♖ab1 ♙b5 13.♗c2 ♗a6 and ♙e7, 0–0 next with a good position.]

10.cxd5 [10.cxb5 simply leads to a worse position. 10... ♙xb5 11.♘xd4 ♙a6± Black is slightly better with his nice center and active pieces.]

10...e5! A clever move. If Black succeeds to play ♙d6 and 0–0, he will automatically win the d5 pawn. White needs to act immediately.

11.♘xe5!? A brave decision. Objectively it's not the best, but in a practical game, these moves might be really effective. White intends to collect the central pawns and tries to launch a „pawn storm” in the center with e4-f4-e5...

11...♘xe5 12.♙xd4 ♘ed7 Black prefers to leave from the tempi with f4–e5. [However, it seems to be much stronger to play 12...♙d6! 13.e4 (13.f4 ♘ed7 14.e4 Black has the important 14...♙c5! exchanging the strong bishop. 15.♙xc5 ♘xc5 White can't push e5 because the d5 pawn is not protected, and if he tries 16.♗f3 ♗b6 17.♙h1 0–0± Black succeeded to finish the development and has a big advantage, because 18.e5?! still doesn't work. 18... ♘xd5! 19.♗xd5 ♖fd8–+ winning the d2 knight and the game.) 13...♗e7! 14.f4 (14.h3 to prevent ♘eg4 gives Black enough time to push 14...b4 The f1 rook is in an unpleasant situation, since ♖e1 moves into ♘d3...) 14...♙c5! is again an important motif. 15.♙xc5 ♗xc5+ 16.♙h1 ♘eg4 White collapses.]

13.e4 ♙c5 14.♙b2! White needs his dark-squared bishop and is ready to push e5 now.

14...b4 15.e5! There was no way back. White had to stay „all in“ and hope that his attack would break through. [15.♘c4 allows 15...♗b6 and White can't effectively push 16.e5 ♗fxd5; There is no time for 15.♖e1 ♖b6]

15...♙xf1 Black grabs all the material. [White gets very strong compensation even after 15...♗xe5 16.♙xe5 (16.♖e1 has a nice refutation

16...♙xf2+! 17.♙xf2 ♖b6+ 18.♖e3 White seems to be all right, but a nice tactical trick wins a decisive amount of material. 18...♗fg4+! 19.♖xg4 ♖xe3+! This is the point! 20.♙xe3 ♗xg4+-+ 16...♙xf1 17.♙xf1 0-0 18.♗c4 White has only one pawn for the exchange, but that e5 pawn, supported by the strong bishops and the excellent c4 knight, seems to be very dangerous.]

16.exf6 ♙xg2 Black goes for the huge material advantage. [16...♗xf6 was more calm, but it leads to a similar position to the one seen in the 15...♗xe5 line. 17.♙xf1 0-0 18.♗c4 with good compensation.]

17.fxg7 ♖g8 18.♖h5! White continues pushing already a rook and a piece down. He threatens to take on h7 and also to play ♖e1 check, ♙e7 and d6! Black has to be care-

ful not to get mated, but he has enough material to create defensive resources.

18...♖e7 Preventing ♖e1 and preparing for ♔d8-c7, sending the king artificially to safety. [18...♙xd5 was also possible. 19.♖e1+ ♙e7 20.♖xd5 This would have been a critical position from Black's point of view. At first sight, the danger is not that big, but actually he must find an only move to stay in the game. 20...♖c5! The point is to send away the queen from d5 in order to be able to play f6 and ♔f7.

a) 20...♗b6 21.♖e4 Black has no defense;

b) 20...♗c5 It's logical to lock the e-file with ♗e6, but it doesn't help. 21.♖f5 ♗e6 22.♗e4! White threatens with ♖xh7. Black has difficulties as he can't take on g7 because of the following nice lines: 22...♖xg7 (22...♗xg7 23.♗f6+ ♔f8 24.♗xh7+ ♔e8 25.♖b5+! ♖d7 26.♗f6+-) 23.♙xg7 ♗xg7 24.♗f6+ ♔f8 25.♖xh7! Black can't avoid getting mated. 25...♙xf6 26.♖h8#;

21.♖f3! (21.♖e4 is also met with 21...f6 22.♖xh7 ♔f7) 21...f6! 22.♗e4 ♔f7! (22...♖d5? leads to a beautiful mate:

23. ♔h5+! ♚xh5 24. ♘d6#) 23. ♘xc5 ♘xc5 24. ♔h5+ ♚xg7 25. ♔g4+ ♚h8 26. ♔xb4 White has two pawns plus some active pieces for the knight. Probably, the objective outcome should be a draw...]

19. ♔xg2 [On 19. ♔xh7? ♔e2! was in Black's mind.]

19...h6? This is the decisive mistake. Black was fighting against ♔xh7 and tries to lure the queen from covering the e2 square, but he misses a great subtle move! [Black should have started the king's journey, although White has very strong compensation here as well. 19...♔d8 20. ♔xh7 ♚c7 21. ♘e4 White has 4 pawns for the rook. It's very difficult to judge who's chances are preferable.]

20. ♔f1!! Excellent move, while being a rook a down. White wants to bring his rook to e1.

20... ♔xf2 [20... ♔d8 was more logical again, although Black seems to be already in big trouble. 21. ♔e1 ♔g5 22. ♔xf7 ♚c7 (22... ♔xd2 loses to 23. ♔xg8+ ♚c7 24. ♔xc8+! and the g-pawn promotes with check.) 23. ♘e4 The queen has no good square to leave. 23... ♔e7 (23... ♔g4 24. ♘xc5+-) 24. d6+! ♔xd6 25. ♘xd6 and White wins. 25... ♔xd6 26. ♔e5+-]

21. ♘c4 White prefers to keep all the pieces on the board to maintain the mating attack. [21. ♔xf2 was also good enough, but this is a rather technical win. 21... ♔c2 22. ♔e1 ♔xd2+ 23. ♔f1 ♔xe1+ 24. ♔xe1 ♔xb2 25. ♔xh6+- White has too many pawns and the ones on d5 — g7 have a special value.]

21... ♔d8 22. ♔xf2 Suddenly White is doing well materially as well, with a bishop and two pawns for the rook, but the fact that the Black king is still under a mating attack is more important.

22...f6 23. d6 ♔xg7 24. ♔e1 Bringing all the pieces to the attack. The hidden threat is ♔a5; it's easy to miss such „long“ moves.

24... ♔g5 [24... ♔c5 25. ♔f3+- is also hopeless. ♔a8 and ♔e7 are coming.]

25. ♔f7 ♔c5 26. ♔g1!? Leaving from the checks. [26. ♔e7 ♔f5+ 27. ♔e1!+- was also winning.]

26... ♔d5 A blunder at the end, but it was very difficult to defend Black's position. [26... ♔d5 was the only move. 27. ♔xf6+ ♘xf6 28. ♔xf6+- White is winning here as well, as the c4 knight clearly dominates the rook and everything else favors White.]

27. ♔xf6+ [Black resigned in view of 27. ♔xf6+ ♘xf6 (27... ♔xf6 28. ♔xg8+- and d5 also falls.) 28. ♔c7#]

1-0

(4) Sethuraman,S.P (2538) – Krejci,Jan (2529) [E13]

Moscow Open 2013, 06.02.2013

[Arkadij Naiditsch]

We will now see the shortest decisive GM game I've ever seen in my life!

1.d4 Solid first move, but the game will be already over in only 9 moves!

1...f6 2.c4 e6 3.c3 b4 and we are in the Nimzo.

4.f3 b6 Black is choosing a fighting line, which actually has become quite fashionable lately.

5.g5 b7 This move is a bit out of fashion. [5...h6 6.h4 g5 7.g3 e4 would be the main line]

6.d2 Not giving Black anymore the chance for h6- e4-g5, followed by e4.

6...h6 7.h4 This position has been well analyzed and is counted as a bit better for White. .. but the game will already be over in 3 moves!!

7...d6?? What a blunder! The game is over on the spot! [The main move would be 7...0-0 8.e4!? White is sacrific-

ing a pawn for the attack. 8...g5 9.g3 e4 10.dxe4 e4 11.h4 with a dangerous position for Black, according to the current theory.]

8.a4+! I guess Sethuraman was as shocked as Krejci here. Black is losing a full piece!

8...c6 The only move to protect the bishop on b4.

9.d5 and it's over! The pin on a4-e8 is deadly!

9...xc3 10.bxc3 Have You ever seen something like that? For me it's the first time on the GM level! :)

1-0

Endgame section

(15) Debashis,Das (2474) — Ponkratov,Pavel (2584)

Moscow 2013 (3.8), 04.02.2013

[Chess Evolution]

15...♞c7 We have a typical endgame from a Slav line.

16.♞e1 The Indian yer is looking for some plan. He has the pair of bishops, but Black's position is very solid without any weaknesses. The problem for White is the fact that he has doubled-pawns, which doesn't allow him to win space and improve the position on the queenside.

16...a6 17.f3 Personally, I prefer the plan with g5 and f4.

17...0-0-0 18.♞f2 g5! A good move which doesn't allow White to gain space after a potential g5-f4.

19.e4 Finally White pushes e4, but how to play next with the bad bishop on g2? In my opinion, White should try to play on f4 or just wait a bit and maybe improve his rooks a little.

19...♔b8 20.♞e3 ♞h7 Black is going to transfer the knight to g6 in order to take control of the weak dark squares, and especially f4.

21.♔f2 [21.♞d1 ♞f8 22.♞f2 ♞g6 23.♞d3 with the idea of an eventual f4.]

21...♞f8

22.cxd5 Practical decision. White has been slowly outplayed and now tries to make some exchanges on the center and activate the bishop, even for a huge cost, which is the creation of many weaknesses. The most solid was [22.♞e2 ♞g6 23.♞d1=]

22...exd5 23.exd5 ♞xd5 24.♞xd5 ♞xd5 25.f4 ♞b5 26.♞c3 ♞e6 27.fxg5 [27.f5 ♞f4 28.♞xf4+ gxf4 White has too many weaknesses (d4, b3,b2) to hold this opposite-colored bishops endgame.]

27...♞xg5 28.♞d1 With the hope of pushing d5 at some moment.

28...♞xe3+ 29.♞xe3 ♞f4 [29...♞d8 30.♞f1 ♞b4 31.♞c4 ♞xd4 32.♞e7= and White gets enough activity.]

30. ♖f1 ♜d5 31. ♔g3 [31. ♖c4 ♜d7 ♗xh3; 31. ♜e7 ♗xh3+ 32. ♖xh3 ♜xh3 33. ♜xf7 g5+ (33... ♜xb3 34. ♜xg7 ♜xb2+ 35. ♔f3 and the g-pawn gives White good counterplay.)]

31...g5 Thanks to the nicely placed pieces, Black is much better, but this is not enough to win the game because he needs a plan. Maybe the next step can be to improve the king.

32. ♜e5 White is eliminating the strong rook from d5.

32...♜xe5 I'm not sure if this is correct because now Black won't be able to come with the king because it's cut over the d-file. Black had other not easy-to-play option. [32...f6 33. ♜xd5 ♗xd5 (33...cxd5 34. ♜e1 ♗) 34. ♜e1 ♔c8 35. ♖g2 ♗f4 36. ♜e7 ♜d8 37. ♜f7 (37. ♖e4 ♜xd4 38. ♖f5+ ♔b8 39. h4 ♜b4 40. h5 ♜xb3+ 41. ♔f2 ♜xb2+ 42. ♔f3 ♜h2+ + Three pawns are too much.) 37... ♜xd4 38. ♜xf6 ♜d3+ 39. ♖f3 ♔d8! 40. h4 ♔e7 41. hxg5 ♗e6 Together with the king, the Black knight should stop the advance of the g-pawn. Black will grab the whole queenside pawns and should win the game.]

33.dxe5 ♜e8 After this move, White will get good counterplay, but it was hard to find something else for Black. [33... ♔c7 34. ♜d6 Now, unexpectedly, the White rook will fall in a trap. Better is (34. ♜d2 Waiting for the move by the rook to push h4 like in the game. 34... ♗g6 35. ♜f2 ♗xe5 36. ♜f5=) 34... ♜e8 35. h4 ♗d5 36. h5 f6 37. h6 ♜xe5 38. h7 ♜e3+ 39. ♔h2 ♜e8 40. ♜e6 ♜h8+; 33... ♗g6 34. e6 fxe6 35. ♜d7 ♗ With the idea ♜g7, Xg5.]

34.h4 Yes, of course! Now the h-pawn will give White enough compensation.

34...♜xe5 35.h5 ♔c7 36. ♔f3 b5 [36...f5 37. gxf5 ♗xh5 38. ♔g4±]

37. ♖d3 ♗d5 38. ♖e4 ♗f6 39. ♖f5 ♜e8 40.h6 ♗d5 41.h7 With the improved pieces and the strong h7 pawn, White's position is already not worse.

41...♔d6 42. ♜a1 [42. ♜h1 ♜h8 43. ♜h5 f6 With the pawn on f6, Black will not have ♗f6 anymore, with the idea of grabbing the h7 pawn. (43... ♔e7 44. ♜xg5 ♔f8 with the idea to eliminate the h-pawn after ♗f6-♔g7.) 44. ♜h1 ♔c5 45. ♜e1 ♔b4 46. ♖g6 ♗f4 47. ♖c2↑ and the fight against the h7 pawn is unpleasant.]

42...♜h8 43. ♜xa6

43...♞e7! Black found the way to get rid of the h7 pawn.

44. ♕d3 f5 45.gxf5 [45. ♕xf5 ♞xf5 46.gxf5 ♜xh7 47.♖g4 ♜h2 48.f6 ♜xb2 49.♙xg5 ♜xb3 50.f7 ♙e7 51.♜xc6 ♙xf7 52.♙f5 ♙e7 53.♙e5 ♙d7 54.♜c5=]

45...♜xh7 46.♙g4 ♜h2 [46...♞d5 47.f6 (47.♙xg5 ♞b4 48.♕xb5 ♞xa6 49.♕xa6 ♙e5 50.♙g6 ♜h3⌘) 47...♞xf6+ 48.♙xg5 ♜h3 49.♕xb5 ♜h5+ 50.♙xf6 ♜xb5 51.♜a3=]

47.f6 ♞d5 Black could make a draw in the endgame of rook and bishop against rook after [47...♜xb2 48.fxe7 ♙xe7 49.♜xc6 ♜xb3=]

48.f7 ♜f2 49.♜a7? A huge mistake that's hard to explain! White should play [49.♕g6 ♞c7 (49...♞e7 50.♕h5) 50.♜b6 ♞e6 51.♜b8 ♜f4+ 52.♙g3 ♙e7 53.♜e8+ ♙d6 and it's hard to say how to improve White's position. 54.♕h5 ♞g7=; 49.♕f5 ♞e3+ 50.♙xg5 ♜xf5+ 51.♙g6 ♙c5 52.♜a8 ♙b4∞]

49...♞e7 and White is losing his strongest weapon — the f7 pawn.

50.♙xg5 ♜xf7 51.♜b7 [51.♜a1 Maybe White should go back with the rook to try to protect the pawns. 51...♜f2 52.♜b1 ♙c5⌘]

51...♜f3 52.♕c2 ♞d5 Black is simply winning now because the White king is very far and the pawns will fall.

53.♜h7 ♜f2 54.♕e4 ♙e5 55.♕xd5 ♙xd5 56.♜h3 ♜xb2 0–1

(16) Kraemer,M (2520) — Bacrot,E (2705)

German league, 02.02.2013

[Chess Evolution]

Black is better with his more active king, although White has no weaknesses and the limited number of pawns should guarantee him a more or less easy draw.

46. ♕h5 ♕c6 47.g3 This is the most principled move, putting the pawns on dark squares, where the Black bishop can't attack them. [After 47.f3 Black has the chance to disturb the kingside pawns with 47...♕b5 and ♕f1.; On the other hand 47.♕f3!? was also possible 47...♕xf3 48.gxf3 ♙c4 49.♙c2 ♙b4 50.♙c1 ♙b3 51.♙b1= Black has a nice position, but he can't make progress.]

47...fxg3 48.fxg3 ♕d7! White has a wide range of choice, but only one idea leads to a draw.

49.h4? The decisive mistake! [The pawn endgame after 49. ♖g4? is winning for Black. 49... ♙xg4 50.hxg4 ♔e4 51. ♖e2 h6!—+ White is in zugzwang. The Black king penetrates from one of the sides.; 49.g4 is bad after 49... ♙b5 and there are problems with the kingside pawns.; 49. ♙d1! was the most precise, counterattacking the a4 pawn, followed by pushing h4 in the next move. Black has no chance to win.; 49. ♙e2! was also good, with the same idea as ♙d1. 49... ♙xh3 50. ♙b5= White wins back the pawn and holds the draw.]

49...g4! Suddenly, Black is winning. White can't avoid the penetration of the king. He must try to bring back his bishop, but it's not on time to solve the problems.

50. ♙f7 ♔e4 51. ♔e2 Otherwise, ♔f3 wins.

51... ♙b5+! White is forced to give free way for the opponent's king.

52. ♔f2 [52. ♔d2 ♔f3—+]

52... ♔d3 53.h5!? White sets a trap, but Bacrot does not fall into it.

53...h6! [After the hasty 53... ♔c2? White has 54. ♙g6+! ♙d3 (54...hxg6 55.h6+- wins.) 55. ♙e8 ♔b3 56. ♔e3 ♙c2 57. ♔f4 ♔xb2 58. ♙xa4 ♙xa4 59. ♔xg4= and Black will succeed to exchange the h7 pawn.]

54. ♙e6 [54. ♙g6+ doesn't change much. 54... ♔d2 and ♔c1 next.]

54... ♔c2 55. ♙xg4 ♔xb2 [White resigned in view of the following line: 55... ♔xb2 56. ♙e6 a3 57.g4 (57. ♔f3 gives Black enough time to play 57... ♙a4! 58.g4 ♙b3 59. ♙xb3 ♔xb3 60.g5 a2—+ Black is faster.)

57... ♙d7! is a very important intermediate move, after which Black collects the g4 pawn and the full point.(But not 57... ♙a4? because of 58.g5!)] **0-1**

Clash of the Titans

(17) Furman, Semen Abramovich
— Spassky, Boris V [B38]

URS-ch24 Moscow (18), 1957

[Csaba Balogh]

A nice mating attack by Spassky. It's very instructive to see how he improved his pieces move by move and, when the moment arrived, he finished the game in great tactical fashion.

1. ♘f3 c5 2. c4 g6 3. e4 ♗g7 4. d4 cxd4 5. ♘xd4 ♘c6 We have transposed from a different move order to the Sicilian Maroczy variation, which is considered to be a very solid, but a bit passive opening.

6. ♖e3 ♘h6 This is an unusual setup. The game perfectly demonstrates its main idea, but it's already known by the modern theory that Black can't fight for equality with this move.

7. ♘c3 0-0 8. ♖e2

8...f5! This is the reason why the knight has developed to h6. Black would like to overtake the initiative with an f4 push. White is forced to think right in the 9th move.

9. exf5 [9. ♗xh6!? is another way to fight for the advantage. White gives up his strong bishop, but the f5 move has created weaknesses in Black's camp and it also restricts the development of the Black pieces. 9... ♗xh6 10. exf5 ♘xd4 11. ♖xd4 ♖xf5 (11... gxf5 12. 0-0 ♗g7 13. ♖d2± Black has difficulties with the c8 bishop. ♗f3 is coming next.) 12. 0-0 ♗g7 13. ♖d3 We have the same story here again, ♗f3 is coming next and the c8 bishop has serious problems to get activated.]

9... ♗xd4! This is another point of Black's system. In general, it's not advisable to get rid of the dark squared bishop, but in this particular case, White is facing some problems with preserving the bishop pair. [9... ♘xf5 10. ♘xf5 gxf5 11. ♖d2± After White has prevented f4, he enjoys a clear advantage with his better pawn structure.]

10. ♗xd4 [10. ♗xh6 is probably the strongest move. 10... ♖xf5 11. 0-0 d6 12. ♖d2 Black has the usual problem with the development of the c8 bishop.]

10... ♘xf5 There is only one way to save the bishop, but then White has to transfer it to a really awkward place...

11. ♗c5 d6 12. ♗a3 On the other hand, if Black plays slowly and White succeeds to consolidate with b3 and ♗b2, the bishop reaches a nice square after making a long trip around the board.

12... Nfd4! A strong dynamic move with the idea of finally solving the problem of the c8 bishop.

13.0-0 Bf5 Who could believe at this point that 10 moves later Black gives mate?!

14. Rc1 Preventing Nc2.

14... Qd7 Spassky chooses a healthy development of his pieces and prepares for doubling his rooks on f7-f8.

15. Nd5 This is probably an inaccuracy. White should have aimed for getting rid of the strong d4 knight. [15.b3 immediately was preferable 15... Rf7 16. Bb2 Baf8 and in comparison to the game, White has 17. Nb5! forcing Black to give up his strong knight. 17... Nxe2+ 18. Qxe2 White's chances are slightly better because of his more active bishop.]

15... Rf7 16.b3 Baf8 17. Bb2 e5! Black succeeded to fortify his knight on d4. We can say that White also has a nice outpost on d5, but it can be taken after Be6, while the Black one is stuck on d4.

18.b4 Very logical play. White wants to push b5 and kick out the d4 knight. However, this move has concrete problems... [18.f3 was stronger with the idea of Bd3, and also a good prophylaxis against the move that happened in the game.]

18... Be6! Suddenly White is not in time to play b5 and he has only weakened his pawn structure.

19. Bd3?! It's hard to believe, but probably this natural move to transfer the bishop to e4 is a decisive mistake. [On 19.b5 Black was intending to play 19... Bxd5! 20.cxd5 Nxe2+! 21. Qxe2 Ne7 22. Qd3 And here after a subtle plan, Black gets the advantage... 22... Qd8! A very nice maneuver with the queen to b6.]

19... Bg4!! Suddenly, White is facing a devastating attack.

20.f3 [It would be interesting to see how Spassky would have continued after 20. Qd2 Bf3! is probably the only winning move, but its point is coming in the next move. (20... Nf3+ is tempting, but 21.gxf3 Bxf3 22. Qg5! and White is alive, although Black can get some advantage. 22... Rf4! 23. Nxf4 Rxf4 24. Qg3 Rg4 25.b5 Black is obviously better, but the fight continues.) 21.h3 to parry Bg4.

21...♔d8!! A fantastic move with the idea of ♔h4. The only way to prevent it is 22.♔h6 Here Black can choose between two promising moves to win material. (22.b5 is refuted nicely by 22...♔h4! and Black can sacrifice all his pieces. 23.bxc6 ♕xg2! 24.♔xg2 ♖f3-- and mate is coming soon.) 22...♕e2 wins an exchange.(22...♕xd5 23.cxd5 ♘xb4 with an extra pawn.)]

20...♕xf3! The attack is rolling.

21.gxf3 ♘xf3+ 22.♔h1 [22.♖xf3 ♖xf3-- White can't hold the heavy pieces.]

22...♔h3! 23.♖f2 This allows a pretty finish, but other moves were also losing. [23.♔e2 was the only chance. 23...♘xh2! 24.♔xh2 (24.♖xf7 ♘f3+--+) 24...♖xf1+ 25.♕xf1 ♖xf1+ 26.♖xf1 ♔xf1+ 27.♔g1 ♔xc4 Black has a winning advantage.; 23.♖c2 loses to 23...♘xh2! 24.♖xh2 (24.♖xf7 ♘f3+--+) 24...♖xf1+--]

23...♘e1!! Beautiful move. White resigned in view of the following mates.[23...♘e1 24.♖xf7 (24.♔xe1 ♖xf2--+) 24...♔g2#]

0-1

Editorial Preface

A happy Valentine's day to all our readers!!!

Your commentators are preparing a little celebration — CEWN turns 1 Year old with the next issue. :)

But let's get back to the chess news:

The "normal" chess event of the week is clearly the Cat. 19 double round robin in Baden-Baden, the "Baden Baden Grenke Chess Classic" with Anand, Caruana, Adams and 3 German players: Naiditsch, Fridman and Meier, measuring their chess skills.

Caruana is leading right now with a score of 4,5/7 after being quite lucky all in all. The second place is shared by Anand and Naiditsch with 4/7. There are three more rounds to go and everything is possible.

The Aeroflot Open, which was for many years the strongest open tournament of the year, switched to rapid and blitz chess. In the rapid event, we have 32 qualified players at the moment. The blitz event was won by Ian Nepomniachtchi, who was followed by Svidler and Grischuk, and an amazing line up of super -GMs below.

As usual, we bring you some fresh commented games from this event.

Have fun!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Fridman,D (2667) – Naiditsch,A (2716) [E97]

1st GRENKE Chess Classic Baden Baden GER (6), 13.02.2013

[Arkadij Naiditsch]

Just yesterday I managed to win a nice attacking game against my colleague from the National Team.

1.d4 ♘f6 2.c4 g6 3.♘c3 ♙g7 4.e4 d6 5.♘f3 0-0 6.♙e2 e5 7.0-0 ♘c6 8.♙e3 [8.d5 ♘e7 We are at the beginning of a huge Classical King's Indian line where both sides have a lot of different plans and ideas.]

8...♘g4 9.♙g5 f6 10.♙h4 [10.♙c1 f5 leads to complex play where recently Black has had good results. For example 11.♙g5 ♔d7 12.exf5 (12.d5 ♘d4∞) 12...exd4 13.f6 (13.♘d5 ♔xf5 14.h3 ♘ge5 15.♘xe5 dxe5 16.♙g4 ♔f7 17.♙xf5 ♙xf5) 13...♘xf6 14.♘xd4 ♘e4 15.♘xe4 ♘xd4 16.♙d3 ♘e6 17.♔c2 ♘xg5 18.♘xg5 ♔g4 19.♘e4 ♙d7 20.♘c3 ♔ae8 21.♙e4 c6 22.♔ad1 ♙e6 23.♘e2 ♙f5 24.♙xf5 ♔xe2 25.♙xg4 ♔xc2 1/2-1/2 Le Quang Liem-Gharamian,T/ Belfort FRA.]

10...g5 11.♙g3 ♘h6 12.dxe5 [12.d5 ♘e7 Black is going to push f5 next. After exf5, White will get the e4 square but that's not enough to get a clear advantage because thanks to his active pieces, Black will have good chances to create an initiative on the kingside.]

12...fxe5 This is the most fighting move. Daniel is a very solid player, so I thought I would get better chances in an unclear position. [12...dxe5 13.♔b3 ♔e7 14.♔ad1 ♔b8

15.♘d5 ♔f7 16.♔a3 a5 17.♔d2 ♙e6 18.h3 ♔fe8 19.♙d1 ♙f8 20.♔e3 g4 21.♘h4 gxh3 22.f4 hxg2 23.♔xg2∞ 1/2-1/2 Ivanisevic,I-Djukic, N/Porto Carras GRE.]

13.h3!? Probably the idea of this move is to play ♘h2, looking for an exchange of the light squared bishops in order to play on the light squares. The problem is that Black can push g4, when the White king will not be very safe.

13...♔h8 I was not sure whether to play ♔h8 or ♘f7. [13...♘f7!? with the idea of preparing ♘d4 and after ♘xd4 exd4 ♘b5, Black will have c5. 14.c5 dxc5 15.♙c4]]

14.c5 Very logical move by White. Now if I manage to put the knight on d4, I will not have the c7-c5 move to support my knight's position.

14...g4 [14...dxc5 15.♔xd8 ♔xd8 16.♘xg5 ♘d4∞ Even here, with the strong knight on d4, Black should not be worse, although this position is very difficult to evaluate.]

15.hxg4 ♙xg4 16.cxd6 cxd6 I think this is the critical moment. During the game I was mainly calculating 17.♘d5 ♙xf3 18.♙xf3 ♘d4 with a very unclear position. My main problem is the knight on h6, so if I have enough time to get it to g5, Black should be doing pretty well, but

in order to do that, I need 2 full moves which gives White time to create something.

17. ♖d2 ♜c8 A nice move. Of course, Black should not exchange the light-squared bishops and my knight is going to g5. [A direct attack would lead nowhere: 17... ♔g5 18. ♜xg4 (18. ♜c4 ♜d4∞) 18... ♜xg4 19. ♜f3 ♔h5 20. ♜h2! and White is better.; 17... ♜e6 18. ♜c4∞]

18. ♜c4 ♜d4 19. ♜e3 ♜f7 Finally my knight is coming into the game.

20. ♜c2 I did not like this move by Daniel. White's knight should be placed on d5 and not on c2.

20... ♜g5 [20... ♜xe2+ 21. ♔xe2 ♔g5 22. ♔ad1 h5∞]

21. ♜d3?! White saves the bishop and prepares ♜xd4-exd4- ♜b5, but now comes

21... ♜df3+! [21... ♜de6 was the other option I was considering during the game, but ♜df3 was just too tempting :).]

22. gxf3 ♜d7! Important move. Now I am preparing to take on f3 and give checkmate with ♔h3. [22... ♜xf3+ 23. ♔g2 ♜h4+ 24. ♔g1 and Black should repeat moves because other options are worse. 24... ♔g5 25. ♜e2 ♜h3 26. ♔h2 ♜xf1 27. ♔xf1±]

23. ♜e2 [23. ♜e1 ♔f6→ 24. ♔a4 ♔f7 with a decisive attack. White can't avoid mate on the h-file.(24... ♔h3 Less accurate because the queen on e8 can create some problems for Black. 25. ♔e8+ ♜f8)]

23... ♔f6 That was the key move of a simple idea, just to give mate on the h-file!

24. ♜d5! only move [24. ♔e1 The idea to escape through the f1 square does not help either. 24... ♜h3+ Here Black has quite a few choices to finish the game. One of them is 25. ♔f1 ♜f4 26. ♔g1 ♔h6 27. ♜f1 ♜h3+ 28. ♔g2 ♔f7! A silent but deadly move. ♔h5 next with ♜f4 and mate can't be avoided by White.; It doesn't help to play 24. ♜e3 ♔h3 25. ♜g4 ♜xg4 26. fxc4 ♔af8! followed by the lethal ♔h6 next.]

24... ♔h6 25. f4 ♜h3+ 26. ♔g2 Here I had 2 options...

26... exf4 [26... ♜xf4+ 27. ♔f3

The position looks pretty unclear from a human point of view, and I was calculating the main ♔h3, but the computer gives an amazing win: 27... ♔h2!! Amazing move! White can't defend from mate. Black wants to play ♜h6 next and 28. ♜xh2 ♔h3+ 29. ♜g3 ♜g2!! followed by ♜g4 mate. But how to find this over the board? I don't know :).]

27. ♖h2 A very human move by Daniel, but as usual, the computer finds a better defense. [27. ♘d4 was the only way to go for White. 27... ♙f7 (27... fxg3 28. fxg3 ♘g5 29. ♘f5 ♘xe4∞ During the game I thought I should be better here, but in fact, things are far from clear.) 28. ♖c1 fxg3 29. fxg3 ♘f2 30. ♖xf2 ♖h2+ 31. ♖xh2 ♙xf2+ 32. ♖h1 ♖xd4 33. ♙f1 What a defense by White! 33... ♙xf1+ 34. ♖xf1 ♖d7 Thanks to the pair of bishops, Black is slightly better, but White has good drawish chances.]

27... f3+ 28. ♖xf3 [28. ♖xf3 ♘g5+ 29. ♖e3 ♖xh2--+ Black has a free attack now.]

28... ♘g5 29. ♘f4 The only move to take control of the h3 square. [29. ♖g4 ♙xg4+ 30. ♙xg4 ♖xg4--+; 29. ♖g3 ♙h3+ 30. ♖g1 ♖g4 31. ♖g2 ♖xd1 32. ♖xh3 ♖f3 33. ♖g2 ♘h3+ 34. ♖h1 ♘f4+--+]

29... ♖xh2+ 30. ♖xh2 ♖e5 Not the most precise. [30... ♙f7! would finish the game quickly. 31. ♖g2 ♙xf4 32. ♖h1 ♖d7 followed by ♖g8 with a mating attack.]

31. ♖g2 ♖xf4 32. ♖h1 ♙g7 33. ♖f1 ♖e6 [There was no need for 33... ♖h3+ 34. ♖xh3 ♘xh3 35. ♖g4 ♘g5 36. ♖f5∞]

34. ♘d4 Daniel just had a minute on the clock, which makes his position very difficult to play. Objectively, Black has a very strong initiative for the exchange.

34... ♖c4+ 35. ♖e2 ♘xe4 36. ♖xc4? Decisive mistake! Now White is losing by force. The only way to try to survive was [36. ♖g1 ♙f6 37. ♘f3 to prevent ♘d2 37... ♖xe2+ (37... ♙xb2 38. ♙d4+ ♙xd4 39. ♘xd4∞ Black still has the initiative, but of course, without the queen, it's not the same as before.) 38. ♙xe2 ♖e8 39. ♙b5 ♖f8→ with a strong at-

tack.; 36. ♘f3 ♘xf2--+ That's why White needed to play 36. ♖g1 first.]

36... ♘d2+ 37. ♖e2 [37. ♖e1 ♙xd4 38. ♙h5 h6--+]

37... d5! A very nice move, especially during time trouble. [Daniel prepared a nice trap: 37... ♙xd4? 38. ♖xh7+! ♖xh7 39. ♙h1+ and suddenly my king is under attack. 39... ♖g6 40. ♖g1+ ♖g5 41. ♖d3+ ♖f6 42. ♙h5 ♙e5+ 43. ♖d1 ♖g8 44. ♖g4 White is a piece down but has practical chances.]

38. ♙c2 [Now at 38. ♖xd5 ♙xd4 White has no saving check on d3 with his bishop.]

38... ♖e8+ 39. ♖d1 ♘xc4 The game is over.

40. ♙c3 Here I had a lot of winning moves, but the move in the game seemed to be the safest one.

40... ♖e4 41. ♘f5 ♘xb2+ 42. ♖c2 ♖e2+ 43. ♖b3 ♙xc3+ 44. ♖xc3 ♖e5+ 45. ♘d4 [45. ♖b3 ♘c4--+]

45... ♖e4 and we are getting into a rook endgame with 2 pawns down for White and 0 hopes to make a draw. I was very happy when Daniel gave me a handshake. A nice game to win! :)

0-1

(2) Svetushkin,Dmitry (2612) – Matinian,Nikita (2460) [E84]

Moscow 2013 (6.11), 07.02.2013

[Csaba Balogh]

It can be risky to play on open tournaments in Russia. Sometimes you might run into painful crushes by much lower rated opponents...

1.d4 ♘f6 **2.c4** g6 **3.f3** This is a popular move nowadays to fight against the Gruenfeld Defence. In the current game, Black decides to transpose to the King's Indian.

3...♗g7 **4.e4** **d6** **5.♘c3** This is the initial position of the Saemisch variation. Black has a wide range of different setups here...

5...0-0 **6.♗e3** ♘c6 [6...c5 is also in fashion nowadays.]

7.♘ge2

7...a6 This is a standard plan in the King's Indian Defense. We can see it in the g3 systems as well. Black tries to find counterplay on the queenside with ♖b8 and b5 against White's strong center.

8.♔d2 ♖e8 A rare sideline not without poison as the game shows. [8...♖b8 is the main move. Here White has plenty of setups, but recently on the top level almost everybody plays 9.♖c1 White is fighting against the b5 move. 9...♗d7 Black prepares for b5 again. (9...b5 immediately drops a pawn: 10.cxb5 axb5 11.♘xb5!) 10.♘d1! b5 11.c5! White succeeds to hold his strong center and intends to finish the development with g3, ♗g2 and 0-0.]

9.g4 White tries to punish his opponent for his last move. He thinks that it was a waste of tempo, but as we'll see, it supports Black's counterplay in the center very well. [9.♖c1 is probably the right move here as well and the game will probably transpose to the 8...♖b8 line with 9...♖b8 10.♘d1 ♗d7 11.g3; On 9.h4 Black can successfully stop the attack with 9...h5; The idea of the 8...♖e8 move is that after any knight move, for instance 9.♘g3 in order to finish the development with ♗e2 and 0-0, to play 9...e5 10.d5 ♘d4! creating a nice outpost for the knight, which cannot be taken twice, because of ♗xe4 at the end.]

9...♖b8 **10.h4**

10...h5! The h5 threat had to be prevented before launching the counterplay with b5 and e5. [10...b5 11.h5 The opening of the h-file would be too dangerous for Black.]

11.g5 [11.gxh5 ♖xh5 Black doesn't need to worry about getting mated here, as the knight on h5 can't be kicked out with ♜f4, because the d4 pawn is hanging.]

11...♞d7 12.f4 White tries to swap Black out of the board. [12.♖c1 was much safer to prevent b5 because White could take twice and the c6 knight falls. Black seems to have difficulties with his passive position, but the computer recommends an unusual plan, which creates strong counterplay again. 12...♞a5! 13.b3 c5 and b5 next, with a very unclear position.]

12...b5 13.f5 White is intending to play ♞f4, creating fatal threats around the g6 pawn. Black must act quickly.

13...e5!

14.f6 White tries to lock the dark squared bishop and if he succeeds to consolidate the center, the situation of the f8 or h8 bishop should lead to Black's defeat! [14.fxe6 was probably the safest continuation and leads to a balanced position. 14...fxe6 15.cxb5 axb5 16.♞g3 (16.♞f4 White

should not be optimistic with 16...e5! and Black is doing great!) 16...e5 17.d5 ♞d4 18.♞g2 followed by 0-0 with an even and, of course, playable position for both sides.; 14.d5 is the usual reaction in such cases, but now after 14...♞d4! 15.♞xd4 exd4 16.♞xd4 ♞e5 Black gets very strong counterplay on the dark squares.]

14...exd4! Black opens the position on the king stuck in the center.

15.♞xd4 ♞xd4 16.♞xd4 b4! Another strong intermediate move. Black wants to weaken the e4 pawn.

17.♞e2 [17.fxg7? leads to a lost position. 17...bxc3 18.♞xc3 ♖xe4+-+ ♞c5 next and the bishop also joins the attack. White can't hold the position.; 17.♞d5 drops a pawn. 17...♖xe4+ 18.♞e2 ♞f8 and c6 next, kicking out the knight.]

17...c5! Yet another intermediate move! Preparing for the following sacrifice! The g7 bishop has been hanging during 4 moves...

18.♞f2 [18.fxg7! White should have simplified the position to a worse rook endgame to try to save the game, but Svetushkin is playing ambitiously against his lower rated opponent. 18...cxd4 19.♞xd4 ♞c5 20.♞g2 ♞b7

21.♘g3 White wants to play 0–0, equalizing completely. 21...♙xe4 22.♘xe4 ♘xe4 23.♙xe4 ♚e7 24.0–0–0 ♚xe4 Black will sooner or later take the g7 pawn, but White has good chances to hold the draw.]

18...♘xf6! Excellent decision! Black gets only two pawns for the piece, but the ones on b2 and e4 are hanging and White still has difficulties to finish the development.

19.gxf6 ♚xf6 20.♘g3 [20.♙g2 was objectively better, but also leads to bad position. 20...♙b7 21.♘g3 ♚xb2 22.♚xb2 ♙xb2 23.♚b1 ♙e5+ with a big advantage. Black will create a passer by pushing his a-pawn. His bishops are dominating.]

20...b3!! A powerful Black threatens to take on b2 now. White has a difficult decision: to push a4 leaving the strong b3 pawn on the board, or to take on b3 and invite the Black rook to the attack.

21.axb3 [21.♙g2 ♚xb2 wins.; 21.a4 ♚xb2 22.♚xb2 ♙xb2 23.♚b1 ♙c3+ 24.♙d1 ♙d7 winning another pawn. White is lost.]

21...♚xb3 22.♚a2 Otherwise ♚xb2 finishes the game.

22...♚xg3! The final blow! Black eliminates the key defender.

23.♙xg3 ♚xe4+ 24.♙e2 [24.♙d1 ♚f3+ wins the rook and the game.]

24...♚f3! [White resigned in view of 24...♚f3 25.♚g1 ♙g4! 26.b3 ♙c3! A horrible inal position. We don't wish anybody this position with the White pieces.]

0–1

(3) Bryzgalin, Kirill (2483) – Ganguly, Surya Shekhar (2626) [D23]

Moscow 2013 (5.13), 06.02.2013

[Csaba Balogh]

A nice attacking game by the second and compatriot of Vishy Anand.

1.d4 d5 2.c4 dxc4 The Accepted Queen's Gambit is getting more and more popular recently.

3.♘f3 ♘f6

4.♔a4+ This is definitely not the best way to fight for an advantage. Ganguly shows a very concrete way to equalize immediately.

4...♘c6! 5.e3 [On 5.♔xc4 ♘e6 (5...♘g4 is also fine.) 6.♔a4 ♘d5 Putting pressure on the d4 pawn is the first idea of the 4...♘c6 move. 7.e3 ♔d7 8.♘c3 ♘xf3 9.gxf3 e5! and this break is the second point of 4...♘c6.]

5...♘d7! 6.♔xc4 [6.♘xc4 ♘b6 Black gets the bishop pair for basically nothing.]

6...e5! The previous two knight moves were directed at this break. As White can't push 7.d5 because of ♘b6, he must forget about the opening advantage and needs to simplify the position in the center.

7.dxe5 ♘dxe5 8.♘xe5 ♘xe5 9.♔c2 A small inaccuracy, giving Black a free tempo. Ganguly finds a very nice idea to fight for the initiative. [9.♔b5+ Forcing the active knight was better, although Black is completely fine here as well. 9...♘d7]

9...♘g4! with the idea of a quick ♔d7 and 0–0–0. White has some difficulties to finish the development. The f1 bishop can't move at the moment. [The most logical 9...♘d6 was obviously also possible, but this leads to an equal position. 10.♘d2 Probably this plan is the most exact way to play. Here Black can't hope for any advantage. (10.♘e2 0–0 11.0–0 is also a balanced position.) 10...0–0 11.♘c3 ♔e7 12.♘d2 ♔d8 13.♘c4=]

10.♘d2 White would like to play ♘c4 and also has the idea with ♔e4, which was not possible immediately because of ♔d1. [10.♘d2 is not the same anymore 10...♔d7! 11.♘c3 and Black wins an important tempo with 11...0–0–0 12.♘d2 (12.♘xe5? ♔d1+ 13.♔xd1 ♔xd1#) 12...

♞d3+ 13. ♙xd3 ♚xd3 14. ♚xd3 ♜xd3 with a small, but long-term advantage thanks to the pair of bishops.]

10... ♚d7! A great move! Looks simple, but it required precise calculation and good intuitions as well. White decide to go for the tactical test of the move.

11.h3 [On 11. ♞c4 0-0-0 12. ♙d2 ♞xc4 13. ♙xc4 ♙f5! is quite unpleasant. The queen has no good square to leave. For instance 14. ♚c3 moves into 14... ♙e7 and ♙f6 with tempo.]

11... ♙h5 12. ♚e4 It seems like Black has missed this move, but...

12...0-0-0!! The sacrific e is justified mainly by the king on e1 and the undeveloped pieces around it.

13.g4 [13. ♚xe5 is a worse version than the game. 13... ♙b4 14. ♚xh5 (14. ♚d4 loses to the slightly primitive 14... ♚xd4 15.exd4 ♜he8+) 14... ♙xd2+ 15. ♙e2 is met simply by 15... ♙xc1-+ and White can't take the bishop because of ♚d2.]

13... ♙g6 14. ♚xe5 ♙b4 15. ♚d4 The only move to save the knight... at least for a while.

15... ♚a4! Another strong attacking move! Black is going to increase the pressure on the d2 knight. [15... ♙xd2+ 16. ♙xd2 ♚c6 was also tempting to win back the material, but suddenly White is the one that gets very strong compensation after 17. ♚xa7 ♚xh1 If White wants, he can force a draw with 18. ♚a8+ ♙d7 19. ♚a4+ because ♚c6 loses to ♙b5.]

16. ♚c4 ♚a5! No mercy for the d2 knight.

17. ♙e2 White decides to give back the piece and tries to finish the development. Despite the material balance, he can't hope to get equality because the Black pieces are all much better placed. [On 17. ♚e2 ♜d7! increasing the pressure to the maximum! 18. ♙g2 (18. ♜h2 might be the last attempt to defend d2, but White loses after 18... ♜hd8 19.f4 ♙d3 20. ♚f3 ♙xf1 21. ♙xf1 ♙xd2 The invasion of the Black rooks is going to be decisive.) 18... ♙d3 19. ♚d1 ♜hd8 White can't solve the problems with 20.a3 ♙b5 21.axb4 ♚xa1-+ and ♙a4 threatens to win more material.]

17... ♙xd2+ 18. ♙f1 ♜he8! Bringing the last piece to the action as well. White is in serious trouble. He is not in time to play ♙f3, ♙g2 to solve all the problems.

19. ♖xd2 ♜xd2 **20.b4** ♚b6 [It was more logical to centralize the queen 20... ♛e5 21. ♜c1 ♙e4 22. ♜g1 ♜ed8 with a big, probably winning advantage.]

21. ♜c1 ♛d6 **22.a3 a6** Opening the back-rank just in case. Black has time to do anything he wants, since White doesn't have an useful plan. He can only focus on not blundering something, since the Black pieces are standing in really threatening positions.

23. ♛c3 ♙e4! Black transfers his bishop to the h1–a8 diagonal, where it prevents White from connecting his rooks with ♙g2 forever.

24. ♜g1 ♜d8 After protecting the d2 rook, Black threatens to win immediately with ♙h2.

25. ♜g3 ♙c6 Black frees his queen from protecting the c7 square and also prepares to create a battery with ♛d5.

26.g5 ♙b8 Another useful prophylactic move before starting the final actions.

27.h4 ♙a8 There was already no need for this move, but of course, it doesn't change anything on the evaluation. [27... ♛d5 28. ♙f3 ♛f5 was winning immediately.]

28.h5 ♛d5 **29.e4** [29. ♙f3 ♛f5 Decisive problems with the f2 pawn.]

29... ♛xe4 **30.** ♙f3 ♛f4 **31.** ♛e3

31... ♜xf2+! A spectacular final blow! [White resigned in view of 31... ♜xf2+ 32. ♙xf2 (32. ♛xf2 ♛xc1+ 33. ♙g2 ♜d2–+) 32... ♜d2+ wins the queen.]

0–1

(4) Korobov, Anton (2702) — Antipov, Mikhail Al (2472) [E52]

Aeroflot Open Rapid Qualifier 2013 Moscow RUS (2.3),
12.02.2013

[Kamil Miton]

1.d4 ♘f6 **2.c4** e6 **3.♘c3** ♖b4 **4.e3** 0-0 **5.♙d3** b6 **6.♘f3**
♙b7 **7.0-0** d5 [7...c5 is the other main line. 8.♘a4 (8.♙d2
cxd4 9.exd4 d5=) 8...cxd4 9.exd4 ♖e8 10.a3 ♙f8 11.b4 d6
12.♙b2 ♘bd7 13.♖e1 ∞; 7...♙xc3 8.bxc3 ♙e4 9.♙e2 c5
10.♘d2± with the idea of playing f3-e4 next.]

8.a3 ♙e7 A slightly passive move. Usually Black plays 8...
♙d6 with the idea of putting the queen on e7 later. [8...
♙d6]

9.cxd5 ♘xd5 [9...exd5 10.b4 ♘bd7 Black has a worse ver-
sion of this line with the bishop on e7. White has two plans
here: to first play ♙b2 and then ♘e2-♘g3, or ♖b3 with
the idea b5-a4, activating the bishop on the a3 square.]

10.e4 ♘xc3 **11.bxc3**

11...c5 We have a structure from the Petrosian line. White
has a better center and the plan to create pressure on the
kingside. Black should look for counterplay against the

central White pawns and over the c-file. It's very impor-
tant to notice that compared to the Petrosian line — 1.d4
♘f6 2.c4 e6 3.♘f3 b6 4.a3 — White is a tempo up be-
cause he didn't play ♖c2-♖e2.

12.♖e2 ♘c6 [12...♘d7]

13.♙b2 White could develop the bishop another way
as well. [13.♙e3 ♘a5 14.♖fd1 ♖c7 15.h4 Typical move.
White is going to create weaknesses on the kingside. 15...
♖ad8 16.h5 ♙c6 17.a4 ♖b7 18.♘d2 ♖d7 19.♙c2 cxd4
20.cxd4 ♖c8 21.♘f3 ♙b7 22.♙d3± 1/2-1/2 Janssen,R-
Cyborowski,L/Emsdetten GER 2009 (41).]

13...♖c7 [13...cxd4 14.cxd4 ♙f6 15.♖ad1 (15.e5 ♙e7 In this
case, the bishop on b2 is worse than on e3.; 15.♖e3± sim-
ple.) 15...♘xd4 16.♙xd4 ♙xd4 17.♙c4 e5 18.♘xe5 ♙xe5
19.♖xd8 ♖axd8 with some drawing chances for Black.]

14.d5! This is the usual problem when Black puts his
knight on c6. Now thanks to this central break, White is
going to activate his bishops, which are well placed to
attack the Black king.

14...c4 Another typical trick. Black sacrifices the pawn
with the idea of getting counterplay on the c-file and not
allowing the White bishops the get activated too easily.

15. ♖xc4 ♘a5 16. ♖a2 exd5 17. exd5 ♙f6 18. ♖fe1
A good move which prevents ♖e8.

18... ♖ad8 19. ♖ad1 ♙c8 Preparing ♖e8.

20. d6 was probably too quick. [20. c4 ♖fe8 21. ♙c2 ♖xb2 22. ♖xe8+ ♖xe8 23. ♙xb2 ♘xc4 24. ♙b4 ♘e5 25. ♘xe5 ♖xe5 26. d6 ♙d7 27. ♙f4 ♖e8 28. h4↑ Thanks to the strong d6 pawn, White has a huge initiative.]

20... ♙a6 Black missed his chance to equalize the position after [20... ♖fe8 21. ♙d3 ♖xe1+ 22. ♖xe1

22... ♙xf3! It was possible to overlook this move. Now White is losing his strong d-pawn. 23. gx3f3 (23. ♙xf3 ♖xd6 24. g3=) 23... ♘b7 24. ♙a6 ♘xd6 25. ♙xa7 ♙c6±]

21. c4 ♖xb2 22. ♙xb2 ♖xc4 Black wins the pawn back, but thanks to the strong d-pawn and the potential pressure on the kingside, White is clearly better. [22... ♘xc4 23. ♙b4±]

23. ♙b1 [23. ♘e5 ♖xa2 24. ♙xa2 ♘c6 25. d7 ♙a8 (25... ♙b7 26. ♘xf7+)-] 26. ♙c4 ♘xe5 27. ♖xe5 ♙b7 28. ♖e7±]

23... ♙c5 24. ♖e5 ♖xd6 25. ♖xh7+ ♙h8 [25... ♙xh7 26. ♙b1++-]

26. ♖de1 White lost the d-pawn, but now the Black king is under huge pressure. One of the reasons is the fact that the Black pieces are placed very far, on the queenside.

26... ♖d5 27. ♙b1 ♙g8

28. h4 Good move with idea in some cases support knight on g5 or push h5 after g6.

28... ♘c6 29. ♖5e3 [29. ♖e8 ♖d8 and Black is fighting.; 29. ♙c2 f5 (29... g6 30. ♖e6 ♖d3 31. ♙xc5 ♖xc5 32. ♖xc6 ♖xc6 33. ♖xd3 ♖c3 34. ♖b5 ♖xa3 35. ♖e7 With his very active pieces, White is better, but in order to win the game, he needs very accurate play.) 30. ♖xd5 ♖xd5 31. ♙d1 with the idea ♘g5-♙h5. 31... ♖d8 32. ♘g5 (32. ♖xf5 ♖xf5 33. ♙xf3 ♘d4 34. ♖e6+ ♙h8 35. ♙g4 ♖e8↖) 32... g6 33. h5 ♖c4 34. ♙c1 ♖d5 The last hope for Black is to look for a queen exchange. 35. ♙b2 ♙d4 36. ♙e2 ♙c4 37. hxg6 ♙xe2 38. ♖xe2 ♙g7 39. ♖xf5 ♘d4 40. ♖d2 ♘xf5 41. ♖e6+ ♖xe6 42. ♖xd8 ♙xg6 43. ♖a8±]

29... ♖a6? Big blunder, maybe because of time trouble. Black could have played [29... ♘d4 30. ♘g5→ Objectively, White is better thanks to the attack against the king, but the position is complex and any result is possible.]

30. ♖c3 ♙b5 31. ♙c2 1-0

Endgame section

(15) Fridman,D (2667) – Anand,V (2780)

Baden-Baden, 10.02.2013

[Chess Evolution]

After a long struggle in the middlegame, the following tricky endgame arose. Black is clearly better because the bishop is dominating the knight and the king is ready to go for the queenside pawns. The e4 and f5 pawns are on light squares, so therefore they might be potential targets for the bishop. The question is whether White will be able to build a fortress or not...

42.a3 ♖c6 43.♘d2 ♙f7 44.c4 The most logical move to cut the king's route to a4, but this gives additional options for Black. [The concrete 44.♙e3 was probably an easier way to hold the draw. 44...♙b5 45.♙d3

45...♙a4 and now the point is that White has 46.♘c4! The knight is ready to counterattack the Black pawns, while the pawn endgame leads to White's advantage as we will see... 46...b5 (46...♙xc4+? 47.♙xc4 White quickly collects the f6 pawn and then his f-pawn is really fast. 47...b6 (47...♙xa3 48.♙xc5 ♙b3 49.♙d6 ♙xc3 50.♙e7 b5 51.♙xf6 b4 52.♙xe5 b3 53.f6 b2 54.f7 b1 ♙ 55.f8 ♙ with good chances for White.) 48.♙d5 ♙b3 49.♙e6 ♙xc3 50.♙xf6 ♙d4 51.♙e6 c4 52.f6 c3 53.f7 c2 54.f8 ♙ c1 ♙ 55.♙b4+± After the e5 pawn falls, only White can win this game.) 47.♘d6 The knight extremely well placed on d6, where it always attacks b5, and Black has no chance to take on a3. White comfortably holds the draw.]

44...b5! Anand opens the path for his king again. [44...♙b6 Black cannot break through with 45.♙e3 ♙a5 because of 46.♘b3+ and the king must retreat.]

45.♙e3

45...b4! Excellent practical decision. Unfortunately for the World Champion, Fridman is a great defender and holds the draw by finding all the only moves. [45...bxc4 46.♖b1!= was the idea, and after settling the knight on c3, the Black king has no invading square.]

46.♔d3 [After the most tempting 46.axb4? White is probably lost. 46...cxb4 47.♔d3 ♔c5 White is in zugzwang, he has only one move to avoid losing the c4 pawn. 48.♖b3+ ♔b6 and this is another zugzwang. The pawns have no moves, the king can't leave because of the c4 pawn and any of the knight moves give a freeway for the king to invade through a5-a4... 49.♖d2 ♔a5 Black retains excellent winning chances.]

46...♔b6 [46...bxa3 is not dangerous. 47.♔c3 White wins back the pawn and has an unbreakable fortress.]

47.♔c2 ♔a5 Black threatens ♔a4, forcing White to take on the b4, when ♔xb4 will lead to the inevitable loss of the c4 pawn.

48.♔b3! Another only move! [48.♖b3+? would have lost again. 48...♔a4 49.♖xc5+ (49.axb4 ♔xb4+!) 49...♔xa3+]

48...♔h5 [48...♔e8 would have been a better try, although it seems to lead to a draw as well after an accurate defense by White. 49.♖f1!! Only this move seems to hold. (49.♔b2 ♔a4 50.axb4 ♔xb4 is hopeless.; Now on 49.♔a2 ♔a4 50.♖b3 bxa3 51.♖xc5+ ♔b4+ Black is winning. The huge difference in comparison to the game is that White can't play ♖d7 now.; 49.axb4+ cxb4 will lead to a similar scenario to the one after 48...♔h5 49.axb4.) 49...♔a4+ 50.♔b2 ♔d1 This is the standard winning technique, with the idea of invading with the king, but now White can launch his counterplay with the knight. 51.♖e3 ♔f3 52.♖d5 ♔xe4 53.♖xf6 ♔xf5 Black is a pawn up, but the position seems to be a draw, as White can create a blockade.]

54.♔b3 bxa3 55.♔xa3 e4 56.♖d5 ♔e6 57.♖e3 Black can only try to break through with the king on the kingside, but this allows access to the c5 pawn. 57...♔b6 58.♔b3! A necessary waiting move! (On the direct 58.♔a4 ♔d7+! 59.♔b3 ♔c7! and Black is in time to get his king to f4 or d4.) 58...♔c6 (58...♔d7 White has an extra tempo now, in comparison to 58. ♔a4 ♔d7 line. This allows him to get his king to e3... 59.♖d5+ ♔c6 60.♔c3 ♔d6 61.♔d2 ♔e5 62.♔e3 ♔e6 63.♖c3 ♔xc4 64.♖xe4=) 59.♔a4! ♔d6 60.♔b5! Black can't make progress.]

49.♔a2!! Only move! [49.♔b2 ♔a4 and a3 is hanging with check!; 49.axb4+ cxb4 50.♘f1 seems to hold as well, but Black has a subtle winning plan. With the disappearance of the c5 pawn, the Black king has access to the d4 square. He can achieve this with some nice maneuvering. (50.c5 ♔b5 51.c6 ♕f7+ 52.♔c2 ♔xc6–+) 50... ♕d1+ 51.♔b2 ♕f3! Forcing the knight to d2, to prevent the ♘e3-d5 counterplay. 52.♘d2 ♕e2 53.♔b3 ♕d1+ 54.♔b2 ♔b6! and ♕c5 next.]

49...♔a4 [49... ♕e2 50.♘b3+ ♔b6 51.♘d2 Black can't make progress.; 49... ♕d1 50.♘b3+ ♕xb3+ 51.♔xb3 bxa3 52.♔xa3 The pawn endgame is dead drawn.]

50.♘b3 bxa3 51.♘xc5+ ♔b4 52.♘d7! And again the knight is just in time to get counterplay.

52... ♕f7 53.♘xf6 ♕xc4+ 54.♔a1 ♔c3 55.♘g4 ♔d4 56.♘xh6 ♔xe4 57.♘g4 ♔f4 58.♘xe5 Draw agreed, since the a1 promoting square doesn't match the bishop. A tenacious defense by Fridman!

1/2

(16) Meier,Geo (2640) – Caruana,F (2757) [D12]

1st GRENKE Chess Classic Baden Baden GER (6), 13.02.2013

[Chess Evolution]

34.♙xd4 Thanks to the advanced pawns on the queenside, White is better in this endgame and Black needs accurate play to avoid problems.

34...♔g8 Black's king is coming closer to the queenside to be, for example, after ♙d6, on time to catch the pawn.

35.b6 axb6 36.cxb6 Now in this structure, Black will have to pay attention constantly to the a5-a6 threat.

36...♙e7 The other defensive idea was to keep the queen on a6. [36... ♙c8 37.a5 ♙a8 38.♙e5 ♙a6 39.h4±]

37.a5 Maybe more accurate was to immediately make the h2 square available for the White king to escape from checks and play [37.h4!? ♖a3 38.♔d7 ♖a1+ 39.♔g2 ♖xa4 40.♖xb7 ♖e4+ 41.♔h2 ♖c2 42.♖b8+ ♔h7 43.♖f4 ♖b2 44.♖e4+ (44.♖e3 ♖b5 With idea c5) 44...♔g8 45.♖xc6 ♖xf2+ 46.♔h3

46...♖f1+ 47.♖g2 ♖b5 48.b7± and in a practical game it's always unpleasant to play against a so far advanced pawn, like the one on b7.]

37...♖a3 The best place for the Black queen to stop the a6 idea and look for perpetual checks.

38.♖e5 [38.♖d8+ ♔h7 39.♖d7 ♖xa5 40.♖xb7 ♖e1+ 41.♔g2 ♖e4±]

38...♔h7 39.h4 ♖d3 40.♔g2 [40.♖f4 f6 (40...♔g8? 41.♖b8+ ♔h7 42.♖xb7 ♖d1+ 43.♔g2 ♖d5+ 44.♔h2 ♖f3 45.♖a6 ♖xf2+ 46.♔h3 Maybe the White king can escape from the checks.) 41.♖e3 ♖b5 42.♖a3 ♖b1+ 43.♔h2 ♖c2±]

40...♖c4 The very active Black king won't allow White to improve his position.

41.♔f3 ♖d3+ 42.♔g2 ♖c4 43.♖c7 ♖e4+ 44.♔g1 ♖e1+ 45.♔g2 ♖e4+ 46.♔g1 ♖e1+ 47.♔g2 ♖e4+ 1/2

Clash of the Titans

(17) Fischer, Robert James
— Rubinetti, Jorge Alberto [B87]

Palma de Mallorca Interzonal Palma de Mallorca (17),
02.12.1970

[Csaba Balogh]

A typical Sicilian crush by Fischer. The game shows the ideas of the 6. ♗c4 system against the Najdorf very well.

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♗xd4 ♘f6 5.♗c3 e6
6.♗c4 Fischer liked to develop his bishop to c4 in almost
all the Sicilian variations.

6...a6 7.♗b3

7...b5 8.0–0 White's main idea in these structures with
the bishop on b3 is to put pressure against the e6 pawn.
The most direct way to do it is to play f4-f5, when Black is
forced to push e5, but this leaves him with a d5 hole dur-
ing the whole game.

8...♗b7 This most logical move is an inaccuracy. It leaves
the e6 pawn unprotected... [Theory rightly considers 8...
♗e7 to be the best. Most of the games continue with
9.♙f3 ♙c7 10.♙g3 0–0 11.♗h6 ♗e8 12.♖ad1 ♗d7 with
still hundreds of games, but it is given as fine for Black.]

9.♖e1 Fischer prepares the other idea of the ♗c4 system,
namely the piece sacrifice on d5 and f5.

9...♗bd7 [Black can't close the e-file and finish the de-
velopment with 9...♗e7 because the standard sacrifice
gives a huge attack for White. 10.♗xe6! fxe6 11.♗xe6
♙d7 12.♗xg7+ ♔f7 13.♗f5 White got 3 pawns for the
bishop, but the fact that the Black king is „naked” is more
important. ♗g5 is coming with power.]

10.♗g5 h6 11.♗h4 ♗c5?! Black would like to solve the
problems around the e6 square. With his last move, he
covers the e6 pawn and is ready to play ♗e7.. However,
another kind of problem is waiting for him now! [11...♗e7
is still bad because of the same reason. 12.♗xe6! fxe6
13.♗xe6 ♙c8 14.♗xg7+ ♔f7 15.♗f5+- with an enor-
mous attack.; 11...g5! is probably the only move to stay
in the game. 12.♗g3 ♗e5 and the game es in the data-
base were unclear. It's interesting that the machine rec-
ommends a novelty here: 13.♗xe6!? fxe6 14.♗xe6 and
gives this as more than enough compensation with the
idea ♗d5 nn the next move. I am not sure whether this
sacrifice is correct, but it's definitely a very exciting one.
14...♗e7 15.♗d5]

12. ♖d5!! This brilliant move confuses the development of the Black pieces. This kind of sacrifices are already standard motifs and come without thinking from a ♖c4 player, but of course, at that time, when the game was being played, Fischer had to find them over the board.

12...exd5 Too greedy decision, but the position is bad in any case. [12... ♖e7 13. ♖xb7 ♘xb7 14. ♘c6 ♙c7 15. ♘xe7 ♙xe7 16. ♘d5 exd5 17.exd5; 12... ♙c8 allows the destruction of the pawn structure. 13. ♖xf6 gxf6 14. ♙h5! Black has serious problems after this move. 14...b4 Black tries to kick out the d5 bishop, but suddenly another piece replaces it there. (The d5 bishop is still poisoned: 14...exd5 15.exd5+ ♙d8 16. ♙xf7 wins.)

15. ♖xb7 ♙xb7 16. ♘d5! Black will still get in trouble if he accepts the sacrifice. 16...exd5 17.exd5+ ♙d8 18. ♘c6+ ♙c7 19.a3!+- This is probably the strongest move, although ♙xf7 was also fine. Now the queenside is opening on the Black king.]

13.exd5+ ♙d7 The king's position might look more or less safe at first sight, but after a few moves all the lines will open against it. [13... ♖e7 loses on the spot after 14. ♖xf6 gxf6 15. ♘f5+-]

14.b4! ♘a4 There was no other square for the knight.

15. ♘xa4 bxa4 16.c4! White is threatening ♙xa4 and wants to open the position with c5!

16...♙c8 There is no shelter for the king...

17. ♙xa4 ♙d7 18. ♙b3 Obviously, White needs the queens on the board for an effective attack.

18...g5 19. ♖g3 ♘h5 Black would like to eliminate the attacking pieces. First the bishop, then the knight with ♖g7... However, the attack is rolling faster.

20.c5! dxc5 [20... ♘xg3 is met with the intermediate move 21.c6!+-]

21.bxc5 ♖xd5 This loses on the spot! [21...♙xd5 was the only critical continuation, but here the attack breaks through as well. 22.♔b6! The main threat is ♖e8 ♔xe8 ♔c7! 22...♔b7 (22...♘xg3 is refuted by 23.c6!+- and Black can't control the e8 and b7 squares with his queen.) 23.♔a5! ♘xg3 (23...♙g7 24.♘f5+- is over. ♘d6 next for example.) 24.c6! This is the most direct way to win, but hxg3 was also good. 24...♙xc6 25.♘xc6 ♔xc6 and Black must resign after 26.hxg3! because ♖c1 is coming next. (26.♖ac1?? immediately would have changed the final outcome because of the small tactical trick 26...♘e2+!)]

22.♖e8+ ♔d7 23.♔a4+! ♙c6 24.♘xc6! [Black resigned in view of 24.♘xc6 ♔xe8 (24...♔xc6 25.♖d1++-) 25.♖e1+ ♔d7 and here, for instance 26.♘a7+ ♔d8 27.♖e8#]

Avec ce numéro, la CEWN fête son premier anniversaire et nous avons un petit cadeau pour vous: si vous achetez un livre sur www.chess-evolution.com, vous obtiendrez gratuitement une seconde copie du même livre gratuitement ! N'oubliez pas de préciser votre numéro d'abonnement.

N'oubliez pas non plus de renouveler votre abonnement sur www.chess-newsletter.com.

Les Grenke Leasing Chess Classics ont été remportés par Vishy Anand, qui n'a pas montré des échecs spectaculaires, mais très pratiques. Fabiano Caruana a terminé deuxième, mais avec la chance qu'il a eu lors de ce tournoi, il méritait clai de gagner. :)

Le rapide Aeroflot a été remporté par Karjakin lors de la partie de mort subite contre Grischuk, que nous avons commentée pour vous cette semaine!

L'Open de Reykjavik vient de commencer et plusieurs très forts GM y participent : Vachier-Lagrave, Giri, Navara, Sokolov, etc etc.

Bonne lecture à toutes et à tous!

(1) Shomoev,A (2557) – Ganguly,S (2626) [E94]

Aeroflot Open Rapid Qualifier 2013 Moscow RUS (7.15),
13.02.2013

[Arkadij Naiditsch]

Voici une autre superbe partie du rapide de l'Aeroflot. Nous allons voir une attaque très spectaculaire de Shomoev.

1.c4 ♘f6 2.♘c3 g6 3.e4 Les blancs choisissent normalement cet ordre de coups afin d'éviter la Gruenfeld.

3...d6 4.d4 ♙g7 5.♘f3 0-0 6.♙e2 e5 7.0-0 Nous sommes dans la ligne principale de l'Est-Indienne.

7...exd4 [7...♘c6 est l'autre ligne principale.]

8.♘xd4 ♖e8 9.f3 c6 10.♙h1 ♘h5 Ce coup a été introduit par l'expert de l'Est-Indienne, Radjabov. Il joue ces structures à merveille avec les noirs, mais cette ligne est très compliquée et les noirs doivent être prudents. [10...d5 est l'autre variante.]

11.g4 ♘f6 Il semblerait que les noirs aient simplement perdu un temps, mais cela n'est pas exactement le cas. Les blancs ont énormément affaibli leur aile roi, ce qui donne de bonnes chances de contre-attaque aux noirs.

12.♙f4 Les blancs commencent immédiatement à mettre la pression sur le pion d6, ce qui est très logique.

12...h5

13.♘f5!? Et l'action commence! [13.g5 ♘h7 14.♖g1 ♘a6 menerait à un jeu peu clair.]

13...gxf5 Les noirs sont obligés d'accepter le sacrifice.

14.gxf5 Voici la première position critique. Que faire avec les noirs maintenant. L'idée des blancs est simple: jouer ♖g1, peut-être suivi de ♙e1–h4 et doubler les tours sur la colonne g. Ça a l'air d'être un „plan lent“, mais ce n'est pas simple pour les noirs de faire quelque chose d'actif. La structure blanche e4–f5 est ultra solide.

14...♘bd7 Les noirs amènent leur cavalier de b8 vers e5. Une décision très logique. [Tenter d'agir immédiatement au centre ne menerait à rien: 14...d5 15.cxd5 cxd5 16.e5! Et les noirs n'ont déjà rien de mieux que de rendre la pièce: 16...♙xf5 17.exf6 ♙xf6 18.♘xd5 Avec une attaque de mat.]

15.♖g1 ♙h8 Les blancs ont maintenant le choix entre plusieurs continuations.

16.♙e1 Suivre son plan initial est normalement une bonne idée dans une partie rapide. [16.♙xd6; 16.♙xd6 Ces deux coups mèneraient à un jeu peu clair.]

16...♘e5? Les noirs n'auraient pas dû permettre à la dame blanche d'aller en h4. [16...♘h7! semble être le seul coup. 17.♖d1 Avec une forte attaque pour les blancs.]

17. ♔h4 Les blancs veulent jouer ♖xg7 suivi de ♖g1 et ♙g5. Il est très difficile de trouver une défense pour les noirs.

17... ♘h7 Mieux vaut tard que jamais, mais l'attaque blanche est complètement devastatrice maintenant.

18. ♔xh5 ♙e7 19. ♖g3! Un autre très fort coup! Les blancs ne menacent pas seulement de jouer ♖ag1, mais aussi ♖h3.

19... ♘d7 Sauvant le cavalier h7, mais pas la partie...

20. ♖ag1 ♘df6 21. ♔h4! Les blancs choisissent une très bonne case pour la dame et préparent déjà le sacrifice de dame.

21... ♘xe4 [Si les noirs continuaient de passivement défendre par 21... ♖g8 22. ♙g5! suivi de ♖h3 mettrait un terme à la partie sur-le-champ.]

22. ♔xh7+!! Quel superbe coup! Les blancs n'ont que deux pièces pour la dame, mais les noirs sont complètement paralysés...

22... ♙xh7 23. ♖xg7+ ♙h8 24. fxe4 La position blanche est complètement gagnante. Ils veulent maintenant jouer ♖7g5 suivi de ♖h5 mat!

24... ♙xf5! La seule chance pratique des noirs.

25. exf5 ♖g8 Il y a toujours beaucoup de tension dans la partie. Les blancs doivent continuer de jouer de manière dynamique.

26. ♖7g3?! Pas le meilleur coup... [26. ♙g5! aurait été le bon choix tactique. 26... ♙e5 27. ♖xf7 Et les noirs ne peuvent pas empêcher ♙f6.]

26... ♖xg3 27. ♖xg3 ♖g8 Les noirs se sentent un peu plus à l'abri après l'échange d'une paire de tours, mais leur position reste assez mauvaise.

28. ♖h3+ ♙g7 29. ♙h6+ ♙f6 30. ♖e3 Les blancs entendent mater le roi noir, ce qui est bien sur la bonne chose à faire.

30... ♙c7 31. ♙d3 Un coup humain, mais les noirs ont maintenant un extraordinaire moyen de s'échapper! [31. ♙e4+ donnerait une attaque de mat aux blancs, même si cette position est bien sûr difficile à jouer lors d'une partie rapide.]

31... ♙b6! Un bon coup. Les noirs attaquent la tour e3 et le pion b2.

32. ♖e4+ ♔xf5? Les noirs rentrent dans un reseau de mat. [32... ♔e7! etait le bon coup. Les blancs ont l'air „d'avoir quelque chose”, mais ce quelque chose n'est en fait peut-etre rien. 33. ♖e1 ♔d8 Le roi noir est enfin a l'abri. La position n'est pas claire.]

33. ♖g3+! ♔g4 **34.** ♕f5+ ♔h4 **35.** ♖e4+ Quelle fantastique position de mat!! :)

1-0

(2) Mamedyarov,Shakhriyar (2766) – Le,Quang Liem (2705) [D47]

Aeroflot Open Rapid Final Moscow RUS (1.2), 16.02.2013

[Csaba Balogh]

Voici une superbe partie d'attaque de la part de Mamedyarov.

1.d4 d5 2.c4 c6 3. ♖c3 ♖f6 **4.e3 e6 5.** ♖f3 ♖bd7 La position de depart de la variante Meran. Recemment 6. ♔c2 etait le coup le plus populaire, mais la grande ligne principale 6. ♕d3 est en train de revenir a la mode.

6. ♕d3 dxc4 **7.** ♕xc4 b5 **8.** ♕d3 Les noirs ont plusieurs choix ici et Le Quang decide de jouer une continuation tres tranchante.

8... ♕b7 **9.e4** Les blancs ont construit un joli centre et les noirs vont etre obliges de se battre contre celui-ci lors des prochains coups.

9...b4 10. ♖a4 c5 Les noirs ont reussi a attaquer les pions centraux. Nous n'en sommes qu'au debut de la theorie.

11.e5 ♖d5 **12.0-0 cxd4 13.** ♖xd4!? Une alternative tres tranchante a la ligne principale 13. ♖e1. Ce coup implique un sacrifice de pion, qui aurait du etre accepte si les noirs voulaient tester la ligne. [13. ♖e1 g6 est possible. Le Quang a sans doute confondu la partie avec cette ligne.]

13...g6? Les noirs vont payer cher ce coup qui a pourtant l'air tres logique. [13... ♖xe5 est le coup critique. 14. ♕b5+ ♖d7 15. ♖e1 Toutes les pieces blanches sont dirigees contre le roi noir. 15... ♖c8! Il fallait empecher ♖c6. La position noire semble tres douteuse, mais ils arrivent a tout tenir. La partie de haut niveau la plus recente avait

continue par 16.b3 (16.♔h5 g6 17.♔e5 ♔f6 est la ligne principale qui est considérée comme acceptable pour les noirs.) 16...♙e7

17.♖xe6! Les noirs semblent être en difficulté, mais s'ils arrivent à garder leur sang froid ils devraient s'en sortir. 17...0-0! (17...fxe6? perd après 18.♘xe6 ♔a5 19.♘g7+ ♔d8 (19...♔f8 20.♙xd7 Avec une attaque gagnante.) 20.♘e6+ ♔e8 21.♔h5# Quel joli mat.) 18.♘c6 ♙xc6 19.♖xc6 Les blancs ont la paire de fous, mais leur cavalier en a4 est déplacé. La partie a continué par 19...♘c7 20.♙f1 ♘e5 21.♔xd8 ♖fd8 22.♖c2 ♘d5 23.♖xc8 ♖xc8 24.♙b2 Avec un petit avantage pour les blancs, mais les noirs ont réussi à annuler sans trop de problèmes dans Riazantsev-Ragger, Plovdiv 2012]

14.f4! ♙e7? Ceci est sans doute l'erreur décisive. Les blancs lancent une attaque décisive avec de nombreux sacrifices. [14...a6 avait été joué dans une autre partie de Mamedyarov et il avait gagné dans un style similaire: 15.f5!! ♔h4 (15...♘xe5 16.fxe6 L'ouverture des lignes sera fatale au roi noir.; 15...gxf5 perd après 16.♘xe6! fxe6 17.♔h5+ Cet échec est la principale idée derrière le sacrifice f5. 17...♔e7 18.♙g5+-) 16.fxe6 ♔xd4+ 17.♔h1 0-0-0

(17...fxe6 perd la dame après 18.♙xg6+-) 18.exd7+ ♔b8 19.♙xa6 ♔xe5 (19...♔xd1 20.♖xd1 ♙xa6 21.♖xd5 est aussi complètement gagnant pour les blancs.) 20.♖e1+- Les noirs ont abandonné quelques coups plus tard dans Mamedyarov-Nepomniachtchi, Dagomys 2008.; Il est très bizarre qu'aucune partie n'ait continué avec l'idée normale de g6. 14...♙g7 Les noirs semblent obtenir une position complètement jouable. 15.♙d2 (15.f5? ne marche pas à cause de 15...exf5 et après e6 le cavalier d4 est en prise sur échec.) 15...0-0 16.♔e2 ♔e7 Avec des chances de part et d'autre.]

15.f5!! Les blancs lancent une attaque dévastatrice.

15...exf5 [15...♘xe5 perd après 16.♙b5+! suivi de fxe6.; 15...gxf5 perd de manière similaire à la ligne 14...a6: 16.♘xe6! fxe6 17.♔h5+ ♔f8 18.♙h6+ ♔g8 19.♙xf5! exf5 20.♔xf5 Les noirs ne peuvent pas parer tous les échecs sur les cases blanches.]

16.e6! Les blancs doivent ouvrir toutes les lignes et diagonales devant le roi noir.

16...♘7f6 [16...fxe6 17.♘xe6 ♔a5 18.♙xf5! est aussi horrible pour les noirs comme ils ne peuvent pas roquer à cause du cavalier e6. 18...gxf5? 19.♔h5#]

17. ♖b5+ ♔f8

18. ♘xf5! [Commencer par 18. ♖h6+! ♔g8 19. ♘xf5! était sans doute légèrement plus précis. 19...fxe6 (19...gxf5 transpose vers la partie.) 20. ♔e2 gagne de manière élégante.(20. ♘xe7+ ♔xe7 21. ♔d4 Cette position est aussi gagnante grâce à la domination des pièces blanches.)]

18...gxf5 [18...fxe6 était plus tenace, mais la position noire reste très désagréable. 19. ♘xe7 ♔xe7 20. ♖h6+ ♔f7 21. ♔d4+- suivi de ♖g5 et du doublement des tours sur la colonne f.]

19. ♖h6+ ♔g8 20. ♘xf5 Les noirs ne peuvent pas empêcher ♘g5! La fin est proche.

20...fxe6 21. ♘g5+ ♔f7 22. ♘g7+ ♔f8 Il est bizarre que les blancs n'aient pas de gain direct dans cette position, mais ils peuvent simplement activer leur dame et tour et la position noire va automatiquement tomber en pièces.

23. ♔f3 [23. ♔d3 était sans doute le coup le plus précis, avec l'idée de ♔xh7 ♔g8 et ♔g6 mat, mais le coup du texte est aussi très fort.]

23... ♔d6 24. ♔f1 ♖c6 25. ♔h5! 1-0

(3) Anand,Viswanathan (2780) – Fridman,Daniel (2667) [C42]

1st GRENKE Chess Classic

Baden-Baden GER (9.1), 16.02.2013

[Csaba Balogh]

Il y a quelques semaines, nous avons analysé la fantastique victoire d'Anand contre Aronian. Voici une autre partie où le Champion du Monde n'a pas dû faire un seul coup sur l'échiquier, seulement dérouler sa préparation.

1.e4 e5 2.♘f3 ♘f6 Fridman avait déjà joué la Petroff à deux reprises lors de ce tournoi et Anand pouvait donc s'attendre à cette ouverture.

3.♘xe5 d6 4.♘f3 ♘xe4 5.d4 La ligne principale. Récemment 5.♘c3 était devenu bien plus populaire.

5...d5 6.♙d3 ♘c6 7.0-0 ♙e7 Les noirs ont aussi le choix entre différents systèmes, mais depuis que Kramnik a commencé à jouer celui-ci en 2004, de nombreux forts joueurs l'ont imité. Anand lui-même l'a joué quelques fois et Fridman a une douzaine de parties dans cette ligne.

8.c4 ♘b4 9.♙e2 0-0 10.♘c3 ♙f5 11.a3 ♘xc3 12.bxc3 ♘c6 13.♖e1 ♖e8 14.cxd5 ♗xd5 15.♙f4 ♖ac8 Voici ce qui est considérée la position initiale de cette ligne. Des centaines de parties ont été jouées ici, mais la théorie dit que les noirs sont ok. Anand choisit le coup le plus joué.

16.h3 h6 17.♘d2 ♘a5 18.♙f3 Shirov a employé ce coup à deux reprises, mais il n'a pas réussi à obtenir d'avantage.

18...♗d7 19.♘e4 [19.♘b3 était moins dangereux. 19...♘xb3 20.♗xb3 b6 Les noirs ont égalisé dans Shirov-So 2000.]

19...♖cd8 Nous suivons pour le moment la partie Akopian-Kasimdzhanov de 2009, ce qui est intéressant comme Kasimdzhanov est l'un des principaux seconds d'Anand, mais il a aussi été l'entraîneur de l'équipe d'Allemagne en 2009, quand ils ont gagné le Championnat d'Europe par équipes.

20.♖a2! Voilà la nouveauté. Il serait intéressant de savoir qui l'a trouvée, mais cela restera le secret de l'équipe d'Anand. [Akopian avait joué 20.♘g3 ♙g6 21.♙h5 mais les noirs avaient facilement égalisé après 21...♙d6 22.♙xd6 ♖xe1+ 23.♗xe1 cxd6 24.♙xg6 fxg6=]

20...b6 est un coup normal dans cette ligne. Les noirs ont une structure tres stable a l'aile dame, tandis que le pion a3 pourrait etre une cible au long terme.

21. ♖ae2! ♙xa3 Fridman croque le pion empoisonne. Il aurait du se douter que le Champion du Monde avait prepare une replique venimeuse. [21... ♙f8 semble etre une alternative plus solide. Il n'est pas claire comment les blancs veulent se battre pour l'avantage ici, mais Anand avait sans doute quelques idees. 22. ♘g3 (22. ♙xh6 se heurte a 22... ♙xe4) 22... ♙g6 23. ♙g4 ♖c6 Les noirs semblent etre ok.]

22. ♙g4!! Il est facile de loucher ce coup dans ses calculs. Les blancs ont soudain plusieurs menaces tactiques, la principale etant liee a ♘f6.

22... ♖f8? Fridman quitte le clouage, mais ce coup mene a une mauvaise position. [L'idee est qu'apres 22... ♙xg4 23. ♘f6+!! gagne du materiel de maniere forcee. 23... gxf6 24. ♖xe8+ ♖xe8 25. ♙xg4+! Cet echec intermediaire gagne la tour. 25... ♙xg4 26. ♖xe8+-; Mais apres le coup de l'ordinateur, 22... ♙e6!! les noirs semblent tenir, meme s'il serait tres difficile de trouver tous les coups suivants durant la partie. 23. ♙xh6 Le coup critique. 23... ♙xg4! (23...

f5 mene a une mauvaise position. 24. ♙g5 fxf6 25. ♙xd8 ♖xd8 26. hxg4 Le materiel est plus ou moins egal, mais le roi noir est trop expose et les pieces blanches ne vont pas tarder a l'attaquer.) 24. hxg4 (La grande difference par rapport a 22... ♙xg4 est que le fou est en h6 et donc en prise apres 24. ♘f6+ gxf6 25. ♖xe8+ ♖xe8 26. ♙xg4+ (Les blancs doivent jouer 26. ♖xe8+! ♙h7 et la partie n'est pas claire.) 26... ♙xg4 27. ♖xe8+ ♙h7 28. hxg4 ♙xh6) 24... ♖xe4 25. ♖xe4 gxf6 Les blancs doivent agir rapidement, sinon les noirs vont consolider leur position par ♙f8. Les blancs peuvent forcer la nulle ici, ce qui est peut-etre la meilleure solution dans cette position: 26. g5 (26. ♙d2 ♙f8 27. g5 ♘c4 28. ♙f4 ♘d6) 26... hxg5 27. ♖e5 f6

Après la petite combinaison 28. ♖xa5! bxa5 29. ♙b3+ ♙g7 30. ♙xa3 ♖e8= La partie est complètement nulle.]

23. ♙xf5 ♖xf5 24. ♙xc7 Les blancs restaure l'egalite materielle, mais ce qui est plus important, c'est que leurs pieces continuent de dominer.

24... ♖d7 [24... ♖c8 perd une qualite apres 25. ♙d6!+-]

25. ♙e5 f6 Les noirs devaient bloquer le fou, mais maintenant les blancs peuvent profiter du malheureux placement du fou a3 et de la tour d7.

26. ♖g3! ♜e6 [26... ♜g6 se heurte a 27. ♜a4! avec double attaque.]

27. ♜a4! Les noirs vont maintenant perdre du materiel!

27... ♘c4? Une erreur, mais la position noire etait deja critique. [27... fxe5 28. ♜xe5 ♜d6 (28... ♜f7 29. ♜f5! etait l'idee! Les noirs ne peuvent pas proteger les pieces en d7 et a3. Ils vont au moins se retrouver avec un pion de moins.) 29. ♘e4+-]

28. ♘d6!! Un tres joli coup, mais ce n'etait pas le seul coup gagnant.

28... b5 [L'idee est qu'apres 28... ♜xd6 29. ♜xc4+ ♜h8 les blancs ont differents moyens de gagner le fou a3. Par exemple: 30. ♜b3 suivi de ♜e6 ou ♜a1. Le fou va tomber.]

29. ♜xe6 bxa4 30. ♘xf8 Les blancs une qualite de plus et une position gagnante. Le reste n'est plus qu'une question de technique.

30... ♜xf8 [30... ♘xf8 31. ♜c6! Le dernier coup cle afin de chasser le fort cavalier c4.]

31. ♜a1 ♘b2 32. ♜xa4 ♘b6 33. ♜a6 [Le gain le plus elegant etait: 33. ♜xb6! axb6 34. ♘e2! Le fou en b2 est piege! 34... ♜e7 35. ♜f1+- Suivi de ♜a2.]

33... ♘xc3 34. ♘f5 ♘b4 [34... ♘xd4 35. ♘xd4 ♜xd4 36. ♜xa7+- Les noirs n'ont pas la moindre chance dans cette finale.]

35. ♜e2 Le reste es t facile. Anand va seulement ameliorer ses pieces et la position sera automatiquement gagnante.

35... ♜f7 36. ♜ea2 ♘c8 37. g4! Un fort coup positionnel afin de fixer les pions a l'aile roi. La prochaine etape pourrait etre d'activer le roi. Les noirs decident de simplifier la position, mais cela ne va pas changer le resultat de la partie.

37... g6 38. ♘xh6+ ♜g7 39. g5 fxg5 40. ♘g4 ♜xd4 41. ♜c2 ♘e7 42. ♜xa7 ♘d6 43. ♜g2 ♜f7 44. ♜e2 ♘b4 45. ♜e5 ♘d6 46. ♜xg5 ♜e6 47. ♜a6 Une preparation impressionnante et une tres bonne technique afin de convertir la position gagnante.

1-0

(4) Karjakin,Sergey (2786)
– Grischuk,Alexander (2764) [C65]

Aeroflot Open Rapid Final Moscow RUS (4.3), 17.02.2013
[Arkadij Naiditsch]

Voici la partie de mort subite de la finale du rapide de l'Aeroflot, ou deux des meilleurs joueurs de rapide se sont affrontés. Les deux premières parties s'étant achevées par la nulle, cette partie devait désigner le vainqueur. Les blancs ont 5 minutes contre 4 pour les noirs, mais les blancs doivent gagner.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 ♘f6 Tout comme dans la partie précédente, Grischuk choisit la Berlinoise, qui est considérée comme un choix très solide.

4.d3 L'un des deux lignes principales, l'autre étant 4.0–0 ♘xe4 5.d4, menant vers une finale.

4...♙c5 5.c3 [5.0–0 ♘d4 ne semble pas donner d'avantage aux blancs.]

5...0–0 6.0–0 d6 7.h3 Le coup à la mode.

7...a6 [7...♘e7 a été joué à plusieurs reprises récemment.]

8.♙xc6 bxc6 9.d4 Ceci est bien sûr toujours de la théorie. Les idées des deux camps sont simples: les blancs ont donné la paire de fous afin de contrôler le centre et avoir la meilleure structure et les noirs espèrent que la position va s'ouvrir afin d'utiliser leur paire de fous.

9...♙b6 10.♖e1 h6 11.♙c2 ♖e8 12.♘bd2 Les blancs sont prêts à jouer ♘c4 au prochain coup suivi de ♘xb6, avec une position plus agréable. Les noirs doivent agir rapidement.

12...exd4 13.cxd4 c5 La réaction de Grischuk a l'air un peu bizarre à première vue, mais la position va devenir assez dynamique. Si les blancs n'arrivent pas à maintenir leur centre, la partie pourrait rapidement s'achever par la nulle.

14.d5 La bonne réaction. [Le tentant 14.♘c4?! donnerait du très bon jeu aux noirs après 14...d5! Un coup typique dans ce genre de position.]

14...c6! Les noirs n'ont pas de temps à perdre. Les blancs voulaient jouer ♘c4.

15.dxc6 ♙c7

18.e5! Voilà exactement comment les blancs doivent jouer ici! Leurs cavaliers vont dominer tout le centre.

18...dxe5 19.♘xe5 ♔c7 20.♘dc4 ♖e6 21.♖ad1 ♕e7 Même si la position blanche a l'air très prometteuse, il est difficile de trouver un moyen direct de percer la défense noire et il ne faut pas oublier que c'est une partie de blitz!

22.♘e3 [22.♕c3!? avec l'idée ♕a5 aurait pu être très désagréable pour les noirs.]

22...♕b7 23.♘f5 ♕f8 La position blanche a l'air superbe, mais la bonne évaluation de la position est qu'elle n'est en fait peut-être qu'égalitaire! Les noirs défendent bien le pion g7 et la paire de fous leur donne toujours beaucoup de contre-jeu. Ils veulent maintenant jouer ♖ae8.

24.♘g4 Il est difficile de conseiller un meilleur coup aux blancs.

24...♘xg4 25.hxg4 ♖ae8 26.♖xe6 ♖xe6 27.♔c3 Les blancs sont toujours mieux et les noirs doivent continuer de jouer avec précision!

27...♖g6 Un coup logique, mais dangereux. [27...f6 28.♔c4 ♕f7 était un moyen plus solide de jouer.]

28.f3 Fermer la diagonale du fou et protéger le pion g4 ne peut pas être une mauvaise idée.

28...♔h7? Ce coup qui a l'air très naturel est en fait une sérieuse erreur.

29.♔d3! Il est étonnant de voir comment Karjakin trouve des coups si difficiles lors d'une partie de blitz. Il veut jouer ♘h4 au prochain coup et les noirs ne peuvent pas l'en empêcher.

29...c4 Grischuk tente de compliquer la position, une bonne décision! [29...♔g8 30.♕d8! Et la partie est simplement finie.]

30.bxc4 ♕c5+ 31.♕d4 [31.♔h1 était une autre bonne option, mais ce coup a l'air un peu dangereux avec si peu de temps à la pendule...]

31...♕xd4+ 32.♕xd4

32...h5! Superbement joué par Grischuk, qui cherche des chances dans une position déjà perdante.

33.gxh5 ♖g5 34.♕d3 [34.♘d6 ♖xh5 35.♖e1 Les blancs ont un pion de plus et la combinaison dame+cavalier leur donne de bonnes chances d'attaque.]

34... ♔c5+ 35. ♘e3+ f5 36. ♔d4! Tres solide...

36... ♔c6 37. ♘d5 ♔h6 Grischuk trouve toujours un moyen de se battre alors que sa position semblait sans espoir!

38. ♖b1 ♙xd5 39. cxd5 ♔xh5 40. ♔d3 ♔h3 41. ♖b2 Les deux joueurs n'avaient plus que quelques secondes a la pendule et la partie est devenue tres chaotique...

41... ♔g3 42. ♖e2 ♖h5 43. d6! Si vous ne savez pas quoi faire, poussez votre pion! :)

43... ♔h2+ 44. ♔f2 ♔h4+ 45. ♔e3! Les blancs n'ont peur de rien avec seulement quelques secondes a la pendule.

45... ♖h6 46. ♔xf5+ ♔h8 Nous allons maintenant voir une superbe technique de la part de Karjakin. Elle s'appelle: pour gagner au temps, il faut simplement jouer plus vite!

47. ♔f8+ [Objectivement 47.d7 semble mettre un terme a la partie.]

47... ♔h7 48. ♔f5+ ♔h8 Une repetition.

49. ♔c8+ ♔h7 50. ♔c2+ ♔h8 Deux autres coups.

51. ♖d2 Un coup quelconque.

51... ♖e6+ 52. ♔d3 ♖xd6+ 53. ♔e2 ♖e6+

54. ♔e4! Les blancs ne veulent bien sur pas de la nulle et les noirs vont perdre au moins une seconde pour prendre la dame.

54... ♖xe4+ 55. fxe4 Et les blancs gagnent au temps avec seulement 2 secondes a la pendule! Quelle partie... Et quel superbe niveau pour une partie de blitz!

1-0

(15) Lintchevski, Daniil (2528)
— Kamsky, Gata (2740) [D11]

Aeroflot Open Rapid KO Moscow RUS (1.1), 15.02.2013

[Chess Evolution]

28.fxe3 b6 Les noirs n'étaient pas obligés de se dépêcher avec ce coup, ils pouvaient aussi tenter de provoquer le pion e a avancer plus loin et ainsi le rendre plus faible. [28...d6 29.e4 b6 30.gf2 gf8 31.e3 (31.e5 b5 32.c4 d4 33.e3 c6 34.e4 (34.e6 f6 Et le pion en e6 est faible.) 34...b4 35.a3 c2 36.a4 e7 Les blancs ne peuvent pas jouer d5-c6 a cause de b4+. Ils pourraient aussi tenter de passer par c4-b5, mais le pion e5 pourrait alors être faible.) 31...f6 32.d4 b5+ 33.c4 c7 Avec le cavalier en c7 et le roi en d6, les noirs devraient facilement tenir la nulle.]

29.gf2 d7 30.b7 g7 31.f3 f6 32.e4 e6
Les deux camps améliorent leur roi.

33.b4 d6 34.a6 f5+ 35.d4 c6+ 36.c4 e5+ 37.d4 c6+ 38.c4 Il faut dire que c'est une partie rapide au système éliminatoire, voilà pourquoi Kamsky voulait jouer cette position ou objectivement seuls les blancs ont des chances de gain.

38...d8 39.c8 h6 Le début d'un mauvais plan. Ce n'est pas une bonne idée d'avancer les pions comme ils seront plus simples à attaquer. [39...c7 40.a6 d6 Une fois de plus Gata refuse de répéter les coups.]

40.a3 c7 41.a6 c6 [41...d6 est sans doute plus précis.]

42.b5+ d6 43.e8 g5 Avec les pions en h6-g5, le roi blanc va sans doute se diriger vers l'aile roi.

44.b5 [44.g6 f4 45.exf4 gxf4 46.d4 (46.b5 c7 47.a6 b8) 46...c6+ 47.e4 e5 Et les noirs sont juste à temps avec leur contre-jeu. 48.e8 c4 49.a4 e3 50.xf4 xg2+ 51.f5 e7 52.c6 h4+ 53.g4 g6 54.h5 f4±]

44...e6 45.h5 [45.a6? c7+ 46.xa7 xe8 47.xb6 c7 48.b5 d5+ 49.b7 c5-+]

45...c7+ 46.c4 e5 47.f3 d6 48.h5 [48.g4 e5 49.gxf5 xxf5 50.a4 e5 Les noirs doivent garder leur cavalier en c7 et le roi en e5/d6 et par rapport à la partie, ils n'auront pas de faiblesse à a6 et ils devraient facilement faire nulle.]

48...d5 49.d4 c7 50.c4

50...a6 Je n'aime pas du tout ce coup. Le pion en a6 sera très faible.

51. ♖f3 ♔e5 52.a4 Les blancs vont jouer a5 pour obtenir la case c5 pour le roi.

52...♔d6 53.a5 b5+ Ce coup est sans doute meilleur que de prendre en a5, comme les noirs ont maintenant l'idée de créer du contre-jeu contre le pion b4. [53...g4 était intéressant, avec l'idée de réduire le matériel et de créer un pion passe h. 54.hxg4 fxg4 55. ♖b7 (55. ♖xg4 ♘d5 56. ♖f3 b5+ 57. ♖b3 ♘xe3 58. ♖b7 h5 59. ♖xa6 ♔c6 60.g3 ♘f5 61. ♖c3 ♘xg3 Les blancs n'ont pas assez de temps pour mettre le fou sur la diagonale h1-a8 et le roi en c5. 62. ♖d3 h4 63. ♖c8 ♘h5 64. ♖d4 ♘f4 65. ♖g4 ♖d6 66. ♖f3 ♘e6±) 55...b5+ 56. ♖d4 h5 57.g3 (57. ♖e4 h4 58. ♖f4 h3 59.gxh3 gxh3 60. ♖g3 ♘d5=) 57...♘e6+ 58. ♖e4 ♘c7 59. ♖f5 ♘d5 60. ♖xd5 (60. ♖xa6 h4 61. ♖xg4 hxg3 62. ♖xg3 ♘xe3 63. ♖b7 ♖c7 64. ♖e4 ♘d1 65. ♖c2 ♘c3 66. ♖b3 Les blancs ont réussi à contrôler les cases a2 et d5, mais le cavalier va aller en c6. 66...♘e2+ 67. ♖f2 ♘d4=) 60...♖xd5 61.e4+ ♖d4]

62. ♖f4 Ce genre de coup n'est pas toujours simple à voir. 62...♖c4 63. ♖g5 ♖xb4 64.e5 h4 65. ♖xh4 ♖c5 66. ♖g5 b4 67.e6 ♖d6 68. ♖f6 b3 69.e7 b2 70.e8 ♖b1 ♖71. ♖d8+ ♖c5 72. ♖c8+ ♖d4 est le seul moyen d'éviter l'échange ♖c8-♖f5, mais maintenant les blancs vont simplement prendre le pion a et ils auront de bonnes chances de gain. 73. ♖xa6±]

54. ♖d4

54...♘e6+?! Une imprecision, mais la position était déjà compliquée pour les noirs. [54...f4 55.exf4 (55. ♖b7 fxe3 56. ♖xe3 ♘d5+ 57. ♖xd5 ♖xd5=) 55...♘e6+ 56. ♖e4 ♘xf4 57. ♖f5 ♘d3 58. ♖g6 ♘xb4 59. ♖xh6 ♘d5 60. ♖xg5 b4 61.h4 b3 62. ♖e4 b2 Et maintenant le plan gagnant est de

mettre le roi en h6 et d'aller a dame avec le pion g. 63.g4 (63.h5 ♖e7 Les noirs sont a temps pour arreter le pion.) 63...♘c3 64.♙c2 ♖e7 65.♙h6+-; 54...h5! Un fantastique coup et le seul moyen de survivre! Les noirs empechent g4 et si les blancs prennent le pion, alors ils obtiendront du contre-jeu apres ♘d5. 55.♙b7 (55.♙xh5 ♘d5 56.♙g6 ♘xb4 57.♙xf5 ♘c6+ 58.♙c3 ♘xa5 59.♙c8 ♘c4 60.♙xa6 ♘xe3=; 55.g3 ♘e6+ 56.♙d3 ♘c7 57.♙xh5 ♘d5 58.h4 gxh4 59.gxh4 ♘xb4+ 60.♙c3 ♘c6 61.♙f3 ♘xa5 62.h5 ♙e7=) 55...♘e6+ 56.♙d3 ♘c7 Et les noirs continuent de se battre.]

55.♙d3 ♙e5 [55...f4 56.♙b7 fxe3 57.♙xe3 ♘f4 58.♙d4 ♘e2+ 59.♙e4±; 55...♘c7 56.g4 fxg4 57.hxg4 ♙e5 58.♙b7±]

56.♙b7 ♘c7 57.♙e2? Une grande erreur. Les blancs loupent de bonnes chances de gain apres [57.g4! Un coup tres important avec l'idee d'obtenir la case e4 pour le roi. 57...fxg4 (57...f4 58.exf4+ gxh4 (58...♙xf4 59.♙d4+-) 59.h4 ♘d5 60.♙xd5 ♙xd5 61.♙e2! Un bon coup. Les blancs vont facilement gagner apres ♙f3. 61...♙e6 62.♙f3 ♙e5 63.h5+-) 58.hxg4 Le roi blanc va penetrer sur l'un des deux cotes. 58...♘d5 59.♙xd5 ♙xd5 60.e4+ ♙e5 61.♙e3 ♙f6 62.♙d4 ♙g6 63.e5 h5 64.gxh5+ ♙xh5 65.e6 ♙g6 66.♙d5+-]

57...h5 Un important coup que Kamsky avait loupe quelques coups plus tot.

58.g3

58...h4? Les deux joueurs ne devaient quasiment plus avoir de temps, ce qui expliquerait cette erreur. Le pion en h4 va etre tres faible. [58...g4 59.h4 ♙e6 60.e4 fxe4 (60...♙e5 61.exf5 ♙xf5 La position noire semble etre desagreable a cause des deux faiblesses en a6 et en h5, mais les noirs auront du bon contre-jeu pratique contre les pions b4 et g3.) 61.♙xe4 ♘d5 62.♙g6 ♘f6 63.♙d3 ♘d5 64.♙xh5 ♘xb4+ 65.♙c3 ♘c6 66.♙xg4+ ♙e5 67.♙c8 ♘xa5 68.♙xa6 ♘c6 69.♙xb5 ♘d4 70.♙d3 ♘f3 Avec l'idee ♘xh4. 71.h5 ♙f6 Avec l'idee de mettre le roi en h6 et le cavalier en g5, apres quoi les blancs ne pourront plus ameliorer leur position.]

59.gxh4 gxh4 60.♙f3 ♙f6 61.♙c8 ♙e5 62.♙b7 ♙f6 63.e4 ♙e5 [63...fxe4+ 64.♙xe4 ♙e6 65.♙d4 (65.♙f4 ♘d5+ 66.♙g4 ♘xb4 67.♙xh4 ♙d6 68.♙g5 ♘c6 69.♙xa6 ♙e7 70.♙xb5 ♘xa5 71.♙g6 ♙f8=) 65...♙d6 66.♙c8 zugzwang 66...♘d5 (66...♙c6 67.♙e5+-) 67.♙xa6 ♘f4 (67...♘xb4 68.♙xb5+-) 68.♙xb5 ♘xh3 69.♙d3 ♘g5 70.♙e4+- Les blancs sont gagnants comme la case a8 est de la bonne couleur.]

64.exf5 ♙xf5 65.♙c8+ ♙e5 66.♙g4 Les blancs sont gagnants comme les noirs ne sont pas a temps avec leur contre-jeu.

66...♔d4 67.♔xh4 ♔c4 68.♔g5 ♔xb4 69.h4 ♔xa5
70.h5 b4 71.h6 b3 72.h7 b2 73.♙f5 ♞e6+ 74.♔g4 1-0

(16) Anand,V (2780) – Meier,G (2640)

Grenke Chess Classic, 15.02.2013

[Chess Evolution]

Quelle position surprenante. Les blancs semblent etre complètement gagnants comme ils vont bientot prendre les pions c5 et a7, tandis que le contre-jeu noir a l'aile roi semble etre tres lent... Mais en realite les blancs vont devoir jouer avec precision afin de tenir la nulle apres quelques forts coups noirs.

39...♖d7! Les noirs ne peuvent pas sauver leurs pions a l'aile dame, ils doivent donc tenter d'activer leur tour et de creer du contre-jeu a l'aile roi.

40.♙xc5 [40.♔c1 etait une alternative afin d'empecher ♖d1, mais ici les noirs obtiennent du contre-jeu apres 40...♙e4! 41.g3 (41.f3 ♙a8 42.♙xc5 h3! 43.gxh3 ♙xf3 Et les noirs ont aussi cree deux dangereux pions passes. La course va commencer et le resultat n'est pas clair.) 41... ♙f3! Renouvelant l'idee ♖d1-h1. 42.♙xc5 (42.gxh4 gxh4 43.♙xc5 ♖d1+ 44.♔c2 ♖h1) 42...♖d1+ 43.♔c2 ♖h1 Le pion h devient soudain tres dangereux, comme ca va aussi etre le cas dans la partie.]

40...♖d1 41.♞a6!? Un coup malin. Les blancs tentent d'éliminer le pion f6 (le pion cle de la chaîne de pions noirs) après ♙e7, mais les noirs ont une forte réplique afin d'empêcher cela!

41...♞c8! La tour ne peut pas continuer d'attaquer le pion f6. [41...♞h1? 42.♙e7]

42.♞xa7 Les blancs sont prêts à avancer leurs pions à l'aile dame, tandis que les noirs n'attaquent même pas les pions à l'aile roi. Mais leur avantage est qu'une fois qu'ils auront pris les pions h2 et g2, leur pion h4 est déjà très avancé! [42.♞d6 fermait le chemin du fou vers e7. 42...♞h1; 42.♞c6 ♙b7 43.♞d6 ♞h1 Les noirs vont prendre les pions à l'aile roi.]

42...♞h1 43.♞c7 ♙f5 44.h3 ♞h2

45.a4?! Ce coup très logique est une imprecision parce que les blancs doivent maintenant avancer leur pion jusqu'en a7 afin de provoquer ♙e4. S'ils avaient avancé leur pion b, les noirs auraient déjà dû jouer ♙e4 une fois que le pion était en b6. Ce genre de „demi-temps” fait une grande différence. [45.b4! ♞xg2 46.b5 g4 47.b6 ♙e4 48.hxg4 h3 49.♞c8! Menaçant de jouer ♞h8, ce que les noirs ne peuvent pas permettre. 49...♙h7 50.♞c7± Nulle par répétition.]

45...♞xg2 46.a5 g4! Les noirs créent leur propre pion passe.

47.hxg4 ♙xg4?! [47...♞xg4! était le bon coup afin de jouer pour le gain! 48.a6 h3 Les blancs n'ont pas leur plan ♞c8-♞h8 tant que le fou est en f5. 49.a7 ♙e4 50.♞d7! Tout comme dans la partie, ceci est le seul motif de survie pour les blancs. (50.♙f8 n'arrête pas le pion. 50...h2 51.♞g7+ ♙f5 52.♞h7 h1♙)]

50...♞h4! Voilà pourquoi les noirs auraient dû prendre en g4 de la tour! Elle va maintenant retourner en h8 afin d'arrêter le pion a. (50...h2 51.♞d5! est plus ou moins la même chose que dans la partie.) 51.f3! Un autre seul coup! (51.♞d5? ♙xd5 52.cxd5 ♞h8—+ Et le pion h va à dame.) 51...h2

(Après 51... ♖xf3 les blancs ont 52. ♖g1! h2 53. ♖xh2 ♖xh2+ 54. ♖c3 et la partie n'est pas claire. Les blancs sont prêts a jouer b4-b5 et c5-c6, tandis que les noirs ont beaucoup plus de mal a mobiliser leurs pions comme e4 ne marche pas.) 52.fxe4 h1 ♖ 53.a8 ♖ ♖h2+ 54. ♖d2! Un autre seul coup! (54. ♖a3 ♖a1+-+; 54. ♖c3 ♖e1+) 54... ♖xd2+ 55. ♖c3 ♖d7+ Et les noirs ont d'excellentes chances de gain.; 47... ♖e4 mene a la me me nulle que dans la ligne 45.b4. Les deux camps doivent jouer les coups suivants: 48. ♖c8 ♖h7 49. ♖c7+ ♖g6 50. ♖c8=]

48.a6 h3 49.a7 ♖f3 Les blancs semblent etre en difficulté comme le pion h ne peut pas etre arreter, tandis que le ♖f3 controle la case a8. Mais un coup plein de ressources va lessauver!

50. ♖d7!! [50. ♖c8 perd apres 50... ♖h7! 51. ♖c7+ ♖g7!]

50...h2 51. ♖d5! Bloquant la diagonale du fou.

51... ♖xd5 52.cxd5 h1 ♖ 53.a8 ♖ Les noirs ont un petit avantage materiel, mais leur roi est trop expose. Ils n'ont pas d'echech pour le moment, tandis que la dame et le fou sont prêts a donner un echech perpetuel. La nulle est inevitable.

53... ♖g1 54. ♖g8+ ♖f5 55. ♖e6+ ♖g6 56. ♖g8+ Une finale instructive!

1/2

Choc des titans

(17) Smyslov,Vassily – Sokolsky,Alexey [C81]

Chigorin Memorial Moscow, 1947

[Chess Evolution]

Les blancs ont d'abord domine positionnellement et ils ont ensuite lance une belle attaque de mat.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 a6 4.♙a4 ♘f6 5.0-0 ♘xe4

La variante ouverte de la Ruy Lopez etait tres populaire a l'epoque. La theorie de nos jours considere toujours cette ligne comme jouable, mais les noirs doivent souffrir dans des positions legerement passives dans certaines lignes.

6.d4 b5 7.♙b3 d5 8.dxe5 ♙e6 9.♚e2 [9.♘bd2; 9.c3 et; 9.♙e3 sont les trois coups principaux, meme si toutes les lignes menent souvent a des structures similaires.]

9...♘c5 [9...♙e7 est le coup principal est aussi sans doute le plus fort.]

10.♖d1! etait l'idee derriere ♚e2. Les blancs veulent mettre la pression sur le pion d5.

10...♘xb3 11.axb3 ♙c5 [Après 11...♙e7 12.c4 suivi de ♘c3, la position noire est tres desagreable a cause du pion d5.]

12.♙e3 Les blancs jouent de maniere positionnelle. En echangeant les fous de cases noires, ils affaiblissent serieusement les cases noires et ils se debarassent aussi de la paire de fous. [12.c4!? etait une bonne alternative. 12...bxc4 13.bxc4 Les noirs doivent sans doute jouer 13...d4 14.♘bd2 Avec deux idees: l'une est ♘b3 suivi de ♙e3 et l'autre est simplement de centraliser le cavalier en e4.]

12...♙xe3 13.♚xe3 ♚e7 Les noirs prennent le controle de la case c5 et sortent du desagreable clouage sur la colonne d. [13...0-0 se heurte a 14.♚c5! ♘e7 15.b4± suivi de l'occupation des cases d4 et c5 avec les cavaliers après ♘bd2-b3, ♘fd4, ♚c3 et ♘c5.]

14.♚c3! Smyslov prend le controle des cases noires.

14...♘d8 15.b4! Les cavaliers blancs sont encore une fois prêts a occuper les cases d4 et c5.

15...0-0 16.♘bd2 [Il était plus précis de commencer par 16.♘d4 afin d'éviter la ligne que nous allons voir dans la partie.]

16...♙g4! Les noirs se débarrassent de l'un des forts cavaliers. Cela ne résout pas tous leurs problèmes, mais ça facilite leur tâche défensive.

17.h3 ♙xf3 18.♘xf3 c6 Il fallait défendre le pion d5, mais ce coup a aussi un inconvénient: le cavalier ne peut pas aller en e6 maintenant comme le pion c6 sera en prise.

19.♖d2! Un bon coup positionnel. Les blancs n'ont pas l'intention de doubler les tours sur la colonne d, mais ils veulent mettre leur autre tour en e1 ou en f1 et plus tard doubler les tours sur l'une de ces deux colonnes. La partie va parfaitement démontrer à quel point cette idée est bonne.

19...h6 20.b3 Les blancs ne se dépêchent pas à activer leur tour a1 comme cela libérerait aussi la tour a8. Les noirs auraient pu jouer ♖c8 dans ce cas, donnant ainsi la possibilité au cavalier d'aller en e6.

20...♖e8 21.♘d4! Les blancs veulent améliorer leur structure de pions en jouant f4.

21...♙g5 [Les noirs auront du mal à créer une forteresse après le sacrifice de dame: 21...♙xe5 22.♖e2! ♙xe2 23.♘xe2 ♖xe2 24.♙c5 g6 25.♙f1 ♖e6 26.♙b6 Les noirs vont perdre le pion a6 et le cavalier reste passif.]

22.♖f1! Les blancs sont prêts à jouer f4 et le pion e5 est toujours indirectement protégé.

22...♘e6 [22...♙f4 ne fait que retarder f4. 23.g3!]

23.f4! Très bien joué! Les blancs sacrifient un pion afin de créer une énorme attaque. Nous pouvons maintenant voir toute l'étendue du coup 19.♖d2!

23...♘xf4 24.♖df2 ♘e6 Les noirs tentent de se débarrasser du puissant cavalier d4 au prix du pion f7, mais les blancs ont raison de garder cette pièce. [24...♘g6 n'égalise pas non plus. Le meilleur coup est sans doute 25.♖f5 ♙e7 26.♘xc6 ♙e6 (26...♙c7 perd après 27.♖xf7 ♙xf7 28.♖xf7 ♙xf7 29.♙f3+ gagne plus de matériel.) 27.♘d4 Les blancs sont mieux.]

25.♘f5! Le cavalier se dirige vers d6. Le pion c6 est aussi en prise et s'il tombe le pion d5 sera perdu.

25...♖ec8 [25...♖f8 26.♙xc6 d4 27.♙e4 Les blancs veulent prendre le pion d4 et après 27...♖ad8 la dame est soudain piégée. 28.h4! ♙h5 29.g4 ♙g6 30.♘e7++-]

26.h4! Un autre très fort coup! La dame n'a qu'une seule case afin parer l'échec e7:

26...♔d8 27.♔g3 Les blancs ont toujours un pion de moins et ils vont simplement gagner la partie en améliorant leurs pièces. Les noirs sont déjà perdants et ils sont sans défense contre les menaces ♖xh6 et ♖d6.

27...♔h7 28.♖d6 ♖c7 29.♖xf7 ♔e7 30.♖d6 [30. ♔d3+!? ♔g8 31.♔g6 était aussi gagnant. Les noirs ne peuvent pas empêcher ♖xh6.]

30...♖g8 [30...♖f8 31.♖xf8 ♖xf8 32.♖f7 gagne la dame à cause du mat en g7. 32...♔xf7 33.♖xf7 ♖xf7 34.♔c3!+- Les blancs vont bientôt gagner le pion c6 et détruire tous les espoirs noirs de créer une forteresse.]

31.♔d3+ Les noirs ont abandonné en vue de la perte de la dame après ♖f7 ou ♖f7.

Editorial Preface

This chess week started with one big world news! The 13 year old Chinese Wei Yi is officially the youngest Grandmaster in the World. Still, the record is in the hands of Karjakin, who became a Grandmaster at age 12!

The Zurich Chess Challenge is running more or less peacefully, and only Caruana was able to win his game with Black against Anand. Gelfand and Kramnik have 5/5 draws so far...

Today we will see the final round of this "short" round robin event.

The Super Strong Open tournament in Reykjavik was won by Eljanov, So and Amin Basem — all of them with 8/10. Behind them, there was a big group of players that included Giri, Vachier-Lagrave, Cheparinov, Ding Liren, Ivan Sokolov, David Navara and many more Top GMs.

In the current newsletter You will find 2 games played by the Champion (thanks to his better tie-break, it was Eljanov).

Capelle la Grande is on the run. In the next 3 days we will see a very exciting finish — which is usual for such big open events. At the moment, the young Russian Sjugirov has pretty good chances to win the tournament.

As usual, we hope You enjoy the CEWN Nr 53!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Cheparinov,I (2709) – Eljanov,P (2678) [D15]

Reykjavik Open 2013 Reykjavik ISL (6), 23.02.2013

[Arkadij Naiditsch]

Eljanov has been showing very unstable play lately. Maybe only some readers can remember him having 2750 ELO, and now it feels a bit strange to see him under 2700. So the good news is that Pasha Eljanov is back in Reykjavik, showing great chess once again. A very nice victory over Cheparinov in the 6th round gave him a very important point to raise in the standings of the tournament.

1.d4 d5 2.c4 c6 3.♘f3 ♘f6 4.♘c3 a6 Another game on the Slav, which was pretty much expected. Eljanov was Gelfand's second during his match against Anand and the Slav was one of the main openings in the match.

5.a4 e6 Here White has a lot of different choices, but the line that we will see in the game is one of the most critical ones.

6.g3 dxc4 7.♙g2

7...c5! Of course, this is a well-known theoretical move, but still a nice one. Black does not lose time and starts to play immediately against White's center.

8.0-0 [8.dxc5 is the other main move, but it seems that it leads to a more or less equal endgame after 8...♔xd1+ 9.♘xd1 ♙d7! was played in Ragger-Movsesian, if somebody is interested in the line.]

8...cxd4 [8...♘c6 9.dxc5 maybe gives White slightly better play.]

9.♘xd4 ♙e7!? seems to be a novelty on the highest level. Not so long ago, Kramnik won a great game against McShane after [9...♘bd7 10.♘c2 ♔c7 11.♙f4! It is important to provoke Black to play e6, weakening the d5 square. 11...e5 12.♙d2 ♘c5 13.♙g5! The third move in a row with a bishop, but it was the correct way to play. 13...♙e6 14.♙xf6 gxf6 15.♘d5 with better play for White and, of course, Kramnik managed to win this game in great style.]

10.a5 A very logical move by White. Now he is getting the b6 square and always has the idea ♘a4-♘b6.

10...0-0 11.♘c2 following the standard plan... White wants to exchange the queen and play ♘e3 winning back the c4 pawn.

11...♔c7 Black needs to hold on to the c4 pawn, no choice.

12.♙e3 I am not sure if this is correct here... [12.♙f4!? with the already known idea of weakening the d5 square. 12...e5 13.♙g5 followed by ♘e3 keeps the game in a very unclear position.]

12...♙d7! Superb idea by Eljanov. Black's bishop is going to b5, where it will defend the pawn on c4. It looks strange, but is very effective.

13. ♙b6 ♙c8 14. ♘e3 ♙b5 The Black bishop on b5 and the knight on d7 — very nice strategic play.

15. ♖c1

15...♘fd7!! Fantastic move, based on deep calculation. [The more logical 15...♘bd7 16. ♘a4 leads to a very unclear position. White wants to play b3 next, winning the pawn back and forcing Black to act quickly with moves like 16...♘e5, after which the position becomes very dynamic.]

16. ♘a4 A normal reaction by White.

16...♙g5 and this is the key move. From now on, the game becomes very forced. White needs to take action if he wants to fight for an advantage.

17.f4 [Maybe White had a chance to force a draw after 17. ♖xc4!? ♙xc4 18. ♘xc4 White wants to play ♘d6 next, so Black needs to give back the exchange. 18...♙xc4 19. ♙xb7 ♘xb6 20. ♘xb6 ♙b5 21. ♙xa8 ♙xa5 with a pretty equal position.]

17...♘xb6 18. ♘xb6 ♙c5 Finally we see Eljanov's idea behind 15...♘fd7.

19. ♖f3? A human move, and a mistake. [The only way to go on was to play 19. ♙f2 ♙f6 20. ♘xa8 White is a full rook up! 20...♖d8 21. ♙e1 ♙xb2 followed by ♙d4 with a very unclear position...(The same idea that was used in the game does not work now: 21...♘c6 22. ♙xc6)]

19... ♙f6 20. ♘xa8 ♖d8 Black is putting all his pieces on perfect squares...

21. ♙e1 ♘c6! Great dynamic play by Black!

22. ♘b6 To give back a piece is not an option for White.

22... ♙d4 23. ♙f2 It seems like White is solid, but here comes

23...e5!! Wow! What a move by Eljanov, really great! Black is just crushing White's position.

24.b4 Cheparinov tries to act against Black's attack, forcing the Black knight to leave his great position on c6.

24...♞xb4 25.fxe5 ♞c6! and Eljanov chooses the best move again! The Black knight is going to g4!

26.♚d2 It is hard to advice something better for White...

26...c3 27.♚c2 ♞xe5 28.♚f5 White stopped Black from playing ♞g4, but Black has a few other ideas as well...

28...g6 29.♚f4 ♜e8! putting even more pressure on the e3 knight and simply threatening to play ♞xf3 next.

30.♞bd5 ♚xd5 31.♚f1 ♞xf3 What a fantastic game by Eljanov!

0-1

(2) Ding Liren (2709) – Eljanov,P (2678) [D15]

Reykjavik Open 2013 Reykjavik ISL (9), 26.02.2013

[Arkadij Naiditsch]

And another great game by the Ukrainian GM. This time his victim was the very talented Chinese Ding Liren.

1.d4 d5 2.c4 c6 3.♞f3 ♞f6 4.♞c3 a6 5.e3 Unlike Cheparinov, Ding Liren chooses the more „solid“ line 5.e3 for White.

5...♙f5 Before playing e6, it is always nice to get the bishop out to f5.

6.♚b3 b5 7.c5 This is still theory, of course. White wants to play a4 next...

7...a5 Black stops White's idea.

8.♞e5 but with 7...a5, Black lost a tempo to play ♞bd7, so White is in time to place his knight on e5.

8...a4 9.♚d1 g6 The position is rather rare. Usually, White tries to play g4-♙g2-f4-0-0 with a strong center plus the knight on e5. But Black is very solid and is trying to act more actively with ♞e4 or h5.

10.♙d2 It is hard to say if Ding Liren prepared this novelty or if he just made a „move“ over the board. [10.g4 ♙e6 11.♙g2 would be the usual way to play here.]

10...♙g7 Very logical...

11.g4?! It is hard to imagine the inclusion of ♙d2-♙g7 being useful for White. White should have gone for a more calm continuation like 11.a3 followed by ♙e2, but probably Black is just doing perfectly fine.

11...♙e6 12.♙g2

12...h5! Very strong! Black is starting to play against White's center immediately.

13.h3 [Of course not 13.g5 ♘fd7 and Black is very fine.]

13...♔c7! A silent but very strong move. Black protects the c6 pawn and prepares ♘bd7; at the same time, 0–0–0 becomes possible, with a quick transfer of the rook to the h-file.

14.f4 hxg4 15.hxg4 ♖xh1+ 16.♙xh1 ♘bd7 Black finished his development. The White g4-pawn is hanging, and 0–0–0 followed by ♖h8 is a real threat. We can already say that Black is doing clearly better.

17.g5 A risky move, but what else to do? [The solid 17.♙f3 ♘xe5 18.fxe5 ♘h7! followed by ♘g5 just leads to a clearly worse position for White.]

17...♘xe5 18.fxe5 ♘g4 and the game is getting very tactical. The knight on g4 has no moves, but Black prepared a different destiny for his stud.

19.♔f3 [Also, the move 19.♙f3 ♘xe5! seems to be just winning for Black. 20.dxe5 ♔xe5 Black wants to play a3 next. 21.a3 ♔g3+ 22.♔e2 d4 with a mating attack.]

19...♘xe5! and ♘xe5 is very strong here as well.

20.dxe5 ♔xe5 Black has a lot of threats: to play d4, to play a3, and even just to take on g5 to have 3 pawns for a piece.

21.♔f4 White tries to reach an endgame... [A tactical attempt to solve the problems does not work. 21.♘xb5 ♔h2! (Of course not 21...cxb5? 22.♙c3 and White is winning the bishop on g7.) 22.♘c3 ♔h4+! and again Black is giving mate...]

21...♔xf4 22.exf4 b4! Black only got 2 pawns for the piece, but White's position is hopeless!

23.♘e2 If White gives up the knight on c3, a completely winning endgame for Black would arise.

23...a3! What a great game by Black! I think Ding Liren is going to work a little bit on his Slav...

0–1

(3) McShane, Luke J (2713) – Volokitin, Andrei (2724) [B90]

Schachbundesliga 2012/2013 (10.1), 24.02.2013

[Csaba Balogh]

A very sharp game, which is also important from a theoretical point of view.

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 a6 6.♙e3 ♘g4 7.♙c1 The drawback of the 6...♘g4 line is that sometimes weaker opponents might try to get a draw by repetition, and then Black is forced to play some other line. In this game, McShane is obviously a big fighter and he only repeats twice to get closer to move 40 and avoid mistakes in the time trouble. A clever practical decision!

7...♘f6 8.♙e3 ♘g4 9.♙g5 This is the critical test of the ♘g4 line.

9...h6 10.♙h4 g5 11.♙g3 ♙g7 White has numerous options here. McShane tries to follow a recently popular line.

12.♙e2 h5 13.♙xg4 hxg4 [13...♙xg4 14.f3 ♙d7 is the start of another long line.]

14.♘d5 White is following the latest fashion. The line has become popular again since 2011, when Shirov defeated Grischuk in Wijk aan Zee.

14...♘c6 15.♘f5 ♙xb2! [Black included 15...♙xf5 16.exf5 in the mentioned game, but it left the pawn on b7 unprotected compared to our game. 16...♙xb2 17.♖b1 Now after ♙a3 or ♙g7, White could simply take on b7. 17...♙a5+ 18.♙d2 and after the exchange of queens, Black loses an exchange with ♘c7. He has some compensation for it, but it was not enough in the game. 18...♙d4 19.♙xa5 ♘xa5 20.c3 ♙c5 21.♘c7+ ♙d7 22.♘xa8 ♖xa8 23.h4! White succeeded to activate his rook on the h-file and converted his advantage later on... 23...gxh3 24.♖xh3 Shirov-Grischuk, Wijk aan Zee.]

16.♖b1 ♙a3! It is very important to change the diagonal of the bishop. The main idea is to protect the d6 pawn and to stay ready to kick out the knights with e6.

17.0-0 ♙c5! A necessary preparation for e6. [17...e6 directly is a mistake. 18.♘b6! exf5 19.exf5! (Not 19.♘xa8? because of 19...f4) 19...♖b8 And here comes the beautiful point of the sacrifice.]

20. ♖e1+!! and ♔c3 next with a double attack on a3 and h8 — this gives White the advantage. 20... ♕f8 21. ♖c3 Quite an unusual motif!]

18. ♖b3! A clever move with many ideas. The rook can be very useful on the 3rd rank later and the hidden point can be seen in the next move.

18...e6! 19. ♔a1! Really spectacular move, forcing a weakness in Black's camp!

19...f6 Black would like to win a piece, but of course, this risky move seriously weakens the king's position and White has many ways to try to exploit this. [In my opinion, the correct evaluation of the whole line must be decided after the move 19...e5 which of course gives an outpost for both knights, but on the other hand Black's position is very safe now and the bishop on g3 is pretty awful and can hardly be activated.]

20. ♘xf6+ ♔f7

21. ♘xd6+! The best move! White grabs some pawns and continues his attack. The bishop on d6 will be misplaced because of the pinning threats on the d-file. [21. ♘e8 is a fantastic move with the multiply threats like

♖g7, ♖xh8 and ♘xd6, but Black can prevent all of them with one move! 21...e5! and the knight is trapped on e8.]

21... ♖xd6 22. ♘g4! White has many threats, for example, to take on d6 and h8 is hanging; ♖f3 is also very dangerous. The next move is forced!

22...e5! We have reached the critical position from White's point of view. He has three tempting moves, but only one of them seems to give him the initiative.

23. ♖d1 McShane protects the g4 knight and wants to play ♖d3 or ♖f3 followed by ♖d1. [23. ♘xe5+ seems to lead nowhere after 23... ♘xe5 24. ♖xe5 ♖xe5 25. ♖xe5 ♖e8 26. ♖f3+ ♔g8 and Black's king is more or less safe; 23. ♖f3+! is the most dangerous alternative. 23... ♔g6 24. ♖f6+! ♖xf6 (24... ♔g7 is bad because of 25. ♖d1) 25. ♘xf6 ♖xf6 Black seems to be well coordinated with his pieces against the queen, but after 26.f4! White can launch a dangerous attack. 26...gxf4 27. ♖xf4 It is much slier to play with White because of his opponent's king position: one bad move can be decisive for Black.]

23... ♖c5 [The machine recommends the cold-blooded 23... ♖e7 followed by ♖e6 and it is hard to prove that

White has enough compensation, although the game is still very unclear.]

24. ♖f3+ [White had another option: 24. ♖f3+ ♔g7 25. ♘xe5 ♕xd1 26. ♖xd1 with 3 pawns for the piece, but if Black manages to coordinate his pieces, he might overtake the initiative 26... ♖d8 27. ♖xd8 ♘xd8 followed by a quick development with ♙e6 and ♖c8. The queenside pawns might get weak.]

24... ♙g6 25. ♖d1! Good decision — not to be greedy. [25. ♘xe5+ ♘xe5 26. ♙xe5 ♖f8 is fine for Black as his king is very safe now.]

25... ♕e7 Black needs only one move to get a winning advantage with ♖f8, but with such active pieces, White has a move to stay in the game. McShane finds it and plays it.

26. ♖xb7!! A double-deflection from the f5 and f6 squares.

26... ♙xg4 [26... ♙xb7 leads to a surprising draw as well. 27. ♖f5+ ♔h5 (27... ♔g7? 28. ♖d7+-) 28. ♘f6+ ♔h6

29. ♖d7 seems to finish the game, however, after 29... ♘d4!! White is forced to give perpetual check with 30. ♘g4+ ♔h5 31. ♘f6±; Black loses after 26... ♕xb7? 27. ♖f6+ ♔h7 28. ♖h6+ ♔g8 29. ♖g6+ ♔f8 (29... ♖g7 30. ♘f6+ ♔f8 31. ♖e8#) 30. ♖f6+ ♔g8 31. ♙xe5 The bishop cannot be taken because of ♖d8! 31... ♖h7 32. ♖g6+! ♔f8 33. ♘f6! and Black is hopeless against the threatened mates.]

27. ♖xg4 ♕xb7 And the exposed king allows White to give perpetual check, but he cannot hope for more with ♖d7, because of the check on b1.

28. ♖e6+ ♔h5 29. ♖h3+ ♔g6 30. ♖f5+ ♔h5 31. ♖h3+ ♔g6 32. ♖f5+ 1/2

(4) Shirov,Alexei (2718) – Appel,Ralf (2525) [B03]

Schachbundesliga 2012/2013 (9.4), 23.02.2013

[Csaba Balogh]

A nice tactical fight. Alexei Shirov was heading for complications, where he feels at home, but his much lower rated opponent was ready for the challenge; after calculating everything precisely, the game ended with a well deserved draw.

1.e4 ♘**f6** Appel chose his favorite opening — the Alekhine defense.

2.e5 ♘**d5** **3.d4** **d6** **4.c4** [4.♘f3 is the other huge main line.]

4...♘b6 **5.exd6** **exd6** White has various different setups for his pieces. Shirov decided to develop his knight to e2. Another plan is ♘f3, ♙d3 and h3 to prevent the pin with ♙g4.

6.♙d3 ♘**c6** **7.♘e2** **g6** **8.♘bc3** ♙**g7** **9.♙e3** **0-0** **10.0-0** Both sides have finished the development logically. White has a space advantage thanks to his nice center, while Black has to find a plan against it. The following motif is standard in this variation.

10...♘b4 **11.b3** White would like to preserve his bishop, but he first needed to protect the c4 pawn.

11...c6 [Taking the bishop pair with 11...♘xd3 was also possible, followed by the same plan as in the game. 12.♙xd3 c6 and d5 next was also perfectly playable.]

12.♙b1 **d5** **13.c5** ♘**d7** **14.a3** ♘**a6** **15.b4** White seems to have a pleasant advantage on the queenside, but actually, Black is ready to undermine the pawn chain.

15...♘c7 Black first improves his knight by transferring it to e6, and then plays b6 and a5.

16.♙d3 ♘**e6** **17.♙d2** **b6** **18.♖ad1** An incredibly deep move by Shirov. At first sight, it looks very strange. It is hard to get the point regarding what the rook is doing on the d-file. However, Shirov knew exactly what his opponent was going to do and prepared an idea against it...

18...a5 Black's plan is known from many other openings where similar pawn structures arise. He is intending to exchange his poor light-squared bishop on a6.

19.b5! This was Shirov's idea behind the previous rook move. Suddenly, the locked center opens up and the d1

rook perfectly supports White in the forthcoming complications.

19... ♖b7! Black also prepares his pieces for the action. From the following 7 pairs of moves, 12 will be captures. [19...bxc5 leads to a slightly worse position after 20.bxc6 cxd4 21.cxd7 ♔xd7 22.♘xd4 ♘xd4 23.♙b1 and White takes on d5 next. His active pieces guarantee him an edge.]

20. ♘xd5 Truly to his style, Shirov initiates a tactical struggle by opening the position with this temporary sacrifice. [20.bxc6 ♙xc6 21.cxb6 ♘xb6= would have been balanced.]

20...bxc5 Black goes for the sharpest continuation. [20...cxd5 would have been much calmer, with a more or less balanced game after 21.c6 ♙c8 22.cxd7 ♙xd7]

21.bxc6 ♙xc6 22. ♙e4 We can see again that the d1 rook is perfectly placed. Both sides have prepared his pieces for the real action, so let's enjoy the complications.

22... ♙a4! A difficult move. Black was disturbed by the d1 rook, but this gives free hand for the e4 bishop on the h1–a8 diagonal. The move is only justified by concrete lines... [A mass of exchanges on d4 would have led to White's advantage: 22...cxd4 23.♘xd4 ♘xd4 24.♙xd4 ♙xd4 25.♔xd4± White's pieces are dominating.]

23. ♖c1 cxd4 24. ♘xd4

24... ♘dc5! Suddenly, all the pieces are hanging. Both players need to be careful not to miss any tactical ideas. [24...♘xd4? 25.♙xd4 ♙xd4 26.♔xd4 was still bad for Black.]

25. ♘xe6! [The seemingly logical 25.♙f3? just drops a piece after 25...♙xd4! 26.♙xd4 ♘b3!–+]

25... ♘xe4! Counterattacking the queen! [25...♘xe6 leads to a bad position. 26.♘b6! with a double attack against a8 and a4, but Black can save the piece with 26...♔xd2 27.♙xd2 ♖ad8 but he ends up a pawn down after 28.♙xa5]

26. ♘xd8 ♘xd2 27. ♙xd2 ♖fxd8! The overall picture is getting a bit more clear now, but even with the small amount of pieces on the board, both sides have a lot of tricks. At first sight, Black has allowed the fork after ♘b6, but he had something in his mind. [27...♖axd8 would have dropped the a5 pawn after 28.♘e7+ ♔h8 29.♙xa5]

28. Nxb6 Bb5! Yet another counterattack!

29. Rfd1 [29. Nxa8 Bxf1 30. Kxf1 Rxd2 31. Rxc8+ Bf8 is slightly better for Black. The bishop is stronger than the knight with pawns on both flanks. The a3 pawn becomes a real target.]

29... Rab8 Black continues to play in tactical fashion and sacrifices his a5 pawn. [29... Ra7 was a calmer way to equality.]

30. Bxa5 Bb2 Black wins back the pawn, but he moves into many tactical motifs with his bishops on the b-file and the pin on a5-d8.

31. Rxd8+ Rxd8 32. Rb1 Bxa3! The main problem of White is the back-rank. He can never take on b5 while the rook threatens to come to d1.

33. Nc4! Another spectacular move, attacking two pieces at once, but Black is ready to protect them.

33... Rxd3! 34. Ne5 [34. Nxa3 Rxa3 A draw is inevitable as the b5 bishop is still indirectly protected.]

34... Rd5 35. Ng4 The last tricks by Shirov, but his opponent was in excellent tactical shape and nicely neutralized all the Latvian's attempts to win the game.

35... Bb2! 36. h3 White finally opens the back-rank and is ready to leave with the rook, but Black is in time to play

36... Bd3 37. Rxb2 Rxa5 and the draw was agreed! A great fight! Special congratulations to Appel, who dared to play in this brave style against Shirov.

Endgame section

(15) Gordon,S (2556) – Smeets,J (2613)

Schachbundesliga, 23.02.2013

[Chess Evolution]

The rook endgames with 2 vs 1 pawns on the same side are usually drawn, but some of them are really tricky. In this example, if White does not know the correct technique, he loses the game fairly quickly.

62...♖f7 Black wants to get his king to h6, but first, he sends away the White rook from the 8th rank to prevent ♖h8.

63.♔f4 This is a sign that shows that the player is unfamiliar with the right defensive method. [The drawing technique is very instructive. 63.♔h3! ♖f8 64.♖a7+ ♔h6 65.♖a6 White provokes Black to play f5. This creates a hole on the g5 square, which is obligatory as we will see. Black must activate his rook, so he has no other choice than pushing 65...f5 66.♖a1 In general, in rook endgames,

both sides should aim for active play, but this is an exception... 66...♖b8

67.♖g1! This is the point and Black cannot make progress! White keeps the g6 pawn under attack and anytime Black plays ♔h5, he sends back the king with ♖g5. 67...♖b3+ 68.♔h2 ♔h5 69.♖g5+! ♔h6 70.♖g1 ♖b6 with the idea of ♔h5 and g6 is protected, but White simply plays 71.♔h3= and again ♔h5 meets by ♖g5...]

63...♖f8 64.♖a7+? This is the decisive mistake. After this move, White will miss the draw by one tempo if he tries to defend with the right method... [64.♖a1 should have been played. The idea is the same as in the previous line with 63.♔h3. 64...♖b8 65.♔g3 The king is heading to h3. 65...♔h6 66.♖f1! Provoking f5 in order to get the g5 square. 66...♖b3+ 67.♔h2 f5 68.♖g1= and White got his the drawish position.]

64...♔h6 65.h5 White tries to get the f- and h-pawns, which is a theoretical draw, but Black is not forced to accept it. [65.♔g3 ♖b8 White is not in time to reach the ideal defensive position. 66.♔h3 (66.♖a6 f5 67.♖a1 loses to 67...♔h5 68.♖g1 ♖b4 winning the pawn.; 66.♖a1 ♖b3+ 67.♔h2 ♖b4 68.♔h3 ♔h5 wins the pawn again.) 66...

♖b3+ 67.♔h2 (67.♔g4 f5+ 68.♔f4 ♖h3 wins.) 67...f5 and the game is over as the following lines show: 68.♖a8 (68.♖a2 is refuted by

68...♖b4! (But not 68...♔h5? which allows 69.♖g2 ♖b4 70.♖g5+! ♔h6 71.♔h3 and White holds.) 69.♔h3 ♔h5–+) 68...♔h5 69.♖h8+ ♔g4 70.♖h6 This is a tricky attempt, but it also fails to save the game. 70...♖b6 Black threatens to push his f-pawn, and after 71.h5 he has the very important 71...♖b2+ 72.♔g1 g5 and the game is over.]

65...g5+! Very well played! Black realizes that the arising rook endgame is a theoretical win.

66.♔f5 ♖b8 67.♔xf6 ♖f8+! The king has to be cut along the f-file.

68.♔e5 g4 [68...♔xh5 will lead to the same...]

69.♔e4 ♔xh5 70.♖h7+ ♔g5 71.♔e3 Black wins with the method of „bridge-building“.

71...g3 72.♖g7+ ♔h4 73.♔e2 ♔h3 74.♖h7+ ♔g2 75.♖e7 [The „real bridge-building“ happens after 75.♖h6 ♔g1 76.♖h7 g2 77.♖h6 and now 77...♖e8+! cutting the king on two lines in order to escape with his own the king from behind the pawn. 78.♔d2 ♖e5 A necessary preparation, otherwise, ♔f2 is met with a lot of checks along the 6th rank. 79.♖h8 and now 79...♔f2 80.♖f8+ ♔g3 81.♖g8+ ♔f3 82.♖f8+ ♔g4 83.♖g8+ ♖g5 The g-pawn promotes.]

75...♖h8 76.♖e6 ♔h1 77.♖g6 g2 78.♔f2 ♖f8+ 0–1

(16) Gajewski,Grzegorz (2644)
– Vachier-Lagrave,Maxime (2715) [A05]

Reykjavík Open 2013 (7.2), 24.02.2013

[Chess Evolution]

We have a one flank rook endgame with an extra pawn. To defend with four pawns against three is not as easy as three against two, especially in this structure that is not seen very often. Both players had to search for ideas over the board.

36...♖a1+ 37.♔h2 ♜a3 38.♜b7 ♜c3 39.♔h3 ♜a3 40.♔g4 Of course white is trying improve the king but this way not works.

40...♜a2 41.♔g3 [41.g3 ♜h2 42.♜a7 ♔f8 and White has to exchange pawns after 43.f4 exf4 44.gxf4 (44.♔xf4 ♜h1=) 44...♜g2+ 45.♔f3 ♜h2 46.♔g3 ♜b2 47.f5 gxf5 48.exf5 ♜b4 with an easy draw. 49.h5 ♜b3+ Black can give check now because the h5 square is not available. 50.♔f4 ♜b4+ 51.♔f3 ♜h4=]

41...♜a3 [41...♜c2 42.♔h3 ♜f2 43.♜b3 ♔g7 44.g4 leads to more or less the same play as in the game.]

42.♜b2 ♔g7 43.♔f2 ♜a7 Vachier prefers to wait a bit, but he could have tried a more active defense after [43...f5!? 44.♜b7+ (44.exf5 gxf5 45.g4 e4 46.fxe4 fxe4=) 44...♔f6 45.♜b6+ ♔f7 46.exf5 gxf5 47.h5 (47.♔g3 ♜a2 48.h5 ♔g7 49.♜e6 f4+ 50.♔h2 ♜e2 51.♔g1 ♔f7 52.h6 ♜e1+ 53.♔f2 ♜h1 54.♜xe5 ♜xh6 55.♜f5+ ♜f6 56.♜xf6+ ♔xf6=) 47...f4 48.♔g1 with the idea to try to come with the king to g4-f5.]

44.g4

44...g5 A very risky move because now White gets a strong and dangerous h-pawn. [44...♜a3 45.♜b7+ ♔g8 (45...♔h6 46.♜f7 ♜a6 47.♜xf6+-) 46.h5 gxh5 (46...g5 leads to the structure from the game.) 47.gxh5 ♜a4! A nice move that avoids the intrusion of the White king. 48.♜b6 (48.♔g3 f5 49.exf5 ♜f4=) 48...♔g7 49.♔g3

49...f5 This is the point. 50.exf5 ♖f4 51.♗g6+ ♔h8 52.f6 ♔h7 53.♗g5 ♗xf6 54.♗xe5 If the Black king is not cut on the 7th rank, Black should be able to draw this theoretical endgame.; 44...♗c7 45.♗b6 ♗a7 46.♔g3 ♗a4 Black keeps the rook on the 4th rank to have the f5 idea that we saw before. 47.h5 (47.g5 fxg5 48.hxg5 ♗a1↗) 47...gxh5 (47...♗c4 48.g5+-) 48.gxh5 f5 transposes to 44...♗a3.]

45.h5 ♔f7 46.♔e2 ♗d7 47.♗b3 ♔g7 48.♗d3 ♗a7 Now the only plan for White is to improve the king. Black has to wait.

49.♔d2 ♗c7 50.♗c3 ♗d7+ 51.♔c2 ♗a7 52.♔b3 ♗b7+ 53.♔c2 ♗a7 54.♗d3 ♗c7+ 55.♔b3 ♔f7 56.♔b4 ♔e6 57.♔b5 ♗c1 58.♔b6 White slowly comes with his king to the kingside.

58...♗c2 59.♔b7 ♔e7 60.♗b3 ♔f7 61.♔b8 ♔f8 62.♗b6 ♔f7 63.♗b7+ ♔f8 64.♗c7 ♗d2 65.♗c3 ♔e7 66.♔b7 ♗d1 67.♗c7+ ♔f8 Critical position. White finally put his pieces on optimal positions. Now it is time to take the king to the kingside. However, Black gets counterplay against White's pawns. The game will become forced.

68.♔c6 [68.h6 ♔g8 69.♔c6 (69.h7+ ♔h8 70.♗f7 ♗d3 71.♗xf6 ♔xh7 72.♗f5 ♔g6 73.♔c6 ♔h6 74.♗xe5 ♗xf3 75.♗f5 ♗f4 76.e5 ♗xg4 77.e6 ♔g6 78.♗e5 ♗c4± and Black is on time.) 69...♗d3 70.♗g7+ ♔h8 71.♗f7 ♗xf3 72.♔d6 ♗f1 73.♔e6

73...♗f4 Black keeps the rook on the f-file in order not to allow White to transfer his king to g6 via f5. 74.♗g7 Only way to come with king to g6 but now black is play (74. ♗xf6 ♔h7=) 74...♗xe4 75.♔f5 ♗a4 76.♗e7 Otherwise, the e-pawn gives Black enough counterplay for a draw. (76. ♔g6 ♗a8 77.♔xf6 ♗e8=) 76...♗a6! (76...♗a8 77.♔xf6 ♗g8 78.h7+-) 77.♔g6 f5+ 78.♔xf5 ♗xh6=]

68...♗d3 69.♗d7 ♗xf3 70.♔d6

70...♖d3+? Decisive mistake! Black should play [70...♖f4 71.♔e6 We have the same position as in the previous comment. 71...♖g8 72.♖c7 ♖h8 Black is waiting. It looks like White is not able to improve his position. (72...♖xe4 73.♔f5 ♖a4 74.♔g6 ♖a8 75.♔xf6 ♖f8+ 76.♔xg5 ♖e8 77.♖c3 e4 78.♖e3+-) 73.♔f7 ♖h7=]

71.♔e6 ♖xd7 [71...♖f3 Now it is too late. 72.h6 ♔g8 73.♖g7+ ♔h8 74.♔f7 Black is not on time. White is simply winning.]

72.♔xd7 f5 73.gxf5 g4 74.h6 g3 75.f6 The most accurate. [75.h7 ♔g7 76.f6+ ♔xh7 77.f7 g2 78.f8 ♖ g1 ♖ 79.♖f5+ ♔g7 80.♖xe5+±]

75...g2 76.h7 g1 ♖ 77.h8 ♖+ ♔f7 78.♖e8+ and Black loses his queen.

1-0

Editorial Preface

A massive share of the first place happened in Cappelle la Grande. 1st to 8th all ended up with 7/9 points. The three Top places went to the lucky players Sjugirov, Negi and Rodshtein, after the calculation of Buchholz.

The 20th Bunratty Chess Festival 2013 was won by Adams with 5,5/6.

And here comes the main event of the week, the female World Team Championship in Astana. Strangely, a lot of Top players are missing in a lot of Teams. Anyhow, the favorites are in the race. After round 5, Russia and Ukraine are leading with 9 Points, China only has 7 points (they are playing without Hou Yifan). Who will be the next female World Team Champion still remains very unclear.

At the moment, as we can see, we have a slightly "lack" of chess activity, but already in about a week from now, the Candidates Tournament will begin. It is going to be probably one of the most exciting chess events ever, with World Number 1 Magnus Carlsen looking for his place as the challenger for the World Championship against Anand.

As usual, we hope You enjoy the CEWN 54.

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Anand,Viswanathan (2780)
— Kramnik,Vladimir (2810) [C65]

Zuerich Chess Challenge Zuerich SUI (6.1), 01.03.2013

[Arkadij Naiditsch]

Sometimes we tend to forget that chess is a tactical game. You can play a great game outplaying Your opponent, and just „blunder“ everything away in one move. This happens a lot to You, to me and even in the highest level. It is, by far, not a rare event, as we will in the next moves...

1.e4 e5 2.♘f3 ♘c6 3.♙b5 ♘f6 4.d3 In the last round of the tournament, Kramnik needs a full point to catch the leader Caruana. Anand, being on minus 1, is playing „just to finish“ the tournament. Kramnik chooses his main weapon, the Berlin. At first sight, it is not an aggressive opening, but it creates a „long game“, where Your opponent has enough time to make mistakes.

4...♙c5 5.♙xc6 One of the main developments and Anand's favorite move.

5...dxc6 6.♘bd2 0-0 7.0-0

7...♖e8 Until here, everything is more or less standard. Black is playing ♖e8 with the idea of waiting for White's ♘c4, and only then to play ♘d7-f6, planning ♘f8-♘e6-♘d4. All this seems to be pretty „slow“, but given the solid pawn structure, White does not have any active plans either...

8.♘c4 ♘d7 9.♙h1 Anand is preparing the f4 push in case of Black's f6.

9...a5! A strong positional move. [9...f6 10.♘h4 followed by f4 could give White a slightly better play.]

10.a4 A logical move, but I do not think this is the most accurate way to play. [10.♙e3! I think this can be the only way for White to fight for any advantage. Black has no ♙b4, and needs to put the bishop on a worse position, for example, on f8.]

10...b6 b6 is more or less a waiting move. It is hard to imagine that Black wants to play ♙a6 next — the place for the bishop is on e6.

11.♙e3

11...♙b4! and again, Kramnik shows great understanding of the position. Black should try to keep his bishop pair...

12. ♖fd2?! White is preparing the f4 move. [Of course, a move like 12.c3 ♙f8 would just weaken all White's pawn structure. Now Black's ♙a6 could be a very likely option. If position opens up after d4, this can only be good for Black. The bishop pair will become very strong.; 12. ♙d2 would have probably been an option for White. Maybe, objectively, White just has nothing better than to play 12... ♙c5 13. ♙e3.]

12...b5! A very unusual move, but a very strong one! White's knight from c4 does not have any good moves...

13.axb5?! A very strange decision by Anand, who is going for, at least, not a better position. [13. ♖a3 seems to be the only move. 13... ♙a6 14. ♖ab1 bringing the White knight back to life. Of course Black is perfectly fine here, but probably not more than that.]

13...cxb5 14.c3 Now to go back with the knight to a3 just makes no sense.

14...bxc4 15.cxb4 cxd3 16.bxa5 ♙a6 Let us take a fresh look at the position. Black has a very strong pawn on d3. In exchange, White has an a-pawn that is blocked by the bishop on a6. The b-file can be nicely used by the Black rook on b8. Black's only problem is the knight on d7 that is quite badly placed. All in all, I think it is quite obvious that Black should be doing slightly better here, without any risk of losing the game.

17. ♖b3 ♖f6 Black wants to play ♖g4 next. [To hurry with 17... ♖b8 18. ♖c3 followed by ♖fc1 brings nothing for Black.]

18.h3 ♖h5 This is a logical move. Black is bringing the knight into the game. [Another possible way to play was

18... ♖d7 19. ♖fc1 c6 followed by ♙b5. I think Black's position should be, at least, not worse...]

19. ♖fc1 ♖f4 Black managed to activate the knight, which now can go to d4 by playing ♖e6-d4 or ♖e2-d4.

20. ♖c6! A very good active defense.

20...♖e2 Very logical. [In case of 20... ♖b8 21. ♖a2 ♖e6 22. ♖ac1 it seems that White has enough play to be almost equal.]

21. ♖d5! and again, a very good practical decision by White. Probably the position is just equal now.

21... ♖b8?? What a blunder! It is clear that Kramnik over pushes his position, feeling that Anand is just playing for a draw. [The right choice would have been 21... ♖xd5 22.exd5 ♖ec8 with a complex endgame that should probably end with a draw because of the opposite-colored bishops.]

22. ♖xa6! Such presents cannot be given to the World Champion, even when he is in bad shape.

22... ♖xa6 23. ♖xd3 and Black can simply resign. The knight on e2 or the rook on a6 will fall. It is hard to say

what did Kramnik blunder before playing ♔b8 — maybe ♖xa6. I guess we are all mortals :).

23... ♔xb2 **24.** ♖b1 ♖d6 **25.** ♔xe2 ♔a2 [It does not help to play 25... ♖xd2 26. ♖xb2 ♖xe2 27. ♖xe2 and White is a full piece up.]

26. ♔b5 **c6** **27.** ♔b2 Is this a deserve d win?! After playing chess for so many years, I start to think that there are no underserved victories. „Not to blunder“ is a very important skill for a professional chess player.

1–0

(2) Gelfand,Boris (2740) – Kramnik,Vladimir (2810) [E06]

Zuerich Chess Challenge Zuerich SUI (4.2), 27.02.2013

[Arkadij Naiditsch]

A very interesting game on the Catalan was seen between Gelfand and Kramnik. First, things looked pretty complicated, but after Kramniks made a sacrifice, White had a chance to keep his extra material. Gelfand did not take advantage of this, giving Kramnik a lot of chances to finish the game in his favor. Finally, after the time trouble, the game ended in a draw.

1.d4 ♘f6 **2.c4** e6 **3.** ♘f3 **d5** **4.g3** With this move, Gelfand chooses the Catalan.

4... ♙e7 **5.** ♙g2 **0–0** **6.0–0** dxc4 **7.** ♔c2 **a6** We are in one of the very main lines.

8. ♔xc4 **b5** **9.** ♔c2 ♙b7 **10.** ♙d2 ♙e4 **11.** ♔c1 Until here, everything is very well known. Main ideas: if Black manages to play c5, the position will be equal, so White is trying to do everything to stop Black from doing it.

11... ♔c8 Quite a rare move, but Kramnik himself had to face this move with the White pieces against Leko in 2007, where he continued with 12. ♙g5, which seems to be the main option here.

12.b4!? It is hard to say if this was Gelfand's preparation, but what can be more logical?! Black wants to play c5 and White is stopping it...

12...♘bd7 The only problem for White now is the c4 square, and the Black knight can get there easily with ♘b6-♘c4.

13.♘c3 ♙c6 Black is preparing for ♚b7 next.

14.a3 ♚b7 15.♚c2 Of course, one of the main ideas for White is to push e4. It does not seem to be an easy task, but by playing ♚c2 followed by ♖fe1, it can work out.

15...h6 [15...♘b6 16.♙g5 might give White a slightly better position.]

16.♖ac1!? A little bluff by Gelfand.

16...♖ac8?! There was no need for this move. [I think Black could have tried 16...♘b6 17.e4! I guess this is what Kramnik was afraid of. 17...♙xe4! but everything works out for Black. 18.♘xe4 ♚xe4 looks very dangerous, but tactically, everything works for Black. 19.♚xc7 (19.♚b3 ♚d5) 19...♘fd5 and Black is perfectly fine.]

17.♖fe1 ♘b6 18.e4 ♘c4 The position is very complicated, but somehow it feels that the Black pieces are not

completely well placed. The Black queen is on b7, which always gives White many dangerous attacking ideas...

19.d5! Good move! White is starting the action.

19...♙d7 [19...♙e8 is a computer suggestion here, but how to play such an ugly move...]

20.dxe6 White continues with direct play.

20...fxe6 [20...♙xe6? 21.e5 probably just loses the game. White will play ♘d4 next.]

21.e5 Logical. [White had a stronger move: 21.♙xh6! ♘g4 (In case of 21...gxh6 22.e5 followed by ♚g6 is game over.) 22.♙f4 c5 It seems like Black has a lot of counter-play, but after 23.e5! things sudd enly turn around. White wants to play ♚g6 next. Also, the idea ♘e4-♘g5 can be deadly. White should be better here.]

21...♘g4 22.♖e4 The Black knight is trapped caught, but...(!!!)

22...♖xf2! is a very strong move, even though Black had practically no choices already.

23.♔xf2 ♘xd2 24.♔xd2 c5 White is a clear piece up, but suddenly, a lot of White's pieces are hanging. Black's bishop pair is getting very strong.

25.♔g1 It is very logical to take the king away from the f-file. [25.♖f4!? would have been a good way to continue the game for White. To exchange a rook cannot be wrong when You are a piece up.]

25...cxb4 Black is opening the c-file.

26.axb4 ♕c6 27.♖ce1 a5 Very original play by Kramnik, but was it necessary?! [Why not just the simple 27...♖fd8 forcing the White Queen to leave the d2 square, while at the same time, protecting the b4 pawn. 28.♔e2 ♕xe4 29.♘xe4 ♕xb4 30.♖f1 The position is still very tricky. White will try to go for a mating attack by playing ♘h4 next, but I think Black's chances should be at least equal here. The a- and b-pawns could play a deadly role in every endgame.]

28.♘d4 ♔a7? A blunder... [Black had no choice already here... 28...♕xe4 29.♘xe4 ♔a7 and White should be doing better, but the position is still super complicated.]

29.♘cxb5? What a shocking move... Gelfand is giving away his knight just for a pawn — why to do that?! [First 29.♖4e3! ♕xg2 and only now

30.♘cxb5! would have kept the game clearly in White's favor. I do not see a way for Black to continue here... White remains a full piece up.]

29...♕xb5 30.♔h1 ♕c4 With the bishop pair in a very open position, Black is clearly much better here. White needs to be very careful not to lose any material immediately.

31.bxa5 ♖fd8 All the White pieces start to hang...

32.♔b2 ♔xa5 33.♘f3 Can White survive here?

33...♕d5 Very logical.

34.♖4e2 ♕b4! pushing the White rook from e1 to g1.

35.♖g1 ♕c3 36.♔b1 All the Black pieces are just perfectly placed, but to find a final blow is not easy at all.

36...♕c4?! seems to be a move in the wrong direction. [36...♔a6; 36...♖f8; 36...♖c4 were all very nice for Black. It might seem that the position should be close to a draw, and that Black has nothing more, but it is a very wrong

impression. Black's pieces are fully dominating the board and, sooner or later, Black will find a way to break through the defensive lines.]

37. ♖e3

37... ♗b4? and this is already a serious mistake. Clearly, to transport the bishop from c3 to f8 cannot be the right way of playing.

38. ♖e4 ♗f8 39. ♖f4 ♗d3 40. ♔b3 ♔d5 The time trouble is over and we can see that White has improved his position dramatically during the last moves. The exchange of queens is worth a lot.

41. ♔xd5 ♖xd5 Gelfand finds a nice tactical way to force a draw.

42. ♘d4! and of course, the exchange of the e-pawns gives White a draw.

42... ♖xe5 43. ♘xe6 ♗e7 44. ♖d4! Another precise move „not to suffer“.

44... ♗f5 45. ♘f4 The position is a draw.

45... ♗c5 46. ♖d5 A lot of chances were missed by both sides, but all in all, it was a very exciting game!

1/2

(3) Adams, Michael (2727)

– Aguera Naredo, Javier (2390) [B07]

20th Bunratty Masters Bunratty IRL (5.1), 03.03.2013

[Csaba Balogh]

A spectacular game not without mistakes.

1.e4 d6 2.d4 ♘f6 3. ♘c3 g6 The Pirc defense. Usually, Black players employ it to avoid the longtheoretical lines, but as we will see, if we are not familiar with the ideas, we can run into quick defeats.

4. ♗e3 c6 5. ♔d2 ♘bd7

6. ♘f3 Adams plays one of the most solid setups, which guarantees him a small but long-term advantage.

6...e5? This move is premature. The idea is correct — to fight for the center -, but first Black should have finished the development. [6... ♗g7 7.h3 0–0 8. ♗d3 followed by 0–0 and ♘e2–g3, gives White a comfortable game.]

7. ♗c4! Suddenly the f7 pawn became a real weakness, ♘g5 is already a decisive threat.

7...b5 Another careless move, although the position was already very suspicious. [7...♗g7 8.0-0-0 and Black cannot secure the safety of his king with 8...0-0? because he loses material due to the pin on the d-file. 9.dxe5 dxe5 10.♘xe5!+-]

8.dxe5 A principled move to open the position against the Black king, which still needs some moves to castle kingside.

8...dxe5 [Black quickly collapses after 8...bxc4 9.exf6 ♘xf6 10.e5! dxe5 11.♔xd8+ ♔xd8 12.♘xe5 White wins at least a pawn.]

9.♗b3 Black needs to develop his f8 bishop, but he has serious problems to find where to put it.

9...♗b4! The best chance. Black tries to win a tempo to castle with the threat of ♘xe4, but unfortunately for him, there are concrete problems in the position. [Black has no time to win the e4 pawn with 9...b4 The punishment comes quickly with 10.♘g5! bxc3 11.♔xc3 Black cannot protect the f7 pawn. 11...♗g7 12.♗xf7+ ♔e7 13.0-0-0+- Too many threats around the king. The game is over.; 9...♗e7 is met with 10.♗h6! and the problem to castle does not disappear. ♘g5 is a deadly threat.; 9...♗g7 is refuted by 10.♔d6! with the multiple threats of ♘g5, ♘xe5 and ♔xc6.]

10.♗h6! Excellent move! It is more important to keep the king on e8, than to take care of the e4 pawn. If it falls, the central lines are going to open on the Black king. Anyway, Black has to accept the sacrifice, otherwise he loses because of the ♘g5 threat.

10...♘xe4 11.♔e3 ♘d6 [11...♘xc3 is not better either. 12.bxc3 ♗f8 (12...♗c5 13.♔e4+-) 13.0-0-0 If we take a look at the attacking pieces of White and the undeveloped Black ones, we do not need to calculate longer to simply assess that White has a decisive attack.]

12.♘xe5 ♘xe5

13.♔xe5+? This mistake could have brought Black back to the game. [13.♗g7! was the right move order. 13...♔g8 14.♔xe5+ ♔e7 and we transposed to the position of the game.]

13...♔e7 14.♗g7! Keeping the tension and improving the pieces.

14...♔g8? [Black could have finally solved the problem of his uncastled king with 14...♔xe5+ 15.♗xe5 0-0 White has a clear advantage here as well, but he needs to work to convert it. 16.0-0-0 ♘f5 17.♘e4 ♗e7 18.♔he1± White's pieces are clearly dominating.]

15.0-0-0 ♖xe5 16. ♙xe5 Black succeeded to get rid of the queens, but the attack is still enormous with the minor pieces and the rooks on the central files.

16... ♘c4 Black rightly tries to exchange the active pieces, but there are still many left on the board.

17. ♙xc4 bxc4

18. ♘e4! The hole on f6 became the key factor of the game.

18... ♙e7 [18... ♙e7 has a prosaic refutation. 19. ♘f6+! ♙xf6 20. ♙xf6 and Black cannot avoid getting mated on d8 after doubling the rooks on the d-file. 20... ♙e6 21. ♖d6 g5 Trying to kick out the bishop with ♖g6, but it fails by one tempo. 22. ♖hd1 ♙d5 23. b3! White needs to eliminate the c-pawn to be able to open the d-file again. 23... cxb3 24. c4!+- wins.]

19. c3 Sending the bishop into an even worse position in order to get access to the d6 square.

19... ♙a5 20. ♙f6+ ♙e6 This leads to a forced mate, but the game was over anyway. [20... ♙f8 21. ♖d6+-]

21. ♖d6+ ♙f5 22. ♘g3+ Black resigned in view of the mate in the next move. [22. ♘g3+ ♙f4 23. ♖d4#]

1-0

(4) Gharamian, Tigran (2661) – Baryshpolets, Andrey (2526) [E60]

29th Open Cappelle la Grande FRA (5.7), 26.02.2013

[Csaba Balogh]

After White outplayed his opponent positionally, Black decided to complicate matters, but then, in the tactical part of the game, White dominated again.

1. d4 ♘f6 2. ♘f3 g6 3. c4 ♙g7 4. ♘c3 0-0 5. g3 The game started as a King's Indian Defense with g3, but suddenly, it transposed to the Benoni.

5... c5 6. d5 d6 7. ♙g2 e6 8. 0-0 exd5 9. cxd5 ♖e8 The initial position of the opening. White has various different setups here — he chooses one of the main lines.

10. ♙f4 a6 11. a4 The last two moves were standard measures in this line. Black wanted to play b5, which White prevented.

11... ♘h5 Black follows the latest fashion. [The old main line starts with 11... ♘e4 12. ♘xe4 ♖xe4 13. ♘d2 ♖b4 Aro-nian beat Carlsen in a nice strategic game back in 2007 with 14. b3!? The game continued with 14... ♙xa1 15. ♖xa1 ♖xf4!? The bishop was extremely strong on f4. White was

threatening to play ♖c4 or ♖e4, collecting the d6 pawn, and ♗h6 could have been unpleasant as well. So, sacrificing back the exchange was completely justified. 16.gxf4 ♘d7 17.♘e4 with slightly better for White.]

12. ♗g5 ♔c7 The idea of the previous two moves was to continue the development with ♘d7, which was not possible immediately because of the d6 pawn. We can also see that to include a6-a4 was also useful to avoid ♘b5 now.

13.h3 A rare, but useful move, which fits well in the position. White usually tries to make progress on the kingside. Possible plans are e4, followed by ♘d2 and f4, and sometimes even g4 could be an unpleasant idea.

13...f5? This is definitely a mistake. Black significantly weakens his king's position, which might not be obvious at first sight, but 3 moves later it all becomes clear. [Black should have played 13...♘d7 followed by ♖b8 and b5. White will need to parry this b5 move again by playing a5, but even then b5 is possible. and after axb6 ♖xb6, Black gets counterplay on the b-file.]

14. ♖e1! White prepares for the e4 move, after which the knight will occupy an excellent square on e4. Suddenly, Black faces serious difficulties to finish his development on the queenside.

14...♘f6 Black tries to avoid or, at least, to delay e4. [14...♘d7 15.e4 fxe4 16.♘xe4 looks terrible from Black's point of view. ♘f3-d2-c4 is coming next. Also, g4 might win the h5 knight occasionally.]

15. ♗xf6! White gives up his strong bishop in order to get e4 as fast as possible. Black is not in time to consolidate his position. [15.♘d2 It was also possible to play e4, but the text move is much more effective.]

15... ♗xf6 16.e4 Black's main problem is that he cannot develop his knight to d7 because of the simple exf5, and otherwise it is hard to make a useful developing move. Actually, Black is missing only one tempo — if he could play ♘e5 now, his position would be perfectly fine.

16... ♖f8 Quite an ugly move, but it is hard to suggest something better. Black wanted to keep an extra defender for his king after the threatened exf5. However, this allows another nice idea. This is a standard breakthrough in these Benoni structures! [Giving up the strong bishop is not advisable. 16... ♗xc3 17.bxc3 fxe4 18.♘g5 White wins back the pawn and gets a very strong attack.; 16...fxe4 17.♘xe4 ♗g7 loses to 18.♘f6+!]

17.e5! dxe5 18.d6 ♖g7 19.Nxe5! White won back the pawn because of the ♔d5 check. He also got a very dangerous d6 pawn and all of his pieces are excellently placed. Meanwhile, Black is still suffering to finish his development.

19...Nxd7 20.f4! Another good decision to leave Black suffering with his bad pieces. [White could have won a pawn with 20.Nxd7 ♔xd7 21.♔d5+ ♔h8 22.♔xc5 ♖ac8 but why to ease Black's task in his cramped position for a small amount of material?]

20...♔h8 After leaving from the ♔d5 check, Black finally wants to take on e5.

21.Nd5! Another strong and concrete move! As we will see, both captures on e5 have their own problems.

21...♔xe5 [21...Nxe5 is met with the intermediate move 22.Nxf6! Nc4 White can choose between many good moves, but the most elegant way to get a winning position is definitely 23.Ne8! ♔d4+ 24.♔xd4+ cxd4 25.♔e7+- Black is paralyzed.]

22.fxe5 Nxe5 23.Nb6! ♖b8 24.♖c1! This was the simple idea of 21.Nd5! Black cannot avoid ♖xc5, after which both rooks are ready to invade on the 7th rank, thanks to the strong d6 pawn. On the other hand, Black is still suffering with his c8 bishop.

24...Nd7 25.Nxd7 [On 25.♔e7 Black has 25...♖f7 26.♖xf7 ♔xf7 27.Nxd7 ♔xd7 28.♖xc5 White is much better here as well, but why to exchange a pair of rooks?!]

25...♔xd7 26.♖xc5 ♖c7 followed by ♔e7 are in the air.

26...♖fe8 27.♖c7 ♖xe1+ 28.♔xe1 Black decided to finish his suffering and allowed a small combination to finish the game.

28...♔d4+ [28...♖e8 29.♔b4 b5 30.a5!+- followed by ♖a7-a6, for instance. Black is unable to create any counterplay with this deadly pin on the 7th rank.]

29.♔h2 ♔xd6 30.♖xd7! ♔xd7 31.♔e5+ and the b8 rook falls. Nice performance by White. He punished his opponent very effectively after the 13...f5 move.

Endgame section

(15) Amin,B (2631) — Gajewski,G (2644)

Reykjavik Open, 27.02.2013

[Chess Evolution]

Black seems to be completely lost, but as in many other rook endgames, surprising things can happen.

40...♖g6!! White cannot prevent f4, getting rid of the weak pawn and White remains with his passive rook on h7. [Obviously, the pawn endgame is hopeless after 40...♖f6? 41.♔g2 ♖xf7 42.♖xf7+ ♔xf7 White wins easily after 43.♔f3 ♔g6 44.♔f4 ♔f6 45.f3! Black is in zugzwang. 45...♔e6 46.♔g5+-; 40...f4 immediately is premature, because White can preserve all his pawns. 41.g4! ♖g6 42.f3 ♖c6 43.♔g2 ♖c2+ 44.♔h3 ♖c1 (44...♖f2 45.g5 ♖xf3+ 46.♔g4+- is over.) 45.♖h5!+- and the rook goes to f5, and the f4 pawn is falling.]

41.♔h2 f4! 42.♔h3! White tries his only chance! [42.gxf4 ♖g4 would have been an easy draw. Such bad pawns cannot be promoted.]

42...fxg3 43.fxg3 White has only one plan, to advance his g-pawn with the support of his king. Black must search for active counterplay against it.

43...♖a6! 44.g4 ♖a1! The only move! Black is disturbing White to make progress.

45.♔g2! White finds his best chance again! He had to prevent ♖f1 and, of course, ♖h1! [45.♔g3 leads to a draw after 45...♖f1! and Black can take on f7 because the pawn endgame is drawn. 46.g5 ♖xf7 47.♖xf7+ ♔xf7=]

45...♖a3? Black cuts the king. This was the most logical move, but also the decisive mistake. [45...♖a7? never works, with the idea of taking on f7 the next move,

because 46. ♖h8+! ♔xf7 47. ♖h7+- wins the rook.; The draw could have been achieved by 45... ♖e1!! 46. ♔f3 (White cannot advance his pawn at once 46.g5 ♖e5! and on g6, ♖g5 is check.) 46... ♖f1+ 47. ♔e4! After other king moves, Black could have taken on f7, while now it would be losing because White gets the opposition with ♔f5. So, Black needs to wait until White pushes g5 and only then take on f7. 47... ♖f2 48. ♔e5

48... ♖f1 (48... ♖xf7? is always bad while the pawn is on g4. 49. ♖xf7+ ♔xf7 50. ♔f5 ♔g7 51. ♔g5! ♔h7 52. ♔f6+- wins.) 49. ♔e6 White is ready to play ♖h8, but a nice stalemate trick saves Black. (49.g5 ♖xf7 50. ♖xf7+ ♔xf7 51. ♔f5 ♔g7 and White does not have ♔g5 anymore, so the position is a draw.) 49... ♖f6+! 50. ♔xf6 And the saying is true again: all the rook endgames are drawn. :)]

46. ♔f2! Another great move by White! He prepares for the g5 push, by leaving from the ♖a5 g6 ♖g5 check.

46... ♖a4 47. ♔g3 ♖a5 [The drawing motif does not work anymore, because White can stay with his king on the g- and h-files. 47... ♖a1 48. ♔f4 ♖f1+ 49. ♔g5! (49. ♔e5? ♖f2 is a draw as we already know.) 49... ♖f2 The difference is 50. ♔h5! and White is ready to advance his g-pawn. The

rook check on the h-file never works because of ♔g6. (50. ♔g6 allows 50... ♖f6+ again.) 50... ♖f1 51.g5 g6 is coming next and the pawn endgame now is a theoretical win for White. 51... ♖xf7 52. ♖xf7+ ♔xf7 53. ♔h6 ♔g8 54. ♔g6 ♔h8 55. ♔f7 ♔h7 56.g6+-]

48. ♔h4 ♖a4 49. ♔h5 ♔e7 50.g5 ♖a1 51. ♔g6 ♖f1 52. ♖h8 Black resigned in view of ♖xf7 ♖h7!

1-0

(16) Caruana, Fabiano (2757)
– Gelfand, Boris (2740) [E00]

Zuerich Chess Challenge Zuerich SUI (6.2), 01.03.2013

[Chess Evolution]

41. ♘c5 We will see quite an interesting endgame from a practical point of view. What to exchange, what not to exchange. Which pawn structure is a draw, which a winning one. Let us try to take a closer look...

41... ♘e6 A good looking move by Gelfand. To exchange the knight would be a huge step for Black to get a draw. All knight endgames with a pawn can be very hard to defend. On the other hand, all bishop endgames or rook endgames could be very close to a draw. However, now the White knight is getting a perfect position on e4.

42. ♘e4! Of course, Caruana does not exchange the knights. [42. ♘xe6? ♙xe6 and Black made a huge step to get a draw.]

42... ♗g7 To put the bishop on g7 is never wrong.

43. ♖b6 ♖a8 Black put his pieces in perfect positions.

44. h3 Caruana wants to start his „winning“ plan by playing f4-g4-f5. Can Black do something against it?

44... ♖a2?! A slightly strange decision. I think Black should have kept using the „waiting“ tactic.

45. f4 ♖a5 46. ♗f3 Nothing too big has happened yet.

46...g5!? A strange looking move, but what else to do? It is hard to find a way against White's winning plan. [If Black keeps waiting with 46... ♗h7 47. g4 hxg4+ 48. hxg4 ♗g8 49. ♖b8+ ♗h7 now the very important 50. ♗h4! could just finish the game on the spot!]

47. ♖b8+ ♗h7 48. ♘d6 f5 Black's pawns are weak, but at least, White's plan with g4 has been stopped.

49. ♖b6 g4+ 50. hxg4 and here comes the critical decision: What pawn to take on g4 with?

50...fxg4+?! I think this was the wrong choice. [50...hxg4+ 51. ♗g2 It seems like White is doing really good, but here comes 51... ♘c5! Black's only chance of saving the game is with active play. 52. ♘xf5 (To play the same as in the game makes no sense now. 52. ♘b7 ♘xb7 53. ♖xb7 ♗g6 is just a draw.) 52... ♖a2! followed by ♘e4 or ♘d3 with some drawing chances.]

51. ♔g2 ♘c5 Gelfand tries the same, but now it is getting countered by

52. ♘b7! ♘xb7 **53.** ♖xb7 White wants to play e4-e5 to finish the game.

53... ♖a4 **54.** ♖b6 cutting the Black king.

54... ♖e4 **55.** ♔f1 White's king is going to d3.

55...h4? and another blunder by Gelfand. [55... ♖a4 in order to be ready to play ♔e2, and against ♖a2+, ♖d2 would follow. Black's position is bad, but by far not lost. There would still be a great fight here... 56. ♖d6 in order to be ready to play ♔e2, and against ♖a2+, ♖d2 would follow. Black's position is bad, but by far not lost. There would still be a great fight here...]

56.gxh4 Thank You Boris.

56...g3 **57.** ♙g1 and the 3rd pawn is going to fall on g3.

57... ♙h6 **58.** ♔g2 All in all, it is hard to say if Black could have saved the endgame from the beginning. Probably, it is closer to a win by White than to a draw.

Editorial Preface

The World of Chess is waiting for the Candidates Tournament that already begins on March 15th. However, another major event has just finished.

Ukraine is the winner of the Women's World Team Championship with 16 Point. 2nd place went to China with 15 Points and "only" the 3rd place was taken by Russia (who played without the Kosintseva sisters).

The "Talking Match in Teheran" between Nigel Short and Ghaem Maghami was won by the Englishman very convincingly in all the 3 disciplines: Normal chess, rapid chess and blitz.

The Karpos Open is being played in Macedonia. Yemelin is the leader with 5,5/6 points and a lot of strong GMs behind him.

As usual, have fun with CEWN Nr 55.

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Tkachiev,V (2644)–Dobrov,V (2537) [A57]

Nancy, 10.03.2013

[Csaba Balogh]

The decisive game of the very strong rapid tournament in Nancy. The surprise of the event, Vladimir Dobrov, knocked out two big favorites (Bacrot and Vachier La-grave) to reach the final, but in the second game he suffered a painful defeat.

1.d4 ♘f6 2.c4 c5 3.d5 b5 After defeating two top GMs, with full of confidence, Black chooses the Volga gambit.

4.♘f3 A solid alternative for White. He is aiming for a small positional advantage instead of accepting the sacrifice and going for the complicated positions. Black has a wide range of choices here...

4...b4 [4...♙b7 and; 4...g6 are the two main lines.]

5.a3! White would like to develop his knight to c3, therefore he undermines the b4 pawn.

5...bxa3?! This is an inaccuracy, which helps White to finish his development the most ideal way. [5...g6 is the critical line. 6.axb4 cxb4 with many interesting lines and games in the database.]

6.♖xa3! At first sight it might look a bit strange, but the knight belongs on c3, where it supports the occupation of the center with e4.

6...g6 7.♘c3 ♙g7 8.e4 d6

9.e5!! An extremely strong move! White correctly judges the changes of the pawn structure. [White also gets a small advantage after the normal developing moves: 9.♙e2 0–0 10.0–0 but the text move is much stronger.]

9...♘g4 [9...dxe5 critically weakens the c5 pawn. 10.♘xe5 0–0 11.♙e2 followed by 0–0, ♘d3 and ♙e3 with very strong pressure on c5. White has a huge advantage. ♘bd7 does not work because of ♘c6!]

10.exd6 exd6 11.♙g5 White would like to reduce the power of the strong g7 bishop, by either provoking f6 or trying to exchange it. Black preferred the second option. [However 11.h3 seems to be even stronger. The point is

that after 11...♘e5 12.♗xe5 ♕xe5 13.♕h6! Black has serious difficulties to castle.]

11...♕f6 12.♕xf6 ♖xf6? Black would like to move his knight to e5, so he decides to take with the queen, but it crucially moves into the ♗e4 tempo. [12...♗xf6 was the only move, although White enjoys a small, but stable advantage here as well. 13.♕e2 0-0 14.0-0 ♕g4 Black's main problem in this kind of position is the d5 pawn, which takes away his space to develop the pieces and weakens the d6 pawn. White has many ways to put it under pressure. 15.♗d2 ♕xe2 16.♖xe2 and ♜fa1, ♞b5 or ♞e4, queen transfers to f4 or g3, and the rook might also go to a6 later on. Black still wants to finish his development.]

13.♕e2 [White had a strong alternative here with 13.h3 ♗e5

14.♗e4! ♗xf3+ 15.♜xf3 Suddenly, the rook proves to be excellently placed on the 3rd rank. 15...♖e5 16.♜e3 0-0 17.♖d2 After protecting the b2 pawn, Black is simply unable to prevent ♗xc5. The queen cannot leave the pin, because of the d6 pawn.]

13...0-0 14.0-0 ♗h6 A slightly artificial maneuver, but the position was already difficult. The idea was to take the

f3 knight with ♕g4, followed by occupying the d4 square with ♗f5-d4. But of course, this is too slow. [Other moves were also bad, for instance 14...♕f5 15.h3 ♗e5 16.♗xe5 ♖xe5 17.♜e1 ♖f6 18.♕g4 ♗d7 19.♕xf5 ♖xf5 20.♗e4 Black tried to finish the development logically, but the main problem is the d6 pawn, again.]

15.♖d2 ♖g7 16.♗e4! An excellent place for the knight and it is going there with tempo.

16...♖e7 17.♕d3 Unfortunately, ♜e3 was not possible because of ♗f5, but now the other rook is going to occupy the e-file.

17...♕g4 [17...♕f5 is met with the same moves as the game... 18.♖c3+ ♕f6 19.♜e1 with huge problems for Black.]

18.♖c3+! Critically weakens the e6 square.

18...f6 19.♜e1 ♗xc5 is the threat.

19...♖d7 [19...♕xf3 20.♗xc5+- and ♗e6 next.]

20.♗eg5 [20.♗fg5 was also winning. Black cannot develop his pieces.]

20...♜e8

21. ♖aa1! White needs to keep the important e-file. The b8 knight still cannot move, which would be necessary for connecting the rooks.

21... ♘f7 It is easy to feel that the pieces cannot be improved anymore and White should aim for a decisive blow!

22. ♘xh7! That is it!

22... ♗e5 Black would like to lock the position a bit and also to trap the h7 knight, but it continues its kamikaze journey! [22... ♖xh7 loses to 23. ♔xf6 ♕h5 24. ♖xe8 ♔xe8 25. ♖e1+- and ♖e7 decides in the next move.]

23. ♘xf6! ♔xf6 24. ♘xe5 dxe5 25. f4! This was the point of the ♘xf6 sacrifice. If White succeeds to get his pawn to e5, he will swap his opponent away from the board.

25... ♔d6 26. ♕xg6!? Playing for the spectators. This was definitely not the only way to win, but it demonstrates well the power of the central pawns. [26. fxe5+ ♖xe5 27. ♖xe5 ♔xe5 28. ♖f1+ also looked tempting, but Black is alive after 28... ♕f5]

26... ♔xg6 27. fxe5 White has 4 pawns for the two minor pieces, but the position is completely winning, as Black does not have enough time to consolidate his position...

27... ♔d7 28. ♔g3 The threat is e6 to win the g4 bishop.

28... ♔f5 29. e6 The new threat is ♖e5 and Black cannot avoid losing the bishop.

29... ♔g5 [29... ♔h7 would have also lost. One of the winning plans is 30. ♖e5 ♔g6 31. ♔h4+ ♔g7 32. ♖g5+-]

30. h4! Black loses the g4 bishop now, which means the end of the game.

30... ♔d2 [30... ♔f5 31. ♖e5+-]

31. ♖ad1 Obviously, everything else was also winning, but White decided to finish the game in style and kept the g4 bishop alive one more move.

1-0

(2) Karavade, Eesha (2387) — Gunina, Valentina (2505) [A09]

FIDE Women's World Teams Astana KAZ, 11.03.2013

[Csaba Balogh]

An interesting game which had a calm start. White seemed to be overtaking the initiative, but suddenly, after a very logical but careless move, Black succeeded to turn the game to her favor in nice style.

1. ♘f3 **d5** **2.** c4 **c6** **3.** g3 White tries the Reti opening and Black chooses one of the safest options against it.

3... ♖g4 **4.** ♖g2 **e6**

5. cxd5 White tries to change the pawn structure by using the fact that cxd5 is not possible at the moment.

5... ♖xf3 This is a necessary intermediate move if Black wants to take back with the c-pawn. [5...cxd5?? would allow White to play a miniature. 6. ♖a4+ and g4 falls.; 5...exd5 is an alternative for Black, but it leads to sharp games after 6.0-0 ♘f6 7.d3 ♖e7 8. ♘c3 and e4 next move.]

6. ♖xf3 **cxd5** **7.** 0-0 **♘f6** **8.** ♘c3 ♘c6 White got the bishop pair, but the position is closed and he can hardly open

it. Only in the long-term he will have some chances to enjoy this advantage.

9. d3 ♖c5 This is considered to be the most precise. Black wants to develop the queen to e7. [But 9... ♖e7 is also perfectly playable.]

10. ♖f4 **0-0** **11.** ♖c1 ♖e7

12. a3 White tries to take some ground on the queenside, but it hardly brings any advantage.

12... h6 A useful waiting move. Black opens the back-rank just in case, and occasionally e5 might be an option after preventing ♖g5. [12... ♖ac8 was also possible.]

13. ♘a4 ♖d6 **14.** ♖xd6 ♖xd6 **15.** ♘c5

15...♘d4! 16.e3! The right decision to get rid of the d4 knight, although White admits with this move that she could not get any advantage in this game. [It made no sense to preserve the bishop with 16.♙g2 as the d4 knight is more powerful now. 16...♖fc8 17.♘b3 (17.♘xb7? ♚b6 traps the knight.) 17...♖xc1 18.♘xc1 ♖c8 and Black has the advantage. White cannot kick out the knight with e3 because of the ♖xc1 threat, followed by ♘e2.; 16.♘xb7 is simply met by 16...♘xf3+ 17.exf3 ♚b6 and Black wins back the b2 pawn.]

16...♘xf3+ 17.♚xf3 ♚b6 18.♘b3 ♖ac8 19.♘d4 ♚d7 20.♚f4 On the highest level, the players would probably agree to a draw now, but in women's chess the game is just about to start. :)

20...♖fe8 [Black wanted to create some complications, otherwise she would just trade everything 20...♖xc1 21.♖xc1 ♖c8 22.♖xc8+ ♚xc8 and offer a draw.; However 20...♖c5!? was an interesting alternative to continue playing on. Black is fighting for the c-file, while trading the rook would seriously improve his pawn structure. 21.b4 (21.♘b3 is a mistake because of 21...♖xc1 22.♖xc1 ♚b5! White has problems with the b2 pawn and 23.♖c3 moves into

23...d4! freeing the d5 square for the knight! 24.♚xd4 (24.♘xd4 ♚xb2) 24...♘d5 and b3 is hanging.) 21...♖xc1 22.♖xc1 ♚a4 and suddenly, after provoking the b4 move, Black has a target on a3.]

21.♚e5 ♚a4?! This is an inaccuracy. Black decided to take a risk in order to be able to continue the fight. [21...♘g4 22.♚f4 ♘f6 was possible to make a draw.; 21...a5 is a useful move with a balanced position.]

22.♚d6! Suddenly, White gets the c6 square for the knight!

22...♚a6! Admitting the mistake of the previous move, Black drives back the queen to b7 to control all the squares in his camp.

23.♘c6 ♚h7 It was necessary to leave from the ♘e7 threat. [23...♚b7? drops an exchange after the small combination 24.♘e7+!]

24.♖c3 Doubling the rooks on the c-file. White nicely overtook the initiative.

24...♚b7

25.♖fc1? Who could believe that this most logical move—which would be played by almost everybody

without thinking — is the turning point of this game... Black plays extremely strong from now on. [25.b4 should have been played with the idea of b5, stabilizing the strong c6 knight.]

25...e5!! A nice tactical move to jump out from the slightly cramped position. Black intends to play ♖e6.

26. ♖b4 [26. ♘xe5 drops the piece after 26... ♖xc3 27. ♖xc3 ♖e6 and White cannot save the e5 knight. 28. ♖c7 just prolongs the loss of material. 28... ♖a8]

26...d4!! Another great tactical move. Black frees the d5 square for the knight!

27. ♖3c2 [27.exd4? ♘d5 wins.]

27...dxe3! Weakening White's pawn structure ahead of his king. [27... ♖e6 immediately was also tempting, but it allows a tactical blow: 28. ♘xd4! ♖xc2 29. ♘xc2 and White won a pawn.]

28.fxe3 ♖e6! Kicking out the annoying c6 knight.

29. ♖a4 [29. ♘d4 is now simply met by 29... ♖xc2 30. ♘xc2 ♖c6 with an unpleasant pin on the c-file. It is hard to leave it with the c1 rook, since the queen is also going there.]

29... ♖d7! Creating another deadly pin. White could not fortify the knight on c6 and only has problems with it. As a side threat, the d3 pawn is under attack.

30.d4 exd4 31.exd4 [31. ♖xd4 is refuted by 31... ♖d6 32. ♖a4 ♖d1+ White loses huge material. For instance 33. ♖xd1 ♖xd1+ 34. ♔g2 b5 35. ♖b3 ♖xc6!]

31...a6! The most precise move again, creating the threat that was seen in the game.

32.b3 [32. ♖c3 was the last chance, with the idea of leaving the pin with check after ♖c2, although after some strong moves, Black is winning here as well. 32...g6! calmly preventing the ♖c2 check. 33. ♖c2 ♘e4! 34. ♖c4 b5 White cannot hold the c6 knight anymore and the trick with 35. ♘e5 loses to

35... ♖xe5! 36. ♖xc8 ♖xd4+ 37. ♔g2 ♘d2! and ♖e2 is a decisive threat, which White cannot prevent!]

32...b5! Sending away the queen from the protection of the d4 pawn.

33. ♖xa6 ♖cxc6! 34. ♖xc6 ♖xd4+ 35. ♔h1 ♖e2 White resigned as the king is way too exposed. **0-1**

(3) Gunina,V (2505) – Ju Wenjun (2505) [A41]

FIDE Women's World Teams Astana KAZ (4.1), 06.03.2013

[Arkadij Naiditsch]

A very important game from the match Russia-China ended in a nice tactical way in favor of Gunina. Let us take a closer look!

1.d4 d6 The Chinese decides to take Gunina quickly out of the opening. Of course, as we can easily see, this can only work with players that use 1.d4. I guess the usual 1.e4 player would be very happy to play 2.e4 now and go to the Pirc.

2.c4 e5 3.♘f3 ♘d7 4.♘c3 g6 The idea of Black is to reach a King's Indian structure where she does not lose a tempo playing ♘f6 and later ♘d7-f5, but to play ♘e7 followed by an immediate f5.

5.dxe5!? A nice idea by Gunina, who is trying to take advantage of Black's temporary lack of coordination.

5...dxe5 6.♙g5 Destroying the pawn structure.

6...f6 [At 6...♘e7? 7.♘d5 White is doing very well.; 6...♙e7 7.♙xe7 seems to give White easy play with ♖d2–0–0–0 an h4.]

7.♙d2 ♘c5?! This move cannot be good. White will always have a chance to get rid of the knight on c5 by playing b4. Black should have focused more on the development of the kingside instead. [7...♙g7 8.e4 ♘e7 9.♙e2 0–0 10.0–0 but here it also seems that White should have a nice positional advantage.]

8.♙c2 White is following the main idea: to play e4, then ♙e2 and short castle, which would finish her development.

8...♙e6 9.e4 c6 Even though White has a big development advantage, Black's position is very solid and hard to break.

10.♙e2 ♘h6 11.♖d1 ♘d7 12.0–0 ♘f7 Black wants to play ♙e7 and short castle. What should White's plan look like now?!

13.♘h4! Gunina finds the right way to proceed. The f4 push will put extra pressure on Black's position. Another plan for White could be to play ♘a4 followed by c5 and ♙c4.

13...♙h6 The exchange of bishops is the right idea for Black, but Gunina has a great trick!

14. ♖f5! Very nice move! [Of course 14. ♗xh6 ♘xh6 15. ♖d2 would also lead to a better position for White, but how not to play 14. ♖f5!]

14... ♗f8 Probably Black has nothing better. [At 14... ♗xd2 15. ♖g7+ ♔e7 16. ♘xe6 ♔xe6 17. ♗g4+ followed by ♖xd2 leads to a win of material.; After 14... gxf5 15. exf5 the game would be over as well.]

15. ♗e3 I am not sure about this move now. Maybe White should have tried to continue with 15. b4!, crushing Black on both flanks

15... ♔c7 Black has no moves, but the position is still very solid and far from being lost.

16. f4 Gunina tries to open the position.

16... exf4 [16... 0-0-0! would have been probably the best way to play for Black. The position is still better for White, but it is very complicated.]

17. ♗xf4 ♘fe5 Black got a very strong knight on e5, but is still way behind in development.

18. ♘d4 ♗c5 Black is almost forced to give up the bishop — which usually is a bad idea because the dark squares become very weak now. [A logical move like 18... ♗f7 19. ♔h1 ♗e7 can be crushed by 20. ♗g4! and White is penetrating Black's position.]

19. ♔h1 ♗xd4 20. ♖xd4 0-0 21. ♔d2 Black has survived so far, but White has the bishop pair and is dominating the only open file — this gives her a clear advantage.

21... ♖ae8

22. b3! Silent but very strong. White wants to play ♖d6 next.

22... ♔a5 23. ♖d6 ♘c5? This is a blunder, but Black's position was very hard to play anyway. There is no concrete plan and White's threats are getting more and more dangerous. Maybe Black's only idea could have been to play 23... ♖f7 followed by ♘f8, trying to be super tight.

24. ♗h6 A nice starting move to a combination.

24... ♖f7

25. b4!! Quite typical, but very nice...

25... ♔xb4 26. ♖d8 ♖fe7 The only move.

27. ♖xf6 White wants to play ♖f8 next with mate.

27...♘cd7 28.♘d5! The final move of the combination that started with 24. ♖h6. Very beautiful!!

28...♔a3 A lot of moves win now for White, but Gunina chooses the most spectacular one. [This leads directly to mate: 28...♔xd2 29.♘xe7+ ♔h8 30.♖xe8+]

29.♔a5! Finishing the game on the spot!

29...♔d6 30.c5 A very nice game by White!

1-0

(4) Smirin,Ilia (2659) – Tratar,Marko (2512) [C16]

Skopje MKD, Karpos Open 2013 r_3

Skopje MKD (3.2), 10.03.2013

[Arkadij Naiditsch]

A nice win in the French Defense was seen at the fifth round of the Karpos Open. During the first moves, it seemed like Black managed to equalize, but White kept a small strategic advantage that Smirin converted in a nice mating attack.

1.e4 e6 2.d4 d5 3.♘c3 ♖b4 4.e5

4...b6 This is a rare line. The basic idea is to exchange the light-squared bishops as soon as possible, which is quite logical for Black. The structure with e6-d5 weakens greatly the bishop on c8. The big disadvantage of this line is that White gets a big lead in development and more space in the center due to the pawn structure.

5.♘f3 Another very rare move by White... [5.a3 ♖xc3+ 6.bxc3 White wants to play ♔g4 next... 6...h5 would be the main line.]

5...♔d7 The idea of this move is to avoid the following line. [The tempting 5...♙a6?! would not be the best because of 6.♙xa6 ♘xa6 7.♔d3 and White wants to play at 8.♕b5 after 7...♘b8?, winning a piece.]

6.♙d2 At first sight, it is quite unclear why White made this move, but very soon we will see why it was quite a cunning way to play.

6...♙a6 Using the moment in which White cannot play ♔d3 any longer. [In case of 6...♙xc3 7.♙xc3 ♙a6 White is doing better again because of 8.♙xa6 ♘xa6 9.♔d3 forcing the Black knight to go back to b8. 9...♘b8 10.h4 with better play for White, even though the position is far from clear.]

7.♙xa6 ♘xa6

8.♘e2! And here White's idea comes to live. Now Black cannot exchange the b4 bishop for the knight on c3 any longer, which usually is a good thing for him.

8...♙xd2+ 9.♔xd2 Let us have a fresh look at the position. White's space advantage plus the typical idea of ♘f4-♘h5 can be dangerous for the Black king. As well, Black's play with c5 can only come to live with ♘b8-♘c6,

which once again loses two big tempos. On the other hand, the material is equal, Black got a solid pawn structure and any further exchange would make the position more equalized. All in all, White is a bit better here, but nothing too dramatic has happened.

9...♘e7 10.♘f4 The Black knight wants to reach the h5 square.

10...♘g6 A risky move... [10...g6 looks ugly, but maybe is not a stupid move. White is getting a new idea — to play h4 -, but Black could castle long... This would not solve all Black's problems, but the position would remain quite safe.]

11.♘h5 0-0

12.h4! White does not hesitate and starts to play quickly against Black's king. The threat is to play ♘g7 next, and this is not an easy one to avoid.

12...c5 [If Black would try to use a direct defense against ♘xg7: 12...♖fc8 13.♘xg7 seems to work still. 13...♔xg7 14.h5 ♘e7 15.h6+! An important move, but not a difficult one to find for a strong GM. 15...♔g8 (15...♔h8? loses to 16.♕g5 ♘f5 17.♕f6+ ♔g8 18.g4+-) 16.♕g5+ ♘g6 17.♕f6

♔f8 18.♘g5 White is collecting a second pawn on h7 and the mating attack goes on. This is clearly more than enough compensation for a piece.]

13.♘xg7 ♔xg7 14.h5 Black is already in big danger. White wants to play hxg6 followed by ♔h6.

14...♖h8 15.hxg6 hxg6 16.0-0-0! I think Tratar blundered this move. Black's king is under attack and the knight on a6 is very far away to help in the defense. This cannot be good...

16...♔e7 17.♔f4 It is hard to give Black advice here. White has several plans. We will see one of them now, and the second one could be just to play ♘h2-♘g4 next.

17...♖af8 A safe move, but White finds a nice way to take advantage of the unlucky position of Black's rook on f8.

18.g4! Another very nice move by Smirin. White wants to play g5 followed by ♔f6.

18...f5 What else to do...

19.gxf5 ♖xf5 20.♔g3? White misses a way to finish the game immediately. [20.♖xh8! Easy but beautiful. 20...

♔xh8 (20...♖xf4 21.♖dh1 and ♖1h7 next.) 21.♖h1+ ♔g8 22.♔g4 with a mating attack.]

20...♖fh5 21.♖xh5 ♖xh5 22.♖g1 ♔f7 23.♘h4 ♖h6 Black managed to avoid to lose on the spot, but the position is very bad.. . White has to take his knight from h4 to g5, after which the game should be over.

24.f4 ♘c7 [24...cxd4 25.♘f3 does not help Black either...]

25.♔b1 There is absolutely no hurry. Black is totally paralyzed.

25...♘b5 26.c3 ♘c7 Probably Black was also in time-trouble.

27.♔g5 ♔h7 28.♔d8 Followed by ♘f3. All in all a nice positional win by White!

1-0

Endgame section

(15) Galliamova,A (2459) — Javakhisvili,L (2464)

World Women Teams, 09.03.2013

[Chess Evolution]

Black has simplified her clear advantage to this endgame, which she thought should be easily winning as the knight is trapped on b1. Also, it looks like if White tries to play ♖d2 or ♖c3, the pawn endgame will be winning because of the side passer on the b-file. However, reality is completely different...

49.h3 A logical attempt by White to place the pawns on light squares, opposite to the dark squared bishops.

49...♔f6 [It would have been a very tricky attempt to play 49...g4!? fixing the on the dark squares. White has many possibilities, but only one of them seems to lead to a draw.

50.♔g2! (50.h4? is bad because Black can play the same way as in the game, but now White cannot create a passed pawn on the kingside. 50...♔f6; 50.hxg4? is also bad because it opens a path for the Black king to penetrate in the center. 50...fxg4 51.♔f1 ♔f6 52.♔e2 ♔f5 53.♔d3 b5! and White is in zugzwang, the king is coming to e4 and decides the game.) 50...♔f6 51.f3! This is the correct defense! White undermines the g4 pawn and creates counterplay on the kingside. 51...gxf3+ 52.♔xf3 The game should be draw because Black cannot transfer his king to the kingside, because of the ♔f4-g5 or g4 plans...]

50.g4! Well played! Putting another pawn on a light square.

50...♔e6 [50...f4!? would have been the last serious attempt to win the game. White must play very carefully. 51.♔f1 fxe3 52.fxe3 ♔e6 The king is heading to breakthrough on the queenside. 53.♔e2 ♔d6 54.♔d3 ♔c6

55.♔c2! White must lure the Black king to a4 and then create her own passed pawn with e4. (55.♘c3? is an instructive mistake, which would prove the victory of Black's strategy. 55...♙xc3 56.♔xc3 b5 57.♔b3

57...♔b7! Black has to play ♔b6 when the White king is on b4. So the plan is to go a6-a5, forcing White to play ♔b4 and then ♔b6. 58.♔a3 ♔a6! 59.♔b4 ♔b6 60.♔b3 ♔a5 61.♔a3 b4+ 62.♔b3 ♔b5 and the Black king gets access to collect the e3 and d4 pawns.) 55...♔b5 56.♔d3! ♔c6 Black should turn back and settle for a draw, as the winning attempt with ♔a4 can only create problems for himself.(56...♔a4 57.e4! dxe4+ 58.♔xe4 ♔b3 59.♔d3 ♔b2

60.♘d2 and suddenly the d-pawn is much more dangerous than the b-pawn.)]

51.♔f1 ♔d6 52.♔e2 ♔c6 Black follows her original strategy to invade on the queenside and stays ready to enter into a pawn endgame.

53.♔d3 ♔b5 54.♘c3+! Probably this move came as a surprise for Black, but White has evaluated the arising endgame much deeper.

54...♙xc3 55.♔xc3 ♔a4 Black thought everything was under control and the win should be the same as in the 50...f4 line, when White played 55.♘c3. However, now the pawn structure is different and we have a different story...

56.♔b2! Galliamova had to prevent ♔a3 before starting her counterplay on the kingside.

56...♔b4

57.f4! Suddenly, White is breaking through. As it usually happens after such a shocking move, Black immediately collapses. However, with an only move, Javakhisvili could have saved the game.

57...gxf4? [57...fxg4! 58.hxg4 ♔c4! was the right move.

a) 58...gxf4? loses after 59.exf4 ♔b5 60.f5! gxf5 61.g5! The standard breakthrough. 61...f4 62.♔c3+- White's king is close enough to stop the f-pawn and the g-pawn will promote soon.;

b) 58...♔b5!? seems to hold as well, although it looks very suspicious. 59.♔b3 ♔c6 60.♔b4 ♔b7 61.♔b5 ♔c7 White can never push f5, since the Black king is too close to catch it. fxg5 makes no sense because those doubled pawns have no value at all. White has nothing better than retreating with the king and settle for a draw. 62.♔b4 (This only causes problems for White: 62.♔a6? ♔c6 63.fxg5 ♔c7 64.♔b5 ♔b7 65.♔b4 ♔a6) ; 59.f5 gxf5 60.gxf5 g4 61.f6 g3 62.f7 g2 63.f8 ♖g1 ♖g1 and the draw is inevitable.]

58.exf4 ♔c4 59.gxf5 gxf5 60.h4 ♔xd4 and Black cannot catch the h-pawn, while the d-pawn is too slow.

61.h5 ♔e3 62.h6 1-0

(16) Georgiev,Kiril (2657) – Dvirnyy,Danyil (2530) [D30]

Skopje MKD, Karpos Open 2013 r_4 Skopje MKD (4.7), 11.03.2013

[Chess Evolution]

This rook endgame looks like a complete draw, but it is a wrong impression. Because of the weak Black pawn on e4 and the king on f8, White still has quite a few winning chances, and as we all know, it is very easy to go wrong in rook endgames.

37.♔g2 h5! To exchange a pawn is usually a good idea. [If Black tries to push his b-pawn immediately 37...♖b1 38.h4! looks very strong. Now the threat is h5 followed by ♔g3-♔f4. 38...g5 39.♖h7 and White is already winning a pawn.]

38.gxh5 Maybe this is the best try to continue the game... [Now to play 38.h3 hxg4 39.hxg4 g5 looks quite close to a draw.]

38...♖g5+ 39.♔h1 ♖f5 40.♔g2 ♖g5+ The time trouble is over and White has some time to think about some winning attempts...

41.♔h3! The only chance...

41...b5 [the greedy 41...♖xh5+ 42.♔g3 would give the White king the possibility to go to the f4 square, which can always give Black a lot of problems.]

42.♖b7 What does White want now?!

42...♔e8 43.♔h4 ♕f8 44.h3 First, White improves his position to the maximum.

44...♔e8? Not a good decision. [44...♔g8! A tricky move to find, but Black needs to play precisely to reach a draw. 45.♖e7 ♕f8 46.♖xe4 It seems like Black just lost a pawn, but 46...♔f7! might save the game. Probably, White will need to wait for Black's b4 and then play d5. After this, the arising rook endgame should be very close to a draw.]

45.d5! Exactly! The g7 pawn is falling.

45...♖xd5 46.♖xg7 ♖g5! Good move. Black needs to get rid of the White rook on g7.

47.♖b7 ♕f8 In the next moves, White will test Black... There is no need to hurry in a better position to use the "last winning attempt". Your opponent might make a mistake.

48.♖d7 ♔g8 49.♖e7 ♖e5 Of course. Black does not give the e4 pawn away.

50.♖d7 ♖g5 Once again, White has no ♔g4.

51.♖b7 ♔f8 52.h6 Finally White is starting some action.

52...♔g8 53.♖e7 b4 [In case of 53...♖e5 54.♖g7+ ♔h8

55.♔g4! the White king escapes from the h4 prison. 55... b4 (55...♖g5+ 56.♖xg5 fxg5 57.♔f5 b4 58.♔xe4 and White's king is in time to catch the b-pawn.) 56.♖b7]

54.♖b7 ♖f5 Black is trying to get at least the f2 pawn. But it is already too late...

55.♔g4 ♖xf2 56.h7+ ♔h8

57.♔h5! Exactly! The Black pawn on f6 is disturbing the defense. The normal defense would be to check White on the 6th, which now is impossible

57...♖c2 58.♔g6 ♖c8 59.♖xb4 The bad news for Black is that White will collect all the pawns now, and if Black manages to get a rook endgame with h+e pawns, it would be simply lost.

59...♖f8 60.♖xe4 f5 61.♖f4 And the f5 pawn is falling as well...

61...♖e8 62.♖xf5 What a great technique shown by Georgiev!!

1-0

Clash of the Titans

(17) Fischer, Robert James (2785)
— Spassky, Boris V (2560) [C95]

St Stefan/Belgrade m Belgrade (1), 1992

[Kamil Miton]

1.e4 e5 2.♘f3 ♘c6 3.♙b5 a6 4.♙a4 ♘f6 5.0-0 ♙e7
6.♖e1 b5 7.♙b3 d6 8.c3 0-0 9.h3

9...♘b8 The Breyer, a very solid system against the Ruy Lopez, which was popular many years ago as well.

10.d4 ♘bd7 11.♘bd2 ♙b7 12.♙c2 ♖e8 13.♘f1 [Another setup for White is: 13.a4 ♙f8 14.♙d3 c6 15.b3 g6 16.♖c2 ♙g7 17.♙b2]

13...♙f8 14.♘g3 g6 Both sides play typical maneuvers in this position.

15.♙g5!? White is provoking the h6 move to win a tempo later, after ♖d2 or ♖c1.

15...h6 16.♙d2 ♙g7 [16...exd4 17.cxd4 c5 This was the plan that Spassky used in his next games against Fischer. 18.d5± X ♙b7]

17.a4!? A typical move with the idea of getting space on the queenside.

17...c5 Black had a few other possibilities like 17...♘b6; 17...exd4 18.cxd4 c5; or 17...c6.

18.d5 c4 19.b4 I like this move. The idea is to take control of the c5 square. In case of 19... cxb3, White will get the initiative on the queenside.

19...♘h7 [19...cxb3 20.♙xb3 ♘c5 (20...♖c8 21.axb5 axb5 ♖b6 23.♖eb1 ♖a8 24.♙a4 ♙a6 25.c4±) 21.c4! bxc4 (21... bxa4 22.♙xa4 ♖e7 23.♙b4± This structure is also good for White. Black gets the c5 square, but on the other hand, gets some disadvantages like: two very bad bishops, potential weaknesses on a6 and d6, many pieces to move in a small space. One of White's plans might be to kick the knight from c5 after transferring his knight to b3 and the rook to b5. The bishop on b4 is already on a good square.) 22.♙xc4± Thanks to his space advantage and the limited Black bishops, White's position is stably better.]

20. ♖e3 h5 21. ♔d2 ♖f8 Black should try to look for an f5 push at some moment, but it is not an easy task because White's pieces are well placed to prevent this (♙c2 and ♘g3.)

22. ♖a3 The beginning of a plan to take control of the a-file.

22... ♘df6 A strange move, why not? [22...h4 23. ♘f1 f5 and the position becomes complicated.]

23. ♖ea1 ♔d7

24. ♖1a2 ♖fc8 25. ♔c1 ♙f8 26. ♔a1 If I remember well, the first player that discovered this setup with the heavy pieces was A. Alekhine.

26... ♔e8 27. ♘f1! Fischer starts his nice maneuver.

27... ♙e7 28. ♘1d2 ♔g7 29. ♘b1 Nice motif. The threat now is to exchange pieces on the a-file and play ♘a3 to grab the b5 pawn.

29... ♘xe4!? Practical decision. Spassky understands that a passive defend cannot be promising and changes the character of the position. [29... ♘d7 30. axb5 axb5 31. ♖xa8 ♖xa8 32. ♖xa8 ♔xa8 33. ♔xa8 ♙xa8 34. ♘a3+-]

30. ♙xe4 f5 [30... ♘f6!?!-]

31. ♙c2 ♙xd5 For the piece, Black has two pawns and a strong center. However, objectively it is not enough. Fischer will convert his advantage masterfully.

32. axb5 axb5 33. ♖a7 A rook on the 7th rank is always dangerous.

33... ♔f6 34. ♘bd2 ♖xa7 [34...f4 35. ♘e4+ ♙xe4 36. ♙xe4+-]

35. ♖xa7 ♖a8

36.g4! The idea of this good move — which is basic on some calculations — is to destroy Black's structure.

36...hxg4 37.hxg4 ♖xa7 [37...fxg4 38.♘h2+-]

38.♔xa7 f4 [38...♙c6 39.♘h4+-; 38...♔a8 39.♔xa8 ♙xa8 40.gxf5 gxf5]

41.♘h4! e4 After this move, White takes control of the useful squares d4 and f4, so should easily win the game. (41...f4 42.♙xh7 fxe3 43.fxe3 d5 with some hope to exchange the last pawns.) 42.♘f1 ♙c6 43.♘g3 ♙d7 44.♘g2±]

39.♙xf4 Fischer gives the piece back and thanks to this, he gets a decisive initiative. [39.♙b6 should also be enough.]

39...exf4 [39...♙xf3 40.♘xf3 (40.♙xe5+→) 40...exf4 41.♔d4+ ♔f7 42.♔xf4+ ♔g7 43.g5↑ and White's pieces are stronger.]

40.♘h4 ♙f7 [40...♘f8 41.♔d4+ ♔e6 42.♘xg6 ♘xg6 43.♙f5+ ♔f7 44.♔xd5+ ♔g7 45.♘e4± White is dominating thanks to his active pieces and the weak Black pawns on the queenside.]

41.♔d4+ ♔e6

42.♘f5 ♙f8 43.♔xf4 Many weaknesses, a vulnerable king and the uncoordinated pieces do not allow Black to fight anymore. White's position is simply winning.

43...♔d7 44.♘d4 ♔e1+ 45.♔g2 ♙d5+ 46.♙e4 ♙xe4+ 47.♘xe4 ♙e7 48.♘xb5 ♘f8 49.♘bxd6 ♘e6 50.♔e5 1-0

Editorial Preface

The Candidates Tournament — all the eyes are there!! We are seeing great chess in London, with very high level games and a fantastic fighting spirit. All the players want to win, there is no doubt.

After 6 rounds, Levon Aronian and Magnus Carlsen are leading the event. This is not really surprising. Maybe Vladimir Kramnik could have fit into the trio, but until now, this has not been his tournament.

It is going to be very exciting to see who will be the “last man standing”. Carlsen’s chances are higher, but I do not expect him to receive any presents.

What is sure is that we will keep our eyes on the event and take the best moments of it into the usual issue of CEWN.

In the current one, You will be able to already find well commented games from the Candidates.

Enjoy the CEWN Nr 56.

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Carlsen, Magnus (2872) — Grischuk, Alexander (2764) [C65]

FIDE Candidates London (4), 19.03.2013

[Arkadij Naiditsch]

When Carlsen is in good shape—and generally he is—can somebody stop him?! A game like the one we will see now makes Super-GMs like Grischuk look like a player of a totally different level. It is really amazing how Carlsen is crushing his opponents again and again in almost equal positions.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 ♘f6 Grischuk chooses the Berlin, one of the most solid openings at the “chess market”.

4.d3 Carlsen is not going for the endgame where, at the moment, Black is doing fine.

4...♙c5 5.c3 [5.0–0 ♘d4 is a very well analyzed line. The position is about equal.]

5...0–0 6.0–0 d6

7.h3 One of the most popular moves. Others are 7.♘bd2 and 7.♙e1.

7...a6 [7...♘e7 was also played lately in a lot of games.]

8.♙xc6 bxc6 9.♙e1 White wants to play d4.

9...♙e8 Black is preparing against this move.

10.♘bd2 d5! seems to be a very interesting opening decision by Grischuk! He is not waiting for White's d4, but instead taking the initiative in his own hands. Black now gets a horrible pawn structure, but the bishop pair and his very dynamic play makes the position very exciting.

11.exd5 ♙xd5 12.♘b3 As we can see, Black's pawn structure is just horrible, but he wants to play ♙f5 quickly now.

12...♙f8 13.c4 White needs to act!

13...♙d6 14.♙e3 White wants to play ♘c5-♘e4 or just ♙c5 next.

14...♘d7! A great move by Grischuk. It looks like Black just killed his own bishop on c8, but things are much more complicated. Black wants to play c5 followed by f5, taking over the center. The Black bishop will have a very nice square on b7. [It does not work to play 14...♙f5? 15.♙c5! and in exchange of the pawn on d3, White gets the one on e5, with a much better position.]

15.d4 Not allowing Black to play c5.

15...e4 A very logical move by Black. The position is getting super sharp... [15...exd4 16.♙xd4 would just lead to a slightly worse position for Black...]

16.♘fd2

16...a5! Another very good move by Black. By forcing White to play a4, Black always gets a lot of play on the b-file.

17.a4 White needs to stop Black from playing a4.

17...f5 A very tricky move... Now the game becomes really concrete. [Why not just to play the silent 17...g6 Black wants to play f6 next. In case of 18.g4, I cannot imagine White being better in this endgame. The knight on b3 is very badly placed.]

18.c5 Carlsen is going for the a-pawn. White wants to play c4-bxa5.

18...g6? A very big mistake by Grischuk! He is simply losing a full tempo... [18...e6! would have been the right choice. Now White needs to lose a tempo with c4. 19.c1 f6 20.c4 d5 and even though White will win the a-pawn, position remains very unclear. Black will start a big attack on the kingside.]

19.c4 f6 20.f4 blocking any f4 ideas by Black...

20...d5 21.d2 Now it is very hard to give an advice for Black. White just wants to win the a-pawn and play b4.

Black's idea should be connected with g5 at the right moment, but the queen on g6 is very badly placed to do this.

21...e6 22.bxa5 eb8 Black is trying to consolidate his pieces, but it is already too late.

23.e5 f6 24.h2 [It would also lead to almost a winning position to play 24.exd6 f4 25.f4 b2 26.c1! and Black's rook has no good place to retreat.]

24...xa5! In deep time trouble, Grischuk finds a good practical chance to complicate the game.

25.xa5 xb2 Looks funny, but to win here, White needs to be quite precise!

26.ab1 Correct play — what else to expect from Magnus Carlsen?

26...a2

27.a6! Very very strong! Giving Black no chances at all. [Less precise would be 27.b8 e3! Black's only idea. 28.fxe3 g5 29.g3 g6! and because of the super strong rook on the 2nd rank and the very bad bishop on h2, Black keeps some practical chances.]

27...e3 Black does not have any other try here either.

28.fxe3 ♖g5 29.♔e2! White gives back the exchange, but his position is still almost winning.

29...♘xe3 [Black cannot save himself by playing 29... ♖xe2 30.♖xe2 ♘c3 31.♖d3 ♘xb1 and now 32.♘f3! The Black queen has to leave. 32...♖h6 33.♙f4 followed by ♖xb1 with a winning position.]

30.♘f3 The usual ♘f3 is very very strong.

30...♖g6 31.♖xa2 ♙xa2 32.♖b2 Black is simply an exchange down in a hopeless position.

32...♙c4 33.♖a5 ♙d5 34.♖e1 The rest is almost too simple for the World's Number 1.

34...f4 35.♙xf4 ♘c2 36.♖f2 ♙xf3 37.♖xc2 Another great game by Carlsen where he used every mistake made by his opponent!

1-0

(2) Radjabov,Teimour (2793) – Ivanchuk,Vassily (2757) [A88]

London London ENG, 16.03.2013

[Csaba Balogh]

After the first three rounds, it looks like Ivanchuk's strategy is to surprise his opponents by playing openings with bad reputation. He ends up in bad positions, but what is even a bigger problem is that he spends all his time in the middlegame. He lost on time in the 2nd and 3rd round, and both on move 34! The position was already lost in both cases anyway. It might also be disturbing for him that, recently, almost all the tournaments are played with 30 seconds increments after each move, but here the players do not have this extra time, which makes the time trouble much more dangerous. But of course, all these things do not deduct anything from Radjabov's great play!

1.d4 d6 2.♘f3 g6 3.c4 f5 Black chose the Dutch defense, which is quite rare on the highest level. We can see it only played by Nakamura from time to time.

4.♘c3 ♘f6 5.g3 The g3 system is considered to be the most dangerous setup.

5...♙g7 6.♙g2 0-0 7.0-0 This is the starting position of the Dutch, Leningrad variation. The main lines are 7... ♖e8, 7...♘c6 and the text move, but Black has many side possibilities as well.

7...c6 Radjabov's reaction — which is not a novelty — seems to cause real problems against this 7...c6 system.

8.♖b1! This is an absolutely standard plan. White intends to push b4-b5.

8...♘e4 9.♙c2! This move, followed by the next recapture, seems to be really strong, but it is already well-known, since Kramnik defeated Nakamura in 2010. White does not threaten to take on e4 twice, because ♕f5 is coming at the end, however, he simply wants to continue his plan with b4-b5 after protecting the c3 knight. [9.♘xe4 fxe4 10.♘e1 d5 would be Black's idea.]

9...♘xc3 [9...♘a6 could be met with 10.b4]

10.bxc3! A great idea! The point is that Black's only plan in such positions to jump out from his cramped position is to push e5, but then the bishop is going to be extremely unpleasant on a3. [After the "normal" 10.♙xc3 Black gets a fine position with 10...e5! White cannot capture the pawn twice because then, he even gets into an inferior position. 11.dxe5 dxe5 12.♘xe5 ♘d7 13.f4 ♙e7 ♗ wins back the pawn!]

10...e5 Black has to play this even if it is bad. Otherwise, he must suffer during the whole game with a lack of space.

11.dxe5! A logical novelty to open the position. Both the bishop on a3 and the rook on d1 develop with tempo. [11.♖d1 happened in the mentioned Kramnik game. That continued with 11...e4 12.♘g5 h6 13.♘h3 g5 14.f3 d5 15.♘f2 ♔h8 16.cxd5 cxd5 17.c4 White succeeded to undermine the strong center and got an advantage, but the text move seems to be even stronger.]

11...dxe5 12.♙a3 ♖f7 13.♖fd1 Everything is nice, but the key is the next move that fights against Black's center. All the Black moves are met with the same reaction!

13...♙e8 [13...♖d7 14.e4!; 13...♘d7 14.e4! f4 15.♙h3! Black has no adequate defense against ♙e6. 15...fxg3 16.♙e6]

14.e4! Fighting against Black's center and preventing the e4 idea, which could be followed by ♖d7-e5.

14...f4! This is always the critical reaction in such situations. Black must try to keep the position locked. [14...fxe4? weakens all the squares after 15.♗g5 and ♖xe4.]

15.♖d3 White leaves from the ♗g4 pin and doubles his rooks to penetrate on d8. [15.♗g5 might have been even stronger. 15...♖d7 (15...♖f6 16.♖d3 is similar to the game.) 16.♖xd7 ♗xd7 17.c5! and the threat of ♔b3 followed by ♗f7 or ♗e6 is crucial.]

15...fxg3?! This is a sad decision. I am sure that Ivanchuk was quite unhappy to take on g3. Black should have kept the tension somehow to have potential threats in the future with a f4-f3 push. This could have been achieved by ♗g4 or h6-g5-g4, but both seem to be too slow now. [15...♗g4 leaves the b7 pawn alone. It is refuted by 16.♔d2! ♗a6 17.♗g5 with serious problems for Black.; 15...♗a6 is refuted by 16.♗g5 ♖d7 17.♖xd7 Sadly, the bishop cannot take because of the b7 pawn. 17...♔xd7 18.♔b3 with the double threat of c5 and ♗h3, followed by ♗xc8 and ♔xb7.; 15...h6 was probably the only move, but White is better anyway.]

16.hxg3 ♗a6 17.♗g5! The rook has no good square to go. [17.♖bd1 is a mistake now because of 17...♗g4]

17...♖c7 [17...♖f6 18.♔d2! is similar to the 15...♗a6 line. Black has problems as he cannot cover the back-rank by developing the c8 bishop, because of the b7 pawn.; 17...♖d7 18.♖xd7 ♔xd7 19.♔b3 again with the double threat of c5 and ♗h3-c8 with ♔xb7.]

18.♗d6! ♗f6 Black sacrifices an exchange, but of course, he does not have enough compensation for that. Radjabov finds an even stronger plan than taking it... [18...♖d7 loses to 19.♗h3 ♖d8 20.c5 and ♔b3 is a decisive and unavoidable threat.]

19.♔d2 [19.♗xc7 ♗xc7 20.♗f3 ♗a6 was, of course, also fine for White, but Black might hope for compensation on the dark squares.]

19...♖d7 [19...♖g7 is refuted by the same brilliant that we will see in the 21st move of the game!]

20.♗h3 ♖g7 [20...♖xd6 21.♖xd6 ♗xg5 22.♔xg5 ♗xh3 23.♖xb7 Black gets mated. He cannot parry the threats of the heavy pieces.]

21.♗xe5!! This brilliant motif was the point of why Radjabov did not take the exchange on c7. White wins a decisive amount of material, using the weakness of Black's back-rank. Ivanchuk finds the best chance to stay in the game by sacrificing his queen.

21...♗xe5 [21...♔xe5 22.♖d8+! ♗xd8 23.♔xd8++-; 21...♗xg5 22.♔xg5 ♗xh3 23.♗xg7 ♗xg7 24.♖xb7++-]

22. ♖d8 ♗xh3 23. ♖xe8+ ♖xe8 24. ♘xh3 Black's bishop and rook are clearly not enough for the queen and pawn. White is winning. The game goes to the technical phase.

24... ♘c5 25. ♕e3 ♗d6! Otherwise, White will squeeze with f4-e5! [25...b6 26.f4+-]

26.f3 ♘e6 27. ♖g2 After leaving from ♗c5, White is ready to push f4-e5, so Black has to play

27...g5 28. ♘f2 h5 A desperate attempt to create counterplay. In this position, Ivanchuk had around 10 seconds left for the remaining 12 moves (there were no 30 seconds increments), so it was hard to take it seriously anymore from White's point of view... [28...♘f4+ is just a check. White is not forced to take. 29. ♖f1 ♘h5 30. ♕xa7 ♘xg3+ 31. ♖g2+-]

29. ♕xa7 ♗c5 30. ♕a4 ♖f8 [To generate counterplay with 30...g4 fails to 31.f4! ♗xf2 (31...h4 32. ♘d3+-) 32. ♖xf2 ♘c5 33. ♕a5 ♘xe4+ 34. ♖g2+- The queen is too strong.]

31. ♘d3 h4 White has many different ways to win.

32. ♕a5 [The computer suggests 32. ♘xc5 as the best. 32...♘xc5 33. ♕a7 and it is not afraid of 33...g4 34. ♕xc5 gxf3+ 35. ♖f1 hxg3 36. ♕d6+- and the pawns only look dangerous, but the king and rook stop them. White soon will start to advance his e-pawn.; 32.e5+-]

32...b6 33. ♖xb6?? A huge blunder, which could have allowed a miraculous defense for Ivanchuk, although it was very hard to find even with 30 minutes on the clock — with only 2 seconds for 8 moves, it is impossible. Radjabov cannot be criticized for this mistake because even though he starts to give up his pieces one by one, he is winning on time. [33. ♕a4! was winning.]

33... ♗xb6 [33...g4!! could have saved Black. 34.f4 (34.fxg4 ♖xg4 35. ♖xc6 (35. ♘xc5 leads to a perpetual check. 35...♖xg3+ 36. ♖h2 ♖f2+ 37. ♖h1 ♖f1+) 35...♖xg3+ 36. ♖h2 ♗g1+ 37. ♖h1 ♗e3 and White cannot prevent ♖f1, which is followed by, at least, a perpetual check. 38. ♕h5 ♖f1+ 39. ♖h2 ♗g1+ 40. ♖h1 ♗e3±) 34...h3+ 35. ♖h2 (35. ♖f1 ♖h7 and the h-pawn is running.) 35...♖d8! (35...♖d7! leads to the same!)]

36. ♘xc5 ♖d2+ 37. ♖h1 ♖d1+ 38. ♖h2 ♖d2+ 39. ♖g1 Otherwise, the king goes to f2 and Black has only a few more checks, but h survives here as well. 39...h2+! 40. ♖h1 ♖d1+ 41. ♖xh2 ♖h7+ The other rook joins the attack and Black reaches a perpetual check by force. 42. ♖g2 ♖d2+ 43. ♖g1 ♖d1+ 44. ♖f2 ♖h2+ 45. ♖e3 ♖e1+ 46. ♖d3 ♖d1± That could have been amazing and shocking from Radjabov's point of view, but the time was a decisive factor.]

34. ♖xb6 hxg3 Black lost on time, but the position is also winning. For instance, after 35. ♕xc6 ♘f4 36. ♖xg3 ♘xd3 and 37. ♕d5 wins the knight. A nice win by Radjabov and, hopefully, Ivanchuk will regenerate after the free day.

1-0

(3) Giri, Anish (2730) – Bartel, Mateusz (2635) [A13]

Schachbundesliga 2012/2013 (11.1), 16.03.2013

[Csaba Balogh]

A very interesting tactical fight where White succeeded to over-calculate his opponent.

1. ♘f3 ♘f6 2. c4 e6 3. g3 a6 Bartel likes this kind of slightly unusual systems. Black intends to play b5 and fianchetto his bishop. White's next move is made against this plan and is basically a novelty.

4. e3!? It is quite funny that after g3, White plays e3, but in the modern chess we cannot be surprised about anything. White delays ♗g2 to avoid the b5 plan and intends to finish the development on the queenside first. [4. ♗g2 b5 is the beginning of the main lines.]

4...d5 5. b3! White needs to protect the c4 pawn as he wants to put his bishop on g2. The other bishop will also be excellently placed on the other long diagonal.

5... ♗d6 6. ♗b2 0-0 7. ♗g2 White finally plays ♗g2. He wanted to decide where to develop the b1 knight according to the forthcoming arrangements of Black's pieces.

7...b5 8.0-0

8...bxc4 It is not logical to give up the tension if it is not forced, although, White's position was already preferable. [After 8... ♗b7 9.cxd5 exd5 White can choose between two tempting ideas: 10. ♗xf6!? I like this move a lot. White makes use of the c5 hole. (10. ♖c2 ♗bd7 11. ♘d4!? is another typical plan in such situations. White wants to settle his knight on f5 and if Black plays g6, the b2 bishop becomes even stronger on the a1–h8 diagonal.) 10... ♖xf6 11.d4! The best move for Black would be to retreat the b5 pawn to b6, but of course, it is not possible. To get rid of the c5 hole with 11...c5 seriously weakens the d5 pawn. 12. ♘c3!]

9.bxc4 ♘c6 [9...dxc4 It makes no sense to give up the center and create an isolated pawn on the c-file. 10. ♖c2!± with the direct winning threat of ♗g5, and if Black prevents it, ♗a3-c4 comes.]

10. ♗xf6! A really clever and concrete decision. White intends to put pressure on the d5 pawn. First, he eliminates its defender on f6 and then, with the knight on c3 and the bishop on g2, he forces Black to take on c4, which is a clear positional achievement, since it opens the h1–a8 diagonal and weakens Black's pawn structure.

10... ♖xf6 11.d4 [11. ♘c3! seems to be even stronger as 11...dxc4 drops an exchange after 12. ♘d4! ♘xd4 13. ♗xa8]

11... ♜b8! Black leaves from the bishop's diagonal. The win of the exchange shown in the 11. ♘c3 line does not work anymore.

12. ♘c3 dxc4 13. ♘d2! This was the basic idea of ♗xf6. White achieved a better pawn structure and his minor pieces are excellently placed.

13... ♘a5 Black tries to at least save his material advantage to compensate for the positional deficits, but his knight is going to be misplaced at the edge of the board. White cannot trap it, however — Black has ♗b4.

14. ♖a4 ♗b4

15.a3! Forcing Black to give up his bishop pair. [15. ♖ab1 would not force Black to play ♗xc3, which would be a better version for White in comparison to the game, after ♘e4. However, Black has 15... ♖e7! leaving from the ♘e4 idea.]

15... ♗xc3 16. ♘e4 ♖f5 17. ♘xc3 ♘b3! Black starts to create complications.

18. ♜ad1 To control the invasions on the d-file with ♘d2 and ♖d3.

18... ♖c2 Black would like to equalize in tactical fashion, but there are many hidden tactical resources in the position. [18...c5 is principled to get rid of the weakness, but Black does not achieve complete equality because of the strong 19.d5! and ♖xc4 next.; However 18... ♖a5!? was an option 19. ♖xc4 ♗d7 Black finished his development and intends to push c5 to equalize.]

19. ♖xc4 ♘d2 20. ♖xc7! This move needed precise calculation, but Giri is very good at it. [Probably Bartel expected 20. ♖e2 ♖xc3 21. ♜xd2 ♖xa3 22. ♜c2 White soon wins back the pawn and a draw would be the most logical outcome.]

20...♘xf1 21.♙e4! This was the point, and after the queen goes to the b-file, ♖b1 is coming. Black seems to be in trouble, although the computer suggests a surprising defense...

21...♖b7? An incredible idea, but unfortunately for Black, it does not work... [However, after... 21...♙b2! 22.♖b1 ♘d2! 23.♖xb2 ♖xb2 Despite being a pawn down and having a poor bishop on c8, the computer sees no problem for Black. Anyway, it is understandable that Black avoided this continuation.]

22.♙c5!! Giri finds the refutation to the previous mistake. White creates a new tactical threat with ♙xh7 and the f8 rook is hanging. [After the seemingly winning 22.♙xb7 Black's devilish idea was 22...♘xe3! 23.♙e4 It looks like the game is over, but (23.fxe3 ♙xb7 24.♙xb7 ♙xc3 is just fine for Black.) 23...♘d5!! and Black equalizes. 24.♙xc2 ♘xc7=]

22...♙b2 23.♖b1! ♙d2 [23...♘d2 is not the same as in the 21...♙b2 line. Now White wins after 24.♙xh7+! The move order is very important! (24.♖xb2? could met by the intermediate move 24...♘xe4! and the queen is hanging.) 24...♙xh7 25.♖xb2 ♖xb2 26.♙xf8+- wins.]

24.♖xf1! This is the most precise, but again, a tactical finesse had to be foreseen... Black cannot prevent ♙xb7 and ♙xh7 at the same time. [24.♙xb7 ♙xb7 25.♙xf1 also gives a big advantage, but Black gets some compensation on the light squares. 25...♙f3]

24...♖b2

25.♙xh7+! ♙xh7 26.♘e4! A necessary intermediate move. Otherwise, Black takes on c3 and protects the bishop on c8.

26...♙c2 27.♙xf8 ♙xe4 28.♙xc8 Now it is completely lost. Black is two pawns down and his pawns are hanging. He does not even have the typical counterplay against the king with h5-h4-h3.

28...a5 29.♙c5 a4 30.♙a7 Another pawn is falling.

30...f5 31.♙xa4 ♙h6 32.♙e8 ♖a2 33.h4 ♖xa3 34.h5 1-0

(4) Svidler,P (2747) – Kramnik,V (2810) [D35]

FIDE Candidates London ENG (1), 15.03.2013

[Arkadij Naiditsch]

A short, but very important draw for the evaluation of the line was seen in the first round. Svidler managed to get a very nice endgame advantage and spoiled it in just one move.

1.d4 ♘f6 **2.c4** e6 **3.♘c3** d5 The Classical Queen's Gambit.

4.cxd5 ♘xd5!?! An interesting move order! Black is avoiding the classical way to play...

5.e4 White has no choice but to fight for the center.

5...♗xc3 **6.bxc3** c5 **7.a3!?** It looks like Svidler is very well prepared. In case of [7.♗f3 cxd4 8.cxd4 ♖b4+ 9.♖d2 ♖xd2+ 10.♔xd2 0-0] would return to the line that usually appears in a different move order: 1.d4 ♘f6 2.c4 e6 3.♘f3 d5 4.♘c3 c5 5.cxd5 ♘xd5 6. e4...]

7...cxd4 **8.cxd4**

8...e5! This move is not a novelty, but anyway is a very nice way to proceed. If White manages to get the position with ♘f3-♖d3, Black would be slightly worse.

9.♗f3 [9.d5 ♖c5 followed by short castle and a quick f5 seems to give Black nice play.]

9...exd4 **10.♔xd4** ♔xd4 **11.♗xd4** and we are in an endgame. At first sight, the position looks very equal, but in only 6 moves, White will completely dominate the game.

11...♖e7 Of course, all of this is part of Kramnik's preparation, but why not to play first... [11...♖c5 hunting away the White knight from the great square on d4. 12.♗b5 (White can also choose 12.♖b2 0-0 13.♖c1 ♗d7 followed by ♖b6 and ♗c5-♗a4. In case of White's ♗f5, Black always has the very safe f6. It is hard to imagine White getting anything serious here...) 12...♗a6 13.♖f4 0-0 Black is already fully developed and the slightly misplaced knight on a6 will get quickly into the game through c5 in the future. In my opinion, the position looks pretty equal.]

12.♖e3! Very good move! The best position for the White bishop is on e3, which is not obvious at all. White has a deep plan regarding how to develop his pieces.

12...0-0 13. ♖c4 ♘d7 What could have been more logical than Kramnik's play?! He has castled short, and now the last bad piece — the knight on b8 — is coming into the game.

14. ♔e2 Of course. White keeps his king in the center.

14... ♘b6 [In case of 14... ♘c5 15. ♕d5! White has managed to put his bishop on the fantastic d5 square! It is clear that White is better here.]

15. ♖b3 ♕d7 Black is fully developed, but far away from having an equal position.

16. ♘f5! Peter continues playing great moves. Now Black faces a very difficult decision regarding whether to take.

16... ♕f6 [16... ♕xf5? 17.exf5 leads at first sight to a draw, but in fact, White has a huge advantage here. His idea is simple: to play g4-g5, creating huge pressure on the kingside supported by his bishop pair. The Black knight on b6 is in a very bad position and, of course, Black will not be able to exchange both rooks — one of them will always remain on the board.]

17. ♖ab1 ♖fd8 and we are at the critical moment of the game. White has a lot of great choices to continue the

game here: to play 18. ♖hd1, or maybe just an immediate 18.g4. It is clear that White's position is much better already.

18. ♖hc1? What a blunder by Svidler. He forgot that his rook on b1 has no squares...

18... ♖b5+! Kramnik does not miss his chance to escape.

19. ♔f3 ♕d3! and this is the point. White's rook from b1 only has the c1 square to escape.

20. ♖c2 ♖a6 Black wants to play ♘c4.

21. ♖b3 ♕d3 and as we can see, the position is suddenly just a draw.

22. ♖c2 ♖a6 23. ♖b3 What a pity for Peter Svidler! He almost spoiled Kramnik's tournament from just a slightly better endgame out of the opening!

Endgame section

(15) Gelfand, Boris (2740)
— Carlsen, Magnus (2872) [D52]

FIDE Candidates London ENG (3.3), 17.03.2013

[Chess Evolution]

27...♔xc8 We are at move 27. Everything looks equal, so probably a draw agreement will come soon. No way! White's position is much more dangerous than it looks. Black has very good winning chances. Let us take a look.

28.d5! White is exchanging his d-pawn — a very correct decision. Black wants to play ♔b7 followed by ♘g6-♘e7 and ♘d5, killing the f2 bishop.

28...exd5 29.♔xd5 During the next moves, Magnus will show us exactly how to handle such positions. ..

29...g6 securing the position of the knight on e6.

30.♔g2 ♘e6 31.♔f3 ♔g7 There is no reason to hurry because White has no direct drawing ideas.

32.a3 h5 Now Black wants to eventually play h4, so White is almost forced to play h4 himself, which weakens greatly the light squares.

33.h4 ♔c2 White's main idea here is to push f5, so Black stops him from doing it. Another idea for White is to exchange the queens, which would lead to an almost equal endgame.

34.♔b7 ♔a4 35.♔f3 By attacking the a-pawn, White is forcing Black's queen to leave the great square on c2.

35...b5! Black has no other ideas than to push his queen-side pawns. However, this is strong enough! The next Black moves are simple: a5, ♔c4, a4. We see the complete domination of the Black knight on e6 against the White bishop on f2.

36.f5! White has no time to waste.

36...gxf5 37.♔xf5 ♔xa3 38.♔xh5 a5 The position changes completely. The Black king is open, but his pawns on the queenside are just unstoppable. White's only hope to survive is to create something fast against the Black king, which is very difficult because of the "heroic" knight on e6.

39.♔g4+ ♔f8 40.h5?! In a difficult position, White chooses what might not be the best practical chance to fight for a draw. [40.♔h5 would have given White better chances. The idea is to put the queen on h8 before starting the advance of the h-pawn. But anyway, White still has a lot of work to do here in order to get the draw.]

40...♔c1! Very good move, stopping White's only idea — to play h6.

41.♔e4 b4 The Black pawns are coming closer...

42.♙e3 ♔c7 42...♔c8 also seems to lead to a much better position.

43.♔a8+ ♔g7! Very good move by Black. Before the exchange on d8, Black places his king on a better position than f8.

44.h6+ ♔h7 **45.♔e4+ ♔g8** As we can see, the Black king on g6 feels very safe! White almost has no attacking ideas and Black's pawns are getting closer...

46.♔a8+ ♔d8 **47.♔xd8+** This move loses by force, but it is hard to blame Gelfand for making this decision. [47.♔c6 would have kept the game going a bit longer, but the position just looks pretty lost for White in any case.]

47...♘xd8 **48.♔f3 a4** **49.♔e4** The White king tries to be on time to hold the Black pawns, but it is not...

49...♘c6! The last precise decision by Magnus. The game is over. White cannot stop Black from playing a3 followed by ♘a5-♘b3, winning a full piece.

50.♙c1 ♘a5 **51.♙d2** Gelfand tries the last trick...

51...b3 **52.♔d3 ♘c4** **53.♙c3 a3** and the game is over!

54.g4 ♔h7 **55.g5 ♔g6** White is in zugzwang. The bishop needs to leave the c3 square, which gives the Black knight the possibility to enter on d2.

56.♙d4 b2 **57.♔c2 ♘d2** Just a perfect play from Black, nothing to say about it. As we could see, the starting position was much trickier than it looked like!

0-1

(16) Aronian,L (2804) – Gelfand,B (2740)

London, 16.03.2013

[Chess Evolution]

The first win of the Candidates tournament was scored by Aronian. White has an extra pawn, but Black has all the hopes for a draw with the pair of bishops and the doubled b-pawns. Even in such a “dry” position, tactical elements might play a key role.

24...♙d8 A slightly dubious move. [24...♖c8 was much more logical as the exchange of the rooks would hugely increase Black’s defensive chances. White must leave the open file to maintain his advantage 25.♖a1! (25.♖xc8 ♙xc8 Without the rooks, all the opposite-colored bishops endgames would be just dead drawn.) 25...a6 (25...♙xe5 26.dxe5 a6 This is an instructive position. It seems like a dead draw, but the Black king is awfully placed, which gives White decent chances to convert his advantage. 27.♙g5! The bishop is going to f6. The next step will be to activate the rook. It could be most easily achieved by ♖a4 and invading through the 4th rank, for instance, with ♖b4. 27...h6 28.♙f6+ ♔h7 Black would like his king

to escape with g5 and ♔g6, so the next move is very important! 29.h4! and on 29...g5 Black tries to get his king out even by giving up a pawn, but White should not be greedy and play 30.h5! and ♖a4 is coming next.) 26.♘c4 White can continue pressing.(Or 26.♖a4 as Aronian pointed out at the press conference.)]

25.b4! with the idea of b5 and ♘c6, trying to make the doubled pawns more useful. Black makes a decisive mistake.

25...♖c8? [25...♙d5 should have been played, although White is better after 26.b5 and ♘c6 next.]

26.♙h6+!! An amazing trick, which was clearly missed by Gelfand. The game turns into a tactical battle.

26...♔g8 This is a sad necessity. The king now gets poorly placed and it becomes the main reason for Black’s quick collapse. [On 26...♔f6 White continues the hunt of the king with 27.♙g5+! Black is forced to take this time, but the endgame is hopeless. 27...♔xg5 28.♘xf7+ ♔f6 29.♖xc8 ♙xc8 30.♘xd8+- with two extra pawns.; 26...♔xh6 loses to 27.♘xf7+ ♔g7 28.♖xc8 ♙xc8 29.♘xd8+-]

27. ♖xc8 ♗xc8 28. ♘c6! Black must control the e7 square. He cannot reach the b6 square, which was the idea of 24... ♗d8.

28... ♗f6

29. b5! White blocks the a7 so it will not run away. It is important to keep the knight on c6 to paralyze Black's bishops. The king is also trapped. [After the greedy 29. ♗xa7 Black gets chances for survival. 29... ♗b7 30. ♗e3 The d4 pawn had to be protected, but it allows the king to escape. 30... ♗f8!]

29... ♗d7

30. g4!! Another brilliant move! Black has no good defense against g5, after which the f6 bishop has no good square to leave.

30... g5 [The saving idea 30... a6 misses by just one tempo. 31. g5! The bishop is trapped, since 31... ♗h8 is met with a nice mate. (31... axb5 drops a piece after 32. ♗b8! ♗xd4 33. ♗xd7 ♗xb2 34. ♗f8!+- The bishop gets activated after gaining a decisive material advantage.) 32. ♗e7#]

31. h4! It is obligatory for the win to get the pawn to g5, so the pawn sacrifice is justified!

31... gxh4 32. g5 ♗xc6 This is equal to resignation, but there was nothing better... [32... ♗g7 33. ♗xg7 ♗xg7 34. ♗xa7+- wins easily.]

33. bxc6 ♗d8 34. ♗g2 and White first collects the h4 pawn and then goes to the queenside to support the promotion of the c-pawn.

34... ♗c7 35. ♗h3 Black resigned. Great technique by Aronian!

1-0

Clash of the Titans

(17) Capablanca, Jose Raul — Lasker, Emanuel [D63]

World Championship 12th Havana (5), 29.03.1921

[Kamil Miton]

1.d4 d5 2.♘f3 ♘f6 3.c4 e6 4.♙g5 ♘bd7 5.e3 ♙e7
6.♘c3 0-0

7.♖c1 White is waiting for the dxc4 move in order not to lose a tempo to recapture the pawn on c4. This Queen's Gambit position was very popular back then.

7...b6 It looks logical to develop the bishop this way, but this move has disadvantages too. White can try to get control of the c6 square. Nowadays, Black plays other moves: [7...c6 8.♙d3 dxc4 gives White a better center. 9.♙xc4 ♘d5 10.♙xe7 ♙xe7 with a plan to try to fight for the center after pushing c5 or e5.; 7...a6 Interesting move. Black is waiting for ♙d3 or ♙e2. Then, after taking on c4, he can win a tempo and play b5 with ♙b7-c5 next. 8.cxd5 (8.c5 leads to a different kind of position where White tries to get space and pressure after b4-b5.) 8...exd5 We get

a Carlsbad structure with the pawn on a6, which is well placed in case Black wants to push c5 and play with an isolated pawn. However, Black can probably just play c6 and use the typical plan with ♖e8-♘f8 because the rook on c1 will not be useful for White here, especially if he tries the b4-b5 plan.; 7...♖e8!? deserves attention as well.]

8.cxd5 exd5 9.♙a4 White immediately tries to get control of the c6 and a6 squares.

9...c5! Given that the White pieces are still not developed, Lasker decides to sacrifice a pawn for the initiative. A good practical decision. Let us check what happens if he would have played... [9...♙b7 10.♙a6! One of the ideas was to put the queen on a4.

a) 10.♙b5 a6 11.♙xd7 (11.♙c6?? b5) 11...♘xd7 12.♙xe7 ♙xe7= c5 next and Black is fine;

b) 10.♙d3 c5∞;

10...♙c8 (10...♙xa6 11.♙xa6 ♙c8 (11...c5 12.0-0 ♙c8 13.♙xc8 ♖fxc8 and now White gets a typical pressure against Black's central pawns after 14.dxc5 bxc5 (14...♖xc5 Xd5) 15.♖fd1 ♘b6 16.♙xf6 ♙xf6 17.♘xd5 ♘xd5 18.♖xd5 ♙xb2 19.♖cxc5±) 12.♙xc8 ♖fxc8 13.♘e5! ♙b4

14. ♖xf6 ♜xf6 15. ♜c6 ♖xc3+ 16. ♜xc3± Thanks to the pressure over the c-file, White is clearly better.) 11. ♖xb7 ♜xb7 12. ♜e5 ♜xe5 13. dxe5 d4 14. 0-0 dxc3 15. exf6 ♖xf6 16. ♖xf6 gxf6 17. ♜xc3± Given that the queens are still on the board, White can take advantage of the doubled f-pawns.]

10. ♜c6 ♜b8 11. ♜xd5 [11. ♖f4 ♖b7 12. ♜a4 ♜c8 13. ♖a6 (13. ♜xa7 ♖c6 XQa7) 13... ♖xa6 14. ♜xa6 cxd4 15. ♜xd4 ♜c5 16. ♜e2 ♜e6= The knight on e6 is very good to fight for the d4 square. Black easily equalizes the position.]

11... ♖b7 Black could also get a good position after [11... ♜xd5 12. ♜xd5 ♖b7 13. ♖xe7 ♜xe7 14. ♜g5 ♜xg5 (14... ♜f6!?) 15. ♜xg5 cxd4 16. exd4 ♜f6↑ White has problems with his king and the pawns on d4 and g2.]

12. ♜xe7+ ♜xe7 13. ♜a4 ♜bc8 In exchange of the pawn, Black has a huge initiative. White needs two moves to secure the safety of his king. [13... ♖xf3 Too early. 14. gxf3 cxd4 15. ♜xd4 ♜bc8 (15... ♜bd8 16. ♖e2±) 16. ♜xc8 ♜xc8 17. ♖e2 ♜c1+ 18. ♖d1 ♜e5 19. 0-0]

14. ♜a3 Not allowing cxd4. [14. ♖e2 cxd4 15. 0-0 (15. ♜xc8 ♜xc8 16. ♜xd4 ♜c1+ 17. ♖d1 ♖a6 and the White king is not able to escape.) 15... dxe3 16. ♖xe3 ♜d5=]

14... ♜e6 Preparing cxd4 and ♜e4

15. ♖xf6 [15. ♖e2 cxd4 (15... ♜e4 16. 0-0 ♜xc1 17. ♜xc1 dxe3 18. ♖xe3 ♖xf3 (18... ♜d5 19. ♜xa7 ♜xe3 20. ♜xb7 ♜c5 21. ♜xc5 bxc5 22. fxe3 ♜xe3+ 23. ♖f1±) 19. ♖xf3 ♜e5 and Black will exchange one of the bishops after ♜c4. In case of 20. ♖e2, then 20... ♜g4 will be played.]

15... ♜xf6? looks normal, but this move is a big mistake. Black should play [15... ♖xf3 16. ♖a6 (16. gxf3 ♜xf6±; 16. ♖h4 cxd4 17. ♜xc8 ♜xc8 18. gxf3 ♜e5 and Black has a winning attack.) 16... ♖c6!? 17. ♖xc8 ♜xc8 Black gets a strong initiative on the light squares, for example: 18. ♖e5 ♜xe5 19. dxe5 ♖xg2 20. ♜g1 ♜h3∞ 21. ♜xa7 ♜xh2 22. ♖e2 ♜h5+ with at least a draw.]

16. ♖a6! Now Capablanca is on time to castle!

16... ♖xf3 The only move to get practical chances. After [16... cxd4 17. ♜xc8 ♜xc8 18. 0-0± White will be a pawn up.]

17. ♖xc8 ♜xc8 [17... ♖xg2 18. ♜g1 ♜xc8 19. ♜xg2±]

18. gxf3 ♜xf3 19. ♜g1 ♜e8 White has a material advantage, but the position is not easy to play because of the weak king.

20. ♜d3 White's queen is coming to support the king.

20... g6 21. ♖f1 ♜e4

22. ♖d1 [22.dxc5 ♘e5 23. ♖d8+ ♔g7 24.c6 ♖g4 25. ♖xg4 ♘xg4 26. ♖d2 ♘xh2+ 27. ♔e1 (27. ♔g1 ♖h3) 27... ♖h1+ 28. ♔e2 ♖f3+ 29. ♔d3 ♖d5+ 30. ♔c2 ♖xc6+ 31. ♖c3+ ♖xc3+ 32. ♔xc3 ♘g4 33. ♖f1 h5 34. ♔d3± Without the queens, it is much easier for White.; 22. ♖d1 ♖xe3 23. ♖xe3 ♖xd1+ 24. ♔g2 ♖g4+ 25. ♔h1 ♖f5 26.dxc5 ♘xc5 Of course, White is better, but to win this position, he will need a long time.]

22... ♖h3+ [22... ♖xe3 23. ♖xf3 ♖xf3 24. ♔g2±]

23. ♖g2 ♘f6 Preparing ♖g4. [23...cxd4 24.exd4 (24. ♖c4 ♘e5 25. ♖xd4 ♖xd4 26. ♖xd4 ♘f3 with ♘h4 next.) 24... ♘f6 25. ♔g1 ♘d5]

24. ♔g1 [24.dxc5 ♖g4--]

24...cxd4 25. ♖c4 Good move. White does not allow the destruction of the structure.

25...dxe3 26. ♖xe4 ♘xe4 27. ♖d8+ ♔g7 28. ♖d4+ ♘f6 29.fxe3 White exchanges the Black rook, and thanks to the pin, gains the initiative.

29... ♖e6 30. ♖f2 g5 31.h4 gxh4 [31...h6 32.h5 and Black is not able to play ♔g6 to activate his knight. White should easily win by slowly improving with e4-♖f5.]

32. ♖xh4 ♘g4 33. ♖g5+ ♔f8 34. ♖f5 h5 [34... ♖xe3+ 35. ♖xe3 ♘xe3 36. ♖f4 and Black will have problems with the knight or the White rook will simply come to the queenside to grab his pawns.]

35. ♖d8+ ♔g7 36. ♖g5+ ♔f8 37. ♖d8+ ♔g7 38. ♖g5+ ♔f8 Probably they were in time trouble.

39.b3 ♖d6 Black is going to activate his queen.

40. ♖f4 ♖d1+ 41. ♖f1

41... ♖d2? [41... ♖xf1+ 42. ♖xf1 ♘xe3 43. ♖c1 ♘d5 and Black is still fighting. White will get the pawns on h5 and f7, but Black can try to look for exchanges on the queen-side.]

42. ♖xh5? White missed a simple win. [42. ♖xf7+ ♔e8 43. ♖f8+ ♔d7 44. ♖f7+ ♔c6 45. ♖c8+ and mate or Black will lose the queen.]

42... ♘xe3 [42... ♖xe3+ 43. ♔g2 ♘e5 It will not be easy for White to avoid the checks.]

43. ♖f3 ♖d4 44. ♖a8+ [44. ♔h1±]

44...♔**e7** **45.**♚**b7+** ♔**f8??** Decisive mistake! Black could have played... [45...♔d6 Objectively, White is better, but the position is complicated.]

46.♚**b8+** and White is winning because after 46...♔e7, comes 47.♚e5! +-.
1-0

Editorial Preface

Candidates! Again, this is our event of the week. We have seen very exciting chess with a lot of decisive games. The results of the players until now:

Carlsen: probably it is not a big surprise that Magnus Carlsen is leading with +4. He is winning positions where he is better and holding when he is worse. Anyhow, against Radjabov, he had to save quite a bad position, and against Kramnik as well.

Kramnik: Vladimir is playing a very good and solid tournament winning the last 3 games, which brings him now to the second place with +3.

Aronian: He is on the third place with +2, which is clearly unsatisfactory for the Armenian, who lost 2 games in the last 3 rounds.

Svilder: Playing his chess with about the result we expected from him. 50% until now with the highlight of yesterday, beating Aronian with the white pieces.

Grischuk and Gelfand are playing fighting chess, but clearly are not well enough prepared to fight for the golden first place in the event. Both are on -1.

Ivanchuk: Lost 4 times on time so far!!! I never saw this in my whole life. What else to say... He totals -3.

Radjabov: Probably this is the surprise of the tournament. Teimour is usually a very stable and solid player, but here everything is going terribly wrong for him. What to do, next time... His total result is on -4.

Only 3 rounds to go and anything can happen! Magnus is a big favorite, but Kramnik is on fire, winning 3 games in a row! Stay updated with us. Until next week!

Enjoy the CEWN Nr 57!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Svidler, Peter (2747)
– Carlsen, Magnus (2872) [C84]

FIDE Candidates London ENG (6), 21.03.2013

[Csaba Balogh]

Another game where Carlsen easily defeats his opponent, who seemingly did not commit any mistake...

1.e4 e5 2.♘f3 ♘c6 3.♙b5 a6 4.♙a4 ♘f6 5.0–0 ♙e7 6.d3 Svidler is a big expert of the 6.d3 system in the Ruy Lopez with both colors.

6...b5 7.♙b3 d6

8.a4 b4 [The other main lines are 8...♙d7 ; and 8...♖b8]

9.♘bd2 0–0 10.a5 ♙e6 11.♘c4 ♖b8 Nothing new has happened so far. Both players are following theory. The upcoming positions are considered to be nicely playable for both sides. All the pieces are on the board, which ensures a complicated game where the stronger player might try to outplay his opponent with both colors.

12.c3 Svidler's favorite move. White wants to play d4 at a good moment, but of course, this requires a long preparation.

12...bxc3 13.bxc3

13...h6 A good prophylaxis against ♘g5. [13...♘a7 happened in another game of Svidler, where he got a nice initiative after 14.♘g5! ♙g4 15.f3 ♙h5 (15...♙d7 would have been met with 16.f4! which is also better for White.) 16.♖c2 ♘d7 17.♘h3! Black succeeded to avoid the f4 idea, but his bishop on h5 got out of the game, while the knight on h3 is just temporarily misplaced, as it will soon improve through f2. 17...♙h8 18.♘e3± and White won later on Svidler-Sargissian, Ningbo.]

14.♖e1 Just as in the 12th move, White makes another preparation to play d4. This time he protects the e4 pawn.

14...♖c8 15.♙c2 This is the novelty of the game, White would like to leave with his knight to e3 and then, d4 finally becomes possible. [15.♙a3 is the most common move, and Black usually plays 15...♖d8; 15.♙a4 was played recently in a top game between Leko and Adams. It continued with 15...♙xc4 16.♙xc6 (16.dxc4 ♘xa5 This is the difference. That is why Svidler went to c2 with his bishop.) 16...♙b5 17.♙xb5 ♖xb5 and Black equalized.]

15...♖d8 This is the standard setup and the idea of the previous ♕c8 move. Black would like to play ♗f8 and be ready to push d5 at a good moment. [15...♗xc4 was an interesting alternative. Black gives up his strong bishop to destroy the pawn structure. It is difficult to judge which factor has bigger importance. 16.dxc4 ♕e6 17.♕e2 (17.c5!? might have been Svidler's intention. A positional pawn sacrifice followed by playing on the light squares. Black is really missing his bishop here, but on the other hand, he is a pawn up. 17...dxc5 18.♕e2 ♖b5 (18...c4 19.♘d2 wins back the pawn.) 19.♗a4! ♖xa5 20.♘d2 and the rook might get in trouble.) 17...♘d7! and Black drives his knight to c5, which cannot be prevented by ♗a3 because of the a5 pawn, or by ♗e3, since this allows the rook to go to b2.]

16.♕e2 ♗f8 [16...♗xc4 17.dxc4 ♘d7 was an option again, but Carlsen preferred to keep his bishop pair.]

17.♘e3 The last preparation for d4. If he could move again, d4 would already guarantee an edge. [17.d4 immediately would have still been premature. Black plays 17...exd4 18.cxd4 d5! This is a typical reaction to d4. White remains with an isolated pawn and the b4 square will be occupied by Black's minor pieces. The text move, 17.♘e3,

avoids this idea. White could simply push e5 with an advantage.]

17...d5! Excellent timing by Carlsen. He points out the drawback of the previous move — White left the attack of the e5 pawn.

18.exd5 ♘xd5 19.♘xd5 ♖xd5 This seems like an inaccuracy. Black keeps the e5 pawn protected and, at the same time, attacks the pawn on a5. [19...♗xd5 was stronger, as the e5 pawn is not really hanging. 20.♘xe5 ♘xe5 21.♕xe5 ♖e8!? (Black can also force a draw by 21...♗xg2 22.♗xg2 ♖e8 White has nothing better than 23.♕xe8 ♖g4+ 24.♗f1 ♖h3+ 25.♗g1 ♖g4±) 22.♕xe8 ♖g4! White has to sacrifice his queen with 23.♕e4 (23.♖e4 leaves the back-rank unprotected. 23...♖xe8; 23.f3 ♗xf3!) 23...♗xe4 24.♖xe4 Only Black can be better.]

20.h3? This “automatic” reaction in the Ruy Lopez to open the back-rank and avoid the pin after ♗g4 is a big mistake. The initiative passes to Black and Carlsen does not let it slip away anymore. [20.♗a4 is possible. 20...♖xa5 (20...♘xa5 21.♘xe5±) 21.♗d2 (21.♗xh6 in order to protect the a1 rook and threaten ♗xc6. This leads to an unbalanced material position after 21...♖xa4! 22.♖xa4 gxf6 23.♘xe5 ♘xe5 24.♕xe5 ♖b5! Black brings a strong defender to the kingside and his bishop pair starts to work.) 21...♖c5 22.♗xc6 ♖xc6 23.♘xe5 ♖cb6 with a playable position for both sides. The exchange of the e5 pawn for the one on a5 favors White again, but the bishop pair gives Black good compensation.; 20.♕e4! is suggested by the machines and is a very interesting alternative. White would like to provoke a weakness on the kingside with the threat of d4. 20...g6 (On 20...f5 White simply retreats/\ 21.♕e2 and the central pawns become vulnera-

ble.) 21. ♖a4! ♘xa5 22. ♘xe5 In general, the exchange of the a5 pawn for the e5 one favors White as it has bigger importance. White seems to have an edge here. 22... ♗g7 23. ♗f4±; 20.d4?! is logical, but not so good. 20...exd4 21. ♖e4 g6 seems a bit shaky for Black, but White cannot continue the attack.]

20... ♗f5! Very strong move! Suddenly, White has to forget about the d4 move. Black can exert pressure on the d3 weakness and soon, the a5 pawn will be hanging as well.

21. ♖d1 White is doomed to passivity.

21... ♖e6 22. ♗b1 Svidler tries to activate his bishop through a2.

22... ♖d7! Keeping the pressure on the d3 pawn. [22... ♖xa5 allows White to create counterplay. 23. ♖xa5 ♘xa5 24. ♗a2 getting back the e5 pawn.]

23. ♗e3 e4! [23... ♖xb1 did not work. 24. ♖axb1 ♗xd3 White has 25. ♖a2! and the d5 rook is hanging. 25... ♖xa5 26. ♖xa5! ♘xa5 27. ♘xe5 ♖f5 28. ♘xd3 The two rooks will be extremely strong. Despite the pawn deficit, only White can be better here.]

24. ♘d4 ♘xd4 25. ♗xd4?! This allowed a tactical blow, which was actually missed by Carlsen. [25.cxd4 also led to Black's clear advantage after 25...exd3 26. ♗xd3 ♗xd3 27. ♖xd3 ♖bb5! White has serious problems with the a5 pawn. He can hardly hold it for long.]

25...exd3 Carlsen prefers the positional domination! [However 25... ♗xh3! was winning in a straight way. 26.dxe4 (26.gxh3 is, obviously, not possible. 26... ♖xh3 27. ♗e3 ♗d6! White gets mated soon.) 26... ♖g5 27.g3 This was the critical position where Carlsen missed a winning combination (or just did not want to risk a miscalculation). Black wins after a fantastic tactical blow: 27... ♗g4! 28.f3 ♖b2!! 29. ♖xb2 ♗xf3 and the game is over. Too many threats are in the air. ♖xg3, ♖h3 and the simple ♗xd1. 30. ♖d3 (30. ♖f2 ♗xd1-- with an extra pawn and a strong attack for Black.) 30... ♖xg3+ 31. ♗f2 ♖g2+--]

26. ♗xd3 ♗xd3 27. ♖xd3 c5 28. ♗e5! This was Svidler's idea when he took back with the bishop on d4, but unfortunately for him, it does not solve the problems.

28... ♖xd3 29. ♗xb8

29...c4! A great move! Black frees the c5 square for his bishop, where it puts very strong pressure on the f2

pawn. The additional weaknesses on c3 and a5 are too much for White to handle.

30. ♖e5 [The only good defensive setup was 30. ♖e1 ♖c5 31. ♖h2 followed by ♖g3 (which was not possible immediately because of ♖xg3) trying to keep all pawns defended, but of course, it is also a long suffering for White.]

30... ♖c5 31. ♖b1 ♖d5! Further activating the pieces. [31... ♖d2 is not so dangerous yet because of 32. ♖xc4 This is just a check on f2. There is no reason for Black to hurry with this plan.]

32. ♖b8+ ♖h7 33. ♖h5 According to the computer, this is the decisive mistake. Svidler laid a trap with the threat of ♖h8 ♖xh8 ♖xh6 and mate on g7, but of course, this does not work against the World's Nr.1. [33. ♖e8 was the best chance, although Black has various ways to remain better here as well. 33... ♖d7 (33... f5 is also good to prevent ♖e4 in the line with 33... ♖d7.) 34. ♖a8 ♖e6 The following line is forced: 35. ♖e4+ f5 36. ♖h8+! ♖g6! (Of course not 36... ♖xh8? 37. ♖xg7+!) 37. ♖f4 ♖d1+ 38. ♖h2 ♖xf2! with a big advantage for Black.; 33. ♖h2 ♖xf2 wins a pawn.]

33... ♖e4! A cool defense against the ♖h8 threat and Black further improves his pieces.

34. ♖b2 [34. ♖h8+ ♖xh8 35. ♖xh6+ ♖h7! was the point!]

34... ♖d5! White cannot avoid losing a piece.

35. ♖e2 ♖b1+ 36. ♖h2 f6! White resigned. It was instructive to see that only one careless move — h3 — was enough to lose the game against Carlsen.

0-1

(2) Gelfand, Boris (2740) — Aronian, Levon (2809) [D37]

FIDE Candidates London ENG (9.4), 25.03.2013

[Arkadij Naiditsch]

Aronian took a hard blow took in the 9th round against Boris Gelfand! Who would bet on this! Gelfand, who did not have a great tournament until then, won his 2nd game in a row. As we remember, not that long ago, in his match against Anand, Boris used the help of Aronian for his preparation, and now he might have “stolen” such an important half point from him in the race against Magnus Carlsen.

1. d4 ♘f6 2. c4 e6 3. ♘f3 d5 4. ♘c3 ♖e7 Queen's Gambit, what can be more solid?

5. ♖f4 0-0? 6. e3 ♘bd7 7. ♖e2 This is a very solid line for White, as many others are as well...

7... c6 A rare move on the Top level. [7... dxc4 8. 0-0 c5 is the usual line, which seems to be pretty equal.]

8. 0-0 [Maybe 8. h3 would make sense now, in order not to give away the bishop immediately.]

8...♞h5 Of course! That is Black's main idea.

9.♙e5 A typical trick for White: first to provoke f6 and only then to go back to g3.

9...f6 10.♙g3 f5 A logical move, but why not... [10...♞xg3 11.hxg3 and now 11...f5 Can this position be worse for Black? I cannot imagine that being true.]

11.♙e5 Again, typical play by White.

11...♞hf6 [Of course not 11...♞xe5 12.dxe5! and the h5 knight is very bad...]

12.h3 This move is forcing Black to take on e5, but was it really needed? Black will probably take on e5 anyway. White could have played a more useful move than h3, like 12.♖c1.

12...♞xe5 13.♞xe5 ♞d7! Very good move. I think the position is just equal.

14.f4 Quite a risky attempt by White. I think only Black should be happy about this move. [Maybe it was the time to simply fix a draw. 14.♞xd7 ♙xd7 15.f4]

14...♞xe5 15.fxe5 ♙g5 and I think Black's position is very nice.

16.♙d2 ♙d7 17.♖ac1 White wants to open the c-line at a good moment, but this does not look too dangerous to me. Black's play on the kingside might become much more efficient.

17...♖c8 18.a3 ♙h8 Black is preparing his plan.

19.b4 ♙e8 A strange move... Where is the bishop going to? [The simple 19...♙h6 followed by ♙e7, with the idea of playing a5 or doubling on the f-file. I think only Black can look for an advantage here.]

20.♙d3! White is regrouping his pieces. The knight is going to its best square, f4.

20...♖c7?! and this is already a mistake. Black should get ready to welcome White's knight with g7-g5, but now it is too late.

21.♞e2 ♙h5? This move is clearly not the best. It was time to admit the mistake and play 21...♙d7.

22.♞f4 ♙xf4 23.exf4 It is clear now that White is better!

23...♖d7 Black is trying to provoke White into playing c5, which is not bad for him, but dxc4 leads to quite an unpleasant position for Black as well.

24.♙e3 Gelfand decides to keep the option of playing cxd5 as well, and does not close the position with the c5 move.

24...dxc4 25.♙xc4 ♖xd4?! and Aronian chooses the wrong path again. [25...♙f7 Black's position is still very very solid. White will create pressure by playing b5 in the future, but if this is enough to reach something special would remain unclear.]

26.♙xe6 Probably Aronian was planning his next move, but this is just losing!

26... ♖f7? An easy blunder which is very atypical for the Armenian. Usually, Aronian is in a great tactical shape.

27. ♖xf5! and White is already winning.

27... ♖c4

28.e6! This is the move that Aronian most probably blundered. Black cannot take on f1 or f5.

28... ♖d6 Nothing helps anymore...

29. ♖fe1 ♖e8 30.e7 ♖f7 31. ♖c5! Another very good move by Gelfand. Now the White rook is coming to e5 in order to secure the e7 pawn. Black's position is hopeless.

31...g6 [Of course 31... ♖xf4? 32. ♖d7 and White is winning.]

32. ♖g4 Gelfand was already in deep time trouble, and Aronian tries to gamble.

32...h5 but Gelfand found the right answer quickly.

33.f5! A great game by White.

33... ♖g7 [Loses on the spot 33...hxg4 34. ♖h6+ ♖g8 35.fxg6 ♖xg6 36. ♖g5 and the game is over. 36... ♖f7

37. ♖xg6! The last precise move. 37... ♖xg6 38. ♖f1+ and Black is losing his queen.]

34.fxg6 ♖xg6 35. ♖xh5?! Not the easiest way to win this position. [35. ♖xh5! would finish the game on the spot. 35... ♖xh5 36. ♖xh5 and the e8 rook is hanging.]

35... ♖d3 36. ♖e5+ and once again Gelfand chooses the safest path, but not the shortest one. [36. ♖g5]

36... ♖xe5 37. ♖ce5 ♖xh5 38. ♖xh5 ♖xa3 39. ♖f5 ♖d3 40. ♖e4 ♖d7 The time trouble is over. White is, of course, doing clearly winning, but Black has some small practical chances. The rest of the game is handled greatly by

41. ♖g4+! The best move! White is doubling on the 7th rank. [Much more imprecise would have been 41. ♖fe5 ♖f7 and Black threatens to take on e7.]

41... ♖h6 42. ♖f6+ ♖h7 [42... ♖h5 would lead to a pretty mate: 43. ♖fg6 ♖dxg7 44. ♖4g5+ ♖h4 45.g3+ ♖xh3 46. ♖h5#]

43. ♖f7+ ♖h6 44. ♖gg7 White is ready to push his pawns forward... Black is hopeless.

44...♖d1+ 45.♔h2 ♖f1 What else to do? White wants to play g4-♙g3-♙h4 and mate.

46.♖h7+ ♙g6 47.♖hg7+ ♙h6 48.♖h7+ ♙g6 49.♖fg7+ ♙f6 50.h4 and the h-pawn is running.

50...♔e6 51.♖g4 Giving Black no chance for ♖f4.

51...♙f5 52.♙g3 ♖e1 53.♖f4+ ♔e6 54.h5 Black is finally getting the e7 pawn, but the position is not improving.

54...♖xe7 55.♖xe7+ ♙xe7 56.♙h4 White's g- and h-pawns are unstoppable.

56...b6 57.h6 ♖h1+ 58.♙g5 ♙e6 59.♙g6 ♙e5 60.♖f5+ and again Boris Gelfand has proved that people over 40 still have a very hard bite!

1-0

(3) Kramnik,Vladimir (2810) – Svidler,Peter (2747) [D85]

FIDE Candidates London ENG (8), 24.03.2013

[Csaba Balogh]

Kramnik showed some nice preparation against the Gruenfeld. He got a small, but unpleasant edge, which he succeeded to convert with fine technique.

1.d4 ♘f6 2.c4 g6 3.♘c3 d5 4.cxd5 ♘xd5 5.e4 ♘xc3 6.bxc3 ♙g7 7.♘f3 c5 8.♙e3 Kramnik employed this system many times in the beginning of the 2000s. He used this weapon even against Kasparov in their World Championship match back in 2001.

8...♔a5 9.♔d2 ♘c6 10.♖c1 cxd4 11.cxd4 ♙xd2+ 12.♙xd2 0-0 13.d5

13...♖d8 This endgame was considered to be completely fine for Black, but now Kramnik introduces a logical novelty, which is also the recommendation of the newest version of Houdini!

14.♙c2 It is very logical to keep the rooks connected. [14.♙e1 was played in all the good games before.]

14...♘e5 Svidler prefers to avoid the preparation and decides to go for a slightly inferior endgame, which he hopes he can hold. [The tactical test of the line must be 14...♘a5 This is the right move after 14.♔e1 as well. Black intends to undermine the central pawns with e6 or f5. Kramnik's preparation probably starts with 15.♙g5 and lasts for hundreds of pages... Who knows what is his final evaluation?]

15.♘xe5 ♙xe5 16.♙c4 White fights against Black's active attempts to undermine his strong center. If he succeeds to consolidate, he will obtain a better position thanks to his superior pawn structure. The game is a good demonstration of the possible plans and dangers of the position.

16...♙d7 [The typical 16...f5 does not work because of 17.f4! and e5 is coming next. The strong center guarantees a nice edge for White.; 16...e6 is the other typical method, but it is met by 17.♙g5 (17.♖hd1 is also possible. 17...exd5 18.♙xd5 The bishop stands very well on d5. Black has difficulties with the development of the c8 bishop. The b7 and a7 pawns are weak.; White should refrain from playing 17.dxe6 ♙xe6 18.♙xe6 fxe6 White cannot make use of Black's slightly damaged pawn structure in the endgame.) 17...♖d6 (17...♖e8 loses an exchange after 18.♙b5 ♖f8 19.♙e7±) 18.f4! with the idea of e5 with tempo, followed by d6. Black must try to play tactically with 18...exd5 but it does not solve all the problems. 19.fxe5 ♖c6 20.exd5 ♖xc4+

21.♔b3± White has a clear advantage. The d-pawn is very dangerous, White will occupy the most important c-file and the bishop on f6 is going to be extremely annoying from Black's point of view.]

17.f4 ♙d6 This is typical in this opening. After the exchange of queens, the Gruenfeld bishop leaves the a1–h8 diagonal. The main reason is to cover the c7 invading square. [However 17...♙g7 might have been stronger, as it supports the undermining of the center. 18.♔b1 (18.♔b3 is now met with 18...b5! 19.♙e2 e6! and on 20.d6 e5! is very strong, with the threat of ♙e6. White is not on time to consolidate.) 18...b5 19.♙e2 e5! Black needs to fight against the center. These are all well-known moves in the Gruenfeld. 20.♖c7 f5! It seems like Black's counterplay is coming on time.]

18.♔b3 f6 [18...b5 was probably better, to avoid the following squeezing on the queenside. 19.♙d3 and only now 19...f6 to prevent e5.]

19.a4! Black has difficulties with the queenside pawns. Black should try to create a passer somehow, but the a4 pawn with the two bishops making it impossible. After making the necessary prophylactic moves, White can focus on making progress on the kingside and in the center.

19...♖dc8 20.h4! With the idea of playing h5 or, if Black plays it himself, that would weaken the g6 pawn...

20...♖ab8!? Svidler aims for counterplay with b5, but Kramnik smoothly prevents it. [On 20...h5 Kramnik was probably intending to play 21.♖hf1 overprotecting the f4 pawn with the idea of playing ♗d4 followed by e5!]

21.♗b5! Great positional move to prevent b5. Black is forced to trade the bishops, but it leaves the queenside even weaker. [21.♗xa7 is a mistake. 21...♖a8 Black wins the a4 pawn and achieves his aim by creating a passer on the queenside.]

21...♗xb5 22.axb5 a6 [22...b6 gives up the c6 square. 23.♖c6! and the a7 pawn is a serious weakness. ♖a1 is coming next.]

23.b6! Of course, White will need this pawn in the future! Later on, it might support the invasion on c7. He basically has an extra pawn now, as Black has zero chances to create something useful on the queenside. The only question that remains is whether White will be able to breakthrough in the center or on the kingside, or if Black will succeed to build a fortress.

23...♔f7

24.h5 [24.g4 was also possible, gaining more space.]

24...♖xc1 [24...gxh5 25.♖xc8 ♖xc8 26.♖xh5 is similar to the game. Black has no invading square on the c-file for the rook. He is doomed to defend passively.]

25.hxg6+ ♔xg6 Svidler creates an extra pawn island to himself (on h7), in order to keep the g-file opened for some kind of counterplay with the rook. [25...hxg6 26.♗xc1 is also quite bad for Black. He even has difficulties to neutralize the h-file, because 26...♔g7 runs into the tactical 27.e5! fxe5 28.♗b2! White has increased his advantage.]

26.♗xc1

26...♖g8 [Probably the best chance for Black was to play 26...h5!! to avoid the game's continuation and to look for counterplay with ♖g8. White should not win the pawn with 27.f5+ ♔f7 28.♖xh5 ♖g8! Black gets strong counterplay.]

27.g4! Fine technique by Kramnik! Black cannot open the g-file for the rook, because the only move — ♔f7 — leaves the h7 pawn hanging with check. The next move is a preparation for this, but it has its drawback as well...

27...h6 Black intends to play ♔f7, but he puts his pawn on a dark square, where it becomes much more vulnerable to the White bishop.

28.♖h5! White intends to increase his advantage with e5. Black cannot do anything against this.

28...♔f7 29.e5! ♕c5 [29...fxe5 does not change much. 30.fxe5 ♕c5 31.e6+ ♔e8 32.♖xh6 ♕xb6 33.g5 is also very good for White. A possible plan is g6, followed by ♕b2 and g7. Black stands too passively.]

30.e6+ ♔f8 31.♖h4! Very precise calculation by Kramnik! [The arising pawn endgame after 31.♖xh6 ♖xg4 32.♖h8+ ♖g8 33.♖xg8+ ♔xg8 34.♕a3 also looks very promising for White, but actually Black holds with

34...♕d6!! (34...♕xa3 35.♔xa3 ♔f8 36.f5! White wins after the following forced line 36...♔e8 37.♔b4 ♔d8 38.♔c4 ♔e8 39.♔c5 ♔d8 40.d6 ♔e8 41.dxe7 ♔xe7 42.♔d5 ♔e8 43.♔d6 ♔d8 44.e7+ ♔e8 45.♔e6 a5 46.♔xf6 a4 47.♔e6 a3 48.f6+-) 35.♕xd6 exd6 Black puts his king on e7 and the draw is inevitable. White cannot go too far with his king, since he must stay in the square of the a-pawn. Finally, a position where Black can make use of his queenside pawns.]

31...♔g7 [31...h5! would have given the only practical chance. Searching for counterplay at the cost of a pawn. 32.gxh5 (32.g5 is an alternative, but Black gets his chances here as well. 32...fxg5 33.fxg5 ♔g7 34.♖xh5 ♔g6 35.♖h6+ ♔f5 and Black goes for the d5 pawn with his king.) 32...♖g1 followed by blocking the h-pawn with the king. White has good winning chances, but at least, Black got some activity, which always gives a chance to hold.; 31...♕xb6 allows 32.♕a3! White's pawns are too strong. The biggest threat is to play ♖xh6 and f6 is hanging because of the pin. It is hard to deal with this.]

32.f5! ♖d8 [The passive 32...♖h8 leads to a defeat as well. 33.♕f4! is very strong, preparing to breakthrough with d6. 33...♕xb6 34.d6 exd6 White can win in a spectacular way.

35. ♖xh6+! ♔g8 Otherwise, the e-pawn promotes. 36.g5! The final breakthrough. 36...fxg5 37.f6! gxh4 38.f7+ ♔h7 39.e7 and White wins!]

33. ♖xh6+ ♔g8 34. ♔c4 ♖xb6 The material is still equal, but White's pawns are superior. The end is near. White only needs to find the best way to create passed pawns, but of course, this is an easy task for Kramnik. [34...♖c8 does not change much. 35.♔d3 ♖d8 36.♔e4+-]

35.g5! ♖f2 36. ♖g4 ♔h7 37.gxf6! exf6 The job is done! White only needs to promote his e- and d-pawns.

38.e7 ♖c8+ 39.♔b3 ♖c5 [39...♔xh6 40.d6+- is also over.]

40. ♖c4 Black resigned as he cannot defend against ♖xc5 or simply d6. Great performance by Kramnik, who really deserved to win a game after having squeezed in all the previous rounds.

1-0

(4) Svidler,Peter (2747) – Grischuk,Alexander (2764) [E81]

FIDE Candidates London ENG (9.2), 25.03.2013

[Arkadij Naiditsch]

After winning against Ivanchuk a day before, Grischuk was clearly going for another victory, pushing the game to a complete messy position. First, it seemed like White should be doing better, but after some crazy complications, the game finally ended in a draw. We will see a really interesting game.

1.d4 ♘f6 2.c4 g6 The King's Indian, probably the most fighting opening for Black at the current moment.

3.♘c3 ♖g7 4.e4 d6 5.f3 Same as in his game against Radjabov, Svidler chooses the system with 5.f3.

5...0-0 6.♖e3 c5 7.♘ge2 ♘c6 The situation is quite clear. White's main idea is to keep his center alive and strong, and Black will start a quick play against it, which is usually supported by the very strong bishop on g7.

8.d5 ♘e5 9.♘g3

9...h5 h5 is a very typical move against the knight on g3.

10. ♖e2 White is developing a piece and preparing the f1 square for the knight at the same time. Of course, moves like 10. h4? are very bad. Then, White will never be able to play f4 because of the weak g4 square, as after Black's e6 move the h4 pawn might be weakened.

10...h4 Before starting the action in the center, Black hunts the White knight to a passive position.

11. ♘f1 e6 Until here, both players were moving fast...

12.f4 What can be more logical than this move?! It seems like ♘ed7 is the only move... but

12... ♘xc4! a super interesting idea by Grischuk. Black is giving a full piece, but opening White's position to the maximum! [In case of 12... ♘ed7? White is simply winning a pawn. 13.dxe6 fxe6 14. ♖xd6+-]

13. ♖xc4 b5! That is the key idea! Black is giving another pawn away and opening one more extra file to activate his pieces.

14. ♖xb5 exd5 The starting position of the real battle! White has a lot of different choices:

15.e5! The most logical move and probably a very good one as well. [It also looks very logical to play 15.exd5 but then Black can continue with 15... ♖b8! The position is very strange. White is a full piece up, but maybe Black is doing perfectly fine here. White's king is on e1, Black has a target on b2, the e-file is open and moves like h3 or ♘g4 could be quite unpleasant for White. Even with the support of a strong computer, it is very difficult to say who is doing better here.]

15...dxe5 16.fxe5 and once again Black has a lot of choices! Maybe 16...d4!? was also an alternative to continue.

16... ♖g4

17.exf6! Svidler makes a good decision again. By simplifying the position, White reaches quite a constant advantage. [One of the top computer moves is 17. ♖d3 and the craziness would continue...]

17... ♖xd1 18.fxg7 White has 4 pieces for the queen, but Black is going to take back one of them...

18... ♖xg7 19. ♖xc5! Great move by White! It is very important to secure the dark squares, which will give White big attacking chances in the future.

21. ♖g1 gxf1 ♔+ 22. ♔xf1 Let us take a fresh look at the position. White was a full piece up, and suddenly, it is Black who has a queen and a pawn for 3 White minor pieces—this gives Black a clear material advantage. On the other hand, White's pieces are very strong and the bishop pair is worth at least an extra exchange. Also, the Black king might get under a dangerous attack very fast. White's rook on g1 is very well placed, and the rook from d1 might immediately join the attack.

23. ♖g2 A good and safe move by White. Now Black has no more nasty checks...

24... ♖h5 **25.** ♖f4 It seems like White is better. ♘d4 is a deadly threat, and ♘e7 next could be quite unpleasant. The rooks on g2 and f4 are perfectly placed and it seems like Black has no counterplay.

28.a4?! Probably the first imprecise move by White. [28. ♖d5! would have been the right choice, and White is doing better.]

29. ♖xa6? In the upcoming time-trouble, White blunders. [29. ♖e2 and the position would remain pretty equal.]

29... ♔f3+? A tempting move, since Black is going to take the pawn on b2 with check, but it is a blunder! [29... ♔e5! would have almost won the game! The d4 rook is hanging and ♔f6 check is going to win the bishop on a6. White has no decent defense against this.]

30. ♖f2 ♔h1+ 31. ♔e2 ♖xb2+ 32. ♖d2 White managed to defend all his pieces!

32... ♔c1 33. ♔d3! The only move, but a strong one anyway!

33... ♖b6 Of course. Black needs to keep a rook on the board in order to use the unlucky position of the White king.

34. ♖c4 ♖d6+ 35. ♖d5 ♖d7 36. ♖f4 White managed to defend everything and it is clear that, probably, the position should be close to winning. The a-pawn is the key to success.

36... f5! Grischuk is searching for his only chance — to create some kind of counterplay, and he has no other pieces left, only the f7 pawn...

37. ♖d4 ♔h6 38. h4? During the time trouble, White misses Black's counterplay. [The careful 38. ♖d1 seems to give White very good winning chances.]

38... ♖c7! Great move.

39. ♖c4 A logical way to defend the knight on c3.

39... ♔f1+! and now we see why 38. ♖d1 would have been better...

40. ♖e2 f4 and Black/ ^s f-pawn is unstoppable!

41. ♔c2 f3 The game could have continued with: 42. ♖ee4 ♖xc4 43. ♖xc4 f2 44. ♖f4 ♔xc4 45. ♖xc4 f1 ♔ 46. ♔b3 and the position is simply a draw. What a great fighting game! It has been a while since I have seen such craziness on the board!

Endgame section

(15) Kramnik,V (2810) – Aronian,L (2809)

FIDE Candidates, 20.03.2013

[Chess Evolution]

Kramnik played great chess, but somehow, in the first half of the tournament, he was unable to convert his advantages. Black has a really unpleasant endgame, but Aronian finds a miraculous defense and holds the draw with flawless technique.

41...f6!! This leads to an opposite colored bishop endgame, which seems to be hopeless at first sight. However, Aronian evaluated the arising position much deeper. [41...b1♔ seems to be possible as well. 42.♔xb1 ♖xb1 43.d8♔+ This keeps more winning chances. (43.♔d3 is quite a tricky alternative, trying to trap the knight. 43...♖c3! is the only move, after which Black seems to survive. (Other moves like 43...♔f8 lose after 44.d8♔+ ♔xd8 45.♔xd8 ♖a3 46.♔a5! ♖b5

47.♔b6! and Black cannot avoid losing his knight. 47...♔e8 48.♔c4 ♖a3+ 49.♔b3 ♖b5 (49...♖b1 50.♔e3!+- and ♔b2 in the next move.) 50.♔b4+-) 44.♔c4 ♖e4 45.♔e7 ♔g7 46.♔b5 ♔c7 47.♔c6 ♔a5= and the a5-d8 diagonal is long enough for the Black bishop to hold it.) 43... ♔xd8 44.♔xd8 ♖c3 45.♔d4 It is hard to judge if this position is winning or drawn. The knight has serious difficulties to find a way back home. If it could get to e6 or wherever in his own camp, White would have no chance to promote his extra pawn, but the knight is very far away.]

42. ♔xf6! The critical continuation. [42.e6?? is a blunder. 42...♖d5+ 43.♔d4 ♖e7 and Black wins a piece.; While 42.exf6 leads to an easy draw. 42...♔b6+ 43.♔d2 b1♔ 44.♔xb1 ♖xb1+ 45.♔c2 ♖a3+ 46.♔b3 ♖b5 White has to win back the piece with f7 and d8♔, but of course, with 2 vs 1 pawns on the kingside, the position is dead drawn.]

42...♖d5+ This was the point of 41...f6. Black escapes into an opposite-colored bishop endgame.

43.♔d4 ♖xf6 44.exf6 ♔f7! Otherwise, White would have simply driven his king to c8 to promote his pawn.. . But now, it looks like giving up the h7 pawn and creating

connected passed pawns is a kind of hopeless attempt. However, the facts show a different outcome.

45. ♖xh7 ♜xf6 **46.** ♔d5 ♜e7 **47.** ♜c6 ♜d8! Black needs to keep his king ahead of the d-pawn. [47... ♙d8 loses easily after 48. ♙b1+- followed by advancing the h-pawn, which lures the Black king to the kingside and White can continue his plan with ♜b7-c8.]

48.g4 White, sooner or later, had to play this move, since this is the only way to make some progress. Unfortunately for him, the h4-h5 plan does not work because it drops a pawn with ♙e1. However, this move allows the Black bishop to stand between the pawns. It is important to mention that the game is drawn only because of the unfortunate placement of the h7 bishop — if it was anywhere on the b1–f5 diagonal, White would be winning. We will soon understand why. ..

48... ♙e1! The bishop is heading to h4! [48... ♙d2? would allow White to reach the h5 square with his pawn, which is enough to win the game. 49.h4 ♙e1 50.h5 ♙d2 51. ♙b1 ♙c1 52. ♜d6 ♙d2 53. ♜e6 ♙e3 54. ♙f5! Just as in the game, White needs to place his bishop on f5 and then he can support the pawns with his king. 54... ♙d2 55. ♜f6 b1 ♜ Black has traded the b-pawn for the one on d7, but in comparison to the game, he is not able to save the game. 56. ♙xb1 ♜xd7 White needs to be careful, since the h8 corner does not fit the color of the bishop. 57. ♜g7! ♜e6 58.h6 ♙c3+ 59. ♜g8+- and the h-pawn promotes.]

49.h3 [49.g5 does not work. 49... ♙h4! and g6 block s the diagonal, so Black could promote his pawn. This is the reason why the bishop is badly placed on h7.]

49... ♙h4 50. ♜d6 ♙e7+ 51. ♜e6 ♙h4 The Black b ishop has occupied its excellent defensive position. Before White tries his only chance to make progress, Kramnik completes the 60 moves time control by passing with the bishop in order to gain 15 additional minutes.

52. ♙b1 ♜c7 53. ♙e4 ♜d8 54. ♙c2 ♜c7 55. ♙b1 ♜d8 56. ♙e4 ♜c7 57. ♙d3 ♜d8 58. ♜d6 ♙e7+ 59. ♜e6 ♙h4 60. ♙f5 ♜c7

61. ♜f7 With the idea of ♜g6 and advancing the pawns. Black needs to trade the b-pawn for the one on d7 in order to be able to join his king in the defense.

61...b1 ♜ 62. ♙xb1 ♜xd7 63. ♙a2! This is the right diagonal for the bishop, where it cuts the Black king from reaching the corner after sacrificing his bishop for the g-pawn. [63. ♜g6? is a much worse attempt. 63... ♜e7 64.g5 ♙xg5! 65. ♜xg5 ♜f7=]

63... ♜d6! Aronian shows a great defensive method by going with his king behind the pawns. Actually, this is the only way for Black to save himself! [Passing with 63... ♙d8 leads to a defeat after 64. ♜g6 ♜e8 65.g5! ♜f8 (65... ♙xg5 is not enough now. 66. ♜xg5 ♜f8 67. ♜g6! The Black king does not reach the corner, thanks to the excellent place-

ment of the a2 bishop.) 66.h4 ♖e7 67.♔h7!+- followed by g6.]

64.♔g6 ♖e5! [64...♔e7 loses similarly to the previous line with 63...♖d8. 65.♔h5 ♖f2 66.g5 ♖f8 67.♔h6 ♖e3 68.h4+- and ♔h7 is coming next, followed by g6.]

65.♔h5

65...♖e7!! Another only move! We will soon get its point! [65...♖d8 is refuted by 66.g5 ♖f4 67.g6 ♖f6 68.♔h6 ♔g3 69.♖e6+- wins.; 65...♖f2 also loses after 66.g5 ♖f4 67.g6 ♖d4 68.♔h6 ♔g3 69.♖e6+-]

66.g5 ♖f4 67.h4 [The point is that after 67.g6 Black has 67...♖f8! and suddenly, the White king is squeezed to h5. Black only plays ♖g7-f8 from now on, and White cannot make progress. This is the reason that show that taking the bishop to e7 was the only move.]

67...♔g3! Yet another only move! Black could not let the king escape from h5. [67...♖f8 is refuted by 68.♔g6! ♖b4 69.h5 ♖c3 70.h6 ♔g4 71.h7 ♖h8 White can create a zugzwang! 72.♖e6+ ♖f4 73.♔h6 ♖e5

74.♖h3+- This is the zugzwang. White does not threaten with g6 because of ♖f6, and the draw is inevitable, since the bishop starts to move on g7-h8 forever. However, Black needs to move his king now and then, g6 already wins the game.]

68.♖c4 ♖f8! The last difficult only move! [68...♖c5 loses to 69.g6 ♖d4 (69...♖f8 70.♔g5! and h5 wins.) 70.♔g5 wins.]

69.♖e2 ♖g7 Black is now intending to wait with ♖g7-f8. White cannot make progress.

70.♖c4 [70.♔g6 ♖xh4!= is the key!]

70...♖f8 71.g6 White intends to play ♔g5 and h5, but Black is in time to squeeze the king to h5!

71...♖f4! 72.♖a2 ♖g7 The draw was agreed! A fantastic defense by Aronian and, on the other hand, a very sad and unlucky draw for Kramnik!

1/2

(16) Ivanchuk,Vassily (2757)
– Radjabov,Teimour (2793) [D37]

FIDE Candidates London ENG (9.3), 25.03.2013

[Chess Evolution]

After move 40 and a little time trouble, we see the following endgame. It is clear that White is pushing, but is it enough to win the game?

41. ♖c5 h5 A very logical move. As the defender, it is always good to exchange an extra pawn.

42. ♜b1 I am not sure about this move. Black is now able to exchange the knight. [42. ♔f3 Not allowing the Black knight to go to e4 looks very logical to me. The White king could go to d3 over e2.]

42... ♞e4! I think the right decision. Black's position will be very passive, but very solid.

43. ♞xe4 ♜xe4 44. ♔f3 ♜ee7 Black is going to hold everything together on the 7th rank.

45. e4 White is centralizing as much as possible. The a5 move is not running away.

45... ♜cd7 46. ♔e3 ♜d5 47. f3 ♜d6 Black cannot do much more than waiting.

48. ♜b6 I am not sure whether this move was right. The White rook must remain passive on d2. [White could have tried to keep both rooks active. 48.a5!? ♜d5 (It does not work now 48... ♜ed7 49. ♜b4 followed by ♜b2.) 49. ♜c5 ♜xc5 50.dxc5 ♜e5 51. ♔d4 ♜e7 Black might hold this, but White is clearly better...]

48... ♜ed7 49. ♜d2

49... hxcg4? What a mistake! Black plays very logically, exchanging a pawn, but White is now going to get the h-file, and this is deadly. [49... h4 would lead to a very passive position, which is very difficult to break.]

50. hxcg4 ♔f7 51. a5 White made the maximum he could. Now it is time to try to find a winning plan.

51... ♔e7 52. ♜b1 ♔f7 53. ♜h1 Over to the h-file! It is definitely an idea. [53. ♜b4? would be a good move with the idea of playing ♜db2, but Black always counts on 53...c5! with, probably, just a draw.]

53... ♔g7 54. ♜h5 What can be White's idea now? To play e5 or to play ♜dh2 at a good moment.

54... ♜d8 Black was probably afraid of playing ♔g6 because of [54... ♔g6 To make sure that the pawn on g5 is

protected against White's e5 push. 55.♖h8! The White rook is entering the position. 55...♔g7 56.♖b8 and White has clearly obtained a lot! An exchange of rooks would be bad for Black because the d5 move would be possible.]

55.♖d1 White is taking away the rook from the 2nd rank, in order to be able to play ♖dh1 and have the escape ♔f2-♔g3 against Black's ♖xd4, without allowing him to play ♖d2+ and ♖xh2, exchanging the rooks. [55.e5! would have been strong as well, but we will see a similar continuation just the next move.]

55...♖8d7 This move is losing, but it is hard to give Black a good advice here... [It does not help much to play 55...♔g6 56.♖dh1 ♖xd4 57.♖h7 and mate next move.]

56.e5! The final blow...

56...♖d5 57.♖dh1 ♔f7 [Loses on the spot 57...♖xd4 58.e6! and Black is losing a rook. 58...♖d3+ 59.♔f2 ♖d2+ 60.♔g3+-]

58.♖h7+ We are now in the technical part of the game.

58...♔e6 59.♖xd7 ♔xd7 60.♖h7+ ♔e6 61.♖h6! There is no reason for White to get seduced by the b7 pawn... The f6 pawn is much sweeter.

61...c5 is probably the best chance for Black, but it is simply too small...

62.♖xf6+ ♔e7 63.♖b6! The last exact move. From now on, things are very easy...

63...♖xd4 [63...cxd4+ 64.♔e4 and the game is over.]

64.♖xb7+ ♔e6 65.♖g7 capturing the g5 pawn away and, with it, winning the game.

65...♖a4 66.♖xg5 ♖xa5 67.f4 The 3 pawns are starting their march.

67...♖a3+ 68.♔d2 ♖a2+ 69.♔c3

69...♖f2 trying to create "hole" in the pawns, but it is too late for anything.

70.♖g6+ ♔d5 71.♖d6+ ♔e4 72.♖f6 White can even choose which pawn to push, e- or g-.

72...a5 The e-pawn is closer to the promotion square on the 8th rank :).

73.e6 ♔d5 74.f5 ♖e2 75.♖f8 ♔d6 76.f6 A really great endgame technique by White!

1-0

Clash of the Titans

(17) Euwe,Max — Alekhine,Alexander [A90]

World Championship 16th Netherlands (26), 03.12.1935

[Kamil Miton]

1.d4 e6 2.c4 f5 3.g3 ♗b4+ 4.♗d2 ♗e7 Black's idea was to force White to put the bishop on d2, in order to avoid the plan with b3-♗b2. For example, ♗b4 has the same point in the Catalan.

5.♗g2 ♖f6 6.♖c3 0-0 7.♖f3 Of course, jump to e4 is not dangerous for White, but sometimes in this structure, it is possible to stop it after [7.♔c2!]

7...♖e4 With the bishop on c1, Black's main plan is d6-♔e8.

8.0-0

8...b6 It would be nice to develop the bishop on b7, but in this case, Black is completely not on time to do it. [8...d6 9.♔c2 Of course, Black waited for this move in order to win a tempo. 9...♖xd2 10.♔xd2 ♖d7 11.♗fe1 ♖f6 12.e4

fxe4 13.♖xe4 ♖xe4 14.♗xe4 ♗f6 15.♗ae1↑ White is much better. ♗h3 might come next. (Xe6)]

9.♔c2 [9.♖xe4 fxe4 10.♖e5 d5 11.cxd5 exd5 12.♔b3 ♖h8 13.f3 exf3 14.♗xf3 ♗f6 15.♗af1 With the idea ♗g5. Thanks to his huge development advantage, White is crushing his opponent.]

9...♗b7 Now we see a typical plan in this kind of positions — to fight for the e3 square.

10.♖e5 Other thematic idea is [10.d5 with ♖d4 — ♗ad1 next.]

10...♖xc3 11.♗xc3 [11.♗xb7 ♖xe2+ 12.♔g2 ♖xd4 13.♔d3 ♖bc6 14.♖xc6 ♖xc6 15.♗xa8 ♔xa8 and Black has excellent compensation.]

11...♗xg2 12.♔xg2 ♔c8 With the idea of putting the queen on b7, not allowing White to play the thematic e4 move easily. [12...♖c6 Interesting idea. The structure will be slightly destroyed, but on the other hand, Black reduces the material and finishes his development. 13.♖xc6 (13.♗ad1 ♖xe5 14.dxe5 Black should be fine because the pawn on d7 is not really weak. Black manage to protect it and, without other weaknesses, his position will be very solid. 14...♗f7 15.♗d3 ♗f8 16.♗fd1 ♔c8 17.♔d2 ♔b7+ 18.f3 ♗d8=) 13...dxc6 14.♗ad1 ♔d7 15.e4± Thanks to his better structure, White has a small advantage.]

13.d5 d6 14.♖d3 [14.♖f3 e5 15.e4 f4 (15...fxe4 16.♖d2!? White wants to take control of the e4 square and then, simply advance his pawns on the queenside — a typical plan in the King's Indian structures. However, now comes 16...e3! 17.fxe3 ♖d7 and Black is very solid.) 16.♖d2± Black's plan is to put pressure on the kingside, but with-

out the light-squared bishops, this is harder to realize. That is why White should be a bit better.]

14...e5

15.♔h1 The king takes this square because White will try to break the position on the kingside.

15...c6 16.♕b3 ♔h8 17.f4 e4 18.♘b4 c5 The only move, otherwise, White will get pressure on the d-file.

19.♘c2 ♘d7 20.♘e3 ♙f6 Logical move. Black wants to eliminate the strong bishop on c3. Without bishops, the plan with g4 is less strong, so Euwe decides to change the character of position and play the nice idea: [20...♘f6 21.h3 and White should get a strong initiative after pushing g4.]

21.♘xf5! ♙xc3 22.♘xd6 ♕b8 23.♘xe4 ♙f6 24.♘d2 White has three pawns for a piece and the unpleasant threat e4-e5.

24...g5! Alekhine tries to weaken the White king in order to get counterplay against it. [24...b5!? 25.cxb5 ♕b7 26.e4 ♙d4 27.♘c4 ♘f6 28.♖ae1 and White has to find a way to advance his central pawns. The position is unclear.]

25.e4 gxf4 26.gxf4 ♙d4 27.e5 ♕e8 The queen is coming to the kingside in order to support the pressure against White's king.

28.e6 ♖g8 29.♘f3 [29.exd7?? ♕e2-+]

29...♕g6

30.♖g1! The next sacrifice by White is fantastic. Without the strong bishop, White will be able to create threats against the Black king! [30.♘g5 ♘e5! and thanks to his active pieces, Black can take the initiative. (30...h6 31.♘f7+ ♔h7 32.♕h3 ♘f6 33.♘g5+ ♔g7 34.♘f3↑) 31.♖ae1 (31.♖g1 ♕f5 32.♕g3 ♘xc4 33.♘f7+ ♕xf7 34.exf7 ♖xg3 35.♖xg3 ♘d6 36.♖e1 ♘xf7 37.♖e7 ♘d6) 31...♖af8 32.♕h3 ♖xf4 33.♖xf4 ♕xg5↑]

30...♙xg1 31.♖xg1 ♔f6 Alekhine was afraid of ♔c3, that is why he made this move. He could have played [31...♔f5 32.♔c3+ (32.exd7 ♖xg1+ 33.♙xg1 ♔xf4 (33...♔xd7 34.♙f2∞) 34.♔c3+ ♙g8 35.♘e5 ♖d8 and it is hard to improve the position for both sides. ♔g3 does not work because after exchanging, the Black king will get to f6 on time.) 32...♘f6 33.♘g5 h6 34.♔e5 ♔xe5 35.fxe5 ♖xg5 36.exf6 ♖xg1+ 37.♙xg1 ♙h7 38.f7 ♙g6

39.♙f2 ♔f6 and this is another funny position where it is probably impossible to improve for both sides. Maybe white can try to put the king on a4 and push b4 to get something.]

32.♘g5 ♖g7?! Not accurate. Black should play [32...♖g6! 33.exd7 ♔xf4 34.♔c3+ ♙g8 35.♔e1 ♖xg5 36.♔e8+ ♙g7 37.♖xg5+ ♔xg5 38.♔xa8 ♔f6= with perpetual check.]

33.exd7 ♖xd7 [33...♔xf4 34.♔c3 ♔d4 (34...♔f5 35.♖e1 ♔xd7 36.♘e6+; 34...♙g8 Compared to the position after 32...♖g6, White now has 35.♔xg7+-)

35.♔e1 ♖xd7 36.♘e6 ♔f6 and White is winning because Black will lose control of the a1–h8 diagonal after the nice 37.♖f1! ♔xb2 38.♖f2+-]

34.♔e3 Now the White knight will take the strong e6 square.

34...♖e7 35.♘e6↑

♖f8 [35...♖ae8 36.b3 ♖xe6 37.dxe6 ♖xe6± with long-term suffering without the pawn.]

36.♔e5 White cannot hurry to exchange the queen, and should play [36.♔g3 but is not clear what to do next.]

36...♔xe5 37.fxe5 ♖f5 38.♖e1 h6? Decisive mistake. Alekhine blunders a simple tactical idea. He could still fight after, for example: [38...♖xe6 39.dxe6 ♙g7 40.♖e3 ♙f8 41.♖a3 a5 42.♖b3 ♙e7 43.♖xb6 ♖xe5 44.♖a6 ♖e1+ 45.♙g2 ♖e2+ 46.♙g3 ♖xb2 47.♖xa5 ♙xe6 48.♖xc5 ♖xa2 49.♖h5 ♖c2 50.c5 ♙f6; 38...♙g8 Black avoids the ♘d8 trick and prepares ♖xe6-♙f8-♙e7. 39.b3 ♖xe6 (39...h6 40.♙g2 ♙f7 41.♘d8+! ♙e8 42.♘c6 ♖g7+ 43.♙h1 ♖f2 and Black will not be able to stop the White pawns. 44.♖g1 ♖xg1+ 45.♙xg1 ♖xa2 46.e6 ♖d2 47.♙f1+-) 40.dxe6 ♙f8 41.♖d1 ♖xe5 42.♖d8+ ♙e7 43.♖d7+ ♙xe6 44.♖xa7

♖e2 45. ♖xh7 ♖xa2 46. ♖h6+ ♔f5 47. ♖xb6 ♖b2 Thanks to his active pieces, Black has drawish chances.]

39. ♘d8!+- Black cannot take on e5 now because of the check on f7. The knight is coming to c6 and the White pawns will promote very easily.

39... ♖f2 40. e6 ♖d2 41. ♘c6 ♖e8 42. e7 b5 43. ♘d8 ♔g7 44. ♘b7 ♔f6 45. ♖e6+ ♔g5 46. ♘d6 ♖xe7 47. ♘e4+ 1-0

Editorial Preface

The tournament that kept all the attention of the Chess World is over, and it had a super dramatic last round.

Who could have predicted that both leaders, Kramnik and Carlsen, would lose in the very last round?! I cannot remember a tournament with bigger tension and drama like what we saw during the Candidates. Everything was possible!

The “lucky”, and much deserved winner, is Magnus Carlsen with 8.5/14. The “unlucky” second place goes to Vladimir Kramnik, who played very good chess, maybe one of his best tournaments in the last few years, as well with 8.5/14

The 3rd and 4th places are shared by Aronian and Svildler. Probably Aronian was not really happy with this, but for Svidler, it seems to be a great result — both finished with 8/14.

For Boris Gelfand, this clearly was not his tournament. Ivanchuk lost 5 games on time!!! However, he beat both Carlsen and Kramnik. And for Radjabov, it was just a disaster!

For the next week, we can be already excited about the finishing 3 rounds of the German Bundesliga, which will see its final stage at “Schloss Schwetzingen”.

In the current issue of CEWN, we comment both games from the last round of the Candidates: Carlsen-Svidler and Ivanchuk-Kramnik. This comes next to much more great chess material.

Enjoy the CEWN Nr 58!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Carlsen, Magnus (2872)
— Svidler, Peter (2747) [C84]

FIDE Candidates London ENG (14.2), 01.04.2013

[Arkadij Naiditsch]

The last round of the Candidates. Carlsen and Kramnik are leading the event with +4, but Carlsen has a better tie-break. If Carlsen makes a full point, nothing can help Vladimir anymore. Kramnik is playing Ivanchuk with black. If both players draw, Carlsen will be declared winner as well; the same goes for a double 0. We will see a very strange and slightly atypical game by Carlsen, who after a playing very good (as usual) completely lost control over the position. It is a little weird to see Carlsen as a mortal human being!

1.e4 e5 2.♘f3 ♘c6 3.♚b5 a6 4.♚a4 ♘f6 5.0-0! ♚e7 6.d3 The Spanish with 6.d3, one of Carlsen's favorite openings. Maybe White does not get any advantage out of the opening, but the game is "slow" and there is enough time to outplay the opponent. As we can remember, Magnus won a nice game against the same Peter Svidler in this opening with Black just 7 rounds earlier...

6...b5 7.♚b3 d6 8.a3 Quite a rare move. More often, White plays 8.c3. A great game to follow from the White side is Leko-Caruana from Wijk aan Zee.

8...0-0 9.♘c3 White's main idea is to remain ready against Black's ♘a5-♚a2-c5. Now the White knight will be able to enter immediately to the d5 square.

9...♚b7 Preparing the ♘a5 move. In general, I think it is easier for Black to keep the bishop on e6. So, maybe a move like 9...♚d7 might be an option too.

10.♚d2 White is acting against the ♘a5 move once again.

10...♚d7

11.a4! A very strong move. Magnus shows a great understanding of the position. Now the Black bishop on b7 is not very well placed. The a4 move becomes very effective, even if it looks like a lost tempo because of 8. a3.

11...♘d8 The Black knight is going to e6. [In case of 11...♘d4 12.♘xd4 exd4 13.♘e2 c5 14.♘g3 it seems like White is doing a bit better. His next move could be ♘f5, followed by ♚f3, with some attacking chances against the king.]

12.axb5 axb5 13.♚xa8 ♚xa8 We have a very typical Spanish position. Probably White is doing a bit better, but Black is very solid. White needs to find a plan.

14.♘e2 I am not sure whether this move can bring any advantage for White or not. [14.♘d5!? This seems to be the only attempt to reach a +/- evaluation. In case of

14...♞xd5 15.exd5, the Black knight on d8 is very badly placed, and in case of 14...♞e6 15.♞xe7, White's position should be a little better.]

14...♞e6 15.♞g3 c5 Now Black controls all the center. White's only chance of getting a better position is to start some play on the kingside, which is very difficult to achieve.

16.♞f5 ♞d8 Of course, Black is not giving away his bishop.

17.c4 A typical move. White is stopping Black from playing d5 and, at the same time, defending against the c4 move. However, the d4 square is getting weak and White's pawn structure is clearly not the best one anymore.

17...bxc4 18.♞xc4 Black is trying to push d5.

18...♞c7 19.♞e1 and White is protecting against this idea.

19...♞e8?! A very strange looking move to me. Why not simply to put the rook on b8 and play g6 next, or ♞c6-♞b5. The position looks very equal.

20.♞c1 Magnus is starting to go for the Black king, but with the knights on f6 and e6, Black is very safe. [An attempt to get rid of the weak pawn on b2 with 20.b4 would be countered by 20...d5! 21.exd5 ♞xd5 and probably only Black can play for an advantage here.]

20...♞h5 [It does not work to play 20...d5 21.exd5 ♞xd5 22.♞xe5 and White is a pawn up. 22...♞xe5 23.♞xe5 ♞xc4 24.♞xc4]

21.g3 Very logical reaction, but maybe White should not have been afraid of ♞hf4. [21.b4 using his chance to exchange the b2 pawn. 21...cxb4 22.♞xb4 and now, in case of 22...♞hf4?! 23.♞a3 White gets a huge pressure against the d6 pawn and gets a clear advantage.]

21...g6 The position is now getting very complicated.

22.♞h6+ ♞g7 In many lines, Black might want to play ♞ef4, so Magnus decides not to give Svidler any chance to use some tactical tricks

23.♞g5 ♞xg5 24.♞xg5 Let us take a fresh look at the position. It seems like White is slightly better again: the knight on h6 is attacking the f7 pawn and the Black bishop on c7 is quite passively placed.

24...d5! Very good decision by Black. We should not forget that Magnus is playing for a huge jackpot: the WC match. This builds a huge pressure even in the World's Nr.1

25.exd5 [White does not get anything with 25. ♖xd5 ♖xd5 26.exd5 ♖a5! pushing away the rook from the e-file, followed by f6 and ♔xd5. Black is perfectly fine,]

25...♖xd5 26.♘g4?! It looks like Carlsen has just blundered his opponent's next move. [A much safer move for White would have been 26. ♖xd5 ♔xd5 27.♘g4 and, of course, the position is close to a draw, but only White can play for a win.]

26...♖f3! Very strong. The position is just crazy, and I think Magnus wanted to avoid this at all costs.

27.♖f6+ [Maybe a safe move like 27.h3 was still very playable.]

27...♔g8 28.♘h6+ ♔f8 29.♔e3 The game is getting super exciting. Black wanted to give mate with ♔h3, but White is attacking his king from all sides as well!

29...♖b7 Very logical. Black wants to play ♔c6 next.

30.♖h4 A very human reply. [The crazy computer move 30.♖h8! might give White some advantage. 30...♔c6 31.f3 The position remains very complicated and, who likes to play with ♘h6 and ♖h8?!]

30...♔h3

31.f3? After this move, Black is completely taking over the game. [White had a great tactical trick: 31. ♖d5! Very exact calculation was needed to play this move, and Carlsen was in slight time trouble already. 31... ♖xd5 32. ♔xc5+ ♔g7 33. ♔xd5 ♔xh6 34. ♔xf7! A double attack on the e8 rook and c7 bishop. 34... ♔c8 It seems like Black is just winning, but 35. ♖e7! A really great move that is very hard to find during a practical game. 35... ♔f5 36. ♔xf5 gxf5 37. ♔c1! and Black is hopeless against White's ♖d6 next. 37... ♔g6 38. ♖d6 ♖xd6 39. ♔xc8 with good winning chances for White, but I think that to find such a line in a practical game is just impossible!]

31...♘f4! Black is using his chance!

32.gxf4 ♔xh4 33.♘xf7

33...♙xf3! Black is suddenly just winning! The bishop pair plus a strong attack and White's problems with the clock do not leave a chance to escape even to the great Magnus.

34.♙f2 ♖g4+ 35.♙g3 exf4 Black is a clear pawn up in the endgame. The bishops are very well placed and the White knight is totally out of the game. The game is basically over.

36.♖xe8+ ♔xe8 37.♙xg4 ♙xg4 38.♘g5 The last attempt by White to complicate the position ends in nothing.

38...h6 39.♘f7 h5 40.♘h6 ♙d1 The time-trouble is over and, with it, the game.

41.♙f2 [Of course, it is no good to play 41.♙f7+ ♔f8 42.♙xg6 ♔g7 and Black is winning a piece.]

41...f3 42.h3 ♙f4 43.♘f7 g5 I think White could just resign, but as Carlsen said in the press conference after the game that he did not want to resign until he was sure that Ivanchuk would win against Kramnik.

44.♙e1 g4 The Black pawns are unstoppable.

45.hxg4 hxg4 46.♙xd1 g3 47.♙e1 g2 48.♙f2 ♙h2 A very exciting game! Who would think that in the last round both Carlsen and Kramnik would lose their games?! Chess is full of surprises!

0-1

(2) Ivanchuk,Vassily (2757) – Kramnik,Vladimir (2810) [B08]

FIDE Candidates London ENG (14.3), 01.04.2013

[Arkadij Naiditsch]

Before the round, it seemed like Kramnik needed a full point to even have a theoretical chance to win the tournament, and who could be a better opponent than Ivanchuk!? Meanwhile, Carlsen was playing White against Svidler with a better tie-break. So, Kramnik decided before the game to go all or nothing, which in the end turned out to be a bitter decision for him.

1.d4 d6 2.e4 In the candidates, Ivanchuk lost 5 games on time! So, Kramnik wanted to get a complicated position, and he likes the Pirc.

2...♘f6 3.♘c3 g6 4.♘f3 ♙g7 5.♙e2 White chooses a very solid line with ♙e2.

5...0-0 6.0-0 a6 7.h3 ♘c6 Trying to provoke the d5 move, after which the bishop on g7 will become super strong.

8.♙g5 b5 What a crazy line by Black. This cannot be good, but Kramnik takes the risk, trying to achieve complications at all costs!

9.a3 Ivanchuk remains very cool. [In case of 9.d5 trying to get the knight to d4, Black has a tactical resource: 9...b4!]

9...h6 10. ♖e3 White's position seems to be very good: a strong center, plus the idea of playing d5 next. This forces Black to be very careful in order not to get in big trouble.

10...e5! Black needs to do something in the center and the e5 move is exactly the right choice. Even though White keeps his advantage, Black gets what he wanted — a very complicated game with three possible results!

11.dxe5! Correct decision. [A worse choice for White would have been to play 11.d5?! ♘e7 and we have sort of a KID structure with the usual plan for Black to play ♘h7-f5 or ♘d7-f5, with very unclear play.]

11...dxe5 12. ♔c1 Using a "free" tempo because the pawn on h6 is hanging now.

12...♔h7 13. ♖c5 Taking away the e7 square from the Black queen.

13...♖e8 14. ♖d1 and White got the only open d-file.

14...♗d7 I think it is obvious that White is doing better, but the position is far from being simple. As we know from the KID structures, Black's position is very solid, and if he manages to establish the knight on d4 by exchanging the dark-squared bishops, the position might become totally unclear.

15.b4! Ivanchuk continues playing a great game. Of course, White's play must be on the queenside, and the idea of playing b4, followed by a4, is very effective.

15...♔c8 16. ♔e3 ♘d8 Black is transporting his knight to e6, clearly the best square.

17.a4 bxa4 18. ♘xa4 White has managed to open the a-file, so the Black pawn a6 is getting under attack.

18...♘e6 19. ♖c4 It is never wrong to put the bishop on c4.

19...♘h5 20. ♘c3 ♘hf4 Black is still fighting. Now ♘xg2 will always be a threat. White needs to count with it on every move.

21. ♘d5?! Until here, Ivanchuk played a great game and is clearly better. It was time to continue in the right path with [21. ♖a5 with the simple idea of playing ♖da1. 21... ♘xg2 This does not work because of 22. ♔xg2 ♘f4+ 23. ♖g1 ♖xh3 24. ♘e1 The g2 square is protected. White is a piece up and winning.]

21...♗b5! A strong move by Black. White is escaping from the pressure on a6 for one move.

22. ♖b3 ♖c6 **23.** ♖a5 ♔b7 The position is getting totally unclear! I guess that by now Kramnik was very happy with his own play, but not that happy with Carlsen's position, who seemed to have a clear advantage against Svidler. So, to play for a win seemed to be the only choice for Vladimir — it does not matter how!

24.g3!! Wow, what a move! It is clear that Ivanchuk was afraid of Black's f5 and decided to release the pressure of the position by sacrificing a pawn. A really fantastic move by White.

24... ♖xh3+ [A try to go into a complete mess does not seem to work for Black. 24...f5 25.gxf4! Cool and strong, following the rule: if You are not sure about what to do, get some material. 25...exf4 26. ♖xf4 and probably Black does not have enough compensation for the piece.]

25. ♖g2 ♖hg5 26. ♖h1 pushing the Black king to g8.

26... ♖g8 [This would lead to a pretty mate: 26... ♖xf3?? 27. ♖f6+ ♖h8 28. ♖xh6+ ♖xh6 29. ♖xh6#]

27. ♖xg5 ♖xg5 28.f3! White does not panic and keeps cool. The pressure on the a6 pawn and the great position of his pieces give him better chances.

28... ♖xd5 Not a nice move to make, but what else to play?! White's threat of playing ♖e7 was too dangerous.

29. ♖xd5 c6 30. ♖c4 Now it is clear that the pawn on a6 is going to fall.

30... ♖c8? This move looks bad. Probably Kramnik was still hoping to win the game as he was not sure about what would happen in the Carlsen game. [The simple 30... ♖e6! 31. ♖xe6 ♖xe6 32. ♖ha1 would just lead to a slightly better position for White, with big drawing tendencies.]

31. ♖b3! Very strong! Fixing the f7 pawn and not giving Black the chance to play ♖e6 that easily.

31...h5 Black tries to create something on the kingside, but there is nothing left to do anymore. White is simply crushing the whole position on the queenside.

32. ♖e3 ♖e6 33. ♖ha1 The a6 pawn is falling.

33...h4 34.gxh4 ♖d8 Black still has some hopes, but Ivanchuk stays cool.

35. ♖xa6 ♖c8 36. ♖h1 It is hard to give Black an advice here. White is completely dominating the position with his extrapawn!

36...♖c7 37.♙xe6 This move was not necessary, but Ivanchuk chooses a simple way to finish the game.

37...♖xe6 38.b5! The b-pawn takes Black's last hopes.

38...♖b7 39.b6 c5 40.♖b1 ♙f8 The time trouble is over and, with it, the hopes to save the game for Kramnik. I guess he stood up now and was totally shocked, as Carlsen was close to resigning his game against Svidler. What drama!

41.♙d5! Precise technique by Ivanchuk.

41...♙b8 42.♖ba1 ♖d6 [Of course, it is losing to play 42...♖bxb6 43.♖a8 ♙c7 44.♙h6 and White is winning the bishop on f8.]

43.♖a8 ♖xd5 44.♖xb8 ♖xb8 45.exd5 Bad luck for Black. The endgame is completely lost.

45...♙d6 [In case of 45...♖xb6

46.♖a8 ♙g7 47.♖xf8! White is a full piece up. **47...♙xf8 48.♙xc5+ ♙e8 49.♙xb6]**

46.♖a6 ♖b7 47.♙f1 and the White king is going to b5. Black is hopeless! What an emotional finish to the Candidates with a double loss by the leaders, Carlsen and Kram-

nik. Who would have bet on this before the last round? Clearly not Kramnik, who showed very strong character by playing for a win with the Black pieces, while avoiding drawish continuations!

1-0

(3) Carlsen,M (2872) – Gelfand,B (2740) [B30]

FIDE Candidates London ENG (10), 27.03.2013

[Csaba Balogh]

A great game by Carlsen! He played in his usual style, avoiding long theoretical battles and simply aiming to get a playable position with many pieces on the board, in order to slowly outplay his opponent.

1.e4 c5 2.♘f3 ♘c6 3.♙b5 Recently, the players prefer to avoid the Sveshnikov defense, which was the surprise weapon of Gelfand against Anand in their World Championship match last year.

3...e6 4.0–0 [A few rounds earlier, Carlsen tried 4.♙xc6 against Radjabov. Later on, he made a lucky escape in that game.]

4...♗ge7 5.♖e1 a6 6.♙f1 Quite a positional handling of the opening. White saves his bishop and is ready to occupy the center with c3-d4.

6...d5

17. ♖e5! ♔b6

19. ♖xd8+! using the fact, that Black cannot take back with the rook. [19. ♙c7 was not winning because of 19... ♖xd1! 20. ♙xb6 ♖xe1]

22...♔c2 The only move to avoid ♘d5! [22...♔xc4 drops the queen after 23.♙xf6 ♙xf6 24.♖d8+! ♜xd8 25.♙xc4 and there is no mate on the back-rank because the c4 bishop retreats... 25...♙xc3 26.bxc3 ♜d1+ 27.♙f1+-]

23.b4! White finally succeeds to breakthrough the a5 blockade. Black was missing only one move to play a4, fixing the queenside pawn structure. The e7 bishop is

overloaded with the defense of the f6 knight, so White does not need to worry about his b4 pawn.

23...axb4 24.axb4 ♘h5! Gelfand finds the best chance, looking for tactical complications... Otherwise, White simply pushes b5 with a huge advantage. [Black cannot leave his back-rank with 24...♖a1 25. ♕xf6! ♕xf6 26. ♖b8+ +-]

25. ♖e5 ♕f6 Gelfand misses a tactical point... [25...♖a1! would have the best chance, although the position remains pretty unpleasant for Black 26. ♖d1 avoiding the ♖xf1 and ♖xd3 threats. 26...♖xd1 27. ♘xd1 ♖xd1 28. ♖b8+ ♕f8 29. ♕c5 h6 30. ♖xf8+ ♔h7 31. f3± with a small advantage for White thanks to the better pawn structure and the bishop pair.]

26. ♖xh5 ♕xd4 27. ♖xd4 ♖xc3 Black seems to be more than fine, as d4 and b4 are hanging, but a shocking move completely changes the evaluation...

28. ♖a5!! Using the weakness of Black's back-rank, Carlsen consolidates his position.

28...♖f8 Black was forced to go to passivity to control the 8th rank.

29. ♖b6 Despite the material equality, White has a big advantage. His pieces are more active and the queenside pawn majority plays the main role.

29...e5 30. ♖d1 g6 Black finally opens the back-rank.

31. b5 ♕e4 Carlsen has played a perfect game until this moment. From now on, he makes some inaccuracies and lets Black back into the game.

32. ♖f6 White should have kept the b7 pawn under permanent attack to avoid the bishop transfer to e6. The next pair of moves are inaccuracies. [Black has basically no moves after 32. ♖d7 White can strengthen his position in many different ways. 32...♔g7 33. ♖d6 ♖a8 There is no chance for activity because of 34. ♖e7 ♖f8 35. h4+- Opening the back-rank and slowly breaking through with c5.]

32...h5 [32... ♕f5! should have been played immediately.]

33. h4 [33. ♖e7! to avoid ♕f5-e6.]

33... ♕f5! Gelfand has found the right plan. He drives his bishop to e6 from where he can put the queenside pawns under pressure. Finally, there is something to play for Black, even if it costs a pawn.

34. ♖d5 ♖c1 [34... ♕e6 35. ♖xe5 ♖c1 is the game.]

35. ♖xe5 ♕e6 36. ♖d4 ♖a8 Suddenly, Black succeeded to create counterplay, but with his following great moves, Carlsen swaps away his dreams of surviving in this game.

37. ♖e2!! A brilliant move! White wants to clear the unpleasant pin on the first rank by playing ♖d1, but the question was what would happen if Black plays ♜a1. ..

37... ♙h7 [After 37... ♜a1? Carlsen has prepared the nice winning line 38. ♜d8+ ♙h7 39. ♚e5!! ♚xf1+ 40. ♙h2 Black can only give a few checks, while White is mating... 40... ♚g1+ 41. ♙g3 ♜a3+ 42. f3+-]

38. ♜d1! ♚c3 39. ♚e4! That is it! It is amazing how, with his last three moves, Carlsen improved his position so much. He has a technical win again.

39... ♜a1 Gelfand tries to create the pin again on the back-rank, but without the rooks on the board, it is not dangerous anymore...

40. ♜xa1 ♚xa1 41. c5 White simply wants to push c6, take back with the queen, advance his pawn to b7 and then promote the pawn automatically. It is hard to do something against this.

41... ♚c3 42. ♚xb7 ♚e1 This was Gelfand's last desperate try. He is threatening ♙c4, but the pawns are too far advanced — White does not need to pay attention to that. [42... ♚xc5 43.b6 is also hopeless.]

43.b6 ♙c4

44. ♚f3! ♚xf1+ [44... ♙xf1 also loses after 45. ♚xf7+ ♙h6 46. ♚f4+ ♙h7 47. ♙h2! White is ready to push his pawns, Black is unable to create counterplay. 47... ♙a6 48.c6+-]

45. ♙h2 ♚b1 46.b7 The pawns are promoting automatically.

46... ♚b5 47.c6 ♙d5 48. ♚g3 Black resigned.

1-0

(4) Kramnik,V (2810) – Radjabov,T (2793) [E60]

FIDE Candidates London ENG (11), 28.03.2013

[Csaba Balogh]

A hard-fought game with many nice tactical elements. Radjabov was in terrible form during the entire tournament. In this game, Kramnik calculated one move further in the critical position...

1.d4 ♘f6 2.c4 g6 Radjabov chooses his favorite King's Indian defense!

3.g3 Kramnik has played the 3.g3 system three times in this tournament. The only "difference" is that, in the other two games, his opponents wanted to play the Gruenfeld defense.

3...c5 [Grischuk tried the 3...♗g7 4.♗g2 d5 setup.; And Gelfand played the most solid 3...c6 system, but in all the games Kramnik introduced interesting novelties and created problems for his opponents.]

4.♘f3 ♗g7 5.♗g2 cxd4 6.♘xd4 Aronian is considered to be the biggest expert of this line with White.

6...0-0

7.♘c3! The move order is very important! White needs to prevent d5 before castling. [7.0-0 allows 7...d5 8.cxd5 ♘xd5 with comfortable equality. Here is a recently fashionable way to make prearranged draws with 9.♘b5 ♗e6 10.♘d4 ♗c8 and repetition.]

7...♖c7 This is the concrete attempt to equalize. [7...♘c6 8.0-0 ♘xd4 9.♖xd4 d6 is the old main line, but White gets a small advantage here due to the space advantage.]

8.b3 d5! 9.♘db5 [The point is that 9.♘xd5? loses a huge amount of material after 9...♘xd5 10.♗xd5 e6 11.♗g2 ♖d8 and the pin is deadly. 12.e3 e5-+; 9.0-0 is the alternative line to the text move.]

9...♖a5 10.♗d2 dxc4 11.bxc4 Black got a nice pawn structure, but White is ahead in development.

11...♖d8 Both players are following the theory. [11...♘c6 is the other option for Black.]

12.0-0 a6 13.♘a3 ♗f5

14.♘c2! Improving the knight, it is heading to e3. An interesting fact is that there were only two games in the database for this position, but those were played by Aronian and Gelfand as White (both are playing on this

tournament), so Radjabov should have been prepared for this line, however, he spent 1 hour to reach this theoretical position. [The greedy 14. ♖xb7? runs into problems along the d-file. 14... ♖a7 15. ♗g2 ♖d7! 16. ♘d5 e6 Black wins material.]

14... ♘c6 15. ♗e3 ♖d7 This is the novelty. [15... ♖d4 happened in the previous games. Kramnik has definitely a huge analysis here.]

16. ♘xf5 Gaining the bishop pair and freeing the b1 square for the rook to attack the b7 weakness.

16... ♖xf5 17. ♖b1 ♖ad8 18. ♖c1! A good human move to leave the pin. [The computer recommends the brave 18. ♖xb7 but Black gets very strong counterplay against the c4 pawn after 18... ♘a5! 19. ♖b4 ♖e6! Black wins back the pawn. The point is that 20. ♘d5 would be excellent to close the d-file and protect the c4, but it allows the tactical trick 20... ♘xc4! 21. ♖xc4 ♘xd5]

18... ♖e6 [18... ♖d7 made sense, to protect the b7 pawn and double the rooks. 19. ♖d1 ♖fd8]

19. ♖e1 A clever preparation. White would like to install his knight on d5, so he protects the e2 pawn first. [19.

♖xb7 ♘a5 In comparison to the game, Black takes with his knight on c4 and it becomes very active.; 19. ♘d5 is met by 19... ♘d4 and problems with e2.]

19... ♖xc4 Radjabov prefers to grab the pawn before it runs away... [White gets a nice advantage. 19... ♘e5 20. c5! ♘c4 21. ♗f4 b7 becomes too weak.]

20. ♖xb7 The position has simplified a bit and we believed the draw was very close. However, White's pieces are more active, the bishop pair has good potential and, until the appearance of the two a-pawns, White has real hopes to get an edge.

20... ♘e5 [20... ♘a5 is simply met by 21. ♖b1! with an advantage. The rook has been temporarily sent back to passivity, but on the other hand, the knight on a5 got out of the game. (21. ♖xe7?! does not work. 21... ♖c5! 22. ♖e3 There was no other square for the rook. 22... ♖xd2! 23. ♖xd2 ♘c4 After taking on e3, Black organizes his play against the doubled e-pawns with ♗h6.)]

21. ♗f4 [It would be interesting to know why Kramnik refused to play 21. ♖xe7!? ♘fg4 was probably Black's idea, trying to counterattack against the f2 pawn, but White can play (21... ♖c5 is not the same as in the 20... ♘a5 line because the rook has a free square on b7 now. 22. ♖b7) 22. ♘e4! ♖xa2 23. ♗c3 with a clear advantage. Suddenly, the Black pieces are missing their coordination. White simply threatens to win with h3.]

21... ♖e6 22. h3 A useful move, but on the other hand, it wastes an important tempo. [22. ♖d1 would have led to a clear advantage. 22... ♖xd1+ 23. ♖xd1 ♖c8 24. ♘d5 ♘xd5 25. ♗xd5 This is what White was aiming for. He is

better because of the bishop pair, the active rook on b7 and the weaknesses on e7 and a6.]

22...♘c4 23.e4!? Kramnik would like to settle his knight on d5 or to play e5 pushing back Black's pieces, but at the same time, he closes his bishop. [23.♖d1 gives an edge for White as well.]

23...♞e5! A strong retreat. Black gets rid of the bishop pair due to the threat of ♘d3, which was another drawback of the previous move.

24.♙xe5 ♜xe5 25.♞d5 ♜fe8 [25...♞xd5 26.exd5 ♜d4 27.♖xe7± The opposite — colored bishops usually give good drawing chances in such situations, but now the doubled rooks on the 7th rank are too strong.]

26.♞b4 White wants to put his knight on c6, sending away the e5 queen, which makes the e5 move possible. [26.♞c7!? seems to be stronger. 26...♜f8 (26...♜c8 27.♞xe8 ♜xc1 28.♞xf6+ ♙xf6 29.♜xc1 Two rooks are generally stronger than a queen.) 27.♞xa6 with an extra pawn!]

26...♜d7! A great defensive move! Radjabov was already in time trouble, which made his job very difficult. [26...♜c8 was the most logical reaction, but as Kramnik cor-

rectly pointed out at the press conference, White gets an advantage here after 27.♞c6! ♜e6 28.e5! ♞d7 (28...♞d5 loses to 29.♙xd5 ♜xd5 30.♞xe7+! ♜xe7 31.♜xc8+ +-) 29.f4! with a nice squeezing position. Black cannot take on a2 because of ♞xe7, while 29...♞b8 is strongly met by 30.♜xe7!! White wins some material in any case.]

27.♞c6 [White could not win a pawn with 27.♜xd7 ♞xd7 28.♞xa6 (28.♜c6 is met by 28...♜c3! Black holds the draw.) 28...♜a5! winning back the a2 pawn as White cannot play ♜c6 because of the e1 rook.]

27...♜e6 28.♜b6 We have reached the critical position. Radjabov had only 2 minutes for the remaining 13 moves and White is threatening to play e5. Kramnik has prepared a very deep trap against the most tempting move — taking on a2...

28...♜xa2? The decisive mistake! Black falls in the trap... White wins by force after the following long combination. Kramnik played all the moves instantly... [Black holds the draw after 28...♜c7! 29.♜xa6 ♞d7! with the idea of playing ♞b8 or ♞e5.

a) 29...♜c8 30.♜c4 is strong and White is ready to leave the dangerous pin with ♜b5 in the next move.;

b) 29...♜ec8 is tempting, but it is refuted nicely by 30.e5 ♞d7 31.♙d5!! ♜xd5 (31...♜xh3 32.e6) 32.♞xe7+ ♙h8 33.♜xc7!+- wins!;

30.e5 ♞b8 31.♜b6 ♞d7 and the draw is inevitable even after 32.♜b3 ♞b8 33.♜c3 ♜xa2=]

29.e5! ♞d5 **30.♖b2 ♔a4** [30...♔a3 loses to the pretty 31.♗b8!+-]

31.♕xd5 ♜xd5 32.♖b4!! This intermediate move was what Radjabov probably missed. [32.♞xe7+ did not work immediately because of 32...♜xe7 33.♖b8+ ♜e8! This is why the queen must be sent away from a4 first!]

32...♔a2 33.♞xe7+! ♔h8 [33...♜xe7 34.♔c8+ ♕f8 35.♖b8+- was the last move of the combination, which Kramnik prepared by playing 28.♖b6!]

34.♞xd5 ♔xd5 The game is over now. The technical part is very easy for Kramnik.

35.♔c4 ♔xc4 36.♜xc4 ♕xe5 Otherwise, White plays f4, but now Black has moved into the deadly pin...

37.♔f1! Black resigned as he does not have an adequate defense against f4! [37.f4? is bad in view of 37...♕d4+; 37.♜ce4 f6 38.♖f4 (38.f4 ♕d4+!)]

Endgame section

(15) Grischuk,A (2764) – Kramnik,V (2810)

FIDE Candidates

[Chess Evolution]

We are facing a typical endgame from the Berlin Defense. Kramnik is the biggest expert of this line, and he shows that despite the material balance and the appearance of the opposite-colored bishops, there are dangers in the position. Black is slightly better here because of the weaknesses of the White pawns on the queenside. We can easily realize that if Black succeeds to transfer his bishop to c2, he will collect all the pawns automatically, since they are fixed on the light squares. On the other side, the Black king protects his own pawns pretty well.

25...♖d8 Black trades the rooks off in order to make the queenside pawns more vulnerable.

26.♜xd8+ ♔xd8 27.♔f2 White activates his king and hurries to the queenside to protect the weaknesses.

27...♙f5! A clever decision by Kramnik. He forces White to give up his knight as, otherwise, ♙c2 is coming. After this sequence, the endgame might get quite unpleasant for White because of the poor bishop on b2, which cannot harass the Black pawns due to his own pawn on e5. [27...♞f5 was another try with the idea of getting access to the b3 pawn, but White plays 28.♞e2! is accurate, followed by g4 and f4, and Black can forget about the plan ♙f5-c2 forever.(28.♞xf5 ♙xf5 would be the triumph of Black's strategy as ♙c2 is coming next.)]

28.♞xf5 ♞xf5 29.g4 Grischuk wanted to force matters. Otherwise, Black quickly improves his king with ♔d7-e6 and the e5 pawn might become really weak. In addition, the transpositions to the pawn endgames with ♞d4 is always a dangerous option, which both sides needs to consider.

29...♞d4

30. ♖xd4? Grischuk was in time trouble and made a mistake in the calculation. This is quite often decisive in pawn endgames. The idea is risky right at first sight, because Black gets a protected passed pawn on d4, which plays a very important factor in all the endgames. [However, after 30. ♔e3! the endgame seems to be drawish. 30... ♞e6 It is better to keep the position locked, but on the other hand, this move is also equal to a draw offer. (30... ♞xb3?! allows counterplay after 31.e6 ♔e7 (31...fxe6? is a mistake. 32. ♙g7 ♔e7 33. ♙xh6 ♙f6 34.f4± White obtains dangerous connected passed pawns on the king-side and gets access to the queenside pawns as the king does not protect them anymore.) 32.exf7 ♔xf7 33. ♙e5 Suddenly, the poor bishop becomes a really strong piece. 33...c6 34. ♙c7± and only White can be better.) 31. ♔e4 ♔e7 (Black can never win the h3 pawn with 31... ♞f4 because of 32.h4! and White only gets rid of his weakness.) 32. ♙c3 and neither side can improve his position.]

30...cxd4 The following moves are more or less forced. Both sides are improving their kings.

31. ♔e2 ♔d7 32. ♔d3 c5 33. ♔e4 ♔e6 White is in zugzwang. He has only one move not to lose the e5 pawn.

34.f4 gxf4 35. ♔xf4

35...d3! This might be the move that Grischuk missed in the time pressure, when he took the knight on d4. Black sacrifices his passed pawn to get a weakness on e5. The key is the activity of the Black king!

36. ♔e3 ♔xe5 37. ♔xd3 ♔f4! The game is over. Black collects the h3 pawn.

38. ♔e2 ♔g3 39. ♔e3 ♔xh3 40. ♔f4 [40. ♔f3 is equally hopeless. 40...f6 winning the opposition by "wasting" a tempo. 41. ♔f4 ♔g2! 42. ♔f5 ♔g3 43. ♔xf6 ♔xg4-- and the h-pawn is too fast.]

40...♔h4 41. ♔f5 ♔g3 [The time trouble is over, and White has to resign in view of 41... ♔g3 42.g5 h5! 43. ♔f6 ♔g4--]

0-1

(16) Aronian, Levon (2809)
— Kramnik, Vladimir (2810) [D42]

FIDE Candidates London ENG (12.2), 29.03.2013

[Chess Evolution]

We will see quite a funny endgame. It is clear that White should be close to a draw: his king is in a great position, he has a free pawn on the kingside, and a1 is the “wrong colored corner”. This gives White huge chances to make a draw.

46. ♖d6 ♜d8! Black’s only hope is to reach his opponent’s g5 pawn as fast as possible

47. ♜c6 and White is going for the b5 pawn.

47... ♜e7 48. ♜xb5 ♜e6 49. ♜xa4 ♜f5 We are already at the critical position. To play g6 or to play h6? Or maybe an immediate ♜b5? Which way is the best? Let us take a look.

50.g6?? What a shocking mistake by Aronian! Not very often, we see the second highest rated player in the world making this kind of moves. [Another way to lose was 50. ♜b5? ♜xg5 51.c4 and now Black needs to find the strong 51... ♜f5! The king is coming back in order to help the Black bishop to stop the pawns. 52.c5 ♜e6 and Black is totally winning because the h1 square has the same color as the bishop.; 50.h6! This move would have saved the game. 50...g6 51. ♜b5 ♜xg5 52.c4 and now White is on time! 52... ♜xh6 53.a4 g5 54.a5 g4 55.a6 g3 56.a7 g2 57.a8 ♜ Draw.]

50... ♜g5 51. ♜b5 ♜xh5 52.a4 ♜xg6 The Black king needs to hurry.

53.a5 ♜f6 54.a6 [Probably, Aronian miscalculated this line. 54.c4 ♜e5 55.a6 ♜d4 56.c5 and now Black has only one way to go.

56... ♖c4+ 57. ♔b6 ♖xa6! capturing both White pawns.
58. ♖xa6 ♔xc5 and the g-pawn is equivalent to a queen.]

54... ♖d5 55. c4 ♖a8 Black easily stops the pawns now.

56. ♔b6 ♔e5 57. ♔c7 g5 58. ♔b8 ♖e4 59. ♔c7 g4 60. a7
g3 61. c5 ♖a8 62. ♔b8 ♖c6 In case of 63. ♔c7, g2 64. ♔xc6
g1 ♔ 65. a8 ♔ ♔g2 and ♔xa8. As we can see, even on the
very top, some miscalculations happen with “too much”
frequency.

0-1

Clash of the Titans

(17) Spassky, Boris V — Geller, Efim P [C77]

URS-ch26 Tbilisi (13), 1959

[Kamil Miton]

1.e4 e5 2.♘f3 ♘c6 3.♙b5 a6 4.♙a4 ♘f6 5.♚e2 This Ruy Lopez system was more popular a long time ago. Nowadays, some players still like to use it, especially grandmaster Tiviakov.

5...♙e7 6.c3 b5 7.♙c2 [7.♙b3!? With the idea of provoking Black to put his knight on a5.]

7...d5

8.d3 [8.exd5 ♘xd5 (8...♚xd5 9.d3 ♙f5 With the idea of putting on d3, however, White plays 10.♘bd2 ♖d8 11.♘e4 0-0 12.0-0 Black's pieces (Qd5-♙f5-♘f6) are artificially placed—White's position should be more pleasant.) 9.♘xe5 ♘xe5 10.♚xe5 0-0 11.0-0 ♙b7 As we see in some Marshall positions, Black should get a good initiative for the pawn.; 8.d4!? The same idea that we will

see later in the game. 8...exd4 (8...♘xe4 9.♘xe5 ♘xe5 10.dxe5 0-0 11.0-0±; 8...♙g4 9.exd5 ♙xf3 10.♚xf3 ♚xd5 11.♚xd5 ♘xd5 12.dxe5 ♘xe5 13.0-0 and White can try to convert his advantage of the pair of bishops.) 9.e5 ♘e4 10.♘xd4 (10.cxd4 ♙b4+ 11.♘bd2 ♙g4↑ Because of the unpleasant pins, Black gets counterplay.) 10...♘xe5 11.♙xe4 dxe4 12.♚xe4 c5 13.0-0 0-0 14.♚xa8 cxd4 15.cxd4 ♚xd4 16.♘c3± ♚e4 is coming next. Black does not have full compensation.) 11.cxd4 c5! Black immediately looks for counterplay in the center. 12.♙xe4 dxe4 13.♚xe4 ♙e6 with good compensation thanks to the pair of bishops and the weak light squares.]

8...0-0 9.♘bd2 ♚e8 10.♘f1! This is not accurate. White should first play [10.0-0 ♙e6 11.♖d1 (11.d4?! This does not work now. 11...exd4 12.e5 dxc3 13.exf6 ♙xf6 14.bxc3 ♙xc3↑; 11.a4!? A typical move to weaken Black's structure on the queenside.) 11...♙f8 and now White has a few options. Spassky tried a typical idea in the game (Nf1–Ng3 with h3–♘h2–♚f3). However, Black can put up the very promising h6–g6–♙g7 setup. Also, the a4 move is now possible. 12.♘b3!? with the idea to use the c5 square somehow. 12...h6 13.♙e3∞]

10...♙e6 White has some problems now because one idea for Black is to take on e4, and after dxe4, to play ♙c4.

11.♘g5 [11.♘g3 dxe4 12.dxe4 ♙c4 13.♚d2 ♚xd2+ 14.♙xd2= Without the queens, Black should easily equalize the position.]

11...♙g4! A good move which provokes some weaknesses.

12.f3 ♘c8 13.♘g3 h6 14.♘h3 ♙c5 [14...♙xh3 leads to unclear play, which is completely unnecessary for Black. 15.gxh3 ♙c5 Black controls the g1 square, but anyway, with the pawn on h6, White has chances to create pressure against the king with ♙g2-♘f5, etc.]

15.♘f2 ♙e6 16.0-0 ♘e7?! Instead of this, Black might try the simple ♙d7-♖ad8, or the idea of taking control of the d4 square after b4-d4. This ♘e7-♘g6 maneuver is thematic in this structure. The Black knight comes to g6 to support the kingside and Black is also able to improve his position after c7-c5. Unfortunately, Geller missed this.

17.d4! exd4 18.e5 ♘d7 19.♙d3 f5 20.exf6 [20.cxd4 ♙b6 21.♙e3 c5↪]

20...♘xf6 21.cxd4 ♙b6 The structure completely changed now. White's pieces get activity.

22.♙e3 Natural move. White might try not to lose time and immediately start his attack with [22.♘g4!?→ ♙xg4 (22...♘c6 23.♘xh6+→) 23.fxg4 ♘c6 Black is trying to get counterplay on d4, but White's attack is too strong! Given that all the White pieces put pressure on the kingside, the intuition dictates that Black should not survive here but... (23...♘e4 24.g5↑) 24.g5 ♘e4

a) 24...hxg5 25.♙xg5 ♘b4 26.♙d2 (26.♙g6 ♙xd4+ 27.♙h1 ♘xc2 28.♘h5 ♙d7 29.♙xf6 ♖e6) 26...♘xc2 27.♙xf6 gxf6 28.♙xc2 ♙xd4+ 29.♙h1±;

b) 24...♘xd4 25.gxf6 ♘xc2+ 26.♙h1+;

25.♘xe4 dxe4 26.♙b3+ ♙h7 27.g6+ ♙h8 (27...♙xg6 28.♙g3+ ♙h7 29.♙xh6 ♙xh6 30.♙h3+ ♙g6 31.♖f5+-) 28.♙xh6 ♙xd4+ 29.♙h1 gxh6 30.♖f7 ♖e7 31.♙xe4 ♖xf7 32.♙xf7 ♙g8 33.♖f1 ♙xb2 34.♙xc6 ♙xf7 35.♖xf7 ♖d8 36.g3 ♖d6=]

22...♙f7 23.♘g4 ♘c6 24.♖ae1 ♘b4 [24...♖xe3!? 25.♘xe3 ♘xd4 26.♙h1 ♘xc2 27.♙xc2 d4↪ It looks like Black has taken the initiative. For the exchange, he has two bishops, a strong center and most importantly, White has no attack anymore.]

25.♘xf6+ ♙xf6 26.♙h7+ ♙f8 27.♙h8+ ♙g8 [27...♙e7!? 28.♙g5+ ♙d7 29.♙xe8+ ♖xe8 30.♙xf6 gxf6 31.♙f5+ ♙d6 32.♙h1 ♖xe1 33.♖xe1 ♙xd4 34.♙b1 ♙e6 and Black has compensation.]

28. ♖e4? In this complex position, it is easy to make mistakes. White should play [28. ♖e4! White has two threats: a3 with the idea ♖xd5, and ♗h5 with the idea ♗xg7-♖xh6. 28... ♔e7 (28... ♖xd5 29. ♖xd4 ♔xd4+ 30. ♔h1 ♖ad8 31. a3 ♗c6 32. ♗f5 ♔f6 33. ♖xd5!+-) 29. ♗h5 ♔f7 30. ♗xg7 dxe4 31. ♔xh6 ♔d7 32. fxe4 ♔e7 33. d5→]

28... ♔g6 29. ♖b3 ♔f7?! Black's idea is clear: to trap the queen. However, the most accurate was [29... ♔e7!-+ It is not easy to take the king to the e-file, but White is not able to take advantage of this. The idea is that after ♖e6, the king can escape to the d7 square — Black is winning.; 29... ♔h7 This simple queen exchange gives Black an advantage as well: 30. ♔xh7 ♖xh7 31. ♗c5 ♖xc5 32. dxc5 ♖d3 33. ♖f2 ♖c4→]

30. ♖d2 ♖h7 [30... ♖xd4+ 31. ♔h1 ♗d3 32. ♖xd5+ ♔e7 This is a slightly inhuman variation. It is strange but White does not have any good check now. 33. ♖xa8 ♖e6 34. ♔xe8+ ♔xe8 35. ♖d5 ♔d8! (35... ♗xe1 36. ♖xe1 ♔d8 37. ♖b4+ c5 38. ♗xc5 ♔xd5 39. ♗xe6+ ♔f7 40. ♗xd4 ♔xd4 41. ♖c3=) 36. ♖xe6 ♗xe1 37. ♖xe1 ♔xe6 White does not have any good jump with the knight! 38. ♖c3 ♖xc3 39. ♗xc3+ ♔f7 White can try to keep his knight on e4 and

the rook on the 3rd rank, but Black will create a far passed pawn on the a-file to win the game easily.]

31. ♖xb4 ♖xh8 32. ♖xd5+ ♔e8 33. ♗c5+ ♔d8 34. ♖xa8 Black finally grabs the queen, but the White pieces become active now!

34... ♖e8? It seems logical to exchange one rook to decrease White's pressure, but this move is a big mistake. After the correct [34... a5 35. ♗e6+ (35. ♗b7+ ♔c8 36. ♗xa5 ♖xa5 37. ♖xa5 ♔a6-+) 35... ♔c8 36. ♖c5 ♖xc5 37. ♗xc5 ♔d6→ Black is much better.]

35. ♖xe8+ ♔xe8 36. ♖e1 Without the Black rook, White gets additional threats on the 8th rank.

36... ♔g6 [36... ♔g8 37. ♖c6 ♖g6∞]

37. ♗e6+ ♔c8 38. ♗f8! [38. ♖e4 ♔xe6 39. ♖b7+ ♔xb7 40. ♖xe6 ♖xd4+ 41. ♔f1 ♖xb2↑ and it is hard to say who is better.]

38... ♔f7 39. ♗xh7? Probably, both players were in time trouble, so Spassky decides to play pragmatically and takes the piece. Objectively, it is a huge mistake. White should play [39. ♖c6 ♖xd4+ 40. ♔h1 and we can suppose that Spassky did not see the mate after 40... ♔b8, or that

he was just afraid of the counterplay on the queenside after 40...♙g8 (40...♙b8 41.♖e8+ ♔a7 42.♙a5 with ♖a8 next.) 41.♖e8+ ♔xe8 42.♙xe8

42...c5 (42...♙xa2 43.♙c6 ♙xb2 44.f4± The White bishops do not allow the Black pawns to advance. White can simply play f5-♗e6 next.) 43.♙a5 (43.♙c3 ♙xc3 44.bxc3 ♙d8! 45.♗d7 (45.♙c6 ♙c7 46.♙e4 ♙xa2↑) 45...♙xe8 46.♗xc5 a5 47.a3 ♙e7↗) 43...♙xa2 44.♙d7+ ♙b7 45.♙e6 c4 46.♙d5+ ♙c8 47.♗e6 ♙xb2 48.♗c5 and the White pieces prevent the promotion of the pawns.]

39...♙xd4+ 40.♙h1 c5! After winning the bishop on h7, White has a material advantage, but the problem is that his pieces not cooperate anymore.

41.♙a5 When this game was played, the time control was without increment. The players did not write the moves during the time trouble and I suppose that Geller was not sure if he had already made the 40 moves. That is why he probably played very quickly

41...♙d7?? Decisive mistake! After [41...♙xa2 42.♙b6 (42.b4 ♙d2-+) 42...♙xb2 43.♙c6 ♙e3! 44.♖d1 ♙d2-+ Black prevents the mate and easily wins the game!]

42.b4! Nice move! Given that the bishop on d4 will not protect the position anymore, White gets a strong final attack. Black is not able to capture the knight on time :

42...♙g8 [42...g6 43.bxc5 ♙xc5 44.♖d1++-]

43.♙e4 ♙xa2 44.♗f8+ ♙d6 45.bxc5+ ♙xc5 46.♖c1+ ♙d6 47.♙b4+ ♙e5 48.♗g6+ ♙e6 49.h4 a5 50.♗f4+ ♙e5 51.♗g6+ ♙e6 52.♗f4+ ♙e5 53.♗d3+ ♙e6 Thanks to his very active pieces and the weak Black king, White has a few ways to win.

54.♖c6+ [54.♙h7 ♙f7 55.♖c7+ ♙e8 56.♖c8+ ♙d7 57.♙f5++-]

54...♙d7 [54...♙f7 55.♙g6+ ♙g8 56.♖c8#]

55.♖d6+ ♙c7 56.♖xd4 ♙a1+ 57.♙h2 ♙xd4 58.♙xa5+ ♙d7 59.h5 ♙e7 60.♙b4+ ♙f7 61.♙c5 ♙d8

62.g4 Spassky found a nice and easy plan. Black's queen is helpless against three pieces that protect each other and dominate the board.

62...♔g5 63.♔g3 ♔d2 64.♙a3 ♔g8 65.♙c1 ♔d1 66.♔f4 b4 67.♙e5 The White king is coming to get the b-pawn.

67...b3 68.♔d4 ♔c2 69.♙b2 ♔h8 70.♙c3 ♔a2 71.♙b2 ♔b1 72.♔c3 ♔c2+ 73.♔b4 ♔g8 74.♔a3 ♔c4 75.♙c1 Geller gave up! He cannot do anything. White will capture all the pawns! A nice and interesting game with a lot of mistakes!

Editorial Preface

This week, we have 2 main chess events.

The German Bundesliga was won by the team from Baden-Baden for the 8th time in a row! And this year, it came with a perfect score. In the Team roster, there are superstars like: Carlsen, Anand, Aronian, Svidler, Adams, Bacrot, Naiditsch, Vallejo and many more.

All the details can be found on schachbundesliga.de

The running event of the week is clearly the Russian Team Champion with simply amazing line-ups and a lot of 2700 players like Caruana, Grischuk, Svidler, Mamedyarov, Morozevich, Karjakin and many more. At the moment, we are just at the 5th round from 7, so everything is still open.

The open on Martinique was won by Fedorchuk.

The Dubai Open is on the run, and the individual Israeli Championship as well.

As usual, we wish you enjoy this weekly issue of CEWN, the 59th.

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Jobava,B (2702) – Karjakin,S (2786) [C54]

08.04.2013

[Csaba Balogh]

A very impressive and convincing win by the extremely creative Jobava against the Russian star Sergei Karjakin.

1.e4 e5 2.♘f3 ♘c6 3.♙c4 ♙c5 4.c3 ♘f6 5.d4 exd4 6.e5 d5

7.♙e2!? Jobava likes to play rare sidelines, but as we will see, he studies them very deeply and is able to cause real surprises. [7.♙b5 is by far the most common move.]

7...♘e4 8.cxd4 ♙b4+ This is probably an inaccuracy. [8...♙b6 seems to be stronger. We analyzed the game Jobava-Malakhov in CEWN Nr 30, which continued like this and had a really beautiful finish.]

9.♙d2 ♘xd2 10.♘bxd2 Black has gained the bishop pair, but as we will see, he has problems to equalize, mainly because of his inferior pawn structure.

10...0-0 11.0-0 f6! This is a standard move. Black needs to undermine the center. If he succeeds to do so, he might quickly overtake the initiative. However, Jobava has studied the position very deeply.

12.♖c1! A very useful developing move. It supports well the plan of ♘b3-c5, which is White's main idea to fight against the bishop pair. [12.a3 happened in the previous game, but actually, this only helps Black to transfer his bishop to a better place (to b6). As we will see in the game, Black had serious difficulties with that bishop... 12...♙a5 13.♙b5 ♘e7 14.♖c2 ♙f5 15.♙d3 ♙xd3 16.♖xd3 ♘g6 17.g3 c5 Black undermined the center and overtook the initiative. Later on, he managed to win in the game Vallejo Pons-Ponomarev, Melilla 2011.]

12...♔h8?! Another standard and useful move in these positions, although it is too slow. The king is clearly better placed on h8. Black intends to make use of his d-pawn later on by taking on e5, followed by d4, leaving from the annoying check on ♖b3. [12...fxe5! 13.dxe5 ♙a5! should have been played, transferring the bishop to b6. It supports well the d4 ideas in the future. Black has a playable position. 14.♘b3 ♙b6; 12...♙g4 is also logical in order to increase the pressure on the central pawns, but it does not equalize neither 13.♘b3! and the e5 pawn cannot be taken. 13...♙xf3 14.♙xf3 fxe5 15.dxe5 ♘xe5 16.♖xd5+ ♖xd5 17.♙xd5+ winning the queenside.]

13...b3! This is the difference. Suddenly, the bishop can only go to e7, which is clearly a more passive place than b6, and also disturbs the communication between his own pieces. For instance, ♖e7-g6 could have been a useful regrouping; ♔e7 ♖ad8 is also a logical development, but they are all impossible now...

13...g4 14.a3 g4 15.♖e1 White strengthens his center and protects his e5 pawn after taking on f3... [15. ♖e1!? also looked pretty strong, with the idea of f4 and also ♖d3, which could be followed by the unpleasant ♖bc5, attacking on b7 and threatening ♖e6... 15... ♖xe2 16. ♖xe2 fxe5 17.dxe5± and f4 or ♖d3-♖bc5 in the next move.]

15...fxe5 16.dxe5! Jobava cleverly decides to leave the knights on the board. The one on c6 is badly placed — it deprives Black from playing c6 and ♖b6. It should be improved by transferring it to e6 (+) where it will be an excellent blockader -, threatening with ♖f4 and supporting the offense in the center with c5-d4. However, it is really difficult to achieve this. [16. ♖xe5 Black gets counterplay after 16... ♖xe5 17.dxe5 ♖xe2 18. ♖xe2 c6! and ♖b6 next, putting pressure on the f2 pawn.]

16...♖f4 Black tries to confuse matters. Probably, he is intending some non-standard regrouping like ♖g8, keeping the d5 pawn protected; or ♖af8, trying to get some counterplay on the f-file. [16... ♖d7 It was more logical to bring the a8 rook into the game, although it does not equalize either. 17. ♖c3! overprotecting the f3 knight in order to be able to play ♖b5. A side threat could be ♖d3. (17. ♖c5 ♖xc5 18. ♖xc5 ♖ad8 followed by d4 is not so clear.) 17... ♖ad8 18. ♖b5 a6 19. ♖xc6 bxc6 White gets a nice advantage after

20.e6! and the pawn cannot be taken. 20... ♖xe6? 21. ♖ce3! ♖f6 22. ♖bd4+- winning a piece.]

17.h3 [17. ♖c5 was also possible immediately, but the text move is useful, to open the back-rank.]

17...g4 18.♖c5! Black is forced to give up his bishop pair.

18...gxc5 19.♖xc5 d4 This pawn is rather a weakness now, as it is not supported by the Black pieces, but there was nothing else to do. [19... ♖f7 White surprisingly traps the f4 rook after

20. ♔c1!! ♖f5 (20... ♖e4 21. ♘g5+-) 21.g4!+- There is no good square to go to.]

20.e6! This passed pawn is much more dangerous than the one on d4. It also arrived with tempo as the bishop is under attack. Suddenly, both White rooks are excellently placed—the preparations with ♖c1 and ♖e1 were completely justified.

20... ♗g6 21. ♗d3 Jobava plays human chess and goes for a huge positional advantage. [21. ♗a6!? is the machine's idea, destroying Black's pawn structure and getting rid of the blockader of the e6 pawn. 21...bxa6 22. ♖xc6 with a winning advantage.]

21... ♖f6 White has many tempting alternatives and most of them give him a decisive advantage. [21... ♗xd3 22. ♖xd3 is lost for Black. The direct threat is ♘g5 and after 22... ♖e7 White can win with the prosaic 23. ♖d5! ♖d8 24. ♖xd8+ ♘xd8 25. ♘xd4+-]

22. ♘g5 Jobava tries to finish the game in tactical fashion and brings his pieces to the attack. [The computer simply plays 22. ♗xg6 ♖xg6 23. ♖b3 and b7 cannot be protected, as ♖b8 allows ♖xc6. 23... ♖af8 24. ♖xb7 ♖xf3 25. ♖xc6 ♖xf2 26.e7!+- wins.]

22... ♘e7 23. ♗xg6 hxg6 [23... ♘xg6 White has different wins. The most convincing is 24.g3! trapping the rook. 24... ♖xf2 (24... ♖f5 25. ♖h5+- with the double threat of ♖h7 and ♘f7, winning the rook.) 25. ♖h5 h6 26. ♘e4+- wins.; 23... ♖xg6 is refuted by 24. ♘f7+ ♖g8 25. ♖xc7+-]

24. ♘e4 Good calculation! White gives up his e6 pawn in order to free this square for his rook. Black cannot defend against the following mating attacks.

24...♔xe6 25.♘g5 ♔f6 [25...♔d6 is met by 26.♖ce5! ♘g8 27.♖e6+- and ♖xg6, ♔h5 are decisive.]

26.♖e6! The attack is rolling!

26...♔f8 27.♖xg6! ♔h5 threatens with mate!

27...♖h4 [27...♘xg6 28.♔h5+ ♕g8 29.♔h7#]

28.♘e6! [Black resigned in view of 28.♘e6 ♔f7 29.♖h5+ ♖xh5 30.♔xh5+ ♕g8 31.♖xg7+- Karjakin gets rarely defeated in such an impressive style!]

1-0

**(2) Moiseenko,Alexander (2703)
—Predke,Alexandr (2481) [D37]**

Loo RUS Loo RUS (1), 07.04.2013

[Arkadij Naiditsch]

We will see a great attacking game with very irregular rook maneuvers by White. Both White rooks will go to the g-file while the g2 pawn is still alive!

1.d4 ♘f6 2.c4 e6 3.♘f3 d5 4.♘c3 ♖e7 What to say about this opening? It has been played for over 100 years on the top level!

5.♖f4 0-0! 6.a3 Not the most popular line, but here things quickly become quite unclear.

6...b6 [6...♘bd7 should be the most principal move here.]

7.♔c2! I like this move a lot. White is preparing to play 7...♖b7 8.cxd5! and Black will not be able to take back with 8...exd5 because of 9.♘b5 !

7...dxc4 Black is going into a fight. Anyway, things look pretty good for White.

8.e4 ♖a6 Black needs to hold on to the only positive point of his position, the extra pawn on c4

9. ♖d1 White had a wide choice of possibilities to go on, but 9. ♖d1 is a very solid and good move. In general, Black often tries to play c5, White should have the d5 move against it. Another idea for White could be to play e5 followed by ♘e4 to attack the Black king. We have a more or less typical position, but it seems like White should be doing better.

9... ♚c8 A logical move, Black is moving away from the d-file and, at the same time, preparing to play c5.

10. h4!? Quite a typical move as well. Now the threat of e5 followed by ♘g5 becomes quite dangerous and the White rook might come into the game via ♖h3-♖g3. [A normal move like 10. ♙e2 c6 11. 0-0 would lead to quite an unclear position.]

10... h6 I am not sure if this is the best Black could do. By playing h6, he creates a clear weakness in his structure, which makes it easier for White to find a clear attacking plan. [Maybe Black could have started immediately his counterplay by playing 10... c5!? 11. d5 exd5 12. exd5 ♖e8 and the h4 move looks a bit dubious even when the position is pretty unclear.]

11. ♖h3! getting the rook into the attack. [It would lead nowhere to play 11. e5 ♘d5 12. ♘g5? looks dangerous, but in fact, is just losing. 12... hxg5 13. hxg5 g6 White is not in time to create any threats on the h-file.]

11... c5 Black is acting, but he is doing it one move too late.

12. e5 ♘d5 The position is very sharp and needs precise calculations.

13. ♙c1 Moiseenko avoids a direct play and prefers to keep all his threats. [It only seems to lead to a draw 13. ♙xh6 gxh6 14. ♖g3+ ♚h8 15. ♚d2 ♚h7 16. ♚c2+ ♚h8 and it is hard to say if White has more than a draw â (+) probably he does not.; Also, after 13. ♘xd5 exd5 14. ♖g3 ♚h8 15. ♚d2 ♚h7 it seems that Black holds somehow. The position is very unclear.]

13... ♘xc3! Black is starting some forced play. First of all, exchanging the White knight that could have come over the e4 square and later on to g5 or f6.

14. bxc3 cxd4 Another important move. Black is putting White in front of an important decision — what to take on d4 with?

15. ♖xd4 What else to do?! Moiseenko decides to bring another rook to the attack.

15... ♘c6 16. ♖g4 and it seems like White is really doing great, but Black has prepared a very unpleasant defensive move.

16...f5! What a great move! Suddenly, we cannot see anything direct that White could do against the Black king.

17.♖g6?! still leads to a very sharp position, but maybe White overestimated his chances a bit. [Safer was 17.exf6 ♜xf6 18.♖hg3 ♙f8 and now White has quite a few moves: 19.♙xc4 and 19.♖g6, with very unclear positions.]

17...♜f7! Strong defense!

18.♜hg3 [This does not work: 18.♙xh6 ♔h7 White loses his bishop.]

18...♔h7? This logical move maybe is the losing one as well! [Black should have been more careful. 18...♔h8! Now Black always counts on the ♜h7 protection. 19.♙xh6 Maybe White has a few other alternatives, but let us take a look at the direct 19...gxh6 20.♙d2 ♜h7 21.♙xh6 looks pretty dangerous, but Black is in time to defend everything. 21...♙f8 22.♜g8+ ♙xg8 23.♜xg8+ ♜xg8 24.♙xe6 Black got 2 rooks + a piece for the queen — that should be enough, at least, not to be worse.]

19.♙d2!! The killing move! White wants to play ♜xg7 next.

19...f4 [It is not helpful to play 19...♙f8 20.♙g5+! and the game is over. 20...hxg5 21.♙xg5 followed by ♜h5-♜h6 and mate.]

20.♙c2 Another good move by White.

20...♔h8 21.♙xf4! No reason to lose any time! White is simply crushing the Black position.

21...♜xf4 22.♜xg7 ♜f5 23.♙e4! Moiseenko is playing in great style! White wants to play ♜g8 or, if Black allows it, to play ♙g4.

23...♙e8 [In case of the slow 23...♙d7 24.♙g4 ♙e8 25.♜h7+ followed by ♙g7 mate.]

24.♜g8+ Simply winning back material.

24...♙xg8 25.♜xg8+ ♜xg8 26.♙xc6 So, a lot of things have happened. Let us take a fresh look at the position. White has a queen + pawn against 2 rooks, but all the Black pawns look shaky and, most probably, are going to fall. Also, the position of the Black king is not very trustworthy. White clearly has a huge advantage and, probably, a winning position.

26...♙c8 An attempt to hold the main pawn on e6.

27.♙xc4 ♖ff8 28.♙xe6 White can just take and take and take.

28...♖g6 29.♘d4 Everything is protected.

29...♙xh4 30.g3 ♙e7 31.♚c7 A very exciting game with a great attack by White!

1–0

(3) Movsesian,S (2695) – Tregubov,P (2611) [A11]

08.04.2013

[Csaba Balogh]

A nice tactical win by Movsesian. The game has a calm start, but it soon turns into a tactical slugfest.

1.♘f3 d5 2.g3 ♘f6 3.♙g2 c6 4.0–0 ♙f5 5.c4 dxc4 This is a rare line and probably an inaccuracy. [Black should hold the center with 5...e6 with thousands of games in the database.]

6.♘a3! e5 A tricky move, which might quickly overtake the initiative, but Movsesian knew exactly how to react against it... [White gets huge compensation if Black tries to hold the material with 6...b5 7.b3! This is a standard pawn sacrifice, opening the lines on the queenside. Black ends up with an extra pawn, but all of them are very weak and if one of them falls, that means the loss of the others as well. An illustrative line could be 7...cxb3 8.axb3 e6 9.♙b2 ♙e7 10.♘h4 with a double threat of ♘xb5 or ♘xf5, followed by ♚c2.]

7.♘xc4 [Of course, Movsesian is too strong to fall into the opening trap after 7.♘xe5?? ♙xa3 8.bxa3 ♚d4!–+ winning the game.]

7...e4 8.♘fe5 ♘bd7 White needs to act urgently, otherwise, Black takes on e5 and finishes the development with ♙e7 and 0–0. The d2 pawn remains backward as e4 becomes very strong.

9.d4! Strong idea! Getting rid of the backward pawn and opening the diagonal of the c1 bishop.

9...exd3 10. ♖xd3 ♜e7 If Black finishes the development with 0–0 and ♜b6, he gets a comfortable equality. White must do something quickly.

11. ♔b3! White finds the weakness in his opponent's camp! It is not easy to deal with the b7 pawn. If it moves, that would crucially weaken its colleague on c6, which immediately falls under the pressure of the g2 bishop. ♖b8 and ♔c7 move into ♕f4!

11...♖b6 [Black cannot hope for equality after 11...♘e6
12.♘f4! ♘xc4 13.♙xc4 White has gained the bishop pair.]

12. ♘a5! Another great move! Although it is a known idea that against the a7, b7, c6 structure, a knight on a5 is really unpleasant. Just like in the previous move, it is hard to deal with the b7 pawn.

12...♟xd3 This is the novelty. Black tries to create an isolated pawn, as ♖d1 seems to lose a piece. However, if we take a closer look, things are different... [12...♔c8 happened in the previous game. Despite the huge difference in the level of players, White has succeeded to obtain

a clear advantage 13. ♖f4 0–0 14. ♖e1! White occupies the center with e4! 14... ♖e8 15.e4 ♘f8 16.f3 ♘c5+ 17. ♘e3 ♘xe3+ 18. ♖xe3 with a clear edge, although Black succeeded to save the game later on. Karner-Polugaevsky, Tallinn 1973. Probably, Movsesian was familiar with this game.]

13. ♖d1!! Excellent reaction! It is clear that if White simply takes back on d3, he gets all the advantages he could get, but the question is what happens after the text move—R [13.exd3 ♔d7 followed by 0–0, ♖ad8 and occupying the d5 square. Later on, this gives Black good chances to equalize.]

13...♖bd7! Black unpins himself, so he threatens to leave with the bishop and also attacks the a5 knight. Has White missed this idea?! [13...♖bd5 with the same idea as in the game. However, it allows 14.♔xb7! ♕xe2 15.♖e1 (15.♖xc6? is bad in view of 15...♔c8! looks suspicious, but everything is under control.)

15...♙b5 and White wins after 16.♙xd5! ♞xd5 17.♞xc6 ♙xc6 18.♞xc6+ ♔f8 19.♞d1!+- winning back the piece. White remains with an extra pawn, but the main problem is the king on f8.]

14.♞xb7 ♞c8! Black thought everything was going according to the plan and ♞b8 wins the piece next move. But the cold shower is just about to come.

15.♙f4!! [15.♞xd3? ♞b8]

15...♙e4 [15...♙xe2? It is suicidal to open the e-file. 16.♞e1+-]

16.♙d6! This was the whole point that Movsesian had foreseen before playing ♞d1. Black is a piece up and the

king is extremely weak. It is hard to deal with the threat of ♙xe7 followed by Nd6!

16...♙xg2 [The computer suggests 16...c5! as only move. However, White is better after 17.♙xe7 ♞xb7 18.♞xb7 ♙xb7 19.♙xb7 ♞xe7 20.♙xa8 ♞xa8 White is better. He has a rook and a pawn for the two knights, but it is well known that in such endgames the knights work very badly together as there is no outpost to occupy. The rooks start to dominate them soon. 21.♞ac1 ♞b8 22.b3±]

17.♙xe7 ♞xe7 18.♞d6 A double attack on c8 and f7.

18...♙d5 Black had to sacrifice his queen, but he got three minor pieces for that. [18...♞f8 cannot lead to anything good for Black with such a weak king. 19.♙xg2 White wins. An illustrative line could be 19...♞d5 20.♞f5+ ♙e8]

21.♞xd5! cxd5 22.♞xd5 ♞b8 (22...♞d8 23.♞e4+-) 23.♞d1+- and Black gets mated. The f8 queen is really poorly placed and also deprives Black from castling king-side.]

19.♞xc8+ ♞hxc8 20.♞a3+

20...c5 White is better even materially with his queen and pawn for the 3 pieces, but the Black king remains weak and the minor pieces are lacking coordination. Movsesian immediately tries to make use of this.

21.g4! h6 with the threat of g5!

22.h4 ♖e6 [22...g5 creates another weakness for Black. 23.hxg5 hxg5 24.♔e3+ ♖e6 25.f3 Black has problems with the g5 pawn. He is doomed to defend passively... 25...♖g8 26.♖d2+- doubling the rooks on the d-file. Black cannot hold for long.]

23.f3 ♘d5 [23...♔f8± was probably slightly better, although the king does not find a safe shelter on the kingside, since White can explode the structure with g5-g6 anytime.]

24.♖d2! Very strong and logical, activating the rooks.

24...♖c7 25.♖ad1 ♘7b6 [25...♘5b6 is met with the same unpleasant move as in the game.]

26.♔d3! Another great move! White creates two threats: e4, and when the knight moves, ♔d6 wins the rook; and ♔h7 harasses the kingside pawns. Black cannot parry both threats.

26...♖ac8 27.♔h7! ♘e3 28.♔xg7 White decides to eliminate the kingside pawns and then promote his h-pawn. [White had time to save his rook followed by collecting the pawns. This was even stronger, but of course, the text is also good enough to win the game. 28.♖c1+-]

28...♘xd1 29.♖xd1 The h-pawn also falls.

29...♖xa2 30.♔xh6 ♖c6 31.♔f4 ♖c4 32.e4 White is ready to advance the h-pawn. Black is unable to create adequate counterplay.

32...♖b3 33.♖d2 a5 34.h5 ♘c4 35.♖d3 a4 Black is se arching for counterplay on the queenside, but the b2 pawn is always indirectly protected by ♔e5 check. White can continue focusing on his own plans and on how to make progress.

36.h6 The threat is ♔g5 and Black has no good move. If he moves to the back-rank, h7 is decisive. On f6, ♔g7 wins... Black parries this threat.

36...♖g6 It is quite sad that Black is forced to defend like this, but there was nothing better... White has many different wins, but Movsesian decides to finish the game in style. [36...♞xb2 37.♞e5+-]

37.♞d7+! ♔xd7 **38.♞xf7+** ♔c6 **39.♞xg6+** ♔b5 **40.♞g7!** A great place for the queen. It protects b2, threatens with ♞b7 and supports the h-pawn.

40...♞d6 41.♞d7+ ♔c6 **42.h7** ♞f7 **43.g5** ♞e6 The last move is also nice, but of course, everything else was equally good.

44.♞xc6+ and g6 next. Black resigned! A great game!
1-0

(4) Caruana,Fabiano (2772) — Jobava,Baadur (2702) [A53]

Loo RUS Loo RUS (3), 09.04.2013

[Arkadij Naiditsch]

Jobava is a great fighting player with a lot of swings. Sometimes, he manages to win a great game and sometimes he gets rather “crushed”. This time, Caruana rules the game.

1.d4 ♞f6 **2.c4** d6 **3.♞f3** g6 **4.♞c3**

4...♞f5 Jobava likes to play this slightly strange looking move. Black’s idea is simple, not to allow White to play e4. It is also a provocation for White to play h3-g4, which is not necessarily good.

5.d5 I guess this is one of the most logical moves White can do.

5...♞a6 6.♞d4 ♞d7 **7.e4** ♞c5 **8.f3** We are in a KID structure, but it seems to me that Black has just lost a tempo with ♞f5-♞d7. On the other hand, the Black knight is already on c5 and his idea could be to play c6 without including e5.

8...a5 Securing the position of his knight on c5.

9.♘e3 ♘g7 10.♔d2 White is preparing to castle long, followed by ♘h6-h4, and an attack on the Black king.

10...0-0 11.♘e2 Caruana decides to keep both options open: to castle long or short after taking a look at what Jobava actually wants to do next. Anyhow, a move like ♘e2 is quite useful for White.

11...e5 Black is starting his play, but, in my opinion, White's position looks clearly better. [Maybe 11...c6 could have been an option for Black. Still, Black would keep the e5 pawn and would check where will the White king castle.]

12.dxe6! Of course! To go away with the knight from d4 would simply make no sense.

12...fxe6 13.♘db5 Very typical and strong. The a5 move by Black is useful to protect the knight's position on c5 (avoiding b4), but now he cannot do anything to get rid of the knight on b5, which is very unpleasantly placed.

13...e5 Of course, to have White's e5 move in mind all the time is just terrible.

14.0-0-0 ♘e6 15.g4 I think we can clearly see that White is completely dominating the game. Black has no play on the queenside and White is starting his play on the kingside.

15...b6 16.h4 ♘e8

17.♔b1! Also a good positional move. There is no reason for White to hurry with the action on the kingside.

17...♔h8 18.♘d5 and Caruana starts his plan. Maybe 18.♖dg1 was a nice option as well, using the fact that Black has nothing to do...

18...♘xd5 19.cxd5 It is hard to give Black an advice, his position is really bad...

19...♘c5 [Black would end up not much better than in the game after 19...♘xb5 20.♘xb5 ♘d4 21.♘xd4 exd4 22.f4! with a huge advantage for White!]

20.♘c3 Another nice move by Caruana. White prepares to the maximum before pushing h5.

20...a4 21.h5 Finally!

21...gxh5 22.gxh5 ♗f6 Black's position really looks bad. The main problem is that there is no counterplay at all, which leaves space for White to do whatever he wants.

23.♖dg1 For example, simply improving the position of his rook.

23...♗f7 24.♖g5 By bringing the rook to f5, White's next f4 push will be much more effective.

24...♖g8 25.♖f5 ♖g2 The first active move by Black.. . although it does not help anymore.

26.♔e1 ♔e7 27.♗f1 Kicking away the Black rook from the 2nd rank.

27...♖gg8 28.♗b5 putting the bishop on an excellent position. White's idea is easy: to play ♔f2 followed by f4.

28...♗g5? This move is just losing. [More fighting was 28...♗e8! 29.♗c6 ♗d7 with, of course, a bad position for Black, however, things are by far not over.]

29.f4! now, even winning a tempo!

29...♗f6 [In case of 29...♗xf4 30.♖xf4 exf4 31.♗d4+ ♖g7 32.h6 the position needs no commentaries.]

30.♖f1 Black is done...

30...♖af8 trying to cover the f-file, but it is too late...

31.♖xf6! A nice final blow.

31...♖xf6 32.fxe5 By capturing the dark-squared bishop and opening the diagonal a1–h8, White is taking away the last hopes from Black.

32...♖xe5 33.♖f5 and the White bishop is coming to d4.

33...♖h2 34.♗d4+ ♖g7 There are a lot of winning moves here, but Caruana finishes the game with the most precise one.

35.♔c1! The h6 threat is deadly.

35...♖g8 36.♗xg7 ♖xg7 37.♖g5+ ♖h8 38.h6 A great opening-middlegame victory by Caruana!

1–0

Endgame section

(15) Frolyanov,Dmitry (2561)
— Tomashevsky,Evgeny (2722) [B14]

Loo RUS Loo RUS (1), 07.04.2013

[Chess Evolution]

After a big fight in the rook endgame, White managed to achieve a drawn position, although a few precise moves are still needed. Frolyanov plays the endgame part very accurately.

53...♖d7 54.♔c2! A very important move! [In case of 54.♔d2? d3! White would be in zugzwang.]

54...♗g7 [To play 54...d3+?! would make no sense for Black now. 55.♔d2 and the position is a simple draw. In case of 55...♔f2, 56.♗f8 and the f4 pawn is getting lost. Of course, 55...♔g3 ? is not possible because of 56.♗g8+ and b8♔.]

55.♔d3 ♗d7 56.♔c2 The position was repeated once and Black is looking for his only chance.

56...♔f2 57.♗f8 White, of course, does not miss his chance to get the f4 pawn.

57...♖xb7 58.♖xf4+ ♔e3

59.♗h4!! The only move that saves White! [Black would win after 59.♗f8? d3+ 60.♔c3 ♗c7+ 61.♔b2 d2 and White has no “saving” checks on the h-file. 62.♗e8+ ♔f2 63.♗f8+ ♔e1 64.♗e8+ ♔d1 We have a well known theoretical winning position.]

59...d3+ 60.♔c3 ♗c7+ 61.♔b2 ♗c2+ Black continues looking for practical chances. [It is not winning to play 61...d2 62.♗h3+ ♔f2 63.♗h2+ ♔e3 64.♗h3+ and Black cannot improve his position.]

62.♔b3 ♗f2 63.♔c3! The easiest way to get a draw.

63...♗c2+ 64.♔b3 ♗g2 65.♔c3 Black has no more ideas left...

65...♗g3 [This also leads to an easy draw: 65...d2 66.♗d4 and White will go on with ♗d3 next.]

66.♗h8 ♔e2 67.♗h2+ ♔e3 A great defense by White in a not very difficult endgame, but as we know, it is too easy to go wrong in an rookendgame!

1/2

(16) Bacrot,E (2705) – Tiviakov,S (2659)

06.04.2013

[Chess Evolution]

The following endgame is highly against the chess rules... White has all the advantages to have a won endgame, but it is drawn. His king is better and keeps the g6 pawn under attack, all the Black pawns are fixed on the light squares and the White bishop might attack them. The pawns on the queenside are also ideally placed from White's point of view. The Black bishop has two tasks: it must hold the b1–g6 diagonal to avoid ♖d3, winning the g6 pawn and also, when White plays ♜f1 with the idea of ♜h3–c8, it is obligatory to play ♜f5. Usually, such endgames can be won via zugzwang, but here it does not help...

46.a4 ♜b1 47. ♜c4 ♜c2 Black has an easy job, wasting time with the bishop. It is White's turn to find a breakthrough.

48. ♜e2 Black can never trade the a4 pawn for the one on g6, since it would lead to the loss of the h5 pawn as well. On the other hand, he is unable to create a passed

pawn on the queenside because of the excellent placement of the b4 and c5 pawns.

48... ♜e6 49. ♜c4+ ♜e7 50. ♜f1 ♜h3 is the threat, so Black is forced to play

50... ♜f5! 51. ♜e2 A small tactical trick to win with ♜xh5, but of course, Black parries it.

51... ♜e6 52. ♜c4+ ♜e7

53.a5!? White prepares to breakthrough with b5. This is a known motif in many endgames, it is worth to remember it! [53.b5 was the other option to make some progress. 53...a5 Black can lock the queenside.

a) 53...cxb5!? 54.axb5 a5 is also possible. Suddenly, Black can also put his hopes on his passed pawn.;

b) It is instructive that taking twice on b5 is losing. 53... axb5 54.axb5 cxb5 55. ♜xb5

55...♙c2 Black gets into zugzwang after 56.♙e2! ♙f3 is the threat. 56...♙e4 (56...♔d7 57.♙f3 ♔c7 58.♙d5+- and ♙f7 next.) 57.♙c4!+- Here is the zugzwang! The Black king cannot move, it either allows ♙f7 or ♔f6, while in case of bishop moves, ♙d5 and ♙d3 are decisive!

54.b6 Creating the potential threat of ♙a6, but Black gets counterplay. 54...♙c2! 55.♙a6 ♙xa4 56.♙xb7 ♔d7 and, suddenly, the a-pawn is more dangerous than the one on b6.]

53...♙c2 54.♔f4! Luring the Black king from the queen-side in order to breakthrough successfully. Black cannot allow ♔e5, so the next move is forced. [54.♙e2 ♙b1 55.♙f3 ♙d3 Here might come the break with 56.b5 but unfortunately for White, the Black king is too close to the c-pawn. 56...cxb5! (56...axb5? 57.♙xc6! would be the point. 57...bxc6 58.a6+- and the pawn promotes.) 57.♙xb7 b4 and Black is all right!]

54...♔f6! [54...♙b1? easily loses after 55.♔e5 ♙c2

56.♙f1 ♙h3 is threatened. 56...♙f5 57.f4!+- Zugzwang! The bishop cannot control both ♙h3 and ♙d3, while the moves of the king allow ♔f6 or ♔d6.]

55.b5! axb5 56.♙xb5 ♙f5! Only move. Otherwise, White could have taken on c6 followed by a6-a7. [56...cxb5? loses to 57.c6! bxc6 58.a6+- Here is another point of 54.♔f4: to control the e4 square.]

57.♙f1 ♙d7 58.a6 bxa6 59.♙xa6 Black has defended successfully so far. There are only 3-3 pawns remaining, but Bacrot has set a very deep trap.

59...♙e6 60.♙f1 ♙c8?! Black does not see the trap, but this is still not the final mistake. [60...♙b3! 61.♙g2 ♙a4= followed by ♙b5-a4 was an easy draw.]

61. ♖g2

61... ♖d7? It is very strange, but this most natural move is the decisive mistake. White wins now. [The extremely ugly 61... ♖b7 followed by ♖a8-b7 would have held the draw. White can create a zugzwang here... 62. ♖e4 ♖a8]

62. ♖f3 ♖e8 63. ♖e4 ♖d7

64. ♖g2! This is the first zugzwang! The king cannot be allowed on g5, since ♖e4 would win after all. Black must play

64... ♖e8 65. ♖h3! Further squeezing the bishop with

65... ♖f7 [65... ♖e7 is refuted by 66. ♖g5 ♖f7 67. ♖g2 ♖d7 68. ♖e4+-]

66. ♖d7! ♖d5

67. ♖e8! This was the very hidden trap of Bacrot, and Black is lost! He cannot hold the h1–a8 diagonal, since ♖g2 and ♖h1 are met with f3, winning the c6 pawn.

67... ♖g7 [67... ♖h1 68.f3+-; 67... ♖e7 68. ♖xg6+-]

68. ♖g5 ♖e4 69.f4! Another zugzwang, which helps White to improve his king's position.

69... ♖h7 70. ♖f6 ♖h6 71. ♖e5 ♖g2 72. ♖d6 An instructive endgame.

1–0

Clash of the Titans

(17) Petrosian, Tigran V (2645)
— Reshevsky, Samuel Herman (E88)

Tel Aviv Tel Aviv (9), 1964

[Kamil Miton]

1.d4 ♘f6 2.c4 g6 3.♘c3 ♙g7 4.e4 d6 5.f3 0–0 6.♙e3 c6 Not the most popular line against the Saemisch. More often, Black plays [6...c5 with the idea of getting a Benoni structure. 7.d5 (7.dxc5 dxc5 8.♙xd8 ♖xd8 9.♙xc5 with a very well-known endgame where Black has good compensation for the pawn.) 7...e6 8.♙d2 exd5 9.cxd5 ♖e8 (9...♗bd7 is not accurate because of 10.♗h3!) 10.♗ge2 a6 11.a4 ♗bd7 with complex play.; 6...♗c6 7.♗ge2 a6 ♙d7 next and Black is waiting for the right moment to push e5.; 6...a6!? with the idea of getting a structure from the Benko Gambit. 7.♙d2 c5 8.d5 b5!∞]

7.♙d3 e5 [7...a6 8.a4 (8.♗ge2 b5 9.0–0 (9.b3 bxc4 10.bxc4 Without the b-pawns, Black should have good counterplay on the queenside.) 9...bxc4 10.♙xc4 d5 11.♙d3 dxe4 12.fxe4 e5! 13.dxe5 ♗g4 with a good position for Black.) 8...a5 9.♗ge2 ♗a6 10.♙d2 e5 11.♖d1 exd4 12.♙xd4 It seems that after including the a5–a4 moves, Black is fine because White's queenside is weaker. On the other hand, White is very quick with the initiative on the d-file and on the kingside.]

8.d5 cxd5 9.cxd5

9...♗a6 A normal move, although Black could also try to get some play on the otherside. [9...♗h5 10.♗ge2 ♙h4+ a) 10...♗f4 11.♗xf4 exf4 12.♙xf4 ♙b6 13.♙d2 The idea is ♙e3. White should manage to escape from the center with the king.;

b) 10...f5 11.exf5 (11.0–0 f4 12.♙f2 ♙f6 with the typical idea of exchanging the bad bishop on the h4 square.) 11...gxf5 12.♙d2 White is slightly better. This typical idea does not work now: 12...e4 13.fxe4 f4 14.♗xf4 ♙h4+ 15.g3 ♗xg3 16.♙f2+;

11.♙f2 ♙g5 12.0–0 ♙h3 13.♗g3 ♙d7 At least, Black is trying to do something on the kingside.]

10.♗ge2 ♙d7 11.0–0 ♗c5 12.♙c2 Both players almost finished their development. Thanks to the improvement possibilities on the queenside and the bad bishop on g7, White is better.

12...a5 13.a3 White is trying to take the knight out from c5.

13...♙b6 [13...b5 14.b4 (14.♙xc5 dxc5 15.a4 b4 16.♗b5 c4+) 14...axb4 15.axb4 ♗a6 16.♖b1±]

14. ♖h1 ♜fc8 Black refused the typical plan with f5. The idea is to put the heavy pieces on the a- and c-files to get counterplay when White pushes b4. [14... ♜xb2? 15. ♜b1 ♜xa3 16. ♙c1+-]

15. ♜b1 ♜a6

16. a4! Good move! Petrosian sees that the Black pieces are ready to fight with b4 and decides to change his plan a bit. [16. b4 axb4 17. axb4 ♞a4 18. ♙xa4 ♙xa4 19. b5 ♙xd1 20. bxa6 ♙xe2 21. axb7 ♙xf1 22. ♜xf1 ♜e8 23. bx-a8 ♜xa8 and one weakness on d6 will not be enough for White to win this position.; 16. ♞c1 b5 17. ♞d3 ♞xd3 18. ♙xd3 ♜b7 19. ♜e2 ♜cb8 20. ♜fc1±]

16... ♜b6?! I do not like this move because it is very slow. Why not [16... ♜ab8 with the idea of pushing b5. 17. ♞c1 (17. b4 axb4 18. ♜xb4 ♜a5 19. ♜b1 ♙f8 20. ♜c1 ♙e7 Black improves his bishop and gets a solid position.) 17... b5 18. ♙xc5 dxc5 (18... ♜xc5 19. ♙d3± and Black loses the pawn.) 19. axb5 ♙xb5 20. ♞xb5 ♜xb5 21. ♙a4 ♜b6 White controls the light squares and can put the bishop on c6. Black should look for counterplay on the dark squares after c4; he should also activate his bishop on f8. Objectively, White has the advantage here.]

17. ♞c1 ♜d8 18. ♙d3 The idea of White is to exchange the light-squared bishops. White could also play [18. ♞d3!? b6 19. b4 axb4 20. ♞xb4± and one of White's ideas here can be ♞c6 to sacrifice the pawn and get a strong initiative on the light squares.]

18... ♞e8 [18... ♜f8 19. ♙b5 ♙h6 20. ♙g1±; 18... ♞xd3 In my opinion, the best option for Black is 19. ♞xd3 ♞e8 with the idea of playing f5-f4 next and later g5-g4, with typical pressure on the kingside, which is more promising for Black if he keeps the light-squared bishop and White does not! We should also note that after f5, White has the idea exf5-gxf5, and now f4! to get control of the dark squares.]

19. ♙b5 ♙xb5 20. ♞xb5 After the bishops' exchange, Black will have weak light squares on the queenside.

20... ♞c7

21. ♞a3! Strong move! Petrosian keeps at least one knight on the board, which will be needed to put pressure on the Black weaknesses of the queenside.

21... ♞7a6 22. ♞d3 ♙f6 23. ♞xc5 ♞xc5 24. ♞b5 ♜a6 A waiting move. Black protects the d6 pawn.

25. ♖a1 ♗g5 26. ♗g1 ♔d7 27. ♖a3 ♜aa8 28. ♜c3 b6
29. ♔c2 The weak light squares and the pawn on d6 give White a long-term advantage. However, Black has pluses on the position as well: a strong knight on c5 and some possibilities to go back to the plan with f5.

29... ♜f8 30. ♜b1 preparing b4, which is the only plan for White.

30...f5 31.exf5 ♜xf5? I think this is a huge strategic mistake! After the recapture on f5 with the rook, White takes control of the important e4 square, so Black will not be able to create counterplay. [31...gxf5 32. ♜c4 ♜ae8 and the Black pieces are well placed to fight.]

32. ♜c4 ♜ff8 33. ♞c3 ♜ac8 34. ♜e1 ♔b7 35. h3 ♔d7
36. ♞e4± White transfers his knight to e4. With this, Black is not able to get anything on the kingside. Also, the exchange on e4 is impossible because of the weak b6 pawn and c6 square.

36... ♗e7 Now the Black bishop is very limited. Reshevsky puts it on e7 to protect the weak b6 and d6 pawns. [36... ♗h6 37. ♜b1 b4 next]

37. ♜c1 ♜a8 38. ♔h2 ♔b7 39. ♔d1 ♔d7 40. ♗e3 ♜a7
41. ♗h6 ♜e8 42. ♜1c3 ♜b8

43. ♔c2 Petrosian does not hurry! First, he is going to put all his pieces on optimal squares. Black anyway has to wait.

43... ♜e8 44. ♗e3 ♔g7 45. b4 The first concrete action.

45...axb4 46. ♜xb4 ♗d8 47. ♜cc4 h5?! Black's position is very unpleasant, but this move is completely not necessary! Black weakened his position. White has an easier task in converting his advantage now.

48. ♜b5 ♜f8 49. ♗c1! Black now has problems with the h6 square.

49... ♜a6 50. ♔d2 ♜g8 [50... ♜h8 51. f4 with the same break like in the game.]

51.f4! The second concrete action. White's pieces are more active and ready to put pressure against the king.

51...♞xe4 52.♞xe4 ♞f6 53.fxe5 [53.♞b2 ♞e8 54.fxe5 ♞xe5+ 55.♞xe5+ dxe5 56.♞c4→]

53...♞xe5+ 54.♞xe5 A practical decision. White now gets a strong attack on the dark squares.

54...dxe5 55.d6 ♞a5 56.♞xb6 ♞xa4 57.♞d5 [57.♞h6+ ♞f6 58.♞g5+ ♞e6 59.♞e3 With the unpleasant threat ♞b3, and ♞b7 next. 59...♞g7 60.♞b3+ ♞f6 61.♞f3+ ♞e6 62.♞g5+- Black is not able to hold this position.]

57...♞a7 58.♞xe5+ ♞h7 59.♞g5?! Not accurate. White should play [59.♞e3 ♞g7

60.♞b5 with the idea of putting the queen on the b1–h7 diagonal (for example, on d3 or e4). Then, Black will have problems to avoid the ♞xh5 threat because after ♞h8, ♞b2 would come.]

59...♞f8? The decisive mistake! Black could still fight after [59...♞g7]

60.♞h6+ Now Black lost all his pawns.

60...♞g8 61.♞xg6+ ♞g7 62.♞xh5 ♞d4 63.♞g6+ ♞g7
This was Black's idea. For the pawns sacrificed, Reshevsky tries to get the initiative thanks to his active pieces, but we will see that this was the wrong decision.

64.♞e6+ ♞h7 65.♞h6+ ♞g8 66.♞e6+ ♞h7 67.♞e3 ♞h4 [67...♞d3 After this move, White has a nice winning variation. 68.♞b4

68...♞xg2+ 69.♞xg2 ♞e2+ 70.♞g3 ♞e1+ 71.♞g4 ♞xb4+ 72.♞h5 and White has a winning attack! **72...♞b5+ 73.♞g5+-]**

68.♞e5 ♞e8 69.♞f5+ ♞g8 70.♞f2 ♞c4 71.♞b2 ♞c6 72.♞c5 ♞f7 73.♞g4+ ♞g7 74.♞c4+ White's pieces are consolidated now and his position is easily winning. Tigran Petrosian, the master of strategy, showed many important ideas and plans in this game.

1–0

Editorial Preface

Some events came to an end, and a new one has begun!

The Russian Team Championship was won by the team of Saint Petersburg (Svidler, Vituigov, Dominguez, Movsesian, Efimenko, Zvjaginsev). The second place went to Malakhit Chess Club (Karjakin, Grischuk, Mamedyarov, Shirov, Bologan, Malakhov, Raizantsev, Motylev). And Yugra arrived third (Jakovenko, Leko, Korobov, Dreev, Rublevsky, Khismatulin).

In Dubai, nobody could stop Rakhmanov who won the tournament very convincingly with 7,5/9. The second place was shared by 8 guys, but it is worth mentioning the fantastic result of Ju Wenjun, a 22 years old Chinese female player who played almost at a 2700 performance!

The Grand Prix in Zug has begun with a huge line up! 12 players from the Top 20 are fighting for the trophy and also the important qualification points for the next World Chess Championship.

In the first round, we saw two decisive games. Caruana beat Radjabov (who continues his bad form) and Morozevich defeated Kasimdzhanov in a very good game. We can expect exciting and fighting chess in the next rounds!

As usual, enjoy the issue Nr 60 of CEWN!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Shirov,Alexei (2700)
— Dreev,Aleksey (2654) [B12]

20th TCh-RUS 2013 Loo RUS (6), 12.04.2013

[Csaba Balogh]

A hard fought struggle. In such games, mistakes are unavoidable...

1.e4 c6 Dreev is faithful to his favorite Caro-Kann, while Shirov is also faithful to his and goes for one of the sharpest lines against it.

2.d4 d5 3.e5 ♖f5 **4.♗f3 e6 5.♙e2** Recently, this **4.♗f3 5.♙e2** line is the most popular in the Advanced variation. Black can choose between numerous setups here. The sharpest lines are starting with **5...c5** or **5...♗e7 6.0-0 c5**, but Dreev prefers to take a calm continuation against Shirov.

5...♗e7 6.0-0 ♙g6 **7.♗bd2** ♗f5

8.g4 Shirov has already played this move three times. Actually, I believe this is a bit too committing until the knight is able to retreat to e7, because Black gets quick counterplay with h5. [8.♗b3!? is the most common move and might also be the best move. White usually waits with some useful moves until Black puts his bishop on e7. Only then, he plays g4 and after the forced ♗h4 ♗xh4 ♙xh4 f4, White gets some advantage.]

8...♗e7 [On 8...♗h4 White's idea would be 9.♗xh4 ♙xh4 10.f4 f5 11.♗f3! ♙xg4+ 12.♙h1 and the queen has difficulties to leave from the cage. This is a standard motif in this line.]

9.♗h4 White takes the bishop pair, but Black gains strong counterplay against the g4 weakness.

9...c5! The typical break for Black to fight against the center. White must hold it with c3, otherwise, his position collapses.

10.c3

10...♗bc6! Dreev knows very well the subtleties of this line. Black must take back with the knight on g6 in order to be able to play h5. So, the e7 knight should not

be touched. [10...♘ec6?! happened in another game, but then White is fine after 11.♘xg6 hxg6 12.♘f3 followed by ♕e3 stabilizing the center. Black has no counterplay on the kingside and he must suffer long with his lack of space.]

11.♘xg6 Shirov improves his own game with this move. [11.♘b3 c4 12.♘d2 h5 13.g5 ♘f5 14.♘df3 ♕e7 happened in the Shirov-Jobava game, Khanty-Mansiysk 2010. Black was more than fine here, but Shirov managed to win later on.; 11.♘df3 would allow 11...♕e4! and the h4 knight gets out of the game.]

11...♘xg6! Besides the h5 pawn, Black can also undermine the center with f6.

12.♘f3 ♕e7 A useful preparation before making a decision whether to play h5 or f6.

13.g5!? A slightly anti-positional move to give up the f5 square, but on the other hand, it is a good prophylaxis against h5. [13.♕e3 could have been met by 13...cxd4 14.cxd4 h5 15.g5 ♖b6 followed by transferring the knight to f5, for instance, after ♕d8, ♘e7.]

13...♖b6 [13...h6 is not so effective here. White can simply play 14.gxh6 gxh6 15.♕e3 and ♔h1, ♖g1 in the next move. His king is safe and does not need to worry about the open g-file.]

14.h4 cxd4 15.cxd4

he wants. White seems to be in danger after this move, since it also removes the guard of the d4 pawn. 19. ♖xg5 0-0-0 ♣]

19. ♖xe6 White is back in the game!

19... ♖c7 Leaving from the pin, but it is too slow. [The difference to the previous line is that after 19... ♖xh4 White has 20. ♖e5! and the Black king is also unsafe. In any case, Black should have opted for this line.]

20. ♖xg5

20... ♖xd4? White gets the upper hand after this mistake. [20... ♖xh4! was the only move! It is a bit strange that Dreev missed this for the 3rd time in a row. Anyway, in this case, it was very difficult to calculate the lines precisely. 21. ♖g4 (21. ♖h6 looks strong at first sight with the multi-threats of ♖xh4, ♖g4, ♖e6 and ♖f7, but Black is alive after some strong moves. 21... ♖xg5! 22. ♖xg5 ♖dg8! It looks like this blunders a piece, but... 23. ♖g4+ ♖b8 24. ♖xh4 ♖g7! is the point and on f4, ♖xd4 wins back the bishop, while after 25. ♖g3+ ♖a8 26. f4? ♖xh6 is the key!) 21... ♖d7! The only move again. 22. ♖xh4 ♖xe6 23. ♖xe6 ♖xh4 24. ♖xd8 ♖xd8= with a balanced endgame.]

21. ♖xe7!? A good move! White wins the d4 knight after ♖g4, but the position remains unclear because of the weak White king. [However 21. ♖xg6! was even stronger. It would be interesting to know what the players had calculated here. It looks like White wins quite easily in all the lines. 21... ♖xe6 (21... hxg6 22. ♖xd4+-; 21... ♖xg5 22. ♖xg5 ♖xe6 23. ♖c1 ♖c5 24. ♖g4+ ♖b8 25. ♖f4+-) 22. ♖xe6+- White ends up with a big material advantage.]

21... ♖xe7 22. ♖g4+ ♖d7 [22... ♖b8? would run into 23. ♖f4!]

23. ♖xd4 Black needs to waste an important tempo to defend the a7 pawn.

23... ♖c6 Shirov had already foreseen his great 26th move, so he goes for the following queen maneuver/\

24. ♖f4 ♖f5 is threatened, so the next move is forced again.

24... ♖df8 25. ♖g3 h6 Black seems to be all right as the knight cannot move because of ♖g8. However, Shirov prepared a brilliant move!

26. ♖e2!! It is not easy to find such ideas because you are always searching for ways to finally finish the development of the c1 and a1 pieces, while at the same time, your weak king worries you. Black cannot avoid ♖g4, but the game is not over...

26... hxg5 27. ♖g4 ♖f5 28. ♖xg5 Finally, the position has simplified a bit and White ended up with an extra pawn, but Black can still hope for counterplay against the weak king on g1. It also makes the advance of the h- and f-pawns more difficult.

28...♖hf8 29.♖c1 b6! Giving air to the king. Black intends to play ♔b7 next.

30.♙xf5 ♖xf5

31.f4! White fortifies his bishop and is ready to push the h-pawn.

31...♔b7 32.h5 ♘d4 Black must urgently search for counterplay with the knight.

33.♖e1 Preventing ♘e2. On the other hand, ♖e7 is not a threat yet because of ♙xe7 and ♘e2. White simply wants to push h6. The bishop on g5 excellently prevents Black's counterplay.

33...♘e6 34.h6 ♘xg5 35.fxg5 ♔d8! Dreev finds the only chance. Both players were in serious time trouble at this moment, after playing such a difficult middlegame. This explains the forthcoming mutual mistakes.

36.♖e5! ♔c7! 37.♖e3!

37...♔d8! Looks like a forced repetition, but White is winning...

38.♔g2?! [38.♔h4!! ♖xg5+ (38...♔xg5+ 39.♔xg5 ♖xg5+ 40.♔h2+- The rook endgame is hopeless for Black, as the h-pawn is too strong.) 39.♖g3! ♖xg3+ 40.♔xg3 White can support his h-pawn with his queen from g7, but it is very strange and surprising that Black cannot give perpetual check...

40...♔e8 41.♔g7+ ♔a6 42.h7 A human feeling dictates that this must be a perpetual, but the computer simply calculates all the lines and hides his king behind the d-pawn... 42...♔e1+ 43.♔g2 ♔e2+ 44.♔g3 ♔e3+ 45.♔h4 (Of course not 45.♔g4?? ♔g1+) 45...♔f4+ 46.♔h5 ♔f5+

47.♔h6 No more good checks for Black. White is going to the queenside now. 47...♖h3+ 48.♔g6 ♖e6+ (48...♖g4+ 49.♔f6 ♖d4+ 50.♔f7 ♖f4+ 51.♔e6+-) 49.♔g5 ♖e3+ 50.♔f6 ♖d4+ 51.♔f7+- and soon the checks are over.]

38...♖xg5? spoiling the chance to save the game. [38...♖c7! with the threat of ♖c1. White cannot win, for instance, after 39.♖g3 ♖e5 40.h7 ♖d4+ 41.♔h1 ♖f2 42.♖xf2 ♖xf2 43.h8♖ ♖xg3= and this queen endgame is a different story compared to the one examined in the 38.♖h4 line.]

39.♖g3 ♖e5 [39...♖xg3 transposes to the 38.♖h4 line.]

40.♖g7+ White starts to pursue the king and, of course, the h-pawn is still a strong “reserve”.

40...♔c6 41.♖c2+ ♔d6 White can choose between many wins from now on. Shirov converts the win easily. [41...♔b5 42.a4+ ♔a6 43.♖d3+ ♖b5 mate in the next move.]

42.♖g6+ ♖e6 [42...♔e7 43.♖c6+- Too many threats.]

43.♖h2+ ♔c5 [43...♔d7 44.♖h3+-]

44.♖xe6 ♖g8+ 45.♔f1! [Black resigned after this last precise move, since after 45.♔f1 ♖xe6 46.h7! White promotes a new queen and all the checks that Black can give are met by the countercheck on f2. 46...♖f5+ 47.♖f2+ A very tough game!]

1–0

(2) Yemelin,V (2588) — Hasangatin,R (2496) [B29]

20th TCh-RUS 2013 Loo RUS (7), 13.04.2013

[Arkadij Naiditsch]

What can be stronger than a direct attack?! We will see this once again in the furious attack put forth by Yemelin in the game from the recent Russian Team Championship.

1.e4 c5 2.♘f3 ♘f6 This tricky move was quite popular a couple of years ago. I played it myself against Leko, but lately, White found quite an easy and solid refutation.

3.e5! The best. [3.♘c3 d5 leads to quite an unclear position.]

3...♘d5 4.♘c3 forcing Black to take a hard decision.

4...♘xc3 [The other main line for Black is 4...e6 5.♘xd5 exd5 6.d4 but White has a better play here as well.]

5.dxc3 White's idea is simple, to use his big development advantage.

5...♘c6 6.♖f4 Defending the e5 pawn and planning to castle queenside.

6...♔c7 7.♔e2 e6 8.0-0-0 ♖b8?! looks like a bad move to me. Black should be very careful here in order not to get immediately in trouble. [8...b6 followed by a quick ♗b7 and queenside castle gives Black more or less a normal position. Anyhow, I would not advice anybody to go for this position.]

9.♘g5!? Very interesting move! White is provoking weaknesses in the Black pawn structure.

9...f6 [The main point of the move 9.♘g5 can be seen after 9...h6 10.♘e4! using the moment when Black cannot take on ♘xe5?. 10...♘xe5? 11.♘d6+! finishes the game. 11...♙xd6 12.♖xd6 ♔xd6 13.♙xe5 and White will take the rook on b8 next.]

10.♘f3 White has done his job, created a weakness in Black's pawn structure.

10...♙e7 11.♔e3 forcing Black to play f5.

11...f5

12.♖g1! and Yemelin plays very strongly again, by not losing any time and preparing the direct attack with g4.

12...h6 Black is trying to stop White from playing g4 because of the g5 threat.

13.g4! Exactly! White sacrifices a piece for the attack, which is very logical if we look at the clearly undeveloped Black pieces, and especially the bishop on c8.

13...g5 14.gxf5 exf5 [It does not help to play 14...gxf4 and White plays the precise 15.♔e4! exf5 16.♔xf5 with a mating attack.]

15.♖d6 Yemelin continues in attacking mode, but maybe it was time to make a calm "killing" move. [15.♔d3! would finish the game on the spot. In case of 15...gxf4, 16.♔xf5 and Black cannot defend such a position. At 15...♖f8 16. ♙d2, White would not have any sacrificed material for the great attack—which would mean "the end" for Black.]

15...♔a5 After this, White is crushing! [More chances would give 15...gxf4 16.♔xf4 ♖f8 and even though White's attack is very strong, Black still has some chances to fight back in the game.]

16.♘g5!! Just a great move! White is walking over the Black defensive lines.

16...hxc5 17. ♖xc5 ♔xa2 It seems like Black got some counterplay, but it comes too late.

18. ♕xe7 ♘xe7 How to continue the attack?!

19.e6!! Fantastic move! Before going for ♖g7, White is opening one more line and closing the queen from a2, because it could go to f7 in some cases.

19...dxe6 20. ♖g7! The last exact calculation by Yemelin, who is sacrificing the bishop on f1 to mate the Black king.

20...♔a1+ 21. ♔d2 ♕xf1 22. ♕g5! All moves are forced.

22...♕xf2+ 23. ♔c1 Black has no other defense than to give his queen away.

23...♕e1+ 24. ♖d1 ♕xd1+ 25. ♔xd1 White got a queen for a rook and 2 pieces, which would mean a material advantage for Black, but White's attack is still not over and the Black pieces are still badly coordinated.

25...♘c6 26. ♕g6+ With checks, White brings his queen to a perfect position on f7.

26...♔d8 27. ♕f6+ ♔e8 28. ♕f7+ ♔d8 29. ♕c7+ ♔e8 30. ♕f7+ ♔d8 31.h4! Great finish move. Black cannot do anything against White's h5-h6-h7-♖g8. A really fantastic game by Yemelin!

1-0

(3) Ganguly,S (2623) – Rakhmanov,Ale (2591) [A54]

15th Dubai Open 2013 Dubai UAE (4.5), 10.04.2013

[Arkadij Naiditsch]

Rakhmanov, the eventual winner of the Dubai Open with 7.5/9 managed to win a really great attacking game against the very solid Ganguly. Let us take a look if all was as correct as it seems from the first view.

1.d4 ♘f6 2.c4 d6 Black is trying to quickly take White out of his opening preparation.

3. ♘c3 [Often White chooses 3. ♘f3 in order not to allow Black to go for the 3...e5 line, but it is a matter of taste]

3...e5 4. ♘f3 ♘c6 Quite a rare move. Now we are getting into the KID structures with Black's knight on g6.

5.d5 ♘e7 6.e4 White has covered all the center and this looks pretty good to me.

6...♘g6 [An attempt to get back to the KID structure could lead to a worse position for Black. 6...g6 7.h3 ♕g7 8.g4 White is prepared against the main Black plan: to play 0-0, ♘d7 and f5, and that means that White is doing better here.]

7.g3! Very typical and strong, cutting the Black knight on g6.

7...♗e7 8.♕g2 0-0 9.0-0 As we can see, White got a very nice position out of the opening. Black's main idea still is to play f5, but White has quite a few options. To break through with c5 clearly remains as a main idea, but the plan with ♖e1-♗d4 and f4 could be an interesting one.

9...a5 Black is preparing against White's invasion on the queenside.

10.h3?! White is preparing the ♗e3 move, but is it really necessary?! [10.♗e1 followed by ♗d3 and White's position looks very nice.]

10...♗e8 Black's only hope is the f5 move.

11.♗e3 and I do not think there was the need for ♗e3.

11...f5 12.exf5 ♗xf5 13.♖h2 Another strange move. [In any case, White needs to bring his knight from f3 to the e4 square, so why not to do it immediately? 13.♗d2 ♗d7 14.♖h2 followed by ♗de4 and I think White should be doing a bit better. The Black knight on g6 is horribly placed.]

13...h6!? A nice move by Black with quite a deep positional idea of bringing the Black knight over h7 to g5, intending threats to the White king.

14.♖e2 White keeps his solidity.

14...♗f6 15.♗d2 b6 Blocking White's c5 move just in case, but I am not sure if it was worth losing a full tempo. Maybe 15...♗h7 directly was a better choice.

16.b3 White is preparing the main idea: to play a3, b4 and then c5. The b3 move is necessary. In case of 16.a3, a4! is strong.

16...♗h7 17.♗de4 ♗g5 Exchanging the bad e7 bishop is a good idea.

18.♗xg5 ♗xg5 19.a3 starting the main plan.

19...♖f6 It is clear that White is positionally much better, but Black still got some counter chances on the King side. Additionally, Black's pawn structure is very solid and hard to break.

20.♖d2 A solid looking move turns into a disaster! [It would not be careful to play 20.b4? ♗f4! and Black is back. 21.gxf4 exf4 Black is winning the piece back with a better position.; 20.f3! This would have been the right way to go on for White. No more tricks with ♗f4, and White just wants to play ♗e4 next. I would not have liked to be in Rakhmanov's shoes here. Probably Black still has good drawing chances, but nothing more. And still, Black has his main problem: the very bad knight on g6.]

20...♗xh3!! A really fantastic move which required a very precise and deep calculation! I guess it was like a thunder out of nowhere for Ganguly.

21.♗xh3 ♗xh3 22.♖xh3 Of course, White needs to accept the sacrifice.

22...♔f5+ 23.♔h2 The only move. [Of course, this is bad: 23.♔g2? ♘h4+! and Black has a mating attack.]

23...♔h5+ 24.♔g1 ♖f3!? Quite optimistic, but very interesting play by Black. [The easy move would have also been the correct one here. 24...♘h4! 25.f4 White has nothing better. 25...♘f3+ 26.♖xf3 ♔xf3 27.♔f2 ♔g4 and we have a very unclear position.]

25.♘e2? It is not that easy to give an advice for White, but there was no reason to get worse. A piece up is a piece up. [To a funny draw would lead 25.♔c2 ♖af8 26.♔e4 It seems like White has transferred his queen to a perfect position, but Black has the very strong 26...♖8f4! Beautiful move 27.♔xf4 ♘xf4 Black wants to give a perpetual check and White is hopeless against it. 28.♖ac1 ♘h3+ 29.♔g2 ♘f4+ with a draw.]

25...♖af8 26.♔g2 ♔g4 Black has consolidated all his pieces on the kingside, and moves like ♘h4 might be deadly for White.

27.♖h1 defending against ♘h4, but here comes the other hammer of Black.

27...♖xf2+!! Now the position is getting super forced!

28.♔xf2 ♔f3+ White is a full rook up, but has a lost position! The White king is in big danger and the uncoordinated White pieces make the attack of Black even more dangerous.

29.♔h2 [It loses on the spot to play 29.♔h3 ♖f5 followed by ♖h5 mate.]

29...♔xf2+?! Not the most precise. [Also here 29...♖f5! 30.♘g1 is the only defensive idea for White. 30...♖h5+ 31.♘h3 It seems like White got everything under control, but the “bad” knight on g6 is playing his deadly role finally. 31...♘f4!! The game is over! White cannot defend against ♖xh3 without losing all his material.]

30.♔h3 Black is repeating the position once before taking the right path.

30...♔f5+ 31.♔h2 ♔f2+ 32.♔h3 ♖f5! The same idea in a slightly different position.

33.♔d3 Ganguly tries to hold things together.

33...♖h5+ and Black is repeating twice the position again to gain some time, probably during time trouble.

34.♔g4 ♖g5+ 35.♔h3 ♖h5+ 36.♔g4 ♖g5+ 37.♔h3 e4! Strong! The Black knight is going to take a fantastic place on e5.

38.♔xe4 ♖h5+ Once again, Black is winning some time by repeating the moves before the time control.

39.♔g4 ♖g5+ 40.♔h3 ♘e5! Of course, there will be no draw. ♖h5 is coming next

41.g4 h5 Rakhmanov chooses a “pretty” way to finish White. [The easy 41...♖xg4 42.♔xg4 ♘xg4 was also winning for Black.]

42. ♖g3 hxg4+ **43.** ♔h4 And Rakhamov continues showing great tactical skills.

43... ♖h5+!! A very pretty mate!

44. ♔xh5 ♕f7+ **45.** ♔h4 ♕f6+ **46.** ♔h5 ♕h6# All in all, it was not a great game, but it had a very pretty mating attack. And we could see that, even in a “calm” position, there are many ways to get quickly in trouble.

0–1

(4) Tomashevsky, Evgeny (2722) – Yudin, Sergei (2548) [D31]

20th TCh-RUS 2013 Loo RUS (7), 13.04.2013

[Csaba Balogh]

Tomashevsky is a very deep positional player, but as the game shows, he is very strong in dynamic chess as well.

1.c4 e6 2. ♖c3 d5 **3.d4 c6**

4.e4 This is the sharpest challenge of Black's opening handling. This move is based on a pawn sacrifice for quick development.

4... ♖b4 Black tries to lead the game to more calm areas. [The main lines start after 4...dxe4 5. ♖xe4 ♖b4+ 6. ♖d2 ♕xd4 7. ♖xb4 ♕xe4+ with thousands of games in the database.]

5. ♖d2!? An interesting alternative to the main 5.cxd5 and 5.e5. White would like to transpose to the previous line after 5...dxe4 6. ♖xe4, but here Black has another option to win the d4 pawn.

5...dxc4 6. ♖xc4! White gives a pawn for quick development. The old rule says that two tempi in the opening are

worth a pawn. [After 6.♘f3 Black could simply protect his extra pawn with 6...b5!]

6...♔xd4 7.♔e2 White needs to protect his bishop before playing ♘f3, but it is not a waste of tempo, since the queen is ideally placed on e2.

7...♔d8 Otherwise, White might win some more tempi by attacking the queen. For instance, if the queen retreats to b6, it might move into ♕e3 improving the bishop, or to ♘a4 tactical tricks, when Black cannot take on d2 with check.

8.♘f3 Black has a healthy extra pawn, but he has only developed his bishop in comparison to White's five pieces.

8...♘d7 9.0-0 ♘g6 10.♖ad1 White simply activates his pieces.

10...♕e7 A sad necessity. Black had to lose another tempo to make castling possible. A useful move. White leaves from the b5-b4 tempo. [10...0-0?! would allow the tactical blow 11.e5 ♘d5 12.♘xd5 ♕xd2 13.♘f6+! This intermediate check is the point and Black is forced to weaken seriously the pawn structure in front of his king. 13...gxf6 (13...

♘xf6? 14.exf6+- wins a piece.) 14.♖xd2 with more than enough compensation for the pawn.]

11.♕b3 Black has refrained from castling for some reason during the entire game. At the beginning, he preferred to make some useful moves instead, and later on it was already too late. [11.♕g5 was also possible, trying to play more concretely. The idea is that after 11...0-0 12.♕xf6 ♕xf6 13.e5 ♕e7 and now he will focus on the attack against the king. 14.♖d4 switching the rook to g4.(Or 14.♕d3 is also dangerous.)]

11...♔c7 [On 11...0-0 Tomashevsky was probably intending to play 12.♕g5 Black has difficulties to leave from the pin along the d-file. For instance, ♔c7 runs into e5, winning the e7 bishop. 12...♘e8 13.♕f4! Any kind of exchange would just ease Black's position, so White keeps his bishop. Black has a very unpleasant position.]

12.♖fe1 Improving the last piece. We will see in many lines later on that the rook is very well placed on e1.

12...h6 Black delays castling another move. He would like to avoid the ♕g5 ideas, which we have examined in the previous lines. [12...0-0 should have been played, even though White gets a great position after 13.e5 ♘d5 14.♕c2! with many dangerous attacking possibilities. For instance, ♔e4, ♕g5, ♘e4-g5 and h4-h5.]

13.e5 White could not improve his position anymore, so it is time to go for some concrete measures.

13...♘d5

14. Rxc3! An excellent move! The different kind of threats with a double capture on d5, or Qxd5 followed by Nb5 , forces Black to take on c3. However, this also helps White to improve his rook, as it can be switched anytime to a kingside attack along the 3rd rank.

14... Nxc3 [On 14... Qd8 15. Nxd5 cxd5 16. Nd4 ! followed by Kg4 with a strong attack.]

15. Rxc3! Nb6

16. Nd4! White intends to play Kg4 or Rg3 . Castling kingside would be already equal to suicide, but staying in the center is also not a great decision for the king against such pieces.

16... Nd5 [16... Qd7 could be met by 17. Kg4 g6 18. Nxe6 ! Qxe6 19. Qxe6 fxe6 20. Qxe6 with an enormous attack, which Black can hardly hold in a practical game. 20... Nd5 21. Qxg6+ (21. Qxd5 ? falls into a trap: 21... Rd8 !) 21... Qd8 22. Rf3+ followed by Rf7 .]

17. Rg3 Tomashevsky wants to provoke the g6 weakness before taking on d5. [17. Qxd5 !? exd5 18. e6 was also good. Black can hardly hold all the threats. 18... 0-0 19. Nf5 Qxe6

20. Nxc7 ! Qxc7 21. Rg3+ and Black should sacrifice his queen, otherwise, he will get mated. 21... Qh7 ? 22. Qd3+ Qh8 23. Qc3+ f6 24. Qg6+-

17... Qb6 [17... g6 18. Qxd5 cxd5 (18... exd5 19. e6 ! has even bigger power than in the 17. Qxd5 line.) 19. Nb5 followed by Rc1 with a huge advantage.]

18. Qxd5! The right decision based on good calculation. Black has problems wherever he takes.

18... cxd5 [18... exd5 19. e6 ! is the end of the game.; 18... Qxd4 was probably the best practical chance, although it is also very bad for Black after 19. Qb3 g6 20. Qa5 ! An important move to avoid the fast Qd7 and 0-0-0. 20...

♙d7 (20...b6 21.♖d1 ♔c5 22.♙c3± also looks awful for Black. After the b6 weakness, the ♙d7 0-0-0 plans always run into ♔a6.) 21.♖d1 ♔c5 22.♙d2! and the bishop must sadly retreat to c8.]

19. ♙e3! ♙c5 [19...♔c7 leads to a spectacular finish 20.♘b5! ♔xe5 21.f4 ♔b8 Otherwise, ♘c7. 22.♖c1! Forcing Black to castle into mate. 22...0-0 The attack breaks through after (22...♙d8? 23.♖xc8! ♔xc8 24.♘d6+-) 23.♙h5! ♔h7 24.♙d4 g6 25.♙xh6+! ♔xh6 26.♖h3+ ♙h4 27.♖xh4# It would have been a pleasure to finish the game like this.]

20. ♖d1 White is ready to take on g7 again, and 0-0 still does not work because of Bxh6.

20...g6

21. ♘b5! White installs his knight to d6, from where it is pressing the f7 pawn. White can increase this by ♙f3 or ♖f3. The end is near.

21...♔f8 22. ♙xc5+ ♔xc5 23. ♘d6 d4 White can choose between various wins from now on. Tomashevsky plays the simplest one. [23...♙d7 One of the wins here is, for in-

stance 24.♖xg6 fxg6 25.♙f3+ and mate on f6 or f7 next move. 25...♔e7 26.♙f6#; 23...♔g7 is met by 24.♙f3+-]

24.b4 Trying to lure the queen from the e5 pawn in order to use the queen more effectively. [24.♙f3 was also winning, of course.]

24...♔d5 [24...♔xb4 25.♙f3+-]

25. ♖g4 White simply restores the material balance and he keeps all his advantages.

25...b5 26. ♖gxd4 ♔c6 27. ♔xb5 White does not want to mate his opponent. He is satisfied with an easy technical win.

27...♔xb5 28. ♘xb5 ♔g7 29. ♘d6 ♙d7 30. ♘xf7 A nice game! I do not recommend anybody to repeat this line arising after ♔xd4 ♔e2 with Black.

1-0

Endgame section

(15) Rublevsky,S (2688) – Yemelin,V (2588)

Russian league, 09.04.2013

[Chess Evolution]

There is material equality on the board, but the White pieces are clearly dominating and Black has some weaknesses as well. Black must look for salvation in some active counterplay!

34...♖b8! Counterattacking the b4 pawn. [The passive 34...f6 allows White to regroup his bishop. 35.♗f2± followed by ♗c5, getting rid of the bishop that keeps the position together.]

35.♖xa6 ♖xb4 36.♖a8 White is ready to advance his a-pawn. It runs fast, so Black must find out something clever...

36...♔xe6 Trading the excellently placed d5 queen is completely justified even if it destroys the healthy pawn structure.

37.♔xe6 fxe6

38.♗f2! Occupying the very important g1–a7 diagonal. The bishop supports well the a-pawn and also prevents Black/♗s defensive idea to play ♗c5.

38...♖b1+ [The Black passed pawn is behind its colleague on the a-file... 38...c5 39.a5! c4 (Waiting passively does not lead to anything good for Black. 39...♖a4 40.a6 ♖a2 41.a7 ♗e7 42.♗e3+- followed by the transfer of the king to the queenside with a slow but sure win. Black can never push his c-pawn, since it allows ♖c8 and a8♔.) 40.a6 c3 41.a7 c2 42.♖c8+- White either wins the c-pawn or makes a new queen.]

39.♔h2 ♖b2 40.♗g1 White is ready to advance his a-pawn.

40...♖c2! Great defensive resource. Black intends to transpose into a rook endgame. White cannot avoid it.

41.a5 ♘c5! 42. ♘xc5 ♖xc5 43.a6 ♗a5 Here we are! The material is still even, but White clearly has all the right to play for a win because of the weak Black pawns. The White king has access to the pawns and in a good moment, the rook is also ready to go to e8 and collect two pawns in exchange of the a-pawn. However, the rule is true here again: all the rook endgames are drawn.

44.♔g3 The king is heading to g4-h5.

44...♖a2 Preventing ♔g4. This forces White to advance his pawn to the 7th rank. There is no other way to make progress.

45.a7! We have reached the critical position from Black's point of view. There is only one way to make a draw here, while there are three alternatives. Black can either try to prevent the king's penetration with h5; or avoid White's main idea of collecting the e-pawns with ♖e8 by playing ♔f7; or create counterplay as fast as possible by advancing the c-pawn. As we will see, only the last option saves him... [After 45.♔g4 it is important to play 45...♔g6! and White is forced to retreat with the king because of the mate threat.(45...♖xg2+? 46.♔h5 ♖g3 47.a7+- Black cannot create a mate threat.))]

45...♔f7? [45...c5! is the right decision. 46.♖e8! This is the best chance and what Black was afraid of. (46.♔g4 It makes no sense to give up the g2 pawn. 46...♖xg2+ 47.♔h5 ♖a2 White cannot make progress here.) 46...♖xa7 47.♖xe6 White wins a pawn, but Black is in time to get his rook behind his passed pawn! 47...♖c7! 48.♖xe5 (48.♔f2 might stop the pawn, but 48...c4 49.♔e1 c3 50.♔d1 allows Black to activate his rook. 50...♖d7+ and ♖d2 next gives Black an easy draw.) 48...c4 49.♖d5 c3 50.♖d1 This time, it is White who is forced back to passivity and as we know, in rook endgames, activity is usually more important than the amount of pawns. This allows Black to save the game here. Still, it requires some precise moves. 50...♔f6 51.♔f2 ♖b7 Going for counterplay against the g2 pawn. 52.♔e3 ♖b2 53.g4 ♖h2 and Black holds the draw. An illustrative line: 54.♖d6+ ♔g7 55.♖c6 c2 56.e5 ♔f7 57.♔d3 ♖f2! 58.♖xc2 (58.♔e4 White cannot make progress here. The c2 pawn stops his plans.) 58...♖xf3+ 59.♔e4 ♖xh3=; 45...h5? is the worst for Black. Actually it just helps White because of 46.h4! gxh4+ 47.♔xh4 winning the h5 pawn. The Black rook and king cannot move because of the a7 pawn.]

46.♔g4 Black is lost as the following lines demonstrate:

46...♖xg2+ [46...c5? runs into the known motif 47.♖h8! ♖xa7 48.♖h7+-; 46...♔g7 is not the same as what we saw in the 45...c5 line. 47.g3 ♖a3 48.♖e8! ♖xa7 49.♖xe6 and Black cannot get his rook behind the c-pawn. 49...c5 50.♖c6! Depriving Black from his counterplay with ♖c7! The e5 pawn will be taken by the king later on. 50...♖a5 51.h4! gxh4 52.gxh4+- White wins. The plan is to push h5, fixing another weakness on h6, and then to play ♔f5.]

47.♔h5 ♖a2 48.♔xh6 The g5 pawn is falling as well, which creates another passed pawn for White.

48...♖a1 49.♔xg5 ♖a2

50.♔h6 Black cannot create any counterplay, he is forced to wait, while White can advance his h-pawn.

50...♖a1 51.h4 ♖a2 52.h5 ♖a1 53.♔g5 White threatens to push h6, and h7 cannot be prevented because ♔g6 allows ♖g8 and a8♔.

53...♔g7 54.h6+ ♔h7 55.♔f6! Black resigned because he will lose all his pawns. Another instructive rook end-game.

1-0

(16) Skatchkov,P (2485) – Vokarev,S (2454) [D90]

[Chess Evolution]

26...h5 This is a grandmaster game and we see a completely drawn position. Now we take a look at the result 0-1, and it is not a mistake. Let us take a look at how this happened.

27.♖b8 The exchange of rooks brings the draw even closer.

27...♖xb8 28.♔xb8 f5 The position is a total draw. The only way to lose is to blunder a pawn or maybe even a bishop.

29.♔g2 ♔f7 30.♔f3 g5 31.h3 g4+ 32.hxg4 hxg4+ 33.♔g2 Black managed to advance his pawns a little bit, but of course, it does not matter at all — the position is still a total draw.

33...e5 34.♔a7 ♔e6 35.f3 To exchange one more pawn is not a bad idea, but now Black gets theoretical chances to win. [To a safer draw would lead 35.e3 ♔d5 36.♔f1 ♔e4 37.♔e2 and Black has no ideas to play for a win.]

35...e4 36.fxe4 fxe4 37.♔f2 ♔d5 The position is still a draw, but now it is time for White to be slightly careful. Black wants to put his bishop on d4 and get his king to d1, which would not help much of course, but at least gives some practical chances.

38.♙b6?? What a shocking move! White blunders the only threat Black has.

38...♙d4+! Black is using his chance!

39.♙xd4 ♔xd4 and we can suddenly see that this pawn endgame is just lost!

40.♔f1 [This does not save the game anymore. 40.♔e1 ♙e3! White is in zugzwang. 41.♔f1 ♔d2 42.♔f2 e3+ 43.♔f1 ♔d1 Black will capture the e2 pawn.]

40...e3! and the game is over. The line 41.♔e1 ♔c3 42.♔d1 ♔b2! gives Black the full point. It is really amazing! Probably, this is one of the most shocking mistakes I have ever seen on a GM level. It is never too late to blunder something "huge" in a practical game!

0-1

Editorial Preface

Great tournaments, great players and great chess — this is what we had during the last week.

The Polish Championships were won by the Socko Family (Bartosz and Monika), who dominated the male and female sections.

Alekhine Memorial:

Half of the tournament is played in Paris, half in Saint-Petersburg. A very interesting players line up makes the event even more spectacular. Next to Aronian, Kramnik and Anand, we got Ding Liren — the young talent from China — and the French Vachier-Lagrave. After 4 rounds, we can already say that probably it is not going to be the tournament of Anand or Svidler, who are at the basement of the cross table.

The tournament offers a lot of interesting games, some of them are even a bit funny. For example: Vachier-Lagrave against Ding Liren.

Fide Grand Prix in Zug:

After round 6, we got 3 leaders: Topalov, Morozevich and Ponomariov, all with 4/6. Every round is a great fighting round and it is great fun to watch the games live! In case you can open a small window during your work time, don't miss it :).

Capablanca Memorial:

The traditional tournament in Cuba is on the run as well, but things are more peaceful here. During the first 3 rounds we could see only one decisive game between

Almasi-Harikrishna in favor of the Hungarian, the rest of the games ended in a draw.

Chinese Championship:

The best Chinese players (except Ding Liren, who is playing at the Alekhine Memorial, and Wang Hao, who is not participating in the event) are fighting for the title. Wang Yue is the clear leader with a great score of 6/8.

Have fun watching the games and we hope to bring you closer to some of the most interesting ones!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Ding Liren (2707) – Aronian, L (2809) [D45]

Paris/St Petersburg FRA/RUS Paris/St Petersburg FRA/RUS (1), 21.04.2013

[Arkadij Naiditsch]

We will see a very high level game with really great play by Ding Liren, a 20 years old super talent from China, who, for some reason, is not really well-known in Europe. However, I guess that very soon he will be more visible in top level Round Robins.

1.d4 d5 2.c4 c6 3.♘f3 ♘f6 4.♘c3 a6 This time we see a Slav with 4...a6, a very popular opening.

5.e3 e6 6.c5 One of the most critical lines.

6...♘bd7 7.b4 The idea of White is simple, to hold the e3-d4-c5 pawn structure, which gives him a clear space advantage. [7.♙c2 was played in the match Gelfand-Anand.]

7...b6 A very usual move for Black with the main plan of developing the bishop from c8 quickly. It will go to a6 and will be exchanged.

8.♙b2 a5 9.a3 ♙e7 Aronian himself played this position against his countryman Akopian.

10.♙d3 0-0 11.0-0 ♙a6! Strong and correct play, Black should exchange the light-squared bishop. Akopian played here 11...♙c7, and after 12.♙e2!, he got quickly into a forced position.

12.♘e1 White is transferring the knight from the f3 square to a much better position on d3, in case of ♙xd3.

12...♙c4? I think this is clearly an over optimistic move from Aronian. [A much more solid way of play would have been 12...♙c7 13.♙e2 It is hard to find a better move for White. 13...♙xd3 14.♘xd3 ♙b7 and if White is better, his advantage is minimal.]

13.♙xc4! No fear shown by Ding Liren against World's Nr 2. They are going into complications.

13...dxc4 14.♙e2! Another good move! White is trying to stabilize before starting the action in the center with e4. [Too hurried would have been 14.e4?! axb4 15.axb4 bxc5 16.bxc5 e5! would crush all the White center.]

14...♖b8 It is hard to give an advice for Black... [Maybe an attempt could have been to get play on the a-file. 14...axb4 15.axb4 ♖xa1 16.♙xa1 ♙a8 but here White seems to be doing better as well. 17.♘c2 ♙a6 Avoiding having to play b5, which can be important, because Black keeps the possibility of playing e5 in the future. 18.f4! Stopping Black even from dreaming about the e5 move. White's position seems to be better.]

15. ♖a2 A creative move with the idea of forcing Black to finally play b5. [I think that the simple 15. ♘f3 would have done it as well.]

15...b5 The b5 move has been done, so now it is time to play in the center.

16.e4 Now it is clear that White is rolling.

16...♖b7 Aronian transports his rook to d7, but I am not sure if this was really a good idea. Maybe it was time to admit the mistake and play 16...♖a8 back.

17. ♘c2 ♘b8 White has a huge amount of good moves!

18. ♖aa1 Ding Liren decides to go for some play in the center. [An attempt to crush Black on the spot. 18.a4 axb4 19. ♘xb4 would lead only to an unclear position after 19... ♙xd4! No fear. 20.e5 We are in deep complications.]

18...♙c8 19. ♖ad1 ♖d8

20. ♙c1! Before start ing the final action, White is taking his time to put his pieces on better positions.

20...♘a6 21. ♙f4 ♖bd7 22.h3 Ding continues with his positional play. [Another option for White could have been to play 22.bxa5 An ugly looking move, but the idea of 22... ♙a8 23. ♘a2! looks strong. The White knight on b4 will take a perfect position.]

22...♘e8 Black had nothing better than just keep on waiting... As we can see, White is already much better.

23. ♙e3 [23.bxa5 with the same idea as before, ♘a2-♘b4.]

23...♙f6 provoking White to play e5.

24.e5 I am not sure if this was the best option for White. Now Black is gaining the very important d5 square.

24...♙e7 25. ♘e4 White gave up the d5 square but got the one on d6 for it.

25...♘ac7 26. ♘d6 ♙a8 Suddenly, Black is very quick on the queenside. The next moves are ♘d5-♖a7 and the a-file belongs to Black.

27. ♔g3 ♘d5 28. ♘e3!? I think this was a good move by White. It is clear that with such a huge space advantage, he should be trying to play for mate.

28... ♘c3 29. ♖de1 ♙xd6 It seems like White has blundered an exchange, but that is not the case!

30. exd6 ♘e4 It is hard to find a better move for Black. Even though it is a forced line, it is probably just lost.

31. ♔h4 ♘d2 and, of course, Ding found

32. ♘d5! and the knight on d2 is under attack.

32... ♘xf1 [32... exd5 33. ♙xd2 would just lead to a winning position for White.]

33. ♘b6 ♔a7 34. ♖xf1 Black is an exchange up, but I think it is clear that White is doing better. The monster pawn on d6 and the knight on b6 are giving Black hard times. Plus it is very hard to find a playable plan for the next moves...

34... ♘f6 Very logical, the black knight is going to d5. [34... axb4 35. axb4 and the next Black's move is still unclear...]

35. ♙e5! Ding continues playing a fantastic game.

35... ♘d5 What else?!

36. ♘xd5 exd5 Is Black finally safe?

37. ♙xg7!! No, Black is lost!

37... ♔xg7 38. ♔g5+ ♔f8 39. ♔f6 ♔g8 40. ♔g5+ ♔f8 41. ♔f6 ♔g8 Ding is repeating moves before the time control, and playing the correct

42. ♖e1! White just wants to give a mate by playing ♖e3-♖g3 or ♖e5-♖g5, and Black got no defense against it.

42... axb4 [It does not help to play 42... h6 43. ♖e3 ♔h7 Black managed to avoid ♖g3, but now White got a new winning idea. 44. ♖e7! The f7 pawn is the new target. 44... ♖f8 45. ♔f5+ and the rook on d7 is falling.]

43. ♖e5 A nice finishing move.

43... h6 44. ♖h5 Ding Liren, cool until the end.

44... ♔xa3 45. ♔xh6 The mate on h8 is a serious threat :).

45... f6 46. ♔xf6 A really fantastic game by the very talented Chinese.

1-0

(2) Kramnik,Vladimir (2801) — Vitiugov,Nikita (2712) [A07]

Paris/St Petersburg FRA/RUS Paris/St Petersburg FRA/RUS
(1), 21.04.2013

[Arkadij Naiditsch]

Kramnik continued to show his great form and made practically a full point „out of nothing“. Somehow, in general, Kramnik manages to win a lot of games against his countrymen. Now Vitiugov, at the Candidates, Grischuk and Svidler.. .

1.♘f3 d5 2.g3 c6 From time to time, Kramnik likes to play the Reti opening and he does it quite successfully. As we remember, during the Candidates, he managed to get a big advantage against Aronian.

3.♙g2 ♙g4 The line with 3...♙g4 is one of the most playable answers for Black currently.

4.0-0 ♘d7 5.d3 ♘gf6 As we can see, Black does not hurry with e6 in order to have an immediate e7-e5 in the pocket.

6.♚e1 Very typical play.

6...e5 7.e4 dxe4 8.dxe4 ♙d6!? Of course, this is all well known, but anyway it is a nice move. Black is taking his bishop to c7, from where it defends the pawn on e5 and, at the same time, can become active on the b5 square.

9.♘bd2 0-0 10.h3 ♙h5 Of course, Black is not giving his bishop away...

11.♘c4 ♙c7

12.a4 securing White's knight position on c4.

12...♖e8?! I am not sure whether this move just loses a tempo. In general, the biggest problem for Black is his bishop on h5. If Black is on time to move the knight from f6 and play f6-♙f7, he is at least doing fine. For White, it could be a typical plan to play ♙e3-♘fd2 and f3!, followed by ♖f2 and ♙f1, leaving the Black bishop out of play on h5.

13.♘h4 The White knight is going to f5 — clearly a nice place to be.

13...♘c5 A possible move, but maybe White is doing a bit better after this. [More often, Black chooses a different square for his knight. 13...♘b6 The exchange of knights is clearly good for Black. 14.♘a5 ♚b8 and Black wants to play ♘bd7 next.]

14.♘f5 ♘e6 15.♙e3 White wants to play ♖d1 followed by ♘d6.

15...♘f4 A very spectacular move with no great effect. [15...♚b8 would have been a more solid move for Black, even though I think White is doing a bit better.]

16.f3! Cool and strong! As we can see, White is slowly reaching the main goal of the opening: to leave the bad

bishop on h5 out of the game. [Of course not 16.gxf4 exf4! and Black's position is huge!]

16...♘xg2 17.♔xg2 ♕g6 18.♖d1 ♞d5 Black continues playing inventively, and what else is left?! Clearly, it is not an option to let the White knight jump to d6.

19.♞h4 A solid move by Kramnik. [19.exd5 This would lead to a not so clear position: 19...♕xf5 20.dxc6 (20.d6 ♕b6 and probably White should be better here, but the position is pretty complicated.) 20...♔c8 Black's bishop pair should be enough compensation for a pawn.]

19...♞xe3+ 20.♔xe3 Who is stronger, the white knights or the black bishops?! The answer is quite simple: of course, the knights. The bishop on g6 is still very bad, White controls the d-file and the queen + knight combo is dangerous.

20...♔e7

21.♔b3! White is making sure that Black will not bring out the bishop from g6 for quite some time, and is attacking the very important b7 pawn, which holds the Black structure together.

21...♖ab8 [21...b6 22.♞e3±]

22.♖f2 Why not to double on the d-file?

22...♖ed8?! looks very logical, but I think that after 22...♖ed8?!, White's advantage becomes clearer. [Maybe an attempt to change the dynamics of the game would work now. 22...♔e6 23.♖fd2 b5!? with quite good chances to escape.]

23.♖xd8+ ♕xd8 24.♖d2 The d-file belongs to White.

24...♕c7 25.♖d3 ♔e6 26.♔b4 A tricky move with the idea of ♔d2 and ♖d7 in the future.

26...b6?! [Finally, Black managed to play f6 and I think that such a move is too hard to miss. 26...f6 27.♞xg6 hxg6 28.♞e3 with a minimal advantage for White.]

27.b3 a6?! This move already puts Black in big trouble. [27...♖d8! and Black is simply worse.]

28.♔d2! Using the right moment.

28...b5 29.♖d7 That is the key idea of 28.♔d2. Black is not in time to push out the White knight from c4 in order to free the b6 square for the bishop.

29...bxc4 30.♖xc7 cxb3

31. ♖b7! Probably Vitiugov missed this move when he played 27...a6?!.

31... ♙c8 32. ♖xb3 ♜xb3 33.cxb3 White's advantage here is quite serious! He has a better pawn structure, a more active queen, and the Q+N combination leaves Black with very slim chances.

33...f6 Finally.

34. ♙d6 ♙f7 It is hard to give Black an advice. White's plan is easy, to put the pawns on b4-a5 and get the knight out from h4. [34... ♙f7 35. ♘f5]

35.g4! Very strong move. White wants to play ♙g3-♘g2-♘e3 leaving the poor bishop on g6 out of the game again.

35... ♙e8 36. ♙g3 ♙b7 37.b4 ♙c8 38.a5 White continues to improve his position where Black has nothing better to do than just keep on waiting.

38... ♙f7 39. ♘g2 and the White knight is coming into the game with crucial effect.

39...h5 40. ♘e3 hxg4 41.hxg4 The time trouble is over and it is time to take a fresh look at the position. From Vitiugov's point of view, things look pretty bad. The main mission did not go too well, the bishop on g6 is still out of play, and the pawn on a6 is a potential target for the White queen and knight. Another plan for White could be just to play ♙c5, followed by ♘c4. All in all, things are looking pretty dark for Vitiugov.

41... ♙e6 This almost loses by force now, and Kramnik shows us why!

42. ♙d3! Pushing the Black queen back „home“.

42... ♙c8 43. ♙c4+ White puts his queen on the perfect square on c5 via some checks.

43... ♙f8 44. ♙c5+ ♙g8 and the final move

45.b5! The game is over! Black cannot stop White's a-pawn from queening.

45...axb5 46. ♙b6 ♙f8 47.a6 ♙b4 It is too late for any active play...

48.a7 ♙e1+ 49. ♙g2 ♙d2+ 50. ♙g1 At 50... ♙e1, 51. ♘f1 finishes Black's suffering. All in all, a great positional win for Kramnik and a slightly „too respectful“ play from Vitiugov.

1-0

**(3) Svidler,Peter (2747)
— Gelfand,Boris (2739) [B30]**

Paris/St Petersburg FRA/RUS Paris/St Petersburg FRA/RUS
(1), 21.04.2013

[Balogh Csaba]

We will see a deep preparation by Boris Gelfand, who improved on his own game against Carlsen on the Candidates tournament.

1.e4 c5 2.♘f3 ♘c6 3.♙b5 White avoids the Sveshnikov defense.

3...e6 4.0–0 ♘ge7 5.♖e1 This is the new fashion to play with White against the 3...e6 setup.

5...a6 6.♙f1 d5 7.exd5 ♘xd5 8.d4 ♘f6 Nothing new so far.

9.♙e3

9...♙e7 This is the deviation, but it is not a novelty yet. [9...cxd4 was played in the Carlsen-Gelfand game, which we analyzed in the 58th CEWN.]

10.dxc5 Svidler goes for the most concrete test of the move and grabs the pawn. [White has an alternative to

play for a small advantage with 10.c4 cxd4 (The tactical point is that 10...♘g4 does not work here because of 11.d5! ♘xe3 12.♖xe3 and Black has difficulties.) 11.♘xd4 ♙d7 12.♘c3 and we get the same slightly superior pawn structure as in the Carlsen-Gelfand game.]

10...♙xd1 11.♖xd1 ♘g4! Black uses the standard method of winning back the pawn. He wins an important tempo by attacking the f2 pawn. [11...♘d5 is less accurate. 12.♙d2 ♙xc5 White gets an edge after 13.c4! ♘f6 14.♘c3 0–0 White might create a hole on b6 for his knight by playing 15.♘a4! ♙a7 16.♙e3! ♙xe3 17.fxe3±]

12.♙f4 ♙xc5 White is forced to waste a tempo for the defense of the f2 pawn.

13.♙g3

13...h5! An excellent move! Black must continue playing concrete chess, otherwise, White will simply build up an initiative. The threat is h4, which is not easy to parry. [After the „handy“ 13...0–0 14.♘bd2 with the idea of ♘e4, Black is forced to prevent it by 14...♘f6 15.c3!± followed by b4, a4 and ♘c4, with a small but stable advantage.]

14.♖d2 Overprotecting the f2 square. [On 14.h3 Black might play again 14...h4! with similar ideas to the ones in

the game. 15. ♖xh4 (15. ♖xh4 runs into 15... ♖xh4! 16. hxg4 (16. ♖xh4? ♖xf2+ 17. ♖h1 ♖e3!-+ followed by taking either on h4 or on f1.) 16... ♖xg4 Black has no problems after taking the strong dark-squared bishop.) 15... ♖xf2! 16. ♖xf2 ♖xf2+ 17. ♖xf2 ♖xh4= The simplifications clearly favored Black and he does not need to worry anymore about staying worse.; 14.h4?! is a huge positional mistake. The g4 knight cannot be kicked out anymore. Black can calmly play 14...e5 since White cannot grab the pawn with h3, ♖f6 and ♖xe5 anymore.]

14...h4! Gelfand is still following his preparation and plays the most concrete moves.

15. ♖xh4 [The only way to fight for an advantage is 15. ♖d6!? although after 15... ♖xd6 (15... ♖a7 16. ♖c3) 16. ♖xd6 ♖e7 17. ♖d2 ♖ge5 18. ♖xe5 ♖xe5 19. ♖c3 I do not believe this is too much for White, however, Black still needs to make some precise moves to hold.; 15. ♖xh4 is met with the same motif as in the game. 15... ♖xh2! 16. ♖xh2 ♖e7 Black wins back the piece and equalizes completely.]

15... ♖xh2! 16. ♖xh2

16... ♖d4!! This was the whole point of the h4- ♖xh2 combination. By removing the guide on f3, Black wins back the sacrificed material.

17. ♖xd4 [White might try to keep the material with 17. ♖h3 e5+ 18. g4 ♖e7! Black creates many threats by preventing ♖d8. (18... ♖xf3?? does not work obviously. 19. ♖d8#) 19. ♖xd4 exd4 20. ♖g3 ♖d6+ 21. ♖g2 (21. ♖h3? is refuted in a nice way:

21...g5! 22. ♖xg5 f5!! opening the diagonals on the king. The h4 bishop is in danger. And on 23.f3 ♖f4!-+ is the point, and the knight is suddenly trapped on g5.) 21... ♖xg4 Black is fine!; 17. ♖xd4 ♖xh4+ 18. ♖g3 ♖xd4 would be already slightly better for Black because of the pair of bishops.]

17... ♖xd4 White is still ahead materially, but the b2 and f2 pawns are hanging and the pin on the h-file is still very annoying.

18. ♘bd2 g5 [Black could have already started to fight for an advantage by playing 18... ♖xf2 19.g3 f6 20.♔g2 ♖c5 Black has a pawn and a rook for the two minor pieces, but he threatens to trap the bishop with g5. This forces White to create another weakness 21.g4 e5! and the c8 bishop joins to the game. Only Black can be better.]

19.g3 Threatening with ♘xd4 and ♘g5. The following couple of moves are forced... [19.♔g1 leads to equality after 19... ♖xh4 20.♘xh4 gxh4=]

19... ♖xb2 [19...gxh4? 20.♘xd4 hxg3+ 21.♔xg3± White would be ahead in material!]

20. ♖b1 ♖f6 21. ♘e4! gxh4 [21... ♖e7? 22.♘exg5]

22. ♘xf6+ ♔e7 23. ♘e4 hxg3+ 24. ♔xg3

24...b5 The complications are over. Probably this was also the end of Gelfand's preparation. The material is more or less balanced. White needs to get rid of the c2 weakness, but this leads to further exchanges. The draw soon becomes inevitable.

25.c4 ♖b7 White needs to be careful because Black's heavy pieces are coming against the naked king, but actually, it just looks scary and there are no real threats.

26. ♔f4! ♖h5 Trying to create some new threats. For instance, ♖f5, followed by ♖xf3 and f5, but Svidler calmly holds everything together.

27. ♖e2! ♖c8 [27... ♖f5+ 28.♔e3 Black cannot increase the pressure.]

28.cxb5 axb5 29. ♖xb5 ♖xb5 30. ♖xb5 ♖c2 Black wins back the pawn.

31. ♘d4 [31.a4 also leads to a draw, although it is not advisable to give Black a couple of connected passed pawns. 31... ♖xe4 32.♔xe4 ♖xf2 33.a5 ♖a2 34.a6 ♔d6 and the king is heading to b6.]

31... ♖xa2 32.f3 ♖xe4 33.fxe4 Everything is clear now! The following moves are only due to the no draw offers rule before move 40.

33... ♔f6 34.e5+ ♔g7 35. ♘f3 ♖a5 36. ♖d3 f6 37.exf6+ ♔xf6 38. ♔e3 ♖a3 39. ♔e4 ♖a4+ 40. ♔e3 ♖a3 41. ♔e4
A good game, which gives us a closer look at how deeply everything is analyzed for the top players. This was just a sideline of a sideline, but still, Gelfand played everything instantly until the 24th move. A good presentation to understand the very high percentage of draws on the highest level. All the players are just extremely well prepared and when the game finally starts (on the 24th move here), it is already too late to create some action...

1/2

(4) Caruana,Fabiano (2772)
— Radjabov,Teimour (2793) [C63]

Zug SUI Zug SUI (1.3), 18.04.2013

[Balogh Csaba]

A great preparation by Caruana against Radjabov's pet line, the Jaenisch Gambit. It seems to cause real problems for Black. White got a better position and succeeded to convert it with a nice technique.

1.e4 e5 2.♘f3 ♘c6 3.♙b5

3...f5 This is the Jaenisch Gambit. Recently it enjoys big popularity mainly because of the efforts by Radjabov. In many lines, Black sacrifices a pawn and aims for some kind of counterplay mostly with the bishop pair.

4.d3 [4.♘c3 is the main line, but the text was also always considered a decent attempt for White.]

4...fxe4 5.dxe4 ♘f6 6.0-0 ♙c5 7.♙xc6 This is the first small surprise. [The two main moves are 7.♘c3; and 7.♙d3]

7...bxc6 8.♘xe5 0-0 This is still just the beginning of the line. So far, it was considered to be fine for Black, he gets adequate compensation for the pawn in all the lines...

9.♘c3 d6

10.♘a4!! This is the novelty, which seems to cause real problems for Black... [After the greedy 10.♘xc6 ♙e8 11.♘d4 ♘xe4 12.♘xe4 ♙xe4 Black has a fantastic compensation with the bishops. ♙b7 is coming next and the king is vulnerable.; 10.♘d3 happened in previous games. 10...♙d4 11.♘e2 ♙b6 12.♙g5 ♙e8 13.♙xf6 ♖xf6 14.♘g3 ♙f7 We are following the Anand-Carlsen game from 2009, which was basically the last high-level game with 7.♙xc6. Black got a great attacking position in this game after 15.b3 in order to play c4 after ♙a6, which would have created big problems against the f2 square. 15...♙e6 16.♙d2 ♖f8 17.♖ae1 ♖h6! with a dangerous attack. A possible attacking idea is ♙f6-h4, when h3 could be met by ♙xh3. Anand soon got into trouble, but later on, he managed to save the game.]

10...♙e8 This looks like the critical move. [Black can restore the material balance by playing 10...♙xf2+ 11.♖xf2 dxe5 but he ends up in a horrible endgame after 12.♙xd8 ♖xd8 13.♙g5 ♖d6 14.♙xf6 gxf6 15.♘c5 A typical endgame with a good knight versus a bad bishop, which is mainly caused by the damaged queenside pawn structure. The f6 pawn might get also into some trouble later on.]

11. ♖d3 ♜xe4 Black enters into an ugly position, but there probably was nothing better. [11... ♗g4 12. ♕e1 ♗d4 White manages to get rid of the bishop pair after 13.c3 ♗b6 14. ♖xb6 axb6 15.f3!± and White seems to be a clear pawn up.]

12. ♖axc5 ♜xc5 **13.** ♖xc5 dxc5 Basically, we ended up in this position by force after 10. ♖a4. The material is balanced, but of course, we cannot count the tripled pawns on the c-file as real pawns, so White is basically a clear pawn up on the kingside. Black can hope for counterplay with the opposite colored bishops, but as we will see, White is able to neutralize the activity with some good moves.

14. ♗e3 ♖g6 Black immediately tries to get counterplay with ♗h3. [After 14...c4 White can, for instance, play 15. ♕d4 ♗e6 16. ♕c3 with a nice advantage. Similar things happened later on in the game.]

15. ♕d3?! I believe this is an inaccuracy, which gives Black some tempi. [15. ♗xc5? is obviously a blunder. 15... ♗h3!; 15. ♕d2! should have been played, followed by f3, and White is at least one tempo ahead compared to the game... 15... ♗h3 16.f3 ♖ad8 17. ♕f2± Keeping everything safe and the pawns start to hang.]

15... ♗f5! In my opinion, Black cleverly keeps the queens on the board. [The endgame is very unpleasant for Black. 15... ♕xd3 16.cxd3 ♖d8 17. ♖fc1 ♖xd3 18. ♖xc5 Black managed to get rid of one c-pawn, but there are still three weaknesses left 18... ♗d7 19. ♖a5 a6 20. ♖c1± White has a huge advantage. Black has no moves, while White has many ways to improve his position. For instance, h4-♖h2, ♖c4-a4, ♗f4 or ♖c4-b4-b7. It is very difficult to defend against all of them.]

16. ♕c4+ ♗e6

17. ♕e2! Caruana finds the right plan (f3-♕f2), but he wasted some time. [17. ♕xc5 allows 17... ♗d5 18.f3 ♖xf3 Black gets counterplay.]

17...c4 Radjabov decides to put his pawns on light squares, to make White's task more difficult. [After 17... ♖ae8 White can build up his target setup with 18.f3 ♗h3 19. ♖f2 After White consolidates, the queenside pawns will start to hang.]

18.f3! a6 19. ♗d4 The bishop occupies its ideal diagonal. After this, White only needs to activate his rooks.

19...♖ae8 20.♔h1 [20.♞f2 was also possible, followed by ♖ae1. 20...♙d5 21.♔h1]

20...♙d5 21.♞d2 [21.♞f2 seemed to be stronger again, followed by ♖ae1. 21...♞e6 22.♖ae1 ♞fe8 23.♞xe6 ♞xe6]

24.♞e1 ♞xe1+ 25.♞xe1 This queen and bishop endgame is going to be extremely unpleasant and a long suffering from Black's point of view. Black cannot search for any counterplay because of the g7 pawn, while White can put the c7 pawn under permanent pressure and he can advance his kingside pawns, making the Black king more vulnerable.]

21...♞e6 22.♙c3 [The problem with the queen on d2 is that ♖ae1 does not work. 22.♖ae1? The f3 pawn is unprotected. 22...♞xe1 23.♞xe1 (23.♞xe1 ♞xc2) 23...♞xf3! works for Black.]

22...h6 23.♞f2 White needs to look for another plan since [23.♖ae1 has the same problem as in the previous move.]

23...♔h7 24.♖af1 White overprotected the f3 square and is ready to play ♞e2 again, heading for the queen + bishop endgame.

24...♞f5? This is a strange decision, in my opinion. Why didn't Black occupy the only open file?! [After 24...♞fe8! Suddenly, it is not easy for White to improve his position. He must forget about exchanging the rooks. In my opinion, another idea behind doubling the rooks on the f-file was to push f4, followed by either ♙e5 or f5-f6, but on the other hand, it seriously strengthens the power of the d5 bishop. 25.f4 could be met by 25...♞h5! with the threat of ♞e2 and on 26.♙e5 g5! seems to work! Undermining the e5 bishop and preparing the penetration on e2.]

25.♞e1! White can finally fight for the e-file.

25...♞d6 Radjabov prefers to keep all the rooks on the board, but he is unable to create any serious counterplay with them. It is worth to look at how Caruana improves his position move by move from now on. [25...♞xe1+ 26.♞xe1± is also very bad for Black. White can play ♞e2-e7, for instance.]

26.♙e5 ♞d7 27.♞c3 White has activated his bishop and protected the f3 pawn with the queen. Now he can use his f2 rook as well, without being afraid of ♞xf3.

27...♞g5 28.♞fe2 ♞df7 Refreshing the ♞xf3 threat, but White simple parries it with

29. ♖e3! h5 Radjabov continues looking for counterplay, this time with h5-h4. Actually, this only weakens his own pawns and makes White's task easier.

30. ♖1e2 White improves his pieces „square by square“.

30... ♗g6 31.h3! Another very good preparation before starting the real action! White gives air for the king.

31... ♗g5 32. ♔h2 Improving the king as well.

32...h4 This is a weak ening move, putting the pawn on a dark square. However, the position already was very bad. [If Black decides to go for the waiting strategy with 32... ♖g8 White can increase his advantage by 33.b3! The idea is to kick out the d5 bishop via c4. 33...cxb3 34.axb3 ♔h7 35. ♗d3+- with the multiple threats of g4, ♗xa6 and c4. When the bishop loses its outpost on d5, it will never find its place on the board...]

33. ♗d4 ♖e7

34. ♗g4! Caruana decides to transpose to an endgame where the Black pawns start to fall automatically.

34... ♔g8 [34... ♗xg4 35.hxg4 ♖f8 36. ♔h3! Forcing another pawn to a dark square, where it can be attacked

by the bishop later on. 36...g5 37. ♗c3 ♖xe3 38. ♖xe3+- White will soon start to collect the pawns. For instance, ♖e5- ♗d2 is a threat.]

35. ♗c3 White wins the fight for the e-file and also prepares to win the h4 pawn with ♗e1.

35... ♖xe3 36. ♖xe3 ♔f7 37. ♗e1! The pawns start to fall and, at the same time, White created another threat: to play ♖a3 and the a6 pawn cannot be protected. The game is basically over!

37... ♗f4+ 38. ♗xf4 ♖xf4 39. ♖a3! White collects the first weakness!

39... ♖d4 40. ♖xa6 g5 41. ♖a7 Collecting the second weakness!

41... ♖d1 42. ♖xc7+ ♔e6 43. ♗b4 c3 [43... ♖c1 can be simply met by 44. ♖e7+ ♔f5 45. ♖e2+- with two extra pawns and g5 is still a target.]

44. ♗xc3 ♖c1 Radjabov tries to get counterplay on the second rank, since he prevented the ♖e7-e2 idea with the previous pawn sacrifice, but White is completely winning.

45. ♖g7 ♗xa2 [45... ♖xc2 46.a4 ♗xf3 47. ♖xg5+-]

46. ♖xg5 The third weakness is also taken and the last one on h4 is will not last long either.

46... ♖xc2 47. ♖g6+ ♔d7 48. ♖g4 ♗d5 49. ♔g1 ♖c1+ 50. ♔f2 ♖c2+ 51. ♔f1 Black resigned! A nice positional achievement and a well-deserved victory for Caruana!

Endgame section

(15) Nakamura,H (2767) – Kamsky,G (2741)

(4), 21.04.2013

[Chess Evolution]

White is a clear pawn up, but Black's active rooks give very good chances for survival. Kamsky defends the position with excellent technique. With his last move (Re1), White wanted to activate his rook by playing Re8, so Black needed to act urgently.

34...g4! Forcing White to take a concrete decision. He must either leave the f2 pawn or exchange a pair of rooks and double his own pawns at the same time.

35.hxg4 hxg4 36.♖f4 Nakamura finds the better chance... [After 36.♖fe3 ♖dd2

37.♖f1 White is forced into passivity. **37...♖d4!=** Preventing ♖e4. White cannot make progress. When the f1 rook moves, ♖dd2 goes back, while any moves of the e3 rook leaves the b3 pawn unprotected. Black can play ♖b2, for instance.]

36...♖xf4 37.gxf4 ♖b2! Forcing the White rook into the defense. Activity is the key factor in most rook endgames.

38.♖e3 White would like to play ♔g3 and f3, getting rid of the doubled pawns.

38...f5 [It was more circumspect to play 38...♔f5! 39.♔g3 f6 aiming for same position as in the game, except that Black has a more active king in this case. 40.f3 (40.♖d3 is met by 40...♔e4 and the rook must go back to e3.) 40...

gxf3 41.♔xf3 ♖d2! After this strong prophylactic move against ♖d3, White has no chance to win the game as all the rook moves allow ♖d3.]

39.♔g3 ♔f6 40.f3 Forcing Black to take on f3. [Otherwise, after 40.♖d3 ♖b1 41.f3 ♖g1+! 42.♔f2 ♖b1= and the White king can never go to e3-d4, because of g3, while fxg4 fxg4 allows Black to create counterplay with ♔f5. Black holds easily.]

40...gxf3 41.♔xf3 It is very important to realize White's main plan to make progress. He is intending to play ♖d3, followed by ♔e3-d4-c5 going for the b4 pawn and supporting his own a-pawn. Black must fight precisely against this idea!

41...♖d2! 42.♔g3 ♖c2! 43.a5 Nakamura finds, once again, the only attempt to fight for the win. He exchanges his a-pawn for the one on b4. On the other hand, the simplifications usually make the job of the defensive side easier. [The point was that after 43.♖d3 with the idea of ♔f3-e3-d4, Black can play 43...♖c3! and the White king is not in the square of the c-pawn, so White has to make the only move ♖f3, which is too passive to hope for something real.]

43...♖a2 44.♖d3 ♖xa5 45.♖d6+ ♔e7 46.♖b6

46...♖a2! In rook endgames, the right placement of the rooks is behind the passed pawns. White should also aim to get his rook to b1 or b2, but of course, it is impossible now...

47.♖xb4 ♖d2 Kamsky stays ready to annoy the White king with checks along the 3rd rank.

48.♔h4 [48.♔f3 is met by 48...♖d3+ 49.♔e2 ♖h3 Cutting the king along the 3rd rank. This is a known defensive method. White can hardly advance his b-pawn because of the f4 weakness. 50.♔d2 ♖f3 51.♔c2 defending the b-pawn in order to play ♖c4 and push the b-pawn, but Black is in time to play 51...♔d6! 52.♖c4 ♔d5= and the draw is inevitable. White cannot make progress.; Let us see what happens if White advances his b-pawn on the most direct way. Black has different ways to defend successfully. 48.♖b7+ ♔e6 49.b4 ♖b2 50.b5 ♖b1 51.b6 ♖b3+ 52.♔f2 (52.♔h4 drops the f-pawn. 52...♖f3 53.♔g5 ♖g3+ 54.♔h5 ♖h3+ 55.♔g5 ♖g3+ 56.♔h4 ♖f3 57.♖b8 ♖xf4+ 58.♔g5 ♖b4 59.b7 ♔d7=) 52...♔d5 53.♖b8 ♔e4 54.b7 ♔xf4 The Black king gets a shelter from the f-pawn against the checks.]

48...♖g2! Another important move! Black cuts the king along the g-file, avoiding an attack against the f5 pawn.

49.♔d4 Finally, the White rook finds a safe place, as it cannot be attacked by the king from e5. He is ready to advance the b-pawn. The problem is that without the help of the king, it cannot go too far.

49...♔e6 50.b4 ♖g1 Black is waiting, since b5 is always met with ♖b1, while if the rook moves, ♖g4 wins the f4 pawn.

51.♔h3! Getting Black into zugzwang, as he must either take his king away from the h-file or allow Black to put his rook behind the b-pawn. Kamsky continues to defend flawlessly!

51...♖g8! 52.b5 White can finally push the pawn, but on the other hand, it becomes a target now...

52...♖h8+ 53.♔g3 ♖g8+ 54.♔h4 [54.♔f3 is met by 54...♖b8! 55.♖b4 ♔d6 56.♔e3 ♔c5 57.♖b2 ♖e8+! Black could not take immediately on b5, but he waits for a better moment, when the White king will be in a worse position. 58.♔f3 ♖b8 59.b6 (59.♔g3 ♖g8±) 59...♖xb6 and the

pawn endgame is drawn, as White cannot get quickly to the f5 pawn.]

54...♖h8+ 55.♔g5 ♖g8+ 56.♔h6 ♖b8 [56...♖g1 was also good, with the idea of ♖b1, because 57.♖b4 is met with 57...♔f6 The king is in a mating net. White is forced to repeat moves. 58.♔h7 ♔f7 59.♔h6 ♔f6=]

57.♖a4 This is, of course, a kind of agreement to draw. Nakamura plays on for a while, but the draw is clear... [After 57.♖b4 the problem for White is his king, again. 57...♔f6! White is forced to repeat moves. 58.♔h7 ♖b7+ 59.♔h6 ♖b8! =]

57...♖xb5 58.♔g6 ♖c5 59.♖a7 ♖b5 60.♖f7 ♖a5 61.♖f8 [The pawn endgame is drawn because of the opposition. 61.♖f6+ ♔e7 62.♖xf5 ♖xf5 63.♔xf5 ♔f7=]

61...♔e7 62.♖b8 ♖a6+ [62...♖c5 was also good, but Kamsky prefers to hold with the well-known technique of the rook on the 6th rank...]

63.♔xf5 ♔f7 64.♖b7+ ♔f8 65.♔g5 ♖c6 66.f5 ♖a6 67.♖b8+ ♔f7 68.♖b7+ ♔f8 69.♖b8+ [69.f6 ♖a1= with dozens of checks from the 1st rank.]

69...♔f7 70.♖b7+ ♔f8 Great defense by Kamsky and nice try by Nakamura!

1/2

(16) Miton,K (2628) – Markowski,T (2558) [E18]

2013

[Kamil Miton]

18. Rfd1 After the opening, I got a pleasant endgame because of the weak black structure on the queenside.

18... Rfd8 19. a5 Rd4 Only move, as otherwise, Black will lose control of the d-file.

20. Rac1 I did not want to play b3 to keep the pawn on the second file, which can be important for White in order to transfer the rook over the third rank in the future.

20... Kf8 The black king is coming on time to e8, where it will prevent Rd7 and support the exchanges on the d-file.

21. Kf3 Ke8 22. Bc3 Rxd1 23. Rxd1 g6 This move seems to be completely normal, but now White has an additional idea, which I was able to use in the next moves. [23... Bf8 For me, this is the best, because Black does not create additional weaknesses. 24. a5 Be7 with ideas like Bf6 or Bd8.; 23... Bf6? 24. Bxf6 gxf6 25. Kg4+-; 23... f6 is also possible. 24. g4 Rd8 25. Rg1 with the idea of

trying to create new weaknesses on the kingside. White has a long-term advantage.]

24.e4 Rd8

25. Rxd8+! Kxd8 26.e5 Kd7 27. Ke4 Bf8 28. Bd2 Ke7 29. Be3 Now the black bishop has to protect the weak c5 pawn all the time. [29.g4 f5+ 30.exf6 Bxf6 31.b3 Bd4 Black improved his bishop. Thanks to this, he should hold the position.]

29...a6 30.b3 [30.g4 I was not sure about this move. It looks logical because White wants avoid h5 and not allow Black to exchange the h-pawns. On the other hand, Black can use the same idea that we will see later in the game. 30...g5! To put the pawn on a dark square is super strange, but now it is not easy for White to make progress. For example: (30...f5+ 31.exf6 Bxf6 32.b3 Kd6) 31.b3 Ke8 32. Bf3 (32.f4 gxh4 33. Bxf4 Kd7 and how to play next?; 32.h4 gxh4 33.f4 h3 34. Bf3 Bh4 and Black has counter-play.) 32... Kf8 If Black keeps his king on d7, then White can win with the following plan: first, push h4 and after gxh4, advance f4-f5. 33. Kg2 Kg7 34.h4 gxh4 35.f4 Kg6 36. Bh3 h5 and Black is fine.]

30...h5! Typical defensive idea. Black is going to get rid of the potentially weak h-pawn.

31.f3 ♖e8 32.♙h6 ♙d8 [32...♙f8?? 33.♙xf8 ♖xf8 34.♙f4 with an easy winning plan: first, put the king on g5 and then play h4-g4.]

33.♙e3 ♙e7 34.h3 ♖d7

35.g4?? Huge mistake! After this move, the position will be drawish. White should play [35.f4 ♖e8 36.g4 Of course, I saw this plan, but it is hard to explain why I decided not to use it. 36...hxg4 37.hxg4 ♖d7 38.♙c1! White has to be accurate immediately. (38.f5 then 38...gxf5+ 39.gxf5 f6! and Black gets rid of all the weaknesses.) 38...♙f8 39.♙d2 (39.f5 gxf5+ 40.gxf5 ♙e7 41.f6 ♙d8 42.♙e3 ♙b6 43.b4 White is still better, but it makes no sense to allow the black bishop to change diagonals.) 39...♙e7 40.♙e3 ♙f8 and this is the moment for 41.f5 gxf5+ 42.gxf5 exf5+ (42...♙e7 43.f6 ♙f8 Now Black is playing without the bishop. Let us check the winning plan for White. 44.♖d3 ♖c7 45.♖c2 ♖b7 46.♖b2 ♖b6 47.♖a3 ♖a5 48.♙d2+ ♖b6 49.♖a4 ♖b7 50.♖a5 ♖a7 51.♙e3 ♖b7 52.a4 ♖a7

53.b4 ♖b7 54.b5 axb5 55.axb5 cxb5 56.♖xb5 (56.cxb5 c4 and Black is fine.) 56...♖c7 57.♖a6! The most accurate. (57.♙xc5 ♙h6 58.♙d6+ ♖c8 59.♖c6 ♙f4 and it is hard to improve White's position!) 57...♖c6 58.♖a7 ♖c7 59.♙d2 ♖c8 (59...♖c6 60.♖b8+-) 60.♖b6 ♖d7 61.♖b7 ♖d8 62.♖c6 ♖c8 63.♙e3 ♖d8 64.♙xc5 Taking the c5 pawn this way, White will be able to promote the c-pawn because the king can get to b7 on time. 64...♙h6 65.♖b7+-) 43.♖xf5 ♙e7 44.♙f2 ♖d8 45.♙g1 (45.e6 White is not ready for this move yet because of 45...fxe6+ 46.♖xe6 ♙f8 and the black king escapes to b7. Then, even if White gets the c5 pawn, it will not be enough to win the game!) 45...♖d7 46.♙e3

46...♙f8 (46...♔d8 After this move, White gets a winning pawn endgame. 47.♙g5! ♔d7 48.♙xe7 ♔xe7 49.a3 a5 50.a4 ♔d7 51.♙f6 ♔e8 52.e6 ♔f8 and the stalemate idea does not work because White can play the simple 53.♙e5+-; 46...♔e8 47.e6 fxe6+ 48.♔xe6 ♔d8 Now the most important is not to allow Black to put the king on b7! 49.♙h6 ♔e8 50.♙f4 ♔d8 51.♙c7+ ♔e8 52.♙d6 ♙g5 53.♙xc5+-) 47.♙f6 ♔e8 48.e6 fxe6 (48...♙e7+ 49.♔e5 ♙f8 50.exf7+ ♔xf7 51.♙g5 ♙e7 52.♙h6+- White, thanks to some zugzwang ideas, slowly comes with the king to the d6 square.) 49.♔xe6 ♔d8 50.♙f4! White prevents the transfer of the king to b7 again. 50...♙e7 (50...♙g7 51.♔d6+-; 50...♔c8 51.♔f7+-) 51.♙c7+ ♔e8 52.♙d6 ♙h4 53.♙xc5 ♙g3 54.♙d4 ♙b8 55.♙e5 ♙a7 56.b4+- and the white king soon gets to d6.]

35...hxg4 36.fxg4 [36.hxg4 g5! The same only way to survive!]

36...g5! I saw this, but I thought that I can simply win now thanks to the king transfer to the queenside. I completely forgot that when my king gets to a5, I get a check from d8!

37.♔d3 [37.♔f3 ♔e8 38.♔g3 ♔d7 39.h4 gxh4+ 40.♔h3 ♙d8 41.♙xc5 ♙g5 42.♙f2 ♙f4+]]

37...♔c7 38.♔c2 ♔b7 39.♔b2 ♔c7 40.♔a3 ♔b7 41.♔b2 1/2

Clash of the Titans

(17) Rubinstein, Akiba — Reti, Richard [E90]

Stockholm Stockholm (1), 1919

[Kamil Miton]

1. ♖f3 ♘f6 2. d4 d6 3. c4 g6 4. ♘c3 ♙g7 5. e4 ♙g4

6.h3?! Not an accurate move, which gives Black the opportunity to come with the knight to d4. White should play [6. ♙e2 0–0 7. 0–0 ♘fd7 8. ♙e3 c5 (8... ♘c6 9. d5 ♙xf3 10. ♙xf3 ♘a5 11. ♙e2 ♙xc3!)? That is why, sometimes, White plays ♖c1 to avoid this idea. Now Black will play against the weak pawns, but on the other hand, White has two bishops and good possibilities to develop an attack against the black king — the position is very complex. 12. bxc3) 9. d5 ♘a6 10. h3 ♙xf3 11. ♙xf3 ♘c7 12. ♙e2 a6 13. a4 The pair of bishops, more space, and what is most important, Black is not able to create counterplay on b5. These facts gives white a clear and stable advantage. 13... ♖e8 14. ♙d2 e6 15. ♖ae1 exd5 16. exd5 a5 Black's idea is to close the queenside and after the exchanges of

the heavy pieces on the e-file, just survive on one side. Objectively, this structure which more often comes from the Averbakh Variation is simply very passive for Black.]

6... ♙xf3 7. ♙xf3 0–0 8. ♙e2 ♘fd7 9. ♙d3 ♘c6 10. ♙e3 e5 11. d5 ♘d4 12. 0–0 f5 [12... ♘c5 13. ♙d1 a5 14. ♙d3 ♙h4 The queen takes a good place to put pressure on f5. Also, the ♙h6 idea deserves attention.; 12...c5 13. dxc6 bxc6 14. b4 ♖b8 15. ♖ab1 with the thematic idea of playing b5 to take control of the light squares (especially d5). Anyway, thanks to the strong knight on d4, Black's position should be fine.]

13. exf5 gxf5 [13... ♘xe2+ 14. ♙xe2 gxf5 15. f4 with unclear play.]

14. ♙xd4 exd4 15. ♘b5 ♘c5 [15... ♘e5 16. ♙d2 d3 17. ♙xd3 f4 18. ♘d4 ♙h4 19. ♖fe1 It seems like Black should have the initiative, but the white pieces are also well placed. If Black pushes f3, ♖e4 will come.]

16. ♙d2 ♘e4 [16... ♙e5 17. ♘xd4 ♙f6 18. ♖ad1 ♖ae8 19. ♙h5 ♖e7 20. b4± with the threat ♘e6.; 16...d3 17. ♙xd3 a6! Probably this was the best for Black because in this case, the knight cannot jump to d4 (and e6 next) . (17... ♘xd3 18. ♙xd3 ♙xb2 19. ♖ab1 ♙g7 20. ♖fe1 After ♘d4

next, Black will be forced to exchange the bishop. Then, White can get the advantage due to the weak black king.)
18.♘c3 ♔h4 with good compensation.]

17.♔d1 c5 18.dxc6 bxc6 19.♘xd4 ♔b6 [19...♔d7 Maybe this was better. Black simply prevents ♘e6 and, thanks to the strong bishop on g7, he keeps some good practical compensation.]

20.♘e6

20...♕xb2? A mistake. Black should take on b2 with the queen, but anyway, White's position is already better. [20...♔xb2 21.♖b1 ♔e5 22.♘xf8 ♘c3 23.♘d7 ♔e6 24.♔d3 ♘xb1 25.♖xb1 ♔xd7 26.♕f3± Black has a worse structure and a worse king as well. That is why he has a little advantage.]

21.♖b1? White missed a chance to get a huge advantage after [21.c5! ♔b4 (21...♘xc5 22.♘xf8 ♕xa1 23.♔xd6+-) 22.♘xf8 ♕xa1 23.♔xa1 ♖xf8 Thanks to the inclusion of 21.c5 and ♔b4, White can now play 24.cxd6 ♘xd6 25.♖c1 and Black has too many weaknesses. The position is lost for him.]

21...♖f6 22.c5 ♔b4 23.♘f4 ♘c3 24.♔d2 ♔xf4 25.♖xb2? It is hard to explain this bad move which led to the endgame without a pawn. Maybe Akiba did not see that after [25.♔xb2 ♘xb1 does not work because the rook is hanging? 25...♔d4 26.♖bc1 ♘xe2+ 27.♔xe2 d5 28.♖fe1 and again, given that the black king is not safe, White has an advantage.]

25...♔xd2 26.♖xd2 ♘e4 27.♖b2 ♘xc5±

White gets a bad endgame a pawn down. Let us see how Rubinstein is going to defend his position.

28.♖c1 ♔f8 29.♖c4 Very good place for the rook, where it will create some pressure on the 4th rank and will not allow the knight to move.

29...♔e7 30.♖h4 h6 31.♖c4 ♔d7 32.♕f3 White is trying to disturb Black in his quest to improve his position with ♖c7-♘e4-d5.

32...♖e8 33.♔h2 A nice active defense by Rubinstein. Now the white king is coming to fight for counterplay.

33...♔c7 34.♔g3 a5 The idea of this move is to play ♘e4, and after ♖a4, Black would play ♖e5!

35. ♔h4 ♘e4 36. ♖bc2 d5 37. ♖a4 ♖a8

38. g4 Another good move. White wants to eliminate the strong knight from e4.

38... ♔d6 39. gxf5 ♘c5 [39... ♘g5 40. ♙g4 c5= and the two passed pawns look very unpleasant for White.]

40. ♖g4 ♘d7 41. ♖g7 White is looking for counterplay from the other side.

41... ♖af8 [41... ♖xf5 42. ♙g4]

42. ♙g4 d4 43. f4 ♖8f7? The beginning of the wrong plan. Black wants to exchange a pair of rooks, but maybe it was better to immediately try to advance the passed pawns. [43... c5 44. ♖g6 (44. ♖e2 d3 45. ♖e6+ ♖xe6 46. fxe6 ♘f6-+) 44... ♘b6 (44... d3 45. ♖c3) 45. ♖e2 c4 46. ♖e6+ ♖xe6 47. fxe6 ♘d5 48. e7+! ♙xe7 49. ♖e6+ ♙f7 50. ♖d6 ♘e3 51. ♖xd4 c3 52. ♖d7+ ♙f6 53. ♖d6+ ♙g7 54. ♖c6 c2 With the unpleasant pawn on c2, Black is objectively better, but thanks to his active pieces, White has some chances.]

44. ♖g6

44... ♘f8? 45. ♔h5! c5 [45... ♘xg6 46. fxe6 ♖f8 47. ♔xh6 (47. f5 ♖h8 and now it is not easy to improve White's position.) 47... ♖xf4 48. g7 ♖d8 49. ♔h7? Logical but wrong. (49. ♔g5! and it is hard to say who is better.) 49... c5 50. g8 ♖xg8 51. ♔xg8 d3 The white king is too far to stop the black pawns.]

46. ♔xh6 ♘xg6 47. fxe6 ♖c7 48. ♔g5 An interesting and slightly inhuman variation can be seen after [48. f5 d3 49. ♖c1 c4 50. ♔g5 ♖f8 51. f6 (51. ♖d1!?) 51... d2 52. ♖d1 c3 53. g7 and now some engine moves: 53... ♖cf7 54. gxf8 ♖+ ♖xf8 55. ♔f5 (55. ♔f5 ♔e5 56. ♔c2 ♖g8+ 57. ♔h4 ♔xf6) 55... ♔c5 (55... ♔d5 56. ♔f3+ ♔d4 57. ♔c6 White is winning because of the ♔a4 idea.) 56. ♖xd2 Only move. 56... cxd2 57. h4 ♔b6 Avoiding the check from f8 in some variations. 58. h5 ♖g8 59. ♔e2 ♖g2 60. ♔d1 ♖g1 61. ♔a4 ♖h1 62. f7 ♖f1+ (62... ♖xh5+? 63. ♔g6 ♖h8 64. ♔g7 ♖c8 65. f8 ♖xf8 66. ♔xf8 ♔c5 and now comes the very nice 67. ♔d1! with a4 next +-.) 63. ♔g6 ♖g1+ Draw.]

48... ♖f8 49. ♔e2!+- The most practical and simple move. The bishop stops the black pawns and White is winning very easily.

49...♖e8 50.♗c4 ♜e3 51.h4 ♜g3+ 52.♔f6 ♜g4 53.f5 ♜xh4 54.g7 ♜xg7 55.♔xg7 ♔e5 56.♜f2 ♜g4+ 57.♔f7 ♔e4 58.♔e6 d3 59.f6 ♜h4 60.f7 ♜h6+ 61.♔e7 Rubinstein demonstrated a very good example of active defense!

Editorial Preface

The last week of chess was really amazing.

Three top events came to an end with a lot of surprising results.

Let us start from the very top:

The Fide Grand Prix in Zug:

Veselin Topalov dominated it completely and got a full 1,5 points advantage with 8/13 over the second placed Nakamura with “only” 6.5/13. The 3rd and 4th places were shared by Ponomarev and Caruana with 6/13.

Alekhine Memorial:

The first place was shared by Aronian and Gelfand with 5.5/9. Third place went to Anand with 5/9. It is strange that both Adams and Vachier-Lagrave somehow collapsed in the last rounds of the event after having a great first part of the tournament.

In Cuba, the Capablanca Memorial was won by Almasi with 6.5/10. Second and third places were shared by both Cuban players, Leinier Dominguez and Yuniesky Quasada, with 6/10.

As usual, we bring you the best games with comments from the past week.

Enjoy the CEWN Nr 62.

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Kramnik,V (2801) – Fressinet,L (2706) [A07]

Alekhine Mem Paris/St Petersburg FRA/RUS (5), 25.04.2013
[Csaba Balogh]

A brilliant victory by Fressinet! We do not see Kramnik losing in such style with the White pieces too often.

1. ♖f3 d5 **2.g3** After the Candidates tournament, Kramnik tried to play some “relaxing chess” and kept his deadly weapons for more important tournaments, but he got punished for that.

2... ♘c6!? A brave decision by Black. He transposes to the Chigorin Defense, which does not have a good reputation at all, especially if White does not play c4 quickly.

3.d4! Otherwise, Black occupies the center with e5.

3... ♗g4

4. ♘bd2 A rare sideline, but it seems to be very strong. Black's plan in this whole setup is to castle queenside quickly after ♔d7, followed by an attack in center with e5;

or, if White castles kingside, he might launch a fast attack with h5-h4. However, White is ready for a quick attack as well, via c3-b4.

4... ♔d7 **5.h3!** Preventing the trading of bishops with ♗h3.

5... ♗f5 **6.c3** Here comes e b4 plan. Black cannot prevent it with a5 since it does not fit into his strategy to castle long.

6...e5! Black explodes the center. This is a typical plan in this opening, but it usually does not lead to anything good... [Anyway, Black had to hurry with the counterplay, since after the slow 6...0-0-0 7.b4 f6 White gets a big advantage after 8.b5 ♘a5 9. ♔a4 b6

10. ♗a3! followed by ♗b4. We can see in these lines that it is more useful to have the knight on d2 to control the c4 square and stay ready to play ♘b3, than to have the bishop on g2. Very deep understanding by Kramnik on move 4.]

7.dxe5 [7. ♘xe5!? seems to give a nice advantage as well. **7...** ♘xe5 **8.dxe5** 0-0-0 **9.** ♘f3 It is not clear how should Black fight to recover the pawn or to get some compensation for that.]

7...0-0-0 This is the point where Kramnik starts to lose the thread.

8.e3?! This is just a waste of tempo, which is enough for Black to get counterplay. [8.♘b3! should have been played. 8...♘ge7 9.♘bd4 with a clear advantage for White!]

8...♘ge7! Black is in time to play ♘g6 now, and when he wins back the pawn, he is not worse anymore.

9.g4 White tries to prevent ♘g6 by sending the Black bishop to that square, but this weakens his pawn structure and Black will be ready to make use of it with h5! [9.b4 is too slow now. 9...♘g6]

9...♙g6 10.b4 h5! Fressinet has already foreseen his sacrifice, which Kramnik has probably underestimated.

11.b5 Kramnik has pinned his hopes to this move. When the knight leaves, the e5 pawn is not under attack anymore and he will be able to calmly continue his plans. However, Fressinet had a different idea in mind! [11.♖g1 was better, but Black is fine anyway. 11...hxg4 12.hxg4 ♙e6 and ♘xe5 next move.]

11...hxg4!! Black gets two pawns for the piece, but they will dominate White's uncoordinated pieces.

12.bxc6 ♘xc6 13.e6 White tries to exchange some pieces, but it does not solve his problems. [13.♘d4 ♘xe5 is also better for Black. White simply has no useful moves, while Black has many different ways to improve his position. He could do it by ♙e7-h4, or gxh3 is also possible to get a third pawn for the piece.]

13...♙xe6! [The tempting 13...fxe6? would have been a grave error because White wins the g4 pawn after 14.♖g1!]

14.♘d4 ♘xd4 15.cxd4

15...♙e7! Another great decision! Fressinet realizes the plan of his opponent — to play ♙a4 ♙b8 ♙a3 -, and the trade of the bishops would seriously ease his position. He rather sends his bishop to the attack with ♙h4. [15...♙b4! is also strong, suggested by the computer. ♙c3 threatens to trap the rook and after 16.♙b3 ♙xd2+ 17.♙xd2 ♙e4! 18.♖h2 (18.♖g1 gxh3 White needs to give up his bishop for the pawn, but then he is simply lost.) 18...♙d6! Trapping the rook. White has an only move. 19.f4 Now on gxf3, ♖f2 works, but much stronger is 19...g3! 20.♖e2 ♙g6! and

g2 is coming next with a winning advantage. ♖g2 is answered by taking and ♖xh3.; 15...gxh3?! allows White to play 16. ♖a4 ♖b8 17. ♗a3∞]

16. ♗g2 Forcing Black to take on h3, when the Black pawns become less flexible. On the other hand, it is going to be the third pawn for the piece. [Now on 16. ♖a4 ♖b8 17. ♗a3 ♗h4! Black created the direct threat of ♖xe3 and is ready to increase the pressure on the f2 pawn.]

16...gxh3 17. ♗f3 ♗f5 Black prepares to push g5-g4! White's position is getting more and more unpleasant. He is unable to create any counterplay on the queenside, as the b1 square of the rook is under permanent control by the bishop.

18. ♖a4 [I tried to defend the position with 18. ♗f1 but it did not help. 18... ♖h4! 19. ♗g3 ♗b4+ 20. ♖f1 (20. ♗d2? loses to 20... ♖xd4!)]

20... ♖g6! (The idea of the defense comes after 20... ♗c3?! 21. ♗a3! ♗xa1 22. ♗e7!! Some kind of multi-attacking move. White is back in the game.) 21. ♗xf5 ♖xf5 ♗c3 is threatened now and, for instance, after 22. ♗b2 g5! g4-g3 is coming with a crushing attack.]

18... ♖b8 19. ♗a3

19... ♗h4! Black follows his plan and keeps the bishops on the board. ♖xe3 is threatened and g5-g4 is coming fast as well. White cannot create any serious threats without the rook on b1. ♗c5 is always met with b6.

20. ♗f1 g5! 21. ♖h2 White has to make ugly moves like this one. He strengthens his f2 weakness and also tries to blockade the h-pawn.

21...g4 22. ♗e2 ♗e4 Black continues pushing. He wants to settle his bishop on g2, trapping the h2 rook and making the f2 pawn more vulnerable. [According to the machine: 22... ♖dg8! was even stronger with the deadly threat of g3 fxg3 ♖xg3.]

23. ♖c1 White seems to activate his rook, but actually he still unable to create any real threats. The three pawns on a7, b7, c7 cover all the potential of the queen, rook and two bishops.

23... ♗g2 24. ♖a5 ♖c8! Black had to bring a new defender, but he still has enough pieces left to break through on the other side.

25. ♖c3 Kramnik tries something on the third rank, but it is still unclear what he really wants... Fressinet finds the way to finish the game in style! [Finally, White could have occupied the b-file, but this time it would have ran into 25. ♖b1 ♕xf2+! 26. ♔xf2 ♕f5+-- and b1 falls.]

25... ♕xf2+!! Not the only way to win, but definitely the nicest and most effective.

26. ♔xf2 ♕xf1 Black simply wants and will promote his h- and g-pawns.

27. ♔xf1 [27. ♕xf1 leads to mate after 27...g3+! 28. ♔xg3 ♕f5! blocking the king's path back to the f-file. 29. ♖b2 ♖cg8+ 30. ♔h2 Finally, White has some real threats, but Black is coming first! 30... ♖g2+! 31. ♕xg2 hxg2+ 32. ♔xg2 ♖g8+ and mate to follow.]

27...g3 What to do?! The pawns are rolling!

28. ♕f3 gxh2 Black threats with ♕f5 ♔e2 ♕xf3 ♔xf3 h1♕.

29. ♔e2 ♖hg8! with the idea of ♖g2, closing the bishop's diagonal. On ♕xg2, simply hxg2, promoting the pawns.

30. ♕c5 a6 [30...b6 was also good.]

31. ♕h1 ♖g2+ If White does not take, ♕f5 mates.

32. ♕xg2 hxg2 White resigned! A brilliancy by Fressinet and something that Kramnik should try to quickly forget.

0-1

(2) Aronian,L (2809) – Svidler,P (2747) [D85]

Alekhine Mem Paris/St Petersburg FRA/RUS (4), 24.04.2013

[Csaba Balogh]

A huge preparation by Aronian against the Gruenfeld defense. White got a nice edge, which he managed to convert into a full point.

1.d4 ♘f6 2.c4 g6 3.♘c3 d5 Svidler goes back to his favorite Gruenfeld defense. A few weeks ago, on the Candidates tournament, he surprised Aronian with 1.d4 d5 2.c4 dxc4 and made an easy draw.

4.♘f3 ♖g7 5.cxd5 ♘xd5 6.e4 ♘xc3 7.bxc3 c5 8.♖b1 This old main line is getting more and more popular recently. [The point of the text move becomes clear after 8.♙e2 Black has the strong 8...♘c6! 9.d5 ♙xc3+ 10.♙d2 ♙xa1 11.♚xa1 ♘d4! and Black is fine. White leaves from this motif with the 8.♖b1 move.]

8...0-0 [Now on 8...♘c6 9.d5! ♙xc3+ 10.♙d2 ♙xd2+ 11.♚xd2 White wins back the pawn with the ♚c3 double attack on the next move, and gets a small advantage.]

9.♙e2

9...b6 This was considered to be a playable alternative if Black would like to avoid the complications of the main line. However, after this game, it looks like Black is forced to grab the a2 pawn if he wants to equalize. [The critical continuation is 9...cxd4 10.cxd4 ♚a5+ 11.♙d2 ♚xa2 12.0-0 ♙g4 This is basically the starting position of the opening. Probably we will see in the near future what Aronian has cooked out here...]

10.0-0 ♚c7 [Usually we reach the game's position in the following move order: 10...♙b7 11.♚d3 e6 12.♙g5 ♚c7]

11.♙g5 e6 12.♚d2 ♙b7 13.♚e3 ♘d7 Here comes Aronian's improvement.

14.♙f4! There was only one game before with this move. The game becomes very concrete now. [All games continued with 14.e5 when Black has two good alternatives. 14...a6 This is how Svidler played not so long ago. (14...♚ae8 is the main, followed by f6 exf6 ♘xf6, undermining the center.) 15.♘d2 b5 16.♙e7 ♖fc8 17.♙d6 cxd4! 18.cxd4 ♚c3 Black was already fine in Gelfand-Svidler 2010.]

14...e5 Black is forced to pin himself and challenge the center. [The retreat to the back rank cannot come into the consideration, while 14...♚c6 runs into 15.♙b5!]

15. ♖g3 ♜ae8 The most principled move to keep the tension, but it seems to be a mistake... [The only attempt to fight for equality is in the simplification. 15...cxd4 16.cxd4 exd4 17.♞xd4 ♞c5 18.♞fd1 ♞fe8 19.f3± White seems to be slightly better here as well. Black's pieces are uncoordinated. White has some dangerous ideas, such as ♞bc1 followed by ♞b5, pointing out the weaknesses of the d6 and c7 squares, and ♖b5 might be sometimes unpleasant as well.]

16.d5! White creates a protected passed pawn, which would undoubtedly give him a big plus in the endgame. However, in the middlegame, Black usually gets strong counterplay with f5, which looks even more dangerous now because of the f4 threat. [16.♖b5 happened in the only previous game.]

16...f5 17. ♖h4! White would like to get his bishop to e7, which would be possible if he could play d6 in time.

17...h6 Preparing to trap the bishop with f4 and g5. [The whole idea of 14.♖f4 comes after 17...fxe4

18.d6!! (18.♞g5 ♖xd5 is unclear.; 18.♞xe4 ♞f4 would be fine for Black as he pushes e4 next.) 18...♞xd6 19.♖c4+ ♞h8 20.♞g5 Black cannot hold the weak squares in the

camp. It is hard to deal with ♞f7.; Black cannot trap the bishop with 17...f4 18.♞d3 h6 (18...♞d6 is met by 19.♞d2! when ♞c4 is coming with tempo.) 19.d6! and ♖e7 next move.]

18.exf5! Aronian still follows his preparation. This is the only way to save the bishop, but this gives Black a dangerous center. However, the game remains more concrete.

18...gxf5 19. ♞fd1! White refreshes the threat of d6, ♖e7.

19...♞d6 [19...e4 allows 20.d6 ♞c8 21.♞e1 Black can temporarily push back his opponent, but then he cannot hold the holes in his position. 21...f4 22.♞h3 f3 23.♖c4+ ♞h8 24.♖e7 ♖e6 is coming next. White is crushing.]

20. ♞d2! The rule says that the queen is a bad blockader. The knight is heading to explode it from c4.

20...♞g6 [20...♖xd5 is met by 21.♖b5! when almost all the Black pieces are pinned.; 20...♞xd5?? 21.♖c4+-]

21. ♞g3 An excellent practical decision! Black is forced to go into a bad endgame.

21...♞xg3 22.hxg3 Black cannot prevent ♖b5, as a6 would crucially weaken the b6 pawn.

22...♙f6 [On 22...♙xd5 White wins an exchange after 23.♙b5 ♙e6 24.♘c4! and ♖f7 moves into ♘d6.]

23.♙b5! Aronian has a clear target in front of his eyes. He wants to get an endgame with the good knight against the bad bishop, where the protected passed pawn on d5 plays a key factor.

23...♖e7 24.♙xd7 ♖xd7 25.♙xf6 ♖xf6

26.c4! White has achieved everything he could. Black has hanging pawns on e5 and f5, and additional targets on the queenside. White has several ways to increase his advantage. One is to play ♖e1, provoking an e4 push, which could be countered with the ♘f1–e3 maneuver. White can play on the queenside with a4–a5 or create further weaknesses via the rook lift with ♖b3–a3.

26...♖g7 Svidler is searching for counterplay along the 4th rank.

27.♖b3 [It seems to be even stronger to provoke e4 first. 27.♖e1! e4 White does not need to worry anymore about ♖g4–d4. and he can play, for instance 28.a4± with a huge positional advantage.]

27...♖g4! 28.♖c1! Excellent prophylactic move against the pinning threat with ♖d4. It also protects the c4 pawn in order to free the knight.

28...♖d4 29.♘f3 ♖e4 30.♖a3! Forcing Black to weaken his b6 pawn.

30...a6 31.♖b3! The rook has already done his job on the a-file.

31...b5 Svidler tries to complicate matters, but it only fastens his defeat. [31...♙g7 could be met by 32.♖b2 ♖d6 33.♘d2 ♖d4 34.a4! Black has no good defense against a5. 34...a5 (34...♙c8 leaving the pin is met by 35.♘f3 ♖e4 36.a5! bxa5 37.♖a2 and c5 also falls.) 35.♘b3 ♖e4 36.♘xc5! wins.]

32.♖b2!! Another great move! The rook leaves from the cxb5 ♙xd5 tempo. Black cannot avoid losing material.

32...♖f7 [32...b4 loses to 33.♘d2! and when the rook moves, ♘b3 wins the c5 pawn.; After 32...♖d6 the easiest win is 33.a4! b4 34.♘d2! and the c5 pawn is lost again, which means the end of the game with such connected passed pawns on c4–d5. 34...♖g4 35.♘b3+-]

33.cxb5 axb5 [33...♙xd5 34.♖xc5+- is equally hopeless.]

34. ♖xc5 b4 35. d6 ♖d7 36. ♖d2 Black resigned in view of ♘xe5 next move. A nice positional masterpiece by Aronian!

1-0

(3) Anand, Viswanathan (2783) – Ding, Liren (2707) [B18]

Alekhine Mem Paris/St Petersburg FRA/RUS (5), 25.04.2013

[Arkadij Naiditsch]

Anand started the tournament badly, with a loss against Adams with white, but then he started to recover his shape. A nice victory over the young Chinese Super GM brought him back to 50%.

1. e4 c6 2. d4 d5 This move is becoming more and more fashionable. Another very attractive game was won by Karjakin against Mamedyarov in this opening very recently.

3. ♘c3 dxe4 4. ♘xe4 ♙f5 5. ♘g3 ♙g6 6. h4 h6 Until here, everything is very well-known, of course.

7. ♘f3 A not often played move.

7...e6 Now White is taking over the initiative and the position is getting quite sharp. [The very main line is 7... ♘d7 8. h5 ♙h7 9. ♙d3]

8. ♘e5 ♙h7 Very typical move. The bishop on h7 is just too strong and White has no good squares for the bishop.

9. ♖d3 ♗xd3 10. ♔xd3 ♘d7 Here we see the main idea of Black's 7...e6 which seems like a lost tempo. However, with 10...♘d7, Black wants to exchange another pair of pieces, which is definitely the right way to go in this position.

11.f4! Of course, this is still preparation, but here we see another typical way of playing this position. Now White is preparing to take with fxe5 in order to open the f-file.

11... ♗b4+ Provoking White into c3, before playing ♗e7. This can have the advantage that in case White castles queenside, ♔a5 would be possible.

12.c3 ♗e7 13. ♖d2 It seems like White is preparing to castle long.

13... ♘gf6 14. ♔e2!? and this is already a sort of novelty for the high level games. Usually, White tried to play 14.0–0–0 first and Black answered with 14...c5. Now things change a bit.

14...c5 Ding continues the game with the main idea of Black, a quick attack on the white center.

15.dxc5

15... ♔c7? This move is already quite a serious mistake. [It is hard to say why Black did not play 15...♘xc5 16.0–0–0 and we are more or less back in the main lines. Maybe the ♘xc5 version is not the best for Black, but the position remains quite unclear even if I would prefer the white side. The idea of f4-f5 might always be dangerous for Black.]

16.b4! This is exactly why Black should have been more careful. Now it is going to be very hard for Black to win the pawn back, and the trick is that White did not castle queenside and he is not going to do it. The king will take a very safe place on g1.

16...0–0 17.0–0 What else to do for Black?!

17...a5 [An attempt to recover the pawn would end in a very bad position. 17...♘xe5 18.fxe5 ♘d7 Black attacked both pawns, e5 and h4. 19. ♖f4! Of course, the e5 pawn is more important. 19... ♖xh4 20. ♘e4 The white knight is going to d6 or maybe to f6, and very soon White will develop a big play on the kingside. It is obvious that White is doing much better here.]

18.a3 A prophylactic move...

18... ♘xe5 19.fxe5 ♘d7 Black still tries his luck including the a5-a3 moves.

20. ♘e4 Good move. 20. ♖f4 also looks very good for White.

20...axb4 [It is already not very helpful to play 20...♔xe5 21. ♖f4 The black queen has no good squares. 21... ♔d5 22. ♖ad1 ♔c6 23. ♖d6 All the white pieces are just perfectly placed. White has a huge advantage.]

21.cxb4 ♔xe5 By exchanging the a-pawns, Black won the d4 square, but White now has another option.

22. ♖c3! The bishop took an optimal position. Danger is approaching the black king.

22... ♔c7 23. ♖ad1 Bringing one more piece to a better position.

23... ♖ad8 [If Black tries to be greedy with 23... ♖xa3? 24. ♖xg7! would finish the game on the spot. 24... ♔xg7 25. ♔b2+ and White is winning the rook on a3.]

24. ♔g4 g6?! Black is weakening his structure even more. [24... e5 was the only way to go on with just a “bad” position.]

25. ♘d6 and now we see the weakness—the f7 pawn, after which the one on g6 might get lost as well.

25... e5 26. ♔c4! Strong play, nothing helps here anymore. Black’s position is breaking apart...

26... ♘b6 27. ♔e4 The black knight got nothing better, it can only comeback.

27... ♘d7 28. h5! A nice “human” move. Of course, 28. ♘xb7 would lead to a full point for White as well.

28... gxh5 29. ♔f5 It is funny to look at this position. Black is completely paralyzed, so White does not need to hurry. Anand demonstrates this by just playing 29. ♔f5 - ♔xh5.

29... ♖f6 30. ♔xh5 ♔c6

31. ♖xf6 Lately, this became the right moment for resignation.

31... ♘xf6 32. ♔xe5 A nice game by White, although Black made it a bit too easy. Maybe the young Ding Liren still has “too” much respect for the World Champion...

1-0

(4) Zhao, Jun (2589) – Wang, Yue (2706) [C10]

ch-CHN 2013 Xinghua CHN (11.3), 27.04.2013

[Arkadij Naiditsch]

Chinese chess is somehow different from the European version. We often see a superstar like Wang Yue suddenly stopping his own active chess career and becoming a chess teacher. In the game we will see now, it is the other way around — he gets a nice lesson from his opponent. Black should be very careful in this line.

1.e4 e6 2.d4 d5 3.♘d2 dxe4 4.♘xe4

4...♙d7 A slightly strange opening choice by Wang Yue, who is over 100 ELO points stronger than his opponent. This line of the French is counted as “safe but slightly worse” for Black.

5.♘f3 ♙c6 6.♙d3 ♘d7 7.0–0 ♘gf6 The idea of Black is simple. By developing his bishop quickly to c6, he tries to avoid the usual problems he faces with his bishop on c8. On the other hand, the typical move c7–c5 is never possible, so Black usually just gives away the c6 bishop for the white knight and plays with a very solid position after c6, but without the bishop pair...

8.♘g3 Going by the famous rule: two pieces cannot be in the same square, so there is no reason to exchange a pair of knights.

8...♙e7 9.♙e1 0–0 10.c3 Until here everything is theory, of course.

10...♙e8 From this moment on, Wang Yue, who is probably trying to keep as many pieces as possible on the board hoping for complications, gets himself in very serious trouble. [More usual would be 10...♙xf3 11.♙xf3 c6±]

11.♙c2 ♙c2 can be a very usual move in many lines. Of course, the main idea is to play ♙d3.

11...♙f8 12.♙g5! Quite a tricky move. Before developing his bishop to f4, White is provoking Black into playing h6 which would weaken even more the b1–h7 diagonal. In many lines after ♙d3, Black will not be able to stop White with g6 anymore because the pawn is already placed on h6.

12...h6 13.♙f4 ♙d5 Black is preparing the c5 move.

14. ♖e5! and comes another strong move by White. Black did not want to take on the f3-file. Now the knight has gone to e5.

14...c5 15. ♔d3! Zhao Jun is going for the black king. [A more positional decision could have been 15.c4 ♕c6 16. ♖xc6 bxc6 with a clearly better position for White.]

15...♗xe5 Almost the only move. [White threats become clear in 15...♖c8 which looks like a solid move, but 16. ♖xd7 ♕xd7 17. ♖h5! and White is simply winning! Black cannot defend against ♖xf6 and ♕h7.]

16.dxe5 c4 This move keeps Black alive...

17. ♕e2 ♖h7 How to proceed with the attack?!

18. ♕g4! looks like a simple move, but is in fact very strong. White is starting a direct attack on the black king.

18...♔h8 19. ♖h5 making place for the rook and, at the same time, starting to "test" Black on the g7-line.

19...g6 It is hard to find anything better for Black.

20. ♖e3! Zhao Jun is fearless and chooses the best move! White is giving up a full piece, but his attack is deadly!

20...gxh5 21. ♕xh5 White wants to take on h6 and then to double on the h-file or to double on the g-file. Black is just hopeless against this.

21...♖e7 22. ♖g3 ♖d7 **23.** ♕xh7 The easiest. Now against 23... ♔h7, 24. ♕g4 is coming. A really great attacking game!

Endgame section

(15) Inarkiev,E (2688) – Harikrishna,P (2705)

Capablanca memorial, 25.04.2013

[Chess Evolution]

We examine a typical rook endgame where Black is going to be a pawn down after losing the one on b4, but his active rook behind his own b-pawn gives him sufficient compensation for the draw. Harikrishna holds the draw with excellent technique.

50...b5! Black needs to advance his passed pawn as far as possible. If White would have put his rook on b5, the endgame would have been easily won for him.

51.♖xb4 [51.♖e1+? Simplifying into a pawn endgame would have been a terrible blunder by White. Black wins thanks to his side passer on the b-file. 51...♔d6 52.♖xe7 ♔xe7 53.♔e3 ♔e6 54.f3 White is too slow in creating his own passed pawns on the kingside... 54...♔d5 55.♔d3 b3 56.♔c3 b2 57.♔xb2 ♔xd4 and Black wins... 58.g4 fxg4

59.fxg4 ♔e3 60.♔c3 ♔f4 61.♔b4 ♔xg4 62.♔xb5 ♔h3 63.♔c4 ♔xh2 64.♔d3 ♔g2 65.♔e4 h5 66.♔f4 h4–+]

51...♖b7! Black's rook is behind the pawn. It means that as soon as the white one leaves the b4 square in order to activate it, Black is ready to push his b-pawn. The d4 pawn is well placed for White, since it prevents Black's counterplay with ♔c5, so the question is whether White will be able to win the game on the kingside without the help of the rook or not?!

52.♔g5! White activates his king before making progress with the pawns. [52.d5+? Trading the d-pawn for the one on f5 is a serious mistake, since it allows the black king to go to c5. 52...♔xd5 53.♔xf5 ♔c5]

52...♖g7+ 53.♔h6 ♖b7 Black had nothing better than waiting.

54.f3! White finds the only plan to improve his position.

54...♔d5 55.h4 ♔e6 Black continues his waiting policy.

56.g4 [56.h5 leads to the same position as in the game, since after 56...♔f6 White has nothing better than playing 57.g4]

56...fxg4 57.fxg4 ♔f6 The next step for White is to create a passed pawn on the g-file. He can still do this without the help of his rook.

58.h5 ♔e6 59.♖b1 We will get the point of this move in the 59.g5 line. [59.g5 allows Black to play 59...♔f5! 60.g6 (White can try to lure the king with 60.d5 ♔e5 61.g6 hxg6 62.hxg6 ♔xd5

63.g7 but this leads to the known drawish endgame when the White king is to help his rook at catching the b-pawn. 63...♖xg7! (Black cannot try to win a tempo with 63...♖b8 because of 64.♖xb5+!+- deflecting the rook.) 64.♔xg7 ♔c5 The draw is inevitable wherever the rook goes. 65.♖h4 (65.♖b1 b4 66.♔f6 ♔c4 67.♔e5 b3 68.♔e4

♔c3=) 65...b4 66.♔f6 b3 67.♔e5 b2 68.♖h1 ♔c4= followed by ♔c3-c2.) 60...hxg6 61.hxg6

61...♖b6! This is the key resource in Black's defensive plan. 62.♔h7 (62.♔h5 is met by 62...♔f6! followed by ♔g7 and taking the pawn.) 62...♖b7+! Black could not take immediately on g6 because of ♖b5 check! 63.g7 ♔f6 and ♖xg7 is coming next! This is the reason why White has put his rook on b1. He wants to give a check on f1, but on the other hand, this allows Black to advance his b-pawn.]

59...b4! 60.g5 ♔f5 [60...♔d5 also leads to a draw, but Black needs to find a precise move after 61.♖d1

61...♖a7!! This is the right defensive method. The rook has to be placed behind the passed pawn, but this time it goes behind the white one on g6. (61...b3 62.g6 hxg6 63.hxg6 b2 64.g7+- wins for White, because the g-pawn threatens to promote with check!) 62.g6 hxg6 63.hxg6 ♖a2! 64.g7 ♖h2+ 65.♔g6 ♖g2+ 66.♔f7 ♖f2+ 67.♔e7 ♖e2+ White is forced to go in front of his pawn. 68.♔f7 (68.♔d7 ♖g2=) 68...♖f2+ 69.♔g8 b3 70.♖b1 b2= and the draw is inevitable. The only way to progress for White is ♔h7, but then Black will start with his checks again.]

61.g6 hxg6 62.hxg6 ♖b6! Black uses the same method as in the 59.g5 line. This time he wants to lure the white rook from the attack of b4.

63.♖g1 [63.♔h7 allows the simplification 63...♖xg6! 64.♖f1+ ♔e4 65.♔xg6 ♔xd4 66.♔f5 b3 White has to give up his rook for the pawn.]

63...♔e4! Another hard move to find! In such situations, only calculation helps. [63...b3 was also tempting, but it loses after 64.♔h5! b2 65.g7! b1♖ (65...♖b8 66.♖b1! ♔f6 67.♔h6+-) 66.g8♖!+- White wins, as Black has no useful checks.]

64.♖g4+ ♔d5 65.♔h7 b3 66.g7 ♖b7 Black tries to escape into the usual pawn against rook endgame with the threat of ♖xg7, ♔xg7, b2, ♖g1 and ♔xd4. White sets up a last trap...

67.♖g3!? ♔xd4! Black does not fall into it. [Black loses after 67...b2 68.♖b3!+- because the g-pawn promotes with check.]

68.♔h6 [68.♖xb3 leads to two kings- 68...♖xb3 69.g8♖ ♖h3+! 70.♔g7 ♖g3±]

68...♖xg7 69.♔xg7 ♔c4 A tough defense and a well-deserved draw for Harikrishna.

70.♖xb3 ♔xb3 1/2

(16) Aronian, Levon (2809)
— Adams, Michael (2727) [D58]

Alekhine Mem Paris/St Petersburg FRA/RUS (6), 28.04.2013

[Chess Evolution]

The position looks like a draw, but still White needs to be a bit careful. His king is quite far away and is cut on the f-file. If Black manages to reach the b4 square with the king, the game could be over very quickly.

51...♔d6 52.♔f2! An important move with the only correct idea.

52...♔c6 53.♖e3! By playing ♖e3, White is winning the e-file for his king in order to come a bit closer to the a-pawn.

53...♖d5 [Of course the immediate exchange of rooks just leads to a draw. 53...♖xe3 54.♔xe3 ♔c5 55.♔d3 ♔b4 56.♔c2=]

54.♔e2 White brings his king one square closer.

54...a4 The simplest draw.

55.♖a3 [To a slightly more difficult draw would lead 55.♖d3 ♖a5! winning half a tempo. 56.♖a3 ♔b5 57.♔d2 ♔b4 and White already needs to be very careful not to lose. 58.♖h3 a3 59.♔c2! but this move still saves White. 59...a2 60.♖h4+ ♔a3 61.♖h3+ and draw.]

55...♔b5 The Black king has blocked the a5 square, White can continue with what he had started before.

56.♖d3 ♖c5 57.♔d2 The white king is already on d2! This means the draw is close.

57...♔b4 58.♖d8 The white rook starts to attack from "behind".

58...a3 59.♖b8+ The pawn endgame is a draw, of course.

59...♖b5 [In case of 59...♔a4 60.♖a8+ ♔b3 61.♖b8+ ♔a2 62.♖b7 the position is a theoretical draw as well.]

60.♖xb5+ ♔xb5 61.♔c1 a2 62.♔b2 a1N The last funny move! I wonder if it actually was played :).

Clash of the Titans

(17) Botvinnik, Mikhail
— Furman, Semen Abramovich [E24]

Moscow training m Moscow, 10.1960

[Kamil Miton]

1.d4 ♘f6 **2.c4** e6 **3.♘c3** ♙b4 **4.a3** Nowadays, this line is not very popular. but players like Jobava, Eljanov and recently Svidler like to use it sometimes.

4...♙xc3+ 5.bxc3 c5 Black has a few different development plans, but this one is most often played.

6.f3 White is preparing the e4 move with the idea of getting an advantage in the center. Nowadays, the main move is [6.e3 White's plan is the same to the one in the game, but we should note two important facts for White to start with this move. The first one is that White avoids the line with d5 because after cxd5, Black recaptures on d5 with the knight (Nxd5), and because of the following line: 6...♘c6 7.♙d3 0-0 8.♘e2 b6 9.0-0 ♙a6 10.e4 ♘e8 Compared to the game, White does not need to lose time with ♙e3 and can immediately start to put pressure on the kingside. 11.f4↑]

6...♘c6 [6...d5 7.cxd5 ♘xd5 (7...exd5 8.e3 leads to a completely different structure. White's plan is ♙d3-♘e2 and, at some moment, to push e4. In general, this is not easy to do.) 8.dxc5 ♙a5 9.e4 with complex play.]

7.e4

7...d6 This seems to be a normal move, but Black very often does not lose time with this and tries to immediately create pressure against the c4 pawn.

8.♙e3 b6 9.♙d3 0-0 [9...♙a6 I heard a story about this kind of blunder in this structure. One of the old masters, during his game, suddenly saw his wife on the playing hall. He remembered that his mistress was in the room and without any second thought, automatically put the bishop on a6. The problem is that Black did not castle yet, and when he went back to the board, he had to give up after: 10.♙a4+- with d5 next and Black loses a piece.]

10.♘e2 The understanding of this position is very simple. Black's idea is to play against the very weak c4 pawn, so White should hurry to create an initiative on the kingside.

10...♘e8?! Not accurate! In this position, time is very important, so Black should start immediately with [10...♘a5 Xc4 11.♘g3 ♙a6 12.♙e2 ♙d7 with the idea of playing ♙a4. (12...cxd4 13.cxd4 ♖c8 14.♖c1 ♙c7 and White has serious problems with the c4 pawn.) 13.e5 dxe5 14.dxe5 ♖fd8! 15.♖d1 ♙xc4 16.♙xh7+ ♔xh7 17.♖xd7 ♙xe2 18.♖xd8 ♖xd8 19.exf6 ♙b5 20.fxg7 ♔xg7]

11.0-0 ♘a5 12.♘g3

12...f5 The idea of this typical move is to limit the white pieces! Black can put up the f5-g6 structure to limit the knight on g3 and the bishop on d3. This idea is possible because of the doubled pawns. White will not be able to take advantage of the weak dark squares around the black king. Let us check what would happen if Black plays [12... ♖a6 13. ♔e2 ♖c8 14. ♖ac1 In this case, White is on time! After the sacrifice of the c4 pawn, White will get an attack on the kingside. (14.d5!?) 14... ♔d7 15.e5!? (15.f4 cxd4 16.cxd4 ♔a4 17.f5 ♖xc4 (17... ♘xc4 18. ♖g5 f6 19.fxe6 fxg5 20. ♖xf8+ ♔xf8 21. ♔h5 ♔e7 22. ♔xg5+ ♔xe6 23. ♖f1+-) 18. ♖xc4 ♖xc4 19.fxe6 ♖xc1 20.exf7+ ♖xf7 21. ♖xc1±) 15... ♔a4 (15...dxe5 16.dxe5 ♔a4 17. ♖g5 with ♖e7 or ♔e4 ideas.) 16. ♖g5 ♖xc4 17. ♖e7 d5 18.f4↑]

13.exf5 exf5 14. ♘h5 ♘c7 [14... ♖a6 15. ♔e2 ♔d7∞]

15. ♔e2?! [15. ♖e1 Good multipurpose move. In many variations, the rook will not hang on f1, as the bishop on e3 will be protected and the rook will be active on the e-file. Now, after 15... ♖a6 White can play 16.dxc5 dxc5 (16...bxc5 17. ♔a4±) 17. ♔c2! g6 (17... ♔d7 18.g4→) 18. ♖ad1! gxh5 19. ♖xf5 ♔f6 20. ♖xh7+ ♔h8 21. ♖d7 with a final attack.]

15... ♖a6

16.g4 Logical move. Almost all the black pieces are placed on the queenside, so White is trying to break through on the kingside, where the black king might come under pressure.

16... ♔e8 Not allowing the capture on f5 and preparing ♔f7-♔e8. [16... ♔d7!? 17. ♖xf5 (17.dxc5 bxc5 18.gxf5 ♔f7 19. ♘g3 ♖xc4 20. ♘e4∞) 17... ♖xf5 18.gxf5 ♔xf5 (18... ♖xc4 19. ♔g2 ♖xf1 20. ♖xf1 ♔h8) 19. ♘g3 ♔f7 with good compensation.]

17. ♖ae1 ♔f7 18.d5 ♖ae8 19. ♘f4 ♖e5 [19...g5 20. ♘e6 ♘xe6 21.dxe6 ♖xe6 22.gxf5 ♖e7 The position looks very dangerous, but Black will be on time with the counterplay. For example: 23. ♔g2 h6 24.h4 (24.f4 g4 and the white bishops are out of play.) 24... ♖fe8! 25. ♖e4 ♘xc4 26.hxg5 ♘xe3 27. ♖xe3 ♖xf1 28. ♖xf1 d5 29.f6 dxe4 30.gxh6+ ♔h7 31.fxe7 ♖xe7=; 19...fxg4 It does not make sense to open the f-file. 20.fxg4 ♔d7 21.h3 with the idea of playing ♔c2, and now if 21... ♔a4 comes the strong 22. ♘e6! ♔g8 22... ♘xe6 23.dxe6 ♖xc4 24. ♖xf8+ ♖xf8 25.e7 ♖e8 26. ♖g5 and the strong e7 pawn gives White a winning position.]

20.gxf5

20...♞xc4 Black could also play [20...♞xf5 21.♞g2 (21. ♞xf5 ♞xf5 ♞xc4) 21...♞e5!? (21...♞xf3? 22.♞f4 ♞xf1+ 23.♞xf1 with ♞e3-♞f5 next. White should get a huge attack.) 22.f4 ♞ee8 23.f5 with a very complex position.]

21.♞xc4 ♞xe3 22.♞xe3 ♞xc4 23.♞e6 ♞xd5? Decisive mistake! After the correct [23...♞e8 Simple and the best. 24.♞e4 (24.♞f2 ♞xf5 25.♞g2 ♞xe6 26.dxe6 ♞xe6 27.♞d2 ♞xe1+ 28.♞xe1 ♞xf3 29.♞e8+ ♞f8) 24...♞xf1 25.♞xf1 g6 The position is equal. The idea of the last move is to weaken the knight on e6 and try to get rid of him.; 23... ♞xf1 24.♞xf8±; 23...♞xe6 24.dxe6 (24.fxe6 ♞g6+ 25.♞h1 ♞xf1 26.♞xf1 b5 not allowing White to support the structure after the c4 move. White should be slightly better with the unpleasant pawn on e6, but on the other hand, the white king is very weak and Black has good chances for counterplay.) 24...♞xf5 25.e7 ♞e8 26.♞f2 Given the fact that Black is controlling the light squares, it will not be easy to prove the advantage, but of course, objectively, White is better.]

24.♞e4 ♞xf1 25.♞xf8 ♞h3 Losing immediately. Black could still fight after [25...♞xf8 26.♞xf1 b5 27.a4 (27.♞d1

♞xc3 28.♞a8+ ♞e8 29.♞xe8+ ♞xe8 30.♞xd6 b4) 27... a6 28.a5 but Black's position is very hard to play.]

26.♞g6! A simple tactical trick. White is winning.

26...♞c7 27.♞e7+ ♞f8 28.♞h4 1-0

Editorial Preface

Another great week of chess has begun!

The European Individual Championship in Poland is on its way. A lot of 2700+ players came to fight for the prices and the qualification for the World Cup. In the line-up there are players such as Jakovenko, Tomashevsky, Vachier-Lagrave, Nepomniachtchi, Areschenko, Akopian, Korobok, Eljanov, Jobava and many more.

After round 4, only Moiseenko has 4/4.

It is going to be a very exciting tournament and we can be sure that there will be many fighting games.

Norway Masters:

The amazing strong Norway Masters has just begun. Carlsen, Aronian, Anand, Topalov, Radjabov, Karjakin, Nakamura, Wang Hao, Svidler and Hammer make the field of the tournament really exciting and strong. On the day before the start of the main event, the blitz tournament was won by Karjakin with 6.5/9.

The first round of the main event began with two draws and three white wins. We are very curious about who is going to be the winner at the end of this event!

Until then, enjoy the CEWN Nr 63 with games from the recent events, as usual, well commented by your two hard workers!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Moiseenko,A1 (2698) – Mista,A (2574) [D20]

14th Euro Indiv 2013 Legnica POL (2.10), 06.05.2013

[Csaba Balogh]

An interesting game with many unusual motifs. Alexander Mista, the specialist of the Queen's Gambit Accepted, was not up-to-date with the latest games. Moiseenko got a nice advantage by following the Radjabov-Ponomarev game, which was just played a few weeks ago in Zug on the FIDE Grand Prix.

1.d4 d5 2.c4 dxc4 3.e4 The sharpest continuation, which probably came as a small surprise for Mista, because Moiseenko always played the main line with 3.♘f3 before.

3...♘f6 Thanks to the efforts of Ponomarev and Nakamura, this line became very popular recently, even on the highest level.

4.e5 ♘d5 5.♙xc4 ♘b6 6.♙d3 ♘c6 7.♘e2 ♙g4 8.♙e3

This was a rare sideline before, but after these games, it must be taken more seriously. [Most of the games con-

tinue with 8.f3 ♙e6 9.♘bc3 ♙d7 10.♘e4 ♙d5 11.♘c5 ♙c8 12.a3 e6 with a very complex position with mutual chances. White has a space advantage, but Black is hoping to get counterplay with the help of the d5 square.]

8...♙d7 9.♘bc3 0-0-0 This sharp move was the reason why White did not like the 8.♙e3 line so much. Black threatens with ♘xe5. [9...♙d8 is a calm alternative for Black, avoiding the dangers that occurred in the game.]

10.a4! This is the novelty of Radjabov. It is very logical for White to launch a huge attack, but on the other hand, he seemingly blunders the ♘xe5 threat... [10.♙e4 happened before, but Black was fine after 10...♙f5 exchanging the light-squared bishops, followed by e6, consolidating the control over the d5 square for the knight.]

10...♘xe5! Black has no choice, he must go for the complications. Otherwise, a5-a6 is crushing. [10...a5? crucially weakens the b5 square. White immediately makes use of it with 11.♙b5±]

11.♙e4! White calmly goes away with his bishop and threatens to take on e5.

11...f5! Excellent reaction by Black, he counterattacks the bishop. Retreating the knight would cost too much

time and White could continue his attack. [11...♘ec4 is refuted nicely by 12.a5! The b6 knight has no good square to move, and on 12...♘xe3 freeing the c4 square for the knight, allows the beautiful win

13.axb6! ♘xd1 14.bxa7!+- and White promotes a queen on move 15!]

12.a5! White must also play aggressively, since he sacrificed a pawn. With this move, followed by the forthcoming sacrifice, he can keep the queens on the board... [12.dxe5 ♔xd1+ 13.♖xd1 ♖xd1+ 14.♔xd1 fxe4 would be just fine for Black, as he does not need to worry anymore about getting mated.]

12...♘bc4! [12...fxe4 was losing again, similarly to the 11...♘ec4 line. 13.axb6 ♘d3+ White has 14.♔xd3! exd3 15.bxa7 and again, White promotes a queen on move 15!]

13.♙xb7+! ♔xb7 14.♔b3+ White takes back the piece on e5, destroying the pawn structure in front of the black king and keeping the queens on the board, with the hope of a successful mating attack.

14...♙a8 [Knowing the games 14...♙c8!? seems like a strong improvement for Black. 15.dxe5 ♘xe3 16.fxe3 ♙xe2 17.♙xe2 With the king on c8, this probably is the

correct recapture. Black has to play accurately. (The point of 14...♙c8 becomes clear after 17.♘xe2 ♔d5! Now, in comparison to the Radjabov-Ponomarev game, White cannot invade on the d-file. We examined this game in the 15...♘xe3 deviation.) 17...♔d2+! 18.♔f3 g5! launching a strong counterattack. It seems like White has to give perpetual check with 19.♔e6+ (19.♘b5 is met by 19...♔d5+! 20.♔xd5 ♖xd5 and the a7 pawn cannot be taken because the knight gets trapped after ♔b7.) 19...♔b8 20.♔b3+ Black should not be too ambitious neither, because 20...♙a8? meets by 21.♘b5! and ♔d5 does not work anymore because of ♘c7 at the end.]

15.dxe5 ♙xe2 This is the novelty of the game, not a good one from Black's point of view. [15...♘xe3 was played by Ponomarev. 16.fxe3 ♙xe2 17.♘xe2 ♔d5 18.♔xd5+ ♖xd5

19.♔f2! White wants to invade on the d-file with his rook. This is the point of 14...♙c8, but of course, such moves can only be found over the board by luck. 19...g6 Black has to hurry to develop his bishop, otherwise, he gets cramped with his remaining pieces. (19...♖xe5 20.♖hd1 is problematic for Black.) 20.♖hd1 ♖xd1 21.♖xd1 ♙g7 22.♖d5 White has kept an initiative thanks to the bad bishop on g7, which will be dominated by the knight af-

ter ♖f4-e6. Later on, he managed to bring home the full point. Radjabov-Ponomarev, Zug 2013.]

16. ♖xe2 ♔d3 A logical attempt by Black to get rid of the queens with such a weak king. However the absence of the queens does not solve Black's problems. [16... ♖xe5 17.0-0 and White's attack is rolling.]

17. ♔xd3 ♖xd3 **18.** ♖f4 White is driving his knight to e6 in order to punish Black for his undeveloped pieces on f8 and h8. [However 18. ♗d4 seems to be even stronger. The point is very hidden... 18...e6 It seems like he will be out of danger after getting his bishop out, but suddenly 19. ♖a4! traps the c4 knight. 19... ♖xa5 with the idea of ♗b4, looks playable, but...

20. ♖c1! traps the rook! Quite an unusual motif!]

18... ♖d7 White would like to keep control over the d-file to avoid the rook penetrating over there. [Slightly better practical chances would have given 18... ♖b3 but White is better anyway after, for instance 19.0-0-0±]

19. ♖e6! ♖xe5 Black is at least a pawn up, but his king-side is completely doomed.

20. ♔e2! Bringing the h1 rook into action!

20... ♖d6 Black tries to kick out the annoying e6 knight, but it costs a pawn.

21. ♖xc7+ ♔b7 **22.** ♖hc1 The end is near! Black's king-side is still undeveloped.

22... ♖c6 [22...g6 is too slow. White's attack is crushing after 23.a6+ ♔b8 24. ♖b5 ♖d7 25. ♖a3! ♗g7 26. ♖b3+-wins.]

23. ♖b5 ♖e6 **24.** a6+ ♔b8

25. ♖a4! White is going to play ♖c4 and the knight cannot be protected and cannot move wither, because of ♖c8 mate.

25...h5 **26.** ♖ac4 ♖hh6 A clever idea by Black, but it does not help, obviously.

27. ♔f1! Nice final move. White unpins himself and threatens to take on h6 and to give the ♗f4 check, followed by either ♖xa7 or ♖c7 depending on where the king goes. The game is the sad tale of an unfortunate f8 bishop! :)

1-0

(2) Eljanov,P (2702) – Predke,A (2494) [E18]

14th Euro Indiv 2013 Legnica POL (1.8), 05.05.2013

[Csaba Balogh]

A nice positional lesson. White has simplified the mid-dlegame into a seemingly very drawish endgame, but a deeper look shows that Black was never so close to the draw.

1.♘f3 [Usually, we reach the game's position from the following move order: 1.d4 ♘f6 2.c4 e6 3.♘f3 b6 4.g3 ♖b7 5.♙g2 ♙e7 6.0-0 0-0 7.♘c3 and we are in the game...]

1...♘f6 2.c4 b6 3.g3 ♖b7 4.♙g2 e6 5.0-0 ♙e7 6.d4 0-0 Here we are! This is the initial position of the Queen's Indian Defense with 4.g3 ♖b7.

7.♘c3 Eljanov follows the old main line. [Recently 7.♖e1 enjoys big popularity.]

7...♘e4 8.♙d2 This position has huge theory and there are thousands of games in the database.

8...♙f6 [I personally played 8...d5 ; While the most common move is 8...f5 All of them lead to different pawn structures, but with complex positions everywhere.]

9.♖c1 White prepares to push d5, which is shown in the 9...d6 line. Black decides to employ a standard maneuver to keep his b7 bishop active, but in this position, it is basically a novelty.

9...♘xc3 [9...d6 is met by 10.d5! and Black cannot destroy the pawn structure on c3 because of the previous ♖c1 move. White ends up with a small advantage because of the space advantage.; 9...c5 is suggested by theory as the best option for Black.]

10.♙xc3 ♙e4 11.b4 White decides to grab space on the queenside. He is intending to develop his pieces with ♗b3 and ♖fd1. [Another typical plan in these positions for White is to play 11.♖e1 and if Black develops his pieces logically 11...d6

12.♙f1! the point is that White would like to occupy the center with ♘d2 and when the bishop goes away, e4. However, to do this more effectively, he should preserve his light-squared bishop. 12...♘d7 13.♘d2 and wherever the bishop goes, White pushes e4 with an advantage.]

11...d5 12.♖b3 White decides to keep the tension. [12.c5 came into consideration. White should have a small edge

here as well, with the space advantage, given that Black is unable to undermine the pawn chain with a5 or e5.]

12...♘c6 Good timing! With his last move, Black has prepared a break on the queenside with a5, so White had to take concrete measures.

13.cxd5! [After the “handy” 13.♖fd1 the advantage immediately slips away. Black plays 13...a5! and on 14.b5 dxc4 15.♔xc4 ♕d5 16.♔d3 ♘b4! Black gets very good counterplay. His a8 rook becomes very active without even making a single move with it.]

13...♔xd5 [13...♕xd5 is not good. 14.♔b1! and Black has no good defense against e4!; 13...exd5 14.♖fd1 This structures are usually considered as slightly better for White. The main plan is to settle the knight on e5. It can be done immediately or after b5-♘e7.]

14.♔xd5 ♕xd5

15.e3 Strengthening the d4 pawn. White prepares ♘d2. [White should be careful with 15.b5 Because of the knight retreats, Black gets the chance to gain counterplay on the queenside with a6. 15...♘e7]

15...a5 A logical move, but after the game, it is clear that Black should have refrained from this move. [15...♕xa2? is clearly over-optimistic. 16.♘d2! ♕d5 17.e4! and the bishop gets trapped.; 15...♖fc8 should have been played, but it does not equalize either. 16.♘d2 ♕xg2 17.♔xg2 White has a slightly better endgame. He can put the c7 pawn under strong pressure by doubling the rooks on the c-file and he can also start to advance the kingside pawns with g4-f4, grabbing a lot of space and increasing the advantage.]

16.bxa5! Eljanov is ready to go for the forthcoming endgame. He knows exactly how unpleasant it is going to be for Black...

16...♘xa5 17.♕xa5 ♖xa5 18.♖xc7 ♖xa2

19.♖fc1 Both players were looking forward to this position. Black thought that the draw was in his hands, while White was also happy. We must go deeper to understand the real problems. White would like to exchange the light-squared bishops and the knight will dominate the remaining bishop. The game demonstrates this well. The question is whether it helps if Black goes for the opposite-colored bishop endgame or not....

19...♖d8 [19...♙xf3 is probably the better chance, but also very unpleasant for Black. 20. ♙xf3 g6 21. ♖b7 ♖b2

22. ♖c6 Without the rooks on the board, Black could make an easy draw even without the b-pawn. However, White can create many threats with his rooks. One could be d5 now, using the pin of the bishop. Black cannot prevent it with ♙g7, because it runs into ♖xe6. **22...♙d8** **23. ♙g2** White does not need to hurry. **23...h5** **24. h4** Black can only move with the b2 rook, but a spectacular threat is awaiting for him. **24...♖d2** (24...b5 25. ♖c5 b4 26. ♖cb5 wins the pawn.) **25. ♖d6** ♖b2 **26. d5!** exd5 **27. ♖bd7!+-** Unexpectedly, the bishop is trapped!]

20. ♘e1! White follows his plan of playing with the strong knight against the useless bishop.

20...♙xg2 **21. ♙xg2 e5** A logical attempt by Black to initiate exchanges, but the remaining 4 pawns will still be enough for White to convert his advantage.

22. dxe5 ♙xe5 **23. ♖b7** ♖b2 **24. ♘f3** [White had a tactical opportunity to win the pawn with 24. ♘d3 because of the back-rank. However, it would be a huge mistake to give up the knight for the bishop. 24...♖b5 25. ♘xe5

♖xe5 26. ♖xb6 because the 4 against 3 rook endgames are drawn...]

24...♙f6

25. g4! Eljanov advances his kingside pawns. Before winning the b-pawn, he wants to stop Black from organizing the ideal defending pawn structure with h5-g6-f7. [White could have won the b-pawn by playing 25. ♖c6 b5 26. ♖cb6 ♖d5 27. e4 but White can do this anytime...]

25...h6 **26. h4** 26...g6 allows the unpleasant ♖c6 and the bishop does not find its place.

26...♖b4 **27. ♙h3** ♖f8 Black goes to passivity himself. It does not make any difference, since White could play ♖c7 anytime, which forces Black to play ♖f8 anyway.

28. ♖c6 White is ready to take the pawn since he ideally advanced his pawns on the kingside.

28...♙d8 **29. ♘d4** Eljanov had a clear plan in mind. He wanted to occupy the seventh rank with both of his rooks and then the threats of ♘e6 and ♘f5-d6 are too strong for Black to parry. [29. ♖b8 was also possible. Black cannot avoid losing the pawn. For instance, after 29...♖b2

30. ♖cc8 ♗e7 31. ♖xf8+ ♗xf8 32. ♘e5 ♘d7 is threatened.
32... ♖d2 33. ♖g2 ♖d6 34. ♘c4± wins the pawn.]

29... ♖b2 30. ♖g3 ♖b1 [On 30... ♗f6 31. ♘f5! White obviously saves his strong knight!]

31. h5! Further squeezing Black, who already cannot move...

31... ♖g1+ 32. ♖f3 ♖b1 33. ♘f5 ♖b5 34. ♖d6 The rook is heading to the 7th rank.

34... ♖e5 35. ♖g3 White does not need to hurry.

35... ♖c5 36. ♖dd7 ♖c2 37. f4 White improves even more his structure before making the decisive blow with ♘d6. [37. ♘d6 was also winning.]

37... ♖c3 38. ♖f3 ♖b3 This is a blunder, but the game was over anyway.

39. ♘d4! ♖d3 40. ♖e2 Black resigned as ♘e6 is coming next with the typical mate on the 7th rank with two rooks. [40. ♖e2 ♖c3 41. ♘e6 fxe6 42. ♖xg7+ ♖h8 43. ♖h7+ ♖g8 44. ♖bg7# An instructive game!]

1-0

(3) Pelletier, Yannick (2599) — Vachier-Lagrave, Maxime (2718) [A15]

14th Euro Indiv 2013 Legnica POL (3.19), 07.05.2013

[Arkadij Naiditsch]

To win a game against Yannick Pelletier with the black pieces is a very difficult task. Yannick is usually very well prepared and likes to try to force a draw against a stronger player out of the opening. However, Maxime shows us what is the right strategy against such a tight opponent — he totally outplayed the Swiss number 1.

1. ♘f3 ♘f6 2. c4 g6 3. ♘c3 d5 Maxime is almost always playing his favorite Gruenfeld, and with great success. This time, it is anti-Gruenfeld time. The position very quickly becomes very sharp and interesting.

4. cxd5 ♘xd5

5. ♖b3 The Anti-Gruenfeld with 5. ♖b3 is a very sharp line. I guess that Black probably did not expect it from the usually solid Swiss player.

5... ♘b6 6. d4 ♗g7 In the Gruenfeld it is always the same — White has a strong center and Black tries to get some play against it.

7. ♖g5 A relatively rare move which immediately brings a lot of action to the game.

7... ♙e6 8. ♚c2 Until here, I guess both players knew the line well.

8...h6 9. ♙h4 This is nothing new either. White keeps both ideas in mind: to castle long or just to play the modest e3, ♙e2 and 0-0.

9...g5 This is almost a novelty already. Usually, Black tried the less aggressive short castle, or ♘c6 and short castle after e3.

10. ♙g3 g4 Actually, this move looks very logical. Why not to push away the white knight from f3?!

11. ♘d2 The only square. Of course, moves like 11. ♘h4 would be much less attractive for White because the knight would be out of play.

11... ♘c6 The idea is not to put the knight on c6, which would be a bad square, but to bring it quickly to d5 and to play c5 next, crushing White's center. [This is not the right moment to get greedy. 11... ♙xd4 12. ♘b3 and the white pieces will dominate the game. Besides ♖d1, ♘c5 might also be a threat, if the black bishop goes back to g7.]

12.e3 ♘b4 and here we can see Black's idea in action.

13. ♚d1 h5 Before going ♘4d5, Black is checking how will White get rid of the nasty h4 threat.

14.a3? A bad move. White is pushing the Black knight to d5, a square where it would have to go anyway. [A normal move like 14. ♙h4 would lead to a very complex position.]

14... ♘4d5 15.e4?! Another typical mistake. Of course, White should never move the e3 pawn. It is very important to block the bishop on g7! Now Black is quickly using White's gift.

15... ♘xc3 16.bxc3

16...c5! This is exactly how we should play the Gruenfeld! Black's bishop on g7 is mutating to a monster piece! By now, it is clear that something went very wrong in the previous moves. Black already has a better position.

17.d5 ♙d7 18.c4 White is trying to fix his center, but of course, Black will not take the exchange on a1, as it would be a terrible mistake. The bishop controls all the dark squares and is a key piece in Black's position.

18... ♙a4?! As we know, the best blocking piece is the knight, so why to play 18... ♙a4 and not 18... ♘a4!?

19. ♚c1 h4 It is time to act. White could have thought about playing h4 next.

20. ♙f4 ♙d4! A nice move. White wanted to play e5 next or just ♙e3. Now Black is going to destroy White's pawn structure forever.

21. ♖e2 White does not see it coming...

21...e5! Just super strong play.

22. ♖e3 Nothing else left for White.

22... ♖xe3 23.fxe3 Let us have a fresh look at the position. White's pawn structure is just horrible and he has no play at all. If Black manages to exchange the queens, his position would probably be winning. The winning plan would be easy, to put the knight on d6, the bishop on d7 and to play a6-b5, or maybe f5.

23... ♖g5 24. ♖c3 ♖d7 Probably now came the most critical point of the game.

25.0-0? After this move, White is almost paralyzed. [White should have used his chance to get at least some counterplay. 25.a4! ♖c8 (Of course not 25... ♖xa4 26. ♖b3±) 26.a5 and in the future, White would have at least a target—the c5 pawn provokes Black to play b6. Still, White's position is bad, but there remain some practical counter-chances.]

25... ♖a4 No more a4 in this game.

26. ♖d3 ♖h6 Black is playing according to his plan. It is time to exchange a few pieces... The target is to get a Bishop+Knight endgame with one rook on the board.

27. ♖ab1 ♖b6 Protecting b7 pawn and avoiding b6, which would give a "one-way ticket" for the knight on a4.

28. ♖b3 It is hard to give White an advice. There are really no moves in the position, but I think it was clearly the time to get rid of the knight on a4. [28. ♖d1 would probably give White better practical chances.]

28... ♖f8 Black does not need to hurry, White has no counterplay.

29. ♖d2 ♖g7 30. ♖d3 g3 It is hard to say if this move will be useful, but it might be. The only small disadvantage could be that White might need the f3 square for his knight, someday...

31.h3 ♖h8 and the second rook is coming over h6 into the game.

32. ♖c2 ♖hh6 33. ♖d3 The moves by White are quite senseless.

33... ♖hf6

34. ♖f5? The last mistake of not a great game. [It would have been better for White to keep using the passive tactic. 34. ♖xf6 ♕xf6 35. ♖f1 ♕g5 36. ♖f3 with a worse, but not lost, position.]

34... ♗xf5 35.exf5 e4! and Black says “thank you!”. We saw a very nice strategic win by Black and can learn a lot from Maxime, who is still a real Gruenfeld expert with the black pieces!

0–1

(4) Halkias,Stelios (2549) – Balogh,Csaba (2644) [D17]

14th Euro Indiv 2013 Legnica POL (3.37), 07.05.2013

[Arkadij Naiditsch]

Our CEWN commentator Balogh Csaba is working a double shift. Besides his usual commentaries for the next issue of CEWN, he is participating in the European Individual Championship in Poland. The target is clear, to qualify for the World Cup. To do this he needs a result of at least +4 and to be lucky and get among the best 24.

1. ♘f3 d5 2.d4 ♘f6 3.c4 c6 4. ♘c3 dxc4 Csaba’s favorite Slav with dxc4.

5.a4 ♗f5 6. ♘e5 ♗bd7 7. ♘xc4 ♘b6

8. ♘e3 Quite a rare but interesting move which Halkias played not for the first time. [8. ♘e5 is the main move here.]

8... ♗g6 [8...e6 is another way to proceed, but personally, I would not advice it, since somehow it feels a bit better for White. 9. ♘xf5 exf5 10.e3 ±]

9.a5 ♘bd7!? It seems to me that my friend Csaba was extremely well prepared. [9...♘bd5 is the usual answer here.]

10.g3 A very normal move by White. He wants to develop first, castle short, then play ♘c4 back and e4, in order to dominate the center.

10...b5!N It seems like Csaba's preparation is really deep. An amazing looking move, but maybe simply closes this line?! Black is forcing White to play a move by move game. The position is getting super sharp.

11.axb6 After this move, I think Black is out of danger. [The most principled seems to be 11.♗g2 ♖c8 12.0-0 e6 It seems like Black is very solid, but White got an extra idea. 13.f4! with a super unclear position.]

11...axb6 12.♖xa8 ♕xa8

13.d5 White is trying to speed up things hoping to crush directly in the center. [The best try to hope for an advantage would, again, be the simple 13.♗g2 e6 14.0-0 ♗e7 15.f4! Always the f4 move! Bringing back some small discomfort.]

13...cxd5 14.♗exd5 ♘xd5 15.♗xd5 ♔a5+! Black is pushing back the knight and winning some time for development.

16.b4 At first sight, this looks very bad for White, but Halkias prepared a very exciting move!

16...♔a7 Black wants to play e6 and it seems like 16.b4 was not the best, but...

17.♗h3! A great idea to sacrifice the knight on d5.

17...e6 18.0-0 Now White already has no choice.

18...exd5 19.♔xd5

19...♗e7! Good defense by Black. White wanted to play ♖d1 next.

20.♗b2 Again, White chooses the best move. [Also 20.♖d1 ♘f6 (20...0-0 might lead to a slightly worse endgame for Black. 21.♔xd7 ♕xd7 22.♖xd7 ♗xb4 23.♗e3 ♖b8 24.f4 and White is doing a bit better in this endgame, even though it is rather close to a draw.) 21.♔c6+ ♗f8 This seems like quite an unclear position with a lot of tactical motives. Here is one of them: 22.♖d7 looks very beautiful, but only leads to a draw. 22...♔a1 23.♖xe7

♔xe7 24. ♖c7+ ♔f8 25. ♖d6+ ♔e8 26. ♖c6+ and the game ends with a perpetual check.]

20...0-0 Black got no other choice but to go into a slightly worse endgame.

21. ♖a1 The rook on an open file is never out of place.

21... ♖c7 22. ♖xd7 ♖xd7 23. ♙xd7 ♙xb4 24. ♙d4 ♖b8
How to evaluate such a position?! If we could take away the rooks from the board, the position would be just a draw, and maybe even slightly better for Black. With rooks on the board and the great positions taken by the white bishops, White is doing a bit better. Especially if he manages to play f4-e4 — Black's position would be not that pleasant.

25. ♖a7 [I think the best for White would have been to play 25.f3 followed by e5 next, with minimal winning chances.]

25... ♙e4?! It seems like this move simply blunders a pawn. [Better was 25...h5 and the game should end in a draw.]

26. ♖a4! White is not missing his chance to get a pawn...

26... ♙f8 27. ♙xg7 That is the idea. Even with a pawn up, White's chances to get a full point are not very high. The opposite-colored bishops and the quick walk of the queenside pawns give Black very good chances for a draw.

27... ♙c2! Csaba does not panic after his blunder and chooses the right square. White's rook on c2 will be badly placed.

28. ♖a2 ♙xg7 29. ♖xc2

29...b5! Of course, Black should not lose any time. If White could block the pawn on b6, the position might be just lost!

30. ♖c8+? After this, the position is just a dead draw. [The only chance to keep playing would be to keep the rooks on the board. 30. ♙f5 b4 31. ♖g2 b3 32. ♖c7 b2 33. ♙b1 and even though the white bishop takes a terrible position on b1, White still has some practical chances to play for a win. The black rook can never leave the b-file to his white colleague, so White should not be afraid of ♖c8 and simply push his pawn forward.]

30...♖xc8 31.♟xc8 Now it is a total draw. Black does not even need the b-pawn for that. The easiest way for Black to make a draw is to put his pawns on h6-f6, the king on g7 and simply “do nothing”. White has no winning ideas.

31...b4 32.♟f5 b3 33.♖f1 h6 34.e3 ♟c3 35.♖e2 b2 36.♟b1 ♖g7 Black is out of danger and the rest of the game is not really interesting. It is more or less moving around.

37.♖d3 ♟e1 38.♖e2 ♟b4 39.g4 ♟d6 40.h3 ♖f6 41.h4 ♖g7 42.♖d3 ♟e7 43.h5 ♟h4 44.f3 ♟f2 45.♖e4 f6 46.♖f4 ♟e1 47.♖f5 ♟d2 48.e4 ♟c3 49.f4 ♟d2 50.♟a2 ♟c1 51.♟b1 ♟d2 52.e5 A very interesting game for the future of the opening!

Endgame section

(15) Carlsen, Magnus (2868)
— Radjabov, Teimour (2745) [A07]

Norway Supreme Masters Blitz 2013

Stavanger NOR (2.1), 07.05.2013

[Chess Evolution]

We are in a blitz game from the Super Blitz Tournament in Norway. Anyway, the quality of the game is pretty high. We very rarely see Magnus Carlsen losing an endgame, but that will happen in this game. At first sight, the position seems to be close to a draw, but is it so?! Let us try to find out.

37. ♖b7 g5! Very strong move! Now Black wants, in many lines, to play ♜b1–♜h1 in order to win a tempo. Also, the Black king will have a free pass over g6–f5 to the very important e4 square.

38. h3? This small move almost loses the game! [White should avoid at all costs the black king coming to f5. 38.g4! Black has several ideas now. Let us take a look at

the most forced one. 38... ♜b1+ going for the h-pawn. 39. ♔e2 ♜h1 and the h2 pawn is lost, but White is in time to create counterplay. 40. b4 ♜xh2 41. b5 ♜h1 42. ♔d2! A very important move in order not to allow the black rook to the b-file. It is hard to say if White would be able to save the game here, but chances are not that bad...]

38...h5! Another super strong move and maybe White's position is already lost!

39. ♔f1 [It is already too late for 39.g4 ♜b1+ 40. ♔e2 ♜h1 and White is not in time to push the b-pawn.]

39... ♜d2 putting the white rook on a bad square.

40. ♜b4 g4 and saving the f5 square for the black king.

41. hxg4 hxg4 42. ♔e1 ♜b2 43. ♜b8 ♔g6 The black king is coming and White has no counterplay at all.

44. ♜b7 f6 45. ♜b6 ♔f5 White is in a sort of zugzwang.

46. b4 [Not much better is 46. ♔f1 ♜d2! The usual trick to get the white rook to b4. 47. ♜b4 ♔e4 and the game is over...]

46...e5 The simplest way... Even so, exchanging the weak d4 pawn is a bit unpleasant...

47.dxe5 fxe5 48.b5 White is trying to push the b-pawn to b7 in order to have practical chances for an escape, but it comes all too late...

48...♔e4 49.♖b8 d4 The black king plus the d-pawn are too big an advantage not to make a full point.

50.b6 ♖d3 51.♔f1 ♔d2 52.b7

52...d3! Good play by Black, not leaving White any chances. Black's idea is simple, to play ♖b1 followed by ♔e2.

53.♖g8 [Also losing is 53.♔g2 ♔e2 54.♖e8 ♖xb7 55.♖xe5+ ♔d1 and Black's d-pawn becomes a queen. As we can see, it is super important that the black pawn is on g4, practically blocking both white pawns.]

53...♖xb7 54.♖xg4 ♔c3 The easiest choice...

55.♖g8 ♖b1+ 56.♔g2 d2 and the game is over... The rest was only played because it was a blitz game.

57.♖c8+ ♔b2 58.♖d8 d1♔ 59.♖xd1 ♖xd1 60.♔f3 ♖e1 61.g4 ♔c3 As we could see, this typical endgame was very bad for White and the only saving attempt was the active plan of sacrificing the h-pawn.

0-1

(16) Ushenina,A (2491) – Girya,O (2463)

Women Grand Prix, Geneva, 06.05.2013

[Chess Evolution]

We will examine a shocking game, where the current World Champion, Anna Ushenina, is unable to mate her opponent with bishop and knight. The attacking side needs to know only one basic idea, but when the moment arrived, Ushenina missed it...

72.♘xc3 ♔a1 The defensive side should run with the king to the corner which is opposite to the bishop's color.

73.♘d1 ♔a2 74.♙c2 ♔a1 75.♔c3 ♔a2 76.♙b3+ ♔a1 77.♘e3 ♔b1 78.♘c2 ♔c1

79. ♖a2! This is the winning position, which is very easy to get, even if the black king is in the center. White's task is to squeeze the black king to the h1 square, which is already fitting to the bishop...

79... ♖d1 80. ♘d4 ♖e1 This defense is more tricky. White needs to know the winning idea here. Otherwise, it is impossible to give the mate. [80... ♖c1 is the other defensive method. In this case, the win comes after 81. ♘e2+ ♖d1 82. ♖d3 ♖e1 83. ♖e3 ♖d1 84. ♖b3+ ♖e1 85. ♖c2 and we got the same position as after 79. ♖a2, but the king is already squeezed further. The standard mating technique is the following: 85... ♖f1 86. ♘f4 ♖e1 87. ♘g2+ ♖f1 88. ♖f3 ♖g1 89. ♖g3 ♖f1 90. ♖d3+ ♖g1 The king is in the good corner now, so the mate is coming soon. 91. ♘f4 ♖h1 92. ♖e2 ♖g1 93. ♘h3+ ♖h1 94. ♖f3#]

81. ♖d3 ♖f2

82. ♖d5? This lets the king slip away! [The key move is 82. ♘e2! ♖f3 83. ♖e6! Avoiding the Black king to run away from the good corner through g4. 83... ♖f2 84. ♖d5 and the king must go back the 1st rank. 84... ♖f1 85. ♖e3 ♖e1 86. ♖b3 and we already know this position from the 80... ♖c1 line.]

82... ♖g3 83. ♖e3 ♖g4! The king gets out from the danger zone, so White must start the whole mating process from the beginning. Ushenina does this part with good technique.

84. ♖e4 ♖g5 85. ♖f3 ♖f6 86. ♖f4 ♖g7 87. ♖g5 ♖f7 88. ♖f5 ♖g7 89. ♖d5 ♖h6 90. ♘e6 ♖h7 Black defends the most tenacious way again.

91. ♖f6 ♖g8 92. ♘f4+ ♖h8 93. ♖e4 ♖g8 94. ♘h3 ♖h8 95. ♘g5 ♖g8 96. ♘f7 ♖f8

97. ♖h7! Here we are again! We got a mirror image position to the one after 79. ♖a2...

97... ♖e8 Ushenina starts to play some strange moves again...

98. ♖f5 [As we already know, the winning technique is 98. ♘e5 ♖d8 99. ♖e6 ♖c7 100. ♘d7! The key move! 100... ♖c6 101. ♖d3! ♖c7 102. ♖e4 ♖d8 103. ♖d6 ♖e8 104. ♖g6+ ♖d8 105. ♖f7 and the king is squeezed to the good corner again. The mate is very easy from now on. 105... ♖c8 106. ♘c5 ♖d8 107. ♘b7+ ♖c8 108. ♖c6 ♖b8 109. ♖b6 ♖c8 110. ♖e6+ ♖b8 111. ♘c5 ♖a8 112. ♖d7 ♖b8 113. ♘a6+ ♖a8 114. ♖c6#]

98...♔f8 99.♘h6 ♔e8 100.♘f7 ♔f8 101.♘e5 ♔g8
102.♘g6 ♔h7 103.♙e6 ♔h6 104.♙g8! Once again,
we got the winning position, but this time it is mirrored
again.

104...♔h5 105.♘e5! Ushenina seems to be following
the right path...

105...♔h4 106.♙f5 ♔g3

107.♙c4? But she fails again! [107.♘g4! ♔f3 108.♙c4!
♔g3 109.♙d5! is the win!]

107...♔f2 108.♔f4 ♔e1 The king slips away again. The
50 moves rule to draw is getting very close. Black only
needs to make 14 moves, since the last capture happened
on move 72.

109.♔e3 ♔d1 110.♙d3 ♔c1 111.♘c4 ♔d1 112.♘b6
♔c1 113.♘a4 ♔d1 114.♙e4 ♔c1 115.♙d3 ♔d1 116.
♘b2+ ♔c1 117.♘c4 ♔d1 118.♙g6 ♔c1 119.♙f5 ♔d1
120.♘b6 ♔c1 121.♘a4 ♔d1 122.♘b2+ ♔c1 At this
point, Black could have already claimed the draw, but
since the World Champion had no idea how to make pro-
gress, Black decided to play until White herself offers the
draw.

123.♘c4 ♔d1 124.♔d3 ♔c1 125.♔c3 ♔d1 126.♙d3
What a shocking game!

1/2

Clash of the Titans

(17) Botvinnik,Mikhail – Unzicker,Wolfgang [D34]

EU-chT (Men) 02nd Oberhausen (10.1), 02.07.1961

[Kamil Miton]

1.c4 ♘f6 **2.♗f3** e6 **3.g3** d5 **4.♖g2** c5 Another option for Black is to play the Catalan structures with a late d4 after [4...dxc4 5.♔a4+]

5.0-0 ♘c6 **6.cxd5** exd5

7.d4 The position transposes to the Tarrasch Defense, which was a very popular opening back then.

7...♗e6 Usually Black plays [7...♗e7 8.♘c3 (8.dxc5 ♗xc5 9.♔c2!? Given that the knight is not on c3 yet, White can try this interesting plan with ♖d1–Bg5 to put pressure against the d5 isolated pawn.) 8...0-0 The main position. Here White has a few possibilities. 9.♗g5 (9.dxc5 ♗xc5 10.♗g5 d4 11.♗xf6 (11.♗e4 ♗e7 12.♗xf6 ♗xf6=) 11...♔xf6 Usually, Black is very solid in this kind of structures. The d4-pawn is not very weak and Black has good chance

for counterplay over the e-file. (Xe2) 12.♗e4 (12.♗d5) 12...♔e7 13.♗xc5 ♔xc5) 9...cxd4 (9...c4 leads to other very interesting line.) 10.♗xd4 h6 11.♗e3 ♗e8 12.♖c1 with complex play.]

8.♗c3 ♗e7 **9.♗e3** [9.dxc5!? ♗xc5 10.♗g5 0-0 11.♗xf6 ♔xf6 12.♗xd5 ♔xb2 13.♗c7 ♖ad8 14.♔c1 ♔xc1 15.♖axc1 ♗b6 16.♗xe6 fxe6 17.e3 Thanks to his better structure, White is slightly better.]

9...c4 [9...cxd4 10.♗xd4 0-0 11.♗xc6 bxc6 12.♗a4 ♖c1 is coming next and White has typical play with a blockade on c5 and d4.]

10.♗e5 0-0

11.♗xc4! This was the idea of 9.♗e3.

11...dxc4 **12.d5** ♗xd5 [12...♗g4 makes no sense because of the simple 13.♗f4±]

13.♗xd5 ♗f6 Black could also try [13...♗g5 14.♗xg5 (14.♖c1 ♗xe3 15.♗xe3 ♔a5±) 14...♔xg5 15.♔c1! (15.♗c7 ♖ad8 16.♗xe6 fxe6 17.♔c2 ♗d4 18.♔xc4 b5 with counterplay on time.) 15...♔xc1 (15...♔e5 16.♔xc4 ♔xb2 17.♖ab1±) 16.♖axc1 ♖ad8 (16...♗d4 17.♗f4 g5 18.♗xe6 ♗xe2+ 19.♗h1 fxe6 20.♖c2 ♗d4 21.♖xc4± Black has too

many weaknesses.) 17. ♖fd1 ♜d7 (17...b5 18. ♘c3±) 18. ♖xc4 ♜fd8 19. ♖c5 (19.e4 f5↔) 19...♙f8 20.e4 ♘e7 White saved the pawn, but how to improve the position? Black's idea is to play f5.]

14. ♖c1 [14. ♘xf6+ ♙xf6 15. ♙c1 (15. ♙xc6 bxc6 16. ♙d4 Thanks to his better structure, White can look for a long-term advantage, especially because his king will be safe after f3.) 15...♘d4 Logical active move. (15...h6 16. ♙c3±) 16. ♖e1 ♜ac8 17. ♙c3 (17. ♙xb7 ♜b8 18. ♙c3 ♜fd8 with ♜xb2 next.) 17...♖fd8 18. ♙f1 ♜d1 is coming next and White looks better.]

14... ♙d4 [14... ♙xb2 15. ♖xc4 Thanks to the strong knight and very active pieces, White has the initiative.]

15. ♙xd4 ♙xd5

16.e4?! I do not like this move, as it creates weaknesses and limits the bishop on g2. White should play [16. ♙f6! ♙xf6 17. ♙xd5 ♙xb2 18. ♙xc4 ♜ac8 19. ♖c2 with potential pressure against f7, and maybe b7 as well. White has a typical tiny advantage.]

16... ♙xe4? Strange decision! Why not [16... ♙e6 17. ♙c3 ♙c7 Black is very solid without any weaknesses and has

the simple plan f6-b5-a5-b4 etc. After e4, the white bishops are not strong as they were before. The position is completely unclear.]

17. ♙xe4 ♘xd4 [17... ♙xd4 18. ♙xc6 ♙xd1 19. ♖fxd1 bxc6 20. ♖xc4 Because of the weak pawns, Black's position is very bad.]

18. ♖xc4 ♘e6 19. ♙c2 g6 20. ♙xb7 ♜b8 21. ♙g2± White is a pawn up, but it will take a long time to convert it into a victory.

21... ♙f6 22.b3 [22.b4!? looks more active.]

22... ♘d4 23. ♙e4 ♜fd8 24. ♖e1 The black pieces are very active. That is why it is not an easy task to convert the advantage with White. I suppose the first step should be to exchange queens.

24... ♘f5 25. ♖c6 ♙b2 26. ♖c2 ♙a3 27. ♙e5 ♙b4 28. ♙f1 ♜b6 29. ♙d5 ♙b5+ 30. ♙c4 White transferred his bishop to a more active place, but now the squares f3-g2 around the king can become weak.

30... ♙d7 31. ♙e4 [31.g4 This probably leads by force to an exchange of queens, which is good for White. 31... ♘d4 32. ♖d2 ♜d6 33. ♙e7±]

31...♖d6 32.♖ce2 ♘d4 33.♖e3 ♘f5 34.♖3e2

34...♘d4 35.♖b2 ♖h3+↗ White did not manage to exchange queens and, finally, Black gets counterplay.

36.♖g2 [36.♖g1 ♖f6 37.♖d2 An interesting idea to sacrifice the queen. (37.f4 weakens the white king.) 37...♘f3+ 38.♖xf3 ♖xf3 39.♖xd8+ ♖g7 40.♖e7 with the idea of winning other pawns on the 7th rank.

40...♖h6 (40...♖c3 41.♖xf7+ ♖h6 42.♖d1±) 41.♖d4 ♖c8 42.♖xa7 ♖c5 43.♖ad7 ♖a3 44.♖g2 ♖f6 45.♖d2±]

36...♖f5 [36...♖h5 More accurate, and immediately gives Black the equality. White is not able to avoid ♘f3. 37.♖d2 ♘f3 38.♖xd6 ♖xd6 39.♖e2

39...♖d2+! (39...♖xh2+ 40.♖g1 ♖g4 41.♖xg4 ♖xg4 42.♖a8+ ♖g7 43.♖xa7 h5 44.♖e7 ♖f6± Even here it is not easy because, after h4, the white king will be weak.) 40.♖g1 ♖a5 With ♘f3 and ♖a2 threats.]

37.f4 Black did a good job in forcing White to push f4. [37.♖e4 ♖h3+ 38.♖g1 White could go back to the idea from the previous variation.]

37...♖h5 [37...a5!? Black's pieces are optimally placed, so this move looks fine, with the simple idea of exchanging pawns or creating some weaknesses.]

38.♖f2 ♖a5 39.g4 What else to do? white has to, at least, try to improve his position somehow.

39...♖e6 40.f5 ♖d1 41.♖e4 ♖8d4 [41...♖g5 with the idea of keeping the queens on the board. 42.♖e3 ♖xe1+ 43.♖xe1 ♖c5 44.fxg6 hxg6 45.♖d2 ♖xd2 46.♖xd2 ♖e5 The strong cooperation between knight and queen and the weak white king should give Black enough to make a draw.]

42.♖e3 ♖xe1+ 43.♖xe1 ♖f4 44.fxg6 hxg6

45.h4 Not allowing the support of the knight after g5.

45...♔g7 [45...♖xe1+ 46.♔xe1 ♜d3+ with good drawish chances in the rook endgame. 47.♙xd3 ♖xd3 48.♖f4 ♖h3 49.♖a4 ♖xh4 50.♖xa7 (50.♔f2 f5 51.♖xa7 ♖xg4 52.♖a4 ♖g5) 50...♖xg4 51.♖b7 ♖g2 52.a4 ♖a2=]

46.♖c2 ♖xe1+ 47.♔xe1 f5 It looks logical to limit the material on the board, but I am not sure if this is the best move.

48.gxf5 [48.g5!? ♜h3 49.♙f1! ♖xh4 50.♖c7+ ♔f8 51.♙xh3 ♖xh3 52.♖xa7 ♖g3 53.♔f2 ♖xg5 54.a4 ♖g4 55.a5 In this case, the white pawns can advance very fast.]

48...gxf5 49.♙f1 ♔g6 50.♖c5 [50.♖c6+ ♔h5 51.♖a6 ♔xh4 (51...♖d7 52.♖a4 with ♙e2 next and the white pieces get nice coordination.) 52.♖xa7 ♔g3 53.a4 ♜d3+ 54.♔d2± It will be hard for Black to stop the pawns.]

50...♔h5 [50...♜d3+ 51.♙xd3 ♖xd3 52.♖a5 ♖d7 53.♔f2 ♔h5 54.♔g3 ♖d3+ 55.♔f4 ♖d7 56.♔xf5 ♔xh4 57.♔e6+-]

51.♖xf5+ ♔xh4

52.♖a5 white is winning this position because the black king will not be able to come back to support the queen-side. [52.♔f2 looks good for White as well. 52...♔g4 (52...♜d5 53.♙e2 ♖f4+ 54.♖xf4+ ♜xf4 55.♙c4 The bishop on c4 limits the knight and the white king goes get the a7 pawn very fast. 55...♔g5 56.♔e3 ♜g6 57.♔d4 ♔f6 58.♔c5 ♜e5 59.♔d6 ♔f5 60.♔d5 ♔f6 61.a4+-) 53.♖f7 a5 54.♔e3 ♖b4 55.♖g7+ ♔f5 56.♙c4± XNf4]

52...♖d7 53.♔f2 ♖e7 [53...♔g4 54.♔e3 ♖e7+ 55.♔d4 ♔f3 56.♙c4±]

54.♔f3 ♜g6 55.♙c4 ♜e5+ 56.♔f4 ♜g4 57.♖a6 ♔h5 58.♙d5 ♜e5 59.♙e4 Nice zugzwang position!

Editorial Preface

In the current issue of CEWN 64 (a chess number), indeed, a lot of chess was played.

The new European Champion is the Ukrainian GM Alexander Moiseenko. He played great chess and totally deserved this victory. Second place went to Alekseev and third to Romanov, all three obtained 8/11 points.

A very good result was showed by probably the oldest Top GM, Alexander Beliavsky, who was World's Nr 3 many many years ago. He also got 8/11.

The Super Tournament in Norway is getting ruled by Sergey Karjakin with 5,5/7. Close behind is Magnus Carlsen with 5/7 and there are two more rounds to go. It is going to be a very exciting finish.

The FIDE Women Grand Prix was won by Khotenashvili Bella with a great 8/11. 2nd place went to Muzychuk Anna with 7.5/11 and 3rd to Kosintseva Tatiana with 6.5/11.

In the current issue, we analyze a lot of interesting games from the recent Top events!

We wish you a lot of chess joy with your new issue of CEWN, the 64th.

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Karjakin, Sergey (2767) — Radjabov, Teimour (2745) [B30]

Supreme Masters 2013 Sandnes NOR (1.5), 08.05.2013

[Csaba Balogh]

An impressive positional performance by Karjakin.

1.e4 c5 2.♘f3 ♘c6 3.♘c3 White tries to avoid the Sveshnikov defense. Usually, he does this by playing 3.♙b5, but the text move is also possible.

3...g6 4.♙b5 White succeeded to avoid Radjabov's pet line with 3.♙b5 e6, but of course, this g6 system is the other huge main line.

4...♙g7 5.0-0 Black has to decide how to finish the development. Radjabov chooses one of the most popular ways with e5-♘ge7, but it has a drawback, that it weakens the d5 square.

5...e5 6.d3 ♘ge7

7.♙c4 White immediately focuses his pieces on the d5 square. Usually, the Sveshnikov players are not impressed by this, since they are used to face this in many lines.

7...h6 Black prevents the potential plan of ♙g5, trading one of the defenders of the d5 square.

8.a3! This is a known plan in this kind of closed positions. White initiates by grabbing space on the queenside with b4. Black should not prevent it with a5 because the b5 square gets crucially weakened.

8...0-0 9.b4! White could save a tempo by not playing ♖b1, since accepting the pawn sacrifice would lead to more than enough compensation.

9...d6 [9...cxb4? 10.axb4 ♘xb4 11.♙a3! ♘bc6 12.♙d6± Black is completely tied up!]

10.bxc5 White has achieved some positional trumps by taking once towards to the center, forcing Black to take outwards. Also, the b-file will be an important factor in the game later on.

10...dxc5

11.♖e1! At first sight, a mysterious move, but actually, it is a very deep positional idea. Karjakin would like to settle his knight on d5 and he gets ready to take back with

exd5, after which the e5 pawn is hanging, thanks to ♖e1. Black can hardly carry the d5 knight if he does not take it.

11...♔h7 Black would like to get counterplay by playing f5, so he left the pin. [11...♙g4 just gives temporary activity. 12.h3 ♙xf3 13.♖xf3 ♘d4 14.♖d1 White just got the bishop pair and the d4 knight will be kicked out soon after ♘d5 and c3.]

12.♘d5 ♙e6 Black succeeded to get rid of the d5 knight, but another piece is replacing it there, which will also be very annoying. [12...♘xd5 13.exd5 and e5 is hanging.; 12...f5 is premature at the moment. 13.♘xe7 ♖xe7 14.exf5 gxf5 15.♙b2 White quickly puts very strong pressure on the e5 pawn. There is a direct threat with ♙d5, winning the e5 pawn.]

13.♘xe7 ♖xe7 14.♙d5! Whenever Black takes on d5, he will create a very strong protected passed pawn (after c4) for White.

14...♘d4 [14...♙xd5 15.exd5 ♘d4 16.c4± White takes on d4 next (or plays ♘d2, ♙b2-d4 as in the game) and the structure is seemingly similar, but actually, White has a large advantage because the d4 pawn is not a passed pawn.]

15.♘d2! Another strong positional move to save the knight for the future. White sees the following position in his eyes: he will play c4, ♙b2 and ♙xd4, when the knight dominates the g7 bishop. The game demonstrates this well.

15...♙xd5 [15...♖ad8 would be met by 16.c3 ♘c6 17.c4 ♘d4 18.♙b2± and ♙xd4 next, followed by queenside play. White forces Black to play b6, which is going to be countered by a minority attack with a4-a5.]

16.exd5 ♖ad8 17.c3 ♘b5 18.c4 ♘d4

19.a4! Another great move! Prophylaxis against Black's idea to push b5 and bxc4, when he will also obtain a protected passed pawn on d4. [19.♙b2 b5 20.♙xd4 cxd4 is what White cleverly prevented.]

19...♖d7 20.♖b1 Provoking the b6 move to make a5 more effective.

20...b6 21.♙b2 White has a very easy game from now on. All the moves on the queenside suggest themselves.

21...♖fe8 22.a5 ♖c7 [22...bxa5 would just help White, since it weakens the c5 pawn. 23.♘e4 ♖c8 24.♙a3±]

23. ♔a4 Focusing all the pieces on the queenside. Black cannot create any serious counterplay.

23...f5 24.axb6 axb6 25. ♟xd4 cxd4 White got what he wanted with the passed pawn on d5, the b6 weakness and the superior knight. He has various ways to increase the advantage. He could double his rooks on the b-file or prepare for an invasion on the a-file. Karjakin chooses the most direct way.

26. ♔c6 ♔xc6 27.dxc6 ♖c8 [27... ♖b8 was clearly a better defense for Black. White plays here again 28.f4! ♖ec8 (28... exf4 29. ♖xe8 ♖xe8 30. ♖xb6± c6 is too strong. The knight is coming too support it with b3.) 29.fxe5 ♖xc6 30. ♟f3 ♟f8 31. ♖a1± with a huge advantage for White.]

28. ♖xb6 ♖e6 29.f4! White wins the e5 pawn.

29...e4 The best chance to get rid of some material, as White has enough left to win the game. [29... ♖cxc6 30. ♖xc6 ♖xc6 31.fxe5+- followed by ♟f3 and d4 will also fall soon.]

30.dxe4 fxe4 31. ♖xe4 ♖exc6 32. ♖xc6 ♖xc6 33. ♖e7 Driving the rook to its most active place on d7, where it

disturbs the king and prevents all the Black ideas connected with the d-pawn as well.

33...♟g8 34. ♖d7 ♟f8 35. ♟e4 Provoking the advance of the d-pawn, when it becomes more vulnerable. White threatens to take on d4 at the moment, because he prevented ♟c5, and ♖xc4 does not work because of the mate after ♟f6 and ♖h7.

35...d3 36. ♔f2 ♟a3 Black already wants to take on c4, because ♟f6 is not mate anymore after ♔f8. White simply protects his pawn and is going to take it with the king.

37. ♖d4 ♔f7 [37... ♟b2 would be met by 38. ♖d8+ ♔g7 39.c5! ♟a3 40. ♖d5+- and ♔e3 next.]

38. ♔e3 ♟c1+ 39. ♟d2 and the second pawn is lost, which is already too much for Black.

39... ♟xd2+ 40. ♔xd2 ♖a6 41.c5 [Black resigned in view of 41.c5 ♖a2+ 42. ♔xd3 ♖xg2 43.c6 The black king is cut from the c-pawn. A great game by Karjakin! It is very hard to win such a clear-cut game on the highest level.]

1-0

(2) Anand,Viswanathan (2783) — Topalov,Veselin (2793) [B90]

Supreme Masters 2013 Sandnes NOR (3.5), 10.05.2013

[Csaba Balogh]

A huge theoretical battle between two of the greatest Najdorf players.

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 a6 6.♙e3 e5 7.♘b3 ♙e6 8.f3 Black has various different setups here and Topalov has big experience in almost all of them. Recently, he played some games with the 8...h5 line.

8...♙e7 9.♚d2 0–0 10.0–0–0 Just a few weeks ago, Topalov beat Caruana in the 10. ...a5 line, but this time he went for the most common continuation.

10...♘bd7 11.g4 b5

12.♖g1! This is a demonstration by the World Champion to the Najdorf players, showing which line they should go for. The main line is by far 12.g5, but the text move also has huge theory. Actually, this was introduced by Anand himself back in 2006 against Morozevich.

12...♘b6 [12...b4 is the other option for Black. 13.♘d5 ♙xd5 14.exd5 a5 15.g5 ♘h5 16.♙b1 a4 17.♘c1 with many games in the database, but it is considered to be slightly better for White. Here we can see the main idea behind the 12.♖g1 move, that the rook joins to the battle through g4!]

13.♘a5! At the moment, White is threatening with ♘c6 and also preparing for a nice positional pawn sacrifice.

13...♖c8 [13...♚c7 is the other move which leads to a very similar position to the one in our game. 14.g5 ♘h5 15.♘d5 ♙xd5 16.exd5 ♘xd5 17.♚xd5 ♚xa5 18.♙b1 White is aiming for this position in these lines. He has sacrificed a pawn, but the bishop pair gives huge compensation for that. He is intending to bring the rook to the game with ♖g4, which could be followed by, for instance, c4, or just ♙d3–e4. From a practical point of view, White has a much easier game here. 18...♚c7 19.♖g4 g6 20.♖b4!± White is ready to open the position with c4!]

14.g5 ♘h5 15.♙b1 ♘f4 Black threatens to push b4 now, as ♘d5 is prevented. White makes a simple prophylactic move against it. [Topalov deviates from the Anand-Karjakin 2009 game, which continued with 15...g6 Recently, there was a strong novelty by White—and probably Anand wanted to play this too. 16.a3! and we will probably transpose to the game.; It is important to mention that 15...b4 is met by 16.♘d5! ♘xd5 17.exd5 ♚xa5 18.dxe6 fxe6 19.♙h3± Black cannot protect the e6 pawn.]

16.a3! g6

17.h4! White protects the g5 pawn, which was not hanging at the moment, but White is preparing for the same pawn sacrifice that was seen in the 13...♔c7 line; there, at the end, is very important to have the g5 pawn protected.

17...♔c7 Black is making some useful moves. He wants to play ♖fd8 and is ready to push d5 then. White has to start the action.

18.♙xf4 exf4 19.♘d5! This is a standard method in this line to facilitate the c6 square for the knight. Black is forced to accept the sacrifice.

19...♙xd5 20.exd5 ♘xd5! 21.♔xd5 ♔xa5 [21...♔xc2+? is just a check. **22.♔a1** Another point of the 16.a3 move to have the back-rank open. Otherwise, ♔c1 mates.]

22.♖g4! And now comes the rook into the game. White wins back the pawn and the arising opposite-colored bishops position is better for him, as he can create a much more dangerous attack against the black king, while the one on b1 is very safe. Here we can also see the point of the h4 move — g5 is protected — otherwise, Black would simply win it after ♖c5. It is slightly strange what Topalov has prepared in this game, because all white ideas were already well-known so far and he got an advantage.

22...♖c5 23.♔b3 d5 Black decided to close the a2-g8 diagonal in order to reduce the pressure on the f7 pawn, but on the other hand, he creates a clear weakness for himself on d5. [23...♖f5 would have been met by 24.♙d3 and ♖xf4 next.]

24.♖xf4 ♔c7 25.♖fd4 ♔h2 Black would like to trade his d5 pawn for the one on h4, which would solve his problems. [25...♖d8 is met by 26.f4! with two unpleasant ideas. One is to destroy Black's pawn structure with f5 and the other is simply ♙g2, taking on d5.]

26.c3! Very nice, cold-blooded reaction by Anand. The idea can be seen in the next move.

26...♖d8

27. ♔c2! White brings back his queen to the game, using the fact that the endgame is horrible for Black.

27... ♖g3 [27... ♖xc2+ 28. ♔xc2 Black cannot prevent b4 followed by ♖xd5. After that, the a6-b5 would become the next targets, which are fixed on the bishop's color. 28...f6 29.f4±]

28.f4! Black was ready to play ♗f8-g7, so White had to hurry to improve his position. He wants to play ♗g2 now.

28... ♗d6 [28... ♖xh4 should have been played, although White has a clear plus here as well. The important thing is that after 29. ♗g2 Black can get rid of a pair of rooks, which seriously eases his defense. 29...♖c4! 30. ♗xd5 ♖xd4 31. ♖xd4±]

29. ♗g2 ♗xf4 30. ♗xd5± Both rooks are on the board and the f7 pawn is extremely vulnerable after the white bishop has occupied its ideal place. He immediately threatens to take it.

30... ♔g7 31. ♖e4! Anand protects his d5 bishop in order to free his rook to go to f1, pressing the f7 pawn.

31... ♖e3 Black obviously would like to exchange the queens, but White is not forced to agree... [31... ♗e5 loses to 32. ♖f1! ♗xd4 33. ♖xd4+ and mate to follow.]

32. ♖h1! A spectacular move! The threat is ♖f1 or ♖f1.

32... ♖d7 Topalov tries to guide the weakness, but it does not help anymore.

33. ♖1d3? This gives chances for salvation. [33. ♖f1! was the right move. 33... ♗e5 Covering the f6 square, but it blocks the queen's route back to the e-file. White wins. (33... ♖cxd5 does not work. 34. ♖xd5 ♖xd5 35. ♖xd5 ♖e4+ 36. ♖d3+-) 34. ♖4d3! ♖f4 There is no other square to go... 35. ♖f3!+-]

33... ♖e5? Spoiling the sudden chance. [33... ♖f2! is not easy, suddenly. The point is that after 34. ♖f3 ♖xd4! 35.cxd4 ♖c1+ 36. ♖xc1 ♗xc1 Black escapes into only a slightly worse endgame. 37. ♗c6 ♖c7 38.d5 ♗d2]

34. ♖f3 ♗h2

35. ♗e6! A very nice winning move, although it was not the only one. [The simple 35. ♗b3 was also enough. 35... ♖e7 36. ♖e3! ♖xe3 37. ♖f6+ ♔g8 38. ♖d8+ ♖e8 White can play for the spectators with 39. ♖xf7+ ♔h8 40. ♖g8+ ♖xg8 41. ♖xg8#]

35... ♖e7 [35... ♖xd4 36. ♖xf7++-]

36. ♖e4! White wins the queen, because it cannot leave the f6 square.

36... ♖xe6 37. ♖xe5 ♖cxe5 The rest is a matter of technique, but of course, for the World Champion, it is not a difficult task.

38. ♖d8 Threatening ♔a8.

38... ♖e4 39. ♔a2 Just to avoid all the checks. White has time for everything.

39... ♗f4 40. ♖d7 ♔g8 41. ♖a7 Creating a new threat of ♖xa6, Black resigned the hopeless position.

1–0

(3) Hammer, Jon Ludvig (2608) – Wang, Hao (2743) [E60]

Supreme Masters 2013 Sandnes NOR (5.5), 13.05.2013

[Arkadij Naiditsch]

The first win of Hammer at the tournament, and in what a fantastic fighting game! It is clear that Wang, with +140 ELO points above his opponent, tried to complicate things as much as he could, but lost the battle in a very complex position.

1.d4 ♘f6 2.c4 g6 After these two moves, we still do not know whether the game is going to be a KID or a Gruenfeld.

3.f3 Lately, White started to choose this move order to avoid the main Gruenfeld.

3... ♗g7 [3...d5 4.cxd5 ♘xd5 5.e4 ♘b6 6.♘c3 ♗g7 7.♗e3 is, of course, the other main line.]

4.e4 d6 and we are in the KID.

5.♘e2!? Hammer quickly forces things away from the theory. This slightly strange-looking move is actually

quite logical. White wants to play ♘ec3-♙e3-♘d2 in order to get a very strong center.

5...a6!? Quite a creative move from Wang. Black is not trying to act in the center by playing c5 — or maybe at some good moment e5, but preparing the c6-b5 idea.

6.♘ec3 c6 7.♘a3 To me, it looks a bit „too creative“. [7.♙e3 b5 8.♘d2 looks more solid for White.; 7.a4?! would be a typical inaccuracy here. 7...a5! and Black would continue with ♘a6 winning control of the dark squares.]

7...b5 8.♘c2 0-0 9.♙e3 ♘bd7 All the standard moves are done. Now it is time to think about a future plan.

10.cxb5 After this move, Black should be doing fine. [But, what else to play for White?! In case of 10.♙e2 bxc4 11.♙xc4 d5 Black is fine as well.]

10...axb5 11.♙e2 ♙b7 To develop our pieces is never wrong.

12.0-0

12...e5! I think this was a good positional decision by Black in a very complex position with a lot of different ideas. He realizes that he needs to attack the white center

and not allow his opponent to play ♙d2, ♖ad1, a3, after which, White's advantage would grow.

13.♙d2 exd4 14.♙xd4 We have a typical position for the KID structures. A lot of motives are based on tactical possibilities. Black usually looks for active play while White tries to keep things together. Objectively, I think this position should be good for Black.

14...♙e7 Queen to e7, rook to d8, very logical. Another usual place for the black queen is c7, but now it would be not optimal because of ♖ac1 and the queen could get quickly under attack.

15.a3 A risky move. Now the black knight gets the b3 square. [15.♖fd1 would have been more solid.]

15...♘c5 16.♖ad1 A tactical defense against ♘b3.

16...♖fd8 Very solid [Maybe this pawn sacrifice would be possible as well. 16...♘b3 17.♙xf6 ♙xf6 18.♙xd6 ♙xd6 19.♖xd6 ♙e5 Black is a pawn down, but the dark-squared bishop is a monster piece that clearly gives very good compensation.]

17.♙f2 ♘e6?! A slightly strange decision. Probably Wang did not want to exchange pieces and tried to keep the position as complicated as possible. [17...d5! If Black can play d5, he should definitely do it! In my opinion, Black is already slightly better here.]

18.♙h4! A good place for the white bishop. No more ♘h5 or d5 because of the pin, and a move like g5 is clearly not an option for Black.

18...♖d7 19.♙c1 ♙e8 Black is moving his pieces away from the nasty pin.

20. ♖fe1 ♘h5 21. ♙f1 White consolidates in the center as well. The position remains very complex.

21... ♙e5 I think Wang asks too much from his position and provokes White into something that he might regret. [21... ♖f8 would be a possible solid way to go on.]

22. g3! It might be that Wang blundered this very strong reply by White. The idea of playing f4-f5 next can be very dangerous for Black.

22... f6 The beginning of some crazy complications.

23. f4 Hammer has no fear at all and he is right! White's play is stronger here.

23... g5 Nothing else left for Black to do.

24. fxe5 gxf4 25. exd6? Quite a serious mistake. [25. ♖h6! White should have continued in a dynamic way. 25... fxe5 Probably Black got a better option, but here White's idea becomes more visible. 26. ♙h3! and Black would have troubles to get his pieces together.]

25... hxg3 Now the white king gets seriously weakened.

26. hxg3 ♖g7 Suddenly, White is under big pressure, but the position remains very complicated.

27. ♘e2! Good defense by Hammer. He needs to exchange at least a couple of pieces to reduce the power of Black's attack.

27... ♘xg3 28. ♘xg3 ♖xg3+ 29. ♔f2 ♖g7 We are in front of a very funny position. Who is better here? It is hard to say. At first sight, White's king is very badly placed on f2, but on the other hand, if White manages to play ♙d3-♖g1, suddenly, the black king would be in trouble. White's idea ♘e3-♘f5 next might be very dangerous as well. Black needs to react very quickly.

30. ♘e3 The white knight is on a roll.

30... ♔h5 31. ♘f5 It is funny to see how just one knight holds White's position together.

31... ♖g5? In a very complex position, Black gives his opponent a „break“ to consolidate. [First 31... ♔h2+ to force the white king to a bad square on e3. 32. ♙e3 ♖g5 and only now ♖g5 would give Black a very dangerous attack.]

32. ♖e3! Now the White king is escaping to e1!

32... ♔h2+ 33. ♔e1 Suddenly, Black has no more threats against the white king, and the d6 pawn is getting super strong.

33...♘f4 34.d7 [White could have finished the game on the spot by playing 34.♖d2! first hitting away the black queen from h2, which will also disturb Black's ♖g1. 34...♙g1 and only now 35.♙c3 The f6-pawn is going to fall and, with it, the whole black position.]

34...♖d8 35.♙c3 Of course, ♙c3 is strong here as well. It is clear now that White is doing much better.

35...♖g1 Threatening ♘g2.

36.♖g3+ White is exchanging one of the few active pieces Black has.

36...♖xg3 37.♘g3?! Hammer asks for too much now. [37.♙xg3+ would also lead to a much better endgame for White.]

37...♙h4! The game is getting tricky again. White's knight cannot reach his best square on f5 because of the nasty pin.

38.♙f2 ♙f7? [I would like to know what did White want to play against 38...♙h2+ 39.♙f3 ♘h5 and it seems like Black is back in the game.]

39.b4 It is always good to fix Black's pawn structure, but the ♙h2 idea is still there.

39...♘e6? The wrong direction. [39...♙h2+ with an unclear position.]

40.♙f3! With the 40th move, White fixes his advantage! And it is already quite a big one. The bishop on b7 is really a dead piece and the d7 pawn is superdangerous — it can always be protected with ♗h3 in the future.

40...♘g5? It was the last chance for Black to complicate things by playing 40...c5!.

41.♙f5 Now White completely dominates the position. ♗g2-♖h1 is a deadly threat.

41...♘e6 Black tries to react to White's threat, but the bishop is coming to h3 now.

42.♗h3 ♙f4+ 43.♙xf4 ♘xf4 44.♗f5 We can clearly see that there is no escape for Black.

44...♙e7 45.♖h1! The simplest! Black is playing a „bish-op“ down.

45...♖h8 46.♙e3 The last precise move.

46...♘e6 47.♗xe6 ♙xe6 48.♖xh7 A small tactic.

48...♖d8 49.♘h5 and it is over. What a great fighting game!

1–0

(4) Aronian,L (2813) – Hammer,J (2608) [D85]

Supreme Masters 2013 Sandnes NOR (6), 14.05.2013

[Arkadij Naiditsch]

A great game on the topic: „If you don't remember the lines, don't even try to play the Gruenfeld!" In a more or less well-known position, Hammer gets lost and tries to play by himself. A big mistake! The Gruenfeld is one of the most attractive openings for Black right now, but it requires very good memory and precision. Things can go wrong very quickly, as the next moves show.

1.d4 ♘f6 **2.c4** g6 **3.♗c3** d5 The very main Gruenfeld.

4.♘f3 ♕g7 **5.cxd5** ♘xd5 **6.e4** ♘xc3 **7.bxc3** c5 **8.♖b1**

At the moment, **8.♖b1** is one of the most popular moves. The idea of this move is simple, to be ready to answer with d5 against Black's ♘c6. On the other hand, Black has been showing great results here and it would be really very interesting to know what Aronian had prepared here, that is still not known to theory.

8...0-0 **9.♕e2** cxd4 This move starts a very forced line. [9...b6 deserves attention here as well. A lot of free time is also needed to memorize all the long lines!]

10.cxd4 ♔a5+ This is the key idea. Black is simply winning a pawn, but losing two very important tempos in exchange.

11.♕d2 [Of course, White should not try to protect the a-pawn by exchanging his queens. **11.♔d2?! ♔xd2+** **12.♕xd2** b6 and as the well-known rule goes, „in a Gruenfeld, if Black reaches an endgame, a full point is closer than ever" :).]

11...♔xa2 **12.0-0**

12...♕g4 The main move for Black. His idea is simple, to attack the white center and combine this with a quick advancement of the a-pawn, which might become dangerous very quickly. As for White, of course, to make use of the strong central pawns which always give some attacking chances in the future. However, as I said before, the position is very forced.

13.♖xb7 This logical move was not played very often. [13.♕g5 h6 **14.♕e3** ♘c6 is sort of the main line here.]

13...♘c6? This logical move, which, in most of the cases, is the correct one, is simply a big mistake! [13...♕xf3 **14.♕xf3** ♕xd4 is the main move here, with an evaluation of equality. It would be great to see what kind of new hammer Aronian had prepared here. The number 2 in the world is very well-known astonishing preparation.]

14.d5! The punishment comes immediately. This very logical move is just winning the e7 pawn.

14...♕xf3 **15.♕xf3** ♘d4 **16.♖xe7** White is a clear pawn up, but things are still not that easy. Black still has quite

a few drawing chances due to the strong a-pawn, which can become very fast and difficult to stop.

16...a5! The last Black joker, and a very strong one.

17.d6 I am not sure whether this is the easiest way to go for White or not. [The simple 17. ♖e3 ♘xf3+ 18. ♔xf3 — without destroying the structure — 18...a4 19.e5 and I think White has quite a solid advantage.]

17...a4 Black's only hope moved one more square up.

18.e5 It is logical for White to try to close the bishop on g7, but only if he is on time to stop the a-pawn and keep the pawn on e5 alive. We will see this during the next moves.

18...♘xf3+ 19.gxf3 Now Black can also hope for some kind of perpetual check.

19...♔b2 20. ♖e3! Very strong move by Aronian.

20...a3 [It looks very tempting for Black to take on e5. 20...♙xe5 White has a nice trick against this. 21. ♔d5 ♙g7 22. ♖xf7! and the rook on a8 is hanging. 22...♖xf7 23. ♔xa8+ ♙f8 24. ♖d1 Also, it is very important, of course, to keep the d6 pawn alive — the d7 threat is just deadly. 24...a3 25.d7+-]

21. ♔d5

21...♖ae8? and Black panics again, and this will be the last time. [Of course 21...a2? is just losing to the already known idea 22. ♖xf7+-; But 21...♖ab8 would keep Black in the game. Of course, White is doing better, but the position is still not that simple as it might look like. 22.f4 Black wanted to play ♖b5. 22...♖b5 23. ♔c4 Now the pawn on e5 is not hanging. 23...♖b4 24. ♔a6 ♔b3 and it is not that easy for White to improve his position.]

22. ♖xe8 Simple and good.

22...♖xe8 23.d7 and White's d-pawn is faster than Black's soldier on the a-file.

23...♖d8 24. ♙g5 A fast process by the number 2 in the world against Mr. Hammer, whose preparatio n did not hammer at all :).

1-0

Endgame section

(15) Vachier Lagrave, M (2718) – Balogh, Cs (2644)

European Championship, 11.05.2013

[Chess Evolution]

I managed to get an endgame with an extra pawn, but to convert it should be extremely difficult because of the limited material left on the board. Black can only create a passed pawn with the e5 break, but it leads to further exchanges.

48. ♖xh5 White trades the rooks, as he does not see how can Black break through. Although it is going to be much more difficult for him to defend as it looks, at first sight... In my opinion, if White keeps the rooks on the board, that should hold as well, but of course, Black can try for very long by going with the king to the queenside.

48...♔xh5 49.b3 A principled move to put the pawn on a light square, where the Black bishop cannot attack it.

49...♔g4 50.♙d2 ♕f3 51.♙e1 Black's only chance to win the game is to get behind the b3 pawn. It looks impossible to get there, but things are not so easy.

51...♔g2 The king is heading to the e1 square, but of course, it will not be easy to get the bishop out from the diagonal.

52. ♙d2 ♕f2 53.♙b4 a6 I also put my pawn on a light square to avoid getting attacked later on. [There was a nice trick, for example, after 53...♔f1 White cannot trap the bishop with 54. ♙c5 with the idea of paralyzing Black, because of 54...e5! 55. ♙xb6 e4+! This intermediate check wins the game. 56.♔e3 axb6-+]]

54. ♙d2 ♙c7 Black does not need to hurry to make progress, since White can only pass with his bishop...

55. ♙c3 ♙f4 56. ♙b4

56...♔f1! Getting ready to drive the bishop to e1 to send it away from the e1–a5 diagonal.

57. ♙c3 ♙g5 58. ♙b4 ♙h4 59. ♙a5 ♙e1 60. ♙d8 White transfers his bishop to the h4–e1 diagonal this time, but this is one square shorter than e1–a5, and it is enough for Black to get him into zugzwang!

60...♙b4 61.♙h4 ♙a3 62.♔d2! Good prophylaxis against the ♙c1 threat. [62.♙g3 would have been met by 62...♙c1 63.♙h4 ♙f4! and White is in zugzwang. If the king moves, ♙e2 comes closer, while on any bishop move, ♙e1 is possible.]

62...♙d6 63.♔e3 ♙h2 White is in zugzwang. He must allow for Black to play ♙e1!

64.♙g5 [64.♔d3 ♙f4 and ♙e1 next.; 64.♔d2 ♙f4+ 65.♔d3 ♙h6 and again, ♙e1 next.]

64...♔e1 65.♔d3

65...♔d1 I got closer to my aim of getting my king to b2, but this time I need to send away the bishop from the c1–h6 diagonal. It can only be done if I transfer my bishop to c1.

66.♙d2 ♙d6 67.♙g5 ♙a3

68.♔c3!! Brilliant defense by my opponent! Only this hidden idea saves White from losing! [If White continues waiting, then 68.♙f4 ♙c1 69.♙d6 ♙d2 70.♙c5 ♙e1! This is the key and it wins for Black. ♔c1 is threatened now, because after ♙a3, Black has ♙b1. White is forced to play 71.♙a3 but Black can create a zugzwang with a triangulation! 71...♙f2 72.♔c3 ♙g3 73.♔d3 (73.♙b2 loses to 73...e5!–+ and e4 next, as the pawn cannot be taken.) 73...♙e1 Here we are! Only the bishop can move now. 74.♙b2 (74.♙d6 ♙c1–+ wins.) 74...♙b4 and here is another zugzwang. Black wins. 75.♙a1 ♔c1–+]

68...a5 I was very unhappy to make this move, putting by pawn on a dark square, but I could not make progress. [The point of the 68.♔c3 move is that after 68...♙c1 White has 69.♙xc1!! ♔xc1]

70.b4! and the pawn endgame is drawn. White holds the draw by keep the opposition with the king. 70... ♔b1 71.♔b3 ♔a1 72.♔a3 ♔b1 73.♔b3 ♔c1 74.♔c3 ♔d1 75.♔d3 ♔e1 76.♔e3 ♔f1 77.♔f3 ♔g1 78.♔g3 ♔h1 79.♔h3= Wherever the king goes, White just follows him.; 68...♔e2 would have been another way to progress, but this time White can trap the bishop by 69.b4! The only move to rescue it from the threat of ♔b3 is 69...♔d1 but now 70.♔b3 ♔c1 71.♔xc1 ♔xc1 72.♔c3= and we have the same draw.]

69.♔d3 ♔c1 With the pawn on a5, I already cannot win the game, as White has a target there.

70.♔d8 ♔d2 71.♔e7! Another only move to have ♔a3 check on ♔c1.

71...♔c1 72.♔a3+ ♔d1 73.♔e7 ♔b4 [73...♔e1 The triangulation does not help anymore. 74.♔g5 ♔g3 75.♔d8 White can force the bishop back to e1...]

74.♔g5 I had to admit that my opponent defended perfectly and agreed to a draw.

(16) Khalifman,A (2614) – Meier,Geo (2655) [A16]

14th Euro Indiv 2013 Legnica POL (4.16), 08.05.2013

[Chess Evolution]

At first sight, this position seems to be winning. In such cases, many GMs use to say that, „somehow“, it should be winning. But in fact, it is a draw! Black's main idea is simple, to give away the bishop for the c-pawn and arrive in time with the king to a8. Let us take a look at how Georg Meier defended with Black.

52.♔xa5 ♔d7 Logical and good. The black king belongs to the squares c6-b7-a6.

53.♔b6 ♔c6 54.a5 If White would not play a5, Black would just keep the king on c6.

54...♔b7 The only way. White wants to play ♔e3 with the threat of playing a6 next.

55.♔e4 ♔a6 56.♔d5 Now the game is about equal if White can push the c4 pawn to c6 somehow.

56...♔b4 57.♔c6 ♔d2 58.♔d8 [Of course 58.c5? leads to an immediate draw. 58...♔b4 59.♔d5 ♔xc5=]

58...♔e1 59.♔d7

59...♗b4! Good defense by Black! By no means, he should allow White to play c5.

60.♖c7 ♜c5! Again, the right choice, preparing to cover the c5 square from the diagonal a7-g1.

61.♗d6 ♜e3 62.♗b4 [62.♖c7 ♜c5 This just brings us back to the main position.]

62...♔b7 No reason now to allow the White king on c6. It seems like there is no breakthrough, or is there?!

63.♔d6 ♜f2 64.♔d5 ♜e3 65.♜c3 ♜f2 Black just keeps on waiting.

66.♜f6 Khalifman finds nothing better than to bring the bishop back to b6.

66...♜e1! Meier keeps playing the exact moves! Black's bishops' best position is on b4!

67.♜d8 ♜b4 68.♜b6 ♜e7 Strangely enough, Meier changes his defense. [68...♔a6 would be, of course, possible as well, and we would go back to the beginning of the game.]

69.♜c5 but also here, White cannot do any significant improvement.

69...♜g5 70.♜d4 ♜d2 71.♜b6 ♜b4 and the bishop is back on b4.

72.♜d8 ♜a3 73.♔e6 ♜b4

74.a6+! After moving around for a long time, White tries his last chance.

74...♔xa6 75.♜e7 Finally, White gets rid of the black bishop from b4 and advances the c-pawn, however, the a-pawn is gone, so the position is still a draw. What happened now is just unbelievable! Meier simply resigns after defending so well for over 20 moves! What a shock for both players! The position is a draw, and actually, a draw that is not that hard to find. 75...♜a5 76.c5 ♔b5 77.♔d7 ♔c4! 78.c6 ♔d5! This is the trick, Black needs the king on

d5 and not on b5. The idea is that if White gets the bishop to c7, Black would be forced to go to the b8-g1 diagonal, and then White will have no chance to transport the bishop to d6 because the black king will be placed on d5! What a tragic loss for Georg Meier.

1-0

Clash of the Titans

(17) Lilienthal, Andor — Capablanca, Jose Raul [E24]

Hastings 3435 Hastings (5), 01.01.1935

[Kamil Miton]

1.d4 ♘f6 **2.c4** e6 **3.♗c3** ♖b4 **4.a3** ♕xc3+ **5.bxc3** b6
A typical plan to create pressure against the weak c4 pawn.

6.f3 d5

7.♕g5 I am not sure if this is the right decision. White could play [7.cxd5 exd5 8.e3 0-0 9.♕d3 c5 10.♘e2 ♕a6 11.♕xa6 ♘xa6 12.0-0 leads to other kind of structure. The main plan for White is to push e4 after ♘g3 — ♕b2 (or sometimes, the bishop on f2 is well placed as well), but in general, it is not an easy task because Black can look for counterplay over the e-file with his heavy pieces. Besides, h5–h4 is an idea to kick the knight out from g3. I recommend you to look at one of the most famous classical games Botvinnik — Capablanca.]

7...h6 **8.♕h4** ♕a6 **9.e4?** To look for active play with two bishops seems to be logical, but it was too optimistic. White should play [9.cxd5 exd5 10.e3 ♕xf1 11.♖xf1 ♘bd7 12.♘e2 0-0 13.g4 ♖e8 14.♕f2 c5 15.♖g2 and White is better.]

9...♕xc4? Capablanca took the wrong pawn. He could have played [9...dxe4 10.fxe4 (10.♘h3 ♘bd7 11.♘f2 g5 12.♕g3 e3)]

10...g5! Black is winning the pawn and White will not be able to get the initiative because of his inferior development. 11.♕g3 (11.e5 gxf4 12.♖f3 ♘bd7 13.exf6 c5) 11... ♘xe4 12.♕e5 f6 13.♖h5+ ♖d7 14.♕d3 ♕b7]

10.♕xc4 dxc4 **11.♖a4+ ♖d7** [11...♘bd7 12.♖xc4 (12.e5 g5) 12...c5 13.♘e2 0-0 (13...cxd4 14.cxd4 ♖c8 15.♖b4; 13...♖c7 14.0-0 0-0 15.a4 ♖b7 16.♖fd1 Thanks to his better center, White has a typical slightly better position.) 14.e5!? At this moment, this idea is interesting, because White can try to create an attack against the king. 14...g5 15.♕f2 ♘d5 16.h4! ♖c8 17.♖d3↑]

12.♖xc4 ♖c6 **13.♖d3** Of course, White keeps the queen on the board as he will need it to support the initiative on the kingside. [13.♖xc6+ ♘xc6 14.♕e2!? With the idea

not to allow the black knight to take the good c4 square. (14.♘e2 ♘a5) 14...♘a5 15.♔d3 c5 16.♘e2 0-0]

13...♘bd7 14.♘e2 ♖d8 Capablanca ut the rook here in order to have some tricks with ♘e5, but the rook on d8 has disadvantages as well: White will have some threats with e5 later.

15.0-0

15...a5 Strange decision. This move weakens the position and loses time. Maybe the Cuban player was afraid of some ♖a6 idea, but we will see below that it is not dangerous. [15...0-0 The most logical. 16.♖a6 ♘b8! 17.♖xa7 ♖c4 18.♙xf6 ♖d7 and the white queen is in a trap.; 15...♘e5 The idea of gaining control over the c4 square does not work because of 16.♖c2 ♘c4 and now 17.d5! exd5 18.♘d4 with a decisive attack.]

16.♖c2 [16.c4 e5 (16...♘e5 17.♖c3 ♘xc4 18.♖fc1 b5 19.a4±) 17.d5 ♖c5+ 18.♙f2 ♖e7 19.♘c3 ♘c5 20.♖c2 0-0 21.♖ab1 ♘fd7 22.♘a4 Black is not able to create a blockade on the queenside. White is going to play ♖b5 next and push c5 later, which should give him good play.]

16...♖c4 17.f4 ♖c8 because of the e5 threat.

18.f5 e5 Logical. Black is trying to close the position to avoid falling under pressure. Castling was very risky, let us see why it is so. [18...0-0 19.e5 ♘d5 20.f6 Black's position looks very dangerous because all the white pieces are well placed to attack the king. 20...gxf6 Only move. (20...g5 21.♙xg5 hxg5 22.♖f3 ♖fd8 23.♖h3 ♘f8 24.♖h5 ♘g6 25.♖xg5 ♘f8 26.♖xg6 fxg6 27.♖xg6 ♖d7 28.♖h5 ♘g8 29.♖f1+; 20...g6 21.♖f3 ♘h7 22.♖h3 ♖h8 23.♙g5 ♘g8 24.♙xh6 c5 25.♖f1 cxd4 and now comes the nice

26.♖xg6+ fxg6 27.f7+ ♘h7 28.♙f8#; 20...♘e3 21.♖d2 ♘xf1 22.♖xf1 c5 23.fxg7 ♘xg7 24.♙g5 with a decisive attack.) 21.♙xf6 (21.exf6; 21.♖d2 ♘h7; 21.♖f3 fxe5 22.♖g3+ ♘h8 23.♖d2 ♘h7 24.♖h3 ♖g8 25.♙g5 ♖g6 26.♙xh6 ♘g8 Now the king is safe, Black takes the initiative.) 21...N7xf6 22.exf6 ♘h8! with the defensive idea ♖g8-♖g6. Black is on time! The position is unclear.]

19.dxe5 [19.♙xf6 ♘xf6 (19...gxf6 looks unclear as well.) 20.dxe5 ♖xe4 (20...♖c5+ 21.♘d4 ♖xe5 22.♖a4+ ♘f8 23.♖ae1 and soon after ♘f3, White will push e5 and crush his opponent.) 21.♖xe4 ♘xe4 22.♖f4 ♘c5 23.♘d4 0-0 Black does not have any serious weakness, so the position should be fine.]

19...♔xe4?? A huge mistake by Capablanca. He overlooked the nice tactical idea [19...♘xe5 20.♙xf6 gxf6 21.♘f4 Now the only chance for White is to create pressure against the f6 pawn. Otherwise, Black will be just better. 21...♔c5+ (21...c6 22.♔f2 Attacking the b6 pawn and preparing ♔h4-♘h5. 22...♔c5 23.♔xc5 bxc5 24.♖ab1 White is better here. Black cannot put the king on e7 because of the check on b7.) 22.♙h1 ♖d8 23.♘d5 c6 24.♘xf6+ ♔e7 25.♘h5 ♖d3 with good counterplay.]

20.exf6!! Fantastic! Now White is winning. All the pieces come with tempo to the final attack!

20...♔xc2 21.fxfg7 ♖g8 22.♘d4 ♔e4 23.♖ae1 ♘c5 24.♖xe4+ ♘xe4 25.♖e1 ♖xg7 26.♖xe4+ 1-0

Editorial Preface

The chess super tournament marathon never seems to end.

We just saw Moiseenko become European Champion and already, a few days later, Karjakin became the deserved winner of the Super Tournament in Norway with 6/9, in front of Carlsen and Nakamura, both with 5.5/9.

And now, another FIDE Grand Prix has begun with an amazing line up and an average ELO of over 2750! It is taking place, surprisingly, in Greece.

After the first 4 rounds there are seven leaders with a score of +1 in a very hard fought struggle. Vassily Ivanchuk is having trouble in the event.

This week, we analyze the Top games from the past events with a couple of interesting endgames!

As usual, we wish you great chess joy with the CEWN Nr 65.

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Nepomniachtchi, Ian (2710) — Moiseenko, Alexander (2698) [B30]

14th Euro Indiv 2013 Legnica POL (11.1), 16.05.2013

[Arkadij Naiditsch]

It is the last round of the European Championship. Moiseenko is a full point ahead of Nepomniachtchi, so White has to win the game at least to share first place. As we already know, even after losing this game, Moiseenko became European Champion. So let us take a closer look at how White slowly outplayed his opponent and finally got a convincing and deserved full point.

1.e4 c5 Not the safest opening choice to play for a draw...

2.♘f3 ♘c6 3.♙b5 Ian is a very creative player and to guess his opening choices is almost impossible.

3...e6 4.♙xc6 bxc6 We are in a very popular line. In the match Anand-Gelfand, this position happened 3 times, and Radjabov has always been a big fan of this line with Black, and even managed to get very close to winning his game with Black against Magnus Carlsen in Wijk aan Zee 2013.

5.b3 Not the main line, but a very tricky one. [5.0–0 would be the main line here.]

5...♞e7 This is the main answer for Black. The idea is simple, White will put his bishop on b2 and Black will put the knight on g6, followed by d6–e5 in the best case, which would leave him with a great position.

6.♙b2 f6 To block the bishop on b2 is very important. White needs to act very fast now, or Black will simply be better!

7.♞h4!? Very creative play. The idea of White is to play a fast f4.

7...e5 [Maybe 7...d5 would have been the right answer for Black now, but it is hard not to play 7...e5.]

8.f4! White's idea comes true.

8...d6 [Of course to take with 8...exf4? is not possible because of 9.♙xf6!]

9.0–0 ♙e6 Moiseenko is trying to hold his center together.

10.fxe5 Black faces a critical moment.

10...dxe5 is the safest of the two possible moves, but now White gets a nice and stable advantage. [10...fxe5 would clearly be the critical move. 11.♘a3 The white knight is going to c4. 11...g6 12.♘c4 ♕g7 and, of course, the black king is badly placed on e8, but all the rest of black pieces are standing very solidly in the center. It is hard to say if White has any serious advantage here.]

11.♔h1 A prophylactic move. Of course, 11.♘a3 was possible as well.

11...♔d7 12.d3 White is fixing his opponent's horrible pawn structure.

12...♘c8 Quite a passive move again. [Maybe it would bring better chances to play 12...♘g6 13.♘f5 ♘f4 and White is doing better, but the position at least would have some dynamism.]

13.♘c3 The white knight is going to a4, followed by ♕a3 and the c5 pawn might fall very easily.

13...♕e7 14.♔h5+ Locking the black bishop on f7 first.

14...♕f7 15.♔f3 and only now ♔f3, winning sort of half a tempo.

15...0-0 16.♘f5 and we can say that White managed to do what he wanted. By taking away the bishop from e7, the black pawn on c5 is going to fall for sure.

16...♘d6 17.♘xe7+ ♔xe7 18.♘a4 ♘b5 19.♔f2 Black is losing the pawn.

19...c4 It is hard to give Black a better advice, as the position is already critical. [Of course it does not help to play 19...♘d4 20.♕a3]

20.dxc4 ♘c7

21.♕c1! Nice positional move by White. The bishop on e3 will be perfectly placed and there is no hurry to rush the things anymore.

21...♘e6 22.♕e3 ♔fd8 23.♔ad1 White should not avoid the exchanges over the d-file. The endgame position would be close to winning.

23...♕g6 Black is hoping to get some small counterplay on the e4 pawn.

24.♕c5 Another good idea by White. Before playing ♘c3, White is making sure that the black queen will get to b4.

24...♔e8 25.♘c3 Everything is protected, and White wants to start pushing his pawn on the queenside.

25...♔xd1 26.♔xd1 ♔d8 27.♔xd8 ♔xd8 28.♕e3 Both rooks were exchanged on the d-file, so the bishop can come back to e3. This does not allow Black to play ♘g5 next, which would give some drawing chances because of the opposite-colored bishops.

28...a6 29.h3 h6 Some positional moves were done, and now it is time for White to find a clear plan.

30.♔e2 To bring the queen to d3 is clearly not a bad plan.

30...♔a5 [An endgame like 30...♔f7 31.♔d3 ♔xd3 32.cxd3 should be just lost for Black.]

31.♔d3 ♔h7 32.♔h2 White is checking what Black wants to do next.

32...♔b4 33.♔g3 ♔a5 Black just keeps on waiting.

34.♔f2! A nice idea! White is transporting his king to the queenside before starting the final action.

34...♔b4 35.♔e2 ♔a5 36.♔d1 ♔b4 37.♔c1 ♔a3+ 38.♔b1 ♔a5 39.♔b2 Black just kept on waiting, so White managed to put his king on b2, a very nice and safe place.

39...♔f4? A big mistake that could lead to an immediate resignation.

40.♔d2? White is missing a win on the 40th move. [40.♔d6! would finish the game on the spot. 40...♔xg2 41.♔f2 Black has no defense against White's b4, winning a full queen!]

40...♔c7 and the fight continues.

41.c5! A good positional move. Now, of course, ♔d6 is a killing threat. White always has in mind to play ♔a3-♔b4-♔a5 after the queens exchange.

41...♔e6 42.♔d3 There is no hurry with ♔d6. Black has no counterplay at all.

42...♔c8 43.♔a4 Another good move. White is bringing the last piece into action, and now wants to maybe play ♔b6-♔c4-♔d6.

43...♔f4 Black tries, but nothing helps anymore...

44.♔xf4 exf4 45.♔c3! White is playing very accurately. The knight on c3 will defend the white king and the threat is to play ♔d6.

45...a5 46.♔d6 f3 Of course, the position is lost, but at least Black will get a passed h-pawn.

47.gxf3 ♔xh3 48.♔xc6 ♔xf3 49.♔d7 I think we can see very clearly that White's c-pawn is much faster than Black's.

49...♔h5 50.c6 ♔g4 51.♔d5 A nice little trick. Of course, this was not really needed :).

51...h5 [51...♔xd7 52.cxd7 and Black cannot stop White's d-pawn.]

52.♔f7 h4 53.c7 The c-pawn is a queen!

53...♔f2

54.c8 ♔ The simplest.

54...♙xc8 55.♔h5+ ♕g8 56.♔e8+ ♕h7 57.♔xc8
White is totally winning. Of course, it was time to resign here, but Black keeps on playing...

57...f5 Well, it is hard to call it a try. White is winning on any move in, at least, 3-4 lines.

58.exf5 h3 59.f6 The most dynamic.

59...h2 60.♔h3+ ♕g8 61.♔g4 Threatening a mate on g7.

61...♔g1 62.♔e6+ ♕h7 63.f7 and White's f-pawn becomes a queen.

63...h1 ♔ 64.f8 ♔ ♔c1+ 65.♔c3 A slightly funny position with 4 queens on the board, but White is totally winning. Black has nothing more than 3-4 checks. The white queens and the monster knight on d5 protecting the king extremely well.

65...♔a1+ 66.♔c4 ♔h4+ 67.♔b5 Black does what he should have done around 10 moves ago - to resign. A really good game by Napomniachtchi, with great positional understanding and great tactical skills at the right moment!

1-0

(2) Hammer,J (2608) — Nakamura,Hi (2775) [D31]

Supreme Masters 2013 Sandnes NOR (9.5), 18.05.2013
[Csaba Balogh]

Nakamura has an excellent style to beat the weaker players with the black pieces. Let us see how he does it... We must admit that Hammer was trying to push in all his games (he did not play for draw), which makes it easier to outplay the opponent.

1.d4 d5 2.c4 e6 3.♘f3 c6 4.♘c3 dxc4 Black is aiming for an asymmetrical pawn structure, where it is easier to break the balance.

5.e3 b5 6.a4 ♙b4 The start of the very sharp Noteboom variation.

7.♙d2 a5 8.axb5 ♙xc3 9.♙xc3 cxb5 10.b3! ♙b7 11.bxc4 b4 12.♙b2

12...♘f6 We are still at just the beginning of the opening theory with over thousand games in the database. Let us take a quick look at what happened so far. White has recovered the sacrificed pawn, but Black has obtained two dangerous connected passed pawns on the a- and b-files, and also gained the e4 square for one of his minor pieces.

On the other hand, White has the bishop pair and a very strong center, and if it gets mobilized, it will become at least as dangerous as the black queenside pawns.

13. ♖d3 0-0 14. 0-0 ♘bd7 15. ♘d2 White is intending to occupy the center by f4 and e4 and also takes control over the e4 square to avoid ♘e4 or ♙e4. [15. ♖e1 is the most common move.; 15. ♙c2 and; 15. c5 are also huge theoretical lines.]

15... ♙c7! Black would like to push e5 to reduce the power of White's center. We must mention that it is not so easy to mobilize the central pawns, because d5 always gives up the control over the c5 square; c5 allows a Black piece to d5; while on e4, Black plays e5, creating a huge hole on c5 for the knight...

16. f4 Preventing e5.

16... a4! The other idea behind the 15... ♙c7 move was to push the a-pawn, White cannot take it because of the ♙c6 double-attack on g2 and a4.

17. ♖b1 White frees the a1 square for his bishop. He needs to blockade the pawns with the minor pieces.

17... ♖fd8! Creating the threat of ♘c5! There are still many games in the database.

18. ♙e2 Protecting the d3 bishop against ♘c5.

18... b3! 19. ♙a1 [It is a bit strange to me why nobody has ever tried 19. ♙a3 blocking the pawns. According to the computer, Black is just much better, but for me it is unclear. White threatens with e4-e5 now, Black must parry it with a knight move, for instance 19... ♘f8 keeping the d4 square under attack. This is the reason why the bishop goes to a1 in all the games. In that case, e4-e5 could come.]

19... ♙d6! This is the novelty of our game. I am pretty sure that Nakamura has prepared this at home. He refreshes the threat of ♘c5, which is not easy to parry, but on the other hand, it moves into the e4-e5 idea with tempo.

20. e4 ♘c5! The game gets extremely sharp and concrete now, but somehow, Black pulls in all lines.

21. e5 ♙c6 This is the point! Black does not lose a piece this way, because White cannot take back the d3 knight at the end, because of the mate on g2.

22. exf6 [22. d5? runs into 22... ♘xd5! 23. cxd5 ♙xd5 Black wins.]

22... ♘xd3 23. ♙g4 g6 24. ♖f3! A multifunctional move. The first aim is to lock the h1-a8 diagonal in order to free

the queen to move to h6. It also attacks the knight and might threaten to increase the attack with ♖h3 later on. Black needs to react precisely.

24...b2! Black would like to get the d4 pawn.

25. ♖g5 [25. ♗xb2 ♘xb2 26. ♖xb2 a3 27. ♖a2 ♖xd4--+ wins for Black.; 25. ♖xd3 is objectively the best, but it is also better for Black after 25...bxa1 ♖ 26. ♖xa1 ♖xd4! 27. ♖xd4 ♖c5 28. f5 ♖d8! ♖ Black wins back the rook and gets a clear advantage.]

25...bxa1 ♖ 26. ♖xa1 [26. ♖h6 does not work, because of 26... ♖xd4+ 27. ♖h1 ♖xf6!--+ preventing the mate.]

26... ♖b6! Black prepares for the same defense against ♖h6 by eliminating the d4 and f6 pawns with check.

27. ♖xd3 [27. c5 ♖b2--+ also wins for Black.]

27... ♖xd4 28. ♖b1 [28. c5 ♖d8 29. ♖h6 ♖xf6--+ wins.; 28. ♖h6 ♖xd3+ (28... ♖xf4+ followed by ♖xf6 also wins.) 29. ♖h1 ♗xg2+! 30. ♖xg2 ♖xd2+ 31. ♖h3 ♖e3+--+ and Black mates first.]

28... ♖d8 The game is over now. White cannot give mate, which means he is lost.

29. ♖xb7 [29. ♖h6 ♖xf6--+]

29... ♖xd3 30. ♗f3 White tries some desperate try, but there is no clear threat because ♖h6 is always met with ♖xf6.

30...a3 31. ♖xf7 ♖b6+ 32. c5 ♖b1+ 33. ♖f2 ♖xf3+ Eliminating the last attacker.[White resigned in view of 33... ♖xf3+ 34. gxf3 ♖xf7 35. ♖h6 ♖b2+ 36. ♖g3 ♖xf6--+ White has only one check.]

0-1

(3) Jobava,Ba (2702) – Svetushkin,D (2588) [A01]

14th Euro Indiv 2013 Legnica POL (10.27), 15.05.2013

[Csaba Balogh]

Quite a unique game right from the beginning.

1.b3 The extremely talented Georgian grandmaster, Baadur Jobava, often employs this move and has good results with it. However, in this game he ran into a bad defeat.

1...d5 2. ♗b2 ♘f6 3.e3

3... ♗g4 A provocative move, since after ♗e2 or ♗f3, Black could calmly finish the development and achieve equality, while the critical move played in the game is a bit artificial.

4.f3 ♗f5 Further provocation.

5.g4 Jobava has already played this once.

5... ♗d7 This was Svetushkin's novelty. He retreats his bishop to his own camp and hopes that, in the short term, he can make use of the weaknesses of White's pawn structure. [5... ♗g6 happened in the previous game, but the bishop was slightly misplaced here. 6.h4 h5 7.g5 ♗g8

8.♘e2 ♘f4 was coming in the next move with tempo. White won later on in Jobava -Yu Ruiyuan 2012.]

6.g5 ♘g8 7.f4 We usually meet these positions between club players and not in the GM level, who are actually playing for big prizes.

7...c5 It is time to occupy some important central squares.

8.♘f3 ♘c6 9.♙b5 White would like to create an outpost for his knight on e5.

9...e6 10.h4 White's strategy is to dominate the dark squares and he would like to work them out by pushing h5-h6. Black obviously needs to avoid this.

10...h5! At the same time, Black has created a nice hole on f5 for his knight and he is going to occupy it soon.

11.0-0 I am not sure if this is the safest place for the king. [It would have been more advisable to play 11.♘c3 ♘ge7 12.♘e2 immediately, driving the knight to g3, and on 12... ♘f5

13.♙d3! is very strong. White wants to take on f5, followed by ♘g3. Black should ideally strengthen his knight via ♘ce7, but this would lock the bishop to f8. One tempo is missing for him to play ♙d6 first.]

11...♘ge7 12.♙e1 ♘f5 13.♘c3 White is going to kick out the f5 knight with ♘e2-g3. [The other way to develop the b1 knight. 13.d3 would crucially weaken the e3 square. Black immediately makes use of it with 13...d4!♣]

13...♙d6 14.♘e2

14...♙b4! Very well played! Black creates a very simple threat to take on c2, and if we take a closer look, then we realize that it is not easy at all to parry it. White is forced to make a very ugly queen move, but it deprives him from continuing his plan with ♘g3.

15. ♖xd7+ ♔xd7 16. ♚b1 Ugly, but what else to do?! White needs to waste some time now to play a3, sending back the knight, and then again ♔e1 and ♖g3.

16...0-0 17. ♖g2 [17.a3 ♘c6 18. ♚e1 was probably better, although Black is more than fine after, for instance 18... ♖fe8 19. ♘g3 ♘xg3 20. ♚xg3 d4! ♚ locking the b2 bishop, since taking twice on d4 allows the ♙c5 pin.]

17...♖fe8 18. ♘g3 d4! Black does not waste any time and punishes White for his poor heavy pieces.

19.e4 A principled move to lock the position, but it has a tactical drawback. [19. ♘h5 is met by 19...e5! opening the position on the weak king. 20.e4 allows 20... ♘h4+! 21. ♘h4 ♚g4+ 22. ♘g3 exf4--+ wins.; 19. ♘xf5 brings the Black rooks into the game along the e-file 19...exf5 20.exd4 cxd4 21. ♘xd4 ♘d5! Black is crushing.]

19...♘xg3 20. ♚xg3 If White succeeds to consolidate, he gets a clear edge thanks to his space advantage on the kingside. However, Black has prepared a nice tactical shot... It is easy to feel that something should work for him with such pieces on b1 and a1.

20... ♙xf4+!! 21. ♚xf4 e5+ The queen joins the game through g4.

22. ♚g3 [22. ♘xe5? leads to a mate: 22... ♖xe5 23. ♚xe5 ♖e8+ 24. ♚f4 ♚g4#]

22... ♚g4+ 23. ♚h2 ♚xe4 Black only got two pawns for the piece, but the b1, a1, b2 pieces are completely out of the game, and he threatens to move with the queen followed by e4. White has no good defense against it.

24.d3 ♚e2+ 25. ♚g3

25...e4! Good calculation! Black wins by force.

26. ♖f2! This seems to trap the queen and the game is over, but the unpleasant surprise is just about to come. [26.dxe4? ♖xe4 Black mates with ♖g4- ♚g2.]

26...exf3!! [26...♔e3? loses to 27.♕c1! trapping the queen.]

27.♖xe2 fxe2 White cannot block the e-pawn. If Black promotes it and wins the queen, he ends up with an extra pawn and a winning position.

28.♔h1 ♘xc2 29.♖e1 It seems like White succeeded to stop and he is still a piece up, but Black can still increase the pressure.

29...♘xe1 30.♔xe1 ♖e3+! 31.♔f2 ♖ae8 White resigned, as he is hopeless against the threat of ♖d3-d1. The queen is a poor blockader and White has no time to replace it with the bishop.

0-1

(4) Wang,Hao (2743) — Anand,Viswanathan (2783) [A34]

Supreme Masters 2013 Sandnes NOR (9.4), 18.05.2013

[Arkadij Naiditsch]

Rarely do we see Anand getting outplayed, but in this game, it was the case. White got nothing out of the opening where it seems that, maybe, Black is the one pushing. However, just a few moves later, he managed to catch a full black queen. Let us take a closer look...

1.c4 c5 It is super difficult to outplay the World Champion in the opening, so Wang Hao is clearly not to blame for his opening choice.

2.♘c3 g6 A not very popular move order for Black. Usually we see 2...♘c6 or 2...♘f6.

3.♘f3 ♕g7 4.d4 cxd4 5.♘xd4 Now we are back in a sort of Maroczy structure.

5...♘c6 6.e3 Not the most ambitious move. [6.♘c2 seems to be the main line here.]

6...♘f6 7.♕e2 This is exactly why White usually avoids this line. It seems like Black is doing perfectly OK.

7...d5! 8.cxd5 [as well 8.0-0 0-0 could lead to about the same position.]

8...xd5 9.xc6 An ambitious move by White. By crushing the black pawn structure, White is gaining a potential target. On the other hand, Black's bishop on g7 becomes really active and it seems like Black should have, at least, enough play.

9...bxc6 10.a4 The only try for White to reach any advantage.

10...0-0 11.0-0 f5 f5 is clearly not a mistake, but why not to try an easier solution like [11...d6!? Black is taking the c5 square under control and maybe the next move could be d8 or even b6. It is really hard to believe that White has any advantage here.]

12.g4!? Now the big fight starts and it is clear that Wang Hao is ready for it. It is very important for White to get the black knight away from d5, and that is why even a big weakening move like g4 now leads to big complications.

12...e6 Now the bishop will be under attack, but it seems like Black has no better square for it.

13.e4 That was White's main idea.

13...b4?! Anand clearly chooses the wrong direction for his knight. [13...c7 would have been the right move. 14.c5 b8 and it seems to me that Black should be doing perfectly fine here. If White would take on e6, the black knight would take a perfect position on the d4 square.]

14.c5 and it is already quite tricky for Black to play.

14...xa2? Under pressure, Anand makes a big mistake. [Still, Black was more or less OK after 14...xd1 15.xd1 c2 The Black knight is going to take a great position on d4. 16.xe6 fxe6 17.b1 and maybe White's position is slightly better, but Black is clearly not lost.]

15.a4! and here comes the punishment! Black's pieces are suddenly under a double attack.

15...d4 The only move.

16.a5! and again Wang Hao takes the right path. White wants to play d1 next, or e3 and xa2. This is too much for Black and the loss of material is unavoidable.

16...fd8 Black is using his practical chances.

17.g2 [Probably 17.d1 xd1+ is the only thing that Black can do. 18.xd1 xd1+ 19.g2 would win for White as well. The knight on b4 and the bishop on a2 are hanging, so it is hard to believe that Black will find a way not to lose any more material. White should be winning here.]

17...c4 Black has nothing better here either.

18.d1 Good move by White. It is really time to capture Black's queen.

18... ♖xe2 19. ♖xd4 ♖xd4 The position got pretty sharp. Black has a bishop+rook and a pawn for White's queen. This would be enough to make a draw if White would not have some forced continuations in mind.

20. ♗e3 ♖c4

21. ♖e1! Wang Hao seems to be in great shape. With 21. ♖e1!, White is winning further material.

21... ♗xg4 22. b3 This is the key move. The rook has no squares and Black is forced to take further material losses.

22... ♖xc5 23. ♗xc5 ♘d3 24. ♖e3 ♘xc5 25. ♖xc5 e5 We are in front of quite a funny position. Of course, White should be totally winning, but the bishop pair plus Black's solid structure leaves him with some practical chances.

26. ♖d3 To capture an open file is never wrong.

26... ♖c8 27. ♖xa7 ♗f8 28. ♖b7 White puts his pieces in good square, paralyzing Black's movement.

28... c5 29. ♖d5 The e5-pawn is hanging.

29... f6 30. ♖d2! Again, Wang Hao chooses a great plan. Now the White rook is going over a2 to a7!

30... ♖e8 31. ♖a2 ♖e7 Black is defending as good as he can, but it is not enough.

32. ♖b6 ♖f7 33. f3! Another accurate move by White. Before starting the final action, he is misplacing the black bishop.

33... ♗h5 34. ♖a8 ♖g7 How to finish the game as fast as possible?

35. ♖xf8! White chooses the best continuation!

35... ♖xf8 36. ♖xc5 Black has no chances to stop the b-pawn from queening.

36... g5 37. b4 ♖a8 38. b5 A really great game by the Young Chinese Super-GM!

1-0

Endgame section

(15) Gagunashvili,M (2592) – Almasi,Z (2695)

European Championship, 15.05.2013

[Chess Evolution]

It seems like White has built up an unbreakable blockade, but the more active black king allows him to simplify the position into a very tricky pawn endgame...

47...fxg4! 48.fxg4 e5! Suddenly, it is not easy at all. The position is an excellent example for improving our calculating skills.

49.f5! White does a great job (or maybe just luck), but finds the drawing line. From now on, he needs to make only moves... [49.fxe5? loses for White. 49... ♟xe3 50. ♟xe3 h4 51.h4g4 ♟xe5 At the moment, White holds the opposition, but both sides have a tempo left, which means that White must allow the Black king inside the camp.

52. ♟f3 (52.b4 g5!–+ and the black king penetrates in the next move.) 52...g5 53. ♟e3 b4 54. ♟d3 ♟f4–+ Black is faster.; 49.gxh5? just drops a pawn. 49...exf4 and gxh5 next.; 49.g5 ♟f8 50.fxe5 ♟xe5+ and the g5 pawn is doomed. Black has excellent winning chances.]

49...e4+ 50. ♟e2 ♟xe3 51. ♟xe3 gxf5 52.gxf5 ♟e5 53.f6! The only move to keep the material balance.

53...♟xf6 54. ♟xe4 ♟g5! Forcing the white king into passivity, as Black would win the race if White goes for the b-pawn.

55. ♟f3! [55. ♟d5? ♟h4 56. ♟c5 ♟xh3 57. ♟xb5 h4 58. ♟a6 ♟g4 59.b4 h3 60.b5 h2 61.b6 h1 ♟ 62.b7 with a theoretical win for Black! 62... ♟c6+ 63. ♟a7 ♟c5+ 64. ♟a8 ♟a5+ 65. ♟b8 After Black forces the king in front of the pawn, he can always approach with his own king. 65... ♟f5–+]

55...♟h4 56. ♟g2 It looks like White is safe, but actually, the most interesting part is just about to start.

56...b4! 57. ♟h2 ♟g5 58. ♟g3! [White cannot try to be tricky with 58. ♟g2 because he loses the opposition after 58... ♟f4 59. ♟f2 h4! and the black king penetrates.]

58...h4+ This is the critical moment! The fight for the opposition begins.

59.♔g2!! White uses the fact that Black cannot take the opposition by ♔g4. [59.♔f3? loses after 59...♔f5 60.♔e3 ♔e5 and, in the next move, the black king goes for one of the pawns... 61.♔d3 (61.♔f3 ♔d4–+ Black is faster and wins.) 61...♔f4–+ also wins!]

59...♔g6! Black keeps on trying with the idea of distant opposition.

60.♔g1!! Only move! [60.♔f2? loses to 60...♔f6! Black gets the distant opposition. 61.♔e2 ♔e6! White needs to decide which direction to go and the black king goes to

the opposite one and wins. 62.♔d2 (62.♔f2 ♔d5 63.♔e2 ♔e4–+) 62...♔f5 63.♔d3 (63.♔e3 ♔e5–+) 63...♔f4–+; 60.♔f3? ♔f5 wins as shown above.]

60...♔g7 61.♔g2 ♔g6 62.♔g1 ♔f7! Black plays out all the cards, but White continues defending without mistakes.

63.♔f1!! Holding the distant opposition. [63.♔f2 ♔f6–+ wins as it was seen in the 60.♔f2 line.]

63...♔e7 [On 63...♔e6 White holds the opposition again by 64.♔e2 ♔e5 65.♔e3=]

64.♔e1 ♔d7 65.♔d1 ♔e7 66.♔e1 ♔f7 67.♔f1 Black cannot make progress. A draw was agreed. An instructive endgame to remember.

1/2

[Chess Evolution]

We are in quite a funny position. The main question is whether White is winning or it is a draw? At first sight, Black has excellent drawing chances. The two pawns on the 3rd line plus the a-pawn seem to even give Black good play?! But in fact, he needs to be very accurate to lead the game into a draw.

118. ♔f4! Good move. Black wanted to play f2 and ♖c2+. Now the white king wants to get to d4 and the rook from c3 will simply have no good squares.

118...f2! A great rescue attempt by Black! [In case of a slow move like 118...♔d1 119.♔e4 ♔e1 120.♔d4 White's king would push the rook away from the 3rd rank. 120...♖c7 121.♔d3! and the game is over...]

119. ♔e4! White uses his best chances. [To a simpler draw would lead 119.♖xf2 ♔b1 and even if White wins the rook on c3, it would still be a draw after Black's a2 move.]

119...f1 ♔! Excellent move by Black again, and it was so easy to go wrong. [For example: 119...♖c2?! would almost give White the full point after 120.♖a1+ ♔d2 121.♔f3! White's king is hunting down the f-pawn. 121...f1 ♔+ 122. ♖xf1 a2 123.♖a1 and it seems like White has good winning chances here.]

120. ♖a1+ ♔c2 121. ♖xf1 ♔b2 Black's idea came true. The white queen cannot get to a1, which means that, if Black manages to play a2 now, the position would be just a draw.

122. ♖e2+ ♔b3 123. ♖b5+ ♔c2 124. ♖a5 ♔b2 It seems like White cannot improve the position of his queen anymore, so it is time to come a little bit closer with the king.

125. ♔d4 ♖b3 The only move that does not lose.

126. ♔c4 It seems like the game is over. The white king is very close and Black's a-pawn did not reach the a2 square, but...

126...♔a2! Black is defending excellently, making a lot of only moves. The black rook is going to take a perfect square on b2.

127.♔d5 ♖b2 128.♔c3+ ♔a1 And it might seem funny, but this position is a draw! White cannot do anything to break Black's little fortress. The next moves, until the end of the game, prove this, and there is no need for comments! What a great defense by Black from the starting position!

129.♔d4 ♔a2 130.♔d1 ♖b1 131.♔d5+ ♔a1 132.♔d6 ♔a2 133.♔e6+ ♔a1 134.♔d6 ♔a2 135.♔d5+ ♔a1 136.♔d3 ♖b2 137.♔c4 ♔a2 138.♔c3 ♖b1 139.♔c2+ ♖b2 140.♔a4 ♖b1 141.♔c3 ♖b2 142.♔e4 ♖b3+ 143.♔c2 ♖b2+ 144.♔c1 ♔a1 145.♔d4 ♔a2 146.♔d3 ♖b4 147.♔d5+ 1/2

Editorial Preface

First, let us see the finished events of the week.

In the small but traditional round robin in Malmo, with only 8 participants, first place was shared by Short, Raport and Grandelius with 4.5/7. It was the 21st edition of the Sigeman&Co tournament.

Clearly, the main event of the week is the still running — the FIDE Grand Prix. After round 10, with only one round to go, Gata Kamsky has the lead with a fantastic 7.5/10. He is being chased by Dominguez, who is on 7/10. We can expect a very exciting finish.

The French league has begun. The usual favorite for the title is the team from Paris, "Clichy".

We hope You enjoy this week's games of the CEWN Nr 66!

(1) **Morozevich,A (2760)**
— **Nakamura,Hi (2775) [B80]**

Makedonia Palace GP Thessaloniki GRE (4), 25.05.2013

[Arkadij Naiditsch]

We will see a really crazy game with a super unclear position and a lot of funny mating ideas. I could never understand why these games usually end with a draw. In our case, once again, the final result is a friendly handshake.

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 e6

Black usually does not choose this move order, trying to avoid 6.g4, but Nakamura likes to provoke his opponents a bit, even by taking „too many” risks.

6.♙e3 a6 Now we are back in the main lines of the Schveningen, just with a different move order.

7.f3 b5 8.♙d2 ♘bd7 This super sharp line was very popular around five years ago, but then, somehow, other moves came into fashion.

9.g4 [9.a4 is the other main move in the position.]

9...h6 White just wants to play g5 in the next move, so h6 is a very logical solution. Another idea for Black is to play ♘b6 or ♘e6, freeing the d7-square, but it is a very different line.

10.a3 This is clearly not the main move, but a very logical one. White is avoiding Black's b4 move, and just wants to castle long with the idea h4-♙h3 and g5. Black will have to act quickly in the center in order not to be crushed on the kingside.

10...♙b7 11.0-0-0 It is easy to see that the position is getting very sharp. Black's main idea should be to play d5 as fast as possible.

11...♖c8 A preparatory move before the d5 push. [In a few Top level GM games, we have seen 11...d5 12.exd5 ♘xd5 13.♘xd5 ♙xd5 but it seems that after 14.♙e2 with the idea ♘f5, White might be a bit better.]

12.h4 White is following the main idea — to play g5.

12...d5 The d5 move already is almost forced.

13.♖g1!? The beginning of the craziness! [13.exd5 ♘xd5 14.♘xd5 ♙xd5 and maybe Black's ♖c8 is more useful than White's h4.]

13...dxe4 Black has no choice again.

14.g5 hxg5 Before going with the knight to d5, it is very logical for Black to open the h-file.

15.hxg5 ♖d5 **16.** ♘xd5 White continues the „move by move” play. [Against the logical 16. ♘xe4 g6 Black consolidates his position.]

16... ♙xd5

17.g6! A super important move that we can face in many similar positions. By playing g6, White is totally crushing Black's pawn structure, which usually gives good play against the king.

17...f5 **18.fxe4** Opening the f-file for extra play.

18...fxe4 I think we are at one of the critical positions. At first sight, it seems like White should have great play for just a pawn, but on the other hand, Black's position is very solid and hard to break.

19.♔b1 Typical move. Before starting the action, it is important to place the king on a safe position. [The funny move 19.a4!? could have been a possibility here. White needs the b5 square a lot and Black does not have the usual ♙a5 move now.]

19... ♞e5 Very logical. The black knight is going to f3.

20.♞xb5!? Wow, what a move! White does not care about the material and simply tries to open Black's king position to the maximum.

20... ♜f3! A good reply by Black. [It would have been reckless to take on b5. 20...axb5?! 21. ♙xb5+ ♙c6 (Of course not 21... ♞c6 22.c4! and White is winning.) 22. ♙xc6+ ♞xc6 and the very important move 23. ♙g2! with the idea ♙xe4 next. It seems to me that White has great play here.]

21.♙f2 Avoiding ♞xg1 for a second, because of ♙f7 mate.

21... ♙f6 with a double threat. Both axb5 and ♞xg1 are possible now.

22.♙g3!? Another very interesting move. [The simple 22. ♞d4 ♞xg1 23. ♙xg1 would have led to very unclear play as well. White is an exchange down, but the a6 pawn is hanging, and the Black king is still in the center.]

22...axb5 [White's idea, of course, is to play 22... ♞xg1 23. ♞c7+ The black king is forced to take a walk.]

23. ♙xb5+ ♔e7 Black is a full piece up, but the position of his king on e7 is clearly a disaster. On the other hand, the f3-knight is a beast and Black wants to play ♙f5-♔f6 next to free the bishop from f8. White needs to continue acting very energetically.

24.c4!? White continues playing very creatively! This seems to be a blunder at first, but White has an ace in the hand.

24... ♖h2 Attacking the b2 square. How should White protect it?

25. ♔xh2! The position remains super complicated, but a great and creative move deserves a „!“ mark.

25... ♘xh2 26.cxd5 This is the key move! [Of course not 26. ♙g5? White is winning back the queen, but Black still has a clear advantage. 26... ♔xg5 27. ♖xg5 ♙xc4 Black still has two pieces for the rook and a clearly better position.]

26... ♔f5! Perfect defense by Black! Only this square is saving Black from immediate disaster. White wanted, of course, to play d6, and against Black's ♙d8, ♙b6 with mate.

27. ♙g5+ The black king starts his journey.

27... ♙d6 28.dxe6+ ♙e5 We are in front of a really insane position. Black has a huge material advantage, but the king on e5 is getting attacked from all sides. And again, Black has a special joker, the free pawn on e4. It is very hard to say who is doing better here.

29. ♙d7?! It seems like this logical move is leading to a forced draw. [First 29.e7! ♙xe7 and only now 30. ♙d7! would have left Black in big trouble! Still, the position is very complicated, but it seems like it should be in White's favor.]

29...e3+! The beginning of Black's counterattack.

30. ♙a1

30... ♙xa3! And that is the main point! Any passive move would lead to White's victory, but ♙xa3 does not give him any time for e7, and suddenly the white king is the insecure piece.

31. ♙xc8 ♙c2 By giving away a rook and a bishop in the last two moves, Black secures the draw.

32.bxa3 Nothing else is possible...

32... ♙c3+ 33. ♙a2 ♙xc8 Black does not give a perpetual check immediately. Well, this is not a big change but it shows that Nakamura really wanted to fight in this game.

34.e7 The easiest way to force Black to repeat moves.

34... ♙c2+ 35. ♙a1 ♙c3+ 36. ♙a2 ♙c2+ 37. ♙a1 ♙c3+ 38. ♙a2 ♙c2+ What a great fighting game on a very high level!

1/2

(2) **Morozevich, Alexander (2760)**
— Svidler, Peter (2769) [C48]

Thessaloniki GP Thessaloniki GRE (2.3), 23.05.2013

[Csaba Balogh]

Quite a unique game. We cannot learn much from it if we look at it from the positional point of view, but it is really entertaining tactically.

1.e4 e5 2.♘f3 ♘c6 3.♘c3 ♘f6

4.♙b5 The Four Knights opening, which is pretty much forgotten on the highest level. We can always expect these surprises from Morozevich.

4...♘d4 This is the tactical handling of the position. [4...♙b4 is the other main line, which leads to much calmer waters.]

5.♙a4 ♙c5 This is the main line. Black sacrifices a pawn and usually gets adequate compensation for it. [5...c6 is another sharp line with the same idea — to get compensation for the pawn 6.♘xe5 d6 (6...d5 is also possible.) 7.♘f3 ♙g4 8.d3 with many games in the database.]

6.♘xe5 0–0 7.♘d3 ♙b6 8.e5! White must play concretely. Otherwise, Black quickly overtakes the initiative. [For instance, after the slightly careless 8.0–0 d5! with the threat of ♙g4, White has no other possible move than ♙e1. So, White's next move is forced. 9.♘xd5 Now ♙g4 does not work because of ♘xf6 check. 9...♘xd5 10.exd5 ♙xd5 with huge compensation for Black. White could not finish his development on the queenside.]

8...♘e8 9.♘d5 c6 [9...d6 is an alternative. Here, White plays again 10.♘e3 Black has a wide range of choices, with more than hundred games in the database. For a very long time, the most direct continuation was considered to be fine for Black. 10...dxe5 11.♘xe5 ♙g5 Alexander Motylev, Karjakin's main second, found a very strong novelty for White. 12.♘5c4 f5 13.h4! In the very complicated lines, White gets a clear advantage everywhere. Motylev won his game against Shirov later on.]

10.♘e3! [10.♘xb6 White cannot go for a simplification with 10...axb6 11.c3 because of the pretty refutation 11...♙h4!! with the threat of ♖xa4-♙xa4 ♘f3 discovered check. 12.cxd4 ♙e4+! 13.♙e2 ♙xg2! 14.♖f1 ♖xa4 ♣ Black is much better.]

10...d5 Svidler is following the Vallejo-Leko rapid game, where Black won convincingly. Anyway, Morozevich had an improvement prepared...

11.0–0 f6 12.c3 ♘f5 Black would like to play ♙c7, forcing White to take on f6 and after ♘xf6, all the black pieces are excellently placed and look dangerously at the white king. Black would have more than enough compensation there. Here comes the deep novelty of Morozevich, which seems to create difficulties for Black.

13.b4! with the idea of b5, creating strong counterplay on the queenside. White weakens the c6 pawn and also prepares to play ♖a3 with tempo! [13.♙b3 happened in the mentioned game. 13...♔h8 After leaving the pin, Black was ready to play ♙c7 again.]

13...♙c7 Svidler would like to force Black to take on f6 in order to strengthen his c6 pawn against the approaching b5. [13...♙c7 is met by 14.b5! with the idea of 14...cxb5 15.♙b3! Black is forced to make unfavorable exchanges because of his d5 pawn. 15...♞xe3 16.dxe3 fxe5 17.e4!± with a positional advantage!; 13...fxe5 14.♞xe5 ♞xe3 15.dxe3 ♙c7 16.f4! White keeps his extra pawn and the advantage.; This gives White enough time to play 13...a6 14.♙b3 ♔h8 15.♙a3! and b5 is the threat again, which is not easy to prevent at all.]

14.b5! Morozevich continues his deep preparation. At first sight, it is very suspicious to focus all his pieces on the queenside, but as the game proves, Black is not in time to break through with the attack.

14...fxe5 15.♙a3 ♖f6 Driving the rook to the attack through h6. [Another tactical point of White's idea is that after 15...♞xe3 16.dxe3

16...c5 White seems to be doomed, but he has the tactical strike 17.♞xc5! ♙xc5 18.♙xd5+ winning material.]

16.♞b4! White increases the pressure on the central pawns. Somehow, Black is not able to consolidate his position. [16.♞g4 also looked tempting, but after 16...e4! 17.♞xf6+ ♞xf6 Black gets a very strong attack with the exchange sacrifice. For instance: 18.♞b4 c5 19.♞c2 ♞h4!± with many threats in the air: ♞g4 or ♙h3!]

16...e4? This is a tactical oversight... [16...♙d7 does not equalize either because of 17.bxc6 bxc6 18.♞g4! ♖g6 and the point is 19.♞a6! and Black cannot defend his e5 pawn. 19...♙c8 20.♞xe5 ♙xa6 21.♞xd7±]

17.bxc6 ♖h6 [17...bxc6 Black loses a lot of material after 18.♙xc6! ♖xc6 19.♞bxd5 The queen has no good square to leave and White wins in any case after ♞xf5, followed by ♞e7 check. 19...♙f7 (19...♙b7 20.♞xf5 ♙xf5 21.♞e7+ ♔h8 22.♞xf5+-) 20.♞xf5 ♙xf5 21.♞e7+ ♔h8 22.♞xc6+-]

18.h3 ♞h4 Svidler tries some desperate attack, but he is not in time... [18...bxc6 leads to the same as in the previous move. 19.♙xc6! ♖xc6 20.♞bxd5+-]

19.♞bxd5! [It was not too late to go wrong with 19.cxb7 ♙xb7 20.♞bxd5? Suddenly, Black mates after 20...♙xd5

21. ♖xd5 ♔g3!-+ 22. ♔g4 ♜f3+! 23. ♔h1 ♔h2# would have been a dramatic turn of the game.]

19... ♔e5 20.cxb7 ♜f3+ [Both players had foreseen that after 20... ♔xb7 21. ♜g4! ♔g3 (21... ♔xd5 22. ♔b3+-) 22. ♜xh6+! ♔h8 (22... gxf6 White can trade off the queens. 23. ♔g4+ ♔xg4 24. ♜e7+ Saving the knight as well. 24... ♔f7 25.hxf6+-) 23. ♜f7+ ♔g8 24. ♜e7+ ♔xf7

25. ♔b3+! This is the point and Black does not have a good square. 25... ♔f6 (25... ♔f8 26. ♜g6#) 26. ♔xb6+! Unpinning the king. 26... axb6 27.fxf3+-]

21. ♔xf3! exf3

22.bxa8 ♔ Black resigned. An amazing game!

1-0

(3) Dominguez Perez,Leinier (2723) – Svidler,Peter (2769) [C84]

Thessaloniki GP Thessaloniki GRE (4.1), 25.05.2013

[Csaba Balogh]

Dominguez has prepared a deep improvement on a recent game by his opponent. It proved to be very effective because the computer shows no advantage. However, from a human point of view, Black gets a very unpleasant position to play.

1.e4 e5 2. ♜f3 ♜c6 3. ♔b5 a6 4. ♔a4 ♜f6 5.0-0 ♔e7 6.d3 b5 7. ♔b3 0-0 [On 7...d6 White can play the same as in the game, but he must do it in reversed move order. 8.a3 (8. ♜c3?! is bad now because of 8... ♜a5! and the e5 pawn is protected.) 8...0-0 9. ♜c3 We are in the game.]

8. ♜c3 This is the new setup for White, brought to fashion by Anand. 8.a4 was played before in all the games.

8...d6 9.a3 Black has tried many different moves here, but so far they could not show complete equality anywhere.

9...♘e6 10.♘d5 ♘d4 Svidler played this novelty less than a month ago in the Alekhine Memorial against Anand. Black would like to take on d5 with the knight and leaves from the exd5 fork. On the other hand, he creates a doubled pawn for himself.

11.♘xd4 exd4 12.♘xf6+ [White cannot get the advantage of the bishop pair with 12.♘xe7+ ♔xe7 because he cannot avoid the trade of the light-squared bishops.]

12...♙xf6 13.♙xe6 fxe6 White has a small structural advantage on the kingside, but of course, it is going to be very difficult to squeeze out something real from it.

14.a4

14...♔d7 Svidler improves on his own game, but it is only going to be a transposition. [14...c5 was played before. 15.♔g4 ♔d7 16.axb5 (16.b3! Probably Dominguez had prepared this move and we would have transposed to the game.) 16...axb5 17.♙d2 c4 18.♙b4 The difference with the game is that Black can play 18...♖a4! 19.♖xa4 bxa4 20.dxc4 ♖c8 21.♔g3 (21.b3 axb3 22.cxb3 ♖b8=) 21...♖xc4 22.♙xd6 ♖xc2= Black equalized and they soon agreed to a draw. Anand-Svidler, Paris/St Petersburg 2013.]

15.b3 c5 16.♔g4 White has an easy plan to improve his position — to play ♙d2 and f4. For Black, the only existing counterplay is c4, like Svidler already showed in his previous game.

16...♔f7 [16...c4 was possible right away, but White gets some edge here after 17.axb5 axb5 18.♙a3!± White has an easier game. He plays f4 and if Black creates some threat on the queenside, ♙b4 consolidates everything.]

17.♙d2 c4 [17...e5 does not reduce the power of f4. 18.f4! exf4 19.♖xf4 with better prospects for White.]

18.♙b4 [18.f4!? was also possible 18...cxb3 (18...c3?! is a bad positional move. Black would just deprive himself from all counterplay... 19.♙e1±) 19.cxb3 e5 20.♙b4± White seems to be better.]

18...♙e7

19.axb5! At first sight, it was a bit strange to me why Dominguez gave up the tension on the queenside, but meanwhile, I checked the 19.f4 line and it all became clear. [On 19.f4 Black was probably intending to play 19...a5 20.♙d2 cxd3 21.cxd3 b4! and White has some problems with the b3 pawn. 22.♖ac1 ♖ac8 The problem is

that White cannot play Rc4 as he does not have a good way to take back because, in both cases, Black obtains a protected passed pawn. 23. Rxc8 (23.f5? Rxc1 exf5 next and b3 is hanging.) 23... Rxc8 24.f5 is the only principled plan for White, but it is met by 24...e5! b3 is getting weaker and weaker, so White needs to play 25.f6 Rf8 ! and the arising endgame is drawn. 26. Kxg7+ Kxg7 27.fxg7 Rxf1+ 28. Kxf1 Kxg7 29. Kf2 Kg6 30. Kf3 h5 31.g4

31... Kh4 Black only waits with the bishop and White cannot make use of his theoretical advantage on the king-side.]

19...axb5 20. Rxa8 Rxa8 21.f4 [The greedy capture on c4 would be a big positional mistake. 21.bxc4 bxc4 22.dxc4 Rc8 Black wins back the pawn and White only destroyed his own structure. It would be a bad decision even if Black could not win back the pawn immediately. 23. Ke2 e5]

21... Ra2 ! A slightly suspicious move that leaves the back-rank and the king alone, but Black must look for counter-play. The game gets very sharp now...

22.e5! White finds the critical move. Now the main role goes to calculation. Svidler is very strong in this field usually, but this time he fails...

22...h5!? Black would like to play d5, but to do this, he must weaken his king first. [22...dxe5? is a blunder. 23.fxe5+- wins.; It seems like the best would have been to play 22... Rxc2 23.exd6 Kf6 24.bxc4 bxc4 and it looks like White does not have any concrete breakthrough, which gives Black equality.; 22...d5?! immediately, is bad, in view of 23. Kxe7 Kxe7 24.f5! exf5 25. Kxd4 This is the reason for Svidler to include the h5 move...]

23. Kh3 d5 24. Kxe7 Kxe7 25. Kxh5 Rxc2

26. ♖a1! White must try to make use of the weak black king. The question is if the queen and rook are enough material to create serious threats?! He must attack on the most direct way, because Black's counterplay is coming fast.

26... ♗b7? This is objectively the decisive mistake, but it was very difficult to calculate the lines. [The only move to hold was 26... ♕f8! 27.bxc4! Other moves are less dangerous... (27.dxc4 d3; 27. ♖g6 cxb3 28. ♕xe6+ ♔h8 White has nothing better than perpetual check, as the b-pawn is too far advanced. 29. ♕h3±; 27.f5 cxb3)

27...b4!! Only move! (27...bxc4 28. ♖g6 White wins because, in comparison to the mainline, the b2 move is not coming with tempo. Now White is in time to launch a winning attack. 28...c3 29. ♕xe6+ ♔h8 30.f5! ♖d2 31.f6 c2 Black needs only one move, but White mates first... 32.fxg7+ ♕xg7 33. ♖a8+ ♔h7 34. ♕h3+ ♕h6 35. ♖a7+ ♔g8 36. ♕g4+ ♔h8 37. ♕c8+-) 28. ♖g6 b3 29. ♕xe6+ ♔h8= and White does not have more than perpetual check. 30. ♕h3±; 26... ♕d8 leads to a worse position, but it is still better than the game. 27.bxc4 dxc4 28. ♖g6 cxd3 29. ♕xe6+ ♔h8 30. ♕h3+ ♔g8 31. ♕xd3±]

27. ♕e8+ ♔h7 28. ♕h5+ Approaching the time control...
28... ♔g8

29.f5! White breaks through.

29...cxb3 [29...exf5 loses to 30.e6! cxb3 31. ♕e8+ ♔h7 32.e7+- White wins because of the ♕h5-e8 ♕ threat.]

30. ♕e8+ ♔h7 31. ♕h5+ Dominguez was short on time, so it is logical to repeat twice every time.

31... ♔g8 32. ♕e8+ ♔h7 33. ♕g6+! ♔h8 [33... ♔g8 34. ♕xe6+ ♔f8 was the only chance, but White wins here as well, although he needs to find some very difficult moves 35.f6! ♖c7 (Black's problem is that 35...b2? is met by

36. ♖a8+! ♜xa8 37. ♚e7+ ♔g8 38. ♚xg7#) 36. ♚d6+ ♔g8
37.e6! gxf6

38. ♚e1! The only way to win. 38... ♚e7 (38...b2 39. ♚d8+!
It is important to check first, otherwise, Black might take
on e7. 39... ♔g7 40.e7+-) 39. ♚g3+ ♔h7 40. ♚h4+ ♔g7
41. ♚g4+ ♔h7 42. ♚f5+ ♔g7 43. ♚f1+- wins.]

34.f6! ♖a8- ♜xa8 ♚xg7 is the main threat. Another threat
is f7 with the idea of ♚h5.

34... ♚c7

35. ♚f1! The last precise moves! White threatens to play
fxg7, followed by ♚f8, so Black must delay the counter-
play with b2 again...

35... ♚f7 36. ♚f3! [Black resigned in view of 36. ♚f3 ♔g8
37. ♚h3 b2 38. ♚h7+ ♔f8 39. ♚h8#]

1-0

(4) Ponomarev,R (2742) – Ivanchuk,V (2755) [C05]

Makedonia Palace GP Thessaloniki GRE (6), 28.05.2013

[Arkadij Naiditsch]

Lately, Ivanchuk has been in a really unpredictable shape. A win against Carlsen or Kramnik can be combined with a loss on time on move 30! In this game, we can clearly see that it was not his day, again.

1.e4 e6 2.d4 d5 3.♘d2 ♘f6 4.e5 ♘fd7

5.f4!? A rare but interesting setup for White.

5...c5 6.♘gf3 By playing f4, White is trying to keep his center.

6...♘c6 and Black is, of course, attacking it!

7.♘b3!? This is the key idea! White is not trying to play c3, which, in my opinion, gives Black nice play after ♙b6. Instead, he is trying to provoke c4, which would close the whole position, so Black would not have any play on the queenside anymore. Slowly, White would start playing on the kingside.

7...c4 A normal choice, but maybe White is getting what he wanted?! [I guess that against 7...b6 White had planned

a quick 8.c4!? trying to crush the black center.; Maybe 7... ♙b6 is a normal answer here as well.]

8.♘bd2 These two paradoxical-looking White's knight moves are not stupid at all. Black does not have any clear play on the queenside now. Also, it is very important that the white pawn is on c2 and not on c3, so Black does not count on the b5-b4 idea anymore.

8...b5 9.♙e2 Another very good move by White, with quite an important strategical idea.

9...♘b6

10.♘f1! That is the point! White is bringing his knight to a perfect position on e3, where it will support the f5 push. Besides, White has another nice idea, which we will see very soon in the game.

10...h5 Another very logical move by Black. White has little play.

11.♘e3 ♙d7 Black is more advanced on the queenside, and White in the center. This gives White a bit of an edge.

12.0-0 ♙e7 What should White do next? To prepare h3-g4-f5 or maybe to go for the f5 push?!

13.b3! Ponomarev shows great understanding of the position! The usual rule says: never play on the flank when your opponent is better. However, in this particular situation, it is the best! Black will have to castle long soon or later, and White will be able to play a4 to open the position even more.

13...g6 A normal move to avoid future f5 pushes.

14. ♘d2 To develop a piece is never wrong.

14...a6 Until here, everything looks quite logical. Maybe a6 is a bit too careful, even though Black is preparing against White's a4 move.

15. ♗e1! Another great move by White. The bishop is very well placed on e1 and plays on both flanks at the same time. White's main idea of playing h3-g4 remains and, at the same time, a4 is always a potential threat!

15... ♖c7 16.h3 White is starting his main plan.

16...0-0-0?! The first mistake. Now White's play is getting super dangerous. [16... ♖c8 Black should have kept his king on e8 and tried his luck on the c-file.]

17.a4! Black's position seems crushing! White just wants to open both the a- and b-files with axb5 and bxc4, and the black king will be in deep trouble.

17... ♖b7 18. ♖b1! Once again, a great move by White. Now bxc4 and a5 became a deadly threat. It is clear that White totally outplayed his opponent.

18... ♗a7?? The last blunder of the game in an already very bad position.

19.a5 White is winning a pawn with bxc4 next. A game that looks rather short, but if we look a bit deeper, White actually outplayed his opponent out of nothing, simply by understanding the position on a different level!

1-0

Endgame section

(15) Grischuk,A (2779) – Nakamura,H (2775)

Thessaloniki GP, 23.05.2013

[Chess Evolution]

White has two extra pawns, but converting the advantage is not easy at all because Black has built up a good defensive position. However, Grischuk plays with perfect technique and wins the game.

89. ♖a5! Excellent decision to trade off the rooks, but White had to foresee the winning plan, which was not simple at all. [White cannot make progress with 89. ♖b7+ ♔e8 90. ♔e6 because of 90... ♖a6+ and he must retreat.]

89... ♖xa5+ 90. ♔xa5

90... ♔a3 The black king is ideally placed on d7, where it blocks the d-pawn and also the king's route to e6. The doubled f-pawns also improve Black's surviving chances, as White cannot create a new passed pawn. What might be the winning plan?

91. ♔b6 Grischuk improves his bishop by transferring it to the a3-f8 diagonal.

91... ♔c1 92. ♔c5 ♔e3 Black has nothing better than to wait with his bishop. Grischuk follows the right strategy in these endgames. He makes some „senseless“ moves in order to gain time (30 seconds increments per move), and when he believes it should be enough, he goes for the critical continuation.

93. ♔b4 ♔f2 94. ♔f8 ♔e3 95. ♔c5 ♔g1 96. ♔a3 ♔e3 97. ♔e4 ♔d2 98. ♔c5 ♔e8 Black waits with his king now, because White does not threaten to invade on e6. But, obviously, on ♔d5, Black would immediately go back to d7.

99.d5! This is the start of the winning plan. White prepares to attack the f6 pawn with the bishop and also with the king from g6, in order to lure the Black king to f7. This clears the path of the d-pawn.

99...♔d7 100.♙e3! Before placing the bishop on d4, White sends away the bishop from the c1–h6 diagonal, in order to be able to play ♔f4.

100...♙a5 101.♙d4 ♙d8 102.♙c3! A good waiting move, in order to have ♙b4 in case of ♔d6 at the moment, and to leave from the ♔f4–♔d6 ♔g4 ♔xd5 tempo.

102...♙e7 103.♔f4 ♙d6+ [103...♔d6? is not possible because of 104.♙b4+]

104.♔g4 ♔e7 The next step of the win is to send away the blockader of the d-pawn. If White hurries with ♔h5–♔f7, he cannot threaten to trade the bishops. So, first he drives it to f4.

105.♙d2! ♙c5 106.♙f4 ♙b4 107.♔h5 ♔f7 108.♙g3 ♙c5 White has already progressed a lot—it is time to make the next step, to lure the black king from the g6 square by advancing the d-pawn.

109.d6! ♙d4 110.♙h4 White wants to push d7 and on ♔e7, ♔g6 ♔xd7 ♙xf6.

110...♙b6 [110...♙c3 111.d7 ♔e7 112.♔g6 ♔xd7 113.♙xf6 Here the second f-pawn gets an important role. Black cannot sacrifice his bishop for f5. 113...♙b4 114.♙g7+- The pawn automatically promotes.]

111.d7 ♙d8 Nakamura tries his best chance—he blocks the pawn with the bishop and tries to keep the king away from the g6 square. Grischuk finds a very nice way to proceed.

112.♔h6! Putting Black into zugzwang. He cannot move with the king, since it allows ♔g6 and all the bishop moves are met by the same trick.

112... ♖a5 [112... ♖b6 113. ♗f2!; 112... ♖c7 113. ♗g3!]

113. ♗e1! ♖b6 114. ♗b4! White transferred his bishop to the a3-f8 diagonal in order to cut the black king from the e7 square. The last part of the winning plan is easy, White only needs to bring his king around the board and get it to c8...

114... ♗d8 115. ♔h5 ♔g7 116. ♗d6 ♔h7 117. ♔h4 ♔h6 118. ♔g4 Black is in zugzwang, he must retreat with the king...

118... ♔g7 119. ♔f4 ♔h6 120. ♔e4 ♔g5 121. ♗f4+ Black resigned in view of ♔d5-♔c6 and ♗c7. Nice technique by Grischuk!

1-0

(16) Bacrot,E (2725) – Morozevich,A (2760) [D90]

Makedonia Palace GP Thessaloniki GRE (5), 27.05.2013

[Chess Evolution]

After a great fight, where, during the last 20 moves, Black was trying to find winning chances, suddenly things changed dramatically. Black clearly over-pushed his position and is on the limit of losing the game. How should White proceed?!

61...f5 What else to do?! [If Black takes the b5 pawn... 61... ♖xb5 62. ♖g7 ♖d6 (62...a4 63. ♖xg6 ♔f7 64. ♖g1 and probably White's h-pawn will give him a full point.) 63. ♖xg6 ♖f7 64. ♖g1 We went back to the same place. Black cannot cross the g-file with his king, which means that there is no way to stop White from promoting the h-pawn.]

62. ♖h6! Excellent move! The h5 threat is deadly!

62...fxe4+ 63. ♔xe4 ♔f7 64.h5! Here we can see the main point! Suddenly, White is going for the b6 pawn.

64...gxh5 65. ♖xb6 It seems like Black is done! White's position must be winning. The horrible knight on a3 plus

the passed b-pawn — what else is needed?! However, things are much trickier!

65...h4 Black's only hope is to provoke the white king to hold the h-pawn and, at the same time, move his own king closer to the b-pawn, and combine this with the knight to take the b-pawn.

66. ♖b8? What a huge mistake by White! [66. ♔d4! would have been the right solution. 66...h3 67. ♔c5 and that is the main point. Black cannot play h2 because of ♖h6, and the knight on a3 is cut. 67...♔g7 trying to avoid ♖h6. 68. ♖e6 This does not help either. 68...h2 69. ♖e1 White is easily winning.]

66...h3! and, suddenly, the position is a draw!

67. ♔f3 [It is not winning either 67.b6 h2 68. ♖h8

68...♞c4! and the Black knight is in time to capture the b-pawn. 69.b7 ♞d6+]

67...♔e6! The black king is just in time to help the knight.

68.b6 ♔d7! Black does not miss his drawing chances and makes exact moves!

69. ♖a8 ♔c6 followed by ♞b5-♞d6-♞b7 was a drawing threat.

69...♔c6 70. ♖xa5 ♞c4 Another little trick and White's b-pawn is falling.

71. ♖a7 [Of course not 71. ♖c5+? ♔xc5 72.b7 ♞e5+ and Black is in time to stop the b-pawn. 73. ♔g3 ♞c6]

71...♔xb6 72. ♖xe7 The rest does not need any comment! And, once again, we saw how tricky even an easy looking position can be!

72...♔c5 73. ♔g3 ♔d4 74. ♔xh3 ♞e3 75. ♖e8 ♔d3 76. ♔g3 ♔d4 77. ♔f3 ♞c4 78. ♖d8+ ♔e5 79. ♖e8+ ♔d4 80. ♔f4 ♔d5 81. ♖e5+ ♞xe5 1/2

(17) Fischer,Robert James — Kholmov,Ratmir D [C98]

Capablanca Memorial Havana (18), 1965

[Kamil Miton]

1.e4 e5 2.♘f3 ♘c6 3.♙b5 a6 4.♙a4 ♘f6 5.0-0 ♙e7 6.♖e1 b5 7.♙b3 0-0 Black plays without the d6 move in order to keep the possibility of going for the Marshall Gambit.

8.c3 White could also play other lines: [8.d3; 8.h3; 8.d4]

8...d6 [8...d5 9.exd5 ♘xd5 10.♘xe5 ♘xe5 11.♔xe5 c6
This leads to very complex long variations. The Marshall
Gambit is still popular and used by top players like Aroni-
an or Leko.]

9.h3 ♘a5 10.♙c2 c5 11.d4 ♔c7 12.♘bd2

12...♞c6 A logical but rare move. Black is going to solve the tension in the center. The main line is [12...cxd4 13.cxd4 ♞c6 14.♞b3 (14.d5 After the included exchange on d4, Black has better squares for the knight. 14...♞b4 15.♙b1

a5∞; 14.*a3* was also played several times, but looks too slow.) 14...*a5* 15.♙e3 *a4* 16.♘bd2 ♙d7 17.♖c1± Thanks to his better center and potential weak black pawns on the queenside, White has a stable advantage.]

13.dxc5?! Not the correct reaction. White is better after [13.d5  d8 14.a4±]

13...dxc5 14.♘f1 White plays using a typical maneuver, but it will not bring anything special. Black is not worse in the center now — he has no weaknesses and will control the d5 square. [14.♘h2 ♙e6 15.♘df1 ♖ad8 16.♚f3 with the idea of trying to create some pressure on the kingside after ♘g3-♘q4.]

14...♙e6 15.♘e3 [15.♘3h2!? Again, White could try to put his queen on f3.]

15...♖ad8 16.♔e2 c4 17.♞g5

17...h6! Good move. Black is not afraid of the exchange. The pawn on e6 will control the very important d5 and f5 squares. [17...♘d4 The same idea like in the game could be used at this moment. 18.cxd4 exd4 19.♗xe6 fxe6 20.e5 dxe3 (20...♔xe5? 21.♘f5; 20...d3 21.exf6 dxe2 22.fxe7 ♔xe7 23.♖xe2∞) 21.♙xe3 (21.exf6 exf2+ 22.♔xf2 ♖xf6 23.♔e2 ♔g3 with a decisive attack. ♙d6 is coming next.) 21...

♙xe5 22. ♖b6 ♙xe2 23. ♖xe2 ♖d6 24. ♙c5 ♖d7 25. ♙xe7 ♖xe7 26. ♖d1 with some compensation, but nothing more.; 17... ♙c8? 18. ♘d5↑]

18. ♘xe6 fxe6 19. b4? Very bad move. White should try to activate his pieces somehow. For example: [19. b3 ♘a5 (19... ♘d4 20. cxd4 exd4 21. bxc4 dxe3 22. ♙xe3 bxc4 23. ♖ac1± X c4 and Xe6; 19... ♙c5!? 20. bxc4 b4↗ A typical strategic sacrifice with the idea of taking control of the dark squares and not allowing the white pieces to get active.) 20. bxc4 ♘xc4 21. a4 ♙c5∞ Black should be fine.]

19... ♘d4! Now White's position is very hard.

20. cxd4 exd4 21. a3 [21. e5 d3 22. ♙xd3 cxd3 23. ♙b2 ♘e4-+]

21... d3 22. ♙xd3 ♖xd3 [22... cxd3 23. ♙a2 ♖h7 24. ♘f1 White is worse but still fighting.]

23. ♘g4 ♖h7 24. e5 ♘xg4 25. ♙e4+ g6 26. ♙xg4 [26. hxg4 ♙d7 with the same idea to the one in the game]

26... ♖f5 27. ♙e4 ♙d7! Black is dominating the board thanks to the strong passed c4-pawn, controlling the d-file and with better pieces in general.

28. ♙e3 ♙d5 Given that the pawns are placed on h6 and g6, Black exchanges the queens in order to avoid some potential counterplay against his king.

29. ♙xd5 ♖xd5 30. f4

30... g5! Thanks to this move, Black creates a weak pawn on f4 and makes way to improve his king.

31. g3 gxf4 32. gxf4 ♖f8 33. ♖g2 ♖g6 34. ♖g1 ♖d3 35. ♖f3+ ♖f5 36. ♖g7 White is looking for his last chances with his active rook.

36... ♙d8 37. ♖b7 Not allowing ♙b6.

37... ♖g8 Of course, Black takes control of the g-file.

38. ♖b8 [38. ♖f7+ ♖g6 39. ♖b7 ♖h5 40. ♖b8 ♖g7 and Black should easily win thanks to threats like ♖h4-♖xh3 or ♙h4-♖g3.]

38... ♖g7 39. a4 h5! Black does not care about the queen-side and goes for a final action.

40. axb5 axb5 41. ♖xb5 ♙h4 42. ♖e2 ♖g2+ 43. ♖f1 ♖h2 44. ♖g1 ♖e2 45. ♙b6 c3 46. ♖f1 ♖h2 The black pieces are too active. White gave up. A good strategic game by Kholmov. **0-1**

Editorial Preface

And once again we had a week filled with chess.

The FIDE Grand Prix in Greece was won by Dominguez with 8/11. On the second place we find Kamsky and Caruana, both with 7.5/11. This victory is most likely Dominguez's best result in his chess career so far.

The Sberbank GM rapid tournament in Kiev was won by Karjakin with 6.5/9. The second place went to Topalov with 6/9 and the 3rd place to Leko with 5/9.

In the French league, the team of Clichy is totally dominating the event and a draw in the penultimate round will be enough for them to win the title with a round to go.

The World Rapid Championship in Khanty Mansisk was won by Nepomniachtchi.

In Leon, Giri and Ivanchuk are playing a friendly match.

As usual, we bring You the newest and most interesting games of the past week.

Enjoy CEWN Nr 67!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Grischuk, Alexander (2779)
— Dominguez Perez, Leinier (2723) [D70]

Makedonia Palace GP Thessaloniki GRE (10.4), 02.06.2013

[Arkadij Naiditsch]

We will now face a very exciting game. After a long theoretical battle, it first seemed as though White should be better, but then Black took over and the game finally ended in a draw.

1.d4 ♘f6 2.c4 g6 3.f3 This move is now very popular, as the idea is to avoid the main Gruenfeld where at the moment nobody is able to show a clear way to get an advantage.

3...d5 4.cxd5 ♘xd5 5.e4 ♘b6 6.♘c3 We are entering a very sharp and complicated line. To play this kind of positions without great analyses is simply impossible as one would risk quickly getting into trouble.

6...♙g7 7.♙e3 0-0 8.♚d2 The main ideas here are simple, White is trying to quickly castle queenside and start the attack on Black's king by playing h4-h5 and ♙h6, while Black is trying to create some counterplay against White's center.

8...e5 is one of the most principled continuations here. Of course it is all still theory.

9.d5 c6 As promised, Black is starting an immediate attack on the centre...

10.h4 ...and White on the kingside.

10...cxd5 11.exd5 ♘8d7 The black knight is going from b8 to f6, where it will protect the king and attack d5.

12.h5 ♘f6 13.hxg6 fxg6! This move is of course killing the pawn structure, but the rook on f8 is immediately getting into the game. It is clear that in the current position the dynamics are much more important than positional things.

14.0-0-0 ♙d7 Black is taking his time to bring the last piece into the game, the rook from a8.

15.d6 ♖c8 16.♚b1 As we can see, the position is very unbalanced. White has a lot of positional advantages like the d6 pawn, but Black is clearly better developed and should search his chances in a „fast“ play.

16...e4!? Exactly like this! I guess both players still knew this position very well, but this doesn't matter to us. What is important here is to know how to handle such positions. Black doesn't wait any longer and tries to open White's position to the maximum! A very typical play in case of development advantage!

17.fxe4 White doesn't have a choice, he has to take.

17...g4 Of course Black wants to play **g4** and at the same time **xc3** is dangerous, which forces White to act quickly.

18.g5 Again White had nothing better.

18...e8 White is using the mini tempo won with **g5** to develop a piece.

19.f3 f7!? Black is preparing a tricky move! [The straightforward **19...xc3 20.bxc3 a4** wouldn't lead to anything because of **21.c1 Qxe4+ 22.a1** and White is probably doing better here.; It is also too early for **19...xc3 20.bxc3 a4** because of **21.c4+** and Black is not in time.]

20.e7 A very logical move by White with the idea of playing **g5** next. What to do now for Black?!

20...xc3! A great sacrifice. At first sight it just looks bad for Black, but if we look deeper, things are getting super complicated.

21.bxc3 c8 That is Black's idea. The Queen is joining the attack and the monster bishop on g7 is a very dangerous piece, while White's bishop on e7 is in a more or less a passive position.

22.c1 a4 I guess this is one of the most critical moments of this game. White has a very large amount of options.

23.g5 White continues forcing things. [After **23.c4 c5** followed by **b6** is great for Black.; After the rather passive **23.e2 c5** is strong as well. A bit of a strange position, but it really seems as if Black has enough play for being an exchange and a pawn down.]

23...c5! Great play by Black! Another exchange is being sacrificed in order to attack the White king.

24.xf7 White has to take...

24...xc3+ 25.c3 xc3 What to do now for White?! The Queen and the knight on f7 are hanging.

26.h6+ It can't be wrong to save the knight.

26...♔g7

27.♔d5 This move leads to a perpetual check, but White probably already didn't have anything better. [27.♔e2? is of course losing after 27...♔b4+ 28.♔c1 ♔a3+ 29.♔d1 ♔a4+; 27.♔c2 This move leads to the exact same draw as in the game: 27...♔b4+ 28.♔b3 ♔xe4+] **27...♔b4+ 28.♔b3 ♔xe4+** And White cannot escape from the checks...

29.♔c2 ♔e1+ 30.♔c1 ♔e4+ 31.♔c2 ♔e1+ 32.♔c1 ♔e4+ 33.♔c2 What a great fighting game! I would be curious to know whether maybe Dominguez knew everything until the end?!

1/2

(2) Kasimdzhanov,R (2699)
– Kamsky,G (2741) [A88]

Thessaloniki GRE Thessaloniki GRE (7), 29.05.2013

[Csaba Balogh]

In this game, Kamsky convincingly outplayed his opponent step by step.

1.d4 f5 Kamsky shows his intentions right from the first move as he plays the surprise Dutch defence instead of his usual Slav.

2.♘f3 ♘f6 3.g3 g6 4.♙g2 ♙g7 5.0-0 0-0 6.c4 d6 7.♘c3 We have reached one of the initial positions of the Dutch Leningrad variation. Black can choose between various setups.

7...c6 8.b3 [As we have analyzed in the Radjabov-Ivanchuk game a few CEWNs ago, White should probably play 8.♖b1 with the idea of b4-b5.]

8...a5 Black prepares to develop his knight to a6.

9.♙b2 ♘a6 10.d5 White would like to put his knight to d4 in order to establish the control over the e6 square. This is a usual drawback of this variation, but in this posi-

tion it might be not the best idea, since he also gives up the c5 square, which the Black knight is ready to occupy. [10.♖e1 is the main move with the idea of e4.; 10.e3 is also possible followed by ♔e2 and in a good moment e4.]

10...♗d7 11.♘d4 cxd5

12.♗xd5 [12.cxd5 looked more reasonable to me in order to reduce the mobility of the central pawns, although Black seems to be fine after 12...♘c5 13.♖c1 ♖c8 14.e3 ♗b6! with the idea of ♔a6, trying to make use of the d3 square.]

12...♘c5 13.♖b1 White wants to avoid any kind of tactical motifs between the two bishops on g7 and b2. [The idea itself is good, but White should have executed it by playing 13.e3 followed by ♔e2 and then the rooks could go to more natural places, like c1 and d1.]

13...♗fe4 Black has occupied the ideal squares with his knights.

14.e3 ♖c8 The pawn structure is very static, so the players are improving their pieces. Kamsky is very strong in such positions...

15.h4 White is taking some ground on the kingside, obviously he is not playing for a kingside attack.

15...♖f7! I like this move a lot! Before making a decision about where to start the actions, either by e6 or by h6-g5, Kamsky plays this very useful move, which supports both ideas.

16.♗a1 Somehow, Kasimdzhanov does not find a plan. It would have made sense to trade the e4 knight by playing ♘c3 or to exchange the dark squared bishops by removing the d4 knight.

16...h6! Black is aiming for a kingside attack with g5. This is a typical plan in this variation.

17.a4? I don't like this move at all! White locks the queenside, where he was better and also fortifies the c5 knight, which could have been kicked out only by a3-b4.

17...g5 Black continues his plan.

18.hxg5 hxg5 At some point, Black would like to push g4, after which he gets many dangerous attacking possibilities, for instance by playing ♗e5 followed by ♔f8-h6 and ♖h7 or ♘g5 trying to use the f3 and h3 squares.

19.g4 Kasimdzhanov tries a typical idea to counter the g5-g4 plan. White tries to break the stability of the e4 knight and he undermines the f5 pawn. On the other hand after Kamsky's strong reply, this is a huge weakening of his own king. [19.♘c3 was probably better again.]

19...e6! The point becomes clear in the 21st move. [On 19...fxg4 the idea was to play 20.♔c2! and Black cannot hold the knight.]

20.♘c3 ♘xc3 21.♙xc3

21...f4! Breaking through on the kingside. From now on, White must stay focused to not allow an f3 push.

22.♖e1 b6 Black frees his queen by protecting the a5 pawn.

23.♖c1 ♔f8! This was the only way to activate the queen. ♔e7, ♖cf8 would have been an even better arrangement of the pieces, but it would move into the tactical trick of exf4 followed by ♘f5!, making use of the pin on the e-file.

24.♘f3! Trading off the strong bishop, preventing the f3 push and aiming for some counterplay against the g5 pawn.

24...♙xc3 25.♖xc3 ♔g7 26.♖c1

26...♙c6! Another great move! Black does not need to waste time on protecting the d6 pawn.

27.exf4 [27.♔xd6 leads to a very bad endgame for White after 27...♖d7! 28.♔e5 ♙xf3 29.♔xg7+ ♔xg7 30.♙xf3 ♘xb3 31.♖c3 ♘c5= Another proof that the move 17.a4 was not the best idea. White has lost the b3 weakness and the new target is on a4. The knight clearly dominates the bishop, which can be used only for defending his own pawns.]

27...gxf4 28.g5 [28.♔xd6 ♔xg4 wins for Black.]

28...e5! The pawn phalanx starts to move and sweeps White off the board. [28...♙xf3 29.♔xf3 ♔xg5= was also good, but Kamsky plays for more.]

29.♔xd6 e4 30.♘e5

30...♔xg5! This had to be foreseen before playing 28...e5! White cannot defend his king.

31.♘xf7 ♔xf7 [Black resigned in view of the following lines 31...♔xf7 32.♔f1 (32.♖cd1 f3 33.♔g3 ♔xg3 34.fxg3 fxg2 35.♔xg2 ♘xb3--+ With a hopeless endgame.) 32...f3 33.♙h3 ♙d7! Deflecting the defender of the g2 square. A nice strategical win by Kamsky, who basically did not do anything special in this game, just improving his pieces and pawn structure with each move.]

0-1

(3) Kamsky,G (2741)–Morozevich,A (2760) [C96]

Thessaloniki GRE Thessaloniki GRE (10), 02.06.2013

[Csaba Balogh]

Kamsky played outstanding chess throughout the entire tournament and celebrated his 39th birthday with this nice attacking game against Morozevich, who was out of form in Thessaloniki.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 a6 4.♙a4 ♘f6 5.0-0 ♙e7 6.♖e1 Finally somebody goes for the classical mainline instead of the recently popular 6.d3.

6...b5 7.♙b3 d6 [The 6.d3 setup is mainly directed against the Marshall Gambit, which starts with 7...0-0 8.c3 d5 9.exd5 ♘xd5 10.♘xe5 ♘xe5 11.♖xe5 c6]

8.c3 0-0

9.h3 The initial position of the main Spanish lines. Black has a wide range of choices here. Morozevich usually likes to play the Zaitsev, which starts with 9...♙b7 10.d4 ♖e8, but this time he goes for the Chigorin variation.

9...♘a5 10.♙c2 c5 11.d4 Black again has numerous options here. The main one is 11...♚c7. However, Morozevich tries a dubious system.

11...cxd4 12.cxd4 exd4

13.♘xd4 The quick exchanges in the center usually favour White. His pieces are better placed for an opened game. White is going to use the f5 and d5 squares with the knights. ♘f5 always wants to get the bishop pair, while ♘c3-d5 would seriously weaken the c6 square in Black's camp.

13...♚e8 14.♘c3 Black cannot finish the typical regrouping with ♙f8, because White creates a very unpleasant pin with ♙g5.

14...♙b7 Black solves the problem of the c6 and d5 squares, but he allows the knight to go to f5!

15.♘f5! ♚c8 This is the novelty! I don't believe it was a prepared one, since Black already had a bad position. [15...♙f8 happened before, but it is again met by 16.♙g5! h6 17.♙h4 and this pin is really annoying from Black's point of view. 17...♚c8 18.♚c1 ♘c4 19.♚d4 White plays in a very similar way as in our game. 19...♚e6 20.♙b3

g6 Black seems to finally have solved the problems with ♙g7, but Ivanchuk plays a very effective move to keep his advantage: 21.♚a7! And the knight goes to d4 with tempo. 21...♚c7 22.♘d4 ♚e5 23.♙xc4 bxc4

24.♙xf6! ♚xf6 25.♘d5! ♙xd5 26.♚xc7 White has won an exchange and soon the game. [Ivanchuk-Mueller Mainz 2007]

16.♙g5! Increasing the pressure. This is obviously very logical, but the question is what happens if Black starts his counterplay against the b2 pawn with ♘c4?!

16...♘c4 17.♚d4! Kamsky plays on domination and does not care about losing the b2 pawn.

17...♘xb2

18. ♖b3 White removes his bishop from the c-file from the ♔c7 and ♖c4 threats. [However White had a brilliant forced win: 18. ♘d5!! ♙xd5 (18... ♘xd5 19. ♔xg7#; 18... ♖xc2 loses to 19. ♘dx7+ ♖xe7 20. ♙xf6 gxf6 21. ♔xf6+-) 19. exd5! Black cannot defend against the threats and the tactical explanation of the whole line is 19... ♖xc2

20. ♖xe7! ♖xe7 (20... ♖c4 Black cannot send away the queen from a1–h8 diagonal because of 21. ♔xb2+-) 21. ♙xf6 gxf6 22. ♔xf6! and Black gets mated in any case! 22... ♖e1+ 23. ♖xe1 ♔xf6 24. ♖e8# This would have been a fantastic finish!]

18... ♘c4 19. ♖ad1 Kamsky simple brings his pieces to the game and ignores the loss of the b2 pawn. He is intending to continue the attack with ♖d3-g3!

19... ♔d7 [19... h6 does not change much, White simple plays 20. ♙h4 and continues his plan with ♖d3.]

20. ♖d3! ♙d8? A tactical oversight, but the position was already difficult for Black. [20... ♘e5 would have been the only move. 21. ♖de3! seems to be the best move in order to avoid Black's idea after ♖g3. Black remains in a very passive position with many threats in the air. (On 21. ♖g3 Black can simplify into a worse position 21... ♘h5!

22. ♘xe7+ ♖xe7 23. ♙xe7 ♘xg3 24. ♙xd6 ♘c4 25. ♙c5 ♔xd4 26. ♙xd4± White is only slightly better thanks to the bishop pair.)]

21. ♘g7!! White wins now! [Morozevich had prepared a nice trick against 21. ♖g3 ♔xf5! 22. exf5 ♖xe1+ 23. ♔h2 ♙b6 and suddenly Black is out of danger. He is going to take on f2, while ♔f4 runs into ♘h5.]

21... ♖e5 [21... ♔xg7 loses to 22. ♙xf6+ ♙xf6 23. ♖g3+ ♔f8 24. ♔xf6+-]

22. ♘f5! The black king is too exposed after the loss of the g-pawn. Black cannot hold. Morozevich desperately tries to complicate the matters, but it does not help now.

22... ♘xe4 23. ♘h6+ ♔f8 24. ♙xd8 ♖xd8 25. f4 Black resigned! A nice birthday celebration. [25. ♘xe4 was also winning obviously.]

1-0

(4) Bacrot, Etienne (2725)
 – Wirig, Anthony (2498) [A15]

French Top 12 2013 Haguenau FRA (6.2), 04.06.2013

[Arkadij Naiditsch]

We will see a short, but very nice positional win by the best French player who just came back to the French league from the FIDE Grand Prix.

1.c4 ♘f6 **2.** ♘f3 **c6** We are back in the Slav through a different move order.

3. ♘c3 **d5** **4.e3** A „silent“, positional line. [4.d4 dxc4 could lead to more forced lines.]

4...e6 A typical Slav setup of pieces, but it looks a bit illogical... I think 4...g6 also deserves attention.

5.b3!? That is the trick behind White's play. As he hasn't played d4 yet, it makes much more sense to put the bishop to b2.

5...♘bd7 Maybe Black wants to play e5 next in order to cover the center.

6. ♔c2 Making sure that e5 doesn't work in any variation.

6...♙d6 [After 6...e5 7.cxd5 cxd5 8. ♘b5! is looking very strong for White.]

7. ♙b2 ♔e7 Until here Black is playing very solidly and everything is quite logical.

8. ♙e2 Once again White is waiting with the d4 move.

8...a6 Black finally wants to play e5 next.

9.d4 And it is time for White to play d4, but he managed to win some sort of „half tempo“ as it is unclear whether Black's a6 was really a useful move.

9...dxc4?! I don't like this move at all and it seems to be a positional error to me. [In case Black wanted to play with c5, it would have been better to do it immediately: 9...c5]

10.bxc4 c5 11.0-0 Now we can easily see that the white pieces are perfectly placed and Black has to take care not to quickly get into trouble. The bishop on c8 is totally out of the game.

11...cxd4 Black was probably afraid of White's d5 push at some good moment.

12.exd4 b6 Black is trying to develop his bishop to have a more or less a normal position. White needs to act fast if he wants to make use of his development advantage.

13.a4! A very strong positional motive! White wants to play a5 next and it is very hard for Black to find the right answer.

13...0-0 Black cannot do much about a5.

14.a5 b5 A little try to complicate things, 14...bxa5 15.c5 would of course have led to a huge advantage for White.

15.c5 Once again White is choosing the best move. [15.cxb5 axb5 16.♘xb5 ♙b4 would of course give White a big advantage, but Black would still be fighting.]

15...♙c7 16.c6 is the key move. The black knight is now forced to return to his starting position.

16...♘b8 17.♘e5 It is clear that in case Black manages to get rid of the c6 pawn, things are fine and in case he doesn't, White is just winning.

17...b4 White wanted to fix things by playing ♙f3 next. Black is taking the d5 square under control.

18.♘e4 ♘d5 19.♖fc1 White is overprotecting the c6 pawn, which is the key piece in the position.

19...♖a7 Also logically played by Black. Now ♙xe5 and ♖c7 could be interesting ideas at the good moment.

20.♙a4

20...f6?! As the saying goes, „in a bad position there are no good moves“. [The only way to fight was to play 20...f5 21.♘c5 ♙xe5 22.dxe5 ♖c7 and of course White is clearly better, but the game is not over.]

21.♘d3 ♘f4 After exchanging Black's only strong piece, White is simply crushing.

22.♘xf4 ♙xf4 23.♖c4 Again overprotection the c-pawn, very logical and strong.

23...♖c7 24.♙c1!? I like this move a lot, it looks very „clean“ to me. White does not hurry with winning the b-pawn and continues to exchange Black's active pieces.

24...♙xc1 25.♖axc1 ♖d8 26.♙f3 White now has 4 hits on the c6 pawn, which means that Black will never be able to take the pawn and that the knight from b8 will never come back into the game. White's position is winning.

26...♙f8 27.h3 There is no reason for White to hurry.

27...h6 28.♘d2 White is improving the position of his knight. It will be perfectly place on b3 and at the same time ♖xb4 is a deadly threat.

28... ♔d6 **29.** ♖1c2 [29. ♘b3 would have been good as well.]

29...e5

30.d5 Let us take a look at this position. Personally, I prefer to resign in such situations, but Wirig maybe likes to suffer :).

30... ♗f5 **31.** ♘e4 ♗xe4 **32.** ♗xe4 Total domination.

32...f5 **33.** ♗xf5 ♔xc6 **34.dxc6** The game might look very simple, but White has shown great positional play which lead to an „easy looking” point.

1-0

Endgame section

(15) Dominguez Perez,Leinier (2723)
— Topalov,Veselin (2793) [B48]

Makedonia Palace GP Thessaloniki GRE (11.6), 03.06.2013

[Chess Evolution]

This game brought Dominguez the biggest success of his chess career so far, winning the FIDE Grand Prix. After the opening, I would say that Black was clearly the one who tried to push, but then the course of the game slowly started to change. From a slightly worse endgame, Black ended up in what is already a very bad endgame. Let us take a closer look and see whether Black could still have saved the game here.

49.b5 ♖c5 [49...♖c1 50.♙b4 would lead to about the same as in the game.]

50.♙b4 ♖c2 Black has to go for the h2 pawn.

51.b6 White is of course trying to make use of the b-pawn.

51...♙d8 [Black is not in time for 51...♖xh2 52.b7 ♖b2+ because of very important 53.♙c3! White is winning

a very important tempo in order to be in time to catch Black's h-pawn. 53...♖b1 54.♖a8+ ♔e7 55.b8 ♖xb8 56.♖xb8 h2 57.♖h8+]

52.♖xf7 [White could have chosen another forced line: 52.♖a8+ ♔d7 53.♙a3 With the idea of playing b7. 53...♖c3+ 54.♙a4 ♖c4+ 55.♙a5 ♖c5+ Black needs to give checks in order to try and get the White king to the b-line. 56.♙a6 ♖c2 57.b7 It looks like White is close to be winning, but Black again starts with the nasty checks. 57...♖a2+ 58.♙b6 ♖b2+ 59.♙a7 ♖a2+ 60.♙b8 And only now 60...♖xh2 61.♖a1 ♖b2 62.♖d1+ It is very hard to say whether this position is winning for White or not... This is why the text move seems to be much more logical.]

52...♖xh2 53.♖h7 Now the black rook cannot move without losing the h-pawn. White's idea is to quickly attack Black's e- and g-pawns with the king.

53...♙c8 It is still very unclear whether Black can hold this position. As we know, rook endgames have a strong tendency to be drawn.

54.♙c5 ♖c2+ Black is pushing his pawn to h2.

55.♙d6 h2 56.♙xe6

56...♖g2! Black's only chance is to take the g3 pawn and to hope to exchange the last g-pawn.

57.♔e5! A good move by White! The king is perfectly placed on e5.

57...♖xg3 58.♖xh2 A very interesting endgame! White's idea is simple: give away the b-pawn and capture the g-pawn after which a winning rook endgame will appear.

58...♖b3? This move is probably leading to a lost position. [The simple 58...♔b7! would have given Black excellent drawing chances. 59.♖b2 (59.♖h6 ♖g4 And White cannot improve his position.) 59...♖g1 Black just keeps on waiting on the g-file and the position seems to be a draw.]

59.♖h8+! A great tactical resource by White.

59...♔b7 60.♖h7+ White is almost forcing the Black king to take on b6.

60...♔xb6 [60...♔b8 didn't save Black either: 61.♔f6! ♖xb6+ 62.♔g5 Followed by ♖g7 and ♖xg6 and White is easily winning.]

61.♔f6! Once again, White is choosing the best move. The g6 pawn is lost and the black king is not in time to get to f8.

61...♖b4 62.♔g5 ♔c6

63.♖f7 The last precise move. The rest of the game doesn't require many comments.

63...♔d5 64.♔xg6 ♖b6+ 65.♔g5 ♖b8 66.f5 ♖g8+ 67.♔f6 The black king is cut off, which means that White's position is easily winning.

67...♔e4 68.♖a7 ♖f8+ 69.♔g6 ♖g8+ 70.♔f7 ♖h8 71.♔g7 We saw a very interesting endgame with a great defence by Black until the moment where the draw seemed so close, but then slipped away. Black gave Dominguez the best present he could ever get ! :)

1-0

(16) Dominguez Perez,L (2723)
— Nakamura,H (2775)

Thessaloniki GP, 28.05.2013

[Chess Evolution]

Queen endgames are extremely difficult. There are a huge amount of theoretical positions, which are almost impossible to remember. In general the attacking side has big winning chances even if the position is drawn. After this game, we can understand that Nakamura has studied this kind of endgames very deeply and succeeded to save half a point thanks to the knowledge of an important defensive method.

57... ♔e5+ 58. ♔h6 b5 Nakamura is heading for the position he is familiar with. [Objectively 58... ♔h8+ is a better move, although White retains very good practical winning chances. 59. ♕g5! (59. ♔h7 ♕d4) 59... ♔e5+ 60. ♔f5 ♕g3+ 61. ♔h5 White always threatens to exchange the queens. Black has a very hard task to hold.]

59.cxb5 ♕xb5 The critical position from White's point of view. Dominguez plays the most natural move, but it turns the position from winning to drawn...

60.h5? [60. ♕g7! was the winning move. The game will demonstrate that White should not let the black king get to e5! 60... ♔e2 (60... ♔e5? does not work now because of 61. ♕h5+!) 61.h5 Black again cannot play ♔e5 because of the check on the e-file. White's king is protected by all the checks with the counterchecks. Let's examine the win in case of the most tenacious defence. 61... ♔c5! Black tries to run to a2-b1 with his king, from where it is the most distant from the counterchecks. 62. ♕f5+ ♔b4 63.h6 ♕g2+ 64. ♔f6 ♕c6+

65. ♕g5! White's winning technique is always connected with the placement of the black king. He must try to shelter his king from the checks with the countercheck ide-

as. Once again Black has no good check. 65...♔a3 66.h7 ♕g2+ 67.♔h4! Here is another case where Black has no good check. Black is forced to stop the h-pawn. 67...♕g7 68.♔h5 ♕b2 69.♕g6 ♕e5+ 70.♔g4 ♕d4+ 71.♔h3 The king is heading to h1! The idea is the same as before: to prevent all checks by counterchecks... 71...♕e3+ 72.♔g2 ♕d2+ 73.♔h1 Here we are again. All the checks on the first rank are met by ♕g1 and there is no more check because of ♕g2 or ♕h2! 73...♕d4 74.♕g3!+- White creates the threat of ♕h2 and h8♕. Black has no good checks, while ♕h8 is met by ♕g8.]

60...♔e5!! The game is drawn now, but Black needs to continue defending precisely!

61.♔g7 ♕c6! Another only move! It is important to put the queen on the h1–a8 diagonal to annoy the Black king with many checks, without having to be afraid of a countercheck. [61...♕b6? loses to 62.h6 ♕g1+ 63.♔f8 and Black has no more check.]

62.h6 ♕g2+ 63.♕g6 ♕b7+ 64.♕f7 [One of the points behind the ♔e5 idea becomes clear after: 64.♔f8 Black can continue checking 64...♕a8+ because 65.♕e8+ allows 65...♕xe8+! 66.♔xe8 ♔f6=]

64...♕g2+ 65.♔h8 ♕a8+ 66.♕g8

66...♕f3! Black would like to squeeze the king into the corner on h8. In many cases he is ready to trade off the queens.

67.♕g6 [The critical move was 67.h7! Black needs to find only move to hold, but I am quite sure that Nakamura would have played it.]

67...♕h5!! Black would like to play ♔f6 or ♔e6 with the idea of ♕f7 (just like in the game), and the h5 square is the only one from where he does not need to be afraid of checking the queen. (For instance after 67...♕f5 68.♕b8+! Black cannot play ♔f6 or ♔e6 because of ♕f8 and ♕c8

followed by exchanging the queens. 68...♔d4 69.♚b4+ ♔e3 70.♚e7+ ♔d2 White is winning here with the technique we have already examined before. He leaves with the king from h8 and protects it from the checks with the use of the Black king. 71.♔g8 ♚d5+ 72.♔f8 ♚f5+ 73.♔e8 ♚h5+ 74.♔d8 ♚a5+ 75.♚c7! ♚g5+ 76.♔c8+- And Black has no more checks.) 68.♚b8+ ♔f6 Black holds the draw, just like in the game.]

67... ♚f8+ 68. ♔h7 ♚f3 69. ♚g7+ ♔e6 Black has an easy draw from now on. He wants to put his queen on f7 or f8, keeping the White king in front of his pawn.

70. ♔g8 ♚h5! Nakamura shows that he would have been familiar with this idea in the 67.h7 line as well.

71.h7 ♚e8+ 72. ♚f8 ♚g6+ 73. ♔h8 ♚f7! The black king is squeezed and the draw is inevitable.

74. ♚c8+ ♔e7 75. ♚c7+ ♔e8 76. ♚e5+ ♔d7 77. ♚b5+ ♔e7 78. ♚g5+ ♔e8 79. ♚g8+ ♚f8 80. ♚xf8+ ♔xf8 1/2

Clash of the Titans

(17) Tal, Mihail – Gligoric, Svetozar [C93]

Candidates qf2 Belgrade (1), 1968

[Kamil Miton]

Some years ago I played in one event in Serbia and during the free day the organizers took me to Mr. Gligoric's place. I had the pleasure to meet this great chess player and although he was already quite old at this moment, he was in good shape, played the piano very well and also liked drinking wine. When I said to him that I am from Poland he told me that he has good memories from my country because he played there in 1947! ;-) Now I would like to comment on one of his nice games.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 a6 4.♙a4 ♘f6 5.0-0 ♙e7
6.♖e1 b5 7.♙b3 d6 8.c3 0-0 9.h3

9...h6 Gligoric is going to play the plan with ♖e8-♙f8, which is a normal setup in the Zaitsev line. I don't know if keeping the bishop on c8 has some meaning. [9...♙b7 10.d4 ♖e8 leads to the famous Zaitsev line.]

10.d4 ♖e8 11.♘bd2 ♙f8 12.♘f1 White is playing the typical knight maneuver. We should note that compared to the correct Zaitsev line (with the bishop on b7 instead of the pawn on h6) White is not able to put the knight on g3 too easily because of some problems with the e4 pawn, which can be hanging.

12...♙b7 13.♘g3 ♘a5 [13...g6?! 14.♘h4± And black has problems with the g6 pawn. After ♔g7, the knight sacrifice on f5 can sometimes work.]

14.♙c2 ♘c4 15.a4 [15.b3 ♘b6 16.d5 c6∞ With good play for Black because White doesn't have the c4 move.]

15...d5! Black's pieces are not worse placed to fight for the center. This typical idea very often enables Black to equalize.

16.b3 [16.♘xe5 ♘xe5 17.dxe5 ♘xe4 (17...♖xe5 18.♙f4 ♖e6 19.e5↑) 18.♘xe4 dxe4 19.♔g4 ♖xe5 20.♙xh6 And White keeps some small pressure.]

16...dxe4 Black could also equalize after: [16...♘d6 17.dxe5 (17.exd5 exd4 18.♖xe8 ♔xe8 19.♔xd4 ♘xd5=) 17...dxe4 18.exf6 (18.exd6 exf3 19.♖xe8 ♘xe8 20.dxc7 ♔xc7 21.♔d3 ♘f6 22.♙f4 ♔xf4 23.♘h5 ♙e4 24.♘xf6+ gxf6 25.♔xe4 ♔xe4 26.♙xe4 ♖c8=) 18...exf3 19.♖xe8 ♘xe8

(19...♔xe8 20.♙xh6! gxh6 21.♖d3 ♘e4 22.♘xe4 ♙xe4 23.♖xe4 ♖xe4 24.♙xe4 ♖b8 25.♙xf3±) 20.♖xd8 ♖xd8 21.axb5 axb5 22.♖a7 ♖a8!]=]

17.♘xe4 ♘xe4 18.♙xe4 [18.♖xe4!? ♙xe4 19.♙xe4 ♘b6 20.♙xa8 ♘xa8 21.axb5 axb5 (21...e4 22.bxa6 exf3 23.♖xf3 ♖e1+ 24.♙h2↑) 22.♘xe5 ♖xe5 23.♖xa8 ♖xa8 24.dxe5 ♖e4 25.f4 ♙c5+ 26.♙h2 White is a pawn up but Black has enough compensation thanks to active pieces.]

18...♙xe4 19.♖xe4 ♖d5 The only move in order to not lose the e5 pawn.

20.♖g4 Tal is true to his style and prepares an attack against the black king.

20...♘a5 21.♙xh6 ♘xb3 [21...♖xb3 22.♖c1 The queen of course needs to support the attack. (22.♘xe5 ♖xd1+ 23.♖xd1 ♖ad8± Black threatens to play ♖xe5 and he has good compensation.) 22...♖e6 23.♖g5 f6 24.♖h4 ♘c4 25.♖g3 ♖f7 26.dxe5 fxe5 27.♖e1↑]

22.♖a3 [22.♘xe5 ♘xa1 23.♖xg7+ ♙xg7 24.♖g4 ♙f8 25.♙xg7+ ♙e7 And White needs to look for perpetual checks.; 22.♖b1 bxa4 23.♘xe5 ♖e6 24.♙e3 c5±]

22...bxa4 [22...f5!?∞]

23.♖xa4

23...♖ab8 Black gives up the pawn but protects the b3 knight with the idea of getting some counterplay against the d4 pawn. [23...exd4 24.c4! (24.♘xd4 ♘xd4 25.♖axd4 ♖c6=) 24...♖b7 25.♘xd4 ♘xd4 26.♖xd4 ♖b1+ 27.♙h2 ♖h7 (27...g6 28.♙xf8 ♖xf8 29.♖h4±) 28.♙e3 White has some initiative thanks to his more active pieces.]

24.♖xa6 exd4 25.cxd4 Black has counterplay against the d4 pawn, but he also needs to be careful because White is a pawn up and has a potential possibility to get a strong attack. [25.♘xd4 c5 (25...♘xd4 26.cxd4 c5 27.♙e3 ♖b4± Xd4) 26.♖f3 (26.c4 ♖d7 27.♙xg7 ♙xg7 28.♖xg7+ ♙xg7 29.♖d6 ♖c8 30.♘xb3 ♖f5∞) 26...♖e1+ 27.♙h2 ♖e5+ 28.♙f4 ♘d2 29.♖d3 ♖h1+ 30.♙g3 ♘f1+ 31.♖xf1 ♖xf4+ 32.♖xf4 ♖xf1 33.♘f5±]

25...c5 26.♙e3 ♖b4 [26...cxd4 27.♘xd4 ♖b4 28.♖h4 ♙c5 29.♖h5 (29.♖ah6 only leads to a draw: 29...gxh6 30.♖g4+ ♙f8 31.♙xh6+ ♙e7 32.♙g5+ ♙d6 33.♙f4+ ♙e7 34.♙g5±) 29...♖e4 30.♘f5 ♙xe3 31.♘xe3±; 26...♖a8 27.♖e2 ♖xa6 28.♖xa6 ♖a8 29.♖f6 ♖a1+ 30.♙h2 ♖d6+ 31.♖xd6 ♙xd6+ 32.g3 f6 33.♙g2±]

27. Rg5?! Not the most accurate move, but the position is very complex and even the best attacking player in the world didn't manage to calculate all the possibilities. White should have played [27. Rh4! Nxd4 (27... Qe7 28. Ng5 Qxg5 29. Qh5 Qxh4 30. Qxd5 Nxd4 31. Qxc5±; 27... cxd4 28. Qd3 f5 29. Ng5 And now the very unpleasant threat is Qd1 with the tactical idea of playing Rh8!-Qh5-Qh7. 29... Qe7 30. Ra7→; 27... g6 28. Qd3→) 28. Nxd4 cxd4 29. Qd3 f5 30. Rxd4 Rxd4 31. Qxd4 Qxd4 32. Qxd4± Objectively the position should be drawish but Black will have to defend for a long time.]

27... Qb7 A good place for the queen because Black will sometimes threaten to play Rb1.

28. Rh6

28... Nxd4?! White could have gotten into trouble after [28... g6 A very simple move and the white attack is suddenly stopped. 29. Rhxg6+ (29. Rh4 Nxd4 30. Qxd4 cxd4 31. Qd3 Qg7 The white rooks are now very clumsily placed.) 29... fxg6 30. Rxxg6+ (30. Qd3 Qe4) 30... Qg7 And White doesn't have any attack anymore.]

29. Nxd4 Rb1 [29... cxd4?? 30. Qh5+-]

30. Qc1

30... Qb2? looks nice, but this move is a big mistake. Black should have played [30... cxd4 31. Qh5 Rxc1+ 32. Qh2 Qc7+ 33. g3 g6 And here White at least has a draw: 34. Rh8+ Qg7 35. Rh7+ Qg8 (35... Qf6 36. Qf3+) 36. Rxxg6+ fxg6 37. Qxxg6+ Qg7 38. Rxxg7+ Qxxg7 39. Qxe8±]

31. Qh5?? The decisive mistake. We will soon see what was wrong with his calculation. White could have won after a very complicated variation: [31. Nb3 Qxb3 (31... g6 32. Rhxg6+ fxg6 33. Rxxg6+ Qg7 (33... Qf7 34. Rg3 With a strong attack.) 34. Qxb2 (34. Qd5+ Qh8 35. Qh5+ Qg8 36. Rxxg7+ Qxxg7 37. Qxe8 Rxc1+ 38. Qh2 Rc2 39. Qxc5 Rxf2=) 34... Rxd1+ 35. Qh2 Rb1 36. Rxxg7+ Qf8 37. Rg4 Rxb2 38. Rf4+ Qg7 39. Qxc5± The white pawns are too strong and White should be winning.) 32. Qh5 Rxc1+ 33. Qh2 Qd6+ 34. Rxd6 Qb1 35. Qh6 Rh1+ (35... Qh7 36. Qf6→) 36. Qg3 Qb3+ 37. f3 Qc3]

38. ♖f6! ♕e1+ 39. ♔g4 ♖e4+ 40. fxex4 ♕xe4+ 41. ♔g3 ♕e1+ 42. ♖f2 ♕e3+ 43. ♔g4 ♕e4+ 44. ♔h5 g6+ 45. ♖xg6+ ♕xg6+ 46. ♕xg6+ fxg6+ 47. ♔xg6+ -]

31... ♕xc1+ 32. ♔h2 ♖d6+ 33. ♖xd6 ♕f4+ 34. ♖g3 ♕xd6 35. ♖f5

35... ♖ee1! I suppose that Tal overlooked this trick when he played 31. ♕h5.

36. ♕xf7+ ♔xf7 37. ♖xd6+ ♔e6 38. ♖g6+ ♔d5 39. ♖f5 Black is winning now thanks to his quick c-pawn.

39... ♖b7 [39... c4 40. ♖e3+ ♖xe3 41. fxe3 c3 -+]

40. ♖e3+ [40. ♖g5]

40... ♖xe3 41. fxe3 ♖c7 42. ♔g3 c4 43. ♔f4 c3 44. e4+ ♔c4 45. ♖a6 c2 46. ♖a1 ♔d3 0-1

Editorial Preface

And once again we could be the spectators of a great chess week.

Clearly the main event of the week has been the World Championship in Blitz and Rapid chess, which was held in Khanty-Mansisk. A great line-up of Super GMs was battling for the title.

The new World Rapid Chess Champion is Shahriar Mamedyarov with 11.5/15. Ian Nepomniachtchi finished in 2nd place with 11/15 and 3rd place went to Alexander Grischuk with 10.5/15.

In Blitz, Le Quang won with 20.5/30, 2nd place went to Alexander Grischuk and 3rd to Ruslan Ponomarev.

We saw a lot of great and very spectacular games from the event and we are of course going to comment a couple of them for You!

The Tal Memorial Blitz tournament was won by Nakamura with the great score of 7/9. Anand came 2nd with 6.5/9, while 3rd place went to Kramnik with 5.5/9.

We can be very curious about the upcoming games in normal chess.

The match between Ivanchuk and Giri ended 8.5-7.5 in favor of Ivanchuk.

Enjoy CEWN Nr 68!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Eljanov,Pavel (2707)
—Karjakin,Sergey (2782) [A07]

Kiev UKR Kiev UKR (3), 05.06.2013

[Csaba Balogh]

Sergey Karjakin completely deservedly won this tournament, but in this game he ran into an unpleasant defeat.

1.♘f3 ♘f6 2.g3 Eljanov would like to avoid a theoretical battle and plays the Reti opening.

2...d5 3.♙g2 c6 4.0-0 ♙g4

5.h3 This is a rare move. In general Black decides what to do with the g4 bishop in accordance with White's setup. Sometimes it takes on f3, sometimes it goes back to h5-g6, but in some cases, for instance if Black has played ♘bd7 and e5, he can even retreat to e6. White wants to change the orders and he first asks what to do with the bishop and only then decides which setup to choose.

5...♙h5 6.c4 e6 7.♚b3 ♚c8 Black does not want to move into the the ♙f4 tempo, so he refrains from playing ♚c7. [However 7...♚b6 was much more logical. Doubling the b-pawns would just favor Black, while Black himself sometimes wants to take on b3. 8.d3 ♘bd7 9.♙e3 ♙c5 Black is ok.]

8.♘c3 ♙e7 9.d4 0-0

10.♙f4 White develops all his pieces in the most natural way. He seems to achieve some edge out of the opening.

10...♘bd7 11.♚ac1 ♘b6 We got a typical Slav pawn-structure, where this ♘b6 move is a known idea to force White to change the pawnstructure in Black's favour. In case White plays c5, the knight retreats to d7 and then Black will undermine the c5 pawn by playing b6. [11...dxc4 It made no sense to give up the center because after 12.♚xc4 ♘d5 White can save his bishop with 13.♙d2± and he is going to occupy the center with e4.]

12.cxd5 exd5

13. ♘e5! Making use of the 5.h3-♙h5 pair of moves! If they hadn't been included Black could simply trade the bishops with ♙h3 or retreat to e6 followed by ♘fd7, with a comfortable position. However as we will see, the bishop on h5 gets into some trouble.

13... ♖e8? After this natural move, Black gets into trouble. [13... ♔d8 was necessary in order to have 14.a4 a5!]

14.a4!! An extremely unpleasant move! Black is facing the simple threat of a5 and after ♘bd7 White wins a pawn with ♘xd5, thanks to the pin on the c-file. It is not easy to prevent this at all, since Black can neither play a5 because of the b6 knight nor leave the pin with the queen because this would leave the b7 pawn unprotected.

14... ♙d8 [14... ♙f8 15.a5 ♘bd7 16.g4 ♙g6 17.♘xg6 hxg6 18.♘xd5+- Black collapses.; 14... ♙d6 drops a piece after 15.g4! ♙g6 16.♘xg6+-]

15.g4 [15.a5!? was also good. 15... ♘c4 (15... ♘bd7 16.♘xd5!) 16.♘xc4 dxc4 17.♔xc4 ♙xa5 This was the point of ♙d8, but White has a big positional advantage after 18.b4 ♙b6 19.e3± followed by b5, opening the diagonal for the g2 bishop and destroying Black's pawnstructure. 19...

a6 20.d5! cxd5 21.♔xc8 ♖axc8 22.♘xd5 ♘xd5 23.♙xd5 And the b7 pawn will fall.]

15... ♙g6 16. ♙g3! With the idea of f4-f5, trapping the bishop. This threat is not easy to deal with because the other idea with a5 and ♘xd5 is also in the air.

16... ♙c7 17.f4 ♘e4 [On 17...h6 18.f5 ♙h7 19.e4!+- is kind of decisive, since Black cannot take on e4 because of the f7 pawn.]

18. ♙xe4! As we will see in the game, it is much more important to keep the c3 knight on the board rather than the g2 bishop.

18... ♙xe5 [Black loses the f7 pawn if he takes back immediately on e4: 18... ♙xe4 19.♘xe4 ♙xe5 20.fxe5+-; 18... dxe4 19.f5+-]

19.fxe5 dxe4 20.a5! One of the reasons for keeping the c3 knight instead of the g2 bishop is to control the d5 square, while another point can be seen in the 20...♘d7 line.

20... ♘d5 Karjakin tries to complicate the matters. [On 20...♘d7 White has 21.♘b5!+- followed by ♘d6, which wins material and the game!]

21. ♖xd5 ♕e6 White cannot save the piece, but he can sacrifice it in order to destroy Black's pawnstructure.

22. ♘f6+! gxf6 **23.** ♔e3! Black's king is in huge danger. White is threatening to play ♕h6 and ♙h4-f6. [23. ♕xb7 was also winning, but Eljanov is playing for mate.]

23...f5 [23...fxe5 24. ♙xe5+- Followed by ♕h6.]

24. ♙h4! f6 The only move to open the seventh rank in order to defend against the mate with ♙f6 and ♕h6-g7, but Black is lost anyway. [24...fxg4 25. ♙f6 is over.]

25. ♙xf6 [25.gxf5 ♙xf5 26. ♙xf6+- was also winning.]

25...fxg4 26. ♕h6 ♖e7 This is equal to resignation, but the game was over anyway. [On 26... ♕d7 27.h4! is finishing the game as h5 is coming next.]

27. ♙xe7 ♕xe7 **28.** ♖f6 White is huge material up and he continues attacking.

28...♕d7 29. ♖cf1 ♕xd4+ **30.** ♔h1 ♕b4 It is time to make the final blow!

31. ♖xg6+! hxg6 **32.** ♕xg6+ ♔h8 **33.** ♕h5+ [Black resigned in view of 33. ♕h5+ ♔g8 (33... ♔g7 34. ♖f7+ ♔g8 35. ♕h7#) 34. ♕xg4+ ♔h8 35. ♕h5+ ♔g8 36. ♕g5+ ♔h8 37. ♖g1+- Followed by mate on the next move. An impressive win.]

1-0

(2) Mamedyarov, Shakhriyar (2753) — Inarkiev, Ernesto (2680) [D31]

FIDE World Rapid 2013 Khanty-Mansiysk RUS (15.1),
08.06.2013

[Arkadij Naiditsch]

It is with this game that Mamedyarov became the new World Champion in Rapid chess, so to comment this game is a must! We will see not a very high level game, but we are literally able to taste the tension of the fight for the WC title!

1.d4 d5 2.c4 e6 3.♘c3 a6 A rare line, but not a stupid move at all, especially in rapid chess. Mamedyarov had to win this game to take the title, as a draw would only give him 2nd place...

4.cxd5 [The idea of the move 3... a6 is easily visible after 4.♘f3 dxc4 5.e4 b5]

4...exd5

5.♙f4 Now we have some sort of Queen's Gambit, but with the move a6 for Black, which we can count as a „lost

half tempo“. On the other hand, Black now has other development plans...

5...♘f6 6.e3 ♙d6!? I like this move a lot! Now we can see the difference: usually Black has his bishop on e7, but here ♙d6 is looking much stronger.

7.♚f3 Mamedyarov is searching for complications! The more solid move 7. ♙xd6 ♚xd6 8. ♙d3 would of course have led to a minimally better position of White.

7...c5 Black is also not afraid of sharp play. The position is quickly getting complicated. [Black could have played 7...0-0 8. ♙g5 Nothing else makes much sense for White. 8... ♙e6 9. ♙xf6 ♚xf6 10. ♚xf6 gxf6 And I think that if White is better here, it is only a very minimal advantage.]

8.dxc5 ♙xc5 9. ♙g5 White is immediately trying to put a maximum of pressure on the d5 pawn.

9...♘bd7!? Nice play. The d5 pawn cannot be taken now and Black is hoping to get fast play on the queenside.

10.0-0-0 ♚a5 A typical rapid game move. Objectively it is not the best one, but practically it is very strong. [After 10... ♙e7 Black would remain with a nice position.]

11. ♘ge2?! After this move, Black is probably just better. [White should have gone for the more concrete 11. ♘xd5 0–0 The game is now getting very direct: 12. ♘xf6+ ♘xf6 13. ♙xf6 gxf6 It looks like Black has enough play, but White has a big joker in his hands... 14. ♖b1 ♙e6 How to protect the a2 pawn now? 15. ♙c4! Only this move gives White a clear advantage! The check on g4 is saving White, but such a line is of course not easy to see, especially in rapid chess.]

11...0–0 And we can see that Black's play on the queen-side is clearly more advanced than White's threats on the d5 pawn.

12. ♘d4! A good and solid move by White.

12... ♙b4 [12... ♘e4!? would have led to very sharp play.]

13. ♘b3 ♖c7 It looks like the position could almost be a draw!

14. ♖f4?! Objectively a bad move, but White is showing an amazing will to win the game and avoid a fast draw. [A normal move like 14. ♙f4 ♖c6 15. ♘d4 ♖c5 16. ♘b3 ♖c6 would lead to a repetition of moves.]

14... ♖xf4?! Black „chickens out“ from a real fight. [14... ♙d6! would have been a „real“ move. 15. ♖f5 b5 With a very fighting position, but the initiative should probably be on Black's side.]

15. ♙xf4 ♙xc3 16. bxc3 ♘e4 We have reached a strange endgame. I would say the position should be around equal.

17. ♖xd5 ♘xf2 18. ♖g1 ♘f6 White has the bishop pair, but Black the much better pawn structure and a huge knight on e4!

19. ♖d4 ♙d7 A nice way to develop the pieces. Now the bishop from d7 can take place on c6, on b5, or even come back to e6 or f5, all options are open.

20. ♙e2 ♖ac8 21. ♖b2 ♖fe8 All black pieces are developed, and so are the white ones.

22. h3 h6 2 accurate moves.

23. ♖f1 ♘2e4 24. c4 The position remains quite unbalanced, but the evaluation should be around equal. But on the next move we will see how big the pressure is in such a game!

24...♘g5?? What a terrible blunder...

25. ♖xg5 hxg5 26. ♖xf6! This tactic is too easy to miss.

26...gxf6 27. ♖xd7 It seems like the game is just over. White has a rook on the 7th rank and his bishop will soon join the attack.

27...♖xe3 28. ♖h5 b5!? Black is trying all his practical chances in this lost position.

29.c5 Closing the c-file.

29...a5!? And again Black is fighting!

30. ♖xf7+ ♔f8 31. ♖g6? What a mistake by White! Being only one step from a World Championship Title, Mamedyarov is getting nervous. [After the simple 31. ♖d5 a4 32. ♘d4 a3+ it looks like Black has found some small counterplay, but in fact the game is just over. 33. ♔c2 ♖xc5+ 34. ♔d2 White should easily be winning here.]

31...a4 Black misses his best chance. [31...♖e2+ 32. ♔c3 ♖xg2 And White would still have to „work” for a full point.]

32. ♘d4 ♖xc5 Falling into a little trap:

33. ♖d8+! A nice little trick, winning a bit more of Black's material.

33...♔g7 34. ♘f5+ ♔xg6 35. ♘xe3 The position is now of course completely winning, but some small technique is still needed.

35...b4 36. ♖d3 ♖e5

37.g4! A good move, fixing Black's pawn structure.

37...♖e4 38. ♘c2 White just wants to play ♖d4 next.

38...♖e2 39. ♔c1 The b4 pawn is hanging.

39...f5 40. ♖d6+ ♔f7 41.gxf5 b3 Black is trying the last tricks, but of course nothing works.

42.axb3 axb3 43. ♘d4 ♖e3 44. ♘c6 ♔f8 45.f6 The f-pawn is the future Queen :)

45...♔f7 46. ♘d8+ ♔f8 47.f7 ♖f3 48. ♖e6 What a game! Congratulations to Mamedyarov on his new WCC title in rapid chess!

1-0

(3) Karjakin,Sergey (2782) – Topalov,Veselin (2784) [C11]

Sberbank GM Rapid Kiev UKR (4), 06.06.2013

[Csaba Balogh]

Karjakin and Topalov were dominating the very strong field of the rapid tournament in Kiev. In the end Karjakin really needed this victory over his main rival.

1.e4 e6 A small surprise by Topalov, who usually plays the Najdorf.

2.d4 d5 3.♘c3 ♘f6 4.e5 ♘fd7 5.f4 c5 6.♘f3 ♘c6 7.♙e3
We have reached the starting position of the 3.♘c3 ♘f6 systems of the French defence. Black can choose between various different setups here, Topalov goes for the old mainline.

7...a6 [Nakamura recently enjoyed playing the most direct 7...cxd4 8.♘xd4 ♙b6 9.♙d2 ♙xb2 with very long and sharp lines.]

8.♙d2 b5 9.dxc5 White's strategy in most of the lines is to consolidate a knight on d4. In the opening part he usually does a lot of efforts to achieve this.

9...♙xc5 10.♙d3 Karjakin has already tried this rare move a few times. White first develops his bishop to its ideal place and then he intends to transfer the c3 knight to d4 through the e2 square. [10.♙xc5 is the most common move 10...♘xc5 11.♙f2 ♙b6 12.♙d3 but Black gets counterplay after 12...b4! 13.♘e2 a5! 14.0–0 ♙a6! Black wants to get the e4 square to compensate for the d4 one. There are still hundreds of games, but current theory shows that Black should be fine here.]

10...d4? Topalov played this most direct move without thinking, but Karjakin was well prepared against it. After this game, I doubt that anyone will repeat it on the highest level. [10...♙b6 11.♙f2 This is the point of the whole setup with 10.♙d3: White does not lure the knight to c5, which makes it possible to answer 11...b4 with 12.♘a4! ♙xf2+ 13.♙xf2 ♙xf2+ 14.♙xf2

This kind of typical French endgame is always slightly better for White. He has a space advantage and he is better on both sides of the board. There are many different ways to improve the position, for instance by playing ♖ac1 and c3 or taking ground on the kingside by advancing the pawns. The a5–♙a6 plan is less effective now, as White

can either just wait for ♖xd3 and cxd3 after which the c-file opens in his favour, or he can also play ♖b5, working out the d4 square for the knight.]

11. ♖xd4 ♖xd4

12. ♖e4!! A huge novelty and a great preparation! The following lines show that Black is unable to save his extra piece and he ends up in a bad position everywhere. [It looks like the only way to win back the piece is 12. ♖e4 but in this case Black gets more than enough compensation after 12... ♖b6! 13. ♖xa8 ♖c4 14. ♖xd4! is the only move to stay in the game. (14. ♖d3 ♖xe3 just wins for Black!) 14... ♖xd2 15. ♖xc5 b4! This had to be Topalov's preparation. The game remains unclear, but Black is fine in all the lines. 16. ♖xb4 ♖b6! is the point with the double threat on b4 and e3. This would have been nice, but Karjakin's 12th move seems to refute the whole idea.]

12... ♖h4+ [On 12... ♖b7 13. ♖xd4 ♖xd4 14. ♖d6+ wins the bishop.; 12...0-0 White has two good moves now: 13. ♖xc5 (13.c3!? is also good enough.) 13... ♖xc5 14. ♖xd4 With a clear extra pawn, since Black cannot take on d4. 14... ♖xd3+ (14... ♖xd4? 15. ♖xh7+-) 15. ♖xd3±; 12... ♖xc2+ is the only move that keeps the balance at least

materially, but Black's position also remains very bad here. 13. ♖xc2± White has a clear advantage because of the e4 knight, which is ready to jump to d6.; On 12... ♖b6 White wins back the piece after 13. ♖d6+ ♖f8 14. ♖e4 attacking two pieces in one move.]

13. ♖f2 ♖g4 [13... ♖xc2+ was a better practical try 14. ♖xc2 ♖xf2+ 15. ♖xf2 ♖xf2+ 16. ♖xf2

16... ♖e7 but after some really energetic moves, White gets very close to be winning: 17. ♖d6! At first sight this move might look premature as it allows Black to undermine the e5 pawn 17...f6 18. ♖e4 ♖b8 but now White can focus on bringing both of his rooks to the action and he does not need to pay attention to his central pawns...

19.♖ac1! fxe5 20.♖hd1! Black has no adequate defense against the penetration with ♖c7! 20...exf4 21.♖c7+-]

14. ♖xd4! This is the most precise way to win the piece back. [After 14.♗xc5 ♗xc5 15. ♖xd4 Black gets very good compensation on the light squares 15...♗xd3+ 16.cxd3 0–0 Followed by ♖b7 and ♖fd8. Despite being a pawn down, Black is probably not worse at all.]

14... ♖xd4 15. ♗d6+ ♖e7 [15...♖f8 makes no difference to the game: 16. ♖e4 ♖xb2 17.♖b1+-]

16. ♖e4 White wins the material back and he retains extremely good mating chances with the knight on d6 against the black king, which is stuck in the center.

16... ♖xb2 17. ♖b1 ♖a3 [17...♖b8 18.♖xb2 Despite the material equality, Black's position is hopeless. For instance after 18...♖d8 19.♖b4 wins.]

18. ♖xa8+- White is an exchange up and he continues attacking.

18... ♖c5 19. ♖f3 ♖g6 20. ♗e4 Whenever the bishop leaves the a3-f8 diagonal ♖b4 will win the game.

20... ♖d8 21. ♖d1 ♖b6 22. ♖b4+ 1–0

(4) Giri,Anish (2734) – Ivanchuk,Vassily (2753) [A01]

26th Leon Masters g5 Leon ESP (1), 09.06.2013

[Arkadij Naiditsch]

The blitz match between Giri and Ivanchuk started with a funny game, which deserves some attention.

1.b3 A bit of a provocation by Giri

1...b6 and a deserved answer by Ivanchuk :)

2. ♖b2 ♖b7 3. ♗f3 Lately 1.b3 became somewhat more „fashionable“. Jobava played a lot of games in normal chess and even Kramnik has tried it a couple of times. Of course it is just an attempt to play „normal chess“ without much theory.

3...e6 4.e3 ♗f6 Until here we got a symmetrical position.

5.g3?! I don't like this move too much. It would have been better for White to get back to „normal“ lines by playing 5.c4.

5... ♖e7 6. ♖g2 0–0 Black does not hurry with playing d5 or c5 and tries to first figure out what White is actually going to do.

7.0–0 c5 The most logical move, but 7...d5 would have been fine too.

8.c4 d6?! Why so shy?! 8...d5 would have given Black nice play.

9.♘c3 ♘bd7 10.d4 And we are back to a „normal“ chess position. White wants to play d5 next.

10...♘e4 A normal way of playing this kind of position. On one hand it does not stop the d5 move, but on the other hand the d5 move is not going to be that strong anymore after Black managed to exchange one pair of knights.

11.d5?! A logical, but probably wrong positional decision. [11.♙c2 With a normal position.]

11...♘xc3 12.♙xc3

12...exd5! The right decision. Black's future play on the queenside is going to be very effective.

13.cxd5 ♙f6 The right choice once again. To exchange the black squared bishops is definitely good for Black.

14.♙c1 ♙xc3 15.♙xc3 ♘f6 Black is putting his pieces on good squares before starting the march on the queen-side.

16.♘h4 A typical move. White's main idea is to play e4-f4-e5.

16...♙e8 Avoiding e4.

17.♙e1 And White is trying to play e4.

17...♘e4?! Black probably blundered White's next move. [17...b5 followed by ♙b6 would have given Black nice play.]

18.♙c4! And the white knight has no other choice but to go back.

18...♘f6 19.e4 g6 Usually a good move in order to cut the white knight on h4, but the game is getting quite tricky now.

20.f4 White is ready for the main push of the position: e5.

20...b5 21.♙c2 ♙b6 Black is trying to put his pieces as good as possible against the e5 push.

22.e5 As we will see later this move is mistake, but it was very hard to calculate everything. [22.♔h1 with the idea of playing e5 would have been more accurate.]

22...dxe5 23.fxe5 It looks like White managed to do what he wanted, but...

23...♞xd5! A very strong piece sacrifice! Things are getting very complicated now.

24.♞xd5 ♜ad8 White is suddenly in a very unpleasant pin.

25.♞d2 [After 25.♞xf7+ ♔xf7 Black is of course clearly better. The white knight on h4 is totally out of the game]

25...c4+ This was Black's main idea, which was probably missed by White.

26.♔f1 c3

27.e6! White manages to find a nice resource under pressure. [27.♞d3 was losing as after 27...c2 the c-pawn is unstoppable. 28.♞d2 ♜xd5 29.♞xd5 ♞xd5 30.♞xd5 ♞d8 Followed by ♞d2 or ♞d1 with a winning position for Black.]

27...♞xd5?! Not the best choice. [After 27...♞xd5 28.♞xd5 fxe6 29.♞d3 the position would have remained very complicated.]

28.♞xd5 fxe6 29.♞d4? A big mistake, after which Black is taking over. [29.♞d3! would have been the right square for the white rook. 29...♞f8+ 30.♞f3 c2 31.♞e2 And White should be better here.]

29...e5! Ivanchuk doesn't miss his chance. ♞f8 is now a deadly threat.

30.♞f5 White already doesn't have any good move anymore.

30...♞f8 31.♞xe5 c2! White is losing material and the game.

32.♞xc2 ♞xd4 This would have been a good moment to resign, but Giri continues the game like in a rush.

33.♞e8 ♞a1+ 34.♔f2 ♞xe8 Black is a full rook up.

35. ♖h6+ ♔h8 **36.** ♖f7+ ♔g7 White has no more checks.

37. ♔c7 ♔e1# It must have been a big pleasure for Ivanchuk to mate his opponent who has started the game with 1.b3, which can be interpreted as a sign of some disrespect!

0-1

Endgame section

(15) Nepomniachtchi, I (2717)
— Mamedyarov, S (2753)

World rapid Championship, 07.06.2013

[Chess Evolution]

White has a small advantage in this endgame. First of all the bishop is stronger than the knight when there are pawns on both sides. Black cannot activate his rook because it must always guard the b7 pawn. Black's pawn structure on the kingside is also not the most fortunate one with the hole on f6. It would have been much better to keep the h7-g7-f6 formation and bring the king to f7-e6. But it is of course going to be very difficult for White to convert the advantage with such a limited material.

31. Rxc5 White creates the threat of a6 and activates his rook, which had nothing to do on g5.

31... Rd6 32. g4! A strong positional move with the idea of gaining space on the kingside and restricting the mobility of the black pawns.

32... f6 Black would like to bring his king closer to the center, but on the other hand the f6 pawn becomes slightly vulnerable.

33. Rb5 Nd8 The only way to protect the b7 pawn, since Rd7 would drop the f6 pawn.

34. Bb4 Trying to confuse the coordination between the black pieces.

34... Rd7 [If the rook leaves the d-file, White can play 34... Rc6? 35. Rd5! followed by Rd7.]

35. Rb6 Kf7 36. Bc3 Further activating of the pieces forces Black to allow the White king to go to the kingside.

36... Re7+ [36... Nc6? runs into 37. a6!]

37. Kd3! This is another huge achievement by White. The king might very quickly get to the b7 pawn.

37... Re6 38. Rb5! White needs his active rook on the board in order to increase his advantage.

38... Rd6+ 39. Kc4 Ke6

40.f4! White is ready to push f5. If Black takes it, after ♖xf5 he will already have three weak pawns and if he doesn't, he will be pushed back into even bigger passivity.

40...♖c6+ 41.♔d3 ♖d6+ 42.♔e4 And f5 now becomes inevitable.

42...♖c6 43.♙d4 ♔d7 44.f5! If it was White's move, he would play h5, creating the threat of a breakthrough with fxc6-hxc6 and h5. Black's position is getting more and more unpleasant.

44...g5 Not an easy decision. Black fixes his own pawns on the color of the bishop. This is against the principles, but the h4 idea was too threatening.

45.♙c5 White would like to get his king to d5 and he therefore prevents ♖d6.

45...♔e8 46.♔d5 ♔d7

47.♖b3 Nepomniachtchi finds the right plan to transfer the rook to the e-file, but he makes an inaccuracy in the execution. [47.♔c4! was the way to win 47...♖c7 (On 47...♖a6 48.♙b6! ♘c6 49.♖d5+ ♔e7 50.♙b5 ♖a8 51.♖d3! Black is in zugzwang. Let's check his options: 51...♔e8 (51...♖a6 is refuted by 52.♖c3! with the threat of ♖xc6 and on 52...♖a8 53.a6! ♖xa6 54.♖xc6 wins.) 52.♖d6 ♔e7 53.♖xc6! bxc6+ 54.♔xc6 And the a-pawn automatically promotes after ♔b7.) 48.♖b3 ♘c6 49.♙b5 White wins. The next step could for instance be ♖d3-d6. 49...♘xa5 (49...♘e5 50.♙d4+-) 50.♖d3+ ♔e8 51.♙b6+-]

47...♖a6! Black quickly finds counterplay against the a5 pawn. White has to look for another plan.

48.♖b5 ♖c6 Instead of ♔c4, White now tries a triangulation.

49.♔e4 ♔e8 50.♔d4 ♔d7 51.♔d5 ♖c8? [51...♖a6 was the only chance, White can switch to the right plan with ♔c4 anytime.]

52. ♖b6! The game is over now. After trading the minor pieces, the rook endgame is winning.

52...♙e7 [52...♘c6 loses to the double attack after 53. ♖d4! ♘xd4 54. ♖xb7+-; 52...♘f7 53. ♖d4+- also wins material.]

53. ♖xd8+ ♖xd8+ 54. ♖c5 ♖d7 With pawns as weak as the ones on f6 and b7 and without a chance to find some active counterplay or creating a passed pawn, Black is forced to stay in passivity, but then his loss is just a matter of time.

55. ♖b6 ♖c7+ 56. ♖b5 The plan is to play ♖e6 followed by ♖b6.

56...♙f7 57. ♖d6 ♙e7 58. ♖e6+ ♙f7 59. ♖b6 ♖d7

60. ♖e3! White finishes the game by transferring his rook to c7!

60...h5 61. ♖c3 hxg4 62. hxg4 Black resigned! An impressive technical victory of Nepomniachtchi, which might remind us of the best days of Anatoly Karpov.

1-0

(16) Vallejo Pons, Francisco (2706)

FIDE World Rapid 2013 Khanty-Mansiysk

RUS (15.8), 08.06.2013

[Chess Evolution]

We are facing a very interesting endgame. It is clear that White should be better, but things are far from clear. White's idea is simply to get the rook to the 8th rank and to start attacking Black's pawns, but we will only see if this is enough for a full point during the next moves.

31. ♖a3 g5! The only move! It is time to create fast counterplay, otherwise White's ♖b3-♖b8 could be deadly.

32. ♖b3 ♗g2 Provoking White to play h4.

33. h4 gxh4 34. gxh4 f4 By getting a free f-pawn, Black is gaining clear play.

35. ♖b8 ♗e4 From e4, the bishop will protect the h7 pawn as well as the c-pawn once he advances to c6.

36. ♖c8 c6 37. ♖a8 White is going to take one of Black's pawns, but this is giving Black enough time to activate his king.

37... ♔f6 38. ♖xa6 ♔f5 The black king is going to take the h-pawn.

39. ♔e2 ♔g4 40. ♖a7 White tries to bring his rook back into the game.

40... ♔xh4 41. ♔f2 ♔g5 By now it is clear that the game will most likely end in a draw.

42. ♖e7 d5 We are now entering a very forced line which ends with a draw agreement.

43. ♖e6 The c6 pawn is falling, but Black's h-pawn is very fast.

43... h5 44. ♖xc6 h4 The black bishop on e4 is a beast!

45. cxd5

45...h3 Another only move!

46.♔g1 f3 White will have to give the rook back, but Black will have no more pawns left.

47.♖xc5 f2+ 48.♔xf2 h2 And we can see that a draw is the logical result here.

49.d6+ ♔f6 50.d7 ♔e7 The rest of the game needs no comments.

51.♖h5 h1♔ 52.♖xh1 ♖xh1 53.d8♔+ ♔xd8 54.b4

What we can learn from such an endgame is that a centrally placed bishop is sometimes as strong as a rook!

Clash of the Titans

(17) Fischer, Robert James
— Cardoso, Radolfo Tan [B11]

Portoroz Interzonal Portoroz (20), 1958

[Kamil Miton]

1.e4 c6 2.♘c3 d5 3.♗f3 dxe4 A rare move. Black usually plays [3...♙g4 4.h3 ♙xf3 (Worse is 4...♙h5 5.exd5 cxd5 6.♙b5+ ♘c6 7.g4 ♙g6 8.♗e5 and White has the unpleasant idea to play h4 next.) 5.♙xf3 e6 6.d4 (6.d3 leads to a position where both sides have many different plans.) 6...dxe4 7.♗xe4 ♙xd4 8.♙d3 White has some compensation thanks to his better development.]

4.♗xe4 ♙g4 5.h3 ♙xf3 [5...♙h5 6.♗g3 ♙xf3 (6...♙g6 7.h4! And Black will have problems with the bishop: 7...h6 8.♗e5 ♙h7 9.♙h5 g6 10.♙f3 ♗f6 11.♙b3 ♙d5 12.♙xb7 ♙xe5+ 13.♙e2+-) 7.♙xf3 e6 8.♙c4 ♗f6 9.c3 ♗bd7 10.d4 White has a long term advantage because of the bishop pair but on the other hand Black's position is very solid in this kind of structures.]

6.♙xf3 ♗d7 [6...e6 7.b4!? An interesting move with the idea of immediately putting the bishop on an open position after b5 as well.]

7.♗g5?! The beginning of a wrong plan. [7.♙c4 ♗e5=; 7.d4 was the correct move. 7...♗gf6 8.c3 e6 9.♙d3 ♗xe4 10.♙xe4 ♙d6]

7...♗gf6 8.♙b3 e6 9.♙xb7 White won a pawn but in return Black gets a better development and the queen could also be under pressure on b7 soon.

9...♗d5 10.♗e4 [10.♙xc6 ♖c8 11.♗xe6 ♖xc6 12.♗xd8 ♗xd8 13.c3 ♖e6+ 14.♙d1 And Black should be better, especially thanks to the idea of ♖f6 in order to force White to play f3 and thus weaken his kingside structure.; 10.d4 ♙e7 11.♗e4 ♗b4 12.♙d3 ♖b8 13.♙xa7 ♖a8 14.♙b7 With at least a draw or: 14...♙a5 15.♙d2 ♖b8 16.♙xc6 ♗xc6 17.♙xa5 ♗xa5 18.0-0-0 0-0-0]

10...♗b4

11.♔d1 The king seems to be safe on d1, but the queen on b7 is in much bigger trouble.

11...f5 12.c3 [12.a3 ♖b8 13.♙xa7 ♖a8 14.♙d4 fxe4 15.♙xe4 ♙f6 16.♖b1 ♘d5 And again one piece should be better than three pawns.]

12...♖b8 13.♙xa7 fxe4?! An inaccuracy as Black could have gotten a strong initiative after [13...♘d5 14.♙a4 (14.c4 ♘5b6 15.♘g3 ♙c5↑) 14...fxe4 15.♙xe4 ♘c5↑]

14.cxb4 ♙xb4 15.♙d4 0-0 16.♙c4

16...♘c5?! I don't like this move at all. Why exchange the queens when Black has a strong initiative? [16...♙h8! 17.♖f1 (17.♙xe4 ♖xf2+; 17.♙xe6 ♘c5 In this case White will lose the f2 pawn. 18.♙xd8 ♖bxd8 19.♙c4 ♖xf2+ 17...e5 18.♙xe4 ♘c5 19.♙xe5 ♖e8 All black pieces are very active, which makes this position very unpleasant to play for White in a practical game.)

17.♙xd8 ♖bxd8 The position is easier to play for White without the queens.

18.♖f1 [18.a3 ♙xd2 19.♙e2 e3↯ (19...♙xc1 20.♖hxc1 ♘d3 21.♙xd3 (21.♙xe6+ ♙h8 22.♖xc6 ♖xf2+ 23.♙e3 ♖xb2 24.♙xe4 ♖xg2 25.♖d1 ♘f2+ 26.♙f3 ♘xd1 27.♙xg2

♘b2=) 21...exd3+ 22.♙f1 Black's position looks very unpleasant because of his much worse structure and his d3 pawn can also be weak.) 20.f3 Otherwise the black knight will jump to e4. 20...♖f4 21.b3

21...♖xc4! 22.bxc4 ♘a4 23.♙xd2 exd2 24.♖hd1 ♘c3+ 25.♙e3 ♘xd1+ 26.♖xd1 ♖a8 27.♖xd2 ♖xa3+ 28.♙d4 ♖a5 And black escapes with a draw.]

18...♖d4 19.b3 ♙xd2 [19...♘d3!? With the idea of looking for chances in an endgame with opposite coloured bishops.]

20.♙e2 [20.♙xd2 ♖fd8 21.♙e2 ♖xd2+ 22.♙e3 ♙f7 23.♖fc1 (23.a4 ♘xb3!) 23...♖b2 24.♖d1 ♖xd1 25.♖xd1 ♖xa2 26.♖d6 ♖a3 27.♖xc6 ♘xb3 28.♙xe6+ ♙e7 29.♙xe4 ♘c5+ 30.♖xc5 ♙xe6 This endgame is just drawish.]

20...♙xc1 [20...♙c3 21.♖b1 (21.♙a3 doesn't work because of the very nice

21...♘d3! 22. ♕xe6+ ♔h8 23. ♕xf8 ♘f4+ 24. ♕e3 ♘xg2+ 25. ♕e2 ♔d2#) 21...♖a8 And in both lines Black is going to sacrifice an exchange in order to look for a practical initiative, but objectively White should be better in both cases. 22.a3 (22.a4 ♖xc4 23.bxc4 ♖xa4) 22...♕f7 23. ♕e3 ♖xa3 24. ♕xd4 ♕xd4 25. ♖fd1]

21. ♖axc1 Black's position is very difficult because of his many weak pawns.

21... ♖fd8 22. ♖fd1 ♕f8 23. ♖xd4 ♖xd4 24. ♖d1 [24. ♕e3 e5 25. ♕e2 With the idea of playing ♖c4 next.]

24... ♖xd1 [24...e5 25. ♖d2 With the idea of playing ♕e3 next and Black will be forced to exchange rooks anyway.]

25. ♕xd1 ♕e7 26. ♕d2 ♕d6 White should not have any problems to win this game thanks to his passed a-pawn and the bad black structure.

27. ♕c3 [27. ♕e3 ♕e5 28.a4 ♘b7 29.b4 ♘d6 30. ♕b3 ♘f5+ 31. ♕d2±]

27... ♘d7 28. ♕d4 ♘f6 29.a4 c5+ 30. ♕e3 g5 Black is trying to create some fortress, but it is impossible here.

31. ♕e2 ♕c6 32. ♕c4 e5 33.a5 h6

34. ♕d2 White's plan is very easy: at some point he is going to sacrifice the a-pawn to open the way for the king and grab all the kingside pawns.

34...h5 35. ♕e3 h4 36. ♕e2 ♕b7 37. ♕c4 ♕c6 38. ♕e2 ♕b7 39. ♕d2 ♕c6 40. ♕e3 ♕b7 41. ♕d2 White is not in a hurry, so he is winning some time before launching the final action.

41... ♕c7 42.g4 ♕c6 [42...hxg3 43.fxg3+- Black will not be able to stop the two passed pawns.]

43. ♕c3 ♘e8 [43...e3 With the idea of trying to get counterplay against the h3 pawn: 44.fxe3 ♘e4+ 45. ♕d3 ♘d6 (45... ♘f2+ 46. ♕e2 ♘e4 47. ♕d3 ♘g3+ 48. ♕d1 e4 49. ♕c4 ♘h1 50. ♕c2 ♘f2 51. ♕f1+-) 46. ♕a6 ♕c7 47. ♕c3 ♘e4+ 48. ♕c4 ♘f2 49. ♕xc5 ♘xh3 50. ♕c4 ♘f2 51. ♕d5 e4 52.a6 White will queen first.]

44.b4 ♘d6 45. ♕f1 cxb4+ 46. ♕xb4 ♘c8 47. ♕g2 ♕d5 48.a6 ♘a7 49. ♕a5

49...Kc5 [49...Kd4 With the idea of sacrificing the knight for the a-pawn and attacking the white pawns with the king, but White has 50.Kb6 Nc8+ 51.Kc7 Na7 52.Kb7 Nb5 and now the simple 53.Bf1 Nd6+ 54.Kc7+-]

50.Bxe4 Nb5 51.Bg2 Na7 52.Ka4 Nb5 53.Kb3 Kb6 54.Kc4 Ka6 55.Kd5 As I said before, this end-game is easily winning for White.

55...Kb6 56.Kxe5 Kc7 57.Kf6 Nc3 58.Kxg5 Nd1 59.f4 Kd6 60.Kxh4 Ke6 61.Kg5 Kf7 62.f5 1-0

Editorial Preface

Another great week of chess has passed.

The main event of the week is clearly the Tal Memorial and we are commenting what is probably the main game of the event: the game between Carlsen-Anand, which seems to be their last encounter before the upcoming WCC match in November.

After round 6, Nakamura is leading with 4,5/6. He had a bad start as he lost in the first round and could have lost in round 2 as well, but fortune was on his side and the American Superstar started to crush his opponents. Gelfand, who is showing very good and solid play, is in second place and third place is shared by Carlsen and Mamedyarov with 3.5/6. Surprisingly the Russian players are doing badly so far and Kramnik only has 2/6.

The Match between Navara and Hou Yifan ended in favor of the Chinese World Champion as the 4 normal games ended in a draw, but in the rapid games Hou had the upper hand.

The Ukrainian National Championship is under way and everyone is playing except Ivanchuk. Ponomarev seems to be in a great shape and is leading the event.

The Women's Grand Prix in Dilijan is under way as well. Just a few rounds have been played, so we can be very curious who is going to be the winner this time.

As usual, we wish you great chess fun with your weekly issue of the CEWN!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Carlsen,Magnus (2864) — Anand,Viswanathan (2786) [E46]

8th Tal Memorial Moscow RUS (5.2), 18.06.2013

[Arkadij Naiditsch]

We are facing what is probably the last tournament game between the actual World Champion and his challenger. The Match is going to take place in India in November. Could it be that it is Anand's destiny to lose his WCC title in his home country?! We will find out later this year... In the current game, Magnus Carlsen is clearly showing that he is to be taken very seriously in the upcoming 12 games of the match!

1.d4 The World Number 1 is playing both 1. e4 and 1.d4, which makes the preparation very difficult...

1...♘f6 2.c4 e6 Anand also has a huge range of openings in his Black repertoire. From the Slav to the Gruenfeld, or the solid Queen's Gambit and the Nimzo, all of them can be seen on the board.

3.♘c3 ♖b4 4.e3 0-0

5.♘ge2 The line with 5.♘ge2 is not the most popular one, but it is quite tricky and relatively unforced. Magnus Carlsen often tries to reach a normal, „playable“ position out of the opening, hoping to outplay his oponents in the rest of the game- which usually works! :)

5...d5 6.a3 ♖e7 [6...♘d6 is the other main move in this position. 7.c5 ♖e7 Followed by b6 and a5. This line is considered to be fine for Black.]

7.cxd5 In the interview after the game, Carlsen said that he has chosen that line because Anand didn't have too much experience here. Well, now we can say that it worked!

7...♘xd5 Personally I would not advise to play this move. [7...exd5 would lead us to the main lines, where White has several ideas. To play 8.b4, trying to fix the pawn structure on the queenside, to play 8.g3, 8.♘f4 or 8. ♘g3. All moves are possible.]

8.♖d2!? A very tricky move! Black's main idea is to play c5 and White is preparing to face it.

8...♘d7 [After 8...c5 9.dxc5 ♖xc5 10.♘xd5! we can see that ♖d2 was a very useful move as the rook is now quickly coming to c1. 10...♔xd5 11.♘f4 Followed by ♖c3 or ♖c1, which should give White a small but pleasant edge.]

9.g3

9...b6?! After this move, Black is entering quite an unpleasant position. [I think Black should have tried to push 9...c5 10.♘xd5 exd5 11.♙g2 ♘f6 12.dxc5 ♙xc5 13.♖c1 and even though White might be slightly better, Black's position is very playable.]

10.♘xd5! Typical and very strong. After playing 9...b6, Black has a clear weakness: the c6 pawn.

10...exd5 11.♙g2 ♙b7 12.♙b4 Quite a provocation. [12.0-0 would be a normal move.]

12...♘f6 Too passive again in my opinion. [Now it was really time to play 12...c5 13.dxc5 (13.♙c3 ♘f6 doesn't change much.) 13...bxc5 14.♙c3 ♘f6 15.0-0 ♖b6 With a normal position.]

13.0-0 ♖e8 It was the last chance to play c5.

14.♖c1 Black will now not be able to play c5 anymore.

14...c6 [14...♙xb4?! would be a positional mistake as after 15.axb4 White would have full control over the c5 move and b5 could also sometimes be dangerous.]

15.♙xe7 ♖xe7

16.♖e1 White does not hurry. Black has almost no plan and has to keep on „waiting“. White's idea is pretty clear: play ♘f4-♘d3 and maybe ♘e5 followed by putting pressure on the c6 pawn or by playing f3-e4.

16...♙d6 Another „strange“ move by the World Champion. [16...♘e4 followed by ♘d6 looks much more solid. Black's position is passive, but to break through is a hard job.]

17.♘f4 ♙c8 It is very logical to transfer the bishop to f5, but could it be that it is already too late for it... [17...♖c7 followed by a passive defence would have been a more solid choice.]

18.♙a4 Things are getting pretty forced.

18...♖c7

19.f3! White is using the moment for a more or less final blow. Black's pieces are pretty uncoordinated and the e4 push is almost a killer.

19...♙e6 20.e4 dxe4 It is already hard to give Black any advice. [20...♙d7 21.♘xe6 ♙xe6 22.e5 is looking very ugly for Black too.]

21.fxe4 ♔d7 Of Black had an extra move, things would be more or less fine, but it is White to move and Carlsen does not miss such chances.

22.d5! The game is now! After outplaying his opponent in a positional game, Carlsen finishes him off with a nice tactic.

22...cxd5 23.♔xd7 ♖xd7 24.♞xe6 fxe6

25.♞h3! This is the key move, which the World Champion probably missed. Black's position is now falling apart.

25...♔h8 [25...♔f7 26.exd5 Followed by ♞xe6 and White is winning.]

26.e5 Putting the black knight out of the game.

26...♞g8 27.♞xe6 ♖dd8 28.♖c7 The position is just hopeless.

28...d4 29.♞d7 White just wants to play e6 next and then ♖d1–Rxd4. I don't think that Anand has lost many games in that way in his whole chess career. Was this already a „sign“ for the upcoming WCC match?! We will see in about 5 month from now!

1–0

(2) Ponomariov,R (2743) – Eljanov,P (2707) [C91]

82nd ch-UKR 2013 Kiev UKR (2), 16.06.2013

[Csaba Balogh]

An excellent preparation by Ponomariov, which involved an intuitive pawn sacrifice that even the machines did not understand at first sight.

1.e4 e5 2.♞f3 ♞c6 3.♞b5 a6 4.♞a4 ♞f6 5.0–0 ♞e7 6.♖e1 White returns to the mainlines instead of the recently so popular anti-theoretical move 6.d3.

6...b5 7.♞b3 d6 8.c3 0–0

9.d4 Ponomariov plays the alternative line to the main Spanish 9.h3. It is sometimes quite effective to search for improvements in slightly forgotten lines. Many hidden ideas can be found and the surprise effect on the opponent is also a decent factor.

9...♞g4 Black must try to put pressure on the center, otherwise White can simple spare the h3 move.

10.♞e3 This is the sharp handling of the position, while Kamsky's favorite 10.d5 is rather positional.

10...exd4 [10...♘xe4? is often a poisoned pawn in the Spanish. Here again White wins after a double attack: 11.♙d5!]

11.cxd4 d5 A typical method of countering White's ideas in the center. Otherwise if White gets his knight out to c3, Black remains without counterplay against the strong center. [The other main option for Black is 11...♘a5 12.♙c2 and Black must play either c5 immediately or after the inclusion of the ♘c4-♙c1 pair of moves. Both are with huge theory.]

12.e5 ♘e4 13.h3 ♙h5 Here comes the new idea! In the previous games, White played ♘c3 now or without the ♙h3 ♙h5 inclusion.

14.♘bd2! The positional point is obvious, White needs to get rid of the strong e4 knight, but it looks like a tactical blunder...

14...♘xd2 Seemingly White has no good takeback, since on ♙xd2 the d4 pawn is hanging and after ♙xd2 ♙b4 wins an exchange. Black can even destroy the pawn structure first with ♙xf3 and only then ♙b4... What could the plan be?!

15.♙xd2! ♙xf3 [On 15...♙b4 16.♙c2 ♙xe1 17.♘g5! is very strong 17...♙g6 18.♙xc6 ♙a5 19.♙xd5 White has

sacrificed an exchange, but he got the most important d5 pawn and all his pieces are standing actively. Black is already in some trouble, because after 19...♖b8 20.e6! seems to be very strong.]

16.♙c3!! This is the whole point! White had to make this intermediate move to avoid ♙b4. The game becomes very sharp, but as the following line shows, White has enough compensation everywhere. [16.gxf3 is bad as after 16...♙b4 17.♙c2 ♙xe1 18.♙xc6 ♙a5 19.♙xd5 ♖b8+ Black has huge plusses in comparison to the 15...♙b4 line.]

16...♙xg2 Eljanov plays the computer's recommendation and grabs a pawn. After knowing what happened in the game, I doubt that he would repeat this decision. [On 16...♙d7 White needs to make another subtle intermediate move: 17.♖ec1!! ♘b8 Now on ♙xc7, Black could simple retreat the bishop. (17...♘d8 18.♙xc7! ♙xc7 19.♖xc7 And both bishops are hanging. White wins the piece back and gets a big advantage.) 18.gxf3 c6 19.♙h2 We get the same position as in the game, but here Black does not even have an extra pawn.; 16...♙b4! is the best option in my opinion. 17.♙xc6 ♙xe1 18.♖xe1 ♙e4 19.f3

♙f5 20. ♙xd5 White clearly has enough compensation for the exchange, but I am not sure if objectively he is better here. In any case, from a practical point of view, White has a much easier game.; 16... ♘xe5 seems to lead to a slightly worse position after 17.dxe5 ♙h5 18.g4! ♙g6 19. ♖ed1 ♙e4 20. ♚c6± White wins the pawn back and his pieces are better placed.]

17. ♙xg2 ♘b8 18. ♖ac1 c6 Black managed to win a pawn, but at what cost!? White has the bishop pair, the c6 pawn must always be defended by the b8 knight, which locks the rook to the corner. If the c6 pawn falls, the d5 one will automatically drop as well. And the most important factor is that White has an easy and strong attack on the g-file, against which Black cannot launch any kind of counterplay. Black must try to defend, but without the b8 and a8 pieces it is going to be difficult.

19. ♙h2! Opening the g-file for the rooks.

19...f5 [19...a5 does not lead anywhere, White can simple continue his plan: 20. ♖g1; Opening the game weakens the Black king too much: 19...f6 20. ♖g1! fxe5 21.dxe5± Black has no good defence against ♙d3-♙c2.]

20. ♖g1 ♖a7 Using the poor rook to defend the g7 weakness along the 7th rank is a resourceful idea, but it does not save Black. [20...f4 critically weakens the b1-h7 diagonal: 21. ♙d2 ♙d3 and ♙c3 are coming next and Black will collapse as he is missing a light-colored bishop.]

21. ♖g2! Simple and strong!

21... ♙d7 [21... ♙e8 is also bad: 22. ♖cg1 g6 23. ♙h6 ♖f7 24. ♙c2 White wants to prepare for the attack with h4-h5 and ♙g3 for instance. 24... ♙f8 25. ♙xf8 ♙xf8 26.h4! ♙h6 27. ♙h3 ♙f8 28.h5 Black collapses.]

22. ♖cg1 ♖f7 Black tries to keep his pawn on g7 as long as possible to avoid the h4-h5 plan.

23. ♙d1!! A very nice way of increasing pressure. Ponomarev drives his bishop to h5 to provoke the g6 weakening.

23...g6 24. ♙h5! White does not even waste time on the h4-h5 plan, he goes for the most direct crush with sacrificing on g6.

24... ♙f8 25. ♙f4! Opening the 3rd rank for the queen in order to join the attack.

25...♔e8 [Black cannot fortify his g6 pawn: 25...♖g7 26.♙h6! ♖f7 27.♙xg6! hxg6 28.♖xg6+ ♔h7 29.♙xf8 ♖xf8 30.♔g3+- With mate to follow soon.]

26.♖xg6+!! A brilliant finish based on an exact calculation!

26...hxg6 27.♖xg6+ Black is simply unable to coordinate a defence because of the pin between the h5 bishop and the e8 queen.

27...♙g7 [On 27...♔h7 28.e6! ♖fe7 29.♖g5 ♔d8 30.♙g6+ ♔h8 31.♔g3 Black is a rook up, but gets mated soon. Too many threats are in the air: ♔h4, ♖h5, ♙f7, ♙e5.]

28.e6 ♖f8 29.♔c5 [White could already have simplified to a completely winning endgame 29.♖xg7+ ♖xg7 30.♙xe8 ♖xe8 31.♙xb8 ♖xb8 32.♔xc6+- but Ponomarev played for more.]

29...♔e7 [On 29...♖e7 30.♖xg7+ ♖xg7 31.♙xe8 ♖xe8 32.♙e5+- is hopeless for Black.]

30.♙d6 ♖h4 31.♔xa7 There is only one check on f2 because of ♖g2. A very well deserved victory after a deep preparation and a powerful attack.

1-0

(3) Nakamura,Hikaru (2784) — Mamedyarov,Shakhriyar (2753) [D38]

8th Tal Memorial Moscow RUS (1.5), 13.06.2013

[Csaba Balogh]

A convincing win by Mamedyarov with the Black pieces.

1.d4 ♘f6 2.c4 e6 3.♘f3 d5 4.♘c3 ♙b4 A little surprise in the opening decision. Mamedyarov rarely employs the Ragozin defense.

5.♔a4+ The main idea is to force the knight to c6, which blocks Black's plan of challenging the center with c5. [5.cxd5 and; 5.♙g5 are the two main continuations, but Nakamura's move is also quite a big line.]

5...♘c6 6.e3 0-0

7.♙d2 Black has to fight for the center. With the knight on c6 he cannot push c5, but it supports another very useful plan: to play e5. The following moves are the necessary preparations for this.

7...dxc4! 8.♙xc4 a6 A prophylactic move. [The direct 8...♙d6 allows White to play 9.♘b5!]

9.0-0 ♖d6! b5 is not a threat yet because of ♖xb5 and the rook is hanging, but White must always take care of it. Black is ready to free his position with e5, which White cannot prevent.

10. ♖ad1 White knows about the coming e5 and he already puts his rook on the opening file. [10. ♖c2 e5! 11. d5 In general this d5 push is the only way for White to play for an advantage, but here Black equalizes after 11... ♖e7 12. e4 ♖g4! 13. ♖e2

13...c6! Undermining the center. If Black can take on d5, that would change the pawn structure in his favor, while after dxc6 ♖xc6, the knight is ready to occupy the d4 outpost.]

10...e5! 11.dxe5 ♖xe5 12. ♖e2 [12. ♖xe5 ♖xe5 White cannot make use of the pin on the d-file and on the next move Black will already leave it by playing ♖e7. Black has achieved what he wanted and equalized out of the opening.]

12... ♖e7 13. ♖g5?! Nakamura is trying to play ambitiously with the White pieces, but in this case it is too optimistic and helps Black to overtake the initiative. The idea was to get the bishop pair after ♖ge4, but Black has

a strong reply. [Obviously after forcing a mass exchange with 13. ♖e4 White could make a draw, but this was not his aim.]

13... ♖f5! Suddenly the knight on g5 gets out of the game as ♖ge4 does not work for tactical reasons.

14.e4 [14. ♖ge4 is met by 14... ♖xe4 15. ♖xe4 b5! 16. ♖d4 ♖c6! winning a piece.]

14... ♖d7 15. ♖c2 h6! A necessary move, sending the knight back to f3 in order to prevent the f4-e5 threat.

16. ♖f3 ♖fe8 It is time to activate the rooks.

17. ♖fe1 [17. ♖d4 Transferring the knight to f5 is sometimes a useful plan in such cases, but now Black is ready to counter it by 17...c5! 18. ♖f5 ♖xf5 19. exf5 ♖c6! followed by settling the knight on d4. White cannot prevent it by playing 20. ♖e3 because of the tactical trick 20... ♖d4! 21. ♖xd4 cxd4 22. ♖xd4 ♖xh2+! followed by ♖e5+.]

17... ♖ad8 18.g3? A logical move, but it might be the decisive mistake. White closes the diagonal of the d6 bishop, which was dangerously looking at the h2 square and prepares for the regrouping of his e2 bishop to g2. If he could achieve all this, then in a good moment he could

launch a pawn storm in the center with f4-e5. [18.h3 was more circumspect, but here again only Black can be better. 18...b5!]

18...h3!! After this great move, White suddenly cannot deal with his f2 weakness. Black simple wants to play g5c5. The only way to protect it is f1f1, but this leaves the e4 pawn unprotected.

19.h3 [19. g5f1 g5c5 20. f1e2 Black wins material after 20... h3xf2! 21. f1xf2 h3g4 22. g5e1 h3e3! taking both of the rooks.; 19. h3d4 g5c5 20. g5c1 does not help either as

20...h3xf2! wins again: 21. f1xf2 g5c6 22. g5e3 h3xe4+ 23. h3xe4 g5xe4 Black already has two pawns and all his pieces are attacking. 24. f1c3 g5b4-+]

19...h3xf2! Of course. Such moves are coming without thinking from Mamedyarov. He collects two pawns, destroys the king's position and maintains excellent attacking chances.

20. f1xf2

20...g5xh3 The main threats are g5c5 g5e3 h3g4 and h3g4 g1g1 g5xg3.

21. g1g1 [21. h3d4 was probably the best chance, although Black is winning here as well after 21... g5c5 22. g5e3 f1e5! White cannot hold his d4 knight and the attack is going to break through.; 21. h3g1 is refuted by 21... f1e5! 22. g5f4 (22. h3xh3 f1xg3+ 23. f1f1 f1xh3+-+) 22... g5c5+ and White will get mated soon.]

21...g5xg3 The rook is trapped. Black is already winning material as he is going to have a rook and 3 pawns against two minor pieces, but he also continues attacking, which deprives White from any survival hopes.

22. ♖f1 ♕xe1 **23.** ♖xe1 ♕g4 **24.** ♕g2 Mamedyarov finds the most direct way to finish the game in style.

24... ♕xf3! **25.** ♕xf3 ♖d6! Creating the double threat of ♖xd2 and ♖g3. White cannot parry both of them.

26. ♖e2 [26. ♕e3 ♖g3+ wins either the rook or the bishop.]

26... ♖g3+ **27.** ♕g2 ♖g4! The attack is rolling. Black is also ready to join his rook to the attack through the 6th rank.

28. ♖d1 [28. ♕e1 ♖h2+ 29. ♖f1 ♖d6-+]]

28... ♖e6! The end is near.

29. ♖e3 Black has several ways to win, but Mamedyarov finds the most precise one.

29... ♖c6! The queen has no good square to leave.

30. ♖b1 [30. ♖b3 ♖xd2 31. ♖xd2 ♖xe3-+]]

30... ♖h2+ [30... ♖xd2 was also winning with the idea of 31. ♖f1 ♖d3! keeping huge material advantage. 32. ♖xd2 ♖xe2-+]]

31. ♖f1 ♖f4+ [White resigned in view of the following lines: 31... ♖f4+ 32. ♖e1 (32. ♖g1 ♖xd2-+) 32... ♖g3+ 33. ♖f1 (33. ♖d1 ♖xe3+-+) 33... ♖h2+ 34. ♖g1 ♖f3+ 35. ♖f1 ♖xd2+ An impressive win with the Black pieces. It was interesting to see that only two overambitious moves, ♖g5 and g3, were enough to lose the game.]

0-1

(4) Caruana,Fabiano (2774) – Kramnik,Vladimir (2803) [C67]

8th Tal Memorial Moscow RUS (6.2), 19.06.2013

[Arkadij Naiditsch]

In the last years chess has changed a lot and even end-games are now very well analyzed by the top players. In the current game, it is hard to say when both players left their preparation- maybe never! It seems to be a „start to end draw“, but anyhow it is a very beautiful game.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 ♘f6 One of Kramnik's favorite openings, the Berlin.

4.0–0 [4.d3 is the way to avoid the main endgame, which is very popular nowadays.]

4...♞xe4 5.d4 ♞d6 6.♙xc6 dxc6 7.dxe5 ♞f5 8.♚xd8+ ♚xd8 Caruana has entered the main line.

9.h3 9.♞c3 is possible too.

9...♙d7 9...♚e8 is the other main move here and after 10.♞c3 h5, this line has proven to be rock solid for Black. The text move is much more tricky for both sides. Black's idea is to escape to b7 with his king and to play with the

bishop pair. In the meantime, White is trying to make use of his development by creating more direct threats.

10.♚d1 It is now the last chance for Black to decide where to move the king. White wants to play e6 followed by ♞e5.

10...♚c8 11.g4 The beginning of a very forced line.

11...♞e7 Black is threatening to play h5 next.

12.♞g5 ♙e8 [12...♙e6? would of course just be a big mistake. In the worst case White could play ♞xe6 and this exchange is always in his favor.]

13.f4 The position is getting very dynamic. In case White could play ♚g2-♚g3 next and stabilize his position, Black would be in big trouble, but it is Black's turn and as we know, the bishop pair can be activated very quickly.

13...h5! Of course Kramnik knew this move, but it is still nice to see. Black is opening the h-file, which can be very useful for the active phase of the game.

14.f5 Once again White is going for a very forced continuation. [14.♚g2 is looking very solid, but the position is also pretty unclear here. 14...hxg4 (14...b6 is another possible move, but I think that White is a little bit better

after 15.♔g3.) 15.hxg4 f6 Trying a forced refutation. The f6 push is another very typical idea. 16.♘e6 ♕d7 17.♘xf8 ♖xf8 18.f5 Avoiding Black's f5 push, which is a dangerous positional threat. 18...fxe5 And the game should probably end in a draw.]

14...hxg4 15.hxg4 ♖h4 Black is accepting the offer to play a „move by move“ game.

16.♔f2 White cannot save his g4 pawn.

16...♖xg4

17.♖h1 That was White's idea. ♖h8 is practically winning a piece!

17...♘xf5 What a funny position. White just has an active knight on g5 and the rest of his pieces are still on their starting positions.

18.♖h8 White is winning a full piece.

18...♕c5+ What an amazing position! Black is giving a piece and a rook away, but the position seems to be equal!

19.♔f3 ♖g1 20.♖xe8+ ♔d7 21.♖xa8 Everything seems to have been forced until here.

21...♘d4+ This check on d4 also seems to be the best move. Why? That is not so easy to answer, but after some analyses it seems to be the best.

22.♔e4 The only move.

22...♖xc1 White is a full rook up, but the b1 knight and a1 rook are totally out of the game. White's king on e4 is also under heavy attack and ♘c2 could be very unpleasant. Anyhow, a rook up is a rook up, so the game continues in a very tactical and forced way.

23.b4 ♕b6 24.c4 A very logical move by White. Now c5 is a deadly threat and by pushing the pawn forward, White is also winning space.

24...c5! A great move! It is not easy to stay cool in such a position. I have a very strong feeling that Kramnik knew everything up to this point. It is very hard to evaluate the future of 24... c5, especially since White is now getting the d5 square for his king.

25.a3 White wants to play ♖a2 next, giving away the b1 knight, but he would still be an exchange up.

25...♖e1+! Exactly! It is very funny, but White's king cannot escape from perpetual check! Amazing.

26. ♔d3 ♚d1+ **27.** ♔c3 [In case White tried to play for a win after 27. ♔e3?! ♘c2+ 28. ♔e2 ♚g1 it seems that Black is already better!]

27... ♚c1+ **28.** ♔d3 ♚d1+ **29.** ♔c3 ♚c1+ **30.** ♔d3 A really funny game that had to be featured in our Chess Evolution Weekly Newsletter ! :)

Endgame section

(15) Carlsen,M (2864) – Kramnik,V (2803)

Tal memorial, 13.06.2013

[Chess Evolution]

White has an extra pawn, but the strong d-passer and the active pieces give Black excellent drawing chances. However, after a long think, Kramnik simplified the position into an instructive bishop endgame, which he thought was drawn, but it was in fact losing.

42...h4+? It is a positional mistake to help White create the g-h passers, which was exactly his idea. Kramnik made this mistake because of the wrong evaluation of the arising bishop endgame. [42...♖a1 43. ♕f3 ♖a4! was the right defence with the idea of pushing h4, when White's task to create connected passed pawns would be much more difficult. Black's drawing chances are better than White's winning chances.]

43. ♖xh4 ♖xf2 44. ♖g3

44...♖f6? Kramnik wanted to get his rook behind his d-pawn. [44...♖f1 was the better practical chance 45. ♕g4!± is an important resource, followed by ♖d6 stopping the pawn. After that, White puts his bishop to f3 and starts to advance his pawns. (However the most obvious 45. ♕f3? allows Black a nice survival 45...d2! 46. ♖d6

46...♕e4!! 47. ♖xd2 (47. ♕g4 ♖g1 48. ♖xd2 ♖xg2+! 49. ♖xg2 ♕xg2 50. ♖xg2 And the position is a draw because of the wrong promotional square on h8.) 47...♕xf3 48. gxf3 With a theoretical draw.) 45...♕e4 46. ♖b4 ♕c6 47. ♖d4 Black cannot go for the g2 pawn because 47...♖g1 48. ♕f3! ♕xf3 49. ♖xf3 ♖d1 50. ♕e3 ♖g1 51. ♖g4+- wins for White.]

45. ♖xf6 ♔xf6 46. ♔f4 White inevitably wins the d3 pawn after ♔e3 and ♖b3-c4, but it was all in Kramnik's calculation. We will discuss his reasons a few moves later.

46...d2 47. ♔e3 ♔e5 48.g3! Preventing the black king from getting to g3.

48...♖f5 49.h4 ♖e6 50. ♔xd2 Here we are! Kramnik thought that this endgame is drawn, since whenever White pushes g4, which seems to be necessary to convert the advantage, Black sacrifices his bishop followed and then runs to h8 with his king, with a theoretical draw. However Carlsen will show really subtle technique to win the game.

50...♔e4 51. ♔e2 White wants to occupy the e3 square with the king and he prepares to push back the king with ♖c2.

51...♖g4+ 52. ♔e1 ♖e6 53. ♔f2 ♖c2 is inevitable now.

53...♔e5 54. ♔e3 ♖d7 55. ♖c2 ♖g4 White is basically forced to find the winning plan, since there is no other way to make progress than putting the bishop on g6 and then play h5.

56. ♖g6! ♖d7 57.h5 ♔f6 This allows White to improve his king. [57...♖e6 Waiting with the bishop does not help either: 58.h6 ♔f6 59. ♖b1 followed by ♔f4, which transposes to the game, using the fact that Black cannot get his king between the pawns with ♔g5 because of h7.]

58. ♔f4 ♖e6 59. ♖e4

59...♔g7 [If Black starts to wait with his bishop by playing 59...♖d7 White proceeds with 60.h6! ♖e6

61.g4! This is the key move and Black cannot sacrifice his bishop now: 61...♖xg4 62. ♔xg4 ♔f7 63. ♖h7! Using this known method of preventing the king from getting to

the corner. White wins easily now. 63...♔f6 64.♔h5 ♕f7 65.♕g5 ♕f8 66.♕f6 ♕e8 67.♕g6+ ♕f8 68.h7+-]

60.♔g5 ♕d7 61.h6+ ♔h8 The king is in the corner now, so White needs to be careful with advancing the g-pawn.

62.♔f4 ♕e6 63.♕f5! The pawn is ready to go now.

63...♕f7 64.g4

64...♕h5! A very nice trick to get a theoretical draw. Even with 5 h-pawns the game would be drawn.

65.g5! Unfortunately for Black, White is able to keep his g-pawn.

65...♔g8 66.♕e6+ ♔h7 67.♔f5 ♕g6+ 68.♔f6 ♔h8! The last stalemate tricks by Black, but White can easily parry them.

69.♕d7 [69.♕f7 ♕e4 70.g6? ♕xg6 is still a draw.]

69...♕h5 [69...♕e4 If the bishop stays on this diagonal, White wins by playing 70.♕f5+- followed by g6.]

70.♕c6 Black cannot move with his bishop now.

70...♔h7 71.♕d5 ♕g6 [71...♕e8 72.♕f7+- followed by g6-g7 wins.; 71...♔h8 72.♕f7 wins again. 72...♕g6 is not stalemate as White has 73.♕xg6+-]

72.♕g8+! An instructive endgame!

1-0

(16) Carlsen,Magnus (2864)
— Caruana,Fabiano (2774) [A07]

8th Tal Memorial Moscow RUS (3.3), 15.06.2013

[Chess Evolution]

We are in an interesting rook endgame. Usually Carlsen is the one who is pushing, but this time he has to defend. As we remember, in his game against Wang Hao he lost a rook endgame with very good drawing chances and this time the story repeats itself. Let us take a closer look.

38...♖f6 39.g5! A very good move. White is trying to exchange a pawn and at the same time winning the f4 pawn back.

39...♖c6 [Of course after 39...hxc5 40.hxc5 ♖c6 41.♔xf4 the position is a very simple draw. White has nothing to fear and can just „keep on waiting” as he has a great rook on b7.]

40.♔xf4 [40.gxh6? ♖xh6 would give Black some winning chances, which is very unnecessary for White.]

40...h5 Black's only chance is to keep as many pawns on the board as possible.

41.♔f5 ♔g7 Before bringing the rook to the b-file, Black is improving his king's position.

42.♖b8 ♖c5+ 43.♔f4 ♖b5 44.♔e4 ♖b1 45.♔f5 ♖b2 46.♔f4 White keeps on waiting...

46...♖b4+ 47.♔e5 ♔g6 Black is sort of trying.

48.♖g8+ White is pushing the Black king back.

48...♔h7

49.♖f8?? What a terrible mistake. These kind of moves are even difficult to explain. [49.♖b8 A passive defense would just lead to a draw. Let us take a look at what would happen in case Black would try to push his pawn to b2: 49...♔g7 50.♔f5 ♖b1 51.♖b7 b5 52.g6 The most easy way of making a draw, but a passive defense would lead to the same result. (52.♔f4 b4 53.♔f3 b3 54.♖b6 b2 After this move, the position is a draw, but not to play the b2 move is simple impossible. (54...♔f8 55.♖b7 ♔e8 56.♔g2 And Black cannot progress without playing the b2 move.) 55.♔g2 ♔f8 56.♖b7 ♔e8 57.♔h2 ♔d8 58.♔g2 ♔c8 59.♖b3 ♔d7 60.♔h2 ♔e6 61.♔g2 ♔f5 62.♖b5+ ♔e4 63.♖b8 ♔d3 64.♖d8+ ♔c3 65.♖c8+ And the position is a simple draw.) 52...♖f1+ 53.♔g5 ♖g1+ 54.♔xh5 Draw.]

49...♖xh4! Caruana doesn't miss his chance.

50.♖xf7+ ♔g6 51.♖f6+ ♔xg5 52.♖xb6 So is this position a draw or a clear win for Black?! It is not so easy to say at first sight, but Caruana will show us the right result...

52...♖a4! The white king should be cut on the 5th rank.

53.♖b8 White can't prevent Black from advancing his h-pawn.

53...♔g4 54.♖g8+ ♔f3 55.♖f8+ ♔g3 56.♖g8+ ♔h2 The h-pawn is ready to move forward.

57.♔f5 h4 58.♖b8 h3 59.♔g5 [59.♖b2+ didn't help: 59...♔g3 60.♖b3+ ♔h4]

59...♖e4! The last precise move.

60.♔f5 ♖e2 Now Black can let the white king come a bit closer as the position is totally winning.

61.♖g8 [61.♔f4 was losing too after 61...♔g2 62.♖g8+ ♔f1]

61...♖g2 62.♖d8 ♖f2+ Followed by ♔g2. A very tough loss for Carlsen, but blunders happen even to the greatest players!

0-1

Clash of the Titans

(17) Najdorf, Miguel
— Reshevsky, Samuel Herman [B93]

America m Mex/NY/Salvador (9), 1952

[Kamil Miton]

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 a6 6.f4

It is interesting that Najdorf chose this move against the line which is named after him. Objectively it is not the best weapon, but at that time it was more popular than it is now.

6...♚c7 A normal, slightly waiting move. Black doesn't show which structure he is going to play yet, a Sheveningen after e6, a Dragon after g6 and e5 is possible as well.

7.♙d3 g6 8.0-0 The pin after ♚b6 or ♚c5 is not dangerous as White can simply play ♖h1 and the knight will not be hanging because of ♙b5.

8...♙g7 9.♚h1 0-0

10.♚e1 The beginning of the only plan. White is going to create pressure on the kingside.

10...b5 11.a3 [11.e5 An interesting active move, but it doesn't give White any advantage: 11...dxe5 12.fxe5 ♘g4 13.♘d5 (13.♚h4 ♚xe5 (13...♘xe5 14.♘d5 ♚d6 15.♘xe7+ ♚h8 16.♘f3 ♘xf3 17.♚xf3 White has the initiative here thanks to his active pieces. 17...♘c6 18.♘xc6 ♚xc6 19.♙e4 ♚c4 20.♙h6↑) 14.♘f3 ♚h5 The easiest way to avoid problems is to exchange queens. 15.♚xh5 gxh5∞) 13... ♚xe5 14.♘xe7+ ♚h8 15.♚xe5 ♘xe5 16.♙e4 ♚a7 And Black is fine here as well.]

11...♙b7 The knight needs to escape from d4 because of ♘xe4 threats, but the f3 square is good for him anyway as White is going to play for the thematic plan ♚h4-f5-♙h6-♘g5.

12.♘f3 ♘bd7 13.♚h4

13...e6 A possible move. Black also has some other options: [13...e5 14.f5 (14.fxe5 dxe5 15.♙g5 ♚fe8=) 14...gxf5 And now not exf5 because Black would get strong central pawns, but immediately 15.♙h6↑; 13...♘c5 14.f5 gxf5 (14...d5!? A very interesting idea. 15.♙f4 ♚b6 16.e5 d4 17.exf6 (17.♘e2 ♘d5 18.♘exd4 ♘xd3 19.cxd3 ♘xf4

20. ♖xf4 Black has compensation thanks to the bishop pair.) 17... ♙xf6 18. ♘g5 ♙xg5 19. ♙xg5 dxc3 The position looks dangerous because of the weak king on g8 but black can also try to get some counterplay over the h1–a8 diagonal.) 15.e5 (15.exf5 ♘xd3 16.cxd3 ♖c5 17. ♘g5↑; 15. ♙h6!?) 15...dxe5 16. ♙xf5 And now there is for example the following forced line, which is probably not the only one though because the position is very complex: 16...e6 17. ♙h6 ♙xh6 18. ♖xh6 ♖e7 19. ♘g5 exf5 20. ♖xf5 ♘e6 21. ♖e1 (21. ♖xf6 ♘xg5 22. ♖xg5+ ♔h8 Xg2) 21...♙h8 22. ♖xe5 ♖g8 23. ♖xf6 ♙xg2+ 24. ♙xg2 ♖xg5+ 25. ♖xg5 ♘xg5 And Black takes the initiative as the white king now looks weaker.]

14. ♙e3 deserves attention. [14.f5 ♖ac8 15. ♙h6↑]

14...d5? A very bad move from a strategical point of view. Reshevsky wanted to avoid f5 at all costs but we will see below that it was not as dangerous as he thought. [14... ♘c5 15.f5 (15. ♙d4 ♘fxe4 16. ♙xe4 ♘xe4 17. ♘xe4 ♙xe4 18. ♘g5 ♙xg2+ 19. ♙xg2 ♖xc2+ 20. ♖f2 ♖c6+ 21. ♙g1 h6∞) 15...♘h5 A strange move, suggested by the engine, probably with the idea not to allow ♙h6. (15...♖ae8 was possible too.) 16.g4 (16. ♘g5 exf5 17.exf5 ♙xc3! 18.bxc3 ♘xd3 19.cxd3 ♖xc3± Black is a pawn up and he is putting the pressure on g2.) 16... ♙f6 17. ♙g5 (17. ♖h3 The queen is not on h4 so black can play 17...exf5

18.gxh5 fxe4 Xe4; 17. ♘g5 h6 18.fxg6 hxg5 19. ♖xh5 fxg6 20. ♖xg6+ ♖g7 21. ♖xg7+ ♔xg7 With a very pleasant endgame for Black.) 17... ♙xc3 18.bxc3 exf5 19.gxf5 ♖fe8 20. ♖ae1 With unclear play as both kings are weak.; 14... ♖fe8!?)

15.e5 ♘e8 Black's bishops are now very limited. White has a stable advantage but Najdorf decided to finish game with a sacrifice and active play.

16. ♘g5 [16. ♘e2 White is controlling the d4 square and has a stable advantage.]

16...h6

17. ♖xe6! [17. ♗xg6 fxg6 18. ♖xe6 ♔c6 19. ♖xf8 d4! 20. ♔g3 ♗xf8 21. ♗xd4 ♖g7 Black gets easy play and the position is completely unclear.]

17...fxe6 18. ♗xg6 White only has two pawns for the piece but the black pieces are very limited and White has good chances to create an attack against the black king.

18...♔d8 A logical move. Black wants to help defending with the queen. [18...♔c6 19. ♖f3→]

19. ♔h3 [19. ♔g4 White has the very unpleasant idea ♗f2-♗h4 to force Black to drive away the queen from the king. 19...♖c7 (19...♔e7 20. ♗f2!) 20. ♗f2 Compared to the game, the f4 pawn is not hanging. 20...♗xe5 21. fxe5 ♖xe5 22. ♔g3 ♔g5 23. ♔xg5 hxg5 24. ♗h5± The bishop pair and the weak dark squares give White a big advantage.]

19...♔e7

19...20. ♖e2! The knight comes into play. [20. ♗f2 doesn't work now because of 20...♔xf4 21. ♖e2 ♔xf2 22. ♔xf2 ♖xe5→]

20...d4! A good practical move. Black sacrifices a pawn to get activity. The bishop on b7 will be active and the

d5 square available. [20...♖c7 21. ♖g3 d4 22. ♗xd4 ♖d5 23. ♖h5→]

21. ♖xd4 [21. ♗xd4 With the idea ♖g3-♖h5.]

21...♖c7 22. ♔ae1 It is still very hard to make moves for Black. ♖d5 is not possible because of the e6 pawn and ♖c5 doesn't work because then White can push f5, so Black plays

22...a5 Not a stupid move because the rook can support the king over the 6th rank from a6 after a potential f5 break. [22...♔ad8 23. ♔g4 With the idea ♗f2-♗h4 or ♗d3-♔g6.]

23. ♗d2 [23. ♔g4 Followed by ♗f2-♗h4 again.]

23...b4 24. ♔g3 From this square the queen will protect the e5 pawn, which means that White is slowly preparing the final f5 action.

24...♔c5 [24...♔ad8 25. f5

25...♖xe5! And the d4 knight is hanging, but White can first play 25. c3! and only then f5!]

25.c3 bxc3 [25...bxa3 26. bxa3 ♔h8 27. ♗b1 ♔g8 28. ♔h3 with f5 next]

26. ♖xc3+- ♜a6 [26... ♔e7 27.f5 (27.h4± Preventing ♔g5.)
27... ♔g5 28.f6 ♔xg3 29.hxg3 ♙h8 30. ♙c2 White should
be winning because of the dead bishop on h8.]

27. ♙d3 ♜b6 **28.f5 exf5 29.** ♘xf5 All of White's pieces
are attacking and the position is winning in many ways.

29... ♜xf5 **30.** ♜xf5 ♘e6 **31.** ♜f6 ♔h8 **32.** ♜ef1 ♘df8
33. ♜f7 ♙d5 **34.** ♜xg7 ♘xg7 **35.e6** ♘fxe6 **36.** ♔g6
♙xg2+ **37.** ♔xg2 [The last trap was 37. ♔xg2 ♘f4+]

37... ♜b8 **38.** ♔g6 1-0

Editorial Preface

The Tal Memorial has come to an end. Boris Gelfand is the proud winner of this very prestigious event with 6/9, as he showed very strong and solid play throughout the whole tournament. The World Number 1, Magnus Carlsen, took second place with 5,5/9. The 3rd place was shared by Mamedyarov, Caruana and Andreikin - all with 5/9.

The big surprise of the tournament was the horrible of Vladimir Kramnik, with 3/9.

The National Championship of Ukraine was won jointly by Ponomarev and Krivoruchko, with 7.5/11. The 3rd place went to Korobov with 7/11.

The Super Rapid "Geneva Masters" is under way with Kramnik, Nakamura, Mamedyarov, Bacrot ...

The FIDE Women's Grand Prix is coming to an end. Before the final round, Koneru is leading the event.

As usual, the CEWN Nr 70 is packed with the most exciting moments of the past week. Enjoy!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Carlsen, Magnus(2864)

- Nakamura, Hikaru(2784) [A13]

8th Tal Memorial(8.5), 2013.06.22

[Balogh Csaba]

A convincing positional victory by the World Number 1.

1.c4 e6 [We usually reach the game's position from the following move order: 1...f6 2.f3 e6 3.g3 d5 4.g2 White would like to transpose to the Catalan opening, but by delaying d4, he avoids many long theoretical lines. 4...dxc4 5.a4+ c6 6.xc4]

2.g3 As usual Carlsen only aims for a more or less non-theoretical, but playable position, where he can slowly outplay his opponent.

2...d5 3.g2 c6 Black is now threatening to take on c4 as with his last move he prepared to protect the extra pawn by playing b5.

4.c2 f6 5.f3 dxc4 6.xc4

6...b5 This setup is quite popular for Black recently. He would

like to obtain a healthy piece arrangement by developing the bishop to b7, the knight to d7, followed by a6 and c5, occupying the center.

7.b3 b7 8.O-O bd7 9.d4 a6 Black is ready to push c5, White has to do something against it.

10.f5! The critical continuation! [10.a4 unfortunately does not stop Black from playing 10...c5! because 11.axb5 could be met by 11...d5! and Black takes back the pawn on b5. 12.c2 (12.d1 12...axb5 equalizes for Black.; White cannot protect his pawn by playing 12.a4?? as it would drop the a1 rook after 12...axb5) 12...e4 13.b3 d5 is a well-known way to make a quick draw by repetition.]

10...b6 Nakamura follows the fresh try of Ponomarev. [More common is 10...xe5 11.dxe5 d7 but White seems to get the initiative after 12.f4 e7 13.c3 followed by Ne4 and occupying the d6 square.]

11.e3 Because of the d5 threat, Black needs to play c5, but his pieces are not ideally prepared for this break yet.

11...c5 12.xd7 xd7

13.d5! This is a standard break in many openings. White wants to open the d-file for his rooks and works out the d5 square for his knight. Black is lacking two tempi (Be7 and O-O) to solve all the problems.

13...e5?! Nakamura was definitely unhappy with this antipositional decision. White seriously increases his advantage now. First of all he obtained a strong passed pawn on d5 and he can also create some holes in the queenside pawn structure. [13...exd5 is the only try to equalize, as it was played by Ponomarev: 14.♙xd5 ♟xd5 15.♚xd5 ♖d8 16.a4 (An improvement could be to play 16.♖d1 16...♙e7 17.♘c3+ followed by removing the queen from d5 and occupying it with the knight.) 16...♙e7 17.axb5 axb5 18.♘c3 O-O 19.b4?! This was an inaccuracy. (19.♚e4+ followed by Nd5 is better for White.) 19...♚f6! 20.♘xb5 cxb4 Black has equalized. Meier-Ponomarev, Dortmund 2011]

14.a4! White wants to play Na3 next, which forces Black to move with his b5 pawn. Both after taking on a4 or pushing b4, the knight will occupy the c4 hole.

14...b4 15.♘d2± It is hard to get more from the opening than this.

15...♙d6 16.♘c4 ♚c7 17.f4 Carlsen wants to seize the initiative. [It could have been done even more effectively by

playing 17.♖ac1! 17...O-O 18.♚c2! White is simply threatening to win the c5 pawn with taking on d6 and then on c5. 18...♖ac8

19.♙h3!+- With a decisive advantage for White. Black is completely paralyzed.]

17...O-O 18.♖ac1 exf4 Another sad decision to give up the center, but in a bad position it is hard to make good moves. [Black could not play the logical 18...♖fe8 19.fxe5 as he has no good takeback: 19...♘xe5 (19...♙xe5 loses to 20.d6! The diagonal is suddenly open for the f7 pawn. 20...♚b8

The prettiest finish is 21.♖xf7! ♙xf7 22.♘xe5+ +-) 20.♘xd6 ♚xd6 21.♙xc5+- With a clear extra pawn.]

19.♙xf4 ♙xf4 20.gxf4 White simply wants to advance his central pawns by playing e4-e5. The bad news for Black is that

he cannot prevent it, since the only attempt to do it would be f5, but it opens the b3-g8 diagonal and White wins after d6.

20...a5 21.e4 ♖ae8

22.e5! A terrible picture from Black's point of view.

22...♙a6 23.♖fe1 As if he was in zugzwang, Black decides to await his faith.

23...♙h8 [23...♘b6 Black cannot kick out the knight, since this move simply drops a pawn after 24.♘xa5; 23...♙xc4 does not solve any problem as after 24.♖xc4 Black is still doomed.]

24.♘d6 ♖e7 [24...♖ed8 loses on the spot after the following little combination: 25.♘xf7+! ♖xf7 26.d6!+- And the rook is hanging on f7.]

25.♖e3 Carlsen simply prepares an attack against the c5 pawn with Ne4. [He could have played for even more with 25.♖g3 The Nf5 threat provokes another weakening: 25...g6 26.♘e4+- followed by d6, Qh4 and Ng5. White is winning.]

25...♖d8 26.b3 Before playing Ne4, White deprives Black from playing c4.

26...g5!? Nakamura tries the best practical chance to complicate the matters a bit.

27.♙h1 White prepares for the opening of the g-file. [The

computer recommends a brutal way to finish the game: 27.♘f5! 27...♖ee8 28.♖g3 Black needs to cover the g7 square by playing 28...♖fg8 but it moves into 29.♘h6 ♖g7

30.f5+- This position is a nightmare.]

27...♖b8 28.♖f2 fxf5 is the new threat, because Black cannot take on e5 anymore because of Qf6 check.

28...gxf4 29.♖xf4 ♙d3 Bringing a defender for the king to g6. From now on Carlsen starts to make some really dubious moves, which is very uncommon for him.

30.♖e3? A terrible blunder, which could have cost half a point. [30.♙h3! was the easiest win, with the idea of taking on d7 followed by Qf6, Rg1 and Nf5 mate. Black is helpless.]

30...♙g6? [Black misses the chance to get back into the game with 30...♖xe5! 31.♖xe5 (31.♖xd3 31...♙xd6 is fine for Black.) 31...♙xd6 32.♖f5 ♙xf4 33.♖xf4 c4! Breaking through on the queenside. Black is suddenly not worse anymore.]

31.♖f1 ♖xe5! This move would have been much stronger a move earlier, but still this is the only chance.

32.♖xe5 ♙xd6 33.♖e8?! [33.♖e3! was better again to have the b3 pawn protected against Bc2 ideas. 33...♙xf4 34.♖xf4 Followed by d6. White is winning.]

33...♙xf4 34.♖xf8+ ♔g7! Black gets a much better version now compared to taking back on f8. Carlsen had probably missed this idea when he played 33.Re8.

35.♖xf4 ♔xf8 Black is back in the game again. If he gets his king to d6, he might already overtake the initiative, so the next move is forced.

36.d6! ♘e5 Nakamura would like to break through with c4, which White prevents with his next move.

37.♙f1! ♙c2 [Black should have gone for 37...♔e8! in order to block the d-pawn 38.♙b5+ ♔d8 and White should have started to work again to squeeze out some advantage.]

38.♙b5! A great move, making use of the fact that the black bishop must keep control of the f5 square.

38...f5 [38...♙xb3 is met by 39.♖f5 Black loses the c5 pawn. 39...♘g4 40.♖xc5+-]

39.♔g2! It feels like Black should already have counterplay, but it looks as if nothing is working for him.

39...c4 [39...♔f7 is met by 40.♖f2! ♙xb3 (40...♙e4+ 41.♔g3 ♔e6 42.♖d2+- White succeeds to coordinate.) 41.♖xf5+ ♔e6 And the small trick brings home the full point for White. 42.♖xe5+! ♔xe5 43.d7+-; On 39...♘f7 40.d7 ♔e7 41.♖c4 ♙xb3 42.♖xc5± White maintains his winning chances.]

40.♙xc4 ♙e4+ 41.♔g3 ♘xc4 42.bxc4

42...♔e8 [Unfortunately for Black 42...b3 43.♖f2 ♙c2 does not work because of the study-like finish 44.♖d2! ♔e8 (44...b2 45.d7+- Promoting with check.) 45.c5! b2 (The blockade

does not help: 45...♔d7 46.c6+!+-) 46.d7+! ♔d8 47.c6! Very effective cooperation between the pawns and the rook. 47...b1=♚ 48.c7+ ♔xc7 49.d8=♚+ +-]

43.c5 ♖c6 [43...♔d7 44.♚f2 ♔c6 White easily wins as the c5 pawn is untouchable. 45.♔f4+-]

44.♚xf5 ♖xa4 The last task is to stop the pawns, but it is not a difficult one for Carlsen. He brings his rook behind the b-pawn.

45.♚e5+ ♔d8 46.♚e7 ♖c6 [46...b3 47.♚b7+- Black cannot make progress.; 46...♔d7 also loses after 47.♚xh7 b3 48.♚h8+ ♖e8 49.c6 b2 50.d7+-]

47.♚c7 It should have been an easy 30 moves victory for Carlsen, but he suddenly lost concentration and it was enough for Nakamura to jump out from his cramped position and to almost save the game. **1-0**

(2) Mamedyarov, Shakhriyar(2753) - Carlsen, Magnus(2864) [E62]

8th Tal Memorial(9.2), 2013.06.23
[Arkadij Naiditsch]

We are at the last round of the Tal Memorial. In case of a win, Carlsen would share the first place but in case of a loss, Mamedyarov would overtake the World Number 1. So the stakes are high.

1.d4 ♘f6 2.c4 g6 Carlsen usually prefers to play the Nimzo or the Queen's Gambit.

3.♘c3 ♖g7 No Gruenfeld either.

4.♘f3 d6 5.g3 Mamedyarov is choosing a more "silent" system against the KID. It is obvious that Carlsen is looking for a "fight" in this game and is ready to play a game "all or nothing". So with 5.g3 Mamedyarov is making it clear that he prefers a more "calm" meeting at the chess board.

5...c6 A rare move, after 5...0-0 6.Bg2 Nc6 we are of course back in the mainlines.

6.♖g2

6...♖f5 This was Carlsen's idea: quickly leave the theory, but to be honest, this is looking really strange to me. Can a move like 6...Bf5 be objectively good?! The move is at least looking

very unnatural and Mamedyarov will prove us that nobody should make such "jokes" against him in the opening.

7.0-0 ♖e4 That's the main idea of Bf5. Now the bishop on g7 is getting a bit more active and an exchange of a piece is clearly good for Black.

8.♖e1 White is preparing to play e4 in the future.

8...0-0

9.♖b3! A very strong move! It forces Black to take a decision.

9...♖xc3 [After 9...♖c8 10.♖h4! Black doesn't have Nxc3 with tempo anymore. 10...♖xc3 11.♖xf5 And White has a clear advantage.]

10.bxc3 White's position looks very good! The b7 pawn is hanging and e4 is coming next.

10...♖c8 11.e4 ♕g4 We can clearly see that White is doing better, but what to play next?

12.e5!? A strong idea. [To include 12.♖b1 12...b6 13.e5 is also looking very nice for White.]

12...♕xf3 Not a nice move to play, but what else to do? White wanted to play the very unpleasant Bg5 next. [And after 12...♖d7 13.exd6 exd6 14.♕f4! Black would lose the d6 pawn.]

13.♕xf3 dxe5 Black is trying to destroy White's pawn

structure, but Mamedyarov continues to play a great game.

14.♖b1! A fantastic move! The b7 pawn is very important because it is closing the white bishop from f3. So by forcing Black to play b6 or even winning the b7 pawn, White would reach a big advantage.

14...exd4 [After 14...b6 15.♕a3 White's initiative is very strong.]

15.cxd4 White does not hurry as Black cannot protect b7 and e7 at the same time.

15...♕xd4 16.♖xb7 The b7 pawn is of course more important. We can clearly see that White already has quite a solid advantage.

16...♖f5 What a bluff by Magnus Carlsen! But it might be the best practical decision. [16...♖xb7 17.♖xb7 would lead to a very unpleasant endgame for Black.]

17.♕g2? This move still guarantees White a nice advantage, but [White could have finished the game in one move after 17.♕b2!! 17...♕xb2 18.♖xa8 and White is just an exchange up. 18...♖d7 19.♖xa7 I think the game would be over soon here.]

17...♖a6 Now Black is a little bit back into the game.

18.♕h6 White is also back into the game with a strong move.

The bishop on h6 is a very irritating piece for the black king, who is now in big danger.

18...♖c5

19.♔xe7?! Once again White misses his chance of finishing the game... [19.♔xc6! This move requires exact calculation, but again it is not too difficult to find. Usually it should have been a piece of cake for Mamedyarov. 19...♖fc8 20.♔xa8 ♖xa8 21.♔xa8 And White should be not afraid of Qxf2. 21...♔c8 (21...♔xf2+ 22.♔h1 ♖d7 23.♔xe7 simply leads to mate!) 22.♔f3 Whites advantage should be close to winning.]

19...♖d3 20.♔e4 Black still needs to play very accurately not to get into trouble again.

20...♔g7?! A strange move. [Why not simply play 20...♔e5! and Black is more or less fine.]

21.♔d1 ♔xh6 22.♔xd3 All the white pieces are very active and Black is going to lose at least the pawn on c6.

22...♔g5! A very strong move! Black has to force the queens exchange in order not to get mated. As we know, with opposite colored bishops on the board, the attacking side has an extra advantage.

23.♔e5 ♔xe5 24.♔xe5 ♔f6 25.♔a5
[25.♔c5 was maybe a bit more precise.]

25...♔fd8! Another great move by Black! It would make no sense to try and keep the c6 and a7 pawns alive as this is simply impossible. Instead Black is trying to create some counterplay.

26.♔xd8+ ♔xd8 27.♔xc6 ♔d2 White is winning both pawns on the queenside, but Black is capturing a very important pawn on f2.

28.♔a7 ♔d4 29.♔d7 ♔xf2+ 30.♔h3 ♔e5 Black's idea is to play h5-g5-g4 next.

31.♔d5 ♔c7 32.♔d7 ♔e5 33.♔d5 ♔c7 34.♔d7 Mamedyarov was probably a bit upset to not reach more than this endgame, but of course even here White could have tried to play on for a win with 33.a4 for example. The position is still quite tricky. I have asked myself many times how Carlsen does it?! It seems like against him, even great tactical players are missing quite obvious hits. :) 1/2-1/2

(3) Karjakin, Sergey(2782) - Anand, Viswanathan(2786) [B97]

Moscow RUS(9.4), 2013.06.23

[Balogh Csaba]

A very sharp theoretical duel in the poisoned pawn variation of the Najdorf. It would be interesting to know the preparation of both players. I can easily imagine that they both have analyzed everything until the last move of this game.

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 a6 6.♙g5
White goes for the sharpest setup against the Najdorf.

6...e6 7.f4

7...♙b6 Fischer's favorite move is the most concrete option for Black with a direct attack against the b2 pawn. On the other hand, Black spends some very important tempi to grab that pawn and his undeveloped pieces led to many quick defeats. However the current theory is so deep here that - having analyzed everything with the strongest computers until move 25-30 - the players with good memory are ready to go for the complications, as the lines are not worse for Black, usually they end with perpetual check. :) In many lines both sides are forced to make only moves, otherwise Black gets mated or White ends up with material disadvantage without adequate compensation.

8.♙d2 White has no good way to protect the b2 pawn, since he does not want to play a move like Rb1 as he wants to castle queenside.

8...♙xb2 9.♖b1 ♙a3 The starting position of the poisoned pawn variation. White is the first one who has a couple of choices here.

10.e5 This is the new wave. The old mainline is 10.f5.

10...h6 [10...dxe5 11.fxe5 ♘fd7 (11...♘d5 If Black wants to go for this option, it is extremely important to include the h6-Bh4 pair of moves because of the nice tactical trick of 12.♘xd5 exd5 13.♖b3 ♙a4

14.♘b5!! and Black cannot prevent Nc7, while with the h6-Bh4 moves the bishop would be hanging on h4! 14...axb5 15.♙xb5+ -+)]

11. ♖h4 dxe5 12. fxe5 ♘d5 [12...g5 and 12...♘fd7 are also huge theoretical lines.]

13. ♘xd5 exd5

14. e6! [14. ♖b3 14... ♖a4 15. ♘b5 ♖xh4+ is the point behind playing 10...h6 11. Bh4.; After some "normal" moves like 14. ♖d3 14... ♖c5 15. ♖f2 ♘c6 Black develops his pieces and White finds himself being a pawn down.]

14... ♖xe6 15. ♖xb7 This is the novelty according to my database. [The previous games continued with 15. ♘xe6 15... fxe6 16. ♖d3 ♖e7 17. ♖g6+ ♖d8 Black is already two pawns up, but his king cannot be said to be safe. 18. ♖xe7+ ♖xe7 19. O-O Creating the threat of Rf7. 19... ♘d7! 20. ♖f7 (20. ♖xb7 was met by 20... ♖c5+ 21. ♖h1 ♖a7! Black has more or less consolidated his position and he still has an extra pawn.) 20... ♖c5+ 21. ♖h1 ♖f8 22. ♖xg7 ♖f6! And most of the games here ended with a draw after repetition: 23. ♖g8+ ♖f8 24. ♖g7 ♖f6]

15... ♖d6 Getting ready to castle. [A logical developing move like 15... ♘d7 perfectly illustrates the dangers of Black's position.]

16. ♖b5!! With the threat of Nxe6 and the d7 pawn is hanging. 16...axb5 17. ♘xb5 White threatens with mate on c7 and taking the queen. Black can stay in the game with 17... ♖b4! Freeing the f8 square for the king, but he ends up in a bad position after 18. ♘c7+! ♖f8 19. ♖xb4 ♖c8 20. ♘xe6+ fxe6 21. O-O ♖g8 22. c4!± Black still didn't manage to solve the problem of his king. White has a strong attack.]

16. ♘xe6 fxe6 17. ♖e2 [17. ♖d3 would deprive White from the option he had in the game. 17...O-O White cannot increase the pressure.; 17. ♖xg7?? is a terrible blunder because of 17... ♖b4]

17... O-O The difference between the previous move and 17. Bd3 is that White has

18. ♖d4! It is not easy to deal with the threat on g7. At first sight, Black has three playable options, but only one of them works...

18...♖f7! [18...e5 leads to a worse endgame after 19.♙xd5+ ♗h8

20.♔d1!! Avoiding the queen checks on c3 and c1. Black cannot develop his b8 knight, which disturbs the coordination between the pieces. White threatens to play Bd3 followed by Qe4 or Rb3 and the a8 rook is hanging. **20...♖f4!** The only move. **21.♖b3!** ♖d4+ (21...♙xa2 22.♖xb8+ +- wins the a2 queen.) **22.♙xd4 exd4** **23.♖xa3 ♗xa3** **24.♗f3 ♖a7** **25.♖e1±** With material equality, but the bishop pair combined with the more active pieces give White a clear advantage.; 18...♙c1+ is tempting, but it only helps White because after 19.♗d1! Black has nothing else than 19...♖f7 **20.♖xf7 ♗xf7** **21.O-O!** Castling with tempo and the queen gets into a pin on c1. **21...♗g8** **22.♙b6+-** (22.♗g4 also wins.)]

19.♖xf7 ♗xf7 **20.O-O ♗g8** It feels like White should have some crushing move here, but he must lose an important tempo on preventing the threat of Bc5.

21.♙g4 ♙e3+ **22.♗f2** [22.♗h1!? was another interesting try, after which Black has to defend precisely with 22...♗d7! (22...♗c6 is refuted by 23.♗f6! ♗f8 24.♗d3! With the threat of Qg6-h7. 24...♗b4 25.♗d4! ♙g5 26.♙xe6+ ♗h8 27.♗g6+- Black cannot hold the pressure.) 23.♗d3 ♖f8 24.♖e1 ♗f6! This intermediate move is a key resource in Black's defence. 25.♖xe3 ♗xg4 26.♖xe6 ♗xh2 With an equal endgame.]

22...♙e5 **23.♗g3 ♙e3+** **24.♗f2 ♙e5** **25.♗d4!?** White could have agreed to a draw, but he tries another deep trick to win the game.

25...♙xh2+ **26.♗f2**

26...♙f4+! Anand finds the last only move and holds the draw. [26...e5? looked good as well, but White has a fantastic win here:

27.♗e1!! Opening the f-file for the rook, and creating a hidden threat. **27...♗c6** (27...exd4 leads to a forced mate after **28.♙e6+ ♗h8** **29.♙e8+ ♗h7** **30.♗d3+ +-**) **28.♗g1!!** This is the point and suddenly the queen gets trapped. **28...♙h1** **29.♗c5+-]**

27.♙xf4 ♗xf4 **28.♗g4** White is two pawns down at the moment, but he inevitably wins back the material.

28...♖c6 [28...e5 looks like a blunder because of 29.♗e6+ ♔h8 30.♗xd5 but Black can still save the game: 30...♖c6! 31.♗xc6 ♖c8 32.♗b7 ♖c7]

29.♗xe6+ ♔h8 30.♗xd5

30...♖d8! The last subtlety to get rid of the bishop pair. The game is a dead draw now.

31.♗xg7+ ♔xg7 32.♗xc6 ♖d2+ 33.♔f3 ♖xc2 34.♗e4 [34.♔xf4 34...♖xc6]

34...♖c1 35.♖xc1 ♗xc1 The 15.Rxb7 novelty was a nice try by Karjakin, but Anand was well prepared. Some slightly weaker player would probably have fallen for one of the many traps, but the World Champion has found all the only moves. **1/2-1/2**

(4) Kramnik, Vladimir(2803)
- Gelfand, Boris(2755) [A36]

8th Tal Memorial(9.3), 2013.06.23
[Arkadij Naiditsch]

Kramnik played what is probably one of his worst tournaments in the last years, -3 is a very tough result. So we are in the last round and it is clear that White has no ambitions whatsoever to play this game and would be happy with a short draw. How to do it? Sometimes when you are in a bad shape it is not an easy task at all. This game is about: how to make a draw when you want a draw! :)

1.c4 is one of Kramnik's main moves and probably also one of the safest ones.

1...c5 [1...e5 is a more aggressive reply, but Gelfand does not usually choose it.]

2.♖c3 g6 Black is ready to play quite a fighting line after

3.g3! If White is playing for a draw, this is a great move! Keeping the position symmetrical. [3.♖f3 3...♗g7 4.d4 cxd4 5.♖xd4 would lead to a fighting position.]

3...♗g7 4.♗g2 ♖c6 5.e3! Again an excellent choice if you are playing for a draw. [5.♖f3 would lead to a normal, long term play.]

5...e6 With this move Black is making it clear that a draw is also fine with him.

6.♖ge2 ♖ge7 7.O-O O-O We see a total symmetry.

8.d4 cxd4 Black has to stop repeating White's moves, but not for a long time.

9.♘xd4 White continues avoiding any complications. [9...exd4 9...d5 would again lead to a bit more fighting position.]

9...d5 10.cxd5 ♘xd4 A forced move. [After 10...exd5?! 11.♘xc6 bxc6 12.♕d2 White's position is a little bit better.]

11.exd4 ♘xd5 As we can see, the position is already very close to a draw.

12.♞e1! A very good move in this particular situation. Now Black has to be a bit accurate in "making a draw".

12...♞b6! As I was watching this game live, I remember that Gelfand played this move almost instantly. Boris still has a huge reserve of prepared lines from the WCC match last year.

13.♕xd5 White's best try to get something out of the position.

13...exd5 14.♘xd5 ♞xd4 15.♞xd4 ♕xd4 We can see that Kramnik reached his first goal of avoiding any kind of complicated positions. Now the question is, can White get any small advantage here or not?

16.♘c7 ♞b8 17.♘b5 The a7 pawn is White's target.

17...♕b6 18.♕h6 ♞d8 19.♕f4 [Another try could have been 19.♕g5 19...f6! The only move. 20.♕xf6 ♕xf2+! again seems to be the only way to continue the game. 21.♞xf2 ♞f8 22.♞e7 ♞xf6+ 23.♞e3 ♕g4 24.♘d4 ♞f7 And it seems that Black is doing perfectly fine.]

19...♞a8 20.♘c7 ♕xc7 21.♕xc7 ♞f8 Opposite colored bishops, equal pawns, it is clear that this position should be very close to a draw, but White can still try to "push " a little bit.

22.♕d6 ♞d8 23.♕c7 ♞f8

24.♕d6 Kramnik continues repeating moves. He really had enough of this tournament. [I am sure that if Kramnik had been in better shape, Black would still have had to suffer for quite some time after 24.♞e7 With a minimally better position for White.]

24...♞d8 25.♕c7 ♞f8 We have now faced a "start-finish"

draw game, which is sometimes the best you can do from a practical point of view... Nakamura for example lost his last 3 games, and maybe a "dry" recovery draw would have been a not too bad result - only from a practical point of view! :)
1/2-1/2

Endgame section

(15) Grachev, B.(2683)-Dubov, D.(2638)

Ekaterinburg, 2013.06.23

[CE Team]

White basically has an extra pawn on c4, since the doubled f-pawns cannot be counted as more than one. However the strong bishop on d4 and the appearance of opposite colored bishops give Black decent chances for survival.

29. Rdb1 White would like to keep his active rook on the 7th rank.

29... Bb6 A natural decision to force some exchanges by closing the b-file, but it allows a clever simplification. [29... Rxb7 30. Rxb7 is also quite unpleasant. Black cannot activate his rook, while White has different ways to make progress. He can for instance play on the light squares by putting the pawns to f3 and g4, driving the bishop to d5 and marching to f5 with the king.]

30. Rxb8 Rxb8

31.c5! Bc7 32. Rxb8+! Excellent evaluation of the resulting endgame! White transposes to an opposite colored bishop endgame with equal pawns, but the quick invasion of the king on the queenside gives him all the chances to win the game.

32... Bxb8 33. Ke2 h6 Black has to waste an important tempo on advancing the h-pawn before driving his king to the other side of the board.

34. Qd3 Qf8 35. Qc4 Qe7

36. Bb5 White is ready to trap the bishop with Kc6-b7!

36... e4! Black uses his only chance to free his bishop, but it costs him a pawn. But in many opposite colored bishop endgames one pawn is not relevant at all. The bigger problem is that after White gets his king to b7 and takes the a7 pawn he obtains two passed pawns on the queenside. [The passive

defence with 36...♔d8 37.♔c6 ♘c7 38.♔b7 a5 leads to a quick, but nice defeat after

39.a4! Black is in zugzwang. He can neither move his king nor his bishop. 39...h5 40.h4+– And Black doesn't have any move.]

37.♔a6 [37.h3 It was more logical to keep the h-pawn as it might be useful later on. Ka6 is coming anyway...]

37...♔d8 [37...♘h2 is met by 38.♔xa7 ♘g1 39.♔b7! ♘xf2 40.c6 e3 41.♘d3+– White easily stops the e-pawn, while the c-pawn will inevitably promote in the next moves.]

38.♘xe4 ♘xh2 Black could not stay passively with Kc7-c8 in order to prevent Kb7, because White wins the f7 pawn after Bd5 and he obtains a passed pawn on both flanks, which makes the position easily winning.

39.♔xa7

39...♔c7! It was necessary to prevent Kb7.

40.♔a6 f5 The pawn cannot be taken because of Kc6.

41.♘d5 ♘g1 42.a4 ♘xf2 43.♔b5 The correct evaluation of the entire endgame is based on this position. It looks like White is winning, but let's check the possibilities:

43...♔b8 Black is ready to put his king to a7, which is the best chance. [43...f6 Black should rather focus on stopping the queenside pawns than wasting a tempo to protect the uselessf-pawn 44.a5! ♔b8 This move is necessary in any case when White plays a6 to prevent a7... 45.♔b6 ♘g3 Another obligatory move to have Bc7 against the a6-a7 threat, but it does not help. 46.a6 ♘c7+ 47.♔c6 ♘g3

48.♔d7! Followed by c6-c7 and after Bxc7 a7, winning the

bishop and the game thanks to the last standing pawn on g2.
48...h5 49.c6 ♖e5 50.c7+ ♜xc7 51.a7+ ♔xa7 52.♔xc7+-]

44.♜xf7 [44.♔b6 44...♜g3]

44...♔a7 45.♜h5 White has all the time in the world to find the ideal place for his bishop, since Black has nothing better to do than waiting.

45...♜e3 46.♜e2! This is the right diagonal, with the idea to advance the pawn to a6 followed by Kc6-Kd6 and c6 and to have the a6 pawn protected.

46...♔b7 [46...♜g5 Changing the bishop's diagonal makes no difference. White wins after 47.a5 ♜d8 48.a6 ♜c7 49.♔c6 ♜a5 50.♔d7+- and c6-c7.]

47.a5 ♜f4 48.a6+ ♔c8 [48...♔c7 loses to 49.♜f3 ♔b8 50.♔b6 ♜c7+ 51.♔c6 White wins as we have already seen in the 43...f6 line.]

49.♜d3 ♜b8 50.♔b6 [Black resigned in view of 50.♔b6 Threatening to play a7. 50...♜c7+ 51.♔c6 ♜b8 52.♜xf5+ ♔d8 53.♔b7+- An instructive endgame, which shows the difficulty of opposite colored bishop endgames. We can save many bad positions by escaping into them being 2 or 3 pawns down, but sometimes even with material equality we are just unable to hold. I am pretty sure that Grachev did not know whether the endgame was won or drawn when he exchanged the rooks, but he probably felt that the invasion of his king would give him very good practical chances.] **1-0**

(16) Neverov, V.(2515)-Volokitin, And(2687)

82nd ch-UKR 2013(10), 2013.06.25

[CE Team]

A very interesting and practical rook endgame saw the day after move 40. Black will very soon be a clear pawn up, because the white pawn on b5 will be lost. But whether the position is more "losing" or closer to a "draw", this we will find out during the next moves.

40...h6 41.♖c6 [An attempt to make a "barricade" against the Black king would not lead to anything: 41.h3 41...♖xb5 42.g3 And Black has the move 42...g5 anyway, so it's about the same as in the game.; 41.♖c8! To active the rook would have been a good idea in any case as the rook is not standing on its best position on c6. 41...♖xb5 42.h3 Followed by similar ideas as in the game, except that White would not have lost a tempo by playing Rc8.]

41...♖xb5 42.h3 White wants to play g4 next and exchange all the pawns, so Black is forced to act.

42...g5! Clearly the best winning attempt.

43.fxg5 hxg5

44.g3 White is trying to avoid f4 followed by Kh4-Kg3, which is very logical.

44...♖b2+ 45.♔f3 g4+? Quite a mistake! [To check the White king first and only then 45...♖b3+ 46.♔f2 to play g4 would give Black much better winning chances as the white king now has to stand on a passive position on f2. 46...g4 47.hxg4+ Now Black has to decide whether to take with the king or the pawn. Both lines are looking pretty complicated. 47...♔xg4! gives Black better winning chances (47...fxg4 seems to be possible as well, but White should be just in time to make a draw: 48.♖c8! It is very important to activate the rook. 48...b5 49.♖h8+ ♔g5

50.♖g8+ ♔f5 51.♖f8+ ♔e4 The black king has to run to the b-pawn, as it is impossible to hold on to the g4 pawn.

52.♖f4+ ♔d3 53.♖xg4 We are now in a position where things are very forced. 53...b4 54.♖g8 ♖c3 55.♖b8 b3 56.♔f3! White is in time to activate his king. 56...♔c2+ 57.♔f4 And the game should end in a draw.) 48.♖g6+ ♔h5 49.♖g8 b5 White has to do something, Black wants to play Rb1 and bring the pawn to b3 after which White will be forced to leave the nice position on g8 with his rook. 50.♖f8 ♔g6 51.♖g8+ ♔f7 52.♖b8 ♔e6 53.♖e8+ ♔d5 54.♖d8+ ♔c4 55.♖f8 Once again White's only chance is to take the f5 pawn. 55...♖d3 56.♖xf5 b4 57.♖f8 And White seems to be in time again to hold the draw.]

46.hxg4+ fxg4+

47.♔e4? And White is giving Black the favor back. [47.♔f4! would have been a much stronger move. In comparison to the game, White would now have his king on e5 and not on e4, which makes a huge difference. 47...♖b3 48.♖c8 ♖f3+ 49.♔e5 ♖xg3 50.♖h8+ ♔g5 51.♖g8+ ♔h5 52.♖h8+ And here we can clearly see why White's king's position on e5 is much better. Black doesn't have Kf6 and is now a tempo down, which is extremely important. 52...♔g6 53.♔f4 ♖g1 54.♖b8 And White should easily hold the draw.]

47...♖b3 48.♖c8 ♖xg3 49.♖h8+ ♔g5 50.♖g8+

50...♔f6! That's the point! Black is in time to give up the g-pawn and get his own king to e5!

51.♔f4 ♖b3 Nobody cares about the g-pawn anymore.

52.♔xg4 ♔e5 The black king is on his way to b4, after which the position is theoretically winning.

53.♖e8+ ♔d4 54.♔f4 b5 The black rook from b3 is cutting White's king on the 3rd rank, which gives Black a clear point!

55.♖d8+ ♔c4 56.♔e4 ♖c3 Nothing helps White anymore.

57.♖d4+ ♔b3 And once again we saw how complicated rook endgames are and how easy it is to make a crucial mistake which makes a difference of half a point! **0-1**

Clash of the Titans

(17) Rubinstein, Akiba-Nimzowitsch, Aaron[A55]

San Sebastian(22), 1912.03.19

[Kamil Miton]

1.d4 ♘f6 2.c4 d6 3.♘f3 ♘bd7 A rare continuation which leads to King's Indian structures.

4.♘c3 e5 5.e4 ♙e7 Its hard to say what the advantages of placing the bishop on e7 are, instead of the more typical development on g7. Maybe when White will close the center after d5, the bishop can be activated over d8-b6.

6.♙e2 O-O 7.O-O ♖e8 8.♔c2

8...♙f8 9.b3 I'm not sure if this plan is the best for White. The bishop on b2 looks good only in case Black takes on d4. [9.♖d1+=]

9...c6 10.♙b2 ♘h5 Black is trying to create some weaknesses on the kingside. [10...exd4 11.♘xd4 ♘c5 12.f3 And now Black has the typical break 12...d5 When this move works, Black is usually fine. 13.exd5 (13.cxd5 13...cxd5 14.♘xd5 ♘xd5 15.exd5 ♙xd5 16.♙c4 ♙h5 17.♖ad1 ♙d7) 13...cxd5 14.♖ad1 White has the initiative.]

11.g3 ♘b8?! I understand that Black wants to develop his bishop and launch some play against the white king, but this move cannot be good! Black could for example play b6-Bb7, then later maybe a6-b5 and in case White plays d5 in order to limit the b7 bishop, then the bishop on b2 will have the same problem.

12.♖ad1 ♔f6

13.♘b1?! Rubinstein's idea is correct, he understands that Black's development is very bad and that he has chances to break the position in the center but he should have done it in a different way: [13.c5! 13...♙g4 (13...exd4 14.♘xd4 dxc5 15.♘f5 ♗g6 16.♙c1 Black has problems with the queen and the knight.) 14.♘h4 (14.cxd6 14...♙xf3 15.dxe5 ♖xe5 16.♗d3 ♙xe2 17.♘xe2 ♖d5 18.♗c2 ♗g6 And Black escapes.) 14...♙xe2 15.♘xe2 White is much better!]

13...♙h3 14.♖fe1 [14.dxe5 14...dxe5 15.♘xe5 ♖xe5 16.♙xh5 ♙xf1 17.f4 (17.♙xf1 17...♗e7 18.♙xe5 ♗xe5 19.♙e2 ♘a6 Black has full compensation thanks to the weakness of the dark squares.) 17...♙h3 18.♙xe5 ♙c5+ 19.♙h1 ♗e7 Followed by Nd7. White is a pawn up but his pieces are very badly coordinated and his king is not safe.]

14...♘f4 15.dxe5 [15.♙f1 15...♙g4∞]

15...dxe5 [15...♘xe2+ 16.♗xe2 dxe5 17.♘xe5 ♖xe5 18.f4

(18.♙xe5 18...♗xe5 19.♖d8 With unclear play.) 18...♙c5+ 19.♙h1 ♘d7 20.fxe5 ♘xe5 Once again Black has nice compensation.]

16.♘xe5 ♖xe5 [16...♘g2!?]

17.♙f1 ♘d7 18.♗d2 [18.gxf4 18...♗g6+ 19.♙h1 ♙g4 20.♙g2 ♙xd1 21.♖xd1 ♖e7 22.♙a3 And I suppose that here it is better for Black to give back the exchange and get compensation because of the dark squares instead of playing 22...c5 because after 23.♘c3 followed by e5, White will get nice play over the h1-a8 diagonal and on the d5 square.]

18...♙xf1 Black wouldn't have had any problems after [18...♙g4 19.♙xe5 (19.♗xf4 19...♗xf4 20.gxf4 ♖xe4 21.♖xe4 ♙xd1 22.♖d4 ♙g4=+) 19...♘xe5 20.♗xf4 ♗xf4 21.gxf4 ♘f3+ 22.♙g2 ♘xe1+ 23.♖xe1 ♖d8∞]

19.♖exf1 [19.♙xf1 19...♘e6 20.♗xd7 ♙c5 21.f4 (21.♖d2 21...♗f3 22.♙xe5 ♗h1+ 23.♙e2 ♗xe4+ 24.♙f1 ♗h1+ With perpetual check.) 21...♗h6 22.♙xe5 ♗h3+ 23.♙e2 ♗xh2+ 24.♙f3 (24.♙d3 24...♙b4-+) 24...♙f2 With very unclear play. 25.♖eg1 ♙xg1 26.♗d2 ♗h1+ 27.♗g2 ♗xg2+ 28.♙xg2 ♙b6]

19...♘h3+ 20.♙g2 ♘g5 21.f4 ♗g6 22.fxg5 ♖xe4 [22...♖e7 23.♙a3 ♗xe4+ 24.♙g1 c5 25.♘c3 White is better because of the weak d5 square.]

23. ♖xd7 ♜e2+ 24. ♜f2 ♜e4+ 25. ♔g1

25... ♙c5?? A huge overlook and the –+ mistake. [25... ♜xf2 was the correct move. 26. ♔xf2 ♜c2+ 27. ♜d2 ♜f5+ 28. ♜f4 The only move to avoid perpetual check. 28... ♜c2+ 29. ♜d2 ♜xb1]

26. ♙d4 This move is winning too, but it was easier to mate in two moves... [26. ♜xf7+ 26... ♔h8 27. ♜xg7+]

26... ♙xd4 [White could have had more problems to find the best move after 26... ♜e1+ 27. ♜xe1 (27. ♜f1 27... ♜xf1+ 28. ♔xf1 ♜f3+ 29. ♔e1 ♙b4+ 30. ♙c3 ♜e3+ 31. ♔f1 ♜f3+) 27... ♜xe1+ 28. ♔g2 (28. ♜f1? 28... ♜e6 29. ♜xe6 ♙xd4+ 30. ♔g2 ♜xe6 31. ♙d2 White has the e4 square for the knight, but on the other hand Black can play a5-a4 to activate the rook.) 28... ♜e4+ 29. ♔h3 ♜xd4 30. ♜xf7+ ♔h8 31. ♜xb7±]

27. ♜xd4 ♜e1+ 28. ♜f1 ♜xf1+ 29. ♔xf1 ♜h1+ 30. ♔f2 [30. ♜g1 30... ♜f3+ 31. ♔e1 And the white king will simply escape after 31... ♜e8+ 32. ♔d2+–]

30... ♜xh2+ 31. ♔f3 White is simply winning in this position.

31... f6 32. ♜d2 ♜h3 33. ♜d7 f5 34. ♙c3 ♜h5+ 35. ♔g2 ♜xg5 36. ♜e6+ ♔h8 37. ♙e2 ♜h5 38. ♜d7 ♜e8 39. ♙f4 ♜xe6 40. ♙xh5 ... 1-0

Editorial Preface

The Geneva Masters, a very strong rapid tournament, was won by Mamedyarov, who seems to be in great shape after winning the World Rapid Championship title and showing a good result at the Tal Memorial. In Geneva, Shakhriar managed to very convincingly beat Kramnik in the final with 1,5-0,5. The 3rd and 4th places went to Nakamura and Bacrot.

The Women's FIDE Grand Prix was won by Koneru with the great score of 8/11. 2nd and 3rd places went to Anna Muzychuk and Dzagnidze with 7/11.

The mini rapid match out of 4 games between Carlsen and Predojevic was won 2,5-1,5 by the former, with 3 games being drawn and Carlsen winning one.

The Russian higher league was won by Inarkiev and Nepomniachtchi, both with 6,5/9, but Inarkiev's better tie-break earned him the qualification for the next edition of the Tal Memorial.

We can already be very curious in view the upcoming week as another FIDE Grand Prix is starting in Beijing with a great line-up and it is now going to be especially exciting because of the qualification places for the next World Championship Title.

As usual, we wish you a lot of chess fun with Your CEWN Nr71 !

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) **Mamedyarov, S.(2753)**

- **Bacrot, E.(2725) [A85]**

Geneva rapid, 2013.06.29

[Balogh Csaba]

In this rapid match, Bacrot lost the first game with the white pieces. Normally it is extremely difficult to fight back against such a strong opponent, especially with Black, but the Frenchman has done a great job in this game.

1.d4 f5! Bacrot needs to avoid his solid main repertoire, since there White can easily force a draw. He had to play something asymmetrical to break the balance.

2.c4 ♘f6 3.♘c3 d6 Black wants to play the Leningrad variation of the Dutch defence, which could be reached after g6 and Bg7. White will play a rare move here instead of the usual Nf3, g3 Bg2 setup.

4.♗g5

4...♗bd7 Black wants to continue his plan with g6, but first he avoids the possibility of damaging his pawn structure with Bxf6.

5.♖c2 g6 6.e4 [Mamedyarov already had a game where he played 6.h4 This time he wanted to get a more calm position as a draw was enough for him to win the match.]

6...fxe4 7.♗xe4 ♗g7 8.♗xf6+ This is basically a novelty. White initiates some exchanges, which is usually a good way to achieve a draw. [8.♗f3 was played in most of the games, but Black has a very strong reaction to complicate the matters in his favor: 8...♗xe4 9.♖xe4

9...c5! With a very sharp fight, which was exactly what Bacrot had to aim for.]

8...exf6! The right recapture, improving the pawn structure by getting rid of the backward pawn on e7. [8...♗xf6 could be met by 9.♗d3! preventing Bf5. 9...O-O 10.♗e2 followed by O-O with a comfortable game and a small advantage for White.]

9.♗e3 O-O 10.♗d3 Mamedyarov knows that Black's idea is to play f5 and Nf6, when his knight is going to be better placed on e2, from where it can jump to f4, than on f3.

10...f5 11.♗e2 ♗f6 12.h3 Prophylaxis against Ng4.

12...♗d7 13.d5?! A very logical move, preparing to occupy the d4 square with the knight, but concretely this move seems to be slow. [13.O-O is met by 13...♗h5! with the idea of f4-f3, destroying the pawn structure. White needs to parry this.

14. ♖d2

14...f4! 15. ♘xf4 ♘xf4 16. ♕xf4 ♖h4!= Black wins back the d4 pawn and equalizes the game. Still this is much better from White's point of view than the game.]

13... ♗h5! Black is ready to push f4-f3.

14. 0-0 [14. ♖d2 does not really prevent the threat. 14...f4! 15. ♘xf4 ♘xf4 16. ♕xf4 ♕xb2! Black has the initiative.; 14.f4? Black can make use of the e1 king here: 14...♖e8! 15. ♕f2? On other bishop moves Qh4 forces the king to move, but here the f4 pawn falls because of the pin: 15... ♘xf4; 14.g3 might objectively be the best, although this move is very committing since White can never castle kingside after such a weakening, while after queenside castling Black can open the files with a6-b5, or c6.]

14...f4 15. ♕d4

15...f3! Very energetic play by Bacrot. This is how we need to fight when we need a win. This move creates a big weakness on f2. The only drawback could be the opening of the g-file in front of his own king, but White is very far from launching a dangerous attack.

16. gxf3 ♖xf3 17. h4 Black was simply threatening to take on h3 and also to play Qh4, which would have been an excellent place for the queen.

17... ♖f8! Black increases the pressure on the f2 pawn and also intends to bring his a8 rook into the game.

18. ♕e4 Bacrot finds a very nice idea to increase the advantage.

18... ♗h6+! Forcing White to move into some tactical motifs.

19. ♔b1 ♖e8!! This is the point! Black creates the very unpleasant threat of taking the bishop on e4, followed by Bf5 pinning the queen.

20. ♔a1! The only move to not lose material. The king leaves the dangerous b1-f5 diagonal. [20. ♖xf3 loses to 20... ♔xf3!+- (But not 20... ♖f5? because of 21. ♖d3!)]

20... ♖f5! The rook was already hanging on f3, so Black needs to exchange the bishop.

21. ♖xf5 ♔xf5! Black is ready to go for the endgame, since he has a clear advantage there with the weaknesses on f2 and h4.

22. ♔xf5 gxf5 [22... ♖xf5 was also good enough for an advantage.]

23. ♖c3 [There was a nice tactical trick, that after 23. ♖g1

23... ♖d3! (White's point was that after 23... ♖f4 24. ♖e3 wins the exchange.)]

23... a6 Protecting the pawn and preventing Nb5.

24. c5 White is slightly worse because his pawns are weaker and his pieces are rather passive. He therefore tries to initiate some exchanges to change this situation.

24... ♔f7 Activating the king.

25. a3 Opening the back rank. [It was better to start with 25. ♔b1 followed by ♔c2 like it happened later on in the game.]

25... dxc5 With this and the next two moves, Black creates another pawn island for White (on d5). [25... ♖f6!? was a good alternative to transfer the knight to g4. Black has a nice advantage.]

26. ♖xc5 b6! 27. ♖d4

27... ♖f4! This and the previous move were very important to avoid White's idea of pushing d6, getting rid of the weakness and activating his rook.

28.♖hg1 ♘f6! Bacrot transfers his knight to g4 to put pressure on the f2 pawn.

29.♔b1 Mamedyarov found this clever plan of Kc2 and Rd3 to trade off the very unpleasant rook on f3. This would solve most of his problems.

29...♞g4 30.♔c2

30...♙h2!! An extremely strong move with huge tactical deepness. [After the direct 30...♙e5 exchanging the defender of the f2 pawn, White could react with 31.♖g2! and after 31...♙xd4 32.♖xd4 ♘xf2 (32...♖xf2+ 33.♖xf2 ♘xf2 34.♖f4 wins back the pawn.) 33.d6! White gets strong counterplay for the pawn.]

31.♖gh1 [31.♖g2 moves into 31...♖g8! Another very unpleasant move. It is suddenly very difficult to defend against Ne3, while on king moves like Kb1, Black can go for the h4 pawn with Rh3.]

31...♙e5! White does not have Rg2 now, so the f2 pawn is lost without adequate compensation.

32.♖d3?! Mamedyarov has planned this move before and it seems to solve the problems, but he missed a huge tactical strike in his calculation. [32.♙xe5 32...♖xf2+ ♖]

32...♖xd3 33.♙xd3 c5!! Black wins big material now.

[White resigned in view of the following lines: 33...c5 34.dxc6 (34.♙e3 34...f4—+ And the f2 pawn will fall.; 34.♙xe5 34...♘xf2+ wins the rook.) 34...♖d8! This is the point, pinning the bishop and threatening to take on f2. The game is over. 35.♘e2 ♘xf2+ —+ A great game by Bacrot, which helped him to reach the blitz tiebreak. But Mamedyarov defeated him there and advanced to the final, where he beat Kramnik as well.] **0-1**

(2) Bacrot, Etienne(2725) - Edouard, Romain(2666) [D02]

Geneva Masters GpB 2013(2.2), 2013.06.27
[Arkadij Naiditsch]

Etienne Bacrot scored a nice positional win in the B group against his younger team colleague, who was clearly not in his best shape during the rapid tournament in Geneva.

1.d4 ♘f6 2.♘f3 d5 Usually Edouard is a big master of the Gruenfeld and it is strange that he decided to deviate from his main opening

3.g3 [We would be back in the main lines after 3.c4]

3...c6 After this move it is obvious that Blacks wants to play some sort of "Slav" structure.

4.c4 dxc4 We are now back into the "Slav" with the rare move g3 for White, but the position is a very fighting one.

5.♗g2 White does not hurry with winning back the c4 pawn. This way, he is keeping all options open for the future.

5...♞bd7 The black knight is going to protect the c4 pawn from b6.

6.♞c2!? A nice move with a double idea. First of all it is of course nice to win the c4 pawn back and on the other hand

it is also an option for White to push e4 and to dominate the center.

6...♞b6 7.a4 It is hard to say for who it is more useful to include the a4-a5 moves. The black knight on b6 could now eventually end up under attack in the future because the pawn is not on a7 anymore, but on the other hand the b4 square could be a nice future place for it.

7...a5 Black can of course not allow White to push a5.

8.♞a3 g6 The most logical move. Black needs to castle and to play e6 looks a bit ugly because it closes the c8 bishop.

9.e4!? Probably the only way to fight for an advantage. [9.♞xc4 9...♗f5 would lead to a good position for Black.]

9...♗g7 10.O-O O-O As we see, we have a very complicated position. Black is a pawn up but White dominates in the center.

11.♞d1

11...♞fd7 looks a bit too passive to me. [11...♗e6! looks pretty logical. Black should try to keep the extra pawn on c4. 12.h3 Preparing for Ng5 and avoiding Bg4 for the future. 12...♞c8! The queen is pretty well placed on c8, as the black rook can now take place on d8. The position would have remained complicated.]

12. ♖f4 [The simple 12. ♖xc4 12... ♖xc4 13. ♖xc4 ♖b6 14. ♖c2 would also have given White better play.]

12... ♖e8 Black is trying to work out the e5 push.

13. ♖e3 Taking all hope to play e5 away from Black.

13... ♖a6 14. h3?! This move shows how great White's position is, but it was maybe time to take more concrete options. [14. ♖f1! looks very strong. 14... e5 15. ♖xc4 Black should be careful not to lose on the spot here.]

14... e5 And somehow Black is back in the game.

15. d5! A good move. [It was the wrong moment to get greedy and go for the exchange: 15. dxe5 15... ♖xe5 16. ♖c5 White is winning the exchange but he is letting out the black pieces. 16... ♖xf3+ 17. ♖xf3 ♖xh3 18. ♖xf8 ♖xf8 It might be that White is still a little better, but the position is very unclear.]

15... cxd5 Things are now getting very sharp.

16. exd5 e4 Black is looking for counterplay and although his pieces are not too well placed, Black is a pawn up.

17. ♖g5 ♖e5 This move leads to big sufferings. [I think a better practical chance lay in active play: 17... ♖e5 18. ♖b5 (18. ♖xe4 18... ♖xa4 And the position is very complex.) 18... ♖d3 Black should not care about the rook on a6. 19. ♖c7 ♖e5

20. ♖xa6 ♖xd5 White is probably better here, but from a practical point of view I think the game would have been quite open.]

18. ♖xc4 ♖xc4 19. ♖xc4 We can see how badly Black is developed and this cannot lead to anything good.

19... ♖xb2 Romain probably panicked a little bit, as this move cannot be a good one. [It was the last chance for Black to develop a piece: 19... ♖f6 20. ♖ac1 With a big advantage for White, but Black can still fight.]

20. ♖ab1 Solid and strong.

20... ♖c3 21. ♖xc3 ♖xc3 22. ♖xe4 White has won the pawn back and he still has the initiative.

22... ♖b4

23. ♖f1! Transferring the bishop to a great square on b5.

23... ♖a8 [It was maybe more tenacious to play 23... ♖f6 24. ♖xf6+ (Of course not 24. ♖xa6 24... ♖xe4 followed by Nc3.) 24... ♖xf6 25. ♖h6 And Black is losing an exchange: 25... ♖d8 26. ♖g5 ♖g7 Black doesn't have many chances to hold this endgame.]

24. ♖b5 What a domination by the white pieces! The threat is now Bxd7 Bxd7 and Nf6.

24...f5 It certainly is not great to make a move like f5, but what else to do...

25.♘g5 ♕d6 Trying to somehow block White's d-pawn.

26.♞e6 ♖f7

27.♞d8 White is going for a forced win of the b7 pawn. [27.♕d4 also looks very promising.]

27...♖e7 28.♕g5 Chasing the rook from the 7th rank.

28...♖e4 29.♞xb7 White is now a pawn up.

29...♕xb7 30.♕xd7 ♖b4 Black's moves are almost forced.

31.♕e6+ Protecting the d5 pawn before winning the b-file.

31...♙f8

32.♕d2 The b-file belongs to White.

32...♖xb1 33.♖xb1 ♕c8 Romain is fighting like a tiger, but the position is lost.

34.♕xc8 And White is winning the second pawn on a5.

34...♖xc8 35.♕xa5 ♖c4 Black finally gets the privilege to attack something as well, but it is too late.

36.♖a1! The last important technical move. Now all White needs to do is to bring his bishop to e3, after which even any rook endgames would be winning.

36...♕c5 37.♕d2 White follows his plan.

37...♙e7 38.a5 And the a-pawn is running.

38...♖d4 39.♕g5+ ♙d6 40.a6 ♙xd5 A very nice game by White. Black was not very careful in the opening and quickly got into trouble, after which he never really had any recovery chances. **1-0**

(3) Ushenina, A.(2499) - Cmilyte, V.(2511) [D81]

FIDE WGP Dilijan(9), 2013.06.26

[Balogh Csaba]

The women's World Champion Anna Ushenina was slightly out of form in this event. Normally she has a very strong preparation, but in this game she lost in a miniature. She was heading for a very complicated line against the Gruenfeld, but did not realize the "small" difference in the move order made by her opponent. Still the game itself is very nice from Black's point of view and a good example of how we should not handle the openings.

1.d4 ♘f6 2.c4 g6 3.♘c3 d5

4.♞b3 Quite a recent idea from White. The plan itself with Qb3 is one of the main lines, but with the inclusion of 4.Nf3 Bg7 moves. White would like to get some advantage by keeping the knight on g1 for a while. The whole idea is to force Black to give up the center by taking on c4, and then White could occupy it by playing e4.

4...dxc4 5.♞xc4 ♕e6!? Black also tries to benefit from the fact that the knight is still on g1, as the d4 pawn is unprotected and the queen has limited squares to leave.

[5...♕g7 is the main line. 6.e4 O-O And here instead of transposing to the main lines with 7.Nf3, White has a very interesting option: 7.♕e2 Theory is just about to develop here, but it seems like White has something to look for. Anyway, this is the point of the 4.Qb3 line.]

6.♞b5+ ♕d7 7.♞d3 There was only one high-level game before with this move and Ushenina clearly tried to follow the ideas of that game.

[7.♞b3 is an interesting alternative for White. The Carlsen-Ivanchuk game back in 2009 was very exciting, which continued with typical Gruenfeld ideas: 7...c5 8.dxc5 ♕g7 9.e4 ♘c6 10.♘f3 ♞a5 11.♕c4 O-O 12.O-O ♞xc5 Black equalized the opening part and after a long struggle they made a draw; Taking the poisoned pawn is not recommended: 7.♞xb7 7...♘c6! Black's counterplay is coming very fast. 8.e3 ♞b8 9.♞a6 ♘b4

10.♞e2 The only square to control c2, but White must suffer for his undeveloped pieces anyway. 10...c5! A very logical move in order to open the position. 11.dxc5 ♞a5 With more than enough compensation.

For instance the most natural move 12.♘f3 loses on the spot after 12...♙f5! 13.♘d4 ♘d3+ 14.♙d1

14...♙g4!-+ and White collapses.]

7...c5! In the spirit of the opening! Black has to undermine the center.

8.d5 [8.dxc5 is met by 8...♘a6! The queen is clearly misplaced on d3 as the knight is going to c5 with tempo. White cannot hold his extra pawn for long. 9.♙e3 ♙a5 10.♙c4 ♙c8 Black is more than fine.]

8...♘a6 This is the tricky start of the move order by Black... [8...♙g7 9.e4 O-O was played in So Wesley-Vachier Lagrave. (9...♘a6 transposes to the game.) 10.e5 ♘g4 11.f4 All these

moves were played instantly by Wesley So, clearly showing a huge preparation. Otherwise it is very risky to advance the pawns so aggressively in the opening part of the game, without having the support of the pieces. It might backfire, as it happened in our game. 11...♘a6 12.♙d1 Leaving from the Nb4 threat and this is what Ushenina forgot... White threatens to win the g4 knight by pushing e6. 12...♘h6 13.♘f3 ♘f5 14.♙c4

I remember that So was still in his preparation at this point but Black, as a great expert of the Gruenfeld, found an excellent pawn sacrifice: 14...b5! (14...♘c7 is met by 15.a4! Preventing b5 and Black is standing passively.) 15.♙xb5 The only way! (15.♘xb5?? 15...♙xb5 16.♙xb5 ♙a5+) 15...♙xb5 16.♘xb5 And here Black had some options to get compensation for the pawn: 16...♘b4 (Probably the best was 16...♙b6 17.♘c3 ♙fd8 18.O-O ♘c7 Followed by Qb7. Black wins the pawn back and solves his problems.) 17.♘c3 ♘d4 18.O-O ♙c8 (Here Black should have played the logical 18...f6!? undermining the strong center and activating the Gruenfeld bishop.) 19.a3 ♘xd5 20.♘xd4 cxd4 21.♙xd4 ♘xc3 22.bxc3 ♙xd4+ 23.cxd4 White ended up with an extra pawn, although after a terrible blunder at the end he lost the game. Anyway, a very interesting line, which has taken Ushenina's attention. Both sides might search for improvements in such positions and this part of the theory is completely unexplored.]

9.e4 ♘g7

10.e5?? This seems to be the decisive mistake, right at move 10. A bit premature from the World Champion, but they also have bad days... [10.♔d1! should have been played and after 10...O-O 11.e5 ♘g4 12.f4 ♘h6 we transpose to the other game. Both players probably had some ideas here, but they did not reach this position.]

10...♘g4 11.f4

Here comes the difference between having the knight on a6 instead of castling. Black gets a decisive advantage after..

11...♘b4! 12.♔d1 ♘f5! —+ A clear sign that something went wrong, since White cannot prevent Nc2.

13.♔a4+ [13.♘b5+ 13...♔f8 14.♘a4 prevents Nc2, but allows 14...♘d3+! —+ followed by Ngf2.]

13...♔f8 Castling is not important, when we have such a huge threat as Nc2.

14.h3 ♘c2+ 15.♔e2

15...a6!! Depriving White even from the smallest chance of a counterplay. Black creates a new threat of trapping the queen with b5! [15...♘h6 16.g4 was White's last desperate hope to at least complicate matter a little bit.]

16.♔c4 [16.hxg4 is refuted by 16...b5 17.♔b3 c4—+ or Nd4 wins the queen.]

16...b5! Black happily sacrifices his c5 pawn in order to open the c-file. Against such a weak king as the one on e2, we should not be materialistic.

17.♔xc5 ♖c8 18.♔a7 There was no other place for the queen.

18...♘xa1 19.hxg4 ♘xg4+ 20.♔f2 Black is a complete exchange up and he continues attacking.

20...b4 21.♘ce2 Otherwise the bishop c1 is lost, but this move further destroys the cooperation between the pieces.

21...♔xd5 22.♔xa6 Naturally all moves are winning now. Cmilyte decided to activate the last piece, the h8 rook.

22...h5 23.♘f3 ♕h6 Freeing the g7 square for the king to rescue the rook.

24.♕e3 ♘c2 25.♕a7 ♔g7 26.♖g3 ♜ca8 White decided to finish her suffering. A good example to show that in sharp positions small nuances matter a lot. **0-1**

(4) Mamedyarov, Shakhriyar(2753) - Bacrot, Etienne(2725) [D53]

Geneva Masters KO 2013(1.3), 2013.06.29

[Arkadij Naiditsch]

We are in the semi-finals of this knock-out tournament. The first rapid game was won by Mamedyarov with the black pieces, but then Bacrot won the second game in a great style. So we are now facing the first blitz game. Sometimes, even on the highest level, games can be very painful and this is what will happen now...

1.d4 ♘f6 2.c4 e6 3.♘c3 d5 4.♕g5 ♕e7 We are in the main Queen's Gambit.

5.♘f3 h6

6.♕xf6 [6.♕h4 is the other main line.]

6...♕xf6 7.♖c2 Mamedyarov is choosing a very tricky and sharp line, which is a great practical choice for such a blitz game.

7...0-0?! doesn't seem to be the main move. [The main continuation is 7...dxc4 8.e3 c5! Black doesn't waste any time and doesn't even give White a moment to castle queenside. 9.dxc5 ♖a5 10.♕xc4 ♖xc5 11.♘e4 ♖a5+ 12.♔e2 ♕e7 With an equal position. This was already played by Topalov and Carlsen.]

8.0-0-0 dxc4

9.e4! White has enough time to play e4 now as the pawn on d4 is not hanging.

9...♘c6 Black tries to react quickly, but the position is already quite difficult.

10.e5! Once again Mamedyarov chooses the best move. The black bishop on c8 is a dead piece and a lot of moves are needed to get the bishop out of there. In the meantime, White is going to create a very dangerous attack on the kingside.

10...♙g5+ 11.♖b1 ♘b4 Black is trying to get the d5 square under control.

12.♙e4 ♙d7 13.♙xc4 At the latest by now we can clearly see that things have gone very wrong for Black.

13...♙c6 Black has to try this move, as after 13...c6 White's attack on the kingside would be deadly.

14.d5! Perfect play by White! Letting the black knight get to d5 would of course be a mistake.

14...exd5 15.♘xd5 ♘xd5?! This move makes things too easy for White. [15...♖e8! would have kept Black in the game, although with a worse position.]

16.♙xd5 ♙xd5 17.♖xd5 ♙c8 18.h4 [18.♘xg5 18...hxg5 19.h4 was also giving White a huge advantage.]

18...c6? The "last blunder" of the game. After this there is no more hope for Black. [18...♙e7 19.♖hd1±]

19.♘xg5! The game is over.

19...hxf5 20.hxf5! The threat of mating on h7 is deadly.

20...f5 21.♔h4 White wants to play g6 next.

21...♔e6

22.♖d7 And of course after 22...Qxd7 23.g6 is just winning. A very nice game by White, but of course Black made things a bit too easy... **1-0**

Endgame section

(15) Predojevic, Borki(2616)-Carlsen, Magnus(2864)

Rapid Match(3), 2013.06.29

[CE Team]

We are in the mini rapid match of 4 games between Carlsen and Predojevic. The match ended 2,5-1,5 in favour of the World Number 1. The only decisive game happened in round 3. As we can see, White is defending a slightly unpleasant endgame and Magnus shows us once again how strong he is in endgames where he is a little bit better. We can only watch and learn! :)

35.e4 h5! A strong positional move. Before starting the action in the center, Black is bringing his pawn to h4, which could make a difference in many endgames. The pawn on g2 is a potential weakness, so by putting a pawn on h4, Black is fixing it as a future target.

36.a3 h4 37.♖e3 White keeps on passing. It is very hard to find any active idea for White. [But maybe White should still have tried something more active like 37.b4 37...axb4 38.axb4 ♖c4 39.♔b3 ♖d4 40.♖de2 With the idea of playing b5 next and maybe at some moment Ra2. Black is of course better, but maybe from a practical point of view, Black would not have had such easy play as in the game.]

37...♔e6 38.♖e1 All black pieces have taken perfect places and it is now time for the next step:

38...g6! Another good move by Carlsen. By playing f5, Black will not only gain control over the center, but the white pawn on g2 will also get into serious trouble.

39.♖e3 White is preparing the g3 move.

39...f5 40.exf5+ gxf5 41.g3 White is very passive, but still holding on. Black has several ideas. One of the ideas could be to play h3-Bg2 and then f4. But there is no reason to hurry with it. White cannot do much, to play gxh4 is clearly in Black's favour, so Black really has quite some time.

41...♔h1!? A very unpleasant move in rapid chess. On one hand Black wants to play Rc8-Rcg8 next and White doesn't

have many useful moves, which makes it very hard to play in rapid chess.

42. ♖e2 White wants to play Nf4 or Nd4 next.

42... ♖d5! Another very strong move by Black. If a pair of rooks was exchanged, f4 would become almost deadly.

43. ♖c2 [43. ♖xd5 43... ♗xd5 Followed by f4, with an almost winning position.; 43. ♖f4+? does of course not work because of 43... ♖xf4 44. ♖xd5 ♖f2+ -+]

43... ♖e4 The black rook is now getting to the second rank.

44. ♖c4 ♖d2+ 45. ♗c1 ♖a2 White's position looks almost hopeless. All black pieces are perfectly placed and this is what makes Magnus Carlsen the best player in the world. He knows where to put which pieces. It seems like Black didn't anything special, but out of better endgame, we got to an almost winning one in just 10 moves.

46.h3 White panics, but Predojevic probably had enough of slow play and suffering.

46... ♖xe2! The last small tactical blow. Black is getting too many pawns for the exchange, especially as the bishop on e4 is worth at least a rook.

47. ♖xe2 ♖xg3 Both the h3 and b3 pawns are now hanging.

There is no hope anymore.

48. ♖c5 ♖xh3 49. ♖xa5 ♖xb3 The black h-pawn is now very dangerous.

50. ♖a6+ ♗d5 51. ♖a5+ ♗d4 52. ♖a4+ ♗d3 53. ♖h2 By giving checks, White managed to capture the black h-pawn, but the black king is now very active and the black middle pawns will start to advance.

53...f4 54. ♖xh4 ♗e3 Threatening mate on b1.

55. ♖b4 ♖xb4 The most easy move. White cannot stop the f-pawn.

56. axb4 f3 57. ♖h1 What a great endgame technic! I especially liked the h5-h4 manoeuvre and of course 41... Bh1!?, a very strong practical move. **0-1**

(16) Mamedyarov, S.(2753)-Polgar, J.(2696)

Geneva rapid, 2013.06.28

[CE TEAM]

This position is a theoretical draw, but White has some practical chances. At this point Judit was already low on time, which made her task even more difficult.

56.e5 Sooner or later, White has to push this pawn. There is no other way to make progress. White does not want to take on f6, but he wants to transfer his king to f5, which forces Black to take on e5 and after fxe5 White creates a passed pawn.

56...fxe5 57.fxe5 ♖b4 Logical defence! Black cuts the king along the 4th rank and also keeps the g4 pawn under attack. [However it is even better to play 57...♖b1 preparing to check the white king from behind. We will examine this in detail in the 58th move.]

58.♔f3

58...♖c4 Giving the move to White, but he has a subtle way to make progress. [58...♖b1! was the best defence again. The only attempt for White is 59.♖a7+ ♔e6 60.♖xg7 ♔xe5]

This position is drawn, as White cannot win the h6 pawn with 61.♖g6 (61.♔g3 With the idea of hiding the king on h4 against the side checks, but Black has 61...♖g1+ 62.♔h2 ♖b1= And once again Black is ready to counterattack the g4 pawn with Kf4.) 61...♖b3+! 62.♔g2 ♔f4=]

59.♖g6! Suddenly it is not easy at all. Let's look at the reasons why.

59...♖a4? Judit continues waiting with the rook, but this is already the decisive mistake. [59...♔f8! is the right move, with the idea of leaving from the e6 check. White has nothing better than 60.e6 ♖c7 61.♔f4 ♖a7 This position is a draw as Black starts to give side checks.]

60.e6+! ♔g8 [60...♔f8 loses to 61.e7+! ♔xe7
62.♚xg7+ +- Followed by Rg6, which wins the h6 pawn, while
the white king has a shelter on h4 from the checks.]

61.g5!! This breakthrough wins the game. [61.e7? leads to
a draw now because of 61...♚a8 Black will win the e7 pawn.
62.♔f4 ♚e8 63.♚e6 ♔f7 64.♔f5 The pawn endgame is drawn,
despite the fact that White has the more active king. 64...♚xe7
65.♚xe7+ ♔xe7 66.♔g6 ♔f8 67.♔h7 ♔f7 68.♔h8 ♔f8=]

61...hxg5 62.h6 ♚a7 [An important detail is that after
62...♔h7 White wins with 63.hxg7!+- ♔g8 64.e7 ♚a8 65.♚d6!
followed by Rd8 and promoting the pawn.]

63.♔g4 White already threatens to trade the rooks, because
the pawn endgame is winning for him.

63...♔h8 [63...♔h7 64.♚xg7+ ♚xg7 65.hxg7 ♔xg7 66.♔xg5
White has the opposition! 66...♔g8 67.♔g6 ♔f8 68.♔f6 ♔e8
69.e7+-]

64.♚xg7 Black cannot trade the rooks, but then the end is
near.

64...♚a4+ 65.♔h5 The last dream could be to make a
stalemate, but Black cannot get rid of his g-pawn.

65...g4 [65...♚h4+ is met by 66.♔g6! ♚xh6+ 67.♔xh6 and
Black has a move.]

66.e7 ♚e4 67.♚f7 1-0

Clash of the Titans

(17) Najdorf, Miguel-Fine, Reuben[D27]

Wertheim Memorial(7), 1951

[Kamil Miton]

1.d4 d5 2.c4 dxc4 3.♘f3 ♘f6 4.e3 e6 5.♙xc4 c5 6.O-O a6

7.♙e2 [7.dxc5 ♙xc5 8.♙xd8+ ♔xd8 With a very well-known endgame, where one of White's plans is to transfer the knight to d3.; 7.♙b3 7...♘c6 (7...b5 8.a4 and after 8... b4, the knight can go to the weak c4 square.) 8.♙e2 cxd4 9.♖d1 ♙e7 (9...d3 10.♗xd3†) 10.exd4 O-O 11.♘c3 With a similar structure as in the game.; 7.e4!?

7...cxd4 The best way for Black is to play [7...b5 8.♙b3 ♙b7 9.a4 (9.♖d1 9...♘bd7 10.a4 And now even 10...c4 should give Black good play. 11.♙c2 ♙e7 12.e4 O-O∞) 9...♘bd7! Black doesn't give the c4 square. 10.axb5 axb5 11.♖xa8 ♙xa8 12.♙xb5 cxd4∞With pressure on the h1-a8 diagonal.]

8.exd4 ♙e7 9.a4 The idea of this move is to take space because Black will be not able to play b5-Bb7, but on the other hand the b4 square now becomes weak.

9...O-O 10.♘c3 ♘c6 11.♖d1

11...♘b4 A typical manoeuver. Black is fighting for the d5 square. This position can come from the Slav dxc4 line and now the main move for Black is [11...♘d5 12.♙b3 A tricky waiting move. (12.♙e4 12...♘f6 13.♙h4 ♘d5 And the white queen is continuously under pressure.) 12...♘cb4 13.♙e4+= This move works now. White transfers the queen to the kingside in order to create some pressure against the black king.]

12.♘e5 ♘bd5 [12...♙d7 With the idea to develop the bishop on c6.The plan b6-Bb7 can be bad because of some tactical threats on f7 and e6. 13.♙g5 (13.d5 13...exd5 14.♘xd5 ♘bxd5 15.♙xd5 ♘xd5 16.♖xd5 And now the tricky 16...♙g4 17.♙d3 ♙xd5 18.♙xd5 ♖fd8=) 13...♙c6 14.♘xc6 bxc6 15.a5 ♘fd5 16.♙xe7 ♙xe7 17.g3 Black seems to be solid but White has a small long-term advantage because of the weaknesses on c6 and a6.]

13.♖d3! A typical idea. The rook is being transferred to the kingside in order to support the attack.

13...♘b4 14.♖g3 ♙xd4 15.♙h6 ♘e8 16.♖d1 White has more than enough compensation for the pawn. All his pieces are very active and is very hard to defend this position for Black.

16...♔c5 The correct move. Black doesn't allow Ne4. [16...♔h4 17.♙e3+- XQh4; 16...♔b6 17.♘e4 ♔c7 18.♔h5 (18.♘g5→) 18...♘d5 19.♙xd5 exd5 20.♖c1 ♔xc1+ (20...♔b8 21.♙xg7 ♘xg7 22.♖xc8! A nice motif! Qh6 does not work immediately because of Qe5. 22...♔xc8 23.♔h6) 21.♙xc1 dxe4 And Black is still fighting.]

17.♙f4 White is preparing Ne4. Let's check some other possibilities: [17.♘d7 17...♙xd7 18.♖xd7 ♘c6 19.♙d3 (19.♖xb7 19...♘d4→) 19...♖d8 (19...♘e5 20.♖xe7 ♘xd3 21.♖xe8+-) 20.♖xb7 ♙h4 21.♔e4 ♖xd3 22.♔xd3 ♙xg3 23.♔xg3 White seems to be better thanks to his more active pieces.; 17.♔h5 17...♙f6 18.♖e1 ♘c6

19.♘d5 All of White's pieces are joining the attack. (19.♙d3

19...g6 (19...♘xe5 20.♙xh7+ +-) 20.♙xg6 hxg6 21.♙xf8 ♔xf8 22.♘xg6 fxg6 23.♔xg6+ ♘g7 (23...♙g7 24.♖f3 ♔e7 25.♘d5+-) 24.♖f3 ♘e7 25.♔xf6 ♔xf6 26.♖xf6+=) 19...♙xe5 (19...exd5 20.♙d3 g6 21.♘xg6 fxg6 22.♖xg6+ ♙g7 23.♖xe8+-) 20.♙xg7 (20.♖xe5 20...g6 21.♙xf8 ♔xf8 22.♘b6 ♖b8 23.♖eg5 ♔b4→ The white pieces lost coordination and the rooks on the g-file are now badly placed, which is why Black gets some counterplay.) 20...♙xg7 21.♘f6+ ♘xf6 22.♔xc5 h6∞ Usually three pieces are better than a queen, but in this case White has the initiative.]

17...♘c6 A logical move. Black is looking for some exchanges. [17...♘f6 18.♘e4 ♘xe4 19.♔xe4→ The black king is very weak.]

18.♙d3 A logical move, as the bishop is much better placed on this diagonal. White could also have played the very strong [18.♘e4 18...♔a5 19.♔h5 ♘xe5 20.♙xe5 f6 21.♙d3! ♔xe5 (21...f5 22.♘g5±) And now the very nice

22.♔xh7+!! ♔xh7 23.♘xf6+ ♔h6 24.♖g6#]

18...♘xe5 [18...f5 19.♙c4 The f5 move has weakened the position (Xe5;Xe6)]

19.♙xe5 g6 20.b4!? The idea of this sacrifice is to join the knight to the attack after Ne4. [20.♙c2 20...♙f6 21.♙f4 ♙g7 22.♘e4 ♔c6 Followed by Nf6 and Black has more or less

solved his main problems.]

20...♖xb4 21.♘e4 ♘g7? [21...♙d7! Black simply develops the pieces. This position is risky for both sides. 22.♖h5 With the idea Qxh7! (22.♖b1 22...♖c8±; 22.♖h3 22...f6 23.♙c3 ♖xa4 24.♖xh7 ♖xh7 25.♘c5 ♙xc5 26.♖h5+ ♖g8 27.♙xg6 ♖xd1+ 28.♖xd1 ♘g7 29.♖xd7 ♖ad8 30.♖a4 b5∞; 22.♙c3 22...♖xa4 23.♖d2 ♖d8) 22...♘g7 23.♖h6 ♘f5 And Black escapes from all tactical threats.]

22.♘f6+ ♙xf6 23.♙xf6 White has a huge initiative on the dark squares, but the position is still unclear.

23...♖f4 [23...e5 An interesting and logical move. Black gets rid of the e5 pawn in order to activate his pieces. 24.♖xe5 ♖e8 25.♖g5 ♘e6!? With the idea to play Qf4 next.]

24.♖b2 ♘h5 25.♙g5 ♖c7?! Black tries to keep the queen close to the king, but an interesting option was to win the pawn and escape with tempo after [25...♖xa4!? 26.♖a1 ♖d7 27.♙h6 f6 (27...♖d8 28.♙e2+–) 28.♙xf8 ♘xg3 29.fxg3! e5 (29...♖xf8 30.♖xf6+ ♖g8 31.♖f1 ♖e8 And now White has the fantastic 32.♙xg6!! hxg6 33.♖f4+–) 30.♖a3 ♖d4+ 31.♖h1 ♙f5 32.♙xf5 gxh5 33.♙c5±]

26.♙h6 e5 27.♖c1 White has a decisive attack.

27...♖e7 [27...♖b8 doesn't help because of 28.♖g5 ♖e8

29.♖xh5! gxh5 30.♖b6 ♙e6 31.♖e3+–]

28.♙xf8 ♖xf8 29.♖e3 ♘f4 30.♙f1 ♙f5 [30...f6 31.♖ec3+– Followed by Rc7.]

31.♖xe5 And White is simply winning.

31...♖g5 32.g3 ♘e6 33.♖e3 ♖g8 34.♖xb7 ♖d8 35.♙xa6 ♘d4 36.♙c4 ♙d7 37.♖d1 1-0

Editorial Preface

The Dutch National Championship, which was a round robin with 8 players, came to an end. To everyone's surprise, the first place was shared by Spoelman and Reiderman, with a very good result of 5,5/7. The favorites Sokolov, L'Ami and Smeets did not really find their usual shape.

The pairings for the World Cup are ready. Almost all of the top players are in the game for the crown, even Kramnik! This amazingly exciting event is going to begin the 10th of August.

The main event of the week is clearly the FIDE Grand Prix in Beijing. After an amazing start with 3/3, Karjakin somehow dropped his attention and lost 2 games in a row, both of them being quite unnecessary losses. It is not a big surprise that Mamedyarov continues presenting himself in great shape and is leading with 5/7. Shared first with him is Grischuk, who is playing every game in a very creative style and showing us great fighting chess. So far the tournament turns out to be a disaster for Kamsky and Gelfand, who can be found at the end of the cross table. There are still 4 rounds to go, so we can expect a very exciting finish!

As usual, we wish you a lot of chess fun!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Morozevich, Alexander(2736)

- Gelfand, Boris(2773) [D97]

FIDE GP Beijing(4.6), 2013.07.07

[Arkadij Naiditsch]

Gelfand has been in a really great shape lately, as a couple of weeks ago he celebrated his victory at the Tal Memorial. At the Grand Prix things are running everything other than good for him. After a solid opening, Black blunders a nice tactical blow and ends up with a running king.

1.d4 ♘f6 2.c4 g6 Gelfand was playing the Gruenfeld during his WCC match against Anand and continues with what is probably the most popular opening at the moment.

3.♘c3 d5 4.♘f3 [4.cxd5 4...♘xd5 5.e4 ♘xc3 6.bxc3 is be the very main line.]

4...♙g7

5.♙b3 is also a modern move and the beginning of a long theoretical line.

5...dxc4 6.♙xc4 O-O 7.e4 ♘a6 This is of course all still theory. As usual in Gruenfeld, White is trying to keep his center and Black is trying to create an active play against it.

8.♙e2 c5 A move that just belongs to Gruenfeld!

9.d5 e6 Following the plan to attack the center.

10.♙g5 A very rare move. [10.O-O 10...exd5 11.exd5 ♖e8 is the main line here.]

10...exd5 [The idea of the move is getting revealed after: 10...h6 It seems like White has to give up his black bishop, which is usually not a great choice, but in this position it works. 11.♙xf6 ♙xf6 12.O-O-O! Quite unexpected but strong! White has nice play.]

11.♘xd5 ♙e6 12.♖d1 [After 12.O-O-O 12...♙xd5 13.♖xd5 ♙b6 Black seems to be OK.]

12...♙a5+ 13.♖d2 [13.♙d2 13...♙xd5 14.exd5 ♙b6 also doesn't seem to give White any advantage.]

13...♙xd5

14.exd5 ♖e8! A very good move. Black wants to play Ne4 next.

15.♙xf6 So White is forced to give up his "nice bishop".

15...♙xf6 16.O-O ♖ad8 Let us take a new look at the position. White has a strong d-pawn and the black knight on a6 is very badly placed, but all other black pieces are nicely in the game and the opposite colored bishops make the probability of a draw quite high. White's only chance to reach more than a draw is clearly to combine the strength of the d-pawn with an attack on the black king.

17.d6 White doesn't waste any time. [17.♔f4 17...♙g7 doesn't lead anywhere.]

17...♘b4! A good move. Black has to get his knight into the game as fast as possible.

18.♚f4 ♙g7 How to start an attack now for White?!

19.h4! A very nice move. White needs to weaken the black pawn structure as much as he can.

19...h5 [Another option was to play 19...♘d5 20.♚xd5 ♚xe2 but now White is in time with the main idea 21.h5 and the threat of playing h6 next is very unpleasant. Black's king position is quite shaky.]

20.♙c4 ♘c6 Black just needs one more move to play Nd4 and be perfectly fine.

21.♙xf7! A very nice blow, maybe the move is not winning,

but it is a great practical decision.

21...♚f8?? Clearly a miscalculation by Black. [The only way for Black to go on was 21...♙xf7 To take a full piece is usually not a bad decision :) 22.d7 ♚f8 Protecting against Ng5. 23.♘g5+ ♙g8 And we are in a very sharp and complication position. White has moves like 24.Qe4 or 24. Ne6 and both lead to unclear play.]

22.♙xg6! White's bishop just destroys the black defence lines.

22...♙e5 [The bishop was already untouchable here: 22...♙xg6 23.♚d5 With a mating attack.]

23.♚g5 ♙f4 Black is winning a full rook, but White already has 3 pawns and a strong attack on the black king.

24.♚xh5 ♙xd2 25.♚h7+ ♙f6

26.♙h5! This move is not difficult to find, but it is very strong! White wants to mate in one move after Qg6 and Black just has no decent defence against it!

26...♙e6 27.♚g6+ ♙d5 It is now clear that Black's position is just lost.

28.♘xd2 The most simple move. White had a few more winning ideas, but 28.Nxd2 is another very practical decision.

28...♔xd2 Black has no better move.

29.♖d1 And the Queen is lost.

29...♔d4 30.♖xd4+ cxd4

31.b4!? It's funny how Morozevich is handling winning positions. Some other player would probably just play 31.Bf3 and win the game, but White keeps on playing very creatively.

31...♖xd6 32.♔g7 A double attack on f8 and b7.

32...♖f6 33.♔xb7 ♔c4 34.b5 A very nice game by Morozevich, but of course if Gelfand had been in better shape and played 21...Kxf7, the outcome of this battle would have been very hard to guess! **1-0**

(2) Karjakin, S.(2776)

- Grischuk, A.(2780) [B80]

Grand Prix, Beijing, 2013.07.07

[Balogh Csaba]

Karjakin had a dream start in this tournament as he won the first three games. The question was to know who could be the first one to steal at least half a point from him. Grischuk has bravely gone for a very sharp line of the Najdorf variation...

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 a6 The starting position of the Sicilian Najdorf, where White has to decide which system to play.

6.♗e3 ♘g4!? This very interesting move was the favorite of Kasparov at that time. It might lead to very sharp lines after Bg5, or White can return to c1 with his bishop and choose another option. Karjakin decided for the latter one...

7.♗c1 ♘f6 8.f3 Usually the players who like to play 6.Be3 keep the 6.f3 system as an alternative to avoid the complications of the Ng4 line. However it also has some drawbacks, since he limits his opening possibilities.

8...e6 Here is another difference, as in the 6.Be3 e6 variation the 7.g4 move is considered to be a very aggressive attempt.

[For instance after 8...e5 White is forced to play the main line with Nb3 followed by a transposition with Be3, but he is deprived of the option of playing the dangerous 7.Nf3.]

9.♘e3 b5 We are ahead of a typical Sicilian fight, where White is going to attack on the kingside with g4-g5, while Black tries his chances on the queenside, where the king is going to castle. Naturally, there is huge theory behind all this variations.

10.♔d2 ♘d7

11.g4 This is considered to be the exact move order in order to avoid the line [11.O-O-O 11...♘b7 12.g4 ♘b6 where Kasparov has scored some nice victories.]

11...h6 [The difference is that if Black plays 11...♘b6 White has the strong 12.a4! ♘c4 (12...bxa4 13.♘xa4 ♘xa4 14.♔xa4 ♘b7 15.♘b3 followed by Na5, which was proved to be advantageous for White in some games.)

13.♘xc4 bxc4 White can choose between 14.g5 (or 14.a5 with the idea of Na4-b6, which is rather a positional handling of the position.) 14...♘d7 15.f4 followed by f5 with an attack.]

12.O-O-O

12...b4! This is the rather modern handling of the opening. [The huge previous main line continued with 12...♘b7 13.h4 b4 14.♘a4 ♔a5 15.b3 ♘c5 16.a3! ♘xa4 17.axb4 ♔c7 18.bxa4 White has won a pawn, but his king became exposed. 18...d5 19.e5 ♘d7 20.f4 ♘b6 There are still hundreds of games in database on this position, but after White has found the idea of

21.♔h3! ♘xa4 22.♘f2! ♔c8 23.♘e1! White succeeded to organize a successful defence, while his attack with f5 is going to be crushing. This line is more or less closed nowadays.]

13.♘ce2 ♔c7 Black prepares for the typical Sicilian break with d5, which would have been slightly premature if played immediately... [13...d5 is met by 14.exd5 ♘xd5 15.♘f4! ♘b7

16.♗c4 and the different kind of sacrifices on e6 are too dangerous for Black.]

14.h4! White's attack is rolling fast. He only needs one preparation move with Bh3 (in order to close the h-file for g5 hxg5 hxg5) and he is already there to finish the game. Black is forced to act now.

14...d5! 15.♗f4 White is following the new wave. [15.♗h3 was played by Karjakin in 2011, but he lost after an impressive preparation 15...♖b6! 16.b3 dxe4 17.g5 ♘d5 18.fxe4 ♘xe3 19.♔xe3 hxg5 20.hxg5

20...g6! This is a useful way to stop the g6 idea, which would critically weaken the e6 square and also to fianchetto the bishop. 21.♖b1 ♗g7 22.♗f1 ♔e5! 23.♗f2 ♗a7! and Black had the advantage. Karjakin-Cheparinov, Porto Carras 2011.]

15...e5 16.♗h2! With his previous bishop moves, White has prepared to push g5 by closing the h-file and also weakened Black's structure in front of his king. We are still just at the beginning of theory and of course the deep computer analyses are extremely important in such lines.

16...dxe4 17.g5! There is no way back, the position is getting sharper after each move.

17...hxg5 18.hxg5

18...♖xh2! Black is winning some material by unpinning his queen, but his king remains in the center and his position remains really scary...

19.♖xh2 exd4 White cannot take on f6, since the rook is hanging on h2.

20.♖h8 [20.♖h4!? is an alternative for White, which was tested only in a few games. Black has not proved equality so far, but we can be sure that both Karjakin and Grischuk had something in their preparations. The text move seems to be more frightening at first sight.]

20...♘d5 21.♔xd4 ♗b7! [Any mistakes are crucial in such positions. Black once played 21...♘b6 but quickly lost after 22.fxe4 ♘f4 23.♘xf4 ♔xf4+ 24.♖b1 Black is helpless against the threats of Qd8, Qxb6 and Qxg7. 24...♗g4

25. ♖xb6! ♕xd1 26. ♖c6+ ♔e7 27. ♖xa8 ♖xf1 28. ♖xf8+ White soon mated the naked king. [Eliseev-Sethuraman, Moscow 2013.]

22.fxe4 [Grischuk already had a recent experience on this position, where his opponent forced him to draw after 22. ♖xe4+ 22... ♖e7 23. ♖xb4 ♖g6! 24. ♖g8 ♖e7! 25. ♖h8 ♖g6 26. ♖g8 ♖e7 27. ♖h8 With an unusual repetition of moves.]

22... ♖5b6! Black is finally ready to put his king into safety by castling queenside. [Once again after 22... ♖e7 White has two promising continuations: 23. ♖xd7+ (23. ♖h3 also looks good.) 23... ♖xd7 24. ♖xf8+ ♖xf8 25. ♖xd7 ♖xe4 26. ♖d4± White ends up with an extra pawn after taking on b4.]

23. ♖xb4 0-0-0 24. ♖b3

24... ♖xe4! This is finally the novelty of our game. [A clear improvement on the previous 24... ♖c5 25. ♖xd8+ ♖xd8 26. ♖xf7 ♖xg5+ 27. ♖b1 ♖e5 28. ♖h3 when White maintained his strong attacking chances.]

25. ♖c3 White suddenly creates a triple attack by covering the c2 square. The a6 and f7 pawns and the Be4 are hanging. Black seems to be in trouble, but an important detail saves him! [Now after 25. ♖h3 Black would probably play 25... ♖e7 26. ♖xd8+ ♖xd8 27. ♖b1 ♖e8 Materially White is still slightly

ahead, but Black soon overtakes the initiative with his active pieces. The knight is coming to c5 or the g5 pawn can be taken.]

25... ♖f4+! 26. ♖b1

26... ♖c7!! A subtle move, which creates the decisive threat of Nc5. The point is that White does not take on d8 with check anymore and therefore Black can simply take on b3.

27. ♖xa6 [27. ♖xe4? loses to 27... ♖c5!—+]

27... ♖c5! 28. ♖b5+! [White cannot play for a win anymore, because after 28. ♖b5 28... ♖xd1+ 29. ♖xd1 ♖d2—+ he is the one who gets mated.]

28... ♖c6 29. ♖a7+! And the following repetition is inevitable for both sides.

29... ♖c7 30. ♖b5+ ♖c6 31. ♖a7+ ♖c7 A draw was agreed here. An important theoretical game, which was probably analysed by both players until the end. This is where chess is on the highest level nowadays. **1/2-1/2**

(3) Mamedyarov, S.(2761)
- Wang Hao(2752) [D10]

Grand Prix, Beijing, 2013.07.07

[Balogh Csaba]

A very interesting and tough game that was not without mistakes, but in such complicated positions they are unavoidable.

1.d4 d5 2.c4 c6 3.♘c3 dxc4

A sideline of the Slav defence, which often leads to unusual positions, just like in our game. I am personally a big fan of this line and have used it several times as Black and recently it also appears on the highest level from time to time.

4.e3 [4.e4 is the other main line.]

4...b5 Black tries to save his pawn as long as he can, which is the point of this variation.

5.a4 b4 6.♘e4 ♔d5 Black still keeps his pawn. 6...Ba6 was bad in view of Nc5.

7.♘g3 ♘f6

8.♕e2! The critical move! The g2 pawn is naturally taboo because Bf3 would trap the queen and White prepares for a sacrifice in the center. The theory of this line has started to develop not so long ago.

8...e6 A new direction. [I have played more games with 8...♕a6 9.e4 ♘xe4 10.♕f3 f5 which is very similar to the game.]

9.e4! [9.♘f3 would transpose to the old lines, when White used to play 8.Nf3, but these are just completely fine for Black after 9...♕a6]

9...♘xe4 10.♕f3 f5

11.♔e2 [The first difference between 8...Ba6 and the text move is that after 11.♘e2 with the idea of Nf4, Black can play 11...♕d6! 12.♘f4 ♕xf4 13.♕xf4 O-O 14.O-O c3 With very

complex positions, which require further analysis. Black has a material advantage, but White's pieces are better.]

11...c3 [To grab another pawn with 11...♔xd4 is a bit too greedy as after 12.♘xe4 fxe4 13.♙xe4 the White pieces are developing with tempo after Nf3, with more than enough compensation.]

12.♘xe4 fxe4 13.♙xe4 ♖b3

It is quite sure that both players are still following their preparations. Black creates the unpleasant threat of Ba6, against which White makes a strong prophylactic move.

14.♙d3! [White could have forced a draw with 14.♙c2 14...♔d5 (14...cxb2 15.♙xb2 ♔xb2? does not work because of the small trick of 16.♙g6+! hxg6 17.♔xb2) 15.♙e4 ♖b3; 14.♘f3 would allow 14...♙a6! 15.♙xc6+ ♘xc6 16.♔xa6 ♔d5 17.O-O ♙d6 Black completes the development and after 0-0 he obtains a good position.]

14...♙a6 Wang Hao continues playing the most direct moves. [14...cxb2 15.♙xb2 ♔d5 is suggested by the machine at first sight, but it has a nice refutation: 16.♘f3 ♙d6 17.♙c4! ♖f5 The only place to protect e6, but it moves into...

18.d5! cxd5 19.♙xg7 ♔g8 Black cannot cover the d5 pawn, somehow the a8 rook always gets into trouble in this line. (19...dxc4 20.♙xh8 Black does not have enough compensation, because of his king, which will never find shelter on the board.) 20.♘d4! ♔g6 (20...♔e4 21.♔xe4 dxe4 22.♘xe6 ♙xe6 23.♙xe6 ♔xg7 24.♙d5! The rook is trapped.) 21.♙xd5 ♔xg7 22.♔c1! ♙d7 23.♘xe6 With a huge attack.]

15.♙xa6 ♘xa6 16.♔xa6! White has to accept the challenge. [Normal developing moves like 16.♘f3 allow a comfortable game for Black. 16...cxb2 17.♙xb2 ♘c7 18.O-O ♔d5 followed by Bd6 and 0-0.]

16...cxb2 17.♔xc6+ ♙f7 18.♙xb2 ♔xb2

19.♔c1! An important move to prevent Qc3, after which the endgame would be slightly better for Black. [19.♔d1 19...♔c3+ 20.♔xc3 bxc3=+]

19...b3 A logical move. Black would like to play Bb4+ and also advance his dangerous passed pawn. White must play precisely in order to avoid any problems.

20. ♖b7+! Mamedyarov realizes that it is not easy to deal with the forthcoming innocent-looking checks. [20. ♘e2? loses to 20... ♙b4+ 21. ♖f1 ♖c8 22. ♗b7+ ♙e7—+ Black succeeded in consolidating his pieces and the b-pawn is going to be too strong.]

20... ♙e7 21. ♗f3+! The king must suddenly march forward, since on the back rank White could take on a8 with check, while Bf6 runs into Rc7.

21... ♖g6 22. ♘e2! Creating the threat of Nf4!

22... ♖hf8 [22... ♙b4+ 23. ♖f1 ♖f8 is met by (23... ♙d6 24. h4! Artificially activating the h1 rook. White has a strong attack.) 24. ♘f4+! ♖xf4 25. ♗xf4 We will check this position in the 23.Nf4 line of the game.]

23. ♗e4+ [It would have been even stronger to play 23. ♘f4+! 23... ♖xf4 24. ♗xf4 It seems like Black cannot create enough counterplay. 24... ♙b4+ Otherwise White castles. 25. ♖f1 h4-h5 is a threat now. 25... ♖f8 26. ♗g4+ ♖f6 (26... ♖h6 is refuted by 27. ♗xe6+ ♖f6 28. ♗e3+ checking back the queen to protect the rook and the f2 pawn. White is winning.)

27. ♖c7! And it looks like the game is over. 27... ♗b1+ 28. ♖e2

♗b2+ 29. ♖f3 Black doesn't have any more checks.]

23... ♖f7 24. O-O Mamedyarov finally solved the problems of his king, but this gave Black enough time to solve the coordination problems between his rooks.

24... ♖ac8 25. d5 [25. ♖b1 allows 25... ♗c2!]

25... ♗f6! The only move! All other moves would have lost big material.

26. ♗xh7 White tries to keep the king in the center and prevents Kg8. [Objectively it was better to play 26. ♖b1 Black cannot avoid the loss of the b-pawn, although he remains with good compensation. 26... ♖g8 27. ♖xb3 exd5 28. ♗xd5+ ♖h8 The bishop is stronger than the knight and all of Black's pieces are active. It is going to be very difficult to convert the extra pawn.]

26... ♖xc1 27. ♘xc1 ♖b8 [27... b2 28. ♘d3 ♖b8 leads to the game by transposition.]

28. ♘d3 b2 29. ♖b1 At this point, it looks as though Wang Hao got too ambitious about his position due to the b2 pawn and he makes some wrong decisions.

29... ♖b3 [Black could simply have played 29... exd5 30. ♗h5+ ♖g8 31. ♗xd5+ ♖h8 followed by Ba3. White can hardly be better, since all his pieces must be focused on stopping the b2

pawn. 32. ♖a2 does not work because of 32... ♖c3! 33. ♗xb2

33... ♖c2! Pinning all the pieces, followed by Bf7 winning the knight.]

30.g3 Opening the back rank!

30... ♗d6? This is a blunder! It is a very strange decision, or maybe Black just missed that he cannot take back the e6 pawn... [30... exd5 was logical and good. 31. ♗f4 ♗a3 With mutual chances.]

31.dxe6+ ♗e7 [31... ♖xe6 32. ♖xb2+- Black cannot give up the b2 pawn.; 31... ♗xe6 32. ♖g8+ ♖f7 33. ♖e1+ ♗f6 34. ♖d8+ wins.]

32. ♖e4 ♖c3 33. ♖f5! Forcing the black queen back into passivity with the threat of Qf7-d7 mate.

33... ♖f6 34. ♖d5! [The b2 pawn could not be taken immediately after 34. ♖xf6+ 34... gxf6 35. ♗xb2 because of 35... ♗e5!]

34... ♖c3 In mutual time trouble, both players make a mistake. It is understandable that the previous tough position has taken all of their time and the tournament is played without increments... [34... ♖xe6 loses to 35. ♖d4! And the b2 pawn falls.]

35. ♖h5? [35. ♖f3! was the winning move. 35... ♖f6 (35... ♗xe6

36. ♖xb2! is the point 36... ♖xb2 (36... ♖xd3 37. ♖xb3! And the queen is protected.) 37. ♗f4+ wins the queen.) 36. ♖c6! ♖xd3 37. ♖d7+ ♗f8

38.e7+! White wins the d3 rook and the game. 38... ♖xe7 39. ♖f5+-]

35...♔d8? [Black could have come back to the game with 35...♕xe6! 36.♖e2+ ♖f6 37.♘xb2 (37.♗xb2 is now met by 37...♗xd3! which is why the queen should stay on f3, like in the 35.Qf3 line.) 37...♙e5 and Black holds.]

36.♘xb2! Successfully eliminating the strong pawn!

36...♗xb2 37.♗d1 [Black resigned in view of the following lines: 37.♗d1 37...♗d2 (37...♕c7 38.♖f7+ ♖c6 39.♖d7+-) 38.♖g5+- wins the rook.] **1-0**

(4) Karjakin, Sergey(2776)
- Wang, Hao(2752) [B09]

FIDE GP Beijing(2.1), 2013.07.05

[Arkadij Naiditsch]

A short, but very intense game with a lot of tactical ideas! White finally took over, but in order to do that Karjakin had to show very precise calculation combined with great defence ideas! Excited? Then it is time for us to go into the details :)

1.e4 d6 Wang Hao is a very emotional player. He had a lot of good and a lot of bad results, but kept his rating over 2750, which shows his big talent for the game. With his first move he shows that he is ready for a big fight.

2.d4 ♘f6 3.♘c3 g6 4.f4 Karjakin likes this very aggressive system with 4.f4 a lot.

4...♙g7

5.♙d3!? A very rare move, not to say novelty. The usual continuation is 5.Nf3.

5...e5?! Black uses the fact that the white knight is not on f3 and forces an action in the center, but to me this move looks wrongly placed. [5...c5 6.e5 looks interesting, but this was probably Karjakin's main idea.]

6.dxe5 This is a typical and almost forced reaction.

6...dxe5 7.♘f3 And White is completing his development. [7.fxe5 7...♘g4 doesn't seem to give White any advantage.]

7...exf4 Black is forced to take.

8.♙xf4 Now the question is whether Black is in time to create a blockade on e5 or not! It is clear that White is better developed and will search for some action.

8...O-O 9.♖d2! A very strong move! White does not play the simple O-O but is going for the queenside castle, which is clearly better! To bring the rook to d1 is a useful move in any case and in the future White is going to go for the Black king!

9...♘c6 10.O-O-O ♙e6 [In case Black tried to immediately capture the e5 square by playing 10...♘g4 11.♘d5 ♘e5 White would have the strong reaction 12.♙b5! and Black has big problems with his pieces.]

11.h3?! Why such a slow play!? It is clear White tries to avoid Ng4, but were there really no better options? I think 11. Ng5 or maybe a nice prophylactical move like 11.Kb1 could have been at least worth thinking of.

11...♘d7 Black tries to get the e5 square under control.

12.♙g5 A very tricky move. What to play now?!

12...♙f6?! Now White will be doing much better. [12...f6 It is not great to close the bishop on g7, but what to do...

13.♙f4 ♘e5 With a better position for White, but things are still unclear.]

13.h4! A very important and strong move. White is not only protecting the bishop on g5, but also wants to play h5 next.

13...h5 14.♖f4 Creating extra pressure on f6 and basically forcing Black to take on g5.

14...♙xg5 15.hxg5! Once again Karjakin chooses the right plan. Now the opening of the h-file would simply be deadly to Black.

15...♖e7 Black tries to consolidate.

16.♙b5! White again shows very strong play. Black is simply missing time for a few moves like Nb6-Rad8 to be perfectly fine.

16...♘b6 17.♙xc6 bxc6 18.♘e5 With easy but very powerful moves Karjakin is putting his opponent into deep trouble. White doesn't just attack the c6 pawn, he also wants to play g4 next.

18...♘c4!? A nice resource by Black.

19.♘xc4 [19.♘xc6 19...♖c5 20.♘d5 is probably better for White as well, but the text move looks more convincing.]

19...♙xc4 20.g4 And White finally starts his crush on the h-file!

20...♖b8 Black is starting his counterplay and maybe it is indeed the best practical chance.

21.gxh5 ♖b4 The b2 pawn is hanging.

22.♖d4 This move is probably good enough to win the game, but White had a more beautiful way of forcing things towards the "right" result. [22.♘a4! What a nice way to defend the b2 pawn. 22...♖xa4 Black has no choice. 23.hxg6 fxg6 (23...♖xa2 leads to a forced mate after 24.♖h8+! ♔xh8 25.♖h4+ ♔g8 26.♖h7#) 24.♖e5 And Black cannot avoid being mated.]

22...♖xb2+ 23.♔d2 ♖fd8 The game now goes on.

24.♖f6! Once again White finds the best move! It is important to protect the rook on d4 and at the same time cover the d-file.

24...♖xd4+ 25.♖xd4 White created a double threat, to play Rb1 or to take the bishop on c4 and hxg6 also looks promising. Black cannot save all of his pieces.

25...♖b6 is losing but it is clearly the best chance.

26.♖xc4 Things are very forced.

26...♖d8+ 27.♔c1 ♖d4 28.♖e2 White has only moves, but these only moves are enough to win!

28...♖c5 Double attack on c3 and on g5.

29.♘b1! The key move! Defending from Qa3 and Qxg5 and saving the knight... 3 in 1 :)

29...♖xg5+ 30.♘d2 Black is just a piece down with no counterplay, so Wang Hao saw no reason to go on. A nice crushing win by Karjakin! **1-0**

Endgame section

(15) Kamsky, G.(2763)-Topalov, V.(2767)

Grand Prix, Beijing, 2013.07.06

[CE Team]

Black seems to be in big trouble, as he will inevitably lose the b-pawn, which means an extra pawn for White and his pieces are dominating. However Topalov will find a fantastic defence to save the game by transposing into a rook endgame.

43...♖e8! 44.♗xb6 ♜e1+! Activating the rook, which forces White to trade the bishops.

45.♔g2 [45.♔h2 45...♙e4 46.♗xd6? allows perpetual check: (46.♙xe4 leads to the game.) 46...♗h1+ 47.♔g3 ♗g1+= That is why Black had to play 44...Re1 first.]

45...♙e4+! Black had to try this move, even if it is losing. With the bishops on board, the b-pawn promotes automatically.

46.♙xe4 ♜xe4

47.♔f3 [47.♗xd6? This move is of course never an option for White, his hope lies in the b-pawn. 47...♗xb4 Even with a healthy pawn structure the 3 vs 2 would be a theoretical draw, but of course White has zero chance here.]

47...d5! As we will see, the d-pawn plays a very important role in the defence.

48.♗b7! Kamsky also plays well, he cuts the king along the 7th rank, otherwise the escape of the king with Kg7 would have seriously eased the defence.

48...h5 49.b5 White is ready to leave with his rook, so the next move is forced!

49...♗b4! 50.♔e3 ♔g8 Black has no other moves left than to pass with the king on the back rank, but how could White make some progress?!

51.b6 ♔f8 52.♔d3

52...d4! A necessary move to prevent Kc3! [52...♔g8? loses to 53.♔c3 ♗c4+ (53...♗b5 54.♔d4 And the king penetrates after Ke5.) 54.♔b3 And the b-pawn will promote soon... 54...♗c6 55.♔b4 d4 56.♔b5+-]

53.♔e4 ♔e8 Black continues playing Kf8-e8 again. The problem of the progress is that whenever White goes ahead with his king, Black advances his d-pawn and gets adequate counterplay.

54.♔d3 [54.f5 allows 54...gxf5+ 55.♔xf5 d3; White cannot play on mate with 54.♔e5 54...d3 55.♔e6 because of 55...♖e4+! and d2 next move.]

54...♔f8 55.♖b8+ [55.f3 makes no difference: 55...♔e8 56.♖b8+ ♔f7 57.b7 ♔g7 Transposing to the game.]

55...♔g7 56.b7

56...♔h7! After the pawn has reached the 7th rank, Black can only wait with his king on the g7 and h7 squares. [56...♔f7? does not work anymore, because of the following well-known trick: 57.♖h8! ♖xb7 58.♖h7+--]

57.♔e4 ♔g7 58.f3 ♔h7 White realized that there is no way to progress, he therefore tries his last chance.

59.♔d5 But it allows the d-pawn to run!

59...d3! 60.♔c6 d2 61.♖d8

61...♖c4+! An important intermediate check to send the king to a wrong square. [61...♖b2 immediately loses to 62.♖xd2!+-]

62.♔b6 [62.♔b5 62...♖c2! And White cannot promote his b-pawn now because of Rb2.]

62...♖b4+ 63.♔a6 ♖a4+ 64.♔b5 [64.♔b6 64...♖b4+ 65.♔c7 ♖c4+ 66.♔b8 ♖c2= is the same as the game.]

64...♖a2! Topalov defends accurately! He was checking the king until it got to the b-file and now he can protect his d-pawn.

65.♖d7+ ♔h6 66.♖d4 Unfortunately, White cannot avoid the checks with Rb4 because the d-pawn is too far advanced.

66...♖b2+ 67.♔c6 ♖c2+ 68.♔d6 ♖b2 69.f5 A last attempt, but after the loss of the b-pawn, the outcome is no longer a question. [69.♔c7 69...♖c2+ 70.♔b8 ♖b2 Nothing to do for White.]

69...♖xb7 70.♖xd2 All moves lead to a draw now, but Topalov finds a way to exchange everything.

70...g5 71.♔c6 ♖f7 72.♖d6+ ♔h7 73.hxg5 ♖xf5 74.♖h6+ ♔g7 75.♖xh5 ♖xf3 A great defence and another proof that even in seemingly hopeless positions, one can always try to look for salvation in rook endgames. **1/2-1/2**

(16) Wang, Yue(2705)-Kamsky, Gata(2763)

FIDE GP Beijing(4.4), 2013.07.07

[CE Team]

57.g5 Is this a winning endgame or a draw? Very hard to say, at first sight it probably looks as if Black should be in time to hold the game, but who knows! Wang Yue showed quite a good technique and very interesting endgame maneuvers.

57...♔d7 To run to the pawns is clearly not a bad idea! [The simple 57...c4 58.bxc4 ♖xc4 59.♖xa5 would just lead to a winning endgame for White.]

58.♔f5! The only move! [58.♔f7 would lead to a draw after 58...♖f3+ 59.♔g7 ♔c6 60.♖b8 ♔c7! as White cannot keep the b3 pawn.]

58...♔c6 59.♖b8 a4 Black is searching for counter chances. [Now the simple 59...♔c7 is not leading to a draw anymore: 60.♖a8 ♔b7 (60...♖xb3 61.g6 ♖g3 looks like a draw, but White has...

62.g7! The king is badly placed on c7. 62...♖xg7 63.♖a7+ With a winning position for White.) 61.♖xa5 ♔b6 62.♖a4 ♖xb3 63.g6 And it looks as if White is winning here too. Once again we can see how important White's king position on f5 is.]

60.bxa4 ♖f3+ The white king is now changing his direction and moving forward.

61.♔e6 ♖e3+ 62.♔f6 ♖f3+ 63.♔g7 c4 Black is counting on the strength of the c-pawn.

64.g6 ♔c5 Black's idea is to get White's a-pawn and to be fast enough to hold the g-pawn as well, but this is just too much of wishful thinking.

65.a5 The a-pawn is running as well.

65...♔d4 66.♖c8 ♖a3 67.♔f6 ♖f3+ [Black cannot take the a-pawn because of 67...♖xa5 68.g7 and it is over.]

68.♔e6 ♖g3 69.♔f5 Now the white king is moving backwards again.

69...♖f3+ 70.♔g4 White is now ready to play g7.

70...♖f1

71.a6! White just has too many pawns :)

71...♖a1 72.♔f3 Black cannot hold all of White's pawns and the checks are his last hope.

72...♖a3+ 73.♔e2 ♜e3+ [73...♖a2+ 74.♔d1 And the white king will run to b1.]

74.♔d2 ♜e7 The rook is now on the 7th rank and seems to hold both of White's pawns... But it only seems so...

75.♜d8+ ♔c5 76.♜g8! The most easy way to win the game. White will push the pawn to g7 and move the rook away with check to queen the pawn.

76...♔b4 77.g7 ♔a5 78.♔c3 ♜c7 79.a7 ♜xa7

80.♔xc4 It is now time to resign.

80...♔a6 [A nice mate would happen after 80...♔a4 81.♜c8! A small but nice tactic. 81...♜xg7 82.♜a8+]

81.♔d5 The game is over, White will play Kc6 next. A very nice endgame technique by Wang Yue, who had a rating of 2740 not so long ago. **1-0**

Clash of the Titans

(17) Alekhine, Alexander-Lasker, Emanuel[D67]

Zuerich, 1934

[Kamil Miton]

1.d4 d5 2.c4 e6 3.♘c3 ♘f6 4.♗f3 ♕e7 5.♙g5 ♘d7 6.e3 O-O 7.♖c1 White is waiting with developing the bishop. The alternative of that idea is the move [7.♔c2]

7...c6 8.♙d3 dxc4 [8...h6]

9.♙xc4 ♘d5 Black gave the center but his idea is to reduce the material and push c5 or e5 next.

10.♙xe7 ♖xe7

11.♗e4 Because he has more space, White tries to keep more pieces on the board, but a better move was [11.O-O and now after 11...♗xc3 12.♖xc3 we back to a very well-known line with one difference: the black pawn is placed on h7 and not on h6, which has a huge meaning for evaluation, especially when Black plays the plan with b6. White's set-up Qc2-Bd3 will be created with tempo.]

11...♗5f6 Black is still looking for exchanges. Let's check other options: [11...♖b4+ 12.♖d2 ♖xd2+ 13.♗exd2 With a more pleasant endgame for White.; 11...e5 A logical move. Black immediately fights for the center. 12.O-O (12.dxe5

12...♗xe5 13.♗xe5 ♖xe5 14.♙xd5 cxd5 15.♗c3 If White manages to create a blockade on the d4 square, he will be better. 15...♙e6 16.♖d2 ♖fd8

17.♗e2 d4! Black is on time. 18.♗xd4 ♙xa2=) 12...exd4 13.♖xd4 ♗7f6 (13...♗7b6 14.♙b3 And now Black has no good square for his bishop. 14...♙g4 15.♗e5 ♙f5 16.♗c5+=) 14.♗g3 ♖e8 15.e4! White has the initiative.]

12.♗g3 e5 13.O-O exd4 [13...e4 14.♗d2 ♗b6 15.♙b3 (15.♙e2 This seems to be a good square because now Black again has no good way to develop the bishop. White's plan should be to push b4-b5 with the idea to create a weak pawn on c6 or to weaken the d5 square.) 15...♙e6 16.♙xe6 ♖xe6 17.♖b3∞]

14.♗f5 [14.♗xd4 14...♗e5 15.♙b3 g6 16.h3 c5±]

14...♖d8 15.♗3xd4 ♗e5 16.♙b3

16...♙xf5 Lasker gave the bishop because maybe he was

afraid that sometimes it is not easy to develop it. It was also possible to play [16...g6 17.♖h6+ (17.♖g3 17...♙e7 With idea to play c5 or just simply Bd7-Rd8.) 17...♙g7 18.f4 ♖eg4 (18...♖ed7 19.♖xf7+-) 19.♖xg4 ♙xg4 20.♙e1 ♙e7 Black is completely fine because White is not able to create any attack as the e4-e5 plan is impossible.]

17.♖xf5

17...♙b6? A very bad move which allows White to activate his pieces and get a strong initiative! We can just say that it is a decisive mistake in the game.

Black should for example have played: [

a) 17...g6 18.♖d6 (18.♖d4 18...♙e7 19.♙c2 doesn't allow c5, but after 19...♖ac8 20.♙c5 ♙xc5 21.♖xc5 ♖fe8 Black's position is very solid.) 18...♙e7 19.♙d4 (19.f4 19...♖eg4+-) 19...♖fd8 is less accurate. (19...♖ad8 20.♖fd1 b6 (20...♖e8 21.♖f5+-) 21.f4 ♖xd6 22.♙xd6 ♖f3+ A nice trick which gives Black perpetual check: 23.gxf3 ♙xe3+ 24.♙g2 ♙e2+=) 20.♖d1 ♖e8 Black gets rid of the unpleasant knight from d6. 21.f4 ♖xd6 22.fxe5 ♖f5 And White has to be careful to not get a worse position.;

b) 17...♙xd1 18.♖fxd1 ♖fd8 19.♖d6 ♖d7

20.h3 A typical move, preparing for the pawns to advance: f4-e4-e5. 20...♖d8 doesn't work because of 21.♖xb7±]

18.♙d6! ♖ed7 Black wants to avoid the Nh6 idea, but this does not help. [18...♖g6 19.♖h6+±; 18...♖ae8!? An interesting idea. 19.♖e7+ ♙h8 20.♙xe5 ♖g8

It seems like Black solved his problems, but now comes the fantastic 21.♖xc6! ♖xe5 22.♖xe5 and black is not able to avoid both Nxf7 and Nd7. 22...♖f6 23.♖xf7+ ♙g8 24.♖d1 And now the g6-Kg7 plan doesn't work because of Rd6.]

19.♖fd1 ♖ad8 An interesting option with the idea of kicking out the white bishop from his active diagonal and trying to get the queen back into the game over the b2 square. [19...a5!? 20.♙f4 (20.♙g3 20...g6 21.♙g5 a4+-) 20...a4 21.♖xa4 ♙xb2

22. ♖b3 ♕e5 23. ♖xe5 ♘xe5 24. ♘d6 ♖b8 25. f4 Followed by e4-e5. White is much better thanks to his strong knight on d6, but Black is still fighting.]

20. ♖g3 g6 21. ♖g5 ♘h8 Black could have tried two better options to defend his position: [21... ♘e4 22. ♖e7 gxf5 23. ♖xd7 ♖xd7 24. ♖xd7 ♘c5 (24... ♖b5 25. h4 With a big advantage for White.) 25. ♖xf5 ♘xb3 White is winning by force now, as the black king is very weak. 26. ♖g5+ ♔h8 27. ♖f6+ ♔g8

28. ♖c4! ♖d8 29. ♖g4+ ♔f8 30. g3 It is not easy for a human to see this move from the beginning of the calculation. 30... ♖d1+ (30... ♘c5 31. ♖g7+—) 31. ♔g2 ♖b5 32. ♖g7+ ♔e7 33. ♖e4+ ♔d6 34. ♖f6+ ♔c7 35. ♖xf7+ ♔b6 36. ♖xb3 White exchanges the queens and ends up in a winning endgame.; 21... ♖b5 22. ♘h6+ (Less accurate is 22. ♘e7+ 22... ♔g7 23. ♖xb5 cxb5 24. ♖c7 a5 and the white pieces lost coordination.) 22... ♔g7 23. ♖xb5 cxb5

24. ♘xf7! ♖xf7 25. ♖xf7 ♔xf7 26. ♖c7±]

22. ♘d6 ♔g7 23. e4 Alekhine doesn't stop improving the position.

23... ♘g8 [23... ♖e8 24. ♘xe8+ There was probably no need for this move as the knight is so strong on d6. 24... ♖xe8 25. ♖e1 ♘xe4 26. ♖e3±]

24. ♖d3 f6 25. ♘f5+ ♔h8 And now comes the very nice hit

26. ♖xg6! 1-0

Editorial Preface

It has all been about the FIDE Grand Prix during the last week. After many exciting games and 11 fighting rounds, Mamedyarov claimed 1st place with 7/11. Grischuk finished 2nd with 6.5/11 and the 3rd place was shared by Leko and Topalov with 6/11.

The first 2 overall places are getting into the next World Championship circle. At the moment, Topalov is leading with 410 Points and got himself one of the desirable places. Mamedyarov is in 2nd position with 390, but he can still be caught by Grischuk and Caruana, who both need to be the sole winners of the last Grand Prix in order to qualify.

Another major chess event was the Universiade in Kazan. Surprisingly, quite a few Top GMs are actually studying and participated in the event. The first place was shared by 9 players in the men section, but Wesley So clinched the tournament on tiebreak:

1. GM So Wesley PHI 2708 - 6,5
2. GM Andriasian Zaven ARM 2620 - 6,5
3. GM Li Chao B CHN 2686 - 6,5
4. GM Ma Qun CHN 2584 - 6,5
5. GM Matlakov Maxim RUS 2665 - 6,5
6. GM Zhou Jianchao CHN 2572 - 6,5
7. GM Alekseev Evgeny RUS 2714 - 6,5
8. GM Tomczak Jacek POL 2564 - 6,5
9. GM Sjugirov Sanan RUS 2647 - 6,5

In the female section the Chinese girls totally dominate the event:

- 1st Zhao Xue with 7.5/9,
- 2nd-3rd Ju Wenjun and Tan Zhongyi, both with 7/9.

We can already look forward to the next week, as the traditional Biel Festival and the "Dortmunder Schachtage" with Kramnik, Caruana, Wang Hao begin...

As usual, we wish you a lot of fun with CEWN Nr73.

4 best games of the past week

(1) Wang Hao(2752)

- Giri, A.(2734) [C41]

Beijing CHN(7), 2013.07.11

[Balogh Csaba]

An elegant miniature by Wang Hao, who punished Giri for his dubious opening.

1.d4 d6 2.e4 f6 3.f3 c3 e5 4.f3 bd7 The Philidor defence is considered to be a solid system, but it can rarely be seen on the highest level, because White can claim a small but stable advantage in many lines.

5.fxc4 exd4?! It is however a dubious decision by Black to give up the tension in the center at such an early stage of the game. [5...e7 is definitely the right move and also the main line.]

6.fxd4 e7 This line was recently played by the Serbian GM Ivánisevic, but the following great sacrifice seems to cause serious problems for Black.

7.fxf7+!! fxf7 8.g5+ e8 The only move to stay in the game. [8...g8 immediately loses to 9.fxc4! d5 10.fxd5+—

White wins because of the Qf7 threat.; 8...♔g6 9.f4+- also wins for White as Black is helpless against f5.]

9.♘e6 It seems to be over, but Black is able to save his queen.

9...c5! This might be Giri's opening trick, but he probably underestimated that after White simply removes the queen and takes on g7, he gets more than enough compensation for the sacrificed bishop and also a position which is basically impossible to play in a practical game as Black...

10.♔d1 ♕b6 11.♘g7+ We can find similar sacrifices in the Sicilian defence, when White plays a system with Bc4. If Black is careless there, White sometimes sacrifices with Bxe6 fxe6 Nxe6 attacking the d8 queen, followed by Nxg7 and Nf5 with an enormous attack. Our game is very similar to those examples.

11...♕f7 [Black cannot seek shelter with 11...♔d8? 12.♘d5! ♘xd5

13.♘e6+! ♔e8 14.♕h5#! This would have been an even shorter game.]

12.♘f5 ♕f8?! Wasting another tempo. [12...♘e5 was the last chance, although White also gets a strong attack here after correct play: 13.♘xe7! (13.♘d5 is very tempting at first sight, but Black holds after 13...♘xd5 14.♕xd5+ ♕e6 15.♘h6+! ♔f6 16.♕g5+! ♕xg5 17.♕xe6 It seems to be over now, but Black survives after

17...♕b4+! 18.♔d1 (18.♔f1 18...♕c4+ Exchanging the queens solves the biggest problems.; 18.♔e2 18...♕xe4+) 18...♕d4+ 19.♔c1 ♕f6! After this only move surprisingly Black is alive! 13...♔xe7 14.♕g5! is the right move and was probably also what Giri was afraid of. White threatens to play Nd5 and after 14...♕e6 15.f4 ♘f7 16.♕xf6+ ♔xf6

17.♕d2! White simply wants to castle kingside and he has

numerous decisive threats, such as e5 followed by Ne4, f5 or just to bring another attacker with g4-g5. Objectively White is clearly better, but in a practical game Black's position is just hopeless in such situations. We are unable to defend like computers... 17...♔xb2 is simply met by 18.O-O Grabbing the poisoned pawn on b2 just creates further problems for Black.]

13.O-O White finishes the development and intends to lead the attack with Bf5 and f4-e5.

13...d5 A desperate attempt by Black to free the position... [13...♘e5 runs into 14.♙g5! ♘xf5 15.♙xf6+- and Black cannot take back on f6 because of Nd5, otherwise White either takes on h8 or on f5 and obtains a decisive material advantage.]

14.♘xd5 [14.exd5 was also good enough, but Wang Hao preferred to keep the fortress of his strong f5 knight.]

14...♘xd5 15.♔xd5+ White is already materially fine with his 3 pawns for the piece, but his attack continues rolling.

15...♔e8? [15...♔e6 was the better chance again. 16.♔d3! White obviously wants to keep the queens on the board against such a weak king. 16...♘f6 17.♔e1± (17.f3!? is also good with the same idea to transfer the bishop to the b2-h8 diagonal.)]

16.♙g5! Black's position is just hopeless now. White simply wants to bring his a1 rook and wipe Black off the board with e5-e6.

16...♔g6 [16...h6 17.♙h4 does not change anything.; 16...♔c6 17.♔d2 does not help Black either.]

17.♔ad1! The g5 bishop is indirectly protected so White can activate his rook.

17...♔g8 The last step for White is to finish the game with e5-e6. Black cannot parry this threat. He cannot move with the d7 knight because of Qd8 and if he doesn't most of his pieces will remain undeveloped. [17...♔xg5 18.♙d6+ ♘xd6 19.♔xg5+-; 17...♔g8 18.♔d2+-]

18.f4! a5 Black tries to bring his rook into defence through the 6th rank, but of course this is just too slow. [18...h6 is refuted by 19.e5! hxg5 (19...♔xf5 20.♔xg8 hxg5 21.fxg5+-) 20.e6+- and exd7 wins or if the knight moves Qd8 mates.]

19.e5! ♔xf5 [On 19...♔a6 White can choose between various wins, one of them is 20.e6 ♔xe6 21.♔fe1 ♔xe1+ 22.♔xe1+ and mate is coming soon.]

20.♔xg8 ♔a6 [Black could finally have traded the queens, but he is already materially down and the central pawns are just rolling further. 20...♔f7 21.♔xf7+ ♔xf7 22.♔de1! Protecting the e5 pawn in order to threaten playing e6 and f5. 22...♔a6 23.f5+- White is winning.]

21.♔fe1 Refreshing the e6 threat. **21...♔g6**

22.e6! [A last nice move! Black resigned in view of 22.e6 22...♖xg8 (22...♘f6 23.♚f7#) 23.exd7+ ♔f7 24.d8=♚+-
A great attacking game by Wang Hao. I doubt that anyone will repeat this line with the early exd4.] **1-0**

(2) Mamedyarov, S.(2761)
- Giri, A.(2734) [D90]

Beijing CHN(9), 2013.07.14
[Balogh Csaba]

Mamedyarov has been in excellent form in the last period and the following game once more shows his great skills in tactical chess.

1.d4 ♘f6 2.c4 g6 3.♘c3 d5 Giri goes for the Gruenfeld defence. **4.♘f3 ♙g7**

5.♚a4+ A surprise by Mamedyarov. This is considered to be a secondary line, only occasionally seen on the highest level. One of the main lines is 5.Qb3 and in comparison to it, White provokes Bd7 here...

5...♙d7 6.♚b3 dxc4 7.♚xc4 O-O

8.♙f4 Black has various setups here. It is hard to judge

which one is the best one because all strong players react differently. [8.e4 is the point of the 5.Qb3 system. After forcing Black to take on c4 by putting pressure on the d5 pawn, he is ready to occupy the center. However by the inclusion of the Qa4 Bd7 moves, Black has an extra option here, to play 8...b5! Immediately challenging the e4 pawn with a very sharp, typical Gruenfeld game.]

8...c6 [8...c6 was recently played by Aronian.; 8...e6 was Svidler's choice.; 8...b5!? 9.xb5 c5 is how Grischuk played.; 8...a6 was Topalov's reaction and the text move was played by Morozevich and Dominguez in recent games. This shows well what a wide choice both sides have in the Gruenfeld defence!]

9.e4 b5 As usual Black has to fight against the strong central pawns. White is well prepared against the different kind of e5 breaks, so Black has to do something on the queenside.

10.♖b3 Strong players preferred to play 10.Qd3, but Black's results were adequate there. Mamedyarov opens a new direction here.

10...c5!? In the spirit of the Gruenfeld, Black undermines the center. Other plans were possible too: [10...♗a5 attacking the e4 and threatening to play b4. 11.♗d2 (11.e5 11...♗e4 is fine for Black as he has the light squares.) 11...b4 12.♗a4 ♗xe4 13.♗xb4 ♖c7 With a complex position which is playable for both sides.; 10...e6 11.♖c2 ♗g4 is another strategy. Black first makes some damage in the pawnstructure 12.♗d1 ♗h5 13.♗e3 ♗xf3 14.gxf3 e6! and then tries to play around the f4 square with Qh4 or f5.]

11.dxc5 ♖a5 With the same ideas as in the 10...Qa5 line.

12.♗d2! White had to unpin his king and at the same time he creates some threats like Nd5 or Nxb5.

12...b4! There is no way back in the Gruenfeld, Black must play energetically in all of his moves, otherwise his position might collapse.

13.♗d5

13...♗c6! Another very strong move by Giri. He just defended the e7 and b4 pawns and now the white pawns are hanging on e4 and c5. [13...♗xe4 was just bad because of 14.♗xb4 ♖d8 15.♗d3± With a clear extra pawn for White.; 13...♗xd5 14.exd5 ♖xc5 is also bad in view of 15.♗xb4 ♖b6 16.♗c4± With an extra pawn again.]

14.♗d3! The most logical move. White protects the e4 pawn and develops his bishop in order to castle kingside. [After the wilfully protection of the pawns 14.♗xf6+ 14...♗xf6 15.♖c1 Black gets strong counterplay: 15...♗e6 16.♗c4 ♗xc4 17.♖xc4 ♖a6! With the threat of Na5, which forces White to retreat his rook, but then he will be unable to castle kingside.]

14...♗e6! Yet again a great move by Black! Further increasing the pressure. [14...♖xc5 would have restored the material balance, but leads to a worse position after 15.♖c1 ♖d6

16.♘f4! Forcing e5 to close the Gruenfeld bishop. 16...e5
17.♘e3 Followed by Bc5. White is better.]

15.♘g5!? [15.O-O was an interesting alternative. The game could have continued in a nice way: 15...♖fd8 16.♘c4 ♘xe4 Black seems to be more than fine, but White has a nice trick

17.♘xe7+! ♘xe7 18.♘xb4 (18.♘xe6? immediately does not work because of 18...♘xd2) 18...♘xc4! Otherwise White takes twice on e6 and the e4 knight is hanging in the end. 19.♖xc4 ♖a4! 20.♖xe4 ♘c6 It looks like this time it is Black who wins a piece and the game, but White once again has a nice trick: 21.♖ae1! (21.a3? 21...a5±) 21...♘xb4 22.a3 ♖ab8= And in the end, as it is usual after such sharp fights, the game ends with a draw.]

15...♖ad8? This is a terrible blunder, we can also call it decisive mistake. Sometimes in the Gruenfeld if just once we don't find the most powerful move, we end up in a losing position. [15...♘xd5! was the right move. 16.exd5 ♘e5 17.O-O (After 17.♘e3 17...♘xd3+ 18.♖xd3 h6 19.♘f3 ♖fd8 Black wins the pawn back and even gets an advantage.) 17...♘xd3 18.♖xd3 ♖xc5 And here again White needs to make some precise moves to equalize.]

16.♘xe6 fxe6 17.♘xb4 Things went completely wrong for Black. He is a pawn down and his pawn formation was also damaged.

17...♘d4 18.♖c4 White threatens with a discover attack after the jump of the b4 knight.

18...♘d7 Black tries to complicate the matters, but his counterplay is not justified... [18...♖c7 19.O-O ♘g4 is also nothing, White can neutralize all the threats with the simple 20.f4!+-]

19.♘c6! White takes further material.

19...♖xc5 20.♘xd8 ♘e5 Black sets a nice trap, but Mamedyarov of course does not fall into it. [20...♖xd8 21.O-O+- is just winning.]

21.♘xe6! Counterattacking the queen. Black can take many

pieces but a short look allows us to confirm that White ends up with decisive material advantage in all the lines. [21. ♖xc5? would have changed the outcome 21... ♜xd3+ 22. ♔d1 (22. ♔f1 22... ♜xf2+ 23. ♔g1

23... ♜e2# would have been a pretty finish.) 22... ♜xb2+ 23. ♔c1 ♜d3+ 24. ♔d1 ♜xf2+ Some knight tango. 25. ♔e1 ♜d3+ 26. ♔d1 ♜xc5 Black is winning with such active pieces.]

21... ♖d6 White had other wins as well, for instance 22. ♖a6, but Mamedyarov decided to finish the game in style. [21... ♖xc4 22. ♜xc4 ♜xc4 23. ♜xf8+-; 21... ♜xc4 22. ♜xc5+-; 21... ♜xd3+ 22. ♖xd3 ♜xe6 23. O-O+-]

22. ♜xd4+ White sacrifices his queen, but he gets too much material for it.

22... ♜xc4 23. ♜xc4+ ♔h8

24. ♜e6! White has rook, 2 minor pieces and 2 pawns for the queen and also dominating pieces. White is just completely winning.

24... ♖c8 25. ♜d5 ♜xb2 26. ♖b1 ♖c2 [26... ♜e5 27. ♜g5+-]

27. ♖xb2 ♖xb2 28. ♜c3+ ♔g8 [Black resigned in view of 28... ♔g8 29. ♜xb2 ♖b4+ 30. ♔f1 ♖xb2 31. g3 followed by Kg2 and an easy win with the big material advantage.] **1-0**

(3) Leko, P.(2737) - Kamsky, G.(2763) [B15]

FIDE GP Beijing(8), 2013.07.12
[Arkadij Naiditsch]

For Kamsky the FIDE Grand Prix in Beijing is just a nightmare. Gata is fighting in every game, but things are just not running well. In the current game, White quickly achieved a nice advantage, developed this advantage and then spoiled it into a draw. We can very often see this in Leko's games. He is playing very "good" chess, but so unpractical at some moments. Anyhow, we can learn a lot from the current game!

1.e4 c6 2.d4 d5 3.♘c3 g6 Clearly not the most popular move.

4.h3! I like this move a lot! The idea is simply to play Nf3 next and avoid Black's Bg4. In case of 4.Nf3, Bg4 would probably have been played.

4...dxe4 5.♘xe4 ♕g7 6.♘f3 We can see that the bishop on c8 has no good development place.

6...♘d7 A logical move in order to play Ngf6 next.

7.♕c4!? This move has of course been played many times, but it is still an important move. The bishop will have its best position on c4 and it also avoids Black's Be6 and another idea could be to play Ne5 and put pressure on the f7 pawn.

7...♘gf6 8.♘xf6+ ♘xf6 9.O-O O-O 10.♖e1 Another nice move. Black has no real ideas how to finish his development and White still has a lot of useful moves like for example c3.

10...b6 Black decides to develop his bishop to b7, which is a good idea in general, but White will now get very direct play.

11.♘e5 No time to waste.

11...♕b7 12.♕g5 Leko puts his pieces to perfect positions.

12...♘d5 13.♕h4 A typical "Leko" move. [A more direct and maybe stronger move was 13.♘g4 and it is not easy for Black to find how to defend the e7 pawn in a decent way.]

13...♖c8 Black is preparing the c5 move.

14.♖f3 And Leko of course doesn't give this chance to Black.

14...g5 A try to somehow get out of the very unpleasant pin Bh4-d8. [In case Black tried to play 14...c5 after 15.♖ad1 White would almost be winning.]

15.♕g3 e6 Black fixed the center by playing e6, but the g5 pawn is a huge weakness.

16.♕b3! This time Leko does everything right. White wants to play c4 next, which can be very unpleasant for Black.

16...♖f6 17.♖h5 White of course doesn't want to exchange the queens.

17...♖f4 18.♗xf4 ♜xf4 We now have an important moment. It is clear that White is better, but how much better is the question... White needs to take active measures against the Black king. If Black manages to consolidate, White will lose almost all his advantage.

19.c3?! Mr.Leko, why so slow?! [19.g3! should have been the right reaction, giving Black no chances to escape into an endgame. 19...♜xd4 20.♖ad1 ♜c5 I guess it feels like White should be crushing here and it fact White does with a very nice move: 21.c3! With the deadly threat of Bc2!]

19...♜h4! Exactly! Black escapes into an endgame where White's chances to win are getting clearly smaller.

20.♜xh4 gxh4 21.♖e4 White is going to win the h4 pawn.

21...c5 22.♖xh4 cxd4 23.cxd4 ♗xe5?! Why such a rush to give the bishop away?! [23...♖fd8 was easier and after 24.♖e1 ♗d5 Black has very good chances to save the game.]

24.dxe5 ♖fd8 White cannot stop the black rook from entering the 2nd rank, but being a clear pawn up of course gives White an advantage.

25.♖e1?! White misses his chance. [It was too early for 25.♖d1 25...♖xd1+ 26.♗xd1 ♖c5 as Black wins the e5 pawn back.; However it the following move looks very strong: 25.♖a4! Making space for f4. 25...a5 26.♖d1 ♖xd1+ 27.♗xd1 ♖c5 28.f4 With good winning chances for White.]

25...♖d2 26.♖f4 White wants to bring the rook to g3 via e3, but Black gets enough counterplay.

26...♖c5 27.♖e3 And now

27...♗d5! A very strong move! By getting rid of the bishop on b3, Black is not only defending against Rg3-Kf8 and Bxe6, but also putting White in danger of losing both pawns, b2 and a2.

28.♗xd5 ♖xd5 It seems that by not playing dynamically enough, White has lost all his advantage.

29.♖g3+ ♖f8 30.♖gf3 ♖d7 The b2 pawn is still hanging...

31.♖h4 ♖xb2 32.a3 [After 32.♖xh7 32...♖xa2 only Black could dream of winning.]

32...♖e2 Getting the e5 pawn in exchange for the h7 one.

33. ♖xh7 ♜xe5 34. ♖h8+ ♔g7 35. ♖b8 We can now clearly say that the position is just equal.

35... ♖e4 36. g4 ♜ed4 37. ♖a8 Both players are trying to get the draw as soon as possible... The game is over.

37... ♖d3 This move forces the draw.

38. ♖xd3 ♜xd3 39. ♖xa7 ♜xh3 The rest of the game does not need any comment.

40. ♔g2 ♜b3 41. a4 ♜a3 42. ♜a6 ♔g6 43. ♜xb6 ♜xa4 A nice defence by Black and we can see how important it is in chess to "finish" your opponent with dynamic play if you can, before he escapes. :) **1/2-1/2**

(4) Mamedyarov, S.(2761) - Topalov, V.(2767) [E32]

FIDE GP Beijing(7), 2013.07.11

[Arkadij Naiditsch]

Mamedyarov is in very good shape and everything is going perfectly for him at the moment. In the current game, White manages to achieve a slightly better position, but Black is very solid. With a nice tactical trick White then manages to finish the game much earlier than what was probably expected.

1.d4 ♘f6 2.c4 e6 3. ♘c3 ♙b4 4. ♚c2 The Nimzo with 4.Qc2, one of the most popular lines in the last 15 years. If you are interested in this opening, you should have a look at Kramnik's games with Black. Vladimir doesn't only manage to get an equal position, but he often is the one who is pushing with Black! And this not against lower rated guys, but against players like Carlsen !

4...O-O

5. ♘f3 [5.a3 5... ♙xc3+ 6. ♚xc3 d5 is the other main line, which is very popular nowadays.]

5...c5 The main move. [5...d5 is possible too.]

6.dxc5 ♘a6!? This is the idea behind 5...c5. Black quickly gets his b8 knight into the game.

7.g3 as well this move is one of the main in the position.

7...♖xc5 8.♗g2 We can see that White is better developed and Black has a small problem with the bishop on c8, but it is unclear whether that is enough to be better.

8...♖ce4 a logical move. Black is damaging the pawn structure of White.

9.0-0

9...♗xc3 [After 9...♖xc3 10.bxc3 ♗e7 11.♖d1 White would be doing a little bit better and it would be hard for Black to solve the problem of the c8 bishop in a nice way.]

10.bxc3 d5 Quite an interesting position from a strategic point of view. It is clear that only White can be better here, but on the other hand Black's position is very solid. The strong knight on e4 and the solid pawnstructure make things very difficult for White.

11.♗g5! A strong move! White kicks out the black knight from e4 and at the same time he makes the g2 bishop more active.

11...♖d6! Black is also reacting in the best way. The White pawn on c4 is now hanging and White is basically forced to take on d5, which activates the c8 bishop.

12.cxd5 exd5 13.♖d1 The d5 pawn is both weak and strong. The game is now getting pretty forced.

13...♗f5?! This move is clearly not the most precise one. [It was very important to play 13...h6 first. 14.♗f3 (14.♗h3 would lead a quite similar position as in the game, but the white queen is placed slightly worse on c2 than on b3.) 14...♗f5 15.♖b3 ♗e4 And Black should be doing fine.]

14.♖b3 h6 Black has probably underestimated White's next reply.

15.♗h3! Very strong play. White is going to f4 with his knight, from where he will attack the d5 pawn.

15...♗xh3 is almost forced.

16.♗xh3 ♖e8 Black doesn't waste any time as White wanted to continue with Bg2 and then the d5 pawn would have fallen.

17.♗g2 White doesn't have anything better.

17...♖xe2 18.♗xd5 As we can see, the position is pretty forced.

18...♖xd5 It was clearly not an option to give White the bishop pair.

19. ♔xd5

19... ♕f6 Black managed not to lose any material, but things are still pretty unclear.

20. ♘f4 Putting even more pressure on d6 and preventing Qxf2.

20... ♘e4? Black is miscalculating [20... ♘f5 21. ♕xb7 ♖ae8 would lose a pawn, but give Black some chances on the kingside. White is better, but Black probably has enough play to fight for a draw.]

21. ♕d3! Mamedyarov calculates perfectly.

21... ♘xc3 The only move.

22. ♖ac1 White wants to catch the black knight!

22... ♘xd1? This move makes things too easy for White. [The only chance to fight was to play 22... g5 23. ♖xc3 gxf4 24. ♕xe2 ♕xc3 25. ♕g4+ ♕g7 26. ♕xf4 and of course White is better, but Black is still in the game.]

23. ♕xe2 ♘c3 And White's idea is coming true.

24. ♕c4 The black knight simply has no move. **1-0**

Endgame section

(15) Wang, Hao(2752)-Gelfand, B.(2773)

FIDE GP Beijing(9), 2013.07.14

[CE Team]

This game is a great example on how easy it is to make a decisive mistake in queen endgames. From the start, we are facing a winning position for Black.

67. ♔h2 ♚g5? A very logical move, but not the best one. [Black could have won quite easily after 67... ♚d2+! 68. ♔g3

68...a2 And now if White would have started to give checks, the black king would slowly walk to e2 or f1, after which White would have no more checks left.]

68. ♚a7 ♚h4+ Black starts to take the white pawns, but the white king uses this moment to come closer to the Black's a-pawn. [It was still not too late for 68... ♚d2+ 69. ♔g3 a2 and Black is winning.]

69. ♔g2 ♚xg4+ The funny thing is that by taking the g4 pawn away, Black is not really doing himself a favour, as the white queen is getting more squares for checking.

70. ♔f2 ♚f4+ 71. ♔g1 White tries not to give away the e4 pawn with a check.

71... ♚g3+! A very good move! The white king is cut.

72. ♔f1 ♚f3+ 73. ♔e1 ♔f6? It is hard to understand this move...

[Black should have continued what he started: 73... ♚xe4+ 74. ♔d2 ♚d5+ 75. ♔c3 ♚e5+ 76. ♔c2 ♚b2+ 77. ♔d3 a2 And the black king will probably escape from the checks, but things are not so simple as White still has some chances to give perpetual check.]

74. ♔d2! White's only chance is to bring his king as close as possible to the free a-pawn.

74... ♔g5 75. ♚g1+! A very strong move! The black king cannot escape the checks that easily anymore.

75...♔xh5

76.♚h2+! And we can see that suddenly there is already maybe no escape from the white checks anymore.

76...♚g4 It is not pleasant to give up the h-pawn, but Black had no choice. [76...♚g6 77.♚g1+! And it seems that White would make a draw by checking.]

77.♚xh6 a2 78.♚g7+ ♔h3 79.♚h8+ ♔g2 80.♚g7+ White is checking the black king and the position seems to be a draw.

80...♚g3 Black tries his last chance.

81.♚b2?? What a blunder! [81.♚a1 followed by Kc1 or Kc2 was an easy draw.]

81...♔h1!! The only winning move! Now White doesn't have Qa1 anymore because of Qg1 and Black is suddenly winning.

82.♔c2 ♚g2+ 83.♔b3

83...♚xe4?? What a mistake! [83...♚g8+ was leading to an easy win: 84.♔c2 ♚c4+ 85.♔d2 ♚f1! And White's position is hopeless. 86.♚xa2 ♚g2+ 87.♔c3 ♚xa2—+ What a game! :)]
1/2-1/2

(16) Wang Yue(2705)-Wang Hao(2752)

Grand Prix, Beijing, 2013.07.10

[CE Team]

Despite the limited amount of pieces and the current material balance, White has excellent winning chances in a practical game, thanks to the doubled e-pawns and the knight's superiority over the poor bishop.

32. ♖c4 ♜g7 The bishop is doomed to passivity. [A push of the e-pawn would quickly lead to its loss after 32...e4 33.e3 followed by Nd2.]

33. ♘d6 White transfers his knight to e4. [It was probably even stronger to activate the rook first and misplace the black king a bit. 33. ♖a8+ 33... ♔h7 34. ♘d6 will be similar to the game.]

33... ♜c6 34. ♖a8+ ♜f8! Black could keep some coordination between his pieces, since in comparison to the 33.Ra8 line, the e5 pawn is not hanging.

35. ♘e4 ♜c4 36. ♘d2 White does not need to hurry with any plans, since Black can only wait with his pieces. [36.f3 was also possible, but Wang Yue did not decide yet, which changes he should make to the pawn structure.]

36... ♜d4 37. ♘f3 ♜d5 38. ♖a4 White was in some time trouble and in the following moves he just wants to reach move 40 and after getting the extra hour he will start to think about how to proceed.

38... ♜f7 39. ♜g2 ♜g7 40. ♘e1 ♜f6 The time trouble is over, let's now see how a great strategic player like Wang Yue converts his advantage.

41. ♜f3 White first just wants to get his knight back to e4.

41...♖d7 42.♘d3 h5 43.♗c5 ♜c7 44.♞e4 The first step is done. The second should be to activate the rook.

44...♔e7 45.♞a5 ♙g7 Black will never have anything better in this game than passing with the pieces.

46.♞a6 Creating the first threat of winning the pawn with Ng5.

46...♙f6

47.♞b6 White does not need to hurry. Now he created a small zugzwang. The pawns cannot move, the bishop neither because of Ng5, on Ra7 or Rd7 Nc5 decides, while after rook moves on the c-file Rb7 wins. So there is only one move left.

47...♔f7! 48.e3 I believe this is the right placement of the pawns to have everything protected.

48...♙e7 49.♞b5 ♙f6 50.♔g2 This move was just a kind of power demonstration, the right plan is to bring the king to the other side, as we saw in the 50...Ke7 line.

50...♞c6 Wang Hao decided to give up the 7th rank, but it actually just eases the task of his opponent.

[50...♔e7 51.♔f3 ♔f7

52.♔e2! White should try to trade off the rooks, because the knight versus bishop endgame is automatically winning after the regrouping of putting the king to e4 and the knight to c4, as the e5 pawn will fall. **52...♔e7 53.♔d3 ♔f7 54.♞c5 ♞d7+ 55.♔c4** Followed by the invasion of the king and the idea of trading the rooks on the 7th rank.]

51.♞b7+ ♙e7 52.♔f3! Black is in zugzwang now. Let's see what happens:

52...♞a6 [52...♔f8 53.♞b5 just wins the pawn as Bf6 is no longer possible.; On 52...♞c2 or other rook moves on the c-file 53.♘g5+ ♔f6 54.♞b6 wins the pawn.]

53.♘c5! ♞a5 [53...♞d6 54.♘d7+- ♞d5 55.♔e4 wins the pawn and the game.]

54.♘d7! And Black is helpless against Ke4!

54...♔e8 55.♔e4 ♕d6 [55...♖a2 Searching for counterplay does not help: 56.♖xe5 ♖xf2 57.♖b8+ ♕d8 58.♖c6+-; 55...♖a4+ 56.♔xe5+-]

56.♖f6+ ♔f8 57.♖h7+! [And Black decided to finish his suffering in view of 57.♖h7+ 57...♔e8 (57...♔g8 58.♖g5+-) 58.♖g5+- And the first pawn falls. The next ones would just have been a question of time.] **1-0**

Clash of the Titans

(17) Suetin, Alexey S-Botvinnik, Mikhail[B63]

URS-ch20, 1952

[Kamil Miton]

1.e4 c5 2.♖f3 ♖c6 3.d4 cxd4 4.♖xd4 ♖f6 5.♖c3 d6 6.♕g5 e6 7.♖d2 h6?! Black just forces White to exchange the dark squared bishop, but in this position it is a bit inaccurate. This idea usually exists after first 7...a6 8. 0-0-0 and now h6. Compared to the game, after Bxf6 Black will be able to recapture on f6 with the queen. The main lines are : [7...a6 8.O-O-O ♕d7 And now white has two plans, with f4-Bxf6 or f3.; 7...♕e7 8.O-O-O ♖xd4 9.♖xd4 O-O 10.f4]

8.♕xf6 [8.♕h4 is very bad because Black has the typical trick 8...♖xe4!; 8.♕e3 8...♖g4∞]

8...gxf6 [8...♖xf6? 9.♖db5 ♖d8 10.O-O-O And Black is losing the d6 pawn.]

9.O-O-O a6 10.f4 ♕d7 11.♕c4 A good place for the bishop because one of White's idea is to push f5 to try and control the light squares (especially d5) .

11...h5 Very often in this structure Black plays h5 to not allow White to put a piece on this square.

12.♔b1

12...♖b6 It would of course be very logical to play b5 and try to advance the pawns on the queenside to create some threats against the white king, but this move is not bad either. Black's idea is to chase the white knight from his good central place.

13.♔hf1? From a strategical point of view this move is very bad. White should keep dynamic in the position. Let's check some other options: [

a) 13.♘xc6 It is hard to say which move is the best for Black now... 13...bxc6 should be logical to improve the center. (13...♙xc6 14.f5 ♖c5 15.♙b3 ♗e5∞; 13...♗xc6 14.♙b3 O-O-O 15.♗d4 ♙e7 16.♘a4 ♖b8 17.f5 With the idea to play Nb6 next and exchange bishop in order to try and get control over the light squares.) 14.f5 ♗b8 15.♙b3 With very complex play. The bishop on b3 is very strong because of the pressure on the diagonal and it is protecting the king very well. On the other hand Black has two bishops and a potential huge center (the d5 move doesn't work usually because White gets a strong attack over the d- and e-files and after a piece sacrifice on d5;)

b) 13.♘b3 13...O-O-O In comparison to the other line, the bishop on c4 is not well placed as White usually keeps the bishop on e2 and plays a plan with Rhf1-Rf3;)

c) 13.♘f5 This typical Sicilian sacrifice doesn't give White a clear advantage here. 13...exf5 14.♘d5

14...♗a5! An important move as White now has to lose a tempo to avoid the queen exchange. (14...♗d8 15.♔he1→) 15.♘xf6+ ♔d8 16.♗e3 fxe4 17.♙xf7 With a complex position, but Black should not be worse;

d) 13.♘de2 Maybe not a stupid place for the knight in case White wants to play f5-Nf4 to try and force e5 in order to get control over the d5 square. 13...O-O-O 14.a3!?∞In order to keep the bishop on the diagonal after Na5.]

13...♗xd4 14.♗xd4 ♘xd4 15.♔xd4 ♖c8 Thanks to the bishop pair, a better king and center endgame, only Black can have an advantage.

16.♙b3 ♗g8 17.♗d2 h4 18.f5 This plan is not as strong as with the queens on the board. White has to do something otherwise Black will simply improve the position after Ke7-Bc6-b5-Bh6 etc...

18...♙e7 [18...♙e7 19.♗f4 ♗h8 20.♘e2 ♗c5∞]

19.♗df2

19...♙h6! A good move! Black doesn't care about a pawn, the most important is active play, even in the endgame. [19...♙g7 20.♘e2 With the idea Nf4-Nh5.]

20.fxe6 fxe6 21.♖xf6 ♖cf8 22.♖xf8 ♗xf8 23.♖f2 ♗h6
Thanks to his better pieces, Black has full compensation for the pawn!

24.♗c4 There is nothing to do anymore for the bishop on this diagonal, so White improves the piece which will be needed to protect the e4 pawn.

24...♗e3 25.♖e2 ♗g1 A good plan. White is forced to do something with the pawns on the kingside.

26.g3 A practical decision. White gives the pawn back but limits the material and gets rid of his weaknesses on g2 and h3. [26.h3 makes the g2 pawn weaker and also weakens the dark squares.]

26...hxc3 27.hxc3 ♖xc3 Black has an advantage, but to win the position is not easy. White has only one weak pawn on e4, which is very well protected and there is also not much material left on the board.

28.a3 ♗e8 Black improves the bishop.

29.♖a2 ♗h5 30.♖e1 ♗d4 31.♖h1 [31.♗e2 31...♖e3--]

31...♖g5 Otherwise White would have played Ne2.

32.♖b3 ♗e5 33.♗d3 ♗g6 34.♖h4 ♖g3 After some maneuvers both sides have optimally placed their pieces.

35.a4 ♗f6 36.♖h1 ♖g4 37.♖e1 ♗e5 Black is winning the time, which is a typical way to realize a small advantage.

38.♗d1 ♖f4 Preventing Ne3.

39.♗c3 ♖f3 40.♗b1 White is trying to improve the knight (Nd2 or Na3-Nc4).

40...♗g3

41.♖g1?! I'm not sure if this was blunder, maybe White didn't want to suffer anymore and decided to defend the position without a pawn. [41.♖e2]

41...♗xe4 42.♗d2 ♗d5+ 43.♖a3 ♖f2 [43...♖e3? 44.♗f1 ♗f2 45.♗xe3 ♗xg1 46.♗xd5+ exd5=]

44.♗e4 ♗h2 [44...♗xe4 leads to a similar position as in the game. 45.♗xe4 d5 And now White has to escape with the bishop because the rook endgame is very bad for him, for example after 46.♖xc3 (46.♗xd5 46...♗d6+--+) 46...dxe4 47.♖g7+ ♖f6 48.♖xb7 e3 49.♖b3 e2 50.♖e3 ♖f5--+]

45.♖g6 ♗xe4 Maybe Black could have kept his bishop after [45...♖f3 46.♗g5 ♖e3+]

46. ♖xe4 d5 47. ♖d3 ♖e5

48. ♖g8 With the idea Ra8-Ra7.

48... ♖d7 49. b4 With the idea of looking for some pawn simplifications.

49... ♖f6 [49... ♖d6 50. ♖b3 e5]

50. ♖g1 ♖h2 51. ♖b3 ♖d6 Black is a pawn up, but it is not easy to improve the position because of the fact that the light squared bishops always have drawish tendencies.

52. ♖d1 [52. ♖g6]

52... ♖e7 [52... ♖h3 With the idea of advancing the pawns with e5-e4. 53. c4 (53. ♖a2 53... ♖h4 54. ♖b3 e5 55. ♖f5 (55. c4 55... e4 Followed by d4.) 55... e4 56. ♖c8 ♖c7 57. ♖e6 d4 58. ♖d5 ♖h3+ 59. ♖a2 e3± And the pawn on e3 is very unpleasant.) 53... d4 (53... e5 54. ♖c2 ♖h4 55. cxd5 ♖xb4 56. ♖b1 ♖xb1 57. ♖xb1 ♖xd5 58. ♖c2 e4 59. ♖f1 ♖d4 60. ♖h3 b5 61. axb5 axb5 Black is simply winning after Ke3-Kf2-e3 and White will not be able to stop both pawns.) 54. c5+ ♖d5 Black already has two passed pawns but White can create some blockade on the light squares. 55. ♖c2 ♖g5 56. ♖g1 With the idea of Rg7, putting pressure on the b7 pawn.]

53. c4 ♖b2+ 54. ♖a3 dxc4 55. ♖xc4 ♖c2 56. ♖b3 ♖b2+ 57. ♖a2 ♖f2 58. ♖c4

58... a5 Botvinnik was probably afraid of the idea a5-b5 (with good chances to exchange all pawns) and he wanted to keep at least one pawn on the queenside.

59. bxa5 ♖c3+ 60. ♖b3 ♖xa5 61. ♖b5 b6 62. ♖c4 ♖f6 63. ♖d4 ♖f4+ 64. ♖e3 ♖e5 65. ♖h1 ♖e4+ 66. ♖d3 ♖g4 Black can play this position for one million more moves, but objectively White should make a draw. Even if Black advances the e-pawn to e2, it is well controlled by the white pieces.

67. ♖h5+ ♖d6 68. ♖h8 ♖e5 69. ♖h5+ ♖f4 70. ♖h3 ♖g8 71. ♖h4+ ♖e5 72. ♖h5+ ♖d6 73. ♖h4 ♖g3+ 74. ♖e4 ♖d2

75. ♖d3?? An amazing blunder! White unexpectedly falls into the mate trap! [75. ♖h5]

75... ♖g5?! More accurate was [75... ♖c5 and now White is

losing immediately: 76. ♖f1 ♜e3+ 77. ♔f4 ♜e1+ 78. ♔f3 ♜xf1+ 79. ♔e2 ♖g5--+]]

76. ♜h5 White could have fought on without two pawns after [76. ♜h8 76... ♜g4+ (76... ♜e3+ 77. ♔d4 e5+ 78. ♔c4 e4 79. ♖c2 ♜e2†) 77. ♔f3 ♜xa4--+]]

76... ♔c5 With the idea of playing Re3. **0-1**

Editorial Preface

A big week of chess has begun!

The Dortmund Super Tournament is just about to start, with a very nice line up: Kramnik, Caruana, Wang Hao, Naiditsch (your devoted CEWN commentator) and many more.

The Biel Festival is already on the run, with Bacrot, Vachier Lagrave, Ding, Rapport, Moiseenko and Nepomniachtchi. So far we have seen 4 very fighting rounds and we can expect many more.

The Women's European Championship in Belgrade is under way as well. Just 4 rounds have been played and here we will also definitely see very exciting games and a gripping finish for the medals.

We wish all chess fans great fun watching these top 3 events online and already next week we will be back with analyses of the best games and most exciting moments from the tournaments.

2 best games of the past week

(1) **Morozevich, A.(2736)**

- **Mamedyarov, S.(2761) [D78]**

FIDE GP Beijing(10.3), 2013.07.15

[Balogh Csaba]

We always comment the most recent games, but this time we have to make an exception and go back a week, because Morozevich defeated Mamedyarov in an outstanding positional game.

1.♘f3 ♘f6 2.c4 g6 Mamedyarov recently switched to the popular and sharp Gruenfeld defence, which fits well with his style. White decided to try the g3 system against it.

3.g3 ♗g7 4.♗g2 O-O 5.d4

5...c6 This is considered to be the safest option for Black, creating a stable center with d5. [5...d5 6.cxd5 ♘xd5 is the other main line, with much sharper lines as the position is opened.]

6.O-O d5 7.♖b3 A relatively rare variation with the idea to keep the tension in the center. The main move is 7.cxd5, which leads to a dry, symmetrical position with a marginal advantage for White.

7...dxc4 [Theory considers 7...♖b6! to be the right response.]

8.♖xc4 ♖d5 As the draw was enough for Mamedyarov to win the tournament, he was aiming for simplifications, but as we will see, he soon ends up in an unpleasant position.

9.♘bd2 Morozevich is ready to play a slightly better endgame, the knight is going to be excellently placed on c4. [If White tries to avoid the trade of the queens and plays for instance 9.♖a4 Black wanted to play 9...♖h5 followed by Bh3, exchanging the strong bishop.]

9...♖xc4 10.♘xc4 The only plusses of White are the small space advantage and the developed knight on c4. The way Morozevich will convert these nuances into a full point reminds us of the best days of Karpov.

10...♗e6 It is a typical maneuver by Black to transfer the bishop to d5 in order to oppose the g2 bishop. However it also has the drawback that it leaves the b7 pawn unprotected and it might be directly attacked by Na5.

11.b3! White prepares Ba3 and stabilizes the c4 square for his knight. [11.♘a5 immediately was not so good: 11...b6! White is normally happy to provoke this weakening because the c6 pawn becomes really vulnerable after Ne5, but in this case the a5 knight does not find its place on the board. It should retreat

to c4, but it is not possible. 12.♖b3 a5 Black gets too active.]

11...♗d5 12.♗a3 It would also have made sense to prepare this move with a small positional improvement on the pawn structure by playing 12.a4

12...♖e8 13.♖ac1 Morozevich develops all his pieces to their most natural squares.

13...♞bd7 14.♞a5! Attacking the weakness. Black is forced to defend passively with both of his rooks, but it is still very difficult to make progress.

14...♖ab8 15.♖fd1 Activating the last unemployed piece. White has "easier" moves due to the space advantage.

15...♗f8 Black prepares for mass of exchanges and equalizing with e5, which was not possible immediately because of taking twice on e5 followed by Bd6 forking the rooks. White must take some active measures against this threat.

16.♞e5! Using the fact that White is well prepared for the opening of the d-file.

16...♗xg2 17.♗xg2 e6 [17...♞xe5 would only increase White's advantage after 18.dxe5 ♞d5 19.e4 ♞b6 Preventing Rd7. 20.♗c5! e6

Black is busted. He cannot take on c5, because after bxc5 the rook goes to d7, the knight cannot move because of the same reason and he cannot trade the rooks with Rd8 because the b7 pawn is hanging. 21.b4±]

18.♗xf8 ♞xf8

19.♞ec4! A strong positional move! As the principle says, the player with space advantage should aim to keep the pieces on board.

19...♗e7 Black was forced to control the d6 square, but this deprives Black from freeing his position with e5.

20.b4! Gaining more space on the queenside. The a5 knight is getting more and more annoying as it disturbs the movements of the Black pieces.

20...♖ec8 21.a3 White is not in a hurry, he protected the b4 pawn just in case against the possible attack with Nd5.

21...g5! Black tries to gain some space and aims to disturb White in his progressive plans, such as f4-Kf3 followed by g4-g5 or e4. In a few moves he could have gotten completely squeezed. [Unfortunately for Black, the freeing attempt with 21...b6 22.♘b3 c5 did not work because of 23.dxc5 bxc5

24.♘ca5! With the threat of Nxc5. 24...cxb4 (24...♖b5 is met by 25.♖c4 and Rdc1, winning the pawn.) 25.♘c6+! is the point and Black does not get sufficient compensation for the exchange. 25...♖xc6 26.♖xc6 bxa3 27.♘c5 ♘xc5 28.♖xc5± Followed by Ra5, winning the a-pawns.]

22.♘b2! White transfers the knight to d3, from where it is going to control both of Black's freeing breaks with b6-c5 or e5. We must add that after g5, e5 is not necessarily something to be afraid of, since the f5 square and the g5 pawn would become vulnerable.

22...♘e8 23.♘d3 f5 Black tries to defend actively, but it allows White to provoke further weakenings.

24.h4! g4 A sad, but forced decision. Sad, because it has created another nice outpost for the knight, now on f4. Black could not allow the opening of the h-file. [24...gxh4 is met by 25.♖h1! hxg3 Otherwise White would play Rxh4 and the new pawn island on h7 would be a serious achievement for him. 26.♖xh7+ ♔d8 27.♘f4+; 24...h6 also allows 25.hxg5 hxg5 26.♖h1 followed by the penetration on the h-file.]

25.♘f4 ♘ef6

26.♖c2! This kind of "small" improving moves were the specialties of Karpov. As they said, when Karpov did not find a plan in a position, he always doubled his rooks. :) White has not decided where to use his rooks yet, he will check the circumstances later on.

26...♞d5 27.♞d3! Following the same principle as in the 19th move. White keeps his pieces on board because of his space advantage.

27...♞f8 Mamedyarov tries to get some counterplay by playing f4, but of course Morozevich does not give such chances.

28.e3! ♞fe8 29.♞e1! Another great move by White! He creates an unpleasant positional threat by moving e4 fxe4 Rxe4, where after the g4 and e6 pawns become real targets. Black has to prevent it.

29...♞5f6

30.♞b1! Switching the rook to the queenside! The new threat is b5 cxb5 Rxb5 and Black cannot deal with the b7 pawn, since b6 moves into Nc6.

30...♞ec8 Now b5 could be met by cxb5, but...

31.♞bc1! White has refreshed the b5 idea.

31...♞d8 32.a4! All pieces are excellently placed. White is well prepared for the breakthrough. b5 is coming next, followed by the invasion on the 7th rank.

32...♞e4 [32...a6 could be met by 33.♞c5! Black is forced to take, but the opening of the b-file is crucial for the b7-pawn. 33...♞xc5 34.bxc5 Followed by Rb1 and Rb2, collecting the pawn.]

33.b5 cxb5 34.♞c7! Morozevich finds the decisive blow!

34...♞d6 [34...bxa4 35.♞xb7 is over, for instance after 35...♞f8 36.♞e5 ♞f6 37.♞c6+ wins.]

35.♞c5! Further pressing the b7 pawn, but Black has no more resources to defend it. The game is over.

35...bxa4 [35...♞e8 36.♞xb7 ♞xb7 37.♞cxb7 ♞a8 38.axb5+— White has an extra pawn and a winning position.]

36.♞cxb7 ♞xb7 37.♞xb7 ♞f8 38.♞1c6! Morozevich continues finding the best moves! Complete domination. White created the decisive threat of Nc5.

38...♞f7 [38...a3 39.♞c5+— is also hopeless.]

39.♞c5 ♞e8 40.♞xe6+ ♞d8 41.♞ec6! Black resigned in view of the following lines [41.♞ec6 41...♞e8 (41...a3 is simply met by 42.♞xa7 ♞xc5 43.♞xf7 a2 44.♞a7+—) 42.♞xa4+— With a hopeless position for Black. A real positional masterpiece by Morozevich, it is very rare to see such games on the highest level. Despite this loss, Mamedyarov deservedly won the tournament!] **1-0**

(2) Shankland, Samuel L(2599) - Wang, Yue(2705) [B49]

Yinzhou Cup CHN-USA, 2013.07.20
[Balogh Csaba]

A nice win by Wang Yue. I especially like the final part of the game, when Black has started the maneuvers with his heavy pieces.

1.e4 c5 2.♘f3 e6 3.d4 cxd4 4.♘xd4 ♘c6 5.♘c3 ♖c7 The Sicilian Paulsen recently enjoys a big popularity and even such highly positional players like Wang Yue started to play it. White has a wide range of setups here.

6.♙e3 a6

7.♙e2 [The most critical and the sharpest continuation is definitely the one with 7.♖d2 7...♘f6 8.O-O-O but recently Russian grandmasters started to successfully employ the line with 8...♙e7 9.f3 b5 10.g4 ♘xd4 11.♙xd4 ♙b7 Topalov has scored a nice win against Karjakin in the previous week with the Black pieces.]

7...b5 I personally like this sideline for Black. This is also the standard development of Black in the Paulsen. [The main option is 7...♘f6 8.O-O ♙e7 9.f4 d6 and we are in the Scheveningen variation with huge theory.]

8.♙xc6 ♖xc6 9.♙f3 This slightly weird move is the main line

in this particular opening. Usually in the Sicilian, White only puts his bishop to f3 when he has already moved f2-f4, but here White has a different strategy.

9...♙b7 10.e5 [10.O-O is more common, but recently Black is doing fine in the opening after 10...♖c7]

10...♖c7 11.♙xb7 ♖xb7 12.♖d3 Very logical play by White, after exchanging the light squared bishops he would like to occupy the e4 square with the knight. Wang Yue responds with a typical move to counter this idea.

12...f5! Black takes the e4 square under control and exf6 is not dangerous because he can simple play Nxf6 followed by Be7 and O-O with a good position. [The direct option to avoid Ne4 was less promising: 12...♙b4 13.O-O ♙xc3 14.♖xc3 ♘e7 and Black might get into trouble on the dark squares after 15.♙c5! ♖c8 16.b4+; 12...♖xg2 is too greedy. 13.O-O-O followed by Ne4 cannot bring any good for Black.]

13.O-O-O ♘e7 Due to the e5 pawn, Black cannot play Nf6, but this slightly artificial way is also adequate to finish the development. The knight might go to c6 or to b4, like in the game, followed by Nd5 is also an option.

14.f4 ♖c8 15.♖d2 Both rook moves are pretty logical, Black occupies his opened file, while White tries to increase the pressure on the d7 pawn.

15...b4 [A bit ugly, but it also seems possible to play 15...♘c6 16.♚hd1 ♚c7 Followed by Na5-c4 or Bb4. Black is safe.]

16.♘a4 ♘d5

17.♘b6! White tactically uses the drawback of the 15...b4 move. Kicking out the strong d5 knight is definitely an achievement.

17...♗xb6 18.♗xb6 ♗e7

19.♗e3?! This is a waste of an important tempo. [19.♚hd1! should have been played. White was probably afraid of 19...♚xb6 since Qxd7 is not mate anymore, but the position still remains very unclear. 20.♚xd7+ ♗f7 21.♚d6! ♗e3+ 22.♗b1 ♚he8! 23.♚xe6+ ♗f8 24.♚xf5+ ♗g8 25.♚d7 After this more or less forced line, it is very difficult to give a correct assessment about the position. We can probably say it is a dynamic equality with 3 pawns for the bishop. Both sides

have active pieces and neither side have weaknesses. From a practical point of view it might be easier to play as White, because many endgames could be dangerous for Black.]

19...♚c7 By protecting the d7 pawn, Black is ready to activate his h8 rook after castling kingside.

20.♚g1 White tries to scare Black from castling, but the attack with g4 is not so dangerous... [20.♚hd1 20...O-O

This is already comfortable for Black. He has a clear plan with a5-a4.]

20...O-O 21.h3 [It would have been more consequent to play 21.g4 although Black is fine after 21...fxg4 (21...g6 is also possible, with the same idea as 21...fxg4.) 22.♚xg4 ♗f5 23.♚dg2 g6 White can hardly increase the attack, while Black's turn is coming with a5-a4.]

21...a5! Black is very fast with a4-b3, it is time to take some defending measures as White.

22.♗d4 a4 23.♗b1 ♚fc8! A very good move! Black leaves the f-file with his rook, which was very important in the defence as we had seen in some lines before, when the rook was placed on f5. However, Black has created the big threat of Rc3! [23...♚c3? did not work immediately because of 24.♗xc3 bxc3 25.♚xc3]

24.b3 [Sharp and nice lines are arising after 24.g4 but Black is fine at the end: 24...♖c3! The rook cannot be taken as Black just wins after bxc3. 25.♙e2 fxg4 26.♙xg4 g6!

We have reached this complex position, but after checking the critical moves, we come to the conclusion, that Black is better. The rook is obviously still taboo. 27.h4 (27.♙h5 with the idea of Rxc6 is met by 27...♙h8! 28.♖xg6 ♙e4! and Black wins. The g6 and the c2 pawns are hanging, while after 29.♖gg2

29...♖xc2! 30.♖xc2 ♙e1+ Black mates.) 27...♖f3! 28.h5 ♙e4! 29.hxg6 h6! Really cool and calm defence! The h6 idea is known in the Sicilian lines, when White is ready to open all lines on the king, Black sometimes simple neutralizes the attack this way. Black's turn is coming with b3 and Rxf4. 30.♙h5 ♙xf4±]

24...axb3 25.cxb3 [25.axb3 25...♖a8 26.g4

is nicely refuted by 26...♖c3!! 27.♙xc3 bxc3 28.♙xc3 (28.♙xd7 28...♙a6—+) 28...♙b4 29.♙d4 ♙xd2 30.♙xd2 ♙a7—+ With a double attack on a1 and g1.]

25...♙c5! Well played again! The trade of the bishops seriously weakens the White king.

26.♖c2 [26.♙xc5 26...♖xc5 27.♙xd7 is not advisable because of 27...♙e4+ 28.♙d3 (28.♙b2? 28...♖c2+ 29.♖xc2 ♙xc2+ 30.♙a1 ♖a8 31.♙xe6+ ♙h8—+) 28...♙xf4± And the e5 pawn falls.]

26...♙xd4 27.♖xc7 ♙xc7 28.♙xd4 Black is clearly better, but he must play really energetically, because one careless move could allow White to consolidate his position.

28...♙c2+! 29.♙a1 h5! Opening the back rank is an excellent prophylactic idea before starting the real actions. [29...♖a8 30.♙b2 White is alive.]

30.♖b1 [30.♙xb4 loses to 30...♙f2! 31.♖d1 ♖c2 32.♙a4 (32.♙a5 32...♙xf4—+ In such lines we can see how important it was to play h5, otherwise White could have played Qd8 now.) 32...♙e2 33.♖h1 ♙d2—+ White cannot hold the attack.]

30...♖a8 31.♙b2 [31.♖b2 allows a pretty finish:

31...Qc1+ 32.Rb1 Qxa2+! 33.Kxa2 Qa3#]

31...Qd3! Of course Black needs the queens to win the game.

32.Qc1 White tries to defend with Rb2-c2. [On 32.Rc1 Black plays the same as in the game: 32...Ra5 Bringing the rook into the attack through the d5 square.]

32...Ra5! Wang Yue uses his rooks really effectively. He transfers it to d5.

33.Rb2 Rd5 34.Qc8+ [On 34.Rc2 Black can for instance play 34...Qd4+ 35.Kb1 Qe4 with similar things as in the game.]

34...Qf7! No mistakes! [After the careless 34...Qh7 White suddenly gets counterplay after 35.Qe8!]

35.Qc1 Qd4 White basically has no moves.

36.h4 Qe4! The last subtle move. Black opens the way for his rook to penetrate on the d-file.

37.Rc2

37...Rd3! Switching the place of the rook and the queen. When the queen is behind, Black has the decisive threat of Rd1. White cannot defend.

38.Qb1 Qd5! 39.Qb2 [39.Rc5 39...Qxg2-+]

39...Rd1+ 40.Rc1 Rd2 41.Rc2 Qd3 White resigned as Rd1 is coming. A typical Sicilian game, where Black overtook the initiative. **0-1**

Endgame section

(13) Tan Zhongyi(2478)-Abrahamyan, T.(2316)

Yinzhou Cup, 2013.07.20

[CE TEAM]

The following pawn endgame has arisen in a women's game. Despite White's extra pawn, the win is very difficult. We recommend to everyone to calculate such pawn endgames, because it seriously improves our calculating skills.

47...a5! The only move for Black, otherwise White plays a5 and wins an important tempo for the pawn race after the king marches to the a6 pawn.

48.h5!! A very difficult move and the only one which leads to a win. White gives back the pawn in order to obtain a superior king. [48.♔e3 was very logical in order to keep controlling the f3 square and trying to squeeze back the black king by using zugzwang. However Black can play..

48...f5! 49.Ke2 (49.Kd4 leads to draw after 49...Kf3 50.Ke5 Kxf2 51.Kxf5 Kxg3 52.h5 Kh4 53.Kg6 Kg4 54.Kxg7 Kxh5 55.Kf6 Kh6= The black king goes to a8.) 49...f4! 50.gxf4

50...Kxh4! This position is surprisingly a draw as we can see from the following lines. Black is always able to trade his g-pawn for both f-pawns and in the end he succeeds in running into to a8 corner. (50...Kxf4 loses after 51.Kd3 Kg4 52.Kc4 Kxh4 53.Kb5 White is too fast.) 51.Kf3 (51.Kd3 51...Kg4 52.Ke4 (52.Kc4 52...Kxf4 53.Kb5 Kf3 54.Kxa5 Kxf2 55.Kb5 g5= The pawn race also leads to a draw.) 52...g6 52...Kh3 was also enough for a draw. 53.Ke5 (53.f3+ 53...Kg3 54.Ke3 Kg2=) 53...Kf3 54.Kf6 Kxf4 55.Kxg6 Kf3 56.Kf5 Kxf2 57.Ke4 Kg3 58.Kd5 Kf4 59.Kc6 Ke5 60.Kb5 Kd6 61.Kxa5 Kc7=) 51...Kh3 52.f5 Kh2 53.Kf4 Kg2 54.Kg5

54...Kf3! Black must catch the f5 pawn first. 55.Kg6 Kf4 56.Kxg7 Kxf5 57.Kf7 seems to be completely winning at first sight, but Black is just in time: 57...Kf4 58.Ke6 Kf3 59.Kd5 Kxf2 60.Kc4 Ke3 61.Kb5 Kd4 62.Kxa5 Kc5= The white king got squeezed to the a-file.; 48.Kd5 is not an option because of 48...Kf3 49.Kc5 (49.Ke6 49...Kxf2 50.Kf7 Kxg3 51.Kxg7 f5 52.h5 f4 is a draw in the end.) 49...Kxf2 50.Kb5 Kxg3 51.Kxa5 f5 Only Black can win.]

48...Kxh5 49.Kf5! Kh6 50.g4 Kh7 White can start with all the different move orders here, but there is only one winning idea after all the moves.

51.Ke6 Kh6 [51...Kg8 52.Ke7 will lead to the same.]

52.f4! The black king must be kept squeezed.

52...♔g6 53.♖e7 ♔h6 [On 53...f5 54.g5! ♔h5 55.♖f7 ♖g4 56.♖xg7 ♖xf4 57.♖f6+- White promotes the pawn faster.]

54.♖f7 ♔h7 So far everything was easy after finding 48.h5, but here is the critical moment, where White makes a mistake in the calculation and fails to find the winning continuation.

55.♖e6 [55.g5! was the right move! 55...fxg5 (55...f5 56.♖e6 ♖g6 57.♖e5+-) 56.fxg5 ♔h8

57.♖e6! ♔h7 58.♖f5! White wins some important tempi by forcing the black king to go back to the back rank. 58...♖g8 59.g6! ♖f8 60.♖e6! White is able to hold the king on the back rank! 60...♖e8 61.♖d6 ♖d8 62.♖c6 Only now Black can go for the g6 pawn, but it is already too late. 62...♖e7 63.♖b6 ♖f6 (63...♖d6 64.♖xa5

With the appearance of the g-pawns, Black cannot hope to save himself by squeezing the king to the a-file. 64...♖c5 65.♖a6 ♖c6 66.a5 ♖c7 67.♖b5+- White will go and take the g7 pawn.) 64.♖xa5 ♖xg6 65.♖b5 ♖f5 66.a5 g5 67.a6 g4 68.a7 g3 69.a8=♖+-]

55...♔h6 56.♖e7 [56.♖d5 leads to the same draw as in the game: 56...f5!! 57.gxf5 (57.g5+ transposes to the game.) 57...♖h5 58.♖c5 ♖g4 59.♖b6 ♖xf5 60.♖xa5 ♖xf4 61.♖b5 g5 62.a5 g4 63.a6 g3= Promoting at the same time.; 56.♖f7 White should have gone back to the previous position.]

56...♔g6 57.♖d6? This is the decisive mistake. [It was not too late to go back to the winning line with 57.♖e6!]

57...f5!! Black is out of the trouble.

58.g5 ♖h5 59.♔e5 [On 59.♔e6 59...♔g4 60.♔e5 Black has the important tempo 60...g6 and it leads to a draw after 61.♔f6 ♖xf4 62.♔xg6 ♔e4 63.♔h5 f4 64.g6 f3 65.g7 f2 66.g8=♚ f1=♚=]

59...♔g4 60.g6 White's last attempt and it indeed temporarily wins a pawn, but unfortunately after

60...♔h5 61.♔xf5 ♔h6! White gets into zugzwang and must drop the g6 pawn.

62.♔e4 ♖xg6 Draw agreed. Pawn endgames can be very tricky sometimes. **1/2-1/2**

(14) Vallejo Pons, F.(2705)-Sargissian, G.(2671)

TCh-ESP CECLUB Div Honor 2011(6), 2011.11.25
[E. Bacrot]

39...h5?! A very logical decision over the board, but it seems like the passive defence played in the game Vachier-Lagrave - Polgar and analysed in the CE issue of November leads to a complicated draw. Trying to exchange the h-pawn is of course a good idea, but it is refuted.

40.gxh5! White's chances are of course minimal after [40.a5 40...hxg4 41.hxg4 ♖a4]

40...♔h6 41.♖h8+ ♔g7 42.♖a8 ♔h6

43.♖a7! White is provoking weaknesses in his opponent's camp. When the black f-pawn moves, it is enough to put the

rook on a8 and the pawn a7 and to collect Black's pawn with the king. [After 43.a5 43...♙xh5 44.a6 ♖g6 Black manages to draw quite easily, for example: 45...♙f6 46.♙f3 ♜a2 47.♙e4 ♜a1 48.♙d4 ♜a2 49.♙c5 ♖g7 (49...e5 The retreat can be delayed until White's king arrives on e8 and if Black is staying on f6 with the king and putting a pawn on e5, it is a draw. The most easy draw is the main line.) 50.♙d6 ♜a6+ 51.♙e7 ♜a5 52.e4 The last try, otherwise we would reach a theoretical drawn endgame with the a7 and h-pawn. (52.f3 52...♜a6 53.f4 gxf4 54.exf4 f6 55.h4 e5=; 52.f4 52...gxf4 53.exf4 e5!=) 52...e5! Black cannot let the e-pawn on the 5th rank: (52...♜a4? 53.e5 Now it is easy: White's king is back and after f4 gxf4 is forced and then the pawn goes to h6 and the king is collecting the f4-f7 and e6 pawns thanks to zugzwang. 53...♜a2 54.♙d6 ♜a1 55.♙c5 ♜a2 56.♙d4 ♜a1 57.♙e3 ♜a2 58.♙f3 ♜a4 59.♙g3 ♙h7 60.f4 gxf4+ 61.♙f3 ♙g7 62.h4 ♙h7 63.h5 ♙g7 64.h6+ ♙h7 65.♙g4 The zugzwang starts!) 53.♙d6 ♙h7 54.♙c6 (54.♜e8 54...♜xa7 55.♜e7 ♜a6+ 56.♙xe5 ♙g6=) 54...♜a1 55.♙d5 ♜a5+ 56.♙c4 There is nothing to take, so White tries his luck on the other side of the board. 56...♜a1 57.♙d3 ♜a2 58.♙e3 ♜a3+ 59.♙e2 ♙g7 60.♙f1 ♙h7 61.♙g2 ♙g7 62.f3 ♜a1 63.♙g3 ♜g1+ 64.♙h2 ♜a1 65.h4 gxf4 66.♙h3 ♙f6 67.♙xh4 ♜a4 White can exchange one more pawn but there is nothing he can do to win.]

43...f5 Other tries are losing right away: [43...♙xh5 44.♜xf7 ♜xa4 45.♜f6 ♜a6 46.♙f3+-; 43...e5 44.♜xf7 ♜xa4 45.♜f5 e4 46.h4+-]

44.a5 e5 The pawn has to advance and try to lock White's king. [44...♙xh5 45.a6 ♙g6 46.♜a8 ♙g7 47.a7 ♙h7

48.f4 is an easy win as Black will be in zugzwang when White's h-pawn reaches h6.]

45.a6 ♙xh5 46.♜a8 ♙g6 47.a7 ♙g7

48.f3?? The wrong way to transfer the king, as with the weakening of White's pawn chain Black gets chances to create a passed pawn. [48.♙f3! was the right move. 48...♜a2 (48...e4+ 49.♙e2 ♜a2+ 50.♙d1 is also an easy win.) 49.e4 ♜a3+ 50.♙e2 fxe4 51.♙d2+- And soon the king will collect the pawns.]

48...♜a2+! Black needs to check because White is threatening to play e3-e4 with a trivial win.

49. ♖f1 ♜a1+ 50. ♖e2 ♜a2+ 51. ♖e1 ♜a1+ 52. ♖d2 ♜a2+

53. ♖d1 Going to the c-file allows Black's break: [53. ♖c3 53...e4! 54.fxe4 f4! (54...g4 55.exf5 g3 56. ♜b8±) 55.exf4 (55. ♖b3 55... ♜a1 56. ♖b2 ♜a4 57. ♖c2 f3 58. ♖d2 ♜a1=) 55...gxf4 56. ♖b3 ♜a1 57. ♖b2 ♜a4! It is very important to attack the e-pawn. 58. ♖c2 f3 59. ♖d2 f2 60. ♖e2 ♜xe4+ 61. ♖xf2 ♜a4 And Black reaches a rare position where he has a draw although he is two pawns down.]

53... ♜a1+ 54. ♖e2 [54. ♖c2 54...e4 55.fxe4 (55. ♖b2 55... ♜a4 56.fxe4 f4) 55...g4! (55...f4 56.exf4 gxf4 57. ♖d2+—) 56. ♖b2 White's king is now very far from his pawns. 56... ♜a5 57.exf5 g3 58. ♜d8 ♜xa7 59. ♜d6 ♖h7 60. ♜d2 ♜e7=]

54... ♜a2+ 55. ♖f1 ♜a1+ 56. ♖g2 ♜a2+ 57. ♖g1 ♜a1+ 58. ♖h2 ♜a2+ 59. ♖g3

59... ♜a3! Black continues playing in order to avoid e3-e4.

60.h4 The last valid break.

60...f4+! 61. ♖g2 [61.exf4 61...gxh4+ 62. ♖xh4 (62. ♖g4 62...exf4 63. ♖xf4 ♜a4+ 64. ♖e3 ♜a2 65. ♖f4 ♜a4+) 62...exf4 63. ♖g5 ♜a4 64. ♖f5 ♖h7 65. ♖f6 ♜a3 There is no zugzwang, so the position is drawn.]

61...fxe3 62.hxg5 e2 63. ♖f2 ♜xf3+ 64. ♖xf3 [64. ♖xe2 64... ♜a3 White wins the e-pawn but he cannot make further progress.]

64...e1= ♜ 65. ♜g8+ ♖xg8 66.a8= ♜+ ♖g7 67. ♜b7+ ♖g6 68. ♜e4+ ♜xe4+ 69. ♖xe4 ♖xg5 70. ♖xe5 1/2-1/2

(15) Vachier-Lagrave, M - Polgar, J

2011

[E.Bacrot]

1...h5! [1...hxc5? 2.hxc5 I said this was a draw, but Maxime correctly refuted me: 2...g7 3.g7 4.c3 a1 5.c4 a4+ 6.d5 a5+ 7.d6 h7 8.e7 (8.g6+? 8...fxg6 9.e6 g7 is a draw.) 8...g7 9.d7 a6 (9...h7 10.d6 g7 And we're back to the main line.) 10.c7 a1 11.d6 a5 12.g6!! f6 (12...fxg6 13.e6 Black is in zugzwang.) 13.e6 a1 14.d8! a7 15.f5 b7 16.d6 And White will soon collect both black pawns.]

2.gd3 a1 3.gc4 a2 4.gd5 a5+ 5.gd6 gh7 6.ge7 [6.e8 6...xa7 7.e7 a6+ 8.xe5 g7 9.f5 a1=]

6...g7 7.g6 fxg6 8.ge6 g5 And with the passed pawn, Black has a draw.

Clash of the Titans

(16) Petrosian, T.-Simagin, V.[E91]

Moscow, 1956

[Kamil Miton]

1.f3 f6 2.c4 c6 With the idea to come back to Slav structures.

3.c3 d6 4.d4 g6 5.e4 g7 6.e2 O-O 7.O-O g4 We have the classical variation of the King's Indian (Nf3-Be2) where Black uses the rare plan with c6-Bg4. [7...a6 With the idea to play over b5.]

8.e3

8...bd7 [8...a6 Black usually develops his knight on a6 to free the d7 square for the other knight. It looks more flexible but of course White is better anyway. 9.h3 xf3 10.xf3 d7 11.c1+= White has the bishop pair and more space. It is hard to prove that Black has some play on the dark squares.]

9.d2 The idea of exchanging the bishops is logical, White could do that after Ne1 and the knight could also go to the d3 square, where it is paced well to support plans with b4 or f4. [9.h3 xf3 10.xf3 e5 11.d5+= The bishop on f3 is not bad and White can improve it after the typical g3-h4.]

9...♟xe2 10.♞xe2 e5 Let's check what would have happened if Black had fought back in the center in another way: [10...c5

11.dxc5! (11.d5 a6 12.a4 ♞e8 And Black's plan is to come to c7 with the knight and try to push b5 to get the initiative on the queenside. At the same time White should play over f4-e5 but in this case the white pieces are not ready at all for this.) 11...♞xc5 (11...dxc5 12.f4+)=) 12.♟xc5 (12.e5 ♞fd7 13.exd6 exd6 14.♞ac1 White should have an advantage because of his better structure.) 12...dxc5 13.e5 ♞d7 14.f4 And White is probably slightly better because the bishop on g7 is limited. 14...f6!? 15.♞ad1 fxe5 16.♞de4 exf4 17.♞xc5 ♞xc5 18.♞xd8 ♞axd8 With some practical chances.]

11.d5 Both sides decided to close the position in the center, which is typical for the King's Indian. [11.dxe5 dxe5 (11...♞xe5 12.♞ad1) 12.b4+]=]

11...c5 12.♞ab1 White prepares to put pressure on the queenside. In general White is slightly better thanks to his better bishop and more space.

12...♞e8 Black is preparing the thematic plan with f5. In my opinion it was more aggressive and interesting to put the knight on a more active place: [12...♞h5!? Black has the additional idea Nf4 and forces White to slightly weaken the position after 13.g3

13...♞e8 Preparing for f5. 14.a3 (14.♞b5 ♞e7) 14...f5 15.♞f3 (15.exf5 gxf5 Black gets a strong initiative here: 16.♞f3 e4 17.♞g5 ♞g6) 15...h6 (15...f4 16.♟d2 With a fight for the light squares.) 16.exf5 gxf5 17.♞b5 With the idea Nc7-Ne6.]

13.f3 f5 14.b4 White immediately opens the file in order to put some pressure. [14.a3 ♟f6 With the idea to activate the bad bishop. 15.♞h1 ♟g5 16.♟g1 ♟xd2!? 17.♞xd2 f4 Black gets rid of his limited bishop and the next plan is to attack after g5-g4. The position is complex. 18.b4 b6∞XBg1]

14...cxb4 15.♞xb4 b6 16.a4 The c5 square has no meaning, White is going to push a5 in order to create weaknesses.

16...♟f6 [16...♞c7 17.a5 ♞a6 18.♞bb1 bxa5 19.♞b3+]=]

17.♞h1 ♟g5 18.♟g1 ♞c7

19.♞bb1 ♞a6 20.♞b3 ♞dc5 21.♞xc5 [21.exf5 21...gxf5 22.a5

♟xb3 23.♞xb3 ♟c5 24.♞bb1 ♞c8 (24...bxa5 25.♞xc5 dxc5 26.♞xe5) 25.♞xc5 (25.axb6 25...axb6 26.♞b4 With the idea to put pressure on the b6 pawn.) 25...♞xc5 26.axb6 axb6 27.♟a4 ♞a5 28.♟xb6 ♞c7 It looks as if thanks to the weak dark squares and the bad knight on b6 Black has good compensation.]

21...bxc5 Black changed the structure and has the idea to come to b4 with the knight in order to solve his queenside problems, but now White changes the side of the pressure and the knight on a6 (even if come on b4) will be out of play, so White decided to play [21...♟xc5 22.a5∞]

22.exf5 gxf5

23.g4! A great move. White is taking control of the light squares, especially so as the knight is going to go to e4. [23.♞b7 is premature because of 23...♞c8 XRB7; 23.f4?! A strange idea. 23...♞xf4 24.g3 ♞h6! (24...♞g5 25.h4 ♞e7 26.♞xf5! ♞xf5 27.♞g4+ ♞h8 28.♞xf5 ♟b4 29.♞g2+=) 25.♞b7 ♞g5 (25...♞c8 26.♞e7!) 26.♟b5 ♞g6 White can't be worse here.]

23...fxg4 24.♟e4 ♞f4 [24...gxf3 25.♞xf3 ♞f4 26.♞e3+- After a few moves the black king will be under huge attack and the knight on a6 is too far to help.]

25.♞b7 ♟c7 26.fxg4 ♟e8 Somehow the knight is back in the

game, but is too late as the white pieces are very well placed and White has a huge advantage.

27.g5 Preventing Nf6 as it is very important to keep the strong knight on e4. [27.♞f2 also preventing Nf6 and preparing for Bg3. 27...♞c8 28.♞e7 ♞d8 29.♞h4+-]

27...♞c8 28.♞e7 ♞h3 Black is looking for practical chances.

29.♞f3 [29.♞b1 With the idea to just crush the position on the 7th rank. 29...♞f7 30.♞xe8+ ♞xe8 31.♟xd6+-]

29...♞g4

30.♞d3?? A huge blunder! White missed a simple win after [30.♟f6+ 30...♟xf6 (30...♞xf6 31.gxf6 ♟xf6 32.♞g2 The most simple win.) 31.gxf6 ♞xf6 32.♞g3+-]

30...♞xh2! 31.♞xf8+ ♟xf8 32.♞xe8+ ♞xe8 33.♞xh2

33...♞e7?? Black was back in the game and committed

another big mistake. He should have played [33...♔f5! 34.♘xc5 ♕xd3 35.♘d3 ♖c8 (35...♗b8! The best move. Black is fine.) 36.c5 ♖e7 (36...dxc5 37.d6 c4 38.♘xe5 but not (38.d7? 38...♗a8! 39.♘xe5 ♖e7 And Black is able to bring the king to e7.) 38...c3 39.d7 ♗d8 40.♙f4+-) 37.c6 ♖b8 38.♙g2 ♖b3 39.♘xe5 (39.♘f2) 39...dxe5 40.♙xe5 ♗d3 41.d6+ ♗xd6 42.♙xd6+ ♖xd6 43.♙f3 ♖xc6 With a draw according to the engine.]

34.♘xd6 After losing this pawn, the black struture will be very weak and the bishop on h2 is back in the game.

34...♕xg5 [34...e4 35.♕f1+ ♕f3+ 36.♙g1+-]

35.♕f1+ ♙g8 36.♘e4 [36.♕g2+- The simplest way was to exchange queens in order to avoid counterplay.]

36...♕h4 37.♕e2 ♗g7 38.d6 [38.♘xc5 38...♕d4 39.♘b3 And the a1 square is under control.]

38...♕h6 [38...a5 39.♕e3 h6 40.♕e2 All pieces are optimally placed and White should somehow win, but it is not easy to show a forced way. 40...♙h8 41.♘xc5 ♕d4 42.♘b3 ♕b6 White is not able to hold the d-pawn. 43.♘d2 ♙g8 44.♘f3 (44.♕d3 44...♕f2) 44...♕xd6 45.♙xe5 ♕e6+=]

39.♕d1?? White was probably in time trouble! This move changes the evaluation. It was more accurate to play [39.♕f1 White takes control of the important h3 and c1 squares. 39...♗f7 40.♕g2+ ♗g7 41.d7 ♕c1+ 42.♙g1 ♕d1 43.♘f6+ ♙f7 44.♕d5+ ♕xd5+ 45.cxd5 ♗xg1+ 46.♙xg1 ♙e7 47.♙f2 And White is easily winning.]

39...♕h4?? Black overlooks his escape chances! After the correct [39...♕h3! 40.♕d5+ (40.♕e2 40...♗g6 Black improves his pieces a lot and takes control of the light squares.) 40...♙f8 The king must be closer to the pawn. 41.♘d2 ♕g4 With the idea to play Qd1. 42.♕f3+ ♙e8 43.♕xg4 (43.♕c6+ only leads to perpetual check.) 43...♗xg4 44.♙xe5 ♙d7 And Black survives.]

40.♕e2 [40.♘g3 40...♗xg3 41.♕d5+- Followed by d7.]

40...♕h6 After reaching the time control White didn't repeat his mistake and played the correct

41.♕f1! ♗f7 42.♕g2+ ♙f8 43.♘g5! White gets a decisive attack.

43...♔xd6

44. ♔a8+! But not [44. ♖xf7?? because of 44...♔d1+ 45. ♔g1 ♔f3+ and black has a nice perpetual check which we can find in some puzzles: 46. ♔g2 ♔d1+ 47. ♖g1 ♔h5+ 48. ♔h2 ♔f3+=]

44...♔g7 45. ♖xe5+ A very nice motive! It's a pity that White could win also after [45. ♖xf7 45...♔d1+ 46. ♔g2 ♔e2+ 47. ♔g3 And the white queen will come back to stop the checks.]

45...♔xe5 46. ♔h8+ ♔xh8 47. ♖xf7+1-0

Editorial Preface

3 major events are under way and will end this week.

The Dortmund Super Tournament:

As usual the Dortmund Super Tournament comes up with a very strong line-up of top world players plus the 4 players from the German national team. After 6 rounds, Kramnik and Adams are leading with the amazing score of 5/6.

17 The traditional round robin tournament in Biel came to an end with a 4 players tying for first place! Moiseenko, Bacrot, Vachier Lagrave and Ding Liren all scored 14 points (with 3 points for a win). The last place was taken by the young Richard Rapport with a result of 4 losses and 6 draws, which is quite disappointing.

26 The Woman European Championship in Belgrade is also still under way. After 9 rounds out of 11, Hoang Thanh Trang from Hungary is leading with a fantastic 7.5/9, followed by Melia Salome, Kosteniuk, Cmilyte and Socko - all with 7 points. It is going to be a very exciting finish!

In the current issue we bring you commented games from Dortmund and Biel. Enjoy CEWN Nr75!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Naiditsch, Arkadij(2710)

- Andreikin, Dmitry(2727) [C70]

41st GM(4.2), 2013.07.29

[Arkadij Naiditsch]

After a bad start of the tournament I very much wanted to come back, and in round 4 I took my chance against the current Russian Champion, who also won the U-20 World Junior Championship 2 years ago. It was a very important game for me in this tournament situation.

1.e4 e5 Andreikin is playing a lot of different openings, like the Sicilian, the Caro-Kann or the French.

2.♘f3 ♘c6 3.♙b5 a6 In the 2nd round against Adams, Andreikin went for the Berlin and lost...

4.♙a4 ♙c5!? A very rare line under this concrete move order, but this line is very interesting. Usually Black chooses not to include 3...a6 4. Ba4 and to play 3...Bc5.

5.c3 The most logical move, what can be more tempting than to play d4 with tempo.

5...♘f6 6.d4

6...♙a7 This position been played many times without the

moves 3...a6 4.Ba4 included... It seems like it is not a big difference, but some nuances are actually playing a big role here.

7.0-0 0-0 As we can see, the game is simple. White is trying to keep his center and Black is trying to destroy it with a direct play.

8.♙g5 Now it is clear that the position is already very forced. The bishop on g5 is really annoying Black a lot... In many of the lines, White can try to make use of the pin.

8...h6 9.♙h4 exd4! After a long think, Andreikin played the best move. [It would be nice for Black to be able to play 9...g5? but it doesn't work...

10.♘xg5 hxg5 11.♙xg5 d6 12.♙xc6 bxc6 13.dxe5 dxe5 14.♙xd8 ♖xd8 15.♙xf6 And White is 2 pawns up;

9...d6 would be the main move without the inclusion of 3...a6 4.Ba4, but now it seems to be super dangerous for Black, although it might still be working... **10.♙xc6 (10.♙d3** With a normal fighting position.) **10...bxc6 11.dxe5** We are entering a very forced line. **11...dxe5 12.♙xd8 ♖xd8 13.♘xe5** It seems like White is just a pawn up and Black doesn't have the usual Ba6 with tempo, but things are still unclear. **13...g5 14.♘xc6** Until here it is easy to calculate, but of course the line is just starting... **14...gxh4 15.♘xd8 ♙d7 16.♘b7 ♖b8 17.♘a5 ♖xb2**

18. ♖c4 ♜e2 19. ♘bd2 I saw the line until here and I thought I should be better somehow, but my evaluation was wrong, as after 19... ♙e6 the position is very very unclear!]

10. ♙c1! A very strong move. White doesn't only want to play e5 next, but he is also protecting against the g5 idea. [The logical 10. cxd4?! would not be the best now because of 10... g5 11. ♖xg5 hxg5 12. ♙xg5 ♙xd4 Black brings his bishop back into the game. 13. ♘c3 b5 14. ♘d5 The position is still very sharp. 14... ♙g7 (14... bxa4? is losing after 15. ♙f3 ♙g7 16. ♙g3 With mate to follow.)]

10...d6 Avoiding the e5 push.

11. ♙xc6 bxc6 12. cxd4 It seems like I reached what I wanted, e5 is still a threat, c6 pawn is hanging and the g5 move doesn't seem to work..

12...g5!! Very strong play from Andreikin one more time. The only way to go in this position. [12... ♙g4 13. e5 dxe5 14. ♖xe5 White is clearly better.]

13. ♖xg5 ♘xe4?! This is already a mistake, Black should have continued with what he started: [13... hxg5 14. ♙xg5+ ♙h7 15. ♜d1 At this moment I thought that I should be better as Black cannot avoid Qxf6 now and the pawn on d4 is not hanging anymore, but my opponent had to find the amazing (15. ♙xf6?! is premature here: ♙xf6 16. ♙xf6 ♙g6 Black wins the d4 pawn and is fine.) 15... ♜b8!! What a crazy move to find! Really inhuman but super strong. Black is attacking the b2 pawn and this is enough to keep the position very unclear.]

14. ♘f3 It is now clear that White is doing better, but the position is still more complicated than it looks like. Black still has the bishop pair and the strong knight on e4 usually gives quite some play.

14... ♙d7 15. ♘c3 It was my turn now not to play the best move. [15. ♙xh6 ♙e6 And after the exchange of queens White might be minimally better, but not more than that.; 15. ♜e1! f5 16. ♘bd2! Exactly! Nbd2 and not Nc3, at which I was looking but I didn't like it because of Qh7. Now Black doesn't have Qh7 anymore because of Qxc6, so White's advantage is quite big.]

15...f5 16. ♙xh6 ♙g7 White cannot avoid going into an endgame.

17. ♙xg7+ ♙xg7 White is a pawn up, but Black is still fighting and I was actually not that sure how much better I was here. I was trying to find a way to get my bishop from h4 to e3, after which I would be doing "clearly better", but this is just impossible to do. After 18. Rfe1 Black has Re8.

18. ♜ac1 The rook will be well placed on the c-line, as anyway it is one Black's main ideas to play c5 as soon as possible.

18...♙b7 I don't like this move personally. I think the black bishop would be much better placed on d7. During the next moves, Andreikin is totally losing control over the game.

19.♘e2 I am trying to get my knight to f4, now we can see that the square e6 is getting weak.

19...♙b6?! [19...f4 was the only logical way to continue, as to let the white knight to f4 is just deadly.]

20.♘f4 ♜fe8 21.♞fd1 It is important to keep both black bishops "under control" and to play d5 next looks pretty tempting.

21...a5 22.d5 c5 [After 22...cxd5 23.♘xd5 ♙xd5 24.♞xd5 White is a pawn up, but Black would still have some chances to fight for a draw.]

23.♘g5! The last important move in the game. All I need to

win the game is to get rid of the knight from e4 to complete happiness. :)

23...♙a6 24.♘fe6+ This is also a nice place for the knight.

24...♞g6 25.♙xe4 fxe4 26.♞c3 And the rook is coming to g3. The game is basically over.

26...♞g8 27.♞g3+ ♙h5

28.♙g5 White wants to play Nf4 next. I think Andreikin could have resigned now, but he decided to keep on playing- no idea why he likes to suffer :)

28...♞g6 The only defence against Nf4.

29.♙d8+ ♙f7 30.♞xg8 ♙xg8 31.♙xc7 And White is 2 pawns up.

31...♙xc7 32.♙xc7 ♞a7 33.♙e8 And the d6 pawn is also falling.

33...♙d3 34.♙xd6 White is 3 pawns up, but Black keeps on playing.

34...♞d7 35.♙f5 ♞b7 36.♞d2 a4 37.a3 c4 38.h4 ♙f8 39.♙h2 ♞b3 40.♙d4

40...c3 Any move is of course winning here, but I wanted to create a beautiful position.

41. dxb3 axb3 42. bxc3 c2 43. Rxd4 b2 44. Rb4 b1=Q 45. Rxb1 cxb1 46. Kg3 White has 5 pawns for a bishop! Amazing.

46...Ke7 47. Kf4 Kd6 48. c4 d3 49. h5 This was even too much for Andreikin. All in all a very interesting game from the opening point of view, but it seems that strangely enough the line is good for Black! **1-0**

(2) Caruana, Fabiano(2796) - Adams, Michael(2740) [C67]

41st GM(3.4), 2013.07.28

[Balogh Csaba]

A high-quality performance by Adams, who punished Caruana for his mistake in the middle game with flawless and spectacular play.

1.e4 e5 2. Nf3 Nc6 3. Bb5 Adams is a big expert of the Spanish opening with both colors. As Black, he almost always goes for the main lines with 3...a6, but this time he caused a little surprise.

3...Nf6 The Berlin defence. In the second round of the tournament, Adams scored another nice win against Andreikin, where he was playing the same opening as White.

4.O-O Nxe4 5.d4 Nd6 6. Bxc6 dxc6 7.dxe5 Nf5 8. Qxd8+ Qxd8 We have reached the starting position of the Berlin endgame.

9.h3 White often prefers this move order to 9.Nc3 nowadays, which gives some additional aggressive options against the Bd7 system.

9...Bd7 This is the sharp handling of the opening, when Black intends to play Kc8. [In the previous round Andreikin played

the rock-solid main line with 9...♔e8 10.♘c3 h5 but Adams has managed to get some advantage later on...]

10.♖d1 ♔c8 11.g4 ♘e7

12.♘g5 This is the point of the 9.h3 start. The g4 pawn is protected and White is able to build up the ideal pawn structure on the kingside with h3-g4-f4-e5. It is clear that in the long term White must try to win the game on the kingside, where he has his extra pawn. On the other hand, his pieces are not developed yet on the queenside, therefore Black can hope to create some quick counterplay with h5.

12...♚e8 13.f4 h5! Black immediately starts to seek counterplay.

14.♔f2 This is Caruana's novelty. White intends to protect the g4 pawn with Kg3 against the Rh4 attack. [He improved his own game against Kramnik from a few month ago, which continued with 14.f5 hxg4 15.hxg4 ♖h4 16.♔f2 ♖xg4 17.♖h1 ♘xf5 18.♖h8 ♚c5+ 19.♔f3 ♖g1 20.♖xe8+ ♔d7 21.♖xa8 ♘d4+ 22.♔e4 ♖xc1 With extreme complications, where despite the extra rook, White is not better. This game was analyzed by Arkadij in the CEWN.]

14...b6! A standard move in this line. Black intends to play Kb7 in order to activate the a8 rook. [Black could not win a pawn by 14...hxg4 15.hxg4 ♖h2+ 16.♔g3 ♖xc2? White

suddenly traps the f8 bishop by

17.♘h7! ♘g6 18.f5+- Winning a piece.]

15.f5 White has achieved what he wanted and Black cannot win the g4 pawn as in the Caruana-Kramnik game. However Adams finds another way to gain counterplay...

15...♔b7 16.♘c3 It was time to develop the queenside pieces.

16...hxg4 17.hxg4 After some thinking, Adams came up with an excellent intuitive decision.

17...♖h2+! 18.♔g3 ♖xc2! Caruana has probably missed this in his preparation. It looks like White is simply winning a piece...

19.♘h7! Quite an unique way of winning a piece.

19...c5!! As easy as that. Black simple gives up his bishop, but he gets his other bishop to c6 and stays ready to give annoying checks on the 2nd rank. White has difficulties with escaping from f8 with the knight. Obviously Adams could not calculate all the following lines, but his feelings told him that he should get enough compensation after all.

20. ♖xf8 ♘c6

21.f6? This turns out to be the decisive mistake, but Black is fine in all the lines.. [

a) 21. ♘g5! was the critical move and it seems to lead to a draw by perpetual check: 21... ♖g2+ 22. ♔f4 (22. ♔h3 loses to 22... ♖xf5! (Not 22... ♖xf8 23. ♘xe7 ♖h8+ 24. ♘h4 saves White.) 23.gxf5 ♖xg5-- and Black wins. The knight is trapped as Rh8 is coming.) 22... ♖f2+ 23. ♔g3 (23. ♔e3 is too risky. 23... ♖f3+ 24. ♔e2 ♖xf5! 25.gxf5 ♖xf5 Black takes a piece back and he is going to have too many pawns for the remaining piece down. 26. ♖h7 (26. ♘e7? ♖xe5+) 26... ♖h8=+) 23... ♖g2+=;

b) On 21. ♖h7 ♖g2+ 22. ♔f4 ♖h8 23. ♖g5 ♖h4-- wins.;

c) 21. ♖d7 is met by 21... ♖g2+ 22. ♔f4 ♖h8 With the ideas of Rh4 or Rh3-f3. 23. ♖d2 White must try to kick out the g2 rook, but it leaves the d7 knight unprotected. (23. ♘e3 23... ♖h4--+) 23... ♖g1 24. ♖d1 ♖xd1 25. ♖xc5+ bxc5 26. ♖xd1 Black is better after 26... ♖d5+ 27. ♔g3 ♖h1=+ White's pieces are poorly placed.]

21... ♖g2+! 22. ♔f4 [22. ♔h3 is met by 22... gxf6 23. ♘h6 (23. exf6? ♖xf8 24. fxe7 ♖h8+--)]

23...f5! Black seems to get a winning advantage. 24.g5 (24.gxf5 ♖xf5--+) 24...f4+ Nf5 is coming next, with the idea of taking on h6 and then on f8.(23. exf6? ♖xf8 24. fxe7 ♖h8+--+) White can hardly prevent it...]

22...gxf6! [Adams could have forced a perpetual by playing 22... ♖f2+ 23. ♔g3 ♖g2+ but he correctly judges his chances and continues playing on!]

23. exf6 [23. ♖h7 leads to nice mates after 23... ♖g6+! 24. ♔f5 (24. ♔e3 ♖h8 25. ♖xf6 ♖h3#) 24... ♖f2+--]

23... ♖f2+ 24. ♔e3 [a) White gets mated after 24. ♔g5 ♖xf8 25. fxe7 ♖g8+ 26. ♔h4

26... ♖g2! With the simple threat of taking on g4. 27. ♘g5

closes the king's route to g5 after (27.♙h6 ♖2xg4+ 28.♚h3 (28.♚h5 ♙f3--+) 28...♙g2+ 29.♚h2 ♙f3 30.♚h3 ♖h8--+ With mate to follow.) 27...♖h8+ 28.♙h6 ♖xh6+ 29.♚g5 ♖g6+--;

b) 24.♚e5? finishes the game quickly as after 24...♖e8! the mate is inevitable.;

c) 24.♚g3 loses to 24...♖xf6 25.♙g5 (25.♘h7 ♖f3+ 26.♚h2 ♖h8--+) 25...♖f3+ 26.♚h4 ♖xf8 27.♙xe7 ♖h8+ 28.♚g5 ♖g8+ 29.♚h4 f6 With the threat of Rh8 mate. White needs to give up his bishop for the f6 pawn, but then he is just lost with material down... 30.♖d8 ♖g7! 31.♙xf6 ♖xf6--+]

24...♖xf6 White's king is facing huge danger in the middle of the board and he should also try to save his knight, which is just too much for him...

25.♘h7 [On 25.♘d7 Black wins after 25...♖f3+ 26.♚e2 ♖e8--+]

25...♖f3+ 26.♚d2 [26.♚e2 Black has several wins here, the easiest is 26...♖h8 27.♘g5 ♖h2+ 28.♚e1

28...♖ff2! With the idea of Rfg2 followed by mate on the 1st rank. 29.♖d2 prevents it, but it drops the a1 rook... 29...♖xd2 30.♙xd2 ♖h1+ 31.♚f2 ♖xa1--+]

26...♖d8+! Adams continues to play with extreme precision! [The tempting 26...♖h8 would have allowed White chances

for survival 27.♖e1! A strong intermediate move, with the idea to play Ng5 next and to have Re2 against the checks...]

27.♚c2 [27.♚e2 transposes to 26.Ke2 27...♖h8--+]

27...♖xc3+! The final point! Black wins back the piece and he ends up with some extra pawns and better pieces.

28.bxc3 ♙a4+ 29.♚b2 ♖xd1--+ The game is over. The rest is only a matter of technique.

30.♙g5 ♘c6 31.♖xd1 [31.♘f6 ♘e5--+ Because of the mate threat with Nc4, White is forced to take on d1, but then he cannot protect the g4 pawn.]

31...♙xd1 32.♙f4 [32.♘f6 ♘e5--+]

32...♙xg4 33.♘f6 Ne8 is coming next. Caruana wins back a pawn with this nice motif, but there will still be too many pawns for Black...

33...♙f3 34.♘e8 ♘a5 35.♘xc7 ♙c6! The knight is trapped. White could have resigned here, but he prolonged it with some moves...

36.♚c2 ♚c8 37.♚d3 ♚d7 38.♚c2 ♘c4 Black wants to play Nd6 in order to trap the knight.

39.♘a6 ♙b7 40.♘b8+ ♚c8 The maneuver did not help and the knight remained trapped.

41. ♖d3 b5 White resigned in view of f6-Ne5. A great game by Adams! **0-1**

(3) Wang, Hao(2752)
- Caruana, Fabiano(2796) [A07]

41st GM(4.3), 2013.07.29

[Balogh Csaba]

Wang Hao scored a very convincing win over Caruana. The game is full of nice ideas.

1. ♘f3 ♘f6 2. g3 d5 3. ♕g2 The Chinese grandmaster wanted to avoid the theoretical struggles and went for the Reti opening.

3...c6 4. O-O ♗g4

5. c4 This is the most ambitious handling of the variation. Another setup is d3, Nbd2 and e4.

5...e6 6. d3 [Earlier this year, Caruana defeated Carlsen with Black after 6. cxd5 ♗xf3 7. ♗xf3 cxd5 8. ♘c3 ♘c6 but this line is considered to be very safe for Black.]

6...dxc4 [6... ♘bd7 is the main move here.]

7. dxc4 ♘bd7 [7... ♔xd1 8. ♖xd1 ♘bd7 is more consequent after taking on c4, but Caruana preferred keeping the queens on the board.]

8. ♘c3 ♔c7 We will see that this move is going to have its drawbacks. [A normal development with 8... ♗e7 and 0-0 was

preferable. In case White plays Bf4, Black could simple react with Qb6 and Rfd8.]

9.h3 White starts to haunt the bishop.

9...♟h5 10.♞h4! A typical move to fight for the bishop pair in connection with g4.

10...♟e7

11.♟f4! A strong positional move, trying to provoke e5 and weaken the f5 square, which the h4 knight is immediately ready to occupy. [As long as Black has not castled kingside, White should better not hurry with 11.g4?! ♟g6 12.♞xg6 hxg6 since suddenly Black might change his mind and castle queenside with a potential kingside attack, thanks to the g4 weakening. There is already a direct threat with Nxg4.]

11...e5 [It would have been more clever to not weaken the f5 square, but it is psychologically difficult to admit the mistake of the Qc7 move... 11...♞b6]

12.♟g5 White threatens to play Nf5.

12...♟g6 Black was forced to give up the bishop without provoking the g4 weakening.

13.♞xg6 hxg6 14.♞c2 White got some edge from the opening, but of course Black's structure is very solid and it needs further achievements to break it.

14...♞c5 15.♞ad1 ♟e6

16.♟c1! It is better to hide the bishop for the future course of the game. Later on, how the game proceeds and the position opens a bit, it might be very useful. [On 16.♟e3 Black can play 16...♟c5! Without the two bishops, White has no advantage.]

16...♞d4 This knight is only temporarily disturbing, since White is going to kick it out by playing e3 soon.

17.♞a4 ♞d7 Caruana further tries to improve his knights and also threatens to harass the queen.

18.♞d2!! I like this kind of moves a lot! Short and strong! :) Wang Hao frees the d1 square for his queen. Later on the c1 bishop is developing to b2, so it is not a problem to close it...

18...♞c5 19.♞d1 a5! Black also plays principally, he works out the c5 outpost for his knight.

20.e3 ♖de6

21.♗d5!! A nice tactical shot! It only temporarily gives a piece, since White wins it back by playing d6, but the important thing is the position opens now and the bishops start to work. Especially the one on g2 becomes much stronger after the c6 pawn disappears from the board.

21...cxd5 22.cxd5 ♖g5 [22...e4 23.dxe6 f5 would have been principled to lock the g2 bishop, however White gets an advantage here as well: 24.b3 ♖xe6 25.♗b2+= Black cannot castle because of Rd7, while the g2 bishop has a strong potential to get improved by Bf1-c4 later on.; 22...♗f8 23.d6 ♗xd6 24.♖xd6+= is also better for White, b3 and Ba3 or Bb2 is coming.]

23.h4! Black cannot keep the piece.

23...♖d6 [23...♗h7 24.d6 ♗xd6 25.♖xd6 O-O 26.b3+= The bishops are going to dominate the knights...; 23...♗ge4 is met by 24.♗xe4 ♖xe4 25.♖a4+!± With an extra pawn after taking on e4.]

24.hxg5 ♗xg5 25.b3! Time to develop the c1 bishop and on a3 it is going to occupy an excellent place.

25...♗d7 Caruana makes a prophylactic move against Ba3. On b2 the bishop would be much less annoying.

26.a4! A great move in connection with the next move!

26...O-O

27.♖a2!! Just brilliant how Wang Hao uses this rook. Another subtle move after Rd2! The bishop is going to a3 now! Karpov was the expert of such moves!

27...♗c5 28.♗a3 ♗e7 [Caruana wanted to avoid playing this move. He wanted to use the b6 square with the queen for potential counterplay against the b3 pawn, but it was too optimistic. 28...b6 White is better anyway after 29.♖c2 followed by the same moves as in the game.]

29.♖c2 ♖ac8 30.♖e2! The queen is heading to b5!

30...♖b6 [30...b6 31.♖b5+= The position is getting more and more unpleasant for Black.]

31.♖fc1 ♗d6 White already has a big advantage, but Wang Hao finds another fantastic plan to convert it into a full point.

32. ♕g4! A multifunctional move! We will see its ideas soon.

32... ♖a7 Black is forced to retreat in order to strengthen the c5 knight by playing b6. [32... ♖c7 was definitely Black's intention before, to double the rooks and leave from c5 with the knight, but with his last move White has created a nice trap...

33. b4! axb4 34. ♕xb4 35. ♕xb4 b6 (35... ♖fc8 loses to 36. ♕a5! ♖e7 37. ♕b6+-) 36. a5+- wins.]

33. ♕f3!! Here comes the second idea behind Qg4! White suddenly has a mating attack after Kg2, Rh1 and Qh3! It seems to take a lot of time, but Black's pieces are pinned and he cannot properly defend against it.

33... b6 34. ♖g2! Everything goes like Wang Hao expected!

34... ♖fe8 Caruana finds no other way to defend than to free the route of the king to e7, but of course it cannot bring anything good for him. The main problem is that he can never play f5 and Kf7, because the g6 pawn is hanging.

35. ♖h1 ♕e7 [35... e4 does not change anything. 36. ♕e2+-]

36. e4! A cool preparation move before the final blow! [After the direct 36. ♕h3 Black could have played 36... f5 The g6 pawn is finally not hanging anymore. 37. ♕h7+ ♖f7 38. ♖h6 ♕f6 And Black can defend. However after e4, all these things are impossible for Black.]

36... ♗d7 A blunder, but it was over anyway. [For instance after 36... ♖c7 White wins after 37. ♕h3 f6 (37... f5 38. exf5+-) 38. ♕h7+ ♖f7

White has many winning moves, but the nicest one is definitely 39. ♕xg6+! ♖xg6 40. ♗h5+ ♔g5 (40... ♕h7 41. ♗f7#) 41. ♗c1# With a spectacular mate!]

37. ♖xc8 ♖xc8 38. ♗h3 f5 39. ♗xd6 [Black resigned in view of 39. ♗xd6 39... ♗xd6 40. ♗h8+ ♔f7 41. ♗xc8 A fantastic positional crush by the strongest Chinese player! We can see that it is possible to win great games even without going for the long theoretical main lines. It is more important to make strong moves in the middle game and endgame.] **1-0**

(4) Moiseenko, Alexander(2699) - Vachier-Lagrave, Maxime(2719) [D85]

Breisacher Memorial(9.3), 2013.07.31

[Arkadij Naiditsch]

A nice "start-to-finish" win by Moiseenko in the Gruenfeld, where we can say that Vachier-Lagrave is one of the biggest experts in the world.

1.d4 ♘f6 2.c4 g6 3. ♘c3 d5 4.cxd5 ♘xd5 5.e4 The very "main" line of the Gruenfeld.

5... ♘xc3 6.bxc3 ♗g7

7. ♗a4+!? Moiseenko is trying a sideline. At first view, 7. ♗a4 just looks shocking. Can such a move really be good?! What I can say for sure is that this move is an interesting one. The main idea is to get the black knight to play Nd7, after which the global idea of Black in Gruenfeld, to play c5 followed by Nc6, is not possible anymore.

7... ♗d7 8. ♗b3 White is of course avoiding any endgames. To reach an endgame is the dream of any Gruenfeld player.

8...O-O 9. ♗e3 White is preparing against Black's c5 move.

9...b6 A very usual way of developping. [But maybe 9...c5 immediately would have been a better option.]

10. ♘f3 ♙b7 11. ♙d3 c5 12. O-O White managed to keep a solid center, which is already an achievement, but Black is well developed, so we can expect a complicated game.

12...cxd4 Also a very "typical" play by Black against the white center.

13.cxd4 ♘c6 The pawn on d4 is hanging.

14. ♙b5! A nice move by White. Could it be that Moiseenko has prepared everything until here?!

14...a6 White wanted to push d5.

15. ♙e2 b5 If Black had a few more "free moves" like Rac8, Rfd8 and Na5-Nc4, his position would be perfectly fine. So White needs to act fast.

16.d5! It is hard to say whether White is better, but what is sure is that White is playing the right plan.

16...♘e5?! Giving White a very important tempo. [16...♘a5! had to be played. 17. ♙b4 ♘c4 And White might be better, but the game stays pretty unclear.]

17. ♘d4! A nice move. White is totally dominating the center.

17...♖fc8 Black tries to get the knight to c4.

18.a4! Another great move by White. It is important to get the c4 square under control.

18...♘c4 Black sacrifices a pawn in order to try and make a draw. [Of course after 18...bxa4 19. ♖xa4 White would totally dominate the game.]

19.axb5 The next moves are pretty forced.

19...axb5 20. ♖xa8 ♖xa8 21. ♙xc4 bxc4 22. ♙xc4 So White is a pawn up, but Black's chances to make a draw are not that bad. The bishop pair plus a limited number of pawns are keeping Black's hopes up. The big danger is the horrible bishop on b7. If Black manages to solve this problem, the position should be close to equal.

22...♖c8? This is a serious mistake. [The best way to fight for a draw was to play 22...♖a4 23. ♙c5 e6! Activating the bishop from b7. 24.d6 e5 And of course White is better, but maybe Black has some chances to escape.]

23. ♙a2 [Maybe even safer was 23. ♙b3]

23...♙xd4 24. ♙xd4 e6 Black is winning a pawn but the dark squares are very weak.

25.♘a1! A strong move by White, who is building a "battery" on the dark squares.

25...exd5 26.♙b2 With a little mating threat.

26...d4 27.f3! This is exactly the way how to play such positions. Now in case White will managed to somehow get the d4 pawn without exchanging the queens, it would mean "game over".

27...♖d8 28.♙b6 Another good move by White. All black pieces are somehow pinned and White wants to play Rd1 next.

28...♙e7 29.♖d1 There is no hurry with the pawn on d4 anymore.

29...f5 Black tries to "break free", which is maybe the best practical chance, but of course the position of the black king is now also getting very weak. [Black can never run away with 29...d3 because of the deadly 30.♙b2]

30.exf5 ♖d6 Getting rid of the nasty queen on b6.

31.♙b3+ ♘d5 32.♙b8+ [32.♙b4 was also strong.]

32...♖d8 33.♙g3 ♘f7 34.♙f2 There is no way for Black to save the d4 pawn.

34...♘b3 This move is losing more quickly. [34...gxf5 35.♘xd4 would probably lead to a winning position for White, although

Black would keep some theoretical chances for a draw because of the opposite colored bishops.]

35.♖e1 With tempo.

35...♙d6 36.fxg6 hxg6

37.h3 A good and safe move by White. As we know, Black can never play d3 because of Qb2, so White has enough time to play a few "comfortable" moves before going into the final action.

37...♙f4 38.♖e4 ♙c1+ 39.♖e1 ♙f4 White repeats the moves because of small time trouble.

40.♘b2 And play his 40th move...

40...d3? Black blunders in a lost position.

41.♙b6 White a nice finish of a great positional game by Moiseenko! **1-0**

Endgame section

(15) Fridman, D.(2629)-Adams, M.(2740)

Dortmund, 2013.07.26

[CE Team]

The following game shows us some important theoretical endgame positions... Black has an extra pawn and threatens to collect the h3 pawn with Rg3. White has to take direct measures.

40. ♖c4! g5 41. ♖g4 Fridman was familiar with the arising theoretical pawn endgame, so he forces the trade of the rooks. [41.f4!? was another option to force a draw. 41... ♖g3+ 42. ♕f2 f6 (42... gxf4 43. ♖xf4 ♖xh3 44. ♕g2 White wins the h4 pawn and achieves a draw. Even without winning it, the f- and h-pawn is theoretically drawn in rook endgames. We have already examined in the previous issues how the defensive side needs to hold it.) 43.fxg5 fxg5

The following defensive idea is important. Black wants to protect the g5 pawn with the king and then the h3 falls, but White plays 44.Rc5 Kf7 45.Rf5! Kg6 46.Rf3= Getting the same pawn endgame that we will discuss in the game.]

41...Rg3!? 42.Kf2! The only move! Otherwise Black would have played f5 and the h3 pawn would have fallen. White could also not take on g3, since Black would have been in time to protect the passed pawn by playing f5-f4. [42.Kf4? f6 is also over, as the h3 pawn is falling next.]

42...Rxf4 [42...Rxf3 43.Rxf5 White holds the draw without difficulties.]

43.fxf4 This is the important position and the reason we are analysing this game. It is very useful to remember! White holds the draw here without any serious efforts.

43...Ke7 44.Kf3 Kd6 45.Kf4 Keeping the opposition does not matter here. This is even a more precise option, depriving Black from his extra possibility... [On 45.Kd4 Black could try the breakthrough with

45...f5!? 46.gxf5 g4! White is forced to catch the h-pawn, but it allows Black to create a protected passed pawn on g3. 47.Kf3 g3 48.Kf3 Ke5 49.Kg2 Kxf5

This is another very important theoretical position we can meet in many games... 50.Kf3 Ke5 51.Kg2 Ke4 52.Kg1 Ke3 (52...Kf3 53.Kf1 (53.Kh1 is also good, because Kf2 is a stalemate.) 53...g2+ 54.Kg1 Kg3 Stalemate.) 53.Kf1 Kf3 54.Kg1 And now after 54...g2 55.Kh2 Kf2 we again have a stalemate. It is important that this idea only works if we have h- vs h- and g-pawns on the board.]

45...f6 [45...♔e6 Fridman's point of not taking the opposition in the previous move was that after 46.♔d4 Black does not have the breakthrough with f5-g4, because White takes with check.]

46.♔f5 ♔e7 47.♔e4 ♔e6 48.♔d4 f5 There was no other way to proceed.

49.gxf5+ ♔xf5

50.♔e3 g4 [Taking the opposition does not bring anything... 50...♔e5 51.♔f3 ♔f5 52.♔e3=]

51.hxg4+ ♔xg4 52.♔f2 And the draw is inevitable. Adams decided to finish the game in style with a stalemate.

52...h3 53.♔g1 ♔g3 54.♔h1 h2 1/2-1/2

(16) Vachier-Lagrave, Maxime(2719)- Nepomniachtchi, Ian(2717)

Breisacher Memorial(7.3), 2013.07.29
[CE Team]

Is this a winning or a drawn position? Maxime will give us the answer...

54.♖c6! The most easy winning line. White is going for the f5 pawn.

54...♔b7 Black doesn't have too many ideas... To get the king out from the 8th rank is in any case a good idea.

55.♖f6 ♖a2+ Black is trying to get the rook to attack from behind.

56.♔g3 ♖a1

57.♖xf5! A good calculation by White. We are entering a well

known winning endgame.

57...♖g1+ 58.♔f3 ♜xg6 To collect the d4 pawn is not a bad idea either. Black now has 2 choices:

59.♜d5 ♔c7 [After 59...♔c6 60.♜xd4 ♜g8 White is winning with 61.f5! and Black has no saving idea with Rd8!]

60.♜xd4 ♜g8 Rg8 is always an important move to give front checks and to have the Rd8 move.

61.♔e4! [It would be a terrible mistake to play 61.f5?? as 61...♜d8! followed by Kd7, Re8 and Ke7 is a draw.]

61...♔c6 If Black could go to c5 with his king the position would be a draw, but this is impossible.

62.♔e5! The most simple.

62...♜e8+ 63.♔f6 ♔c5 [63...♜f8+ 64.♔g7 ♜f5 65.♔g6 ♜f8 66.f5 White is winning.]

64.♜d7! Black cannot stop the white f-pawn from promoting.

64...♔c6 65.♜e7 ♜f8+ 66.♔e5 Followed by f5-f6-f7. A very nice technical play by the Super GM from France. **1-0**

Clash of the Titans

(17) Gunsberg, Isidor-Steinitz, William[D05]

World Championship 03rd(6), 1890.12.20

[Kamil Miton]

For this issue I decided to comment a game of Steinitz, who was the first official World Champion. We should note that he was a very creative player and used great strategical ideas. This was very important for the development of chess.

1.d4 d5 2.e3 e6 At this time, the opening was not the most important part of the game.

3.♘d3 c5 Steinitz tries to fight for the center first.

4.b3

4...♘c6 5.♘f3 ♘f6 6.O-O ♘d7 It looks bit artificial but I suppose that Steinitz is waiting for White to take on c5 to not lose a tempo. More natural is [6...♘d6 7.♘b2 O-O 8.♘bd2 (8.♘e5 With the thematic plan Nd2-f4-Rf3-Rh3. 8...♘e7!? An interesting answer. Now Black's idea is to play b6-Bb7 and when White will push f4 then he will jump with to e4 with the knight.) 8...♜e7 With the idea e5. 9.c4 (9.dxc5!? ♘xc5 10.e4+=)]

7. ♖b2 ♜c8

Black's idea is to play cxd4 and after exd4 play Nb4 to exchange this important bishop.

8.c3?! Too passive. White shows that he is not going to fight for the center. The correct move was [8.a3 Followed by Nbd2-Qe2-dxc5-c4-b4 and White has good chances to get a better position.]

8...♗d6 9.♘bd2 e5 10.dxe5 White had the following alternative: [10.dxc5 ♗xc5 11.b4 With the idea to come to Slav structures with different colors. 11...♗d6 (11...e4 12.bxc5 exd3) 12.e4]]

10...♗xe5 11.♘xe5 ♗xe5 12.♘f3 ♗b8 13.h3 White is afraid of the Bg4-Qd6 plan, but it was better to play [13.c4 dxc4 (13...♗g4 14.h3 dxc4 (14...♗h5 15.♗f5±) 15.♗xc4 ♖xd1 16.♖fxd1 ♗xf3 17.gxf3 ♖e7 18.f4± This endgame is very pleasant for White thanks to the bishop pair.) 14.♗xc4 ♗c6 (14...b5 seems logical in order to chase the bishop from the active diagonal. 15.♗e2 ♖e7 (15...O-O 16.♗xf6 gxf6 17.♖c2+= With the idea Nh4-g3.) 16.♖c1 It is not easy for Black to finish his development. White keeps the initiative. 16...♖d8 17.♖c2 ♗d6 18.♖fd1) 15.♗e5 ♗xe5 16.♗xe5 O-O]

13...c4! A nice idea, which is now of course very well-known. Black doesn't care about the d4 square because the limited bishop on b2 is more important.

14.♗c2 O-O 15.♖d4 It was safer to put the queen on e2. White also had the idea to get rid of the weak bishop after [15.bxc4 15...dxc4 (15...♖xc4∞) 16.♗a3! ♖e8 17.♗d6 ♗xd6 18.♖xd6 ♖a5 19.♖fc1∞]

15...♖e8 16.♖ad1 b5 17.b4?! White had not reasons to deprive himself from potential possibilities of activating the bishop over the a3 square.

17...♖c7 18.♖fe1 ♖e7 Black's position is better because White has less space, a limited bishop on b2 and no plan. [18...♖e4!?

19.♖f1 The white king escapes from threats the h2 square, but White's position is very unpleasant.

19...♖ce8

20.♖h4 We see that White is trying to do something, but

the queen on is placed very riskily on h4. Objectively Black is better but the position in the center is closed and Black needs to improve the position on the kingside or just change the structure somehow.

20...♔d6!? The idea of this move is to provoke White to push e4 and open the position a little bit more.

21.♖d4 [21.e4 ♔a6! (21...♗xe4 22.♕xe4 ♖xe4 23.♖xe4 ♖xe4 24.♔h5 Ng5 is now a threat and the pawn on d5 is hanging. 24...♖e7 25.♔xd5 ♔xd5 26.♖xd5 f6 (26...♕f4 Preventing Bc1.) 27.♗d4 a6 28.a4↗) 22.e5 ♕xe5 23.♗xe5 ♖xe5 White gives a pawn with the idea of looking for counterplay over the dark squares. 24.♖xe5 ♖xe5 25.♕b1 With the idea Bc1-Be3. 25...♕f5 26.f4 ♖e4 27.♕xe4 ♕xe4 Black has good compensation.]

21...♔c6 22.♖ed1

22...♕e5!? I don't think that this was a blunder! I suppose Steinitz sacrificed the central pawn to open the h1-a8 diagonal for his pieces. [22...h6=+]

23.♖xd5 [23.♗xe5!? ♖xe5 24.♕c1 Followed by f3. 24...♕f5 25.♕xf5 ♖xf5 26.f3 And White looks not bad compared to the position he had a few moves earlier.]

23...♕b8 24.a4 [24.♖c5 ♔b7 (24...♔b6) 25.♕xh7+

interesting trick. 25...♗xh7 26.♖h5 ♖e4 (26...♔e4 27.♔xe4 ♖xe4 28.♖xh7! ♔xh7 29.♗g5+ ♔g6 30.♗xe4 ♕xh3 31.gxh3 ♖xe4 32.♖d7+=) 27.g4 And now comes an inhuman drawish line: 27...g5

28.♗xg5 ♖xe3 29.fxg3 ♔h1+ 30.♔e2 ♖xe3+ 31.♔xe3 ♔xd1 White is probably not able to avoid perpetual check with Qd3-Qc2.]

24...a6 25.a5? A big mistake. White missed a good chance: [25.♖g5! Black will have problems to get rid of the active rook from g5 because h6 and Kh8 doesn't work and after 25...♗e4 White has (25...♔h8 26.♕xh7) 26.axb5 axb5 27.♗e5! A nice trick. 27...♖xe5 28.♖xe5 ♗g3+ 29.fxg3 ♕xe5 30.♔xh7+ ♔f8∞]

25...h6! Easy but strong. The white rook doesn't have enough

space on the 5th rank now.

26.♖5d4 [26.♖c5 ♜b7 Followed by Ba7.]

26...♜b7 27.♘e1?! Very passive. White should look for chances after a more practical move like [27.e4 White's idea is to improve the bishop after Bc1 or to exchange some pieces after possibly losing the e4 pawn. 27...♙c6 28.♙c1 ♙xe4 (28...♘xe4 29.♖d8 ♘xc3 (29...♙c7 30.♜xe7 ♙xd8 31.♜xd8! ♖xd8 32.♖xd8+ ♙h7 33.♘e5⇒) 30.♙xh6! ♙xf3 31.♙h7+ ♙xh7 32.♙xg7+ ♙xg7 33.♜g5+ With a draw.) 29.♙xe4 ♘xe4 30.♜g4 (30.♙xh6 gxf6 31.♜xh6 ♖e6—+) 30...♜c6 31.♖d8 White is worse but at least he has some play.]

27...♙e5 28.♖4d2 ♙c7 To now allow Rd8 after Bc6.

29.♖e2

29...♖e5! White now has to solve problems with the queen. Rh5 is the threat.

30.f3 White has to give the pawn to escape with the queen.

30...♖xe3 31.♖xe3 ♖xe3 32.♙c1 ♖e5 [32...♖xc3 33.♙xh6⇒; 32...♖e6=+]]

33.♜f2?! It was more logical to play [33.♙f4 exchanging the dark squared bishops should be good for White. 33...♖e6 34.♙f5!? (34.♙xc7 ♜xc7=+ XKf1 XNe1) 34...♖xe1+ 35.♜xe1 ♙xf5 (35...♙xf4 36.♜e7+—) 36.♜e7 ♙d3+ (36...♘d5 37.♜e8+

(37.♖xd5 ♜xd5 38.♙xc7 ♜d3+ 39.♙g1 ♜xc3 Black is a pawn up but because of the opposite colored bishops White has drawing chances.) 37...♙h7 38.♜xf7 And now comes a nice and long forced variation: 38...♙d3+ 39.♖xd3 cxd3 40.♙e5 ♘e3+ 41.♙g1 ♙xe5 42.♜xb7 d2

43.♜e4+ g6 Otherwise White has perpetual check. (43...♙g8 44.♜a8+ ♙f7 45.♜b7+ ♙f6 46.♜c6+ but not 46...♙g5?? 47.h4+ ♙h5 48.♜e8+ ♙xh4 49.♜d8+—) 44.♜xe5 d1=♜+ 45.♙h2 ♘f5 46.♜c7+ ♘g7 47.♜b6 And Black will have to give perpetual check because of the strong passed a-pawn.) 37.♖xd3 cxd3 38.♜xc7 ♜xc7 39.♙xc7 ♘d5 40.♙b6 (40.♙d6 d2 41.♙e2 ♘e3! Black is winning. 42.♙xd2 ♘c4+ 43.♙d3 ♘xd6 44.♙d4 ♙f8 45.♙c5 ♙e7 46.♙b6 ♙d7 47.♙xa6 ♙c7—+) 40...♘xc3 41.♙e1 ♘d5 42.♙c5 ♘f4 43.♙d2 With hope to get counterplay against the a6 pawn.]

33...♜c6 34.♙e3 ♖e8 35.♜d2 [35.♙b1 With the idea Nc2-Nd4. 35...♘h5 36.♘c2 ♘g3+ 37.♙g1 ♙f5 38.♘d4 ♜d6! 39.f4 ♙xb1 40.♜xg3 ♙d3+]]

35...♜e6 The black queen comes closer to the white king. All black pieces are ready to crush the weak white king and the game will end very quickly.

36. ♖d4 ♜h5 37. ♙f2 ♙c6 38. ♙b1 ♚e5 39. ♞c2

39... ♙xf3! 40. gxf3 ♚h2 41. ♚d7 ♚h1+ 42. ♙g1 ♚xf3+
43. ♙f2 ♞g3+ 0-1

Editorial Preface

A lot of events came to an end during the past week.

The Dortmund Supertournament was won by Michael Adams with an amazing result of 7/9 points. Second place went to Kramnik with another great score of 6.5/9 and the 3rd place went to your commentator Arkadij Naiditsch with 4.5 points.

The Biel Festival had 4 winners, Bacrot, Moiseenko, Vachier Lagrave and Ding, so they had to play an additional tiebreak. The young Frenchman Vachier Lagrave became the deserved winner, 2nd place went to Moiseenko and 3rd to Bacrot.

Hoang Thanh Tran from Hungary is the new Women's European Champion, with the amazing score of 9/11 and a full point ahead of Melia Salome and Lilit Mkrtchian, who completed the podium, both with 8/11. Already this Sunday the World Cup is starting in Tromso, with almost all top players participating in it. It is going to be a very exciting K.O event!

As usual, we are commenting the top games from the past week. Enjoy!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Naiditsch, Arkadij(2710)
- **Khenkin, Igor(2605) [B12]**

41st GM(9.2), 2013.08.04

[Arkadij Naiditsch]

We are in the last round of the "Dortmunder Schachtage" and it has been a tournament with a lot of ups and downs for me, so I of course wanted to finish with a win, especially against the lowest rated player in the tournament, Igor Khenkin. A game against Khenkin is never an easy one and this is not because of his chess, but the reason is his behavior during the game, which is quite "critical" and usually very unpleasant.

1.e4 c6 2.d4 d5 3.e5 c5 Khenkin always plays the Caro-Kann and usually only the line with 3...c5, so I had enough time to be well prepared for the game.

4.♘f3 cxd4 [In a lot of his previous games Khenkin tried 4...♙g4 5.dxc5 ♘c6 6.c3! and if we follow the game Almasi-Khenkin, White just seems to be better.]

5.♙xd4 ♘c6

6.c4!? A nice and dynamic try to immediately put Black under pressure.

6...e6 The main move. [6...♘xe5 7.cxd5 leads to a clearly better position for White.]

7.♘c3 ♙c5 [After 7...♙b4 8.♘xc6 bxc6 9.♙a4 White has a slightly more pleasant position.]

8.♘xc6 bxc6 9.cxd5 cxd5 [Of course not 9...exd5?! 10.♙d3 With the main idea of playing Qc2-Na4 and creating pressure against the c6 pawn.]

10.b4! N A great novelty found by my second Csaba Balogh, who you of course know very well as your CEWN writer. It is always good to have somebody who helps you during the tournament who you can completely trust and Csaba is a great player as well, with a lot of different opening ideas and deep understanding of chess.

10...♙b6 The most critical answer. [10...♙e7 is of course a possible reply, but this can't be Black's idea. Now the knight on g8 is blocked and White has more space.]

11.♘b5 ♙c7? What a big positional mistake and Khenkin played this move quite quickly and confidently, which surprised me a lot. Now it is clear that White is going to have a much better position. [The only option was to play 11...♙h4 12.♘d6+ ♙e7 13.♙d2 With a very complex position.]

12.♙b2 I was of course tempted to immediately play 12.Nxc7

but then I thought that this option will probably not run away. The only available square for the black bishop is on b8, which doesn't look great, so maybe I can even get more than just a solid plus, as it is the case after 12.Nxc7.

12...♞e7 13.♙d3 Not allowing Black to castle because of Qc2, with a double attack on c7 and on h7.

13...a6?! After this move my position is just perfect. [13...♙b8 would have been a better try to at least keep theoretical chances to come back into the game. 14.O-O White's position is of course much better and a plan like f4-Nd4 would be an easy way to go on, but Black is still fighting here.]

14.♞xc7+ ♚xc7

15.O-O ♙d7 Before playing 16.Qg4 I had a long thought. I had to make my "winning" plan and I really had a lot of tempting options here. It is clear that Black's only chance for escape is to play Bb5 somewhere. White's idea is simple: put something on d4 and go on by playing a4-b5 in order to create a free pawn.

16.♚g4! A precise move, not giving Black any hopes.

16...O-O Nothing else to do.

17.♞fc1 It is very useful for White to keep the rook on a1 in order to be able to play a4 in the future. [I should of course

not get greedy: 17.♙xh7+?! 17...♚xh7 18.♚h4+ ♚g8 19.♚xe7 ♚c2 And Black would have good chances to escape because of the active queen.]

17...♚d8 [After 17...♚b7 18.♙xh7+ is already a much better version for White. 18...♚xh7 19.♚h4+ ♚g8 20.♚xe7 And White is a full pawn up.]

18.a4 I made my dreams come true. Black was not in time for Bb5 and all my pieces are very well placed.

18...♞g6 It is not an easy task to find a move for Black and the knight on g6 is completely out of the game. He should be standing on c6.

19.♞c5 The white rook is going to a very sweet place on a5.

19...♚b8 20.♚d4 ♞c8 In this position, I played almost without thinking

21.♞a5? Very logical and the most simple, but I missed a win in one move! [21.♞xd5! would have ended my suffering of sitting in front of Khenkin on the spot! 21...exd5 22.e6 ♞e5 23.exd7! And the game would be over.]

21...♚b7 22.g3 I could of course have played b5 immediately, but there was no reason to hurry and a safety hole is never wrong, as well as cutting all possible movements of the black knight.

22...h6 23.b5 finally

23...axb5 24.axb5 ♖xa5 25.♖xa5

25...♖a8 It seems like White's position is totally winning, but some precise moves are still needed.

26.♖a6?! Not the best move. [The simple 26.♖xa8+ 26...♔xa8 27.♔b4 would have ended the game very soon. White's next move is Qd6 or b6 or even Ba3. Black is totally paralyzed.]

26...♔c8 27.h4 I still had the chance to play Rxa8 but somehow a move like 27.h4 looked very "pretty" to me.

27...♖b8 28.b6 It looks like my next move Ra7 should simply be killing.

28...♔c6?! [28...♔d8! was the right move to play and funnily enough, Black is getting some chances for escape! 29.h5 ♖e7 The knight is now getting the c6 square. 30.♔c5 ♖c6 31.♔d6 And White is of course still much better, but Black's position is not lost.]

29.♖a7 ♕e8 30.♖a6 I decided to go back as I saw the line below. [30.♕a3 ♖xb6 Black doesn't have anything better. 31.♕xg6 fxg6 32.♔f4 ♖b7 33.♖xb7 ♔xb7 34.♔f8+ ♔h7 35.♔xe8 ♔b1+ 36.♔h2 ♔e1 37.♕c5 ♔xe5 And White is of course winning here, but I thought that maybe the win would

still require some minimal technique here. I wanted to finish my game in a more dynamic way.]

30...♕d7 Black has nothing better than to repeat the moves.

31.h5 So this is the other way.

31...♖f8 32.♕a3 By now, I had of course seen the little trick that we will see in just a couple of moves.

32...♕c8 Black needs to go for the b6 pawn.

33.♖a7 ♔xb6 [After 33...♖xb6 34.♖xf7! would end the game in a similar way.]

34.♖xf7! A pretty move, but not the only one. [34.♔xb6 ♖xb6 35.♖a8 ♖c6 36.♕b5 ♖c3 37.♕xf8 ♔xf8 38.♕a6 would lead to a position where White is a piece up.]

34...♔xf7 [34...♔xd4 35.♖xf8# What a nice mate! :)]

35.♔f4+ ♔e8 36.♔xf8+ ♔d7 37.♕b5+ This was a nice finish of a very fighting tournament for me! **1-0**

(2) Andreikin, Dmitry(2727) - Kramnik, Vladimir(2784) [D30]

41st GM(7.5), 2013.08.02

[Balogh Csaba]

Adams and Kramnik were marching head to head in Dortmund. They both scored 5 points from the first 6 rounds, when surprisingly Dmitry Andreikin, who had a terrible start at the tournament, scored a really nice and convincing victory!

1.d4 ♟f6 **2.c4** e6 **3.♘f3** d5

4.♙g5 A relatively rare move, compared to the main 4.Nc3 or 4.g3 transposing to the Catalan opening.

4...h6 **5.♙xf6** ♚xf6 **6.♘bd2** Here again 6.Nc3 is the main move. Somehow Kramnik mixed up some lines and reacted very badly...

6...g6? This is a common move in different kind of e3 systems, but here White can make use of the spared tempo and he can play e2-e4 in one move later on. [6...♘d7 or; 6...♙e7 are the moves, which are considered to be completely playable for Black.]

7.♚b3! **dxc4** [7...c6 is also met by 8.e4! dxe4 9.♘xe4 ♚e7

10.c5! And Black has problems with the d6 square, he is not in time to finish the development with Bg7 and 0-0.]

8.♚xc4! This is even stronger than to take back with the knight. White provokes a huge weakening by attacking the c7 pawn.

8...♚e7 **9.♚c1!** Black has nothing better than to play c6, but this crucially weakens the d6 square. White will make use of it by playing e4-e5 and Ne4-d6.

9...c6 [9...♘a6 The knight is misplaced here. 10.e4 ♙g7 11.♚c3! With the threat of Bxa6 and Qxc7. Black is already in trouble.]

10.e4! Energetic play by Andreikin. It is very difficult to catch Kramnik in the opening so badly. White already has a big

advantage and we are only in move 10.

10...♘g7 11.e5! O-O 12.♘d3! White develops his pieces to the most natural squares. Black has a cramped position and he is lacking space. Both bishops are closed. The only way to jump out could be a freeing break with b6, Bb7 and c5, but White takes some subtle measures against it.

12...b6 13.O-O ♖d8 Black sets up the trick of c5 and Ba6, but White can easily parry this. [The bishops trade does not change the evaluation: 13...♘a6 14.♙b3 ♘xd3 15.♙xd3 Black ends up with his weak c6 pawn, the locked bishop on g7 and he cannot develop his knight. White is ready to occupy to the d6 square with the d2 knight.]

14.♙b3! A clever move! White removes the queen from the danger zone.

14...♘b7

15.♘e4! A nice prophylactic move against Nd7, Rac8 and c5. Black is unable to finish the development now, while the d2 knight is still ready to occupy the d6 square, but it goes from the direction of c4.

15...♖d7 What a sad decision! Black is completely out of moves. He tries to break out with c5.

16.♖fd1! I like this kind of games, where one side increases

his advantage only by always slightly improving his pieces. White prepares for the opening of the game and the rook will be excellently placed on the d-file after c5.

16...c5 17.dxc5 bxc5

18.♙a4! White really enjoys that the black pieces are immobile and he further prevents the development of the b8 knight by taking the a6 and c6 squares under control.

18...♖d8 19.♘b3 [19.♖xc5!? was a nice tactical possibility to win a pawn. The text move is also perfectly good.]

19...♘a6

20.♖d6! Using the fact that the rook cannot be taken since after exd6 the b7 pawn falls. The a6 pawn is under attack, which forces Black to give up his c-pawn.

20...♙xe4 21.♚xe4 ♖xd6 Kramnik tries to complicate the matters by finally opening the diagonal of the bishop, but at the cost of a strong passed pawn. [21...♘c7 22.♖xd8+ ♖xd8 23.♘xc5 ♘d5± This knight on d5 is big achievement, but it is still not enough compensation for the pawn. The bishop remains poor, while White can go for trading the knight by playing Nd3-f4 for instance.]

22.exd6 ♚f8 The rook had to be protected.

23.♚b7! ♘b4 24.d7 [24.♖xc5 was even stronger. The knight on b4 is hanging and after different kind of moves White has a nice queen sacrifice: 24...♖b8 (24...♘a2 25.♚xa8! ♚xa8 26.d7+—) 25.♚xb8! ♚xb8 26.d7 Rc8 is coming next with a winning advantage.]

24...♘d3 25.♖d1 c4? This is the decisive mistake. The position already looked lost, but the computer finds some counterplay to play on. [Not 25...♘xb2? 26.♚xa8 ♚xa8 27.d8=♚+; 25...♖d8! was the only chance! 26.♖xd3 c4 27.♖d2 cxb3 28.♚xb3 ♚c5 And Black might hope for some practical chances, but they should not be real in case of good play by White. 29.g3±]

26.♘a5+— With the double threat of taking on c4 and playing Nc6. The game is over now.

26...♖d8 27.♘c6 ♚c5 A desperate attempt, but there is no serious threat, White can simply collect the material.

28.♘xd8 ♚xf2+ 29.♚h1 ♘d4 A last cheapo! Black threatens to play Qg1 followed by Nf2 mate, but of course on this level such things don't really work...

30.h3! As simple as that.

30...♚e3 All moves are winning from now on.

31.♘xf7 ♘b6 [31...♘f2+ 32.♚h2 ♚f4+ 33.g3+— Black doesn't have any more checks.]

32.♘7e5 ♘f2+ 33.♚h2 ♘xd1 Kramnik resigned when he saw the mate in 3 after d8Q and Qf7-Nxg6. A great game by Andreikin, who have already beaten Kramnik at the Tal memorial 2 months ago, there with the black pieces. **1-0**

(3) Vachier-Lagrave, Maxime(2719) - Moiseenko, Alexander(2699) [B30]

Breisacher Memorial Playoff(2.1), 2013.08.02

[Balogh Csaba]

After four players tied for first place in Biel, a rapid tiebreak had to decide of the winner. In the final match, the rapid expert Vachier-Lagrave scored the following nice win and took home the trophy!

1.e4 c5 2.♘f3 ♘c6 3.c3 Vachier-Lagrave avoids the Sveshnikov defence by transposing to the c3 Sicilian.

3...d5 [In their encounter in the normal part of the tournament Moiseenko had played another main line: 3...♘f6 4.e5 ♘d5 5.♙c4 e6 6.d4 cxd4 7.cxd4 d6 but he ended up in lost position and only a terrible blunder by White allowed him to save the game. This time he decided to go for another variation.]

4.exd5 ♙xd5 5.d4

5...♙f5 A very sharp and new idea, which became popular only recently. The main idea is a quick attack against the center with e5 and 0-0-0. If White is not familiar with the ideas, he might quickly collapse.

6.♙e3 [6.♘a3 is a common move, but then Black achieves what he wants after 6...cxd4 7.♘b5 O-O-O 8.cxd4 e5! With an attack!]

6...♘f6 [6...cxd4 is a risky option for Black, since after 7.♘xd4 ♘xd4 8.cxd4 White threatens to play Nc3 followed by Bb5, and after 8...♙xb1 9.♙a4+! forces the king to move, since both queen moves would run into Bb5. 9...♙d8 10.♙xb1+=]

7.♘a3 Vachier played very quickly, he was definitely well prepared against this line.

7...cxd4

8.♙c4! This is basically a novelty! [In the previous games

White played 8.♖b5 O-O-O 9.♖bxd4 ♖g4! And Black once again has very good chances for the initiative!

8...♔a5 9.♖xd4 ♖xd4 10.♙xd4 e5! Moiseenko continues with the only principled reaction, developing with tempo. [10...e6?? would immediately lose to 11.♙b5+ ♖d7 12.♙b6+—]

11.♙b5+ ♙d7! The only move. [11...♖d7 is strongly met by 12.♔e2! and the black king is in big danger. 12...♙xa3 13.♔xe5+! wins!]

12.♙xd7+ ♖xd7 13.♖c4! Otherwise Black takes on a3. It might look like a blunder at first sight, because Black can play Qd5 or Qc7 attacking the c4 and d4 pieces, but after both moves Qe2 works well, protecting the c4 knight and pinning the pawn.

13...♔d5 14.♔e2 ♙e7? Moiseenko wrongly evaluates the arising endgame...

[14...f6 seems to be Black's only chance and it looks like White does not have a direct crush. But even if Black overcomes the main difficulties, the initiative still remains on White's side. 15.O-O ♙e7 16.♖ad1 ♔e6 17.f4+≐; The greedy 14...♔xg2 should not lead to anything good for Black: 15.O-O-O f6 Now the best is

16.♖he1! Preparing for a sacrifice on e5, when the opening of the e-file would lead to mate, while after 16...♙e7 White suddenly changes the direction and plays **17.♖g1! ♔h3 18.f4! exd4 19.♖xg7±** The attack breaks through!]

15.♖xe5 ♖xe5 16.♔xe5 ♔xg2 Black had to restore the material balance and the point is the h1 rook should be protected by O-O-O, but then Black can trade queens by playing Qg5.

17.♔b5+! A very strong intermediate check in order to prevent Black from castling. [17.O-O-O 17...♔g5+ 18.♔xg5 ♙xg5+ followed by O-O would be holdable for Black.]

17...♙f8 An unpleasant necessity. [17...♔c6 simple drops the g7 pawn. 18.♔xc6+ bxc6 19.♙xg7]

18.0-0-0 ♖g5+ 19.♗xg5 ♘xg5+ 20.♙c2 Black actually has serious problems here despite the low amount of material. He cannot solve the coordination problem between his pieces.

20...♘e7 [20...b6 21.♖hg1 ♘f6 22.♘xf6 gxf6 23.♖d7+- White is close to be winning with his dominating rooks and better pawn structure.; 20...f6 with the idea of Kf7 runs into the same idea as in the game: 21.♘a7! wins a pawn because of Rd8!]

21.♖he1! Activating the rook and creating the threat of Bxg7.

21...f6

22.♘a7! A small but nice winning combination!

22...♖d8 An oversight in a lost position. [22...♖xa7 23.♖d7+- is over for Black, since after Bc5 Rd8 wins the

rook. 23...♖xa2 24.♖xe7+- This position is just hopeless because of the doubled rooks on the 7th rank.]

23.♘c5! Maxime never misses such tactical tricks. [Black resigned in view of 23.♘c5 ♖xd1 (23...♘xc5 24.♖xd8+-) 24.♘xe7+ ♙f7 25.♙xd1+-] **1-0**

(4) Adams, Michael(2740) - Kramnik, Vladimir(2784) [B27]

41st GM(9.4), 2013.08.04

[Arkadij Naiditsch]

This game is very short, but it was just sooo important that it had to be in this CEWN. Before the last round, Adams was leading with an amazing score of 6, 5/8 (he said after the tournament that it was maybe his best performance ever) and Kramnik was following him with an also very good 6/8. What a standing! In the previous round, Adams made a pretty fast draw against Meier and Kramnik managed to win against Caruana in an almost 7 hours fight.

1.e4 c5!! Kramnik's will to win the tournament is just amazing! The usual openings of Vladimir are the Berlin or Russian, which are both very solid and we could probably have expected the game to be a fast draw, but no, Kramnik is ready to fight.

2.♘f3 g6!? Getting the game onto fresh ground. We don't see a 2800 player trying such experiments very often...

3.c3!? A very "hard" move. [We would probably have seen a more funny game after 3.d4 ♗g7 4.dxc5 ♖a5+]

3...♘f6 Bringing the game back into 1.e4 c5 2.c3 Nf6 with the

g6 move, which is not the best option for Black, but a very possible one.

4.e5 ♘d5 5.d4 cxd4 6.cxd4 ♗g7 White dominates in the center a little bit, but Black will quickly be back in the game by playing d6 next. This position is quite rare and Adams probably wanted to play safely as he was probably feeling slightly unpleasant and surprised by such a winning "will" of his opponent.

7.♖b3 A very solid move. [Other normal options for White include 7.♗c4 ♘b6 8.♗b3 d6 With unclear play.; Or even 7.♘c3 ♘xc3 8.bxc3 O-O 9.♗d3 d6 And Black is probably doing fine.]

7...♘b6 [7...♘c7 c7 is usually the wrong square for the knight and White could here simply continue with 8. Bc4.]

8.a4!! Objectively this move might not be the best one, but it is basically forcing Black into a draw or to go for a clearly worse position. It is not easy to trick somebody like Adams, who has been for around 20 years in the Top 15 players in the World, with his best place being World Nr3.

8...d6 A draw agreement. [The only chance to go on here was to play 8...a5 but after 9.♘c3 White gets an extra square on b5 and Black's position is looking really bad already. This was even too much for Kramnik.]

9.a5 Fixing the wishful result. [9.♘b5+ would have led to a fight after 9...♞c6 10.a5 ♘e6 11.♚c3]

9...♘e6 Black doesn't have a choice.

10.♚b5+ ♘d7 [10...♞6d7 11.♚xb7 would just lose the game for Black.]

11.♚b3 ♘e6 12.♚b5+ ♘d7 13.♚b3 ♘e6 14.♚b5+ ♘d7 A short game, but with big emotions. With this draw, Adams made a historical result of 7/9 in a category 19 tournament and a plus of over 20 ELO, congratulations! And I think that Kramnik also didn't have many reasons to be too upset, as he scored 6.5/9, with a very strong performance. **1/2-1/2**

Endgame section

(15) Kramnik, Vladimir(2784)-Caruana, Fabiano(2796)

41st GM(8.4), 2013.08.03

[CE Team]

In the first 20 moves of this game, we had a calm endgame where White was slightly better. What we see now on the board is just crazy. The endgame is very tactical, with a lot of different tricks on both sides. In the end Kramnik wins, but only after a horrible blunder by Caruana.

69.f6 There is nothing better for White, the threat is next to play Bf4

69...♖f1+! Black finds the only move!

[After 69...b4 which appears to be a very logical move, 70.♕f4 ♖f1+ things are pretty forced: 71.♖e4 b3 72.♕xh6 b2 It looks like Black is getting a queen with check, but... 73.g8=♖+ White is queening with check first.]

70.♖e4

70...♘g8! Black plays the only move again. White had the same threat of playing Bf4 next.

71.♖d5! White's only chance to win is to somehow play Ke6 and f7.

71...b4! In this very complicated endgame Black once again finds the best defence. [a tempting 71...♖xf6 The tempting 72.♕xf6 ♘xf6+ is simply losing for Black because of 73.♖e6 ♘g8 74.♖f7 ♘h6+ 75.♖g6! White needs to bring his king to h8 first! 75...♘g8 76.♖h7 ♘f6+ 77.♖h8 b4 78.♘d7 b3 79.♘xf6 b2 80.g8=♖+ And once again White is queening with check.; 71...♘xf6+ was not saving Black either: 72.♕xf6 ♖g1 73.♘e6 White wants to play Ng5 next. 73...♖xg7 74.♕xg7 b4 75.♘c5 b3 76.♘d3 And White is in time to stop the b-pawn.]

72. ♖h7 [72. ♔e6? was just leading to a draw after 72... ♘xf6! 73. ♙xf6 ♖g1 And this time the position is a draw. Black gives the rook for the g7 pawn and takes one of White's pieces back for the b-pawn.]

72...b3 73. ♔e6

73... ♘xf6! It seems like this is the last exact move needed for Black to finally reach the draw. [73...b2? would still lead to a lost position after 74. ♙xb2 ♔xb2 75.f7]

74. ♙xf6 ♖g1 Black wants to play Rxg7.

75. ♙g5

75... ♖xg5?? What a shock! We can clearly feel how much energy this game took from Caruana. Just one move before the draw he is blundering the game away, and in a terrible

way too... [After the normal 75...b2 76.g8=♖ b1=♖ 77.♖a8+ ♔b3 78.♖xb7+ ♔c2 the position is just a draw.]

76. ♘xg5 And Black resigns because of 76...b2 77.Ne4 followed by 77...b1Q 78.Nc3+. Wow... What a sad end for Black after finding so many only moves... **1-0**

(16) Wang Hao(2752)-Meier, G.(2610)

Dortmund, 2013.08.04

[CE Team]

The following interesting endgame arose in the last round of Dortmund. Meier misses a good chance to save the game and he runs into a study-like loss, which Wang Hao manages to find.

57...d6? Black would be happy with the trade of the bishops, since he could then get his king between the passed pawns, but it allows a tactical trick. [Things are unclear after 57...f6! 58.c4 Otherwise Black plays Ne5 with the threat of d3! (58.xf7 xf7 59.f4 is met by 59...h3 60.f5

60...f6 and we reach a kind of zugzwang, where both players

run out of useful moves and they need to start passing to make a draw: 61.d3 b6=) 58...e5 59.b5 b6 Black seems to have a fortress, because White's plan to make progress with f4-e5 is met by 60.f4? d3+! 61.xd3 g4 and the bishop is trapped.]

58.f4+! White is winning after this nice trick.

58...xf4! Black goes for his best chance! [58...f6 59.h3+- And with the support of the bishop pair, the e- and f-pawns are unstoppable.]

59.xf4+ xf4 60.xf7

60...h3! Black continues playing his best chances. [60...xe4 loses much easier after 61.e6 d3+ 62.d2 d4 63.f5+- The h-pawn cannot be used as a real threat.]

61.e5! The only move! White has to open the h1-a8 diagonal for his bishop. [61.f2 allows Black to escape after 61...h2 62.g2 xe4 63.xh2 d3= followed by Kc2 and collecting the pawns.]

61...xe5 [61...h2 62.d5 will be the same as the game.]

62.h5! Another only move. White had to foresee the key of this endgame, that whenever Black intends to play Kc5, he must be able to push b4!

62...♔f4 [62...♔d5

63.b4!! The only way to win. (63.♔d3 ♖c5 When the Black king is on c5, the game is already drawn. 64.♕f3 ♖b4 65.♕d5 h2 And the trade of all pawns is inevitable. 66.♔xd4 h1=♔ 67.♕xh1 ♖xb3=) 63...axb4 64.♔d3 The point is that the black b4 pawn prevents his own king from getting access to the b2 pawn. Black will soon lose all his pawns because of zugzwang. 64...h2 65.♕f3+ ♖e5 66.♕h1 b3 67.♕g2+-]

63.♕e8! The bishop must reach the h1-a8 diagonal and Bf3 would allow d3.

63...♖e5

64.b4!! Great technique by Wang Hao! [64.♔d3 h2 65.♕c6 ♖d6! Thanks to this tempo the king gets to c5-b4 and Black

draws as we saw in the 62...Kd5 63. Kd3 lines. 66.♕h1 ♖c5=; 64.♕c6 is also met by 64...♖d6 65.♕f3 ♖c5=]

64...♖d5

65.♕h5! axb4 66.b3 66.Kd3 was also winning. [Black resigned in view of 66.b3 ♖e4 67.♕f3+ ♖f4 68.♕a8 followed by Kd3 and collecting the pawns. Wang Hao celebrated his birthday with this neat endgame victory!] **1-0**

Clash of the Titans

(17) Anderssen, Adolf-Morphy, Paul[C77]

Paris m2(2), 1858

[Kamil Miton]

Paul Morphy was an American genius who started to play chess when he was 4 years old. He very quickly became the best player on the American continent. After that he decided to move to Europe to find opponents. He mainly played in London and Paris, where he beat almost all professional players of this time. Many people consider his match against Anderssen the first unofficial World Championship match. Below is one of the games of this match.

1.e4 e5 2.♘f3 ♘c6 3.♙b5 No surprise because the Ruy Lopez is one of the oldest openings.

3...a6 4.♙a4 ♘f6 5.d3 ♙c5 6.c3 b5 7.♙c2 We have a very well-known structure. One of Black's plans here is to play O-O, d6 and to transfer the knight to g6 after Ne7-Ng6.

7...d5 Black immediately fights for the center. It is logical but it doesn't solve all the problems in these structures.

8.exd5 White also had other possibilities without taking on d5, for example [8.♘bd2 O-O (8...♘g4 A strange idea, similar to the one of the Philidor line. 9.O-O

9...♙xf2+ 10.♙xf2 ♘e3 11.♙e2 ♘xc2 12.♙b1 d4 Otherwise the knight will not escape. 13.♘f1 ♘e3 14.♘xe3 dxe3 15.♙xe3 O-O 16.♙d1+=) 9.O-O ♙b7 10.h3 (10.d4 Sometimes ideas like this can work, but not exactly in this case. 10...exd4 11.e5 ♘e4 12.♘xe4 (12.♘b3 ♙b6 13.cxd4 f6⇒) 12...dxe4 13.♙xe4 dxc3 14.bxc3 ♙xd1 15.♙xd1 ♙ad8∞) ; 8.O-O dxe4 9.dxe4 ♙xd1 10.♙xd1 This kind of position is usually a bit more pleasant for White.]

8...♘xd5 9.h3 O-O 10.O-O h6 We have a normal position. Black seems to be completely fine, but in general it is not easy to play for him. White can slowly develop and improve his position by playing Re1-Nbd2-Ne4-a4.

11.d4 White decides to change the structure. It is clear that players back then knew that fighting for the center is very important. [11.♘bd2 ; 11.a4 ; 11.♙e1]

11...exd4 12.cxd4 ♙b6

13. ♖c3 Now the most important square is d5, where Black should try to create a blockade.

13... ♜db4 [13... ♜ce7 14. ♖e1+= White has an isolated pawn but on the other hand White can create pressure against the king and the pawn on b5 is also badly placed because of the weakness of the c-file. And Black cannot exchange the light squared bishops by playing 14...Bf5 because of 15.Nxd5.]

14. ♜b1 A bit passive. A better option was

[14. ♜e4 f5 15. ♜xc6 (15. ♜b1 ♜xd4 16. ♜xd4 ♖xd4 17. ♖f3 ♜b8 18. a3 ♜b7 19. ♖g3 ♜d5 20. ♜xh6 ♜h7 21. ♜g5 White should be better because of the weak black king.) 15... ♜xc6 16. d5 ♜e7 17. ♖b3 The pawns on b5 and f5 are weakening the black position. White managed to push d5 and avoid a blockade on the light squares. White will played Rd1-Bf4 next and he will be clearly better.]

14... ♜e6? This move looks logical because as we said before, the d5 square is important, but this is a huge mistake. Black should have played [14... ♜xd4 We will see that White doesn't get anything more than compensation: 15. ♜xd4 ♖xd4 (15... ♜xd4 16. a3 ♜xc3 17. bxc3 ♖xd1 (17... ♜d5 18. ♖d3 ♜f6 19. ♖g3 ♜h8∞) 18. ♖xd1 ♜c6 19. ♜f4) 16. a3 (16. ♖f3) 16... ♖xd1 17. ♖xd1 ♜c6 18. ♜d5 ♜e6 19. ♜xb6 cxb6 20. ♜e4 ♖ac8 21. ♜e3]

15. a3 ♜d5

16. ♜e2? White wants to keep more pieces on the board and transfer his knight to the kingside, which looks logical, but why not play [16. ♖d3 And Black is not able to avoid trouble on the b1-h7 diagonal: 16... ♜f6 (16... f5 Now the other diagonal becomes weak: 17. ♖e1 ♖f6 18. ♖xe6) 17. ♜e4 g6 18. ♜xh6±]

16...♖f6 17.♗e3 ♜e8 18.♘g3

18...♗c4! Solving Black's problems because White has no good answer.

19.♘f5! Objectively a bad move but White plays in a very practical way because in order to maintain the pressure on the kingside, they need the bishop more than a rook! [19.♗d3 19...♗xd3 20.♞xd3 ♞d5 Without the light squared bishops, White's pressure loses in strength and Black is fine.; 19.♞e1? 19...♘xd4+]]

19...♗xf1 20.♞xf1 ♘e7 Black is going to eliminate the unpleasant knight on f5.

21.♘3h4 ♘xf5 [21...♘ed5 22.♗a2 (22.♗xh6 gxf6 23.♞c1 ♘e4 24.♞xh6 ♞f6 And black is safe.) 22...c6 (22...♘xe3 23.fxe3 ♘d5 24.♞f3 c6 25.♞f1 ♞a7 26.♞h1) 23.♞c1 ♞e6+]]

22.♘xf5 ♞d7 With a very strong knight on f5, White sacrifices extra material!

23.♗xh6 gxf6 24.♞c1 ♗xd4 [24...♘e4 25.♞f4 ♞c6 26.♘h6+ ♞g7 27.♘f5+ ♞f8 28.♗d3 ♞ad8 Black's pieces also get activity: 29.♞e1 (29.♞c1 ♞f6 30.♗xe4 ♞xd4+) 29...♗xd4 30.♗xe4 ♗xb2 31.♗xc6 ♞xe1+ 32.♞h2 ♗e5+]]

25.♞xh6 ♞e1+ 26.♞h2

26...♘e4? A big blunder! The most important thing is to get rid of the knight on f5 to avoid mate threats. [26...♞xf5! 27.♗xf5 ♞xa1 Black has too many pieces, so the last chance is to play 28.g4 But now Black has the strong (28.♞g5+ 28...♞f8 29.♞h6+ ♞e7 30.♞f4 ♞d8 31.♞xc7+ ♞e8 32.♞c6+ ♞f8 33.♞xa6 ♗e5+ 34.g3 ♞d2+)]

28...♞e8! 29.g5 ♞e2 30.gxf6 ♞xf2+ 31.♞g3 ♞g1+ 32.♞h4 ♞xf5+]]

27.♗xe4 ♞xe4 28.♞g5+ ♞f8 29.♞h6+ ♞e8 30.♘xd4 Maybe Morphy missed this move in his calculation. The problem is that Black cannot recapture on d4 because the rook on a8 will be lost after check on h8 or c6. White is back in the game!

30...♔d6+ [30...♖xd4 31.♖c6+ ♔e7 32.♖xa8; 30...♖d5 31.♖d1 (31.♗f5 ♖d8+) 31...♗d7 32.♗b3 ♖xd1 33.♗c5+ ♔c8 34.♗xe4 ♖d5 35.♖e3 For the exchange White is a pawn up and the black pieces are badly coordinated.]

31.♖xd6 cxd6 32.♖d1 ♔f8 33.♖d2 The set-up of the white pieces is very good and Black will have problems to get rid of the d4 knight and improve his position.

33...♖ae8 [33...♖c8 34.g4 ♖c4 35.♗f5+]

34.g4 A good move which supports the f5 square for the knight, advances the pawn and opens the way for the king.

34...♖e8 35.f3 [35.♗f5 ♖e2 36.♖xd6 ♖xf2+ 37.♗g3 ♖xb2 38.♖xa6 ♖e4 39.♖a8+ ♖e8 40.♖a6 With good drawing chances.]

35...♖e1 36.h4 ♖d5 37.♗g3 a5 [37...♖c1 With the idea to play Rc4, so White plays 38.♗f4! ♖c4 39.♗e4 ♖e5+ 40.♗f4]

38.h5 ♗g8 39.♗f2 ♖e8 [39...♖ee5 40.♗g3 f5 41.♗f4 (41.g5? 41...fxg4 42.fxg4 ♖e1 43.♗f3 ♗f7 44.♗f4 ♖f1+ 45.♗g3 ♗f6 46.♖d3 Black can try some tricks here to find a way to improve his position, but it is not easy as the king cannot come to g5 or e5 because of the knight checks.)

40.♗g3 ♖e7 41.♗f4 ♗h7 42.♗g3 ♖e3 43.♗f4 ♖e8 44.♗g3 Black is not able to find a way to play on. A good game with

deep understanding and good calculation!

44...♖e3 1/2-1/2

Editorial Preface

All the eyes of the past week were of course on the World Cup in Tromsø.

Already in the first round, 3 of the top players had to pack their bags: Polgar lost to Ortiz Suarez, Movsesian to Hammer and Nepomniachtchi to the 14 years old Wei Yi.

In the 2nd round, Wei Yi continued playing in a very fast and strong way and left Shirov no chances, winning the match 1,5-0,5.

Jon Ludvig Hammer, the representative of Norway, managed to reach the next round against Navara by winning both rapid games of the tie break.

The next surprise was the victory of Granda Zuniga over Leko. In the first game with the white pieces Granda Zuniga left Leko almost no chances by outplaying him in a great style. In the second game Black was already clearly better after only 12 moves, so Leko could even be happy to "only" lose 1,5-0,5.

The next big surprise is the win of Krivoruchko over Adams. The match was very tight and just a few small mistakes by Adams in the 2nd rapid game sent him home too.

The big favorites for the title are still in the game and the real tough matching are starting now! We can be very curious who will be the last man standing! :)

Enjoy the commented games from the World Cup.

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) **Grischuk, Alexander(2785)**

- **Swiercz, Dariusz(2654) [B90]**

FIDE World Cup 2013(2.1), 2013.08.14

[Arkadij Naiditsch]

We are in the first game of the 2nd round of the World Cup. To play Grischuk in K.O tournaments is never a pleasure. Alexander is super strong in normal chess, super strong in rapid and super strong in blitz. Anyhow, Swiercz tried his best and went for the very sharp Najdorf. The game was very tense and ended clearly too quickly after a blunder of Black.

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 a6 We are in the main position of the Najdorf. Lately the move 6.Bg5 went more into fashion, but the text move is probably still the very main line.

6.♙e3 e5 [6...e6 ; 6...♘g4 are the other 2 big lines for Black.]

7.♘b3 ♙e6 8.h3 This move lately got into fashion. Of course the main move remains 8.f3.

8...♙e7 9.f4 This is a relatively rare line. [9.♙f3 was played numerous times, but it seems that Black is doing fine here.]

9...exf4 Of course Black cannot let White push f5.

10.♙xf4 ♘c6 The black knight on e5 is going to be huge.

11.♙e2 White's idea is to play 0-0-0 and to threaten e5, trying to somehow win a tempo and force Black to move his queen away from the d-file.

11...0-0 12.0-0-0 ♘e8 I am personally not a big fan of moves like Ne8. [To me more logical seems to be 12...♙c7 Black's ideas is simple, to put his knight on e5. 13.♘d5 This forced attempt doesn't seem to work for White. 13...♙xd5 14.exd5 ♘b4 And both the d5 and a2 pawns are hanging.]

13.♙b1 Black wanted to play Bg5. The exchange of the black squared bishops is good in such structures.

13...♙f6 White has a wide range of choices now.

14.♙e3 A solid move. [Another possibility was to play 14.♘d5 14...♙e5 15.♙e3 Black has the e5 square, but it is usually better to put the knight on e5 than the bishop.]

14...♙c8 15.g4 White starts the usual play, in the perfect case he is going to bring the pawns to g5 and h5 and choose between playing g6 or h6 later on.

15...♙e5 Black is exchanging the bishop, which is also a very logical decision. [A move like 15...b5 would not make a very big difference to the game. 16.g5 ♙e5]

16.♙xe5 [It was also possible to first play 16.g5]

16...♘xe5 17.g5 White has finished his first positional plan, to kill the knight on e8. The f6 square is under control and the h-pawn is coming. Black needs to quickly find some counterplay.

17...b5 [If Black tried to immediately bring the knight into the game by playing 17...♞c7 18.h4 ♕g4 19.♕e2 ♕xe2 20.♞xe2 ♞e6 21.♞d5 White's position would also be clearly better, as now the h5-h6 push is hard to prevent.]

18.h4 ♞c7 Black found an idea, to put pressure on the c2 pawn. Now the threat is to play b4.

19.♞d4 Defending the c2 pawn and bringing the knight back into the game, what can be more logical?!

19...♞c5 20.♞f4?! In Sicilian games there is no place for prophylactical moves, too slow play. [Why not continue with the the main idea?! 20.h5 20...♞c7 21.♕e2 With the threat of playing h6 or g6. White's position is looking better.]

20...♞c7! The black knight is now coming to e6 with tempo.

21.h5 White has almost reached his goal of playing h6, but Black has a nice reply...

21...b4?! Missing the chance of the game.

[21...♕g4! The e6 square is the right one for Black's knight. 22.♕e2 ♞e6 The position still remains complicated, but I think that Black's chances are not worse here.]

22.♞a4 [22.h6 would lead to an interesting position: 22...bxc3 23.hxg7 With huge complications.]

22...♞a5 23.b3 [Here White could also have tried 23.h6 23...g6 (23...♞xa4 doesn't work because of 24.b3! ♞d7 25.hxg7 With a mating attack.) 24.b3 And White would already have the f6 square for the future.]

23...♕d7?! And Black misses his chance for the second time... [23...♕g4! With the same idea of playing Ne6 next.]

24.h6 [24.♞f5! seems to be a very strong move. 24...♕xf5 25.♞xf5 I think that White is clearly better here.]

24...♞e6! The black knight is finally back into the game. The position is very complicated.

25.♞d2 g6 Black can't let White open the h-file.

26.♞xe6 ♕xe6 [26...fxe6 27.♞xd6]

27.♕h3?! It is very hard to play such complicated positions without mistakes.

[The more simple 27.♞f4 27...f6 28.gxf6 ♞c6 would lead to a complicated, but probably better position for White.]

27...Qf3? When I was watching this game live, I saw that both players were short on time and I was looking forward to an exciting "Zeitnot", but no, the game was over too quickly... [27...Qc6 With an unclear position.]

28. Qf4 Qxg5 The young Dariusz Swiercz probably thought that Grischuk blundered the g5 pawn, a pity for him. I often saw Grischuk playing better with only 30 seconds on the clock than when he had been thinking for 30 minutes. :)

29. Qd5! The killing move! White first needs to cover the e5 square in order to not let Black play Qe5 before playing Qf6.

29...Qxd5 30. Qf6 A slightly sad end of a very exciting game. We can already be curious about the next one, can Swiercz come back with a win with White?! It is going to be very hard... 1-0

(2) Jakovenko, Dmitry(2713) - Paragua, Mark(2569) [E92]

WorldCup 2013(2.28), 2013.08.12

[Balogh Csaba]

A really smart game by Jakovenko. After winning the first game, he made a very clever decision in the opening to avoid any kind of dangerous positions...

1.d4 Qf6 2.c4 g6 3.Qc3 Qg7 Black plays the King's Indian defence, which is of course an excellent choice in order to create a double edged position, where someone can play for a win even with the black pieces.

4.e4 d6 5.Qf3 O-O 6.Qe2 e5

7.dxe5! Quite a depressive moment for Black. Jakovenko handles the opening unambitiously. White simplifies the position, trades the queens and theory considers this move as a draw if Black plays some strong moves. If he makes inaccuracies White gets an advantage. [7.O-O 7...Qc6 8.d5 Qe7 is normally the initial position, where White has a wide range of choice, but in any case the game becomes extremely sharp.]

7...dxe5 8.Qxd8 Qxd8 9.Qg5 Qbd7 [9...Qe8 is the right move, but after 10.Qd5! Qxd5 11.cxd5 c6 12.Qc4 Black has

to make some precise moves to equalize. The problem is that Black had to win this game to equalize the score.]

10.0-0-0 White threatens to play Nxe5, so the rook has to leave the pin. 10...Re8 would lose to 11.Nb5, so the next move is forced.

10...♖f8

11.♘d5! It often happens that when somebody is playing for draw, he exchanges pieces, but at the cost of some positional damages. However Jakovenko also aims to get rid of some pieces, but always with some improvement on his position.

11...c6 [11...♗xd5 12.cxd5 is slightly better for White, because of the superior pawn structure and the c7 weakness.; 11...♗xe4 is met by 12.♙e3! With the double threat of Nxc7-Rb8-Bxa7 trapping the rook and Ne7-Kh8-Nxc8, when the d7 pawn is hanging. Black is in trouble!]

12.♗e7+ The right move again. White wants to get the bishop pair. Actually we are still following the theory.

12...♖h8 13.♙e3! Improving the bishop and preventing Nc5. Black has to waste a tempo on kicking out the annoying e7 knight.

13...♖e8 14.♗xc8 ♖axc8 It is quite good to start the game with this slightly better endgame, when you need a draw.

Jakovenko continues pushing with the most straightforward and principled moves.

15.g4! White takes some space on the kingside and threatens to win a piece with g5.

15...♗f8 16.♗d2! After protecting the e4 and g4 pawns, White is ready to continue the plan he started with g4.

16...♗e6 Black's only chance is to use the dark squares on d4 and c5. The best could be if he had time to trade the dark squared bishops by playing Bf8-c5 and then he could occupy the c5, d4 and f4 squares with the knight. In this case the e2 bishop would become really poor. Obviously Jakovenko does not allow any hopes like this to his opponent!

17.g5! ♗d7 18.♙g4! The bad bishop suddenly became a very active piece!

18...♙f8 Paragua tries his best, but his attempt to play Bc5 once again runs into a strong prophylactic move.

19.♗b3! Controlling the c5 square, attacking the d7 knight and threatening to play Na5. Occasionally the a7 pawn might also be hanging.

19...♗b6 20.♙xe6! White changes his strategy and initiates a play around the c5 square. Two moves later, it all becomes clear.

20...♖xe6 21.♘c5! ♚e7 [21...♙xc5 22.♙xc5 ♘xc4 would end with total domination of White. 23.♖d7! b6 24.♙e7 The black pieces don't find their places on the board, while the white ones have full control over the position. 24...♖e8 25.♙f6+ ♔g8 26.♖hd1± Black is doomed and the rooks on the 7th ranks will soon decide the outcome of the fight.]

22.b3! ± This was in front of Jakovenko's eyes when he took on e6. Suddenly the b6 knight is completely out of the game. The black rooks have no chance to fight for the only opened file. On the other side White has several ways to improve his position. He might double his rooks on the d-file, might take space on the kingside with h4 or on the queenside with a4-a5, or just activate his king with Kc2-c3.

22...h6 23.h4! The g5 pawn is a key to keep Black in his cramped position. White has to hold it.

23...f5 A desperate attempt by Black to generate some counterplay, but it actually just hastens the defeat.

24.gxf6 [24.h5 was also about to be winning after 24...f4 25.♙d2 hxg5 26.♙c3+—]

24...♖f7 25.♘d3 [A more direct win was 25.♘e6 25...♙a3+ (25...♖xf6 drops a pawn after 26.♘xf8 ♖xf8 27.♙xh6+—) 26.♔b1 ♖xf6 27.♘d8! ♖c7 28.♙xh6 ♖xf2

29.c5! Black ends up in a lost position. 29...♘a8 (29...♙xc5 30.♘e6+—) 30.♘e6+— But Jakovenko preferred keeping the game calm and continued to play positionally without any calculation.]

25...♘d7 26.f4! exf4 [26...♖xf6 27.fxe5+—; 26...♖e8 was the best try, but even here after 27.♘xe5 ♘xe5 28.fxe5 ♖xe5 29.♙xa7± White has an extra pawn after the bishop retreats to d4. Black has some drawing chances, but of course a draw meant the same as losing for him.]

27.♙d4! White succeeded in obtaining an e5-f6 pawn chain, which seems to be fatal from Black's point of view.

27...♖e8 28.e5+— h5 29.♖he1 Black has only one move to stop e6.

29...♖e6 These are not the most ideal places for the rooks.

30.♘xf4 ♙h6 31.♙e3! ♙xf4 32.♙xf4 The game is over. White has an extra pawn, the black pieces are doomed and he has no chance to get rid of the e5-f6 pawns.

32...♔g8 33.♔c2 White has time for everything.

33...♔f8 34.♖e3 ♔e8 35.♖ed3 Black resigned as the e5 pawn cannot be taken. The next move could be Rd6, kicking out the blockader of the e6 pawn, after which the advance of the e5 pawn is going to win huge material. An impressive positional performance! **1-0**

(3) Korobov, Anton(2720) - Jobava, Baadur(2696) [A41]

FIDE World Cup 2013(2.1), 2013.08.14

[Arkadij Naiditsch]

1.d4 We are in the first game of the 2nd round of the World Cup. Both Korobov and Jobava are very aggressive players who are not scared to risk something even in such K.O tournaments. We will now see a great game by Korobov!

1...d6 This move is often played against 1.d4 players because usually a person who plays 1.d4 won't go for the Pirc by playing 2.e4.

2.♘f3 [White probably wanted to avoid 2.c4 2...e5]

2...♘f6 3.c4 c6 A very rare move and it looks a bit strange to me. In chess it is important to fight for development or the center during opening moves and by playing 3...c6, Black is not doing any of it.

4.♘c3 ♕f5 That is probably the key idea of Jobava's play. He is trying to avoid the main King's Indian Defence, but it still looks very strange.

5.♘h4 Very logical. 5.g3 should also have given White comfortable play.

5...♕d7 6.e4 And White is back into a known structure.

6...e5 7.♘f3 ♕g4 Black already doesn't have anything better, as after 7...exd4 8.Nxd4 White's position is just much better.

8.♕e2 ♘bd7 9.♕e3 ♕e7 10.h3 Korobov once again plays a very logical move. White is going to have the bishop pair with a stable small advantage.

10...♕xf3 11.♕xf3 O-O 12.O-O White has an easy plan for the next moves, to play Qd2-Rad1-Rfe1 and maybe g3-Bg2 followed by f4. If the position gets opened things could turn out very badly for Black.

12...♘e8 Black wants to exchange the bishop by playing Bg5, which of course is very important.

13.♕g4 Not the only, but the most simple way of stopping Black from playing Bg5 next. [13.♖b3 would also be a possible continuation.]

13...exd4 14.♖xd4 White has the center and of course his future plan is to attack on the kingside.

14...♘c5 [14...♘ef6 It was maybe more tricky for Black to first come back to check where the white bishop is planning to go, to f3 or e2.]

15.♖ad1 ♖c7 [15...♕f6 of course doesn't work because of 16.e5!]

16.f4 And White is finally starting to push his pawns.

16...♘f6 17.♙f3 a5 We have quite a typical position of the KID, except that White usually has to work very hard to get it. At the current moment, White has everything he could reach, the bishop pair, a solid center, but what's next?

18.g4! Exactly the right choice! No reason to wait, White has to start the rush!

18...♘fd7 White wanted to play g5 next anyway.

19.g5 ♖fe8 We also often see this defence idea of putting the bishop to f8 in the Sicilian.

20.h4 ♘f8 21.♖d2 [21.h5 was of course also possible.]

21...a4 22.h5 ♖a5 White's position looks really great, but Black's one is still very solid and White needs to take care about the tricks on the queenside. A move like Nb6 for example could be quite unpleasant now.

23.♖c2 A solid prophylactic move. [It was too early for 23.g6 23...fxg6 24.hxg6 hxg6 It is not that clear how White should proceed his attack now.]

23...♘b6 24.♙e2 Everything is protected.

24...♖ac8 Black is hoping for a d5 push at some good moment.

25.♙f2! Another excellent prophylactic move by Korobov.

White does not rush with actions and first stops all the counterplay.

25...♘e6 It is already hard to give Black an advice as although White doesn't threaten anything concrete, he doesn't have any counterplay. [25...d5 doesn't work as after 26.exd5 cxd5 27.♘xd5 White is just a pawn up.]

26.♙h1 White is working on a future g6 push step by step.

26...♘d7 Black is going for the b5 push, but it all doesn't look too good...

27.♙g4 The very positional play by Korobov leads to total desperation of Jobava. White wants to play e5 or he might even already be ready for g6. Black's position is on the verge.

27...a3 28.b3 b5? A desperate move. [Black should have continued to defend passively 28...♖cd8 and even if position the is very bad, White still needs to find a final blow.]

29.e5! The black knight on d7 is hanging, so it is a good moment to start the final attack.

29...bxc4 30.bxc4 The d6 pawn is lost, so Jobava tries his practical chances.

30...♖b8 At least a Black rook might be able to come to the second rank.

31.g6! White continues to totally crush Black's position.

36...  xg4

38...♙e7 39.♖e6+ ♔h7 40.♗f5 ♔g8 41.♗f7+ ♔h7 It was too much for Jobava and he resigned. Korobov had 30 minutes now to find 42.Rd2 or 42.Rf2 or 42.Kg2 and many

1-0

(4) Robson, Ray(2623) - Volokitin, Andrei(2688) [C42]

FIDE World Cup 2013(1.46), 2013.08.11

[Balogh Csaba]

A very interesting match between two young players with very similar style took place right in the first round. They have very strong opening preparation and both of them play very aggressive and tactical chess later on.

1.e4 e5 Volokitin usually plays different kinds of sharp Sicilians, but sometimes he prefers to drive the game to more calm waters and plays the Petroff or the Berlin defence instead.

2.♘f3 ♘f6 So, we have the Petroff today.

3.♗xe5 d6 4.♘f3 ♗xe4 5.d4 The main line. [5.♘c3 is very popular nowadays.]

5...d5 6.♙d3 ♘c6 7.O-O

7...♙e7 This line was brought to fashion by Kramnik, who played it successfully from 2004 for several years. At that period, it was extremely fashionable on the highest level, but now it became slightly forgotten as Kramnik and the other top followers stopped playing it. Almost all the games continue with the same moves as our game.

8.c4 ♘b4 9.♙e2 O-O 10.♘c3 ♙f5 11.a3 ♘xc3 12.bxc3 ♘c6 13.♙e1 ♙e8 14.cxd5 ♙xd5 15.♙f4 ♙ac8 This was considered to be the main position of the Petroff and the moment where all the players have started their analysis. There are hundreds of games in the database and most of them are from the highest level. Black's main idea is to create a strong blockade on the light squares of the queenside by playing Na5, while if White starts to advance his central pawns, Black quickly wants to put them under pressure with the minor pieces. Robson comes up with a rare move here. The main moves are 16.h3, 16.Bd3, 16.Nd2 or 16.c4.

16.♙c1! A tricky move introduced by Anand in 2005.

16...♙f6 This was the recommendation as an improvement from the Anand-Kramnik game. The bishop belongs to this place, controlling the e5 square and putting pressure on the d4 pawn in case of c4. [Seemingly it moves directly into Black's main idea 16...♘a5? seems to be Black's main idea and he doesn't only threaten Nc4, but also Nb3, but here White has 17.c4 ♙e4? Kramnik continued playing consequently. He still threatens Nb3 and also wants to play Qc2, because the endgames are usually fine for Black in this line. (17...♙d8 18.♙c3+= is also better for White and in this case Na5 had simply no point.) 18.♙d1! Controlling the c2 and b3 squares. 18...♙d3 Attacking the c4 pawn, but here comes the tactical

point of Anand:

19.♖e3!! ♕xc4 20.♖e5!! and Kramnik resigned as he loses a piece. What a miniature in classical time control!]

17.♗b2! This the point! White lures the c6 knight to a5 in order to be able to occupy the e5 square.

17...♘a5! [17...b6? drops the c7 pawn after 18.♙a6!]

18.♘e5! White doesn't only activate his knight, he also frees the f3 square for his bishop.

18...♙xe5 Volokitin wants to equalize in the most direct way. [18...♗b3 19.♗d2 ♙xe5 transposes to the game.; 18...c5!? definitely deserves attention and it is completely in the spirit of the position, since this is the reason of playing 15...Rac8.]

19.♙xe5 ♗b3 20.♗d2! White needs to keep the queens on the board if he wants to fight for the advantage.

20...♘c4 21.♗g5! [21.♙xc4 21...♗xc4 followed by f6 is exactly what Black wants in this opening.]

21...♙xe5 [21...♙g6 is pretty suspicious, but might be a better move. Black threatens to play f6, so White must look for some direct play. 22.♖ab1 ♗a2! and White is probably forced to repeat moves with Ra1-Qb3-Rab1. (22...♗xc3 leads to a worse endgame after 23.♖ec1 ♗d2 24.♗xd2 ♘xd2 25.♖xb7 f6 26.♙g4! The two bishops and the active rooks will be

very strong.; 22...♗xa3?? 23.♙xc4+—) 23.♖xb7 does not work unfortunately for White because of 23...♘d6! 24.♖xa7 f6]

22.♗xf5

22...♘c4 With the aim to reach the d6 square with the knight. White needs to act, otherwise the initiative might quickly pass to Black as he has the better pawn structure and the c3 and a3 pawns are already under attack.

23.♗c5! White finds a new target: the c7 pawn.

23...♘d6 24.♙g4! ♖xe1+ 25.♖xe1 b6 [Unfortunately for Black 25...♖e8 does not solve the problems. 26.♖xe8+ ♘xe8 27.g3! Opening the back rank and Black cannot prevent the annoying threat of Qe7! 27...g6 28.♗e7+; 25...♖f8 26.g3 is also better for White. Black cannot consolidate the pressure on the c7 pawn. White is ready to invade the 7th rank with his rook.]

26.♗c6 f5?! A tactical oversight, but it is easy to miss such things, as what will happen in the game. Black was hoping for 27.Bf3 Qb5, when he succeeds to trade the queens and the endgame would be still fine for him, but an unpleasant surprise was awaiting him! [26...♖f8 27.a4+= is also better for White.]

27. ♖xf5!! ♜xf5 28. ♜e8+ ♚f7! Both players try to use the weakness of their opponent's back rank!

29. ♜d7+ ♚f6

30. ♜e1!! This subtle move was the point behind the 27. Bxf5! combination. The black king is under serious attack. White can bring new attackers with the kingside pawns.

30... ♜g8 [30... ♜f8 was a better practical chance, but objectively it is also quite bad after 31.g4! If the knight moves, Qe7 wins. 31... ♚g6 32. ♜e6+ ♜f6 33.gxf5+ ♚h6± Black only has a bad endgame, but he might hope for survival.; 30... ♜xc3 loses to 31. ♜e6+ ♚g5

32.h4+!! ♚xh4 33. ♜xf5! ♜xe1+ 34. ♚h2+— Followed by g3 mate!]

31.g4! White is crushing now!

31...g6 [31... ♜d6 32. ♜e7+ ♚g6 33. ♜e6+— Black has to give his queen.]

32.f4! A very nice attack by Robson, the threat is g5 mate!

32...h6 33.h4! Refreshing the g5 threat and the knight cannot move because of Qe7 mate.

33... ♜f7 34. ♜xc8 A nice win and big step forward to reach the 2nd round and to play against Ivanchuk! **1-0**

Endgame section

(15) Nakamura, H.(2775)-Cori, D.(2439)

World Cup (1.2), 2013.08.12

[CE Team]

Nakamura had already won the first game against his young girl opponent. The second game was much more difficult, as Cori Deysi was fighting very well and Nakamura had to use all his tricks to take the full point home.

77...♙b2 78.♖e6! This simplification is the only try for White in the position. After trading the rooks, the white king will inevitably collect the h6 pawn, but despite this the arising opposite colored bishops endgame should be drawn.

78...♖xe6

[The computer prefers to keep the rooks on the board and holds the draw fairly easy, but of course with a human mind it is very difficult to refrain from getting rid of the rooks. 78...♖a5+ 79.♙d6 ♙f4 80.♙e7 (80.♖xh6?? is obviously not possible because of 80...♖a6+)]

80...♖xf5! This is the idea of the machine! 81.gxf5 ♙xf5 82.♖xh6 g4 83.♖g6 Black draws here after almost all the moves. The easiest is probably 83...♙c1 84.♙f7 ♙g5 With the idea of advancing the g-pawn and after 85.h6 ♙xh6! 86.♖xh6 g3 87.♖g6 ♙f4 88.♙f6 ♙f3 89.♙g5 g2 90.♙h4 ♙f2 91.♙h3 g1=♚=]

79.♙xe6 ♙f4! Black cannot avoid losing the h6 pawn, so it is clear that he should play on squeezing the white king to h6 by getting the king to f6.

80.♙f7 ♙e5 81.♙g7

81...♙a3? This seems to be the decisive mistake. [81...♙c3 Black should have kept his bishop on the a1-h8 diagonal in order to control the key g7 square. It all becomes clear soon... 82.♙xh6 ♙f6 83.♙g6 Just like in the game, this is

the most dangerous try. (83.♔h7 is met by 83...♕f7 Black had to prevent Kg8 at any cost, since then the h-pawn promotes automatically. 84.♖c2 ♖e5 85.♖b3+ ♔f8 Black holds the draw easily now. 86.♖g6 ♖f4 87.h6 ♖e3 88.h7 ♖d4 89.♖xg5 ♖g7= Followed by Kh8 and waiting with the bishop on the a1-g7 diagonal.)

83...♕e7!! This is the key and only move! The black king must get to the corner and it could only be achieved via f8. (Other moves, for instance 83...♖d4? loses after 84.♔h7+- as Black is helpless against Kg8, Bf5 and h6-h7-h8...) 84.♖xg5 (84.♖h7 84...♖f8=) 84...♖f8 This endgame is an easy draw from Black's point of view. The last things he needs to do is to get the king to h8 and stay ready to sacrifice the bishop for the g-pawn. 85.h6 ♖g8 86.♖h5 ♖d2 White cannot make progress, and after 87.g5 ♖xg5! 88.♖xg5 ♖h8= With the well-known theoretical draw, when the bishop is of the wrong color...]

82.♖xh6 ♖f6

83.♖g6!! A great move by Nakamura! White prevents the Kf7-f8 idea and he gets his king to g8. The game is over. [83.♖h7? 83...♖f7 would have led to a draw as we already know.]

83...♖b2 [83...♖e7 84.♖g7! This is the point and the reason why the black bishop should have stayed on the a1-h8 diagonal. The black king does not reach the f8 square. 84...♖b2+ 85.♖g8+-]

84.♖h7! ♖a3 85.♖g8 ♖b4 86.♖f5 ♖c3 87.h6 ♖e7 88.h7 An instructive endgame lesson! **1-0**

(16) Ortiz Suarez, Isan Reynaldo(2609)- Vachier-Lagrave, Maxime(2719)

FIDE World Cup 2013(2.1), 2013.08.14
[CE Team]

After an average game and slightly hectic time control moves, White reached a totally winning position. All he needs to do is to exchange the black rook in order to finish the game. It is clear that Ortiz Suarez was a bit nervous, but what happened during the next moves is still hard to explain.

41.♔d1 f4 Black is just trying his practical chances and pushing the pawns forward.

42.f3? White is still winning, but he is starting to play where he shouldn't do anything.

[White had to sit down and calculate one relatively long but forced line: 42.♖b6 42...e3 43.♔e1 f3 44.♖c7 d3 45.fxe3 ♖xe3+ 46.♔d2 ♖e2+ 47.♔xd3 ♜e5+ 48.♔d4 f2

49.♖f6 And now the game would just be over! The thing is that in a winning position nobody likes to take the risk of miscalculating something, but sometimes it is the only way to finish the game. To avoid forced lines every time could lead to the danger of missing the win.]

42...e3 Black continues pushing his pawns.

43.♔e2?? And once again White is active where he shouldn't do anything, but this time it is fatal. [Now it was already a mistake to play 43.♖b6 43...g4!; But the move 43.g4 would still win the game. White first needs to prevent Black from playing g4, before starting the final actions.]

43...g4!! Quite typical and not too hard to find. White is now lost !

44.♖f7 Nothing helps anymore...

44...gxf3+ 45.♔e1 ♘e5 What a funny position!

46.♖xf4 ♖c6 47.♔d1 e2+ And White cannot prevent Black from queening his pawn.

48.♔d2 ♖c1 A very sad end of the game for White, who was totally winning! **0-1**

Clash of the Titans

(17) Lasker, Emanuel-Tarrasch, Siegbert[C68]

World Championship(1), 1908.08.17

[Kamil Miton]

Today we will see a game of second World Champion Emanuel Lasker. He kept the title for 27 years, the longest in history. He was a mathematician, a philosopher and a friend of Einstein.

1.e4 e5 2.♘f3 ♘c6 3.♗b5 a6 4.♗xc6 dxc6

5.d4 A rare move. Nowadays White plays [5.O-O and here black has a lot of possibilities like 5...Ne7 , 5...Bg4 , 5...Qd6 , 5...Qf6 and also 5...f6, which lead to a similar endgame as in the game after 6.d4 cxd5 7.Nxd4 c5.]

5...exd4 6.♖xd4 ♖xd4 7.♘xd4 c5 8.♗e2 [8.♗b3 looks worse because after b6 at some moment, the knight will be limited.]

8...♗d7 9.b3 Maybe the a1-h8 diagonal is not bad for the bishop, but on the other hand Black now has an easier option to get rid of the doubled pawns: to push c4 at some moment. More natural was the plan Nbc3-Be3/Bf4-O-O-f3.

9...♙c6 10.f3

10...♙e7 The beginning of a wrong plan because the main compensation for a worse structure is the bishop pair!

11.♙b2 ♙f6 As we said before, Black should keep the two bishops. [11...f6]

12.♙xf6 ♙xf6 13.♙d2 Probably to not miss some c4 idea, White could also have played [13.♙bc3 13...O-O-O 14.♙f2 ♙d2 15.♙ac1 And soon White will chase the active black rook from the second rank. 15...♙hd8 16.♙hd1+=]

13...O-O-O

14.O-O-O+= White is clearly better thanks to his better structure. The black knight and bishop are limited by the

e4-f3 structure and at the moment Black doesn't have any counterplay on the queenside.

14...♙d7 15.♙f4 ♙e8 Black didn't put the rook on d8 to avoid exchanges, because one rook is needed to get some counterplay in the future.

16.♙c4 b6 17.a4 a5 18.♙xd7 [18.♙e3!? With the idea to play Nf5 in order to weaken the dark squares.]

18...♙xd7 19.♙d1 White could also try [19.♙d2 19...♙e5 20.♙xe5 ♙xe5 21.♙c3 The king is on time to not allow Black's c4 push, but the problem is that anyway the king will be needed to advance the pawns on the kingside.]

19...♙e5 20.♙xe5 ♙xe5

21.c4 The only move, otherwise Black will play c4 and the position can only be better for him.

21...♙e8 Black is waiting. [21...f5 22.♙d3 ♙e7 23.exf5 ♙d7 24.g4 ♙e3 25.f4 h5 And White is on time after 26.♙e5±; 21...g5 An interesting move with the idea to exchange some pawns and activate the rook over the h or g-file. 22.♙d3 ♙e6 23.♙d2 g4 (23...h5 24.h4! A nice move which fixes the weakness on h5.) 24.♙e3 gxf3 (24...f5 25.e5↑) 25.gxf3 ♙h6 26.♙d2+=]

22.♙h5 ♙g8 23.♙d3 f6 24.♙d2 ♙e8 25.♙g3 ♙d7 26.♙e3 ♙e8 [26...♙d8 looks natural to bring the king a bit closer.

27. ♖f5 ♔e8]

27. ♖h5 ♜e7 28. g4 c6 Preparing for b5 at some moment, with the idea of looking for counterplay against the white pawns on the queenside. [28... ♗e8 29. ♖g3 ♜d7 30. ♜xd7 ♔xd7 31. ♖f5 g6 32. ♖g3 ♔e6 Because of the potential pressure on the b3 pawn, Black has good chances to save this endgame.]

29. h4 ♔c7

30. g5 [30. ♖g3 With the idea of playing Kf4-g5.]

30... f5 31. ♖g3 fxe4 32. ♖xe4 [32. fxe4 32... ♗e6 It is not easy for White to improve his position. 33. ♔f4 ♜f7+ 34. ♔e5 ♜e7 The king has to go back. 35. ♔f4 Black also has some ideas with b5.]

32... ♗f5 [32... ♗e8 The bishop comes to g6, where he doesn't allow the pawns to advance and is ready for counterplay against the b3 pawn in case the white knight moves away from e4.]

33. h5 ♜d7 34. ♜c3 White avoids the exchange, but now the black rook will be very active. [34. ♜xd7+ 34... ♔xd7 35. ♔f4 ♔e6 36. h6 gxh6 37. gxh6 ♗g6 It will be hard for White to improve his position because of the b3 pawn.]

34... ♜d1 35. ♔f4

35... ♗d7? It looks logical to keep the bishop but probably Black should have played [35... ♗xe4! And thanks to his active rook, Black should make a draw. 36. ♔xe4 (36. fxe4 36... ♔d6 Black should not lose this position thanks to his more active rook and solid king on e6.) 36... ♔d6 37. ♔f5 (37. ♜d3+ 37... ♜xd3 38. ♔xd3 ♔e5 39. ♔e3 ♔f5 40. f4 ♔g4 41. h6 gxh6 42. ♔e4 hxg5 43. f5 ♔h5 44. ♔e5 g4 45. f6 g3 46. f7 g2 47. f8=♜ g1=♜ 48. ♔d6 And White is fighting for a draw.) 37... ♜h1 38. ♜e3 ♜xh5 39. ♜e8 h6 40. f4 hxg5 41. fxg5 ♜h3 42. ♔g6 ♜xb3 43. ♔xg7 ♜b4∞It is hard to say who is playing for win here.; 35... g6 36. h6 And the h7 pawn is very weak.]

36. ♜e3 White's plan is to achieve the perfect set-up Ng3-Ke5 and then the f-pawn will promote very easily and unfortunately for Black it is hard to avoid this.

36... ♜h1 [36... ♗e8 doesn't work because White will win the

pawn after 37. ♖xc5 ♕xh5 38. ♖e6+±; 36... ♖d8 37. h6 gxh6 38. gxh6 ♕e8 39. ♖f6 ♕g6 40. ♖e6↑; 36... ♕c8 37. ♖g3 ♖d8 38. ♖e5↑ And the white f-pawn will promote.]

37. ♖g3 ♖h4+ 38. ♖e5 ♖h3 39. f4 ♖d8 [39... ♕g4 40. f5 ♕xh5

41. ♖e6! And now the strong black bishop doesn't have enough space! (41. f6 41... gxf6+ 42. gxf6 ♕f7∞) 41... ♖d8 (41... ♕g4 42. ♖f7 ♖xg3 43. ♖xg3 ♕xf5 44. ♖xg7 ♖d6 With some practical chances, but objectively the position is winning for White. ; 41... ♕e8 42. ♖e7+—)

42. ♖d3+! White chooses a new target. (42. f6 42... gxf6 43. gxf6 ♖e8 44. ♖d6+ ♖f7 45. ♖xc6 ♕g4 46. ♖xb6 h5 47. ♖f1 ♖xe3 48. ♖xe3 ♕e2 Black has good counterplay thanks to the h-pawn.) 42... ♖e8 43. ♖d6 ♕g4 44. g6 And Black will lose all pawns on the queenside, as 44... ♕xf5 doesn't work because of 45. ♖e3+—]

40. f5 ♖h4 [40... ♕e8 41. g6+—]

41. f6 gxf6+ 42. ♖xf6 ♕e8 White is winning very easily as Black is not able to stop the pawn from promoting.

43. ♖f5 ♖f4 [43... ♖xh5 44. ♖xe8+ ♖xe8 45. ♖g7+—]

44. g6 hxg6 45. hxg6 ♖g4 46. ♖xe8+ ♖xe8 47. g7 ♖d7 48. ♖h4 ♖xg7 49. ♖xg7 ♖e6 50. ♖f3 ♖f5 51. ♖f7 ♖e4 52. ♖e6 ♖d3 53. ♖d6 ♖c3 54. ♖xc6 ♖xb3 55. ♖b5 And White is on time. 1-0

Editorial Preface

The World Cup has reached the quarter finals. Some of the favorites remain, while some have dropped out. We have seen many amazing matches with extreme tension and huge fighting spirit. Games of over 170 moves! Just yesterday we saw a really spectacular tie-break between Tomashevsky and Morozevich, or the 2 amazing fighting games from the Mamedyarov-Kamsky match, or Grischuk-Le Quang Liem.

At the moment, 2 of the top favorites are still in the competition, Kramnik and Caruana. But players like Kamsky, or even Andreikin should be not cut off. Andreikin has showed a clear strategy so far, to make 2 draws in normal chess and beat his opponents in rapid in blitz, which has been working so far!

The tension is growing and of course we will keep you updated. As usual, we bring you the most interesting commented games from the World Cup in Norway!

We also have other great news for you: the "Chess Evolution Puzzle Hero" has finally been released and is available in App and Android stores. It is running on Iphones, I pads and Android systems. Enjoy solving puzzles and get yourself into the high scores!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Kamsky, Gata(2741)

- Mamedyarov, Shakhriyar(2775) [B47]

FIDE World Cup 2013(4.1), 2013.08.20

[Arkadij Naiditsch]

We are in the 1st game of the 4th round of the World Cup. Only 16 players are left and the matches are getting more and more tense, every game is worth more and more and from time to time players tend to take more "safe" decisions. This does not count for Kamsky. In a great attacking game he managed to mate Mamedyarov, who has been playing just great chess in the last few months, winning almost everything he could.

1.e4 Kamsky also plays 1.d4, which makes the preparation harder.

1...c5 Mamedyarov also plays 1...e5, but it seems that he is ready for a heavy fight.

2.♘f3 e6 3.d4 cxd4 4.♘xd4 ♘c6 The Paulsen with 4...Nc6 is not a rare opening at all. Lately Black has been achieving quite solid results with it.

5.♘c3 ♙c7 6.f4 I like to play this move myself as White. The main line is 6. Be3.

6...d6 I don't think 6... d6 should be counted as a main danger for White, as he is now getting a nice version of a Sheveningen. [6...♘xd4 and; 6...a6 are the two critical continuations.]

7.♙e3 Leaving White with both castle options open.

7...♘f6 8.♙f3 [I think that 8.♙e2 followed by Qd2, 0-0-0 and g4 can also be unpleasant for Black.]

8...a6 9.♙d3! With this move Kamsky makes it clear that he is going for a short castle and wants to achieve some sort of Sheveningen position with a tempo up.

9...♙e7 10.0-0 0-0 11.♙h1 Now we are totally in the Sheveningen, but with a very nice version for White. Usually White has to play Be2 first and then Bd3 loses a tempo. I think that by now it is clear that something went very wrong for Black in the opening.

11...♙d7 Black is preparing the b5 move.

12.♙ae1 b5 13.a3! A very good positional move. Before taking action in the center, White needs to secure the position of the knight on c3.

13...♙ab8?! Very risky play by Black. Already being in a bad version of the opening, Black should clearly have paid much attention to White's attacking ideas and a move like Rab8 doesn't help in the defence. [13...♙fe8 would have been a more solid choice.]

14. ♖xc6! Another very strong move. Now Black is almost forced to play Bxc6 and the white queen on h3 is going to take a perfect place.

14... ♗xc6 15. ♔h3 White wants to push e5 as well as f5. Things are getting very dangerous around the black king.

15... ♖fd8 A logical move with the idea of pushing d5, but maybe again a move like Rfe8 would have been more careful.

16. ♗d2! Another very strong positional move, based on exact calculation. Immediate pushes would not bring White much, so Kamsky is preparing the deadly e5.

16... d5 Black already didn't have much of a choice. [16... g6 17. f5 And White's attack seems to be very strong as well.]

17. e5 ♖e4 It seems like Black is fine, but of course with the move 16. Bd2! White was preparing an atomic bomb on Black's kingside...

18. f5!! That was the point behind all of White's play. Of course 18. Bxe4 could only be good for Black.

18... ♖xd2 Mamedyarov accepts the challenge and actually Black didn't have anything better. [The greedy 18... ♔xe5 19. ♖xe4 dxe4 20. ♗c3 leads to an almost lost position on the

spot.; 18... exf5 was not much better either: 19. ♔xf5 ♖f8 20. e6 And White has a huge advantage.]

19. fxe6 White wants to mate by playing Qxh7.

19... ♖e4 At first sight it looks like Black is doing more or less solid.

20. exf7+ ♔h8 How to open the black position now?!

21. ♖xd5! Another very nice move. I am sure that Kamsky saw it all before playing 16. Bd2. The US Grandmaster really seems to be in top shape.

21... ♗xd5 22. ♖xe4 This is why 21. Nxd5 was so important. The white bishop on d3 is alive and helps in the continuation of the attack against the black king.

22... g6 Clearly the best defence. Black is making space for his king on g7 and tries to create a blockade on the dark squares.

23. ♖ef4?! A very logical move, but quite a serious mistake. [White should have been more careful to guarantee himself the e6 move: 23. ♖e3 Followed by e6, with a big advantage.]

23... ♔g7? And Black also misses his chance with a very human move... [23... ♔c6! would have turned the game completely. The position would be very unclear now. White has no e6 which means that the f7 pawn could eventually get lost in the future if Black managed to consolidate with Kg7-Rf8. The position remains very sharp now.]

24. e6 White has connected his pawns, so the game is now almost over.

24... ♖f8 White wanted to play f8Q and Rf7 with mate.

25. ♕e3! A very strong move! Black cannot control the d4 and e5 squares at the same time, which means his position is just lost!

25... ♘c5 26. ♕e1 Now the weak spot is the c3 square.

26... ♘d6?! Black is making it a bit too easy for White.
[After 26... ♘e7! White would have to bite a much harder nut to win the game. 27.c4! looks like White is going to mate, but it is not so. 27...bxc4 28. ♕c3+ ♖h6 The black king is one step away from mate, but this step is hard to make. At least there is no easy way of finishing the game. 29. ♘xc4 With "just" a big advantage for White.]

27. ♖h4 Now the game is over. White wants to mate by playing Rxh7-Qh4 and Qf6.

27... ♘e7

28. ♕e3! With the double threat of playing Qh6 and Qd4.

28...h5 [28... ♘xh4 also leads to mate after 29. ♕d4+ ♖h6 30. ♕xh4+ ♖g7 31. ♕f6+ ♖h6 32. ♖f4+—]

29. ♕d4+ ♖h6 30. ♖xh5+ Now after 30... Kxh5 31. Qxd5 Kh6 White has a wide choice of winning moves, one of them is 32. Qe4 and the pawn on g6 is going to fall. A really fantastic game by Kamsky! **1-0**

(2) Svidler, Peter(2746) - Radjabov, Teimour(2733) [E71]

FIDE World Cup 2013(3.1), 2013.08.17
[Balogh Csaba]

Already in the third round, at the stage of the best 32, there were some huge fights between two top players. We will now examine how Svidler outplayed Radjabov.

1.d4 Since the Candidates tournament in March, 1.d4 is not a surprise anymore by Svidler. Before this year, he only played 1.e4.

1...♘f6 2.c4 g6 3.♘c3 ♙g7 Radjabov goes for his favorite King's Indian defence, a sharp fight is ahead of us.

4.e4 d6 5.h3 O-O

6.♙g5 Svidler has already tried this relatively rare system against Grischuk a few months ago, so it could not come as a surprise for Radjabov.

6...♙e8 A rare move with the idea of playing the standard King's Indian motif of e5, but first Black had to leave from dxe5 dxe5 Qxd8 Rxd8 Nd5. However Svidler was well prepared against this move! [The main line continues with 6...c5 7.d5 e6 8.♙d3 exd5 9.cxd5 just as the Svidler-Grischuk game.]

7.♘f3 e5

8.dxe5! dxe5 9.♘d5! This kind of simplification is always a critical test of e5. White forces the improvement of his pawn structure after getting the c-pawn to d5, the question is always if the direct undermining attempt with c6 is enough to get enough counterplay or not...

9...♘xd5 10.cxd5 c6 11.♙c4! White would like to have a minor piece on d5, which would guarantee him a small advantage in the middlegame.

11...♘d7 A logical move, Black wants to play Nb6 before taking on d5 in order to force White to take back with the e-pawn, but it has a drawback as well, that the knight on b6 is going to be misplaced. [11...cxd5 12.♙xd5 ♘c6 does not equalize either: 13.♙e3 Provoking the b6 move, otherwise Black could have traded the bishops with Be6. 13...b6 14.♙c1 ♙b7 15.O-O+= White has better pieces.]

12.O-O ♘b6 13.♙b3 cxd5 14.exd5+= The opening part of the game finished with White's clear advantage. Black's pieces are misplaced (the b6 knight and the e8 queen), therefore Black cannot launch a quick counterplay with e4, which would be obligatory for the equalization.

14...h6 [14...e4 is met by 15.♖e1! Black is in trouble. 15...♙xb2

16.♙h6! ♙xa1 (16...♙g7 17.♙xg7 ♖xg7 18.♗d4+ ♗g8 19.♖xe4 ♗d8 20.d6+- White is crushing.) 17.♗xa1 f6 18.d6+ ♗h8 19.♙xf8 ♗xf8 20.♖xe4+- With a winning advantage.]

15.♙e3 Threatening to play Bc5!

15...♗d8 Black tries to consolidate his pieces and frees the e8 square for the rook, but he is wasting too much time. [15...e4 16.♘d2 f5 is met by 17.♙c5 ♖f7 18.♙xb6! axb6 19.♘c4± With a big advantage!]

16.♗d2! Developing with tempo.

16...♗h7 17.♖fe1 ♖e8 18.♖ac1! Svidler brings all his pieces to their ideal squares. He is intending to push d6 to open the

diagonal for the b3 bishop and to invade the 7th rank with his rook. Normally Black should have his knight on d6 as a blockader to be fine, but here it is just impossible.

18...e4 Radjabov is searching for counterplay.

19.♘h2! The only move to keep the d5 pawn protected. The knight is temporarily misplaced, but the e4 move gave a new option for White to play Bf4 and using the c7 square.

19...♗d6 [19...♙d7 is met by 20.d6 ♙e6 21.♖c7+- Black collapses.; 19...♘d7 with the idea to get the knight to d3 is also slow. 20.d6 ♘e5 21.♖c7 ♙e6 (21...♘d3 22.♖xf7 ♘xe1 23.♙d4+-) 22.♙f4 ♘d3 23.♖xe4+-]

20.♙f4 ♙e5 21.♖xe4 White is already materially ahead and his position still has all the plusses that it had before.

21...♙xf4 22.♖xf4 ♙f5 Black desperately tries to complicate the matters, but of course it does not help.

23.g4! Svidler does not even give time to finish the development.

23...♙e6 [23...♖e4 24.♖f3! is an important detail, when Black loses the f7 pawn.]

24.♘f3! Perfect calculation, White protects his queen and he therefore threatens to play dxe6 and the pawn on d5 is indirectly protected.

24...g5 [24...♘xd5 drops the knight after 25.♖d4 ♜ad8 26.♖d1+-]

25.dxe6 White gets a completely winning position after this nice exchange sacrifice. [The machine would have finished the game with 25.♖f6! 25...♘xd5 26.♘xg5+! hxg5 27.♙c2+ ♔g7 28.♙xg5+ ♔f8 29.♖h6+- but Svidler's decision is more human.]

25...♙xf4 26.♙xf4 gxf4 27.♖c7+- Black's position is much worse than it might look at first sight. The b6 knight is still dead, while his king is suddenly in a mating net and the e-pawn also has many potential threats.

27...♔h8 [27...♖f8 28.e7 and Bxf7 next wins.]

28.♖xf7 ♜ad8 [28...♖f8 29.e7+- and; 28...♘c8 29.♘e5+- are equally hopeless from Black's point of view.]

29.e7 The rook cannot leave the back rank because of Rf8! [29.♘e5+- was also good enough with the idea of Ng6-Kg8 e7.]

29...♖b8 All moves are winning now, but Svidler finds the most pretty one.

30.g5! With the threat of g6 and Rh7 mate.

30...♖g8 [30...hxg5 31.♘xg5+- Rh7 mates next move.]

31.♙c2 ♜g7 32.♖f8+ [Black resigned in view of 32.♖f8+ 32...♖g8 33.♖xb8 ♜xb8 34.♙g6+- A convincing victory by the winner of the previous World Cup!] **1-0**

(3) Gelfand, Boris(2764) - Moiseenko, Alexander(2699) [D38]

FIDE World Cup 2013(3.1), 2013.08.17

[Balogh Csaba]

A nice positional lesson by Boris Gelfand.

1.d4 ♘f6 2.c4 e6 3.♘f3 d5 4.♘c3 ♙b4 Moiseenko plays his usual solid Ragozin defence and Gelfand replies with a safe system, where he might fight for a small advantage and he never can be worse. A good strategy for knock-out tournaments.

5.♙g5 h6 6.♙xf6 ♚xf6 Black's main idea is to fight against the center with c5, with his next move White prevents this by luring the knight to c6.

7.♚a4+ ♘c6 8.e3 O-O 9.♙e2 White completes the development. Moiseenko himself played 9... Bd7 here a few months ago, but this time he deviates with a standard motif.

9...dxc4 In these kind of lines, when the knight was forced to go to c6, Black has the typical plan of taking on c4, followed by Bd6 and e5. This plan is well supported by the c6 knight.

10.O-O

10...♙d6 [10...a6 is probably a better move. Black threatens to protect the c4 pawn with Bxc3 and b5, so White cannot delay the recapture anymore: 11.♙xc4 ♙d6 11...b5 obviously did not work because of the pin, Bxb5. In comparison to the game, the Black pawn is on a6 and it prevents the Nb5 motif and White had to take with the bishop on c4, therefore the queen remains misplaced on a4.]

11.♚xc4 e5 Black consequently continues with his plan. [11...a6 is usually a useful preparation, but here White gets an edge after 12.♘e4 ♚e7 13.♖ac1+= ♙d7 could be met by 14.♘c5+=]

12.d5!

12...♘d8? This is definitely not the right place for the knight.

[12...♖b8! was the critical move. It is of course a bad feeling to retreat to the initial square, but at least the knight can be improved through d7. 13.♗e4 ♕d8 14.♖ac1 ♘d7 White is better, but Black can fight...; 12...♗e7 is also bad because it cuts the queen's way back. White makes use of it with direct play: 13.♗e4 ♕g6

14.♗h4! ♕h7 15.♗xd6 cxd6 White can choose between many good options here. 16.♖ac1± (16.♕c7 16...♗xd5 17.♕xd6± White will soon win the e5 pawn.)]

13.♖ac1! Gelfand does not decide yet whether to play Nb5 or Ne4. In both cases the rook must stay on c1 to stay ready for the invasion through the c-file.

13...♕e7 [13...a6 is also bad since after 14.♗e4 ♕e7 15.♗xd6 cxd6 16.♕c7± White has reached everything he could.]

14.♗b5 ♕f5 [If Black tries to get rid of his weakness with 14...c6 he ends up in trouble after 15.♗xd6 ♕xd6 16.♖fd1± The placement of the d8 knight is terrible. Black has problems with the e5 pawn.]

15.♗xd6 cxd6

16.♗d2! An excellent positional move! White wants to play Qc7 followed by Nc4, attacking the d6 weakness. [The direct 16.♕c7 was also very tempting, but it is actually premature because of 16...♕xc7 17.♖xc7 ♗e4! With 16.Nd2 White also prevented this idea. 18.♖d1 f6! Followed by Rf7, kicking out the rook from the seventh rank. Black is only slightly worse.]

16...f6 Black wants to defend the seventh rank with Rf7. [16...♖c8 leaves the a7 pawn unprotected and White immediately makes use of this: 17.♕a4 a6 18.♖xc8 ♗xc8

White wins after the subtle maneuver: 19.♕c2! controlling the f5 square. The bishop is trapped, it can only move to d7, but then 19...♗d7 20.♕c7+–]

17.♕c7 ♖f7 18.♕xe7 ♖xe7 Black succeeded in parrying the direct loss of material, but positionally he is still doing very badly. Gelfand plays the most logical plan, he doubles his

rooks on the only opened file.

19.Rc3! Rxc8?! Moiseenko follows the general principle and tries to exchange some pieces in his cramped position, but it has concrete problems... [Black should have waited passively with 19...Kf8 20.Rfc1 Rb8± but of course it cannot lead to anything good in the long term.]

20.Rxc8! This is much stronger than 20.Rfc1 and we will soon get the point.

20...Rxc8 21.Rc1 Rd7 Black must control the c8 square. [21...Rf5 is met by 22.g4 Rg6 23.Rc8 Re8 24.Ra8 a6 25.Rc4+- wins material.]

22.Rc4! Rf7 There was no other way to protect the pawn, but after the next move it falls anyway.

23.Rh5! The game is over! Sometimes chess is very easy.

23...Re8 24.Rc8 Black is totally pinned. He loses big material now...

24...Kh7 25.Rxe8 Rxe8 26.Rxf7 Rxc8 27.g4 Rc2 Black tries to get counterplay with his queenside pawns, but after taking on d6, the d-pawn is promoting very fast.

28.Rxd6 Rxb2 White has many winning plans, Gelfand finishes the game in style.

29.Re6 Rxa2

30.Rf7! White controls all the squares of the d-pawn with his bishop and knight. White only needs to push it now.

30...Rd2 31.d6 Kg6

32.e4! This is the easiest. White closes the d-file with Bd5 on

the next move and the pawn promotes.

32...a5 33.♙d5 [Black resigned in view of 33.♙d5 33...♖xd5 34.♘h8+! This is of course a key resource, which White had to foresee... 34...♙g5 35.exd5+—] **1-0**

(4) Giri, Anish(2737)

- Granda Zuniga, Julio E(2664) [E34]

FIDE World Cup 2013(3.4), 2013.08.19

[Arkadij Naiditsch]

We are in the rapid tiebreak of round 3. Granda Zuniga lost the first normal game with White in a totally winning position and in the second game he managed to win with Black! He won the first tiebreak game with White, so he now needed to hold this one with Black to proceed to the next round. We are not going to watch the best game ever played, but I personally like the beauty in chess and a position which we are going to face clearly deserves the attention! :)

1.d4 ♘f6 2.c4 e6 3.♘c3 ♙b4 4.♚c2 Giri was clearly the one who was better prepared in this match, but Granda Zuniga managed to outplay him in every game. This game is not different to the 3 previous ones.

4...d5 [4...O-O this is the main line and I think Kramnik has analysed it until the end, showing really fantastic results here with Black.]

5.cxd5 ♚xd5 6.♘f3 ♚f5 This is nothing new either.

7.♚b3 Of course Giri keeps the queens on the board. [7.♚xf5 7...exf5 leads to an about equal endgame.]

7...♖c6 8.♗d2 0-0 9.h3 All this is still theory. The position is very complicated.

9...♗xc3?! I am not sure why Granda Zuniga played this move. It is obvious that White will have a small but pleasant advantage after it. Maybe Black did not want a theoretical battle or maybe he was just out of book?! We will never know...

10.♗xc3 b6 Black is trying to cover the white squares, which is very logical but the bishop pair is clearly giving White a small edge.

11.g4 [The simple 11.e3 11...♗b7 12.♗e2 should also be slightly better for White.]

11...♔d5 Against the young guys, let's enter the endgame! :)

12.♗g2?! I don't like this move. Why destroy the pawn structure if it is not necessary?! [12.♔xd5 would give White a clear advantage in the endgame.]

12...♔xb3 13.axb3 ♗b7 It was now time for White to make a plan. What's next, how to make use out of the open a-file, etc...

14.0-0 A good move. It didn't make much sense to keep the king in the center. [14.♗e5 didn't bring much, as after 14...♗d5 15.♗xc6 ♗xc6 Black is more or less fine.]

14...♗fc8 Black is trying to consolidate as much as he can.

15.♗fc1 [It was the last chance for White to play 15.♗e5 15...♗d5 16.♗xc6 ♗xc6 and now it is important to play 17.♗d2! (17.♗fc1 would lead to a minimally better endgame. 17...♗xc3 18.♗xc3 ♗xg2 19.♗xg2 Black still has to work, but has good chances of holding this endgame.)]

15...♗e7! A good move. Now it is not easy for White to play Ne5 without exchanging the bishop and a typical move like Bf1 with the idea of Nd2 is of course totally destroying the pawn structure after Black's Bxf3.

16.b4 White is acting against a5.

16...♗e8! Granda Zuniga is showing great endgame play. The knight on d6 is going to be a hero!

17.b5? Where is Giri going? The pawn on b5 is just going to be under attack. [17.♗d2 would still leave White with a slightly more pleasant endgame.]

17...♗g6 Logical and strong. [Of course not 17...♗d6 18.♗b4 I guess this is what Giri was hoping for.]

18.♗b4 It is already hard to give White any advice...

18...♗f4 19.♗f1 White kept the bishop pair, but everything else went wrong.

19...♞d3! The most simple. Of course 19... Bxf3 was also an option, but why keep 2 knights on the board for just one strong d5 square. The black bishop is going to be a superb piece.

20.exd3 It is not easy to play such a move, but there were no other moves left.

20...♞xf3 Let us take a look a fresh look at the position. Who likes the white pawns structure?! :)

21.♞e7?! This move already doesn't make any sense at all. White should have tried to double on the a-file at least.

21...f6 Simple and good. Black is bringing his king closer to the action.

22.♖a4 ♞f7 23.♞a3 ♖d8! A nice move. The black rook is going to take an great position on d7.

24.♞h2 ♖d7 25.♞g3 White is trying to bring his king into the game, but where is the sense of it now...

25...♞b7 26.♞f4 a6! Killing White's last hopes. The only blacks weakness was the a7 pawn and now it is going to disappear.

27.bxa6 White doesn't have anything better.

27...♖xa6 28.♖xa6 ♞xa6 White's position is getting worse

and worse, with really no chances of winning.

29.♞e3 ♞b7 Black is bringing his bishop back to d5.

30.♞e2 ♞d5 31.♞b4 And now comes the last step of Black's domination:

31...♖d8! Great! The a-file now belongs to Black!

32.h4 ♖a8 33.f4 c6 Black has a very safe position now and not much can happen to him...

34.h5 ♞c7 Black is bringing his knight to a better square.

35.g5 Another strange move from a practical point of view. Of course White is doing badly, but to close the kingside does not increase the winning chances...

35...♞b5 36.h6 g6 37.♞d1

37...f5 And everything is closed! We should not forget that White needs a win.

38.♞e1 ♞e8! The last step. Black is bringing his king to d7. Now there is not even much to blunder anymore...

39.♞b4 ♞d7 40.♞c2 Giri's moves are hard to understand...

40...♞c7 41.♞d2 ♞b5 42.♞c3 ♞c7 Black starts to keep on waiting. A really beautiful position! I guess in a different situation White would have to work very hard for a draw, but

in our case Black is clearly satisfied with passing to the next round.

43.♙d1 ♘b5 **44.**♙c2 ♘c7 **45.**♙d2 ♘b5 **46.**♙e2 ♘c7 **47.**♙e3 ♘b5 **48.**♙d1 ♘c7 **49.**♙d2 ♘b5 **50.**b3 Giri is moving on to a new plan of playing b3, but Granda Zuniga is not really impressed.

50...♘c7 **51.**♖c4 This already looks funny! :)

51...♖a1 **52.**♙e2

52...b5! Who needs an exchange!?! :)

53.♖c1 ♖xc1 **54.**♙xc1 ♙xb3 What a destruction of White's hopes.

55.♙f3?? Even with his last move, Giri is making a huge mistake. He had still one hope, that after the logical 55...Bd5 White is suddenly winning after 56.Bh5! The last trap. What a game, we rarely such an outplaying on the top level. I guess Giri is back and has started practicing a bit of endgames... :) **1/2-1/2**

Endgame section

(15) Ivanchuk, Vassily(2731)-Kramnik, Vladimir(2784)

FIDE World Cup 2013(4.1), 2013.08.20

[CE Team]

31.fxe5 The position looks like it is close to being equal, but Black still has some practical chances. The question is, how to make use of it?! Kramnik will show us how to push your opponent to the limit!

31...♞b3! The only move to go on, as of course Black's only chance is to keep the a-pawn alive. [31...♞xd3 would have been the wrong choice. 32.♞xd3 ♞c3 33.♞xd4 ♞xa3 34.♞d8+ ♔h7 35.♞a8 With an easy draw.]

32.♞xd4 White probably doesn't have anything better.

32...♞xa3 Black wants to play Rc1 next and the queen endgame could suddenly be really dangerous for White.

33.♞g2

33...♞b3! Another very strong move. Black covers the white squares and what is most important is that he doesn't give White a chance to push e6 in the future. The main winning idea of Black is of course to push the a-pawn as far as possible.

34.♞d7 Well played by White, there is no time to be passive. White needs to create counterplay as fast as he can.

34...♞a8 35.♞d3 This is also the correct move. In case of a rook endgame, it is much better to block the a-pawn on a4 than on a2 or a1.

35...♞e6 Both players were getting short on time and Kramnik puts Ivanchuk in front of a difficult decision. Is the position after the exchange of queens a draw or is it better to defend with the queens on the board?!

36.♞b7! A good choice. [36.♞xe6 would have led to a more

tricky endgame. 36...fxe6 37.♖a3 And now it is important for Black to play 37...g5! The position probably still remains a draw, but White needs to be careful now, which is of course unpleasant when you think the draw is so close.]

36...♙c8 Black has no choice but to offer the exchange of queens again, in order to keep the rook on the a-file, which is his only chance to be better.

37.♙f3? This is already a serious mistake. Now Black's advantage is getting clearer. [The right move was 37.♙xc8+ 37...♖xc8 38.♖a3 ♖a8 Black needs to put the rook behind the pawn, which is his only chance to win. 39.f4 Followed by Kf3-Ke4-g4-f5. This position should be a clear draw.]

37...♖a5 Black frees his queen, who was protecting the rook on a8.

38.♖a3 ♙e8 And now we can see very clearly that the draw is not an easy task to achieve here at all. White can quickly find himself in big danger.

39.♙e4 g6 A prophylactical move. Black cannot do anything forced, so he just improves his position.

40.f4?? What a horrible positional mistake, as the white king is now going to find himself in big trouble. [40.h4 was the right move and after 40...h5 White should just keep on "waiting"

with 41.♙h2 Still Black remain some winning chances, but of course position is close to a draw]

40...h5 Now Black has a lot of ways to make White's life miserable. In a lot of lines a move like Qd7 followed by Rd5 can be a real killer.

41.h4 ♙g7 Before the final action, Black puts all his pieces on the perfect squares. In the current position, even an exchange of queens could lead to a quite unpleasant position for White, but of course it is better for Black to keep the queens on the board. The free a-pawn and the mating threats against the white king give Black very good practical chances to win the game.

42.♙b4?? This is the last shocking move of the game, after which it is really over. It is even difficult to understand what White missed here... [42.♙h2 would leave White with some hopes of surviving the game.]

42...♙c6+! The game is now totally over.

43.♙f2 ♖b5 Black's mating attack is just crushing.

44.♙d4 ♙c2+ 45.♙f3 ♖b2 A really tough loss for Ivanchuk, who showed slightly shocking play for the chess genius that we know him to be! :) **0-1**

(16) Le Quang Liem(2702)-Grischuk, Alexander(2785)

World Cup (3.1), 2013.08.17

[CE TEAM]

Despite the material equality, White has a clear advantage thanks to his protected passed pawn on d5. In all the endgames, it gives decent chances for White to win the game. Grischuk was in huge time trouble and his position was pretty unpleasant, therefore he takes a bad decision...

32...Qe7? [The best practical chance was to try 32...R8c7 33.Rxc5]

33...bxc5! when White's advantage is doubtless, but to convert it into full point requires a lot of effort, because he must always watch out that the c-pawn doesn't advance too far and gives Black counterplay... 34.Rc4+=[

33.Rxc5 Rxc5 34.Rxc5 Qxc5 [The queen endgame is quite a hopeless case after 34...bxc5 35.Qa6! White threatens to play Qc6, followed by d6, winning the c5 pawn. 35...Qc7 (35...f6 36.Qc6+—)

36.Qf6! This is a key resource, which Grischuk might have overlooked when he played Qe7. Otherwise Black could have brought his king to e7 with a good blockade against the d-pawn, but now the d6 threat is just too strong to deal with. For instance after 36...c4 37.d6+— and Qh8 will mate.]

35.Qxc5+ bxc5 This endgame is winning for White. The strength of the protected passed pawns is especially big in pawn endgames. The path to the win is quite instructive.

36.Kf1 White has to transfer his king to c4.

36...♔e7 37.♔e2 For Black the best practical chance is to push c4 and get his king to c5. Grischuk should have tried it now or a move later, although it objectively does not affect the final outcome.

37...f5 Black tries to get rid of the protected passed pawn, but obviously White has no intention to give it away... [37...c4 38.♔d2 ♔d6 39.♔c3 ♔c5 40.g4 g5 (40...f6 leads to the same after 41.h4 h6 Now all moves will lead to the same result. 42.a4 h5 43.gxh5 gxh5 44.f3 a6 And we will see the winning method in the 40... g5 line.) 41.a4 a6 42.f3 h6 It looks like Black has many tempi left and White has no way to make use of the d5 pawn. The c5 king safely protects the c4 pawn. However the reality is different...

43.♔c2! White starts to make triangulations with the king, using the fact that Black cannot play Kd4 or Kb4, since it has to block the d-pawn. 43...♔b6 44.♔b2! This is the zugzwang! Black should play Kc6 now, but it is impossible... 44...♔c5 45.♔c3 Black is forced to move one of his pawns... 45...f6 White has won the first tempo, time to start the second triangulation...

46.♔c2! ♔d6 47.♔d2 ♔c5 48.♔c3! And again Black has to move his pawn. 48...a5 49.♔c2! (But not 49.d6? 49...♔xd6 50.♔xc4 ♔c6=) 49...♔b6 50.♔b2! ♔c5 51.♔c3!+-]

38.f3! ♔d6?! This allows the White king to c4, after which the win is easy. [38...fxe4 39.fxe4 c4 was still a better try, but White wins with the same technique as in the 37...c4 line: 40.♔d2 ♔d6 41.♔c3 ♔c5 In such pawn endgames, when we try to get our opponents into zugzwang, the best technique is to move with the pawn, which has already moved once. So, if it White's turn, he should play h4, and if it was Black to move, g5 would have been his best move!

42.h4! h6 (Whenever Black plays 42...♔b5 43.d6! wins! 43...♔c6 44.♔xc4 ♔xd6 45.♔b5+- Winning either the a7 or the e5 pawn.) 43.g4 g5 44.hxg5 hxg5 45.a4 a5 Here again

White uses the zugzwang technique, which we already know.
46.♔c2! ♕b6 47.♕b2 ♖c5 48.♕c3+-]

39.♔d3 f4 40.h4! This is the most principled win, White fights for all the tempi on the kingside. [40.♕c4 was also good enough. 40...g5 41.♕b5 a6+ 42.♕c4 And Black soon gets into zugzwang. 42...h6 43.a3 h5 44.a4 a5 (44...h4 45.a5+- And the c5 pawn will fall because of the zugzwang.) 45.♕b5+-]

40...♕c7 41.♕c4 ♖d6 [41...♕b6 does not change anything. 42.a4 With the threat of a5! 42...a5

43.d6 ♕c6 44.d7 ♕xd7 45.♕xc5+- White collects either the e5 or the a5 pawn.]

42.♕b5 h6 43.♕c4 a6 44.a3 Black resigned in view of White either playing a4-a5 in the next two moves and creating zugzwang, or if Black prevents it by playing a5, Kb5 decides the game. **1-0**

Editorial Preface

And we are in the final of the World Cup between Kramnik and Andreikin, both Russians.

Kramnik made his way quite convincingly, pushing his opponents to the limit both in normal and in rapid chess. He clearly deserves his place in the final, thanks to his huge preparation and very nice chess.

Andreikin had a completely different strategy. In normal chess he was more trying to survive into a draw and then he was crushing his opponents in the rapid or blitz games, where he has been showing fantastic play.

There is a difference of almost 100 rating points between these 2 players, but Andreikin is quite an unpleasant opponent for Kramnik. He actually lost his last two games against him, one in the Tal Memorial and one in Dortmund. We can probably expect a very exciting and fighting match with big emotions!

The traditional super tournament in Poikovsky has also begun, with an average of over 2700. One of the favorites to win it is probably Jakovenko, the highest rated player of the event, who had a good start with 1,5/2.

We logically stay focused on the World Cup and bring you the best games with commentaries in your new issue of the CEWN.

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Andreikin, Dmitry(2716)
- **Karjakin, Sergey(2772) [A46]**

FIDE World Cup 2013(4.3), 2013.08.22
[Balogh Csaba]

A very effective and straightforward attacking game by Andreikin!

1.d4 ♘f6 2.♞f3 e6 3.♙g5 A typical choice by Andreikin, who likes avoiding long theoretical fights. Against Karjakin it is an especially smart decision, as he is just extremely well prepared.

3...d5 4.♞bd2 h6 5.♙h4 c5

6.e3 White clearly does not play for an opening advantage, he just wants to obtain a playable position.

6...♞c6 7.c3 ♚b6?! I don't like this move so much, the queen gets misplaced on b6. [7...♙e7 seemed to be more logical. Karjakin was probably worried about 8.♙xf6 ♙xf6 (8...gxf6! works. Black has damaged the pawn structure, but the bishop pair compensates for it.) 9.dxc5 ♚e7 10.♞b3 White preserves his extra pawn.]

8.♚b1 ♙e7 9.♙d3 ♞h5 A typical idea with the aim of simplification. [9...♞d7 The knight would have been better placed here, but now White plays 10.♙g3! Preserving the bishop and the d7 knight is now misplaced. That is why Black moved the knight to h5.]

10.♙xe7 ♞xe7

11.O-O [Quite an unusual, but an interesting motif would have been 11.dxc5! 11...♚xc5 12.♚a4+ ♙d7 13.♚g4! Black is forced to seriously weaken his pawn structure by playing 13...g6 14.♞e5+= With an advantage.]

11...♞f6 Black quickly gets his knight back from the rim of the board.

12.♞e5! Andreikin builds up the standard attacking position with f4. This is the dream of any White players who likes playing this solid structure with d4-e3-c3 pawns.

12...O-O 13.f4 ♞e8 Another artificial move. Karjakin clearly did not feel comfortable in this position. [13...♙d7! suggested itself in order to trade the bishops with Bb5. Black should not worry about Nd7, as White is not intending to give up his strong knight. White should probably play 14.a4 but at least it creates a potential target for Black on a4.]

14. ♖h5! Andreikin consequently builds up his attack. He is intending to bring his attack along the third rank with Rf3 or a pawn rush with g4-g5 is also in the air. Black is in trouble.

14...f6 [Closing the position does not solve the problems: 14...f5 15. ♖f3 ♘f6 16. ♖h4 followed by h3-g4 remains highly unpleasant from Black's point of view.]

15. ♘g6 ♘xg6 16. ♕xg6 Black has to lose an important tempo because the e8 knight is hanging. Otherwise f5 followed by Nf6 would have seriously eased the position.

16...♕d7

17.g4!! Yes, that is the way to play! White bravely attacks with g4-g5, the side attack in front of the king is principally justified because the center is closed!

17...cxd4 18.exd4 White keeps the c-file closed in order to avoid any kind of counterplay with the rooks.

18...♖d8 Black fights against g5.

19. ♘f3 Andreikin refreshes the threat of g5. [Actually 19.g5!? would have worked because 19...fxg5 20.fxg5 ♖xf1+ (20...♖xg5+ 21.♖xg5 hxg5 22. ♕h7+! wins an exchange and the game. 22...♖xh7 23.♖xf8+-) 21.♖xf1 ♖xg5+ 22.♖xg5 hxg5 23. ♕f7+ ♖h7

24. ♘f3! So far everything was forced and suddenly Black has serious problems. 24...♖h6 (24...♘f6 25. ♘xg5+ ♖h6 26. ♘xe6±) 25. ♘e5 ♕b5 26. ♘g4+ ♖h7 27. ♖f3 g6 28. ♕xe6+- With a winning advantage, but of course it is very difficult to find this, especially in a rapid game.]

19...♖c7 20. ♘h4 The g5 threat is in the air again and White has also created another idea to retreat the bishop to c2 followed by replacing it with the knight on g6.

20...♕b5 21. ♖fe1 [21. ♖f3!? was also strong, followed by g5 or Re1 first. Andreikin was maybe afraid of 21...f5 22.g5 ♕e2 but White wins after the following nice combination:

23.♙h7+!! ♔xh7 24.♚g6+ ♔h8 (24...♙g8 25.♚xe6+ ♙f7 26.♚xe2+-) 25.♚xe6! The bishop is hanging and White is threatening to play Ng6. 25...♙xf3 26.♘g6+ ♔h7 27.♘xf8+ ♔h8 28.♘g6+ ♔h7 29.♘e7+-]

21...♙d7 [21...♚xf4 does not solve the problems as after 22.♚xe6 White has crushing attack. 22...♘c7 (22...♘d6 23.♘g2!+- wins the knight on d6.) 23.♚e7+-]

22.f5 e5 [22...exf5 23.♚e7 is over, but the end could be very nice: 23...♚d6

24.♚xh6!! gxh6 25.♙h7+ ♔h8 26.♘g6#]

23.dxe5 fxe5 24.g5! White has reached the front line. The attack is breaking through.

24...♚c5+ 25.♙g2! White takes care about the king's safety. If Black tries to play with Bc6, he will hide his king on h3.

[25.♙h1 25...d4 Black gets counterplay with Bc6!]

25...d4 26.gxh6 ♘f6 27.♚g5 The new threat is Bh7 followed by Qg7 mate.

27...gxh6 28.♚xh6 At the moment Black is safe from the mate, but he cannot create any counterplay, while White only needs to occupy the g-file with the rook and then open it by moving with the king.

28...dxc3

29.♙h3! Rg1 is coming next.

29...c2 30.♚bc1 [Surprisingly 30.♚g1?? 30...cxb1=♚ wins for Black, since White has no good discovery check with the bishop.]

30...♚d4 31.♚g1 ♚d3+ 32.♚g3 A great attacking game! **1-0**

(2) Svidler, Peter(2746)

- Andreikin, Dmitry(2716) [B12]

Tromso NOR(5.2), 2013.08.24

[Balogh Csaba]

A short but very interesting game. Svidler managed to catch Andreikin in the opening, he got a nice advantage, but Andreikin found counterplay with really creative play and saved the game.

1.e4 It is very difficult to predict Andreikin's opening choice, he always arrives with something different right in the first move.

1...c6 So, this time the Caro-Kann.

2.d4 d5 3.e5 c5 A sideline compared to 3...Bf5, but this is also playable for Black.

4.dxc5 ♖c6 **5.♗f3**

5...♗g4 Black tries to get quick counterplay against the e5 and c5 pawns in order to get adequate compensation for the pawn.

6.c3 e6 [Black obviously does not fall into the opening trap with 6...♗xe5?? 7.♗xe5! ♗xd1 8.♗b5+--]

7.♗e3 [The alternative is 7.b4 in my opinion gives a small

advantage to White after 7...♗xf3 8.♗xf3 ♗xe5 9.♗b5+ ♗c6 10.O-O but Svidler decided to try another option.]

7...♗ge7?! Black played this move after a long thought, he was clearly out of preparation. [In the rapid tiebreak of this match Andreikin improved on this game with 7...♗xf3! 8.♗xf3 ♗ge7 9.♗b5 a6 10.♗a4 ♗a5 11.♗d1 ♗f5 12.b4 ♗xe3 13.fxe3 ♗c7 and he managed to equalize this time.; 7...♗xe5?? is still a blunder, but this time it is refuted by 8.♗a4! ♗d7 9.♗b5 ♗c6 10.♗xg4+--]

8.♗bd2

8...♗g6?! Another inaccuracy. [8...♗f5 was more logical, although Black does not get full compensation after 9.♗d4! Both pawns on e5 and c5 are well defended.]

9.♗f4 The most logical move, but it objectively spoils the advantage. [9.h3! was probably the easiest, although 9.Qa4 is also quite tempting. 9...♗xf3 10.♗xf3 ♗f5 (10...♗g7 11.♗d4+= White preserves his extra pawn.) 11.♗g5! Settling the bishop on f6 or after 11...♗e7 12.h4 h6 13.♗xe7 ♗xe7 14.b4 a5 15.♗b5± White is a pawn up.]

9...♗f5! Attacking the c5 pawn. [Svidler was probably expecting 9...♗g7 10.h3 ♗xf3 11.♗xf3 when White is just better, but Andreikin came up with a more clever plan...]

10.b4

10...g5!! Fantastic intuition! Black was already a pawn down and he sacrifices another pawn in order to gain activity. Andreikin was already quite low on time and he maybe played it slightly out of despair, but everything seems to work for him!

11.♙xg5 White had no other choice. [11.♙g3 is met by 11...h5 12.h3 ♘xg3 13.fxg3 ♙xf3 14.♖xf3 a6! It is very important to prevent Bb5 before winning back the pawn with Bg7. Black is completely fine!]

11...♚xg5! 12.♗xg5 ♙xd1 13.♖xd1

13...a5! Black tries to create some weaknesses before taking back one pawn. [In case of 13...♗xe5 White is just a pawn up, for instance after 14.♗b3!± preventing a5.]

14.♙d3 Trying to destroy the pawn structure. [14.b5 would leave the c5 pawn on its own. 14...♗xe5=; 14.a3 seems like the most challenging move. 14...axb4 15.axb4 ♗xe5 16.♙b5+ ♔e7 17.O-O ♙g7 The black minor pieces are excellently placed and Black is ready to invade with the rook on the a-file. It seems like he gets very good compensation for the pawn and even the machines are not impressed by White's position.]

14...♗h4! 15.g3 ♗g6 White has a difficult choice, which pawn should he give back, the b4 or the e5.

16.f4 [16.a3 is similar to 14.a3. 16...axb4 17.axb4 ♗gxe5 18.♙b5 ♙g7 Black has strong compensation, but it still looks like the only chance to keep some advantage. 19.♔e2 h6 20.♗h3 Ngf3 would have dropped the c3 pawn. 20...♔e7 21.♖a1 d4! Black gets counterplay!]

16...axb4 17.cxb4

17...♙e7! Andreikin keeps his calm nature and plays this cold-blooded developing move! [After the direct 17...♗xb4 Svidler had probably planned to play 18.♙b5+ ♗c6 19.a4 ♙xc5 20.♖c1! With the idea of Rxc6. 20...♙b4! 21.♖xc6! bxc6 22.♙xc6+ ♔e7 23.♙xa8 ♖xa8 24.♗xh7 ♖xa4 25.♔e2 ♖a2 26.♖d1 White maintains some advantage, although it is going to be extremely difficult to convert the extra pawn because of the active black pieces.]

18.♙b5 [The point of Be7 is that after 18.♘gf3 18...♘xb4 19.♙b5+ Black does not need to retreat the knight. 19...♖f8 20.a4 ♙xc5= gives Black equality.]

18...♙xg5 19.fxg5 O-O!? It is very nice that Andreikin is two pawns down, but he is not in hurry at all with restoring the balance. [19...♖xa2 was also fine.]

20.♙xc6 Svidler was so impressed that he preferred to offer draw. The game is balanced indeed. [20.♙xc6 20...bxc6 21.♘f3 (21.♖a1 21...♖fb8 22.a3 ♖xb4!) 21...♖xa2 22.O-O ♖b8 23.♖d4 (23.♖b1 23...♖a4=) 23...♖b2= Winning back the material and equalizing the game. What a nice save by Andreikin!] **1/2-1/2**

**(3) Andreikin, Dmitry(2716)
- Svidler, Peter(2746) [A45]**

FIDE World Cup 2013(5.3), 2013.08.25

[Arkadij Naiditsch]

Andreikin had an "easy" plan for the World Cup. Make 2 draws in normal chess and then win in rapid or blitz, which has been working just excellently. In 1/4 finals he won a very important and nice game against his countryman Peter Svidler. Let us take a closer look at what happened.

1.d4 ♘f6 2.♙g5 Not the most ambitious opening...

2...e6 3.♘d2 It is clear that White is just trying to get into the game without any hopes for an opening advantage.

3...h6 4.♙h4 White continues just being solid without giving away his f6 bishop.

4...c5 Very typical play for this kind of structures.

5.e3 White keeps the central pawn like a rock!

5...♙e7 6.c3 Now Black has to choose, to play d5 and Nc6 or t0 go for b6 and Bb7, both setups are very playable.

6...b6 7.♘gf3

7...♙a6 also looks very solid, but it may not be the most easy solution. [7...♙b7 looks like the best move to me and I don't

think that White has anything here.]

8. ♘xf6! A very good positional decision by White.

8... ♘xf6 9. ♘xa6 ♘xa6 10. ♘e4 White wants to play d5 next.

10... cxd4 11. ♘xf6+ ♔xf6 12. cxd4 We are now in an almost symmetrical position, but only almost! The position is actually not that pleasant to play for Black. The knight on a6 is a major problem and White will be now very fast to win the only open c-file.

12... ♔e7 Black is bringing his queen back, as this move is needed anyway.

13. 0-0 [Of course not 13. ♔a4? 13... ♔b4+]

13... 0-0 14. ♔a4 ♘c7 Black is bringing his knight to d5.

15. ♖ac1 ♘d5 White has the c-file, but Black's position is of course very solid. What can be White's plan now?

16. ♘e5! Another very good move by Andreikin. The white knight would be passive on f3 in case Black would be in time to play d6 next, so White is transporting it to d3.

16... d6 17. ♘d3 [White could have tried 17. ♘c6 17... ♔d7 18. ♖c2 but it seems that Black is fine after 18... a5]

17... ♖fc8 Black is fighting for the c-file.

18. h3 White does not need to hurry.. . The e4 push can be done at any moment.

18... ♔b7! A good move. Black is putting his queen to a nice square and Black should almost be careful about Rxc1 and Rc8 now.

19. ♔a3 Whites brings his queen to a6 but Black is getting the d7 square in exchange.

19... ♔d7 20. ♔a6 We can clearly see that Black is very close to equalize completely, his only problem is the c-file.

20... f5 I don't like this move. Black creates a lot of weaknesses in the position. [20... ♘e7 would have been a much more solid decision. Black just wants to play Rxc1 and Rc8 next, exchanging both pairs of rooks. Of course White is still a bit more active, but the position should be very close to a draw.]

21. ♖fe1 Andreikin continues putting his pieces onto good squares.

21... ♔f7 White has a couple of ideas now. One is to try and push e4 somehow, another one might be to try and go for f3 and e4. It could also be an idea to play a4 followed by a5, but Andreikin had another very creative move in mind.

22. ♘f4!? I like this move a lot!

22...♘b4?! This move clearly looks too dangerous. [A safer option was 22...♘xf4 23.exf4 but here too Black still needs to "suffer" a lot for a draw. The queen on a6 is very unpleasantly placed and the d6-e6-f5 structure could become weak at any moment.]

23.♔e2! White of course doesn't care much about the pawn on a2, as the black king on f7 is clearly in big danger.

23...♘xa2 Svidler is going for it...

24.♖xc8 ♖xc8

25.e4! What now... White is crushing on the e-file and the black knight on a2 is totally out of the game.

25...♘b4 Svidler tries to bring the knight back into the game.

26.exf5 exf5 27.♔f3 Andreikin is very ambitious. White is a pawn down, but he has a lot of threats, one of them being to play Qb3 next. [White also had the option of playing 27.♔h5+ 27...♔g8 28.♘g6 ♖e8 29.♖xe8+ ♔xe8 30.♔xf5 With a probably slightly better position for White.]

27...a5 Protecting the knight, which is very logical.

28.♖e6! A very strong move. Now White even wants to play d5 next. We can clearly see that the clouds around the black king are getting darker.

28...♔g8 It is already hard to find a good move for Black. [28...d5 29.♖xb6 ♖c6]

29.♔g3! Another very strong move by White. Now Rxh6 is a threat and also a move like Nh5 with a triple attack on g7, Nf6 or just Rxd6. Black's position is almost lost.

29...♘d5? And Svidler puts an end to the game himself...

30.♔b3! A small tactic after a great positional game! Now of course after 30...Nx4 White has 31.Re7+. This game is a great example of how unpleasant it is to play a slightly worse position with no counterplay. **1-0**

(4) Vachier-Lagrave, Maxime(2719) - Kramnik, Vladimir(2784) [C45]

FIDE World Cup 2013(6.3), 2013.08.28

[Arkadij Naiditsch]

And this is the first game of the rapid tie-break of the semi-final. It is never easy to play Kramnik. Vladimir has amazing preparation on any opening and sometimes maybe it is just a better choice to choose something more solid than to risk getting into trouble in the early stage. Maxime tried to go for a fight and found a quick end, which was not in his favor...

1.e4 e5 2.♘f3 ♘c6 3.d4 It is clear that White is avoiding Kramnik's Berlin wall, which is in fact a real "wall" to climb. Nobody can crush it and it is already standing for almost 10 years.

3...exd4 4.♗xd4 ♙b4+ Quite a rare move. [4...♗f6 is the most popular move recently.]

5.c3

5...♙c5 At first sight it looks like Black is just losing a tempo, but things are more complicated. The knight from b1 is losing the possibility to move to c3 which is very important! The d2 square is by far less attractive and in the meantime Black is

trying to be very fast with the d5 move.

6.♙e3 ♙b6 This is one of the critical positions.

7.♙d3 [7.♗f5 is an interesting choice, but Vladimir was clearly well prepared here too.]

7...♗f6! This is clearly theory, but it is still nice to mention the strength of this move. Black is not playing the passive Nge7 or moves like d6, but acting immediately with aggressive play.

8.O-O O-O 9.♗xc6 Very logical play. [After the more passive 9.♗d2 Black would have a couple of attractive choices: 9...♗e5 (9...d5 10.♗xc6 bxc6 also seems to be perfectly fine.) 10.♙c2 d5 And Black has probably equalized.]

9...bxc6?! This move looks very strange to me. [Why not play 9...dxc6 If White had the pawn on c2, Black could be a bit worse, but with the white pawn on c3, only Black can be better here. 10.♙xb6 axb6 With great and easy play for Black.]

10.e5! A good move. White doesn't give Black any time to play d5 and now the knight from f6 has to go for a "walk".

10...♗d5 11.♙d2 Another good move. White should let Black have a worse pawn structure.

11...d6 Black doesn't have a choice, he needs to open the bishop from c8.

12.c4 And White finally manages to bring his knight to c3!

12...♘e7 13.♚c2 Why play it in this move order?! [In my opinion 13.exd6 first looks much more logical, and in case of 13...♚xd6 only now play (13...cxd6 14.♘c3 Here White would save a tempo on Qc2.) 14.♚c2 With some hopes to be better because of the Black's bad pawn structure.]

13...♘g6 14.exd6 cxd6 Of course now Black takes with the pawn...

15.♘c3 ♚h4! A very good move! The black queen is just perfectly placed on h4. The f2 pawn is now under non-stop attack and to play g3 somehow doesn't feel right.

16.♚ae1?! White tries to bring the rook into the game over e4, but it turns out to be a bad plan. [Probably 16.♘e4 16...d5 17.♘g5 with the idea of playing Nf3 next could have given White normal play.]

16...♘e5! A very strong move. The black knight on e5 is a beast!

17.♚e4 Whites continues the wrong plan...

17...♚h5 Things are getting more and more risky for White. Black doesn't only want to play Bf5 but Ng4 is also a very possible threat. The rook on e4 is terribly misplaced.

18.♘e2? This is already a serious mistake. [18.♚f4 would keep

White in a worse position, but still fighting.]

18...♚g6! White's position is just falling apart. Black wants to play Bf5 or Bh3 and White already doesn't have any solution. I can only imagine how bad Maxime was feeling right now, to lose the first rapid game with White and having only very little chances to come back in the second game with Black for the final of the World Cup!

19.♚d1 ♘h3 Of course...

20.♘f3 There is no other way to defend the g2 pawn.

20...♘f5! It is obvious that Black first wants the white bishop to be placed on f3, before going for the Bf5-Bc2 idea, which chases away the white queen from d1.

21.♚h4? This is already the losing move. [21.♚f4 would still have led to a lot of fight. 21...♘c2 22.♚c1 ♘d3 23.♚e1 ♚fe8 Black is of course much better, but White is still fighting. Especially in rapid games it is never too late to make a mistake.]

21...♘c2 22.♚xc2 The last trick...

22...♘xf3+ [22...♚xc2 was winning too: 23.♘e4 ♚xd2 24.♘h7+ ♚h8 25.♘e4+ ♚h6 Quite a sad game for White at such high stakes!] **0-1**

Endgame section

(15) Korobov, A.(2720)-Nakamura, H.(2772)

World Cup, 2013.08.21

[CE TEAM]

This time the endgame section features this game, which is rather a middle game. It is still very instructive to see how Korobov converted his space advantage and the powerful e5 knight against the poor b7 bishop into full point. Black has just played Nf7-d8, with the intention to play Ne6 with a double attack against the d4 and f4 pawns.

30.♙d1!! Brilliant regrouping of the bishop, who is heading to b3!

30...♞e6 31.♙b3 ♖ce8 Black is intending to leave the pin with Kg7, which could force White to get rid of the strong b3 bishop. White cannot really avoid it, but he can open a new front for the combat.

32.h4!! Another extremely strong positional move. White is going to push h5 and the attack is getting really dangerous even without the queens on the board.

32...♞g7 [32...♙g7 33.h5 ♙xe5 34.fxe5+- Reg1 is coming next with a devastating attack.; 32...♞f8 is met by the same move as the game: 33.♙xe6 ♖xe6 34.h5 The only difference could be 34...♙g7 but now after 35.hxg6 hxg6

36.♖eg1 ♙xe5 37.fxe5+- Black is lost. The reason is simply the difference between the two bishops, one is dead on b7, while the other goes to f6 in two moves.]

33.♙xe6 ♖xe6 34.h5 The problem is much bigger than it might look at first sight. White's idea is to play Reg1, putting Black into zugzwang and the winning plan will be to transfer

the bishop to the a1-h8 diagonal, followed by opening it with the d5.

34...Bh8 Nakamura protects his h6 bishop in order to play Kg8 and Bg7. [Black cannot find counterplay against the d4 pawn with 34...Bd8 because of 35.hxg6 hxg6 36.Bxh6! Kxh6 37.Qf7+--]

35.Qc2! Another strong move, this time it is a prophylactic one. White wants to play Bc3, but first he leaves from the check with Bxf4.

35...Kg8 Black is ready to play Bg7, but he left the g6 pawn unprotected. White immediately makes use of it! [35...Qf8? moves into 36.Qxg6+--]

36.Bhg1! Qg7 Black decided to sacrifice material. [36...Kg7

37.Qc3! Qxf4 38.d5! The opening of the diagonal means the end of the game. 38...cxd5 39.Qxg6+--]

37.hxg6 hxg6 38.Qxg6 Bxe1 39.Bxe1 White won a pawn and he is going to take another one with Ne7. The bishop on b7 is still dead, the game is basically over.

39...Bh7 [39...Bh2 40.Qe7+ Kf7 41.Qxf5+--]

40.Qe7+ Kf7

41.d5! 41.Nxf5 was of course also winning, but the text move is even stronger. White actually wins a full piece.

41...cxd5 42.c6 Qa8 43.c7 Qb7 44.c8=Q Qxc8 45.Qxc8 Nakamura made some additional moves, just because resignation meant the end of his World Cup.

45...Bh6 46.Qe7 Bh2 47.b4 Black resigned. Really subtle play by Korobov! **1-0**

(16) Kramnik, Vladimir(2784)- Vachier-Lagrave, Maxime(2719)

FIDE World Cup 2013(6.2), 2013.08.27
[CE Team]

We are in the second game of the World Cup semi-final. Is it a draw or a winning position for White?! In case of a white win, Kramnik would directly proceed to the final, while in case of a draw the players would have to go to tie-break.

44.♖b7 ♜d8! A very strong move. White had the idea of playing Nh4-Nf5, which is now impossible because of Rd7. The knight endgame should be a draw, which means White needs to keep the rooks on the board if possible.

45.♔g3 A waiting move just to check what Black wants to play next.

45...♔g8 Another good and solid move. Black keeps on waiting.

46.♔h4 ♔h7 47.♖a7 ♔g8 As we can see, White cannot really improve anything, so it is time for the last try.

48.f4! White is bringing his last resource, the f4 pawn. Now the move g5 next could be quite unpleasant for Black in many different situations.

48...♔h7 49.♖b7 Another waiting move and checking Black again...

49...♞e4 [49...♔g8 50.♖b4 Followed by g5. The black king would be better placed on h7 now...]

50.♖b4 ♜e8 Black is preparing against g5.

51.g5 ♞d6! Black wins the control over the 4th rank.

52.♖b6 This is probably White's only try. [52.♔g4 wouldn't lead to anything: 52...hxg5 53.fxg5 ♜e4+ And Black manages to exchange the rooks, which should be a huge step in the direction of a draw.]

52...♞f7

53.♖b5! A very good move! [53.♔g4 53...hxg5 54.fxg5 would

also give Black a chance for 54...♖e5+! Trying to find a rescue in the rook endgame... 55.♘xe5 ♜xe5 56.♞b7 ♞a5 57.h6 And here only 57...♙h8!! secures a draw! 58.♞xg7 ♞a4+ 59.♙f5 ♞f4+ 60.♙g6 ♞f6+ And the white king cannot escape the checks.]

53...♞e1 Maxime is going for a very forced line, which is very tricky. [53...♞a8 would have been a more safe way of playing for a draw. White cannot really make big progress here. Of course Black still needs to be careful, but it seems to be a draw.]

54.♘f8+ ♙g8 55.♞b8 The black king is in a mating net, but it is his move.

55...hxg5+ 56.fxg5 ♞h1+! The only chance.

57.♙g3 ♞g1+

58.♙f4! And once again White tries the best practical chance. [After 58.♙h2 58...♞xg5! secures the draw: 59.♘e6+ ♙h7 60.♘xg5+ ♘xg5 61.♙g3 ♘e4+ 62.♙f4 ♘f6 White is an exchange up, but the position is an easy draw.]

58...♞f1+? This move is already losing! [The right move was 58...♘d6! 59.♘g6+ ♙f7 60.♞f8+ ♙e6 With very good chances for a draw.]

59.♙e3 And it seems like Black is totally lost. White wants to

play Ne6 or Ng6 depending on what Black will do next.

59...g6! In an already lost position, Black finds the only practical chance.

60.hxg6 [Things are not clear after 60.♘xg6+ 60...♙g7 61.♞b7 ♞f5 With quite some chances to make a draw.]

60...♙g7 61.gxf7 ♙xf7 White is a piece and a pawn up, but to defend the pawn on g5 is pretty hard. Black wants to play Rf5 next.

62.♙e4? With this move White misses the win! [62.♘d7 was the only right move! 62...♞f5 63.♞f8+ ♙g6 64.♞g8+ ♙f7 And now 65.♙e4! Winning an important tempo. 65...♞a5 66.♞f8+ ♙g6 The position still looks like a draw, but White has a great trick again: 67.♘e5+! ♙xg5 68.♞f5+! And no matter where the black king is going to, White will give a check with the knight and take the rook on a5.]

62...♞e1+! And the position is a draw!

63.♙f3 ♞f1+ 64.♙g3 ♞g1+ 65.♙f4 ♞f1+ 66.♙e3 ♞e1+ 67.♙f3 ♞f1+ The white king cannot escape from the black checks.

68.♙g2 And once the white king is on the 2nd rank Black has

68...♞f5! 69.♘h7 [69.g6+ 69...♙g7 And the g-pawn is lost.]

69...♔g6 Forcing the white rook to come to the 7th rank.

70.♖b7 ♜f4! And Black is cutting the white king.

71.♔g3 ♜a4 It is funny, but White cannot improve his position.

72.♞e7

72...♞g4+ A funny move! :)

73.♔f3 ♜a4 74.♖b7 ♜h4 Black finally decides to take the g5 pawn, but just waiting on the 4th rank was also fine.

75.♞f6 ♔xg5 76.♞e4+ ♔f5 77.♞e7 ♜h8 And we have a theoretical draw. The rest of the game doesn't really need any comments, as the position is just too easy to hold...

78.♔e3 ♜d8 79.♖f7+ ♔e6 80.♜h7 ♜d1 81.♞c5+ ♔f5
82.♖f7+ ♔e5 83.♞d3+ ♔e6 84.♜a7 ♜h1 85.♔e4 ♜h4+
86.♞f4+ ♔d6 87.♜a6+ ♔c5 88.♞g6 ♔c4 89.♜c6+ ♔b5
90.♜c1 ♜h8 91.♔e5 ♜h4 92.♜c8 ♜h1 93.♞e6 ♜h5+ 94.♔d6
♜h6 95.♜c1 ♔b4 96.♔d5 ♜h5+ 97.♔e4 ♜h4+ 98.♞f4
♔b5 99.♔e5 ♜h8 100.♜c2 ♜h4 101.♖f2 ♔c4 102.♔e4
♜h8 103.♜c2+ ♔b5 104.♞g6 ♜h1 105.♞e5 ♜e1+ 106.♔d4
♜d1+ 107.♞d3 ♔b6 108.♜c3 ♜b1 109.♔d5 ♜b5+ 110.♞c5

Editorial Preface

The World Cup is over, so the emotions are down. Vladimir Kramnik has added another title to his long and brilliant chess career. It is a completely deserved victory as he was never worse in any of the 7 KO matches and played very nice chess. Our congratulations to him!

In the traditional Poikovsky Chess Tournament Eljanov is leading with 5.5/8 before the final round, while the 2nd-3rd places are shared by Motylev and Inarkiev with 5/8.

The Moscow Blitz Championship saw its usual great line up as Grischuk, Karjakin, Morozevich and many more players over 2700 participated in it. The deserved winner here was Karjakin, 2nd place went to Riazantsev and 3rd to Malakhov.

In the current issue of the CEWN you can find the 4 final games of the World Cup between Kramnik and Andreikin, as well as an instructive endgame section with the motto "it is never too early to resign". Enjoy!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Andreikin, Dmitry(2716)

- Kramnik, Vladimir(2784) [D37]

FIDE World Cup 2013(7.2), 2013.08.31

[Arkadij Naiditsch]

This is the second game of the match and as Andreikin lost the first one he needs to at least try and put some pressure on the "rock" Kramnik.

1.d4 After 1.e4 Kramnik would play his Berlin wall and for the last 10 years it appears to be a wall without the smallest hole.

1...♘f6 2.c4 e6 3.♘f3 d5 4.♘c3 ♕e7 As in the first game, we have a Queen's Gambit on the board. This time Andreikin chooses

5.♕f4 [5.♕g5 was played by Kramnik.]

5...O-O 6.a3 White tried almost all the different move orders here, but of course the main one is 6.e3.

6...b6 This is Black's usual plan.

7.e3

7...c5! Probably the most simple and strongest move. [7...♕b7 8.cxd5 also leads to a position which is close to a draw, but here Black's needs to suffer for a while.]

8.♖c2! Maybe the most critical move! White quickly tries to get the rook from a1 into the game and he also waits for Black's dxc4 in order to play Bxc4 without losing a tempo on playing Bd3 first.

8...cxd4 [After 8...♕b7 White would have the idea of playing 9.dxc5!? bxc5 10.cxd5 exd5 and 11.♖d1 With a complex position, which of course in the current match situation would be perfect for Andreikin. He needs to search for chances in complicated play.]

9.♗xd4 ♕b7 10.♖d1 The rook is perfectly placed here.

10...♗bd7 Black wants to play Rc8 next, after which the position would be equal, but...

11.cxd5! Exactly the right play! It is hard to say if White has any advantage here, but Andreikin is clearly putting some pressure.

11...e5? A mistake which could have cost Black the game. [11...♗xd5! would have been the right choice. 12.♗xd5 ♕xd5 Black's position is looking a bit scary, but it seems like he is fine. 13.♗c6 (13.e4 13...♖c8! The only move. 14.♖b1 ♕c4 And this position should be close to equal.) 13...♖c8 White doesn't have much of an advantage here either.]

12.♗c6! This is exactly why 11...e5 was a serious mistake.

12...♙xc6 Black doesn't have a choice.

13.dxc6 exf4 14.exf4! Cool and strong!

14...♙xa3 Black probably doesn't have anything better.

15.bxa3? And White gives away all his chances in one move in such an important moment. [The right move was of course 15.cxd7! 15...♙b4 16.♙b5 And White's very strong pawn on d7 would secure at least a big advantage.]

15...♙e8+! A perfect move! Now we are entering a forced line which almost leads to a draw.

16.♙e2 White doesn't have a better move.

16...♙c5 17.O-O ♙xc6 18.♙f3 At first sight it looks like Black is losing the exchange, but of course Kramnik just needs a small look at the position to find..

18...♙ce4! This is probably what Andreikin missed when he

played 15. bxa3.

19.♙c1 And White is forced to enter this endgame.

19...♙xc3 20.♙xc3 ♙xc3 21.♙xc3 ♙ac8 The exchange of one pair of rooks is never wrong for the defensive side.

22.♙fc1 ♙xc3 23.♙xc3 I remember that when I was watching this game live, Kramnik had a very serious thought in this position, for about 25 minutes. And indeed, the position is of course close to a draw, but to secure it is not that simple. White wants to put his rook on the 7th rank and get the bishop to the a2-g8 diagonal, after which it is not going to be easy for Black to defend same the f7 and the a7-b6 pawns at the same time.

23...♙e8! A very precise move. Black wants to put his rook on the 7th rank as soon as possible.

24.g4 White is trying to create at least some chances.

24...♙f8 With the same idea of playing Re7 next.

25.g5 Maybe White's last chance. Where to go to with the knight now?!

25...♙g8! Once again Kramnik shows great endgame technique, not giving White any chances. Black is willing to play g6 followed by Ne7-Nf5, covering most dangerous squares.

26.♔g2?! This move gives away even the smallest practical chance White had before. [The only try was probably to play 26.h4 26...♘e7 and now 27.♖c7 White needs the 7th rank! 27...♘g6 28.♖xa7 ♘xh4 29.♙c6 With some very small chances to win the game.]

26...g6 The structure is fixed, so now the only thing Black needs to do is to bring his knight to f5.

27.h4 ♘e7 28.♖c7 ♘f5 And Black is in time!

29.h5

29...♖e7 Everything is protected.

30.♖c8+ ♖e8 31.♖c7 ♖e7 32.♖c8+ ♖e8 33.♖c7 A really nervous game from both players and Andreikin missed a great chance to come back into the match! **1/2-1/2**

**(2) Kramnik, Vladimir(2784)
- Andreikin, Dmitry(2716) [D58]**

FIDE World Cup 2013(7.1), 2013.08.30
[Arkadij Naiditsch]

We are in the final of the World Cup. Until the final all the matches had been based on 2 games of normal chess and in case of an equal score a tiebreak was played the next day. The final match consisted in 4 classical games. Before the match it was clear that Andreikin would try to be very solid and fight for survival in the classical games and then look for his chances later in the rapid and blitz. So basically Kramnik had 2 tries, his both white games, to win the match in normal chess.

1.d4 Kramniks starts with d4 as usual.

1...e6 A small provocation of Andreikin who seems to be ready to play the French after 2.e4, but of course Kramnik sticks to his "closed" openings.

2.c4 ♘f6 3.♘f3 No Nimzo.

3...d5 4.♙g5 ♙e7 5.♘c3 We are in a classical Queen's Gambit.

5...h6

6.♙h4 [6.♙xf6 this move is also possible but doesn't seem to give White any advantage according to the latest games.]

6...O-O 7.e3 b6 This has been played for at least 100 years!

8.♘d3 dxc4 Black is using the fact that White has moved his bishop. [Another possible line could appear after 8...♘b7 9.♘xf6 ♘xf6 10.cxd5 exd5 11.b4 with maybe a minimal plus for White.]

9.♘xc4 ♘b7 10.O-O ♘bd7 Black's position is very solid and his play is usually quite easy, to play c5 and Rc8, which normally leads to a minimal plus for White but nothing special.

11.♖e2 This is another normal way of playing for White, to bring the f-rook to d1 and sometimes an idea of Ba6 could be useful as well to get control over the white squares.

11...a6 I am not sure about his move as now Black will always have a weakness on a6 and the rook from a8 will never move. [11...c5 would be the usual way of playing.]

12.♞fd1 Of course Black hoped for 12.a4, while with this move Kramnik is questioning Black's idea of a6.

12...♞d5 Andreikin is too afraid to play the initial b5. [12...b5?! This logical move is an inaccuracy. 13.♘d3! The best place for the white bishop in order to support the e3-e4 idea. 13...c5 14.dxc5 Black doesn't have a "good" piece with which it is possible to win the pawn back. 14...♘xc5 15.♘xf6! And White should be better.]

13.♘g3 White has no reason to exchange the bishop, as it is clear that White needs pieces on the board to make use of future play in the center with e4.

13...♞xc3 14.bxc3

14...♘d6! Andreikin feels the danger and decides to exchange one pair of bishops, which is a good decision!

15.e4 ♘xg3 16.hxg3 b5 17.♘d3 ♞b6 We can see that White is probably doing a bit better because of the solid center, but Black got as well his idea with playing Na4 and at some good moment c5.

18.♞e3?! A very strange decision by Kramnik, as now the black knight is getting to c4 with a tempo. [A small, careful move like 18.♘c2! would leave White with quite an advantage because now after Black's Nc4 White has Bb3.]

18...♞a4 19.♘c2 White doesn't have a better move.

19...♞b2 20.♞db1 ♞c4 21.♞c1 White is preparing the a4 move.

21...c5! But Black is also fast with the c5 push.

22.a4 cxd4 23.cxd4 ♞c8 Protecting the b5 pawn.

24.axb5 axb5 25.♞e1 [Of course not 25.♞xb5 25...♞d6 White is losing the e4 pawn.]

25...♘c6 Black's position is still a bit unpleasant. The b5 pawn is weak and White has some chances to launch play in the center by pushing d5.

26.♖b4 ♜a8 27.♞d1 White is preparing the d5 push and therefor needs both pairs of rooks on the board.

27...♞a3?! Very risky play. [A more solid option would have been 27...♞a7 but White's position is of course still a bit better.]

28.d5! Of course Kramnik doesn't miss his chance.

28...exd5 29.exd5 ♜e8 I guess Andreikin underestimated White's next move.

30.dxc6! This is already forced, but it is still a nice idea! White gives a queen for R+B but it is clear that only White can win this game.

30...♞xe1+ 31.♞xe1 ♜c7 Black needs to be very careful, as in case White manages to keep the c6 pawn the game could be over.

32.♞xb5 g6! Good defence by Andreikin! The black king will not have any better place than on g7.

33.♞c5 The c-pawn is secured.

33...♞e5? This is already a serious mistake. Black should not have let White activate the bishop from c2. [33...♞d6! The only move. 34.♞d3 this move leads to a draw, but it is unclear if White has anything better. Black just wants to play Ra6 and Rxc6. 34...♞e4 35.♞c4 ♞d6 With a draw.]

34.♞e4! Black will never have the option of winning the c6 pawn again, which means White's position is much better!

34...♞g4 35.♞d3 ♞g7 36.♞f3 White puts his pieces to very solid squares as there is no reason to hurry.

36...♞f6 37.♞b4 The exchange of knights is not a bad idea, so we can expect Nd5 soon.

37...h5 38.♞dc1 ♞a7 39.♞d5 ♞xd5

40.♞xd5 Black has to make one last move to gain the extra 30 minutes and decides to play

40...♞d8 which leads to a quite easily winning position for White. [It was probably better to play 40...♞a8 but even here after 41.♞b5 Black's position is probably hopeless.]

41.c7 ♞xc7 42.♞xc7 ♞xd5 The funny thing about this position is that if the white pawn was not on g3 but on h3 for example, Black would have very good chances to survive. With the pawn on g3 however White protects his king from checks, so Black's chances for escape are almost down to zero. All White needs to do is to double attack the black pawns and Kramnik will show us how to do this.

43.♞e1 The white rook is going to e7.

43...♞h6 44.♞ee7 f6 The first step is done, Black's pawn moved to f6, now it is time to double on the 6th rank, after

which the game will be over.

45.♖ed7 ♜a5 46.f4 This is an even faster way of winning the game. Black is forced to move the g-pawn, which is opening the king's position.

46...g5 47.♔h2 No need to hurry...

47...♙g6 48.fxg5 ♜xg5 49.♖h7! The treat of playing Rcg7 is deadly.

49...f5 50.♖cg7+ ♜f6 51.♖a7 Winning the h5 pawn.

51...♜b4 [After 51...♜b5 52.♖a6+ ♜xa6 53.♖h6+ White would of course win too.]

52.♖a6+ ♜e5 53.♖xh5 The h5 pawn is gone, now it is time to take away f5.

53...♜b1 54.♖a5+ ♜f6 55.♖axf5+ And the f5 pawn is gone.

55...♙g6

56.♖fg5+ Now White will combine the attack on the black queen with the checks on the king's rank, which will hunt the black king back to the 8th rank.

56...♙f6 57.♖b5 ♜c2 58.♖h6+ We can perfectly see how nicely the g2 and g3 pawns are protecting the white king.

58...♙g7 59.♖bb6 ♜c5 60.♖bg6+ ♜f8 61.♖h7 Black's king

is now cut off.

61...♜f5 62.♖gg7 ♜e6

63.♖e7 A nice and very important win for Kramnik. Andreikin has never been strong in "winning" games, so I guess this game almost decided the outcome of the Final of World Cup in Tromso. **1-0**

(3) Kramnik, Vladimir(2784) - Andreikin, Dmitry(2716) [D45]

FIDE World Cup 2013(7.3), 2013.09.01

[Balogh Csaba]

We are in the third round of the World Cup final and Kramnik leads 1.5-0.5. As he has an extremely solid repertoire with Black, he decides to make a calm draw and get a half point closer to the victory.

1.d4 d5 2.♘f3 ♘f6 3.c4 c6 Andreikin deviates from the first game of the match and plays the Slav defence. [Their first game continued with 3...e6 4.♗g5 ♗e7 5.♘c3 Queen's Gambit.]

4.♘c3 a6 White has plenty of options here, Kramnik plays one of the safest continuation.

5.e3 e6 6.b3

6...c5 This is the first surprise. A very rare move, which is quite logical because it fights for the center, but it also has the small drawback that Black has played c5 in two moves and practically lost a tempo. The question is whether White can make use of it or not. [By far most of the games continue

with 6...♗b4 7.♗d2 ♖bd7 8.♗d3 O-O 9.O-O With thousands of games.]

7.♗b2 Played without thinking by Kramnik, although the main line is 7.cxd5.

7...cxd4 8.♗xd4 Kramnik just opts for the safest continuation. [8.exd4 followed by Bd3 and 0-0 preserves much more pieces and tension on the board, but it was not Kramnik's intention in this game.]

8...♗b4 This is the novelty. [The previous games mainly continued with 8...dxc4 but Andreikin prefers to wait with this simplification until White moves with the f1 bishop in order to gain a tempo. 9.♗xc4]

9.♗c2 [It was probably more logical to fight for the bishop pair with 9.a3 9...♗xc3+ (After 9...♗a5 White gets an advantage after 10.b4 ♗c7 11.cxd5 exd5 12.♗e2+= with nice perspectives against the isolani.) 10.♗xc3 O-O followed by b6-Bb7 for instance, but White might hope for a middle game advantage with the two bishops.]

9...♗a5! Well played! Black keeps the bishop and the pin.

10.♗e2 [10.b4 is not the same as before, because the knight on c2 gets misplaced. 10...♗c7 11.cxd5 exd5 12.♗e2 ♖c6 13.O-O O-O Black has a good game. He directly threatens with a small tactical trick to take Nxb4 Nxb4 Qd6 with a double attack, but he is also fine if he just finishes the development with Bf5, Re8 and Be5.]

10...O-O 11.O-O White has left the pin, so he already wants to take on d5 because Nxd5 could be met by Nxd5, therefore Black decides to take direct measures.

11...dxc4! A well timed capture, since the bishop loses a tempo now.

12.♔xd8 Once again Kramnik only aims to avoid the complications. [12.♙xc4 was better. 12...b5 Black should continue like this. (Kramnik was probably afraid of the c-file: 12...♖c7 and Black threatens to win a piece with, but White has a very strong move here: 13.♖c1! and after 13...b5 14.♙d3 ♙xc3 White wins back the piece after 15.♘b4!+=) 13.♙e2 ♙b7= With an even game.]

12...♖xd8 13.♙xc4! Obviously White wanted to avoid getting an isolated pawn with bxc4, but here he had to foresee a small tactical trick in the 13...b5 line.

13...♘c6 [13...b5 14.♙e2

14...♖d2 seems to win material because of the double threat

Rxc2 and Bxc3 followed by Rxe2, but White has 15.♖ac1! and if 15...♙xc3? (15...♙b7 leads to an even game.) 16.♙xc3 ♖xe2 White wins back the piece after 17.♙xf6! gxf6 18.♘d4! With a double attack.]

14.♖fd1

14...♙d7 Black has fully equalized. Kramnik decides to take direct measures to reach a completely drawn position, but of course a normal move like Rac1 Rac8 would also not change the final result.

15.♘a4 This move required some calculation, but of course Kramnik is extremely strong in it.

15...b5 16.♘c5 bxc4 17.♙xf6 gxf6 18.♘d7 Further pieces were exchanged and the game got even closer to a draw.

18...♙c3 19.♖ab1 Black has no chance to trap the d7 knight as it has two safe squares on b6 and c5.

19...♖a7 20.♘c5 ♖xd1+ 21.♖xd1 ♘b4 Andreikin agrees to a draw with this move, but there was nothing left to hope for in this game. [21...cxb3 22.axb3 This position is also just a dead draw.]

22.♘xb4 ♙xb4 23.♖d8+ ♔g7 24.♖c8 ♙xc5 [An attempt to win with 24...c3? would have been a terrible positional mistake. Black cannot activate his rook along the d-file and

if he takes the knight, the c3 pawn falls. 25.♔f1± followed by Ke2 and later Na4 wins the pawn.]

25.♖xc5 cxb3 26.axb3 ♖b7 27.♖c3 We could see two happy players at the end of this game. Kramnik just wanted a draw, while Andreikin managed to survive Kramnik's very unpleasant white color and he could focus all his remaining efforts on the last game, where he would be leading the white pieces. **1/2-1/2**

**(4) Andreikin, Dmitry(2716)
- Kramnik, Vladimir(2784) [A36]**

FIDE World Cup 2013(7.4), 2013.09.02

[Balogh Csaba]

How to play for a win against Kramnik?! After e4, there comes his rock solid Berlin defence and on d4 he plays the Nimzo Indian and the Queens Gambit and he already proved so many times that he has analyzed all the small nuances until the end in these lines. So Andreikin took a smart decision with 1.c4 in order to just reach a chess game with many pieces and to avoid the theoretical fights.

1.c4 c5 2.g3 g6 3.♗g2 ♗g7 4.♘c3 ♘c6 Kramnik plays the symmetrical English, which is considered to be fine for Black.

5.a3 White aims to play Rb1 and b4 and if he manages to provoke a5, there will be a hole on b5. Kramnik's next move is a typical reaction by Black in such positions.

5...b6! With the idea to ignore White's queenside attempts with b4 and to simply oppose the bishop to the one on g2.

6.d3 ♗b7 7.♗d2 ♘f6 Another option is to develop the knight with e6 and Nge7, but I guess we should trust Kramnik and his understanding of the position.

8.♘h3 Driving the knight to f4 is common plan is this

structure, sometimes also Black does it with Nh6-f5. Andreikin also tries to get Kramnik to unexplored territories.

8...O-O 9.O-O e6 Black wants to develop with d6, Qd7 and Rad8. The text move establishes control over the d5 square. He got a pleasant position out of the opening.

10.b4 d6

11.b5 Sending the knight to the rim of the board. If he waits a move, Black will play Qd7 and then the knight could have retreated to the more favorable e7 square.

11...Na5

12.e4 White keeps all the pieces, this way the a5 knight remains misplaced and he intends to attack on the kingside

with f4-g4-g5. It is important that Black already cannot occupy the d4 square with the knight.

12...d5! A very strong and principled reply by Black. His pieces are excellently placed for the opening of the position and at the same time the a5 knight also gets a target on c4.

13.cxd5 exd5 14.e5 Andreikin finds his only chance to keep the position unbalanced, but Black now has a strong center.

14...Ne8 15.f4 Nc7 Black threatens to win the b5 pawn with d4 and also overprotects his center as a preparation for the positional idea of undermining the e5 pawn with f6.

16.Rb1

16...f6! Black successfully destroys White's center and at the same time he opens the diagonal for the g7 bishop. Black has clearly overtaken the initiative.

17.exf6 Bxf6 18.Ne2 Andreikin has to risk and he tries a kingside attack with g4, but it is not justified. [Objectively it was better to play something like 18.Nf2 improving the misplaced knight, although Black is fine after 18...Kd6 followed by Rae8. Only the a5 knight is temporarily misplaced, all other pieces are doing well.]

18...Rae8 Activating the rook. Black does not need to worry about the doubled pawns after Bxa5. White would really

miss his bishop later on, while Black's excellent pieces are compensating perfectly for the structural weaknesses.

19.g4 [Still it was objectively better to play 19.♘f2 followed by Re1, but these moves are only for equalizing, which was not enough for Andreikin.]

19...d4! Another strong positional move! Black trades the bishops and prepares to occupy the hole on e3 with the c7 knight.

20.♘g3 White also tries to improve his knight and he transfers it to the direction of e4. It also supports his plans with f5.

20...♙xg2 21.♙xg2 ♘d5 22.f5! The only chance to create counterplay. [22.♘e4 is met by 22...♙d8 followed by c4, undermining the outpost of the e4 knight.]

22...♙e5 23.♘f4

23...c4! The time has come to break through! Black's pieces are dominating, White must do something urgently, otherwise he collapses.

24.♙f3 [24.♘xd5 24...♙xd5+ 25.♙f3 leads to a much worse endgame from White's point of view. 25...♙xf3+ 26.♙xf3 c3 27.♙f4 ♘b7!± The poor knight suddenly becomes a very strong piece on c5!; 24.♘e6 would have been the best chance to create some complications, although Black has some promising ways to play here as well. For instance 24...c3 25.♙c1 (25.♘xf8 drops material after 25...cxd2 threatening Ne3.) 25...♙f7± With a big advantage. Black wants to play Nb7-c5, while White cannot do anything serious with only one good piece on e6.]

24...♘e3+! 25.♙xe3 dxe3± At this stage of the game, Andreikin has probably already given up his hopes for equalizing. Soon the a5 knight will join the game via c4-d2.

26.d4 At the cost of a pawn, White tries to exclude the a5 knight from the game. [After 26.♙be1 the strongest is 26...♙h6! with the threat of taking twice on f4 followed by cxd3. 27.dxc4 ♘xc4—+ And Nd2 next should win soon.]

26...♙d6 Kramnik does not want to give any chance. [26...♙xd4! was better, even if White could have invaded the 7th rank with his rook. 27.♙fd1 ♙c5 (27...♙e5 28.♙d7 ♘b3—+ is also good.) 28.♙d7 c3 It seems like Black is just winning because Ne6 could just be taken.]

27.♘e4 Andreikin continues seeking some tricks. [27.d5 is met by 27...♘b3! 28.♘e6 ♘d2! It looks like White can achieve something after 29.♘e4!]

With the idea of 29...Qxd5?? 30.Nf6, or if Black trades the knights the e6 knight will control the position extremely well, but Black has the strong exchange sacrifice, which simply seems to win. 29...♔e5! 30.♘xd2 exd2 31.♘xf8 ♔xf8—+ Followed by c3-c2 and the rooks are useless.]

27...♔xd4 28.♘g5 Trying something around the h7 square, but of course this is just desperation. Kramnik takes a very clever practical decision and by sacrificing the e-pawn he forces White's knights back to passivity.

28...e2 29.♘xe2 ♔d2 With a double attack, so White has only move.

30.♘e4 ♔c2 Once again White has only one move to save the piece.

31.♘g3 ♘b3! Black suddenly threatens with a triple fork

with Nd2. White's pieces are paralyzed and the c-pawn might have huge power soon. White cannot hope for anything real against the g8 king.

32.♔bd1 ♔h8 Black leaves from the Qd5 check in order to threaten Nd2.

33.♔f2 gxf5 34.gxf5 Andreikin decided to offer a draw, which was obviously accepted, since it was exactly what Kramnik needed to win the World Cup. If they had played on, Black would probably soon have won after [34.gxf5 34...♘c5—+ followed by Ne4 or Nd3.] **1/2-1/2**

Endgame section

(15) Eljanov, P.(2702)-Sutovsky, E.(2660)

14th Karpov GM(7), 2013.09.04

[CE Team]

35...xe4+ White is an exchange up, but Black has a pawn for it. The question is, does Black has any drawing chances here? No, he does not! The position is totally lost. Black's main problem is the d6 pawn, which can easily get under attack.

36.♔f3! White is pushing the knight to a bad square.

36...g5+ [After 36...f6 37.dxe5 dxe5 38.♖xe5 Black would have no chance at all to hold the position. White would slowly bring his king to e7 and the f7 pawn would fall.]

37.♔e2 Once again the e5 pawn is under attack.

37...exd4

38.♖a8+! A very precise move. White pushes the black king away as far as possible from the d6 pawn.

38...♔h7 39.exd4 f5 Black is trying to build some sort of fortress with the knight on f7 or e4.

40.♔e3 ♕g6 41.h4 Black now needs to decide whether to go to e4 or f7.

41...♖e4 [41...♖f7 was not much better as after 42.♖e8! the white rook is going to take a perfect place on e6. 42...♔f6 43.d5 And Black cannot stop White from playing Re6 next. 43...g5 44.♖e6+ ♕g7 45.h5 With an easily winning position.]

42.♔f4 White's king is perfectly placed and Black is almost paralyzed.

42...♖c3 [42...♔f6 43.♖f8+ ♕e6 44.♖xf5 White is winning.]

43.♖a6 The d6 pawn is impossible to hold anymore.

43...♖e2+ [43...♖e4 44.g4! And White is winning.]

44.♔e3 ♖xg3 45.♖xd6+ Black got the g3 pawn for the d6 one, but an exchange up plus a passed pawn is more than enough to win the game smoothly.

45...♔f7

46.♔f4 The white king finishes what the rook started.

46...♖e4 47.♙a6 ♘d2 [47...g6 48.♙e5 Followed by Ra7 and White is winning.]

48.♙xf5 ♘f3 49.♙a7+ ♙f8 50.d5 Very good technique by Eljanov in this winning endgame. **1-0**

(16) Inarkiev, E.(2693)-Onischuk, Al(2667)

14th Karpov GM(8), 2013.09.05
[CE Team]

41.♙xf5 After an average game, we finally landed in this equal endgame. What is going to happen in this endgame is really unbelievable, especially as this is a game on the highest level!

41...a5 A normal move, Black is pushing his passed a-pawn.

42.♙f3 Not a bad move, but a strange one. Why not 42.Nf7!?, attacking the a5 pawn and threatening Nd6, with an immediate draw.

42...♖c3 43.♘g4

43...♙a4 44.♙e5+ The position is of course still a complete draw.

44...♙f8 45.♘e3?! Wow, White doesn't repeat the moves by playing 45.Rf5.

45...h6 Black secures the pawn structure g7-h6, which can always be useful.

46.♘f5 White wants to play Nd6.

46...♙f7 47.♘d6+ ♙f6 48.♙c5 ♙a3 We can already see that only White can lose here. Black's pieces are well placed and the a-pawn gives Black potential chances.

49.♘c4?? What a blunder! Now White is totally lost! [49.♙g4 would still lead to an about equal position.]

49...♖a4+! Of course Black doesn't miss such a chance.

50.♗xa3 ♜xc5 So let us take a fresh look at the position. We are in a knight endgame where Black has a free a-pawn, which will cut the jumps of the white knight, and a much better pawn structure. The position just looks winning!

51.♝f4 White is trying to block the black king.

51...♜e6+! A good move. White needs to decide whether to run to the a-pawn or to keep the white king in hope to get to the g6 square.

52.♞g4 [52.♞e4 52...♞g5 While the white king will run to the a-pawn, Black will collect all the white pawns and win the game.]

52...a4 [Of course not 52...♞e5? 53.♜c4+ and White wins the a-pawn.]

53.f3 White doesn't have a choice but to let the black king pass to the queenside. [53.♜c4 53...♜d4 With the threat of playing Nb5 next would force White to go back to a3 with the knight.]

53...♞e5 White's position just looks hopeless.

54.♜c4+ ♞d4 55.♜a3 ♞c3 The black king is on the right place, so all Black needs to do now is to bring his knight into the game.

56.♞f5 ♜d4+ 57.♞e4 ♜b3 This move is still winning, but [57...♜c2 would have led to a faster win: 58.♜b1+ ♞b2 59.♜d2 ♜b4]

58.f4 ♜d2+ 59.♞d5 ♜f1 Black is going for the h-pawn, which is not the fastest way of winning, but it is of course good enough.

60.f5

60...♜e3+ Once again Black misses a forced win. [60...♜xh2 61.♞e6 ♞b3 62.♜b5 ♜f3! Taking away the d4 square from the white knight. 63.♞f7 ♞b4]

61.♞e4 ♞b4 62.♜b1 ♜f1 White's position doesn't seem to get better, so Inarkiev tries his last chance.

63.f6! This is probably the only practical try White had.

63...gxf6 64.♞f5

64...♞b3?? What a shocking move... [Black had a lot of

winning moves here, one of them being 64...♖d2 65.♗xd2 a3 66.♕xf6 a2]

65.♕g6! And now the position is a draw!!! Black is not in time anymore to queen first.

65...♕b2 66.♕xh6 ♖xh2 [66...♕xb1 67.♕g6 a3 68.h6 a2 69.h7 a1=♔ 70.h8=♔ With just a draw.]

67.♕g6 ♖g4 68.♗d2 As we know, a knight can hold the a-pawn which means the position is a draw. Black keeps on trying for a bit, probably just to get rid of the frustration.

68...♕c3 69.♗b1+ ♕b2

70.♗d2 ♕c3 71.♗b1+ ♕c2 72.♗a3+ ♕b3 73.♗b1 ♗e5+ The last trick.

74.♕g7! The safest move. Now the black knight has to come back.

74...♗g4 75.♕g6 ♕b2 When I saw this game was really a bit shocked. There is always hope in chess, so never resign too early! :) **1/2-1/2**

Clash of the Titans

(17) Alekhine, Alexander-Capablanca, Jose Raul[C66]

St Petersburg preliminary(6), 1914.04.29

[Kamil Miton]

1.e4 e5 2.♘f3 ♘c6 3.♙b5

3...d6 A very rare system for Black which is very solid but a bit passive. More often Black plays 3...a6 first and after 4.Ba4 d6.

4.d4 A logical move. White immediately wants to get the advantage in the center. An alternative plan is to play with c3-d4.

4...exd4 Black could also keep the tension in the center after [4...♙d7!? but now White has the additional possibility to play 5.d5 and get a similar structure to the KID, which should be a good option for White without the light squared bishops. 5...♘ce7 6.♙xd7+ ♚xd7 7.c4+= With the typical plan of putting pressure on the queenside after b4-c5 and it is also very important to control the e4 square.]

5.♘xd4 ♙d7 6.♘c3 ♘f6 Another way of developing is to

play g6-Bg7, so let's see how to react against this plan of top grandmaster Michael Adams.

[6...g6 7.O-O ♙g7 8.♙xc6 bxc6 Of course Black keeps the bishop pair. 9.♚e1 Activating the rook and not allowing Black to develop the knight to f6. 9...♘e7 10.♙f4 Preparing the e5 break. 10...c5 11.♘f3 f6 Black's idea behind putting the pawns on c5 and f6 is to not allow White to get control of the dark squares after pushing e5. 12.♚d2 O-O 13.♙h6 A logical move. White exchanges one of the bishops and weakens the black king. 13...a5 What to do, maybe Black wants to create some weaknesses on the queenside. 14.h3 a4 15.♚ad1+= White is slightly better because his pieces are optimally placed and because he has more space. 15...♙e6 The decisive mistake, as now White has the following tactical trick: 16.♙xg7 ♚xg7

17.e5! And Black's position is crushed. 17...fxe5 18.♘xe5→Adams- Elhvest Gibraltartar 2013. The black king is very weak and White won the game a few moves later. If Black takes the knight on e5 then White recaptures the piece over the e-file.]

7.0-0 ♖e7

8.♘f5!? I'm not sure if this move is the best. Instead of changing the structure White could keep a small plus thanks to his space advantage and for example play Bxc6-Qf3-b3-Bb2 or Bxc6-Bf4-Re1 etc.

8...♙xf5 9.exf5 O-O 10.♖e1 ♘d7 Black tries to regroup his pieces and activate the bishop over f6. [In my opinion 10...♘e5 looked very promising with the idea of playing c6-d5 in order to get more space and limit the light squared bishop.]

11.♘d5 ♙f6 12.c3 Limiting the bishop on f6.

12...♘b6 Black gets rid of the strong knight on d5. [12...♘e7 13.♘xf6+ (13.♙xd7 13...♘xd5 14.♖xd5 ♖xd7 15.♖xb7 d5 With compensation.) 13...♘xf6 14.♖f3+= White's bishops are stronger.]

13.♘xf6+ ♖xf6

14.♙xc6?! This move doesn't fight for the advantage, but White could have tried to keep the initiative after [14.♖f3!? 14...♘e5 (14...d5 15.♙e3+=) 15.♖xb7 c6 16.♙f1 ♘d5 (16...♖xf5 17.f4± Xc6) 17.f4 ♖h4±]

14...bxc6 15.♖f3 Alekhine's idea was probably to create pressure against the queenside pawns, but we will see that Black gets counterplay in time.

15...♖fe8 16.♙e3 c5 17.♖e2 [17.♖b7 17...♖xf5 18.♖xc7 ♘c4∞]

17...♖e5 18.♖ae1

18...♖ae8 [18...♖xf5 19.♖xf5 ♖xf5 20.♙xc5+= And here the bishop is better than the knight.]

19.♖b7?! The key move of the game. The idea of putting pressure on the pawns will give Black a strong initiative on the light squares. White should exchange the rooks and secure a draw. [19.♙f4 19...♖xe2 20.♖xe2 ♖xe2 21.♖xe2 h6 22.♖e4 With a more or less equal endgame.]

19...♖xf5 20.♖xc7 ♖e6 [20...♘d5 21.♖xd6 ♘f4 22.♖d2 (22.♙xf4? A bad move because the 1st rank is weaker than the 8th rank! 22...♖xe2 23.♖xe2 ♖b1+-) 22...♖e4 (22...♖g4 23.♖c6) 23.f3 ♖f5 24.♖dd1 ♘g2 25.♙g2 ♖xe3 26.♖xe3 ♖g5+ 27.♖g3 ♖xe3 28.♖f2 ♖g5+ Black is slightly better

because the white king is weaker.]

21. ♖xa7

21... ♜d5↑ White grabs the pawn but Black is already better. It is very hard for White to stop many threats like for example Nf4 with ideas of sacrificing on g2 or playing f5-f4.

22. ♖f1 This move does not help at all. White could try to come back with the queen in order to help defending, but Black had a nice idea in order to break the communication between the queen and the rest of the white pieces: [22. ♖a6 22...f5 23. ♖f1 c4!±; 22. ♖b7 22...♜f4 23. ♖d2 d5!±]

22... ♜f4 23. ♖d2

23... ♜xg2! Black could have used this idea in a better version

after [23... ♖c4+ 24. ♖g1 ♜xg2 25. ♖xg2 And now the very nice 25... ♖g5+! 26. ♜xg5 ♖g4+ 27. ♖f1 ♖h3+ 28. ♖g1 ♖xe1#]

24. ♖xg2 ♖g4+ 25. ♖f1 ♖h3+ 26. ♖e2 [26. ♖g1 26... ♖g5+—+]

26... ♖xe3+ 27. fxe3 ♖xe3+ 28. ♖d1 ♖xe1+ 29. ♖c2 Black is a pawn up and the white king is very weak, so Black is easily winning.

29... ♖e4+ 30. ♖b3 ♖c6 Black improved the position of his queen.

31. a4 White hopes to find some counterplay thanks to his passed pawn.

31...d5 32. a5 ♖b5+ 33. ♖a3 ♖b8 The white king is now in trouble on the other side of the board.

34. ♖a2 h6 35. a6 ♖b3+ Followed by Re8. **0-1**

Editorial Preface

Another very exciting week of chess is behind us.

The Poikovsky tournament ended with a completely deserved victory of Eljanov with 6/9, while Motylev took second place with 5,5/9 and third place went to Inarkiev with 5/9.

In the Woman World Championship match Hou managed to win the first game with Black and drew the next one with White. It is going to be very hard for Ushenina to recover from this.

In the Sinquefield Cup, where Carlsen and Aronian are competing against the two best American players, Nakamura and Kamsky, we saw great and fighting chess so far. Only Kamsky is somehow having trouble finding his game, so the outcome of the event will be decided in the last round.

The ACP Rapid Cup is taking place in Riga with a huge line-up of Top GMs and it is going to be very interesting to see who will take home the Cup.

The Spanish Team Championship was won by the team of Sestao (with Dominguez, Giri, Vachier Lagrave on top boards).

As usual, you can find the freshest games in your weekly issue of CEWN!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Naiditsch, Arkadij(2710)

- Vallejo Pons, Francisco(2706) [C03]

TCh-ESP CECLUB Honor 2013(6.3), 2013.09.13

[Arkadij Naiditsch]

Playing against Paco is always very interesting. He is a very creative player with a lot of original ideas. So for this game I was sure I would get a chaotic position on the board and it happened just as expected.

1.e4 e6 The French is Vallejo's main opening.

2.d4 d5 3.♘d2 I decided to play the safer line 3.Nd2, usually I am going for the main 3.Nc3.

3...♙e7 Not the main line, but quite an interesting move. Black is waiting for White's reply before playing Nf6.

4.♘gf3 [4.♙d3 4...c5 I played this line a couple of times and maybe Black is just doing fine here.]

4...♘f6 5.e5 ♘fd7 Black's idea is now getting clear, White doesn't have the usual setup with Bd3-Ne2. Now the knight on d2 is a bit out of play.

6.♙d3 c5 7.c3 ♘c6 8.O-O

8...a5!? And as usual Paco is playing very creatively. [8...g5 This is the main line here, with very sharp play and an unclear position after 9.dxc5]

9.♖e1 I am not sure about this move at all. Maybe it is better for White to play 9. a4 but the position is also quite unclear after 9....cxd4 10.cxd4 Nb4.

9...cxd4! A very strong move. Black is immediately going for the d4 pawn.

10.cxd4 ♖b6 White has difficulties protecting the d4 pawn. It is not unusual in this line that White sacrifices the pawn, but I think that from Black's point of view it is already an achievement to have a very unclear position on move 10.

11.a4 I probably need to give the d4 pawn anyway, so I thought I should secure the Bb5 move for later on.

11...♘xd4 12.♘xd4 ♖xd4 I think this is the first critical position. Black is a clear pawn up but I have a better development, so I was thinking for quite a while whether to play 12. Nb3 or 12. Nf3 here.

13.♘f3 I finally went for this move just based on my feeling. [13.♘b3 13...♖b6 14.♙e3 ♖d8 15.♖h5 would also lead to very unclear play.]

13...♖b6 14.♙e3

14...♘c5! A very strong move. [After 14...♙d8 15.♙c2! attacking the h-pawn and followed by Rac1 would give White very nice play.]

15.♘b5+ I probably don't have anything better. [15.♙c1 15...♘d7 followed by Rc8 and it is hard to see where White's compensation for the pawn is.]

15...♘d7 16.♘xd7+ ♔xd7 17.♘d4 At least I got the black king to d7 in return of my pawn sacrifice, which is already something.

17...♙b4! Another very good move. Of course Black should not let the queen in a passive position on b6. I wanted to play Nb5 next.

18.♙f3 I have to act quickly, as in case Black manages to get a stable position I will be doing very bad. It is really hard to break such a strong pawn structure.

18...♖hf8

19.♙ed1! A nice move. I am preparing to play Nf5 next, or in many lines a move like Nb5 followed by Rxd5 could also be very dangerous for Black.

19...♘xa4? A clear miscalculation of my opponent. Now things start to look very nice for me. [During the game I been very afraid of the following move: 19...♙ac8! And what to do now for White?! 20.Nf5 doesn't seem to work and it is hard to create a direct threat. The position of course remains unclear, I can go for 20.Qh3 or 20.b3, trying to fix things first, but somehow I didn't feel quite well here. It could all just end with a pawn down for nothing for me...]

20.♘f5! An easy to find move, as I didn't really have anything else to play! Now things are getting very forced.

20...♘xb2 If you say A you have to say B!

21.♙xd5+ Of course!

21...exd5 22.♙xd5+ ♔c7 Here I had a long think, calculating the move 23.Rc1 of course, but also the move 23.e6.

23.♙c1+ A good choice. [23.e6 is a possible move, but it leads to a complete messy position. 23...♙a6 And here I was not sure how to evaluate the position. There are so many different options, but one shouldn't forget that White is a full rook down.]

23...♔b8

24.♖xe7? I played this move instantly, because I had already planned it when I played 20. Nf5, but I should have had a second think... [24.♖d7! would end the game on the spot! Black has no decent defence against Qc7. 24...♖c4 25.♖xe7 ♖a6 26.♖d5 And White is easily winning.]

24...♖xe7 [24...♖a6 didn't help as after 25.♖d7 ♖c4 26.♖d5 White is winning.]

25.♖c5 White is of course winning here too, but things are not as simple as after 24.♖d7.

25...♖d8 The best defence. [25...♖e6 would lead to a nice mate: 26.♖d6+ ♖a7 27.♖xa5#]

26.♖d6+ ♖xd6 27.exd6 ♖d8 [27...♖e6 just loses to 28.♖xe6 fxe6 29.d7 ♖a7 30.♖c8]

28.♖c7! Probably the most simple way of finishing the game. White still needs to be careful though as Black's a-pawn could become very dangerous.

28...♖a7 29.♖xf7 Simple and strong. I want to play Re7 next and Black has no decent defence against it.

29...♖d3 [After 29...♖xd6 30.♖d7 White is winning.; Not much better is 29...♖c4 30.♖xc4 b6 31.♖c6 And here too only a miracle could save Black.]

30.♖e7 Re8 is coming next.

30...♖a6 31.♖xb7+ [31.♖e8 31...♖xd6 would leave Black with some hopes.]

31...♖c8 Here I was down to 5 minutes, so I decided to repeat the moves once in order to win some time and come closer to move 40.

32.♖c7+ ♖b8 33.♖b7+ ♖a8 Well, it makes no big difference... [After 33...♖c8 I was planning to play 34.♖b5 ♖xd6 35.♖b7+ ♖d8 36.♖d5 With an easily winning position.]

34.♖d7! The last important move! Now the game is over.

34...♖c8 35.♖c7 White threatens to play Qf3 or Qd5 next. All in all a nice finish of a pretty game! :) **1-0**

(2) Cheparinov, Ivan(2678) - Sutovsky, Emil(2660) [A15]

14th Karpov GM(9.5), 2013.09.06

[Balogh Csaba]

Ivan Cheparinov, Topalov's main second, was clearly out of form in the Poikovsky tournament, but in the last round he managed to catch his Gruenfeld expert opponent with a huge theoretical preparation.

1.♘f3 ♘f6 2.c4 g6 3.♘c3 White is going for the Anti-Gruenfeld. By sparing the d2-d4 move White gains many interesting extra possibilities. If Black wants to play the Gruenfeld, he must push d5 now, otherwise after 3...Bg7 4.e4 d6 5.d4, we transpose to the King's Indian defence.

3...d5 4.cxd5 ♘xd5 5.♖b3

5...♘b6 [One point of sparing the d4 move can be seen here, that after 5...♘xc3 White has 6.♖xc3! attacking the rook and Black is forced to make some huge structural weakening like f6.]

6.d4 ♗g7 7.e4 White had many interesting alternatives here, 7.Bf4 and 7.Bg5 also deserve attention.

7...♗g4 A typical Gruenfeld move. By delaying castling, Black immediately starts to put pressure on the central pawns. The following play is very direct and more or less forced by White to consolidate his d4 pawn.

8.♗b5+! Preventing Black from developing his knight to c6 and further pressing the d4 pawn, since Nc6 could be met by d5 now.

8...c6

9.♘g5! White avoids the loss of the d4 pawn by this concrete operation, all these things are already known from theoretical point of view since 3 years.

9...O-O 10.♗e2 ♗xe2 11.♘xe2 ♘a6 Sutovsky follows his own games against Jakovenko and Fressinet. [11...♗xd4? does not work because of 12.♖h3 h5 13.g4! and Black has no good defence!]

12.♖h3 h6 13.♘f3 h5 [Arkadij analysed the Navara-Ris game in the CEWN, which continued with 13...♖d7 14.♖h4 g5 15.♗xg5! hxg5 16.♘xg5 and White later won with a nice crushing attack.]

14.♖g1! Quite an extraordinary idea, but this is the only way to fight for the initiative. White is aiming for a kingside attack with g4! With the simple 0-0, White could not hope for an advantage with his misplaced queen on h3.

14...♞d7 A multifunctional move. The main idea is to bring a defender around the king by playing Nf6 and the move also supports the central break with e5, which is fully justified by the principles that against a side attack one must open the center.

15.e5 Only this is the novelty and the start of Cheparinov's homework. White prevents Nf6 and intends to push g4 next! [The precedent game continued with 15.g4 15...♞f6 16.♞g5 hxc4 17.♞xc4 ♞c8 Without the queens Black would be more than fine. 18.f3! ♞d8 Freeing the f8 square for the king. 19.e5 ♞xc4 20.fxc4 f6 21.♞h7+ ♞f8 And the game finished with a

forced perpetual check after 22.♞xc4 fxc4 23.e6 ♞g8 24.♞xc4 ♞d5 25.♞f7+ ♞h8 26.♞h5+ ♞g8 27.♞f7+ ♞h8 28.♞h5+ ♞g8 29.♞f7+ 1/2 Jakovenko-Sutovsky, Loo 2013]

15...♞b4 16.g4! A strong human move! Obviously the mate has higher value than the a1 rook. [There was a tactical point as well, that after 16.♞f1 leaving from Nc2, Black collects the nicest pawn with 16...♞xe5! 17.dxe5 ♞d1+ 18.♞e1 ♞c2—+ Using White's weak back rank.]

16...♞c2+ 17.♞f1 ♞xe5 Black uses the same tactical motif as before, after Qd1 check he wins back the e2 knight. I am quite convinced that Sutovsky was also still following his preparations at this point. [17...♞xa1 leads to quick defeat after 18.gxh5 Black cannot defend, let's say after 18...♞c8 aiming for the trade of queens 19.hxc6 fxc6 20.♞g5 ♞f6 21.♞e6!]

Rxc6 comes with mating attack: 21...♞f7 22.♞2f4 ♞h8 23.♞d3 ♞h6 24.♞xc6+—]

18.♞xe5! [White loses too many attacking pieces and also closes the g-file after 18.dxe5? 18...♞d1+ 19.♞g2 ♞xe2 20.gxh5 ♞xa1—+ White has no serious attack here, hxc6 just opens the f-file for the rook.]

18...♞xe5 19.gxh5 It seems to be over, but Black has a nice defensive idea, which leaves him in the game... [19.dxe5? is

bad again because of 19...♔d1+ 20.♕g2 ♖xe2—+]

19...♖c8! Bringing the queen to the defence.

20.♖g4! [20.♖h4 is met by 20...♗f6 21.♗g5 ♖f5 and Black is alright.]

20...♖f5! Black sacrifices his bishop and suddenly he starts a strong counterattack. [20...♗xa1 still loses to 21.dxe5 ♖f5 22.hxg6 fxg6 23.♗f4 ♕f7 24.♗xg6+— and White ends up with a material advantage because of the threats Nxf8 and Rf4.]

21.dxe5 ♖ad8! I suspect that Sutovsky's home analysis finished somewhere here, as the computer shows 0.00, perpetual checks or good positions everywhere. He gets enough counterplay with the ideas of Rd1 and Ne1. However Cheparinov digged deeper.

22.hxg6 ♖d1+ [22...fxg6! seems to lead to a draw in long lines and is also Black's most precise move. 23.♗f4 ♖d1+ 24.♕e2 is the most forced continuation. (24.♕g2 24...♖e4+ 25.f3 ♗e1+ White has to be careful here. 26.♕g3! This is the only move that saves the game. (26.♕f2? is refuted by a pretty mate: 26...♖xf4! 27.♖xf4 ♗d3+ 28.♕g3 ♖g1+ 29.♕h4 g5+ 30.♕h5 ♖h7#) 26...♖xf3+ (26...♖d3!? is probably even better: 27.♖xg6+ ♖xg6+ 28.♗xg6 ♖xf3+ 29.♕g4 ♖xh3 30.♗xe7+ ♕f7 31.♗g5 At this point, Black does not have anything better than 31...♖xh2 32.♖xe1 ♖g2+ 33.♕f4 ♖xg5

34.♕xg5 ♕xe7 35.♖h1= And a draw will be agreed soon.) 27.♕h4 ♖xf4 28.♗xf4 ♖xh3+ 29.♕xh3 ♖xa1 30.♖xg6+ ♕f7 31.♖g1 ♗c2 32.♖xa1 ♗xa1= The knight escapes through c2 and the game will be drawn.) 24...♖e1+ 25.♕d2 ♖d8+ 26.♕c3 ♗xa1 27.♖xg6+ ♖xg6 28.♗xg6 ♖xc1+

29.♕b4 And Black gives perpetual check after 29...♖d4+ 30.♕a3 ♗c2+ 31.♕b3 ♗a1+=]

23.♕g2 ♗e1+? This extremely tempting move seems to be the decisive mistake. [23...fxg6! 24.♖b3+ (24.♗f4 transposes to the 22...fxg6 lines.) 24...♖d5! The only move! (24...♕g7 loses to

25.♗h6+! ♕xh6 26.♖h3+ ♕g7 27.♖xd1 ♖xf2+ 28.♕h1+— With a decisive material advantage.; 24...♖f7? 25.♖f4! ♖g5+ 26.♗g3 ♗e1+ 27.♕h3!+— also wins for White.) 25.♖g3

♞xa1 26.♞f4! This move seems to keep the initiative on White's side. (26.♞xg6+ 26...♞f7 27.e6+ ♞e8 28.♞c3 ♞d3 29.♞b8+ ♞d8 30.♞g3 As White threatens to play Bh6 and Rg8, Black should force a draw by repetition. 30...♞d3 31.♞b8+=) 26...♞e4+ 27.♞h3 ♞xe5 28.♞xg6 ♞xg3+ 29.fxg3 White has some advantage, because he wins back the exchange in any case and then the h- and g-pawns are going to be very dangerous and the bishop will also be superior to the knight. 29...♞h5+ 30.♞g2+= Black loses the exchange anyway, now because of the Nf4 threat.]

24.♞g3 The start of a brave rush. Cheparinov has still made all his moves without thinking! An impressive preparation!

24...♞f3+ [24...♞d3+? 25.♞e3 ♞xe5+ 26.♞f4+- White has an extra piece.; 24...fxg6 25.♞f4!+- also wins for White.; 24...♞xe5+ leads to a bad endgame:

25.f4! ♞d3+ 26.♞f2! ♞xe2+ (26...♞xh3 27.fxh3+-) 27.♞xe2 ♞xh3 28.♞xe1 ♞xh2± Black has some practical chances to save the game, but with good technique White should be winning later on.]

25.♞h4 There is no way back!

25...♞xf2+ This was the first moment when Cheparinov spent some 30 minutes, but then he found the winning continuation.

26.♞g5!! An amazing journey of the king! White creates the threat of Qh7. [26.♞g3 was tempting, but Black is fine after 26...fxg6 27.♞xg6+ ♞f7=]

26...f6+? This eases White's task. [26...♞f3+ would have given Black some chances. 27.♞h6 fxg6 28.♞xg6+ ♞f7 Obviously it is not easy to play with a king on h6 over the board, but the computer does not stress himself and converts his piece advantage after 29.♞g7+! Covering the Rh8 threat with Rh7. 29...♞e8 30.♞h5+ ♞d8 31.♞f4 ♞h8+ 32.♞h7 ♞xh7+ 33.♞xh7 and White is winning according to the machine, although in a practical game all results are still possible.]

27.♔h6! Black's attack has reached its end. He cannot even give a single check, while White has an extra piece and a check on e6 with the queen is also hanging in the air.

27...f5 [27...♙xe2 is refuted most elegantly by 28.♖e4! ♙xe4 29.♙e6+ ♔h8 30.g7#]

28.♖g3! The most precise move to cover the f3 square.

28...♙xe2

29.♔g5! This is the reason behind Rg3. Black does not have Nf3, nor any other checks and on the other hand Qh7 can only be avoided by a huge loss of material. The game is over, but Sutovsky tries for a few more moves.

29...♖f7 30.gxf7+ ♔xf7 31.♙xf5+ ♔e8 Obviously all moves are winning with an extra rook and a mating attack, but White finishes the game in style.

32.♕f4! ♖xa1 33.e6! And as mate is inevitable, Black resigned! A fascinating game, but from a theoretical point of view it just seems like a one game idea, since after 22...fxg6 it ends in a forced draw. **1-0**

(3) Aronian, Levon(2813)

- Carlsen, Magnus(2862) [A80]

Sinquefield Cup 2013(2.1), 2013.09.10

[Balogh Csaba]

A game between the current World Nr.1 and the Nr.2 is always a pleasure to analyse.

1.d4 f5 Wow, what a surprise right in the first move! I don't remember if I ever saw Carlsen play the Dutch defence, but as we will see, he plays this opening perfectly as well.

2.♘f3 ♘f6 3.c4 g6 4.♘c3 ♕g7

5.♕f4 I guess that this side line was supposed to be "countersurprise" by Aronian. [The mainline is 5.g3 which is played by all the strong players nowadays.]

5...d6 6.e3 ♘c6 This logical move is basically the novelty of the game. In the Dutch defence it is a common idea to develop the knight to c6, with the plan to support the e5 push in the center.

7.♕e2 0-0 8.0-0 This most natural move seems like an inaccuracy by White. [8.♙c2 was more circumspect in order to avoid the things that happened in the game.]

8...dxe4! Very well played! Black has opened the diagonal of the g7 bishop, therefore he is ready to play e5.

9.h3 White wants to preserve his bishop and frees the h2 square for him. [9.dxe4 did not work because of the misplacement of the f4 bishop. 9...fxe4 10.d2 dxd4! was Carlsen's tactical point!]

9...e5! Everything goes according to Black's plan.

10.f2 exd4 11.exd4

11...d5! Another great positional move and this already passes the initiative to Black's side right at move 11! Quite an impressive performance, especially against such a well-prepared player like Aronian. By removing the defender of the d4 pawn, Black forces White to advance his d-pawn, but it opens the h8-a1 diagonal and the bishop becomes

extremely strong!

12.dxc5 dxc5 13.f4! Quite an ugly move to lock the h2 bishop, but it is still better than allowing Black to push f4 himself, since then the attack with the threats of Bxh3 and f3 would become really dangerous. In this case, White has the option to get the bishop back into the game by playing Bg3-f2 or Kh1-Bg1 in the future.

13...dxf6 14.d5 d4 I don't believe that Carlsen had dreamed about reaching such a great position right from the opening when he went for the Dutch defence.

15.g1! Preparing to improve the bishop through g1.

15...c5! Another great positional move! Black stabilizes his knight on d4.

16.d3 With the intention to kick out the d4 knight by Ne2 later on. Aronian starts to fight hard for the equality. [16.dxc6 might have been a better option to open the position. 16...bxc6 17.g1 But Black has the initiative here as well. 17...b8 (Or playing with the bishop pair: 17...dxe2 18.dxe2 a6 Followed by d5.)]

16...d7 17.g1 ae8=+ Carlsen nicely finishes the development and puts his pieces to their ideal squares.

18.d2 a6! The next step for Black to increase the advantage

is to take ground on the queenside, he is intending to push b5!

19.♖ad1 Aronian tries some prophylaxis against b5. [After the more natural 19.♖ae1 19...b5 Black is better as well.]

19...♖b8 Refreshing the b5 idea. [The point of 19.Rad1 was that after 19...b5 20.cxb5 axb5 21.♗xd4 ♕xd4 22.♗xb5 the queen is protected.]

20.a4 White decides to prevent b5, but it also has the huge drawback that this move seriously weakens all the dark squares on the queenside. Carlsen immediately points this out!

20...♕d8! Outstanding moves non-stop. The queen is heading to b4. The problems are getting more and more serious from White's point of view.

21.♖b1 ♕a5 Simply threatening to grab the a4 pawn.

22.♕d1 ♕b4 23.♗f2 Aronian lacks any active plans, so he tries to improve his pieces square by square.

23...♖be8 After the rook has done its job by provoking a4, Carlsen sends it back to the only opened file.

24.♗e1 White finally has a threat, so Black is forced to offer the trade of the queens because of Nb5. However the position remains very unpleasant even without the queens.

24...♕b3! 25.♕xb3 ♗xb3 26.♗c2 White is able to keep his position together somehow. In such positions, Black is

already searching for some direct measure, but it looks like there is none yet, he must continue improving his position slowly.

26...♗a5 Carlsen tries some direct play. [26...♗d4 27.♗d3 Probably Black's best option now is to play 27...♗f6 with the idea of playing Re7 and avoiding Bh4. 28.♗f2 ♗b3 29.♖fd1 ♖e7 Black has many small moves to improve his position, like Rfe8, Kg7, h6, but it is going to be difficult to break through.]

27.♗d3 [27.b3? does not work because of 27...♖xe1! 28.♖xe1 ♗xc3]

27...♖e3 28.♖d1 ♖b8 [After 28...♗b3 29.♗f2 ♖ee8 30.♗c2 ♗d4 31.♗d3 White continues defending.]

29.♗f2 ♖ee8

30.♖a1! Extremely tenacious defence by Aronian! It is very

difficult to make such ugly moves in a row, but all of them are simply forced in order to hold the position. [After some other move like 30.♔g1 30...♘b3 Black threatens to play Bxc3 and Bxa4. 31.♙c2 ♘d4 32.♙d3

32...b5! 33.axb5 axb5 34.cxb5 ♘xb5 And the b2 pawn will fall soon.]

30...♙d4 Carlsen tries to penetrate on the dark squares, he trades the defender of the e3 square. [If Black tries to play on b5 in the same way as in the 30.Kg1 line by playing 30...♘b3 31.♖a3 ♘d4 Aronian had probably planned to prevent it with 32.a5 and White seems to hold.]

31.♔g1! Great defence! As the bishop cannot control the e3 square anymore, White brings his king to do this job.

31...♙e3 32.♙xe3 ♖xe3 33.♖ad1! White continues staying in passivity, but he soon kicks out the pieces...

33...♖be8 34.♔f2 ♘b3 35.♖fe1! The problems are finally over. Without the rooks on board, White has nothing left to worry about.

35...♖xe1 36.♖xe1 ♖xe1 37.♔xe1 ♘d4

38.♔d2 ♔f7

39.♙e2! The last precise plan to neutralize Black's attempt is to drive the bishop to d1 to protect the a4 pawn in order to be able to trade off the knights with Ne2.

39...♔f6 40.♙d1 a5 Carlsen locks the position and offers the draw, White would have played Ne2 in any case. Despite the draw, this was a very instructive game as we saw how Carlsen first overtook and seized the initiative and how Aronian then succeeded to save the game! **1/2-1/2**

(4) Ushenina, Anna(2500) - Hou, Yifan(2609)

Taizhou China Medical City Cup FIDE Women(1.1), 2013.09.11
[Arkadij Naiditsch]

This is the first game of the World Championship match. Hou is the clear favourite as he is about 100 points higher rated, but Ushenina has been showing a great fighting spirit during the last World Cup. So if Anna gets a chance, we can be sure that she will take it!

1.d4 ♘f6 2.c4 e6 3.♘c3 ♙b4 And we see a Nimzo. The second of Ushenina is Korobov, who played a great World Cup, knocking out Nakamura. He is a Nimzo player, so this was probably not a big surprise to Hou.

4.♚c2 O-O

5.♘f3!? Lately this move has become quite fashionable. [Of course the very main line remains 5.a3 5...♙xc3+ 6.♚xc3]

5...c5 Black is quickly acting against the white center, a very typical play.

6.dxc5 The black knight is going to eat the c5 pawn.

6...♘a6 7.g3 The most critical line. [Another possibility is 7.c6 This variation was played by Morozevich a lot. 7...bxc6 8.a3 ♙xc3+ 9.♚xc3 ♘c5 With unclear play.]

7...♘xc5 8.♙g2 b6?! Hou is avoiding the principal line, but it seems that White is clearly better now. [8...♘ce4 would be the main line. 9.O-O ♘xc3 10.bxc3 ♙e7 11.e4 d6 12.e5 dxe5 13.♘xe5 ♚c7 14.♚e2 And it is hard to say if White has any edge here. We can be sure to see many more games to come on this position.]

9.O-O ♙b7 Black wants to play Rc8 or d5 next.

10.♘b5! A very strong and very unpleasant move by White. a3 is a deadly threat now.

10...♙e4 Freeing the b7 square for the knight, but it is clear that this is not the right position for the black knight.

11.♚d1 ♘b7 12.a3 ♙e7 13.♙f4 A nice developing move.

13...d6 Black sits tight. [After 13...♚c8 things would get more forced. 14.♚c1 a6 15.♘c3 ♙xf3 16.♙xf3 ♘a5 17.b4! ♘xc4 18.♙b7 White should be better here.]

14.♚c1 White develops her pieces to nice positions.

14...h6 15.b4 a6 16.♘c3 ♙c6 We can clearly see that White's advantage is already quite big. The black pieces are badly placed, especially the knight on b7.

17.♚b3 ♚c8 18.♚fd1 White brought all her pieces into the game! So far Anna is playing a very good game.

18...Kf8 Black needs to be very careful about White's b5 push. It could work any moment.

19.Kb1 A slightly strange move. What does White want?! Maybe Anna's plan was to play e4 next, but I think there is no reason for White to do it.

19...e5 Black cannot stand the pressure anymore and pushes the e-pawn. Now White is getting a very nice square on d5 for her knight.

20.fxd2 b5 21.cxb5 axb5 22.e4 Rf8 Black only has one huge problem and this is the knight on b7. But it is not so easy to explore this weakness...

23.f4!? An interesting move, but not the best one.

[23.Kb3! would have been very very strong. 23...fxe4 24.fxd5 White is playing against the bad knight on b7. 24...Rc8 25.fxe3± And White has a big advantage!]

23...Rxa3 If you suffer, then at least grab a pawn if you can.

24.f5 fxd7? After this move White is almost crushing. [Black should have tried to bring some pieces into the game: 24...Kd7 25.fxd5 fxd5 26.exd5 Rf8 The black rook from f-file is finally playing. 27.fh3! fh8 28.fg2! White should still be clearly better here.]

25.f3 What a total domination of the white pieces.

25...f6 26.fxe7+?! What a mistake by White! [26.fxb5! was the right move:

26...Kxb5 27.fxe7+ fh8 28.f1 And I guess Hou would have big problems to hold this position.]

26...Kxe7 27.fxd5? White has lost the thread... [It was time to force a draw by playing 27.fxb5 27...Rb3 28.Ka1 Rxb4

29. ♖xd6! A little tactic... 29... ♗g4! (29... ♖xd6 was losing because of 30. ♕c5+-)]

27... ♖xd5 28. exd5 ♕g4! Now Black is suddenly the one who is attacking and the rook on f8 is perfectly placed for the f5-f4 pushes.

29. ♖d2

29...f5 30. ♖dc2 f4 31. ♖c7 ♕f6 White is already in a very difficult position. What a change! Just a few moves ago it was Anna who was totally dominating the game.

32. ♕b6

32... ♖d8 Black is bringing her last piece into the attack. The Black knight is going to g5.

33. ♕b2 ♖d3 34. ♕c2 It is already difficult to give White any advice. [34. ♕e4 didn't help either... 34...fxg3! 35. hxg3 (35. ♕xd3 and Black is mating after 35...gxh2+ 36. ♕xh2 ♕h4+ 37. ♕g1 ♕f3+-) 35... ♖f3 With an almost winning position for Black.]

34... ♕f5 35. ♕a2 ♖f7 The last black piece is joining the attack and we should not forget that Black is a clear pawn up.

36. ♕f1

36... ♖g5 Nothing can save White here anymore.

37.♖a7 fxg3 38.hxg3 ♜f3+ The white king is all alone against an army of black pieces...

39.♔h1 ♚g6 40.♙xd3 ♚h5+ 41.♔g2 ♙h3+ What a dramatic game in the very first game of the match! I guess Korobov gained some few extra grey hairs! It will be very interesting to see if Anna will be able to recover from such a tough loss in such a "nice" position. **0-1**

Endgame section

(15) Carlsen, M.(2862)-Kamsky, G.(2741)

Sinquefield Cup, 2013.09.09

[CE TEAM]

White has a mating attack, but to bring home the full point is much more difficult than it might look at first sight. However, the World Nr.1 does not let his opponent slip away.

39. ♖h8! White threatens to mate on f8 and if Black tries to prevent it by playing Rd7, he loses his rook after Qe8. So the next move is the only one.

39... ♜g7 Freeing the g6 square. White's problem is that his rooks are slightly paralysed, he cannot penetrate the 8th rank because the c1 rook and the back rank are weak, nor can he lift the c1 rook to c2, because Black has a check on a1.

40. ♕f8+! ♔g6

41. ♖xg2! The only move to win! By eliminating the g2 pawn, White is ready to use the g- and h-files with his c1 rook. [41. ♜8c2 spoils the advantage after 41... ♔h5! Black suddenly holds: 42. ♕h8+ ♜h7 Followed by Rhg7 next and White cannot make progress.]

41... ♜gf7 42. ♕d8! Once again Carlsen finds the only winning move! White threatens to play Rg1 now. [42. ♕h8 is met by 42... ♜h7! 43. ♜g8+ ♜eg7! and Black defends successfully. 44. ♜xg7+ ♜xg7; 42. ♕g8+? makes no sense because of 42... ♜g7 and the g2 king is badly placed.]

42... ♜h7 [42... ♜g7 loses to 43. ♖f3! and the Rg1 threat decides the game. 43... ♔f6 44. ♕f8+ ♜ef7 (44... ♜gf7 45. ♕h6#) 45. ♕xa3+-]

43. ♜g1! The only right move again! [If White starts with

43. ♔f3 Black has 43... ♖h3+ 44. ♔g2 ♖h4 and he is alive.]

43... ♕a2+ [43... ♔f6 44. ♕f8+ ♖ef7 45. ♕xa3+-]

44. ♔f3+ ♔f6 Black has already created real threats with Rh3, so White has to finish the game right away.

45. ♕g8! Another great subtle move and the game is over. [45. ♖g3? spoils the win again as after 45... ♕b1 White has nothing more than perpetual: 46. ♕f8+ ♖ef7 47. ♕d8+ ♖e7=]

45... ♖h3+ 46. ♖g3 ♖xg3+ 47. ♕xg3! Black resigned as he cannot defend against the heavy pieces anymore with his single rook. Rf8 and Qg5 are coming. [Here was the last moment to go wrong with 47. ♔xg3?? 47... ♖g7+-] **1-0**

(16) Bauer, C.(2622)-Ganguly, S.(2630)

2013.09.12

[CE Team]

After an average game, White ended up in a rather bad endgame. But it is not easy to see on the spot whether it is a draw or winning for Black. Let us take a closer look...

29... ♕xh4 30.c3! White needs to try and exchange as many pawns as possible, as this is his only chance. If White could exchange the a- b- and c-pawns against Black's a- and b-pawns the position would be a draw.

30... ♔h7! Black is not getting tempted.

[30... bxc3? would be a mistake. 31. ♔c2 ♕e1 (31... ♕f6 is not winning either, as after 32. ♕b5 ♔h7 33. ♕e8= White is in time.) 32. ♕b5 White is also trying to attack the black pawns from behind here. 32... ♔h7 33. ♕e8 f5 34. a3 ♔xh6 ..

35. ♖f7! An important move. 35...e5 36. b4 axb4 37. axb4 ♔g5 38. b5 ♜f2 39. ♖xc3 e4 40. fxe4 fxe4 41. ♖d2 And White is in time to hold the draw.]

31. cxb4 axb4

32. ♜b5?! White misses his last chance. [32. ♖c2! was a much more resistant move. 32...♔xh6 33. ♖d2

33...♜g5+! Not an easy move to find! (33...♜e7 34. ♜b5 ♔g5 35. ♜e8 f5 36. ♖e2 And White is in time to attack the black pawns from behind with the bishop, so Black will never get 2 connected passed pawns. White would have good chances to save the game here.) 34. ♖e2 ♜c1 35. ♜b5 ♔g5 36. ♜e8 f6 37. ♜f7 e5 38. ♜e8 ♖f5 39. ♖f2

39...g5 Now Black is winning as he will play Kf4 followed by f5 and next either e4 or g4, getting 2 connected free pawns.]

32...♔xh6 33. ♖c2 ♔g5 34. ♜e8 f5 Now things are just too easy for Black.

35. ♖d3

35...♔f4! The last important move. Black is getting 2 connected passed pawns.

36. ♖xg6 ♔xf3—+ 37. ♔d4 ♕f4 38. ♖h7 e5+ Nothing can help White anymore.

39. ♔d5 e4 40. ♔c4 e3 41. ♔d3

41... ♕f3 A nice endgame technique from Ganguly and we can clearly see that not every opposite colored bishop endgame is a draw! [41... ♕f3 42. ♖xf5 e2 43. ♖g4+ ♔xg4 44. ♔xe2 ♖e7—+] 0-1

Editorial Preface

The last week of chess has been really intense! Ladies first:

In the WCC match things are pretty clear. Hou is leading with 4,5-1,5 against Ushenina, who lost all her 3 White games! We are probably not going to face a miracle in the next games.

The Sinquefield Cup was won quite convincingly by Carlsen. The second place went to Nakamura, 3rd to Aronian and Kamsky finished in last place.

The ACP Grand Prix was won by Grischuk, who had another fantastic final match against Nepomniachtchi where he managed to win the Armageddon game with the white pieces.

We can already be excited about the events which are coming up in the next weeks:

1. The 6 games friendly match Topalov-Laznicka.
2. The FIDE Grand Prix in Paris.
3. And of course the end of the WCC match between Hou and Ushenina.

Stay tuned and enjoy the commentaries!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Kamsky, Gata(2741)

- Nakamura, Hikaru(2772) [B90]

Sinquefield Cup 2013(6.2), 2013.09.15

[Balogh Csaba]

Before the game, Nakamura had the theoretical chance to catch Carlsen. It was clear that he would try his best to beat the out-of-form Kamsky with the black pieces, but it almost backfired.

1.e4 c5 2.♘f3 d6 3.d4 cxd4 4.♘xd4 ♘f6 5.♘c3 a6 The Sicilian Najdorf is a very good opening to fight for a win with both colors.

6.♗e3

6...♘g4 Kasparov's favorite move. [6...e6 and; 6...e5 are the other main lines.]

7.♗g5 [Players who want to destroy chess are going for the quick repetition with 7.♗c1 7...♘f6 8.♗e3 but of course, Kamsky does not belong to them even in a bad form.]

7...h6 8.♗h4 g5 9.♗g3 ♗g7 We have reached the starting position of the 6.Be3 Ng4 line. White has several options here and Kamsky goes for one of the main ones.

10.h3 [10.♗e2 is the main alternative for White.]

10...♘f6 This is the new development of the theory. [The main line used to continue with 10...♘e5 but it seems like White might hope for an advantage after 11.f3 ♘bc6 12.♗f2 followed by Qd2 and 0-0-0.]

11.♗c4 ♗b6 A standard move in this line. Black prepares Nc6, which would have been premature if played immediately. [Black should refrain from winning a pawn with 11...b5 12.♗b3 b4 White gets more than enough compensation after 13.♘a4 ♘xe4 14.♗f3! d5 15.O-O-O± With a strong attack, Black is totally undeveloped.; 11...♘c6 is strongly met by 12.♘xc6 bxc6 13.e5!+=]

12.♗b3 ♘c6 [The tactical trick 12...♘xe4 would have been a mistake again: 13.♘xe4 ♗xd4 14.♗e2 Threatening Nxd6. 14...O-O 15.c3 ♗b6 16.h4 g4 17.♗f4! With very good attacking potential for White. He might unpleasantly attack the h6 pawn by playing Qd2 or transfer the knight to h5 via g3.]

13. ♖xc6 ♜xc6

14. O-O! This is the novelty, a strong and probably a prepared one. [14. ♜e2 happened before, but after the strong 14... ♖d7! 15. ♜f3 ♗xc3+ 16. bxc3 ♖f6 Black was alright.]

14...g4 [14... ♖d7 is now met by 15. ♜h5 O-O 16. ♖d5+- Black cannot protect the e7 pawn, since Re8 would leave the f7 unprotected.; 14... ♖xe4?? drops a piece because of 15. ♗d5+- and after 15... Nxc3 the queen is hanging with check.]

15. hxg4 [On 15. h4 15... ♖h5 was probably Nakamura's plan. 16. ♗h2 ♗xc3 17. bxc3 ♜g8 With a double edged position. Black wants to play Qc5 and g3 is always hanging in the air.]

15... ♗xg4 [15... ♖xg4 is similarly met as in the game: 16. ♖d5! ♗xb2? loses huge material: 17. ♜b1 ♗g7

18. ♖b6!+- This pretty move creates fatal threats with Nxa8 and Ba4, and the knight cannot be taken because of the discovery check with the bishop.]

16. ♜d2 ♖d7 [As usual the e4 pawn is poisoned: 16... ♖xe4? 17. ♖xe4 ♜xe4 18. ♜ae1 White takes on d6 next, while 18... ♜d4 loses a bishop after 19. ♜xd4 ♗xd4 20. ♜e4!+-]

17. ♖d5! Very strong intuitions by Kamsky. White activates all his pieces at the cost of a pawn.

17... ♗xb2 18. ♜ab1 ♗e5! The only move. [18... ♗g7 would have been refuted by

19. e5!! ♗xe5 (19... ♖xe5 20. ♖b6!+-; 19... dxe5 20. ♜b4+- wins because of the double attack on g4 and e7.) 20. ♗xe5 dxe5 (20... ♖xe5 21. ♖b6!+- With Ba4 and Nxa8 ideas.) 21. ♜b4+-]

19.f4!? Now and in the next move Kamsky plays the most tempting human moves. He tries to open the center on the e8 king, which is stuck there for a while, since either side of castling would run into Nxe7, checking the queen. [Objectively it seems to be better to play 19.♘xe5! 19...dxe5 (19...♗xe5? loses to the usual motif: 20.♗b6!) 20.♖b4 ♗c5! The only move in order to protect e7 and now White has a great queen transfer: 21.♖c3! f6 22.♖g3! h5 23.f3± Invading the g-file with the queen on the g-file. Black is in trouble.]

19...♗g7

20.e5! There was no way back after playing f4, White does not need to calculate in such moments, just play the attacking moves by feeling.

20...♗c5 Nakamura stands calm and defends well! His plan is to trade one of the attacking bishops by playing Nxb3 or Ne4-g3. [Opening the position with 20...dxe5 cannot lead to anything good for Black... 21.fxe5 White has serious threats on the f7 square. 21...♗e6 is the only move, but White has a strong attack after 22.♖bd1 (22.♗h4 is also good. 22...♗c5 transposes to the game.)]

21.♗h4! Black's position is getting more and more suspicious. Most of the players would collapse in a few moves, but Nakamura is a very resourceful player, who likes

such complicated positions.

21...dxe5 [21...e6 was objectively the right move! 22.♗e3! A strange position where the computer believes that both players are forced to repeat the moves with (22.♗f6+? runs into 22...♗xf6 23.♗xf6 ♗e4! Getting rid of the bishop.) 22...♗e4 23.♖d3 ♗c5 24.♖d2= Of course in a human game, we could not be surprised if one of the players avoided the repetition and then all three results would have been possible.]

22.fxe5 Kamsky plays again the most human move. [The machine thinks differently again: 22.♗xe7! was objectively better. 22...♗xb3 23.♖xb3 ♖c5+ 24.♗h1 ♖d8 25.♖d3 ♖xd3 26.♖xd3

Black does not manage to solve the problems with his king. The attack will become decisive soon. For instance after 26...♖d4 27.♖g3! h5 28.♗f5! ♗xf5 29.♖xg7 ♖f8 30.♖f6+- finishes the game.]

22...♗e6! Black covers the f7 square and stays ready to trade some attacking pieces. He still owns his extra pawn, which was taken on b2.

23. ♖xe7 ♜xb3

24. cxb3! The move is against the principles, since we should take towards the center, however in such cases we must think about the position directly and then we realize that White has a lot of attacking potential with his rook on the c-file later on.

24... ♖b6+ The most obvious move, but a mistake. [24... ♖c5+ was the right move, but who would put the queen into the Rc1 tempo. 25. ♖h1 ♜d8! It looks like Black survives here. Let's check some lines: 26. ♖e1 (26. ♖xd8+ 26... ♖xd8 27. ♖f5+ ♖d7 (27... ♖c8 28. ♜bc1) 28. ♜bd1+ ♖c6 29. ♖d4+ leads to a forced repetition: 29... ♖d7 (29... ♖b6? If Black tries to win, he loses after 30. ♖f2+-) 30. ♖f5+=) 26... ♜d4! This the key resource of the defence. Black threatens to take on h4 and then on e7. 27. ♖f6 ♖xf6 28. exf6 And here comes the difference between 24... ♖b6 and ♖c5. Black now gets counterplay with 28... ♖h5+! 29. ♖g1 ♜h4! and the white king is now equally weak to the black one. The game should end in draw here as well. 30. ♖g3 ♜h1+ 31. ♖f2 ♖c5+ 32. ♖e3=]

25. ♖h1 ♜d8

26. ♖e1! It is very important to control and protect the h4 square. [26. ♖e2 is met by 26... ♜d4! and Black is fine!]

26... ♜d4 Black would like to trade queens by playing ♖b4, which would solve his problems.

27. ♖f6! ♖xf6 28. exf6

28... ♖d7! Great defence by Nakamura! He tries to find shelter for his king in the middle of the board. The main idea of the move is to bring the h8 rook to the battle. [28... ♖b4 nicely loses to 29. ♖xb4 ♜xb4]

30. ♖bd1!+- Black is helpless against the simple threat of Rd6, Rfd1 and Rd8 mate. If Black avoids it by playing Rb6, then White doubles his rooks with Rd4... The knight on e7 simply traps the king.]

29. ♖d1? A very logical move to trade the defender of the d-file, but somehow it spoils the advantage. Only computers can play perfectly in such positions. [29. ♖c1! was the right decision. 29... ♗d6! (29... ♖d8 now loses to 30. ♘f5!! ♖d5 (30... ♙xf5 31. ♗e7#) 31. ♗e4! And Black has no good defence against Rfd1. All his pieces are paralyzed. 31... ♗b5 32. ♖fd1+-) 30. ♗f2 ♖d8 is the most tenacious for Black, although White continues pressing after 31. ♘f5 ♙xf5 32. ♗xf5+ ♗e6 33. ♗h5± The game is very far from over, but it is definitely much easier to play as White, since a single mistake of Black might lead to quick mate with a king on d7...]

29... ♖d8 30. ♗g3 [30. ♗e5 30... ♗e8 Black holds.]

30... ♗e8 At this moment, Kamsky decided to finish the game by repetition. It is difficult to suggest something better.

31. ♗g8+ [It might have been a clever idea to try 31. ♘f5 31... ♙xf5! (31... ♖xd1?? 32. ♗g8+ ♗d7 33. ♖xd1+ ♗c8 34. ♘e7+-) 32. ♖xd4 ♗xd4! The only move! (32... ♖xd4 loses to 33. ♗g8+ ♗d7 34. ♗xf7+ ♗c8 35. ♗e8+ ♖d8 36. ♖c1+ ♗b8 37. ♗e5+ ♗a7 38. ♗xf5+-) 33. ♖xf5 ♗d7! Another only move for Black against the threatening Qg8-Qf7, but now Black

holds the draw. White does not have enough pieces to punish the walking king.]

31... ♗d7 32. ♗g3 ♗e8 33. ♗g8+ ♗d7 34. ♗g3 A nice fighting draw! 1/2-1/2

(2) Ushenina, Anna(2500) - Hou, Yifan(2609) [E32]

WCh Women 2013(3), 2013.09.14

[Arkadij Naiditsch]

We are in the 3rd game of the match. Ushenina lost the first one with White and made an easy draw in the second one with Black. So it is clearly time to "push" for her in case she wants to come back into the match.

1.d4 ♘f6 2.c4 e6 3.♘c3 ♙b4 As in the first game, Ushenina continues to play the Nimzo with 4.Qc2.

4.♙c2 O-O Black plays a different line, as in the previous game Hou continued with 4...c5 and quickly got herself into opening trouble.

5.e4 With this move White enters a very forced line which is actually considered to be OK for Black. Maybe Ushenina's seconds managed to find something "special" in it?!

5...d5 This is of course the only critical reply. Black is fighting for the center.

6.e5 ♘e4 7.♙d3 This is also the main move.

7...c5 As expected Black acts quickly in the center.

8.♘f3 cxd4 9.♘xd4 ♘d7 10.♙f4 This is a very well known position. Lately a lot of games on 2700 ELO+ level were played

here.

10...♘dc5 This is a possible continuation, but not the main one. [10...♙h4 is clearly the critical move and personally I have no idea where White can be better after it. 11.g3 And now both 11...♙h5 (and 11...♙h3 seem to give Black equal play according to the latest games. It is a big pity that we will never know what Anna had prepared here.)]

11.O-O White needs to castle.

11...♙xc3 12.bxc3 ♙d7 Black's main problem is the bishop on c8 which is out of the game. So usually White tries to be fast on the kingside, creating some attack which of course could be quite dangerous because of the opposite colored bishops, which increase the attacking chances. [Maybe 12...♘xd3 13.♙xd3 ♙d7 is another possible way to go on with Black.]

13.♙e2! A good move by White! Now Black is in strategic danger. In case White manages to play f3 next, the knight on e4 will have no good squares to go back and White is going to be clearly better.

13...♘a4! A good reply by Hou. The c3 pawn is a weakness. The position is getting very sharp.

14.cxd5! A good move. White is doing 2 in 1, saving the c3 pawn and at the same time crushing Black's center.

14...exd5 15.c4 As we can see, Black's position looks really dangerous. The knights are strong, but at the same time such a position could fall apart like a card house.

15...♖c8 Another very logical move. Now White has a wide range of continuations.

16.♖b3? A serious mistake in a complicated position. And it was such a chance for Anna to come back into the match! [The right move was 16.♖ac1! with the idea of playing 16...♗ac3 17.cxd5 and of course things are very complicated here, but my feeling says White should somehow be better.]

16...dxc4 17.♗xc4 ♘ac3 And now we can see White's big problem: Black wants to play Ba4 next and there is no good defence against it. A bit unlucky for White, but in such positions an exact calculation is just a MUST.

18.a4 This move seems to lose, but the position was already on the limit anyway. [Maybe White's best try was to play 18.♗xf7+ 18...♖xf7 19.e6 ♗xe6 20.♗xe6 but here too after 20...♖f6 Black is clearly better.]

18...♗xa4! Simple and strong!

19.♖xa4 ♘xa4 Black's calculation is correct.

20.♗f5 [We can see Black's main idea after 20.♖xa4 20...♗c3! An important move! 21.♖b4 ♖xd4 22.♗xf7+ ♖xf7 23.♖xd4 Black is a queen down, but after 23...♗e2+ White can resign as he will be a rook down after Nxd4.]

20...♗ac3 Black is an exchange up and all his pieces are connected, which means the game is over.

21.e6 The last try to create some tactics.

21...♖xc4! Cool and strong!

22.♖xc4 b5! Black is freeing the d3 square for his queen. Hou has nerves of steel!

23.♖b3

23...♖d3 24.exf7+ ♖xf7 Black's threat of playing Ne2 next

is deadly! A very tough loss for Anna, especially as I guess she got what she wanted after the opening, a double edged position, but then she misled the game practically in one move with 16.Qb3?. **0-1**

(3) Ushenina, Anna(2500) - Hou, Yifan(2609) [E17]

WCh Women 2013(6), 2013.09.18

[Arkadij Naiditsch]

And we are in the 6th round of the WCC match. So far we saw only one scenario. Hou is winning with Black and making a draw with White. And the current game was no exception. Once again White got a nice position out of the opening, and she blundered in a complicated position. Ushenina is making presents and Hou is kindly accepting them.

1.d4 ♘f6 **2.c4** e6 **3.** ♘f3 A change from the first 2 lost White games by Ushenina. This time there will be no more Nimzo.

3...b6 Hou is going for one of the main lines. 3...d5 is the very main one.

4.g3 ♙b7 **5.** ♙g2 ♙e7 Black doesn't hurry with the c5 move because of d5 and after exd5 White has the option of playing Nh4, winning back the d5 pawn.

6. ♘c3 **0-0**

7. ♔c2!? An interesting try by White, not giving Black the chance to play Ne4. [7.O-O 7... ♘e4 would lead us to the main position.]

7...c5 An active reply! As we can see, Hou is not trying to play

safe positions, but rather looking for a fighting game. This style of play suits her very well.

8.d5 White needs to play this move. [After 8.O-O?! 8...cxd4 Black is of course doing great. 9.♘xd4 ♙xg2 10.♙xg2 ♚c7 With a probably already better position for Black.]

8...exd5 9.♘h4 The usual maneuver. White wins the d5 pawn back.

9...♘c6! The right move. Black smartly sees the different to a lot of lines: this time after Nd4 the white queen on c2 will be under attack.

10.cxd5 ♘d4 11.♙d1 Now Black needs to decide what to do next. White wants to play e3.

11...♘e8!? I like this move a lot, because it is very human with a quite regular and good idea. Black brings the knight to c7 to support the b5 push, after b4 followed by Nb5 and maybe Nd4. This idea is typical. [Maybe Black could have tried 11...b5 12.e3 b4 With some crazy position, but 11...Ne8 looks much more natural.]

12.♘f3 ♘xf3+ 13.♙xf3 d6 So far everything is normal.

14.O-O ♘c7 Black wants to play b5 next.

15.a4 White prevents this for a moment.

15...a6 16.♙b1! Nicely played by White. Ushenina is ready to

stop the march of the black pawns by playing b4 herself.

16...♙f6 Preventing b4 and putting the bishop to a better position.

17.♙d2 Preparing b4.

17...b5 18.axb5

18...♘xb5?! This looks like a very strange move to me. [18...axb5 was more simple and better. 19.b4 c4 It is clear that Black cannot be worse here. Black plays on the a-file and puts pressure on the d5 pawn, which would give Hou real easy and nice play.]

19.♙g2 Now White might be slightly better.

19...♙c8 Another slightly strange decision. It is clear that the black bishop is badly placed on b7, but there was no need to hurry. [The simple 19...♙e8 would have been a more normal choice.]

20.♘e4 Now White is going to get the bishop pair.

20...♙e8 21.♘xf6+ ♙xf6 The situation has changed a lot and we can see that White is slightly better. The bishop pair plus a better pawn structure should give Anna quite good chances to put pressure on Black's position.

22.e4 It is a pity to make such a move as the black knight is gaining the d4 square, but it is hard to say if White had a

better option. [22.e3 didn't work as after 22...♗f5 Black is winning the b2 pawn.; Maybe 22.♖e1 would have been the best choice. Now after 22... Bf5 White has 23.e4, and after any other black move, White would keep the option of playing e3 in the future.]

22...a5 A very logical move. Black wants to bring her pawn to a3 after which the c-pawn would become strong.

23.♖a1 Quite a passive move. It was maybe better to play 23.f4 and try to create some threats in the center.

23...♗d7 24.♖a2 a4 Black continues with her idea.

25.♖e1

25...h6!? A nice move! Before starting the action Hou secures the last rank. Prophylaxis!

26.♗e3 a3 Black's main idea comes true.

27.♖d2 But White's position is also very solid. The position should be about equal now.

27...axb2 28.♖xb2 ♗c3 Where is Hou going?! [28...♖a4 followed by c4 seems to be much more logical.; It is too early 28...c4?! because of 29.♖b4! ♖ec8 30.♖c1 and the c-pawn could easily get lost.]

29.f3 ♖a3 30.♗f2 White defended from all the tricks.

30...♗b5! It is better to admit a mistake than to continue in the wrong direction!

31.♖eb1?! White misses her chance... [Now it was really time to play 31.f4! and it would not be easy for Black to keep things together. The threat of playing e5 can become really dangerous. White should be better here.]

31...c4 Good calculation by Black. The position is becoming very sharp.

32.♖xb5 ♗xb5

33.♗d4? And White blunders... [33.♖xb5 was also losing as after 33...♖a1+ 34.♗f1 ♖xf3 Black will win the e4 pawn.; 33.♖b4! was the right move and now things are pretty forced: 33...♖a2 34.♖xb5 ♖xe4! Black uses the tactical resources of the position! 35.♖f1 ♖ee2 36.♖xc4 It seems like White should be better, but Black has another attacking move in her pocket... 36...♖b2! Black triples on the 2nd rank and White doesn't have anything better than to give perpetual check. 37.♖c8+ ♗h7 38.♖f5+ ♗g8

39. ♔c8+ With a draw.]

33...c3! An important "zwischenzug". White is now lost!

34. ♕f2 ♕g5 As in the previous games, when it comes to direct tactics, Hou is playing very well!

35.f4 [35. ♖xb5 was not much better as after 35... ♕c1+ 36. ♗f1 c2 the game would soon be over.]

35... ♕g4 White still cannot take the bishop on b5.

36. ♖e1 [36. ♖xb5 loses to 36... ♕d1+ 37. ♗f1 c2]

36... ♖ea8 Black is an exchange up and he has a very strong c-pawn. Not much can help Ushenina to survive here.

37.h3 ♕c8 38.e5

38... ♖a1 Black exchanges the rook, which makes it more easy to queen the c-pawn.

39.exd6 c2 40. ♗xa1 Of course White resigned because of 40...c1Q. Another sad game for Ushenina... We can clearly see a huge difference between Hou and Ushenina when it comes to tactics. Hou stays cool and plays the best moves, while Ushenina is missing a lot. After this game I guess the match is already decided. Hou is leading with 4,5-1,5 and I can see no reasons why the match should kip in favor of Ushenina during the next games... **0-1**

(4) Nepomniachtchi, I.(2717) - Ponomariov, R.(2756) [E90]

ACP Cup 2013(3.4), 2013.09.15

[Balogh Csaba]

Ponomariov was in a must win situation to equalize the match. Nepomniachtchi employed the right strategy of not playing for a draw, but instead playing his usual chess.

1.c4 g6 2.♘c3 ♙g7 3.d4 ♘f6 Black needs an asymmetrical position to play for a win and the King's Indian defence perfectly fits this criteria.

4.e4 d6 5.♘f3 O-O

6.h3 Many top grandmasters started to employ the 6.h3 system. It seems like a decent try for White to play for an advantage nowadays.

6...♙e8 A sideline. Ponomariov wanted to get Nepomniachtchi out of his preparation. [6...e5 7.d5 a5 is the main line and here the development of the theory also shows that 8.g4 is a very interesting move for White. 8...♘a6

9.♙e3 White's main idea is to follow up the development with Be2, Nd2 and then an attack with h4-h5. The g4 move is good prophylaxis against Black's favorite f5 break, since then White usually takes twice on f5, followed by occupying the e4 square with a knight (Nd2-e4), which will have a really safe control over the position.]

7.g4! Qe8 in the King's Indian is always connected with the e5 move. Nepomniachtchi continues the g4 plan, since after e5-d5 he was about to push g4 anyway. Ponomariov decided to change his mind and went for another plan.

7...♘a6 Black intends to play c5 and in case of d5, open the position with e6, which would give even more sense to the Qe8 move.

8.♙g5 In such positions, White generally tries to trade the strong g7 bishop by playing Be3-Qd2 and Bh6. This Bg5 move

is an improved version of this, since from Black's point of view the bishop is quite disturbing on g5, while to send him back with h6 would seriously weaken the pawn structure and also give White a clear target after Be3 and Qd2.

8...c5 9.♔d2 We are still following the theory. White delays the d5 push, since he comfortably holds the center after cxd4 Nxd4.

9...b6 This is the novelty. [Some games continued with 9...cxd4 10.♘xd4 ♘c5

11.f3 which is exactly what White is playing for. White intends to quickly finish the development with Be2 and Rd1 to prepare for any kind of central breaks and then he could launch a very dangerous kingside attack with h4-h5. Black is lacking adequate counterplay and he is suffering with less space.]

10.♖d1 cxd4 [If Black plays 10...♙b7 then White already pushes 11.d5 because Black has spent two tempi to develop the bishop to b7, where it suddenly becomes completely misplaced.]

11.♘xd4 ♙b7 12.f3! Consolidating the center! White soon launches an attack with h4-h5.

12...♘c5 13.♙h6 Trading the defender fits excellently to the attacking plan with h4-h5.

13...a6 As the game shows, Ponomarev was hoping for a central break with e5 or e6-d5, but for this he had to lose another tempo on preventing Ndb5.

14.♙e2 The last preparation. White closes the x-ray between the e8 queen and the e1 king.

14...♖d8

15.h4! Here it is finally!

15...e5 This move allows White to finish the game in style! [15...e6 was a better chance, although it is also quite bad, but at least Black does not get mated. 16.♙xg7 ♔xg7 17.h5 ♙e7 With the idea of taking back with the f-pawn on g6 and to cover the h7 pawn with the queen. (17...d5? is premature because of 18.cxd5 exd5 19.♙g5+- Black cannot avoid h6 or Nf5.) 18.b4 ♘cd7 (18...♙g8! is the only move, since bxc5 is not a threat as long as the queen is pinned on the d-file.) 19.hxg6 fxg6 20.♙h6+

20...♔g8 White wins after 21.g5! ♘h5 (21...♘e8 22.♘xe6+- Deflecting the queen.) 22.♖xh5! gxh5 23.♘xe6 White crushes!]

16.♘f5! An obvious sacrifice after which Black is helpless.

16...♗xh6 [16...gxf5 loses to 17.♗xg7 ♔xg7 18.♖g5+ ♔h8 19.♖xf6+ ♔g8 20.gxf5+- and Rg1.]

17.♖xh6! The f5 knight is still protected indirectly, so White creates a mate threat.

17...♘e6[17...gxf5 18.♖g5+! ♔h8 19.♖xf6+ ♔g8 20.gxf5+-]

18.♘d5! +- Another strong attacking move! White wants to get rid of the e6 knight. Now he threatens to deflect it by playing Nc7 and of course also Nxf6, while if Black takes on d5 cxd5 and the e6 pawn is under attack.

18...♘xd5 19.cxd5 gxf5 Otherwise White would simply play dxe6.

20.gxf5 ♔h8 Nepomniachtchi finds the most brutal way to finish the game:

21.♖f6+ ♘g7 22.♖g1 ♖g8

23.h5! [Black resigned in view of 23.h5 23...♖f8 24.h6 Black has no more moves. White might finish the game for instance with Kf2 followed by doubling his rooks on the g-file. Ponomarev preferred to resign the game than to allow White to have a lot of fun in this total zugzwang position.] 1-0

Endgame section

(15) Ponomarev, R.(2756)-Nepomniachtchi, I.(2717)

Riga rapid, 2013.09.15

[CE Team]

The material is balanced and also quite limited. We might think that the players will soon agree to a draw, but if we take a deeper look, then we will realize that White has a clear advantage, thanks to his dominating pieces. Ponomarev converts his advantage like Karpov would have in his best age.

24...a6 25. ♘d6 ♖d8 26. ♘b7! A nice positional move! White sends to rook away from the opened file and also leaves from the idea of Bf8.

26...♖e8 Black had no other move, since he had to cover the 8th rank.

27. ♖c7! The rook feels most comfortable on the 7th rank.

27...♘e5 [In case of a careless move, White has also prepared a small tactical trick with his previous move: 27...h5 28. ♘d6 ♖f8]

29. Nxf7! Rxf7 30. Rxc8++ — White ends up with an extra pawn.]

28. Bd6! White needs his rook on the 7th rank, he cannot allow Black to send it back.

28... Bg7 An unpleasant necessity, but Black could not trade the active white bishop, since it would have led to loss of material. All black pieces are paralyzed, so it is time to increase the advantage by taking some ground on the kingside. [28... Bxd6 29. Nxd6 Rf8 30. Rb7 b5 31. Nxf7! Rxf7 32. Rxb8++ — This kind of rook endgames are also winning, because of the connected passed pawns on the e- and f-files.]

29. $\text{f4!?$ White gets ready to activate his king and the e3 pawn is not hanging because of Rc8 . [To do the same idea, but with 29. $\text{g4!?$ also made a lot of sense.]

29... b5 [29... a5

is met by a strong prophylactic idea: 30. a3! (Black could get counterplay after the logical 30. Bf2 by playing 30... Bd6! 31. Rc6 Bb4! 32. Bxb4 axb4 33. Rxb6 Bf8! Followed by attacking the a2 pawn with the rook.)]

30. Bf2 h5 31. Bf3 White is ready to push e4-e5. Nepomniachtchi tried to fight against this.

31... f5 32. g4! White reduces the material a bit, but it is more important to open the way for the e-pawn by eliminating the one on f5.

32... hxg4+ 33. hxg4 fxg4+ 34. Kxg4

The material is still equal, but objectively Black is just lost as he is unable to create any kind of counterplay. White simply

wants to push e4-e5, using the fact the rook still cannot leave the 8th rank.

34...♙f8 35.♙e5 [35.♙xf8 was probably even easier. 35...♖xf8 36.♘c5 Followed by Kg5 or e4. 36...♗xe3 drops the knight after 37.♗c8+ ♗e8 38.♗xb8! ♗xb8 39.♘d7+ ♖e7 40.♘xb8+-]

35...♗e6 Black protects the g6 pawn against Kg5.

36.♘d8 ♗e7 Unfortunately for Black, the trade of the rooks does not mean salvation. [36...♗e8 is simply met by 37.♘c6! ♘xc6 38.♗xc6 ♖h7 39.♗xa6+- With a winning endgame!]

37.♖g5! ♘d7 [37...♗xc7 38.♙xc7 ♘d7 39.♖xg6+- is hopeless.; 37...♖h7 is strongly met by

38.♗c2!+- With the double threat of Bxb8 and Rh2-h8 mate.]

38.♙d6 [38.♙d4 38...♖h7 39.♘c6 ♗f7 40.♗a7+- was also winning.]

38...♗g7 [The knight endgame after 38...♗h7 39.♙xf8 ♘xf8 40.♗xh7 ♖xh7 41.♖f6! also looks pretty hopeless. The e-pawn just runs too fast. 41...a5 42.♖f7 ♘d7 43.e4+-]

39.♗c6! Very precise! [39.♙xf8? 39...♘xf8 40.♗c6 would have been a way to spoil the advantage. 40...♗e7=]

39...♙xd6 40.♗xd6 ♘f8 41.e4! Ponomarev does not even waste time on taking the a6 pawn. The e-pawn and the domination of the pieces are deciding the outcome of the game.

41...a5 42.e5 b4 The counterplay is too slow.

43.♘c6 [43.e6 was more precise. 43...a4 (43...♗e7 44.♖f6+-) 44.♘c6 b3 45.axb3 axb3 46.e7+-]

43...♗h7 [43...♖f7 was the only chance, but also without any real hopes. 44.♘xa5+-]

44.e6! ♗h5+ 45.♖g4! And now the e-pawn promotes automatically, while sacrificing the knight is clearly not enough. [It was still possible to go wrong with 45.♖f6? 45...♗f5+ 46.♖e7 ♗xf4 47.♖e8 ♘xe6 48.♗xe6 ♗f2 and Black survives.]

45...♘h7 46.♗d8+ [46.e7 was also good. 46...♖f7 47.♗e6! ♖e8 48.♗xg6+- and Rg8 next.]

46...♖g7 47.♗d7+ ♖f6 [47...♖g8 is for instance met by 48.♘e7+ ♖g7 49.♘d5+ ♖h6 50.e7+-]

48.♘d4 Creating the inevitable mate threat of Rf7. It is worth mentioning that the material is still equal, but Black has to resign.

48...♘g5 49.fxg5+ Great technique by Ponomarev! 1-0

(16) Svidler, Peter(2746)-Jakovenko, Dmitry(2724)

ACP Cup 2013(1.1), 2013.09.13

[CE Team]

White is a pawn up, but is the position winning or still a draw?! This is hard to say at first sight. Let us go into the details...

49.♔d5 ♕d7 50.c5 White has to push the c-pawn. White's idea is to get the black king away from d7, then to play Ke6 and try to win the f-pawn, hoping to end up in a winning rook endgame.

50...♖f1 51.e4 [White cannot immediately play 51.c6+ as after 51...♕c7 52.♖c3 it seems like everything is protected, but Black has the very strong 52...♖f5+! 53.♕e6 ♖f3 followed by f5-f4, with a draw.]

51...♖f2 Black makes a waiting move.

52.♖d1! It seems like White is also just making a waiting move, but with a very beautiful trap!

52...♖f3?? And Black falls for it right away! [Black should have continued with an accurate waiting move: 52...♖e2 53.♖f1 White needs to do something... 53...♖d2+! It is very important to get the white king away from d5! 54.♕c4 ♖c2+ 55.♕d4 ♕e6 56.♖a1 ♖d2+ With good chances of saving the game.]

53.e5!! What a blow! But is Black really lost?!

53...♖f5?? After this move he is for sure! [53...fxe5 also loses to 54.♕e4+; The only way to go on was to play 53...♖f2 54.e6+ (After 54.♕e4+ 54...♕e7 55.exf6+ ♖xf6 56.♖d5 ♖h6 the position is just a draw.) 54...♕e7 Now White has a lot of moves and it is very hard to say if White is winning or not here...

55.♖e1 ♖d2+ 56.♔c6 f5 And this position could be both winning or drawn.]

54.♔e4+ A lucky win for Svidler, but you need to take your chances! **1-0**

Clash of the Titans

(17) Kotov, Alexander-Botvinnik, Mikhail[D45]

URS-ch22(6), 1955.02.19

[Miton Kamil]

1.d4 d5 2.c4 c6 3.♘c3 ♘f6 4.♗f3 e6 5.e3 ♗bd7 6.♕d3 We are in the Meran System in the Slav.

6...♕b4 A strange move because it doesn't make sense to exchange the bishop. Maybe Black wants to provoke moves like a3 or Bd2 but it is hard to say why. The main line is of course [6...♕d6]

7.0-0 0-0

8.♕d2 [8.a3 is also good for White. 8...♕xc3 9.bxc3 b6 And Black has no time to get counterplay over the light squares. 10.cxd5 cxd5 11.c4+= White just has a better center.]

8...♕d6 [8...b6? is a big mistake because of 9.♗xd5! ♗xd5 10.cxd5 ♕xd2 11.dxe6+- And White is a pawn up.]

9.b3 A normal move. The idea is simply to recapture on c4 with the pawn in case Black will play dxc4 and keep a strong center. An alternative for White is [9.e4 Compared to the theoretical position, the bishop is placed on c1. 9...dxe4 (9...dxc4 10.♕xc4 e5 11.♕e3+=) 10.♗xe4 ♗xe4 11.♕xe4 e5 In

this case Black doesn't need to lose a tempo for the h6 move and can play this move immediately. (11...h6 12.♙c3±) 12.dxe5 (12.♙c3 12...f5 13.♙c2 e4=+) 12...♞xe5 And now the idea with Nxe5-Bxh7-Qh5 doesn't work because the bishop on d2 is hanging but White can simply play 13.♙c3 ♞xf3+ 14.♞xf3+= Thanks to the better bishops White keeps the initiative.]

9...♞e7 [9...e5 10.cxd5 cxd5 11.♞b5 ♙b8 12.dxe5 ♞xe5 13.♞xe5 ♙xe5 14.♙c3+= Now any idea with Bxh2-Ng4 doesn't work and White has a stable advantage as he is controlling the d4 square.]

10.♞c2 e5 A logical move. Black is fighting for the center.

11.cxd5 cxd5 12.dxe5 [12.e4 This move should give White the chance to seize the initiative as his pieces are slightly better developed.]

12...♞xe5 13.♞d4 [13.♙e2 13...♞xf3+ 14.♙xf3 ♞e5 15.g3 ♙f5 Black is ok.; 13.♞xe5 13...♞xe5 14.f4 ♞e7 Black is ok here too.]

13...♞xd3 [13...♙d7∞]

14.♞xd3

14...♞e5! A strong move which provokes White to push f4.

15.f4 [15.♞f3 15...♞h5 16.♞b5 ♙b8↑White managed to control the d4 square without playing f4, but now the black pieces are very well placed to create pressure against the

white king.]

15...♞e7 And now Black's position is fine because of the weaknesses on the e-file.

16.♞ac1 ♞d8 17.♞c2 [17.♙e1 With the idea of activating the bishop over h4. 17...♙a3 18.♞c2 ♞e4∞]

17...♙c5 The Bd7-Rc8 plan was enough as well.

18.♞a4 ♙xd4 19.♞xd4 ♙f5 Black is slightly better because of White's weak light squares.

20.♙b4 ♞d7 21.♞c3 [21.♞c5 21...♞b5∞]

21...♞e4 22.♞cc1 b6 23.♞fd1 f6 A move with multiple ideas: Black limited the white bishop, opened the way for the king in the potential endgame and now the queen can also be transferred to g6.

24.♞c3 ♞xc3 25.♞xc3 ♙e4 26.♞d2

26...♞g4 Bxg2 is a threat.

27.h3 The only move. [27.♞dc1? 27...d4! 28.exd4 ♞xd4 29.♞g3 ♞xd2 30.♞xg4 ♞xa2 31.♞c7 g6 32.♙c3 ♞c2+]]

27...♞g6 28.♞f2 h5 A technical move. Black fixes the weaknesses on g2 and h3.

29.♙h2 a5 30.♙a3 b5 31.♙c5 b4 Black fixes another potential weak pawn (a2) but it can still not be enough to win

the game.

32.♖cc1 ♜dc8 **33.**♙d4 ♙c2 **34.**♜d2 ♙e4 **35.**♜dd1 ♚f5 Black is not in a hurry...

36.♚e2 ♚g6 **37.**♚f2 a4 **38.**♜xc8+ ♜xc8 **39.**bxa4 ♚e8 **40.**♜d2 [40.a5 40...♚a4 doesn't change anything.]

40...♚xa4 This seems to be an interesting moment. Thanks to the better bishop and the weak pawns on a2 and g2 Black's position is better but on the other hand the white pieces on the second rank defend the position well and is not easy to find a winning plan for Black. Maybe he should try to somehow put his pieces on the first rank. White decides to give the pawn in order to exchange material and he is hoping to get drawing chances in the endgame with opposite colored bishops. Let's see what happened next...

41.♚h4 [41.♜b2]

41...♜c2 42.♜xc2 ♚xc2 **43.**♚g3 ♚xa2 [43...♚f7 44.f5 ♙xf5 45.♚f3 With some counterplay. 45...♙e4 46.♚xh5+ ♚e7 47.♚g4 ♚f8 48.h4]

44.♙xf6 ♚xg2+ **45.**♚xg2 ♙xg2 **46.**♙d4 ♙e4 **47.**♚g3 ♚f7 **48.h4 g6** In many cases being a pawn up in opposite colored bishop endgames is not enough to win the game. Here the most important task for White is not to allow Black to create a second passed pawn.

49.♚f2 ♚e6 **50.**♚e2 ♚f5 **51.**♚d2 ♚g4 **52.**♙f6 ♚g3 **53.**♙e7 ♚h3 **54.**♙f6 ♚g4 **55.**♙e7 ♙f5 **56.**♙f6

56...♙f3 It looks like White is safe because the black king is not able to attack the e3 and h4 pawns at the same time, but...

57.♙e7 Not the most accurate move! White should keep the bishop on the a1-h8 diagonal in order to defend the e3 pawn from d4 (not c5) to avoid any d4 ideas. [57.♙d4 57...g5 Black's only chance... (57...♚g3 58.♙f6 b3 (58...♙e6 59.♚c1 Of course not 59.Be7.) 59.♚c3 ♙e6

60.♚b2! White must keep the bishop on f6! (60.♙e7 60...♚f3 61.♙c5 g5!! And we have the position from the game.) 60...♚f3 61.♙d4 g5 This idea doesn't work now. 62.fxg5 Black doesn't have d4 and White will simply take the b3 pawn. 62...♚g4 63.♚xb3=) 58.fxg5 ♚g3 59.g6 ♚xh4 60.g7 ♙e6 61.♚c2 ♚g3 62.♙c5 (62.♚b3 62...♚f3 63.♚xb4 h4--+) 60.♙f6 ♚g3 61.♙e7 ♙f5 62.♙d4 ♙g5 63.♙c5 ♙f6 64.♙b6 ♙g7 65.♙a7 ♙h8 66.♙b8 ♙g7 67.♙c8 ♙h8 68.♙d8 ♙g7 69.♙e8 ♙h8 70.♙f8 ♙g7 71.♙g8 ♙h8 72.♙h8 Editorial Preface

The World Championship match between Hou and Ushenina is over. Hou just needed 7 games to regain her title with an amazing result of 4 wins and 3 draws. Congratulations to the 2nd strongest female player of the World.

The Grand Prix in Paris has started with a lot of exciting games! It is too early to make any conclusions, but we will probably see a big fight for the 1st place between Gelfand, Caruana and Nakamura.

In the female Grand Prix, Koneru has a very comfortable 1-point lead, with 3 rounds to go until the end of the tournament. The World Junior Championship was won by Yangyi Yu with an amazing result of 11/13 and in the female section Goryachkina Alexandra won with an equally impressive 10.5/13.

The Croatian Team Championship was won for the 4th time in a row by Liburnija Rijeka. Topalov won his friendly match against Laznicka 4-2.

As usual we wish you a lot of fun with the current issues of CEWN Nr83!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Nakamura, Hikaru(2772)
- Tomashevsky, Evgeny(2703) [D31]

FIDE GP Paris(1), 2013.09.22

[Balogh Csaba]

The last Grand Prix in Paris started with a really spectacular game.

1.d4 d5 2.c4 e6 3.♘c3 c6 This opening decision by Black might have caught Nakamura by surprise. I cannot recall whether Tomashevsky has ever employed this opening before.

4.e4 Nakamura plays the most challenging move, involving a pawn sacrifice for strong compensation. From a practical point of view, this is a clever idea, because Tomashevsky is known to be a great positional player who feels less comfortable in sharp positions. However, this game shows his strength in this kind of games as well.

4...dxe4 5.♘xe4 ♗b4+ 6.♗d2 ♕xd4 7.♗xb4 ♕xe4+ 8.♗e2 ♘a6 We have reached the initial position of this opening. The b4 bishop is under attack and all of its moves belong to the theory, including the highly attractive 9.Bf8, attacking the g7

pawn, which cannot be taken because of the mate on d8.

9.♗c3 f6 9...Ne7 is the most common move, but this line is still full of unexplored territories.

10.♕d6 A rare move again, this time by White. 10.Nf3 has mostly been played before.

10...♘h6 With the idea of playing Nf7 and kicking out the annoying queen from d6.

11.♗xf6! A brilliant move, but it is still not the novelty, so both players must have checked it in their preparations. [After the direct 11.O-O-O 11...♘f7 covers the d8 square 12.♗h5 g6 and Black is safe!]

11...gxf6 12.O-O-O

12...Kg6! Here comes the novelty of the game, which is actually the only move for Black to stay in the game! Black prevents Bh5. [In the previous game Black played 12...Kg8 and lost after 13. Bh5+ Kg6 14. Qd8+ Kf7 15. Qh8!+- Llanos-Adla, Villa Gesell 1996. White takes on h7 and wins huge material.; The difference is that after 12...Nf7 13. Bh5! Black does not have g6 and he is helpless against the mate on d8.]

13. Qd8+ Kf7 14. Qxh8 White has won an exchange, but suddenly Black becomes the attacking side!

14...Nb4! Creating the threat of Qc2 mate.

15. Bh5! It was Nakamura's turn to find the only move! [15. Qd2?? leads to mate in two after 15... Nxa2+ 16. Qd1 Qb1#; 15. Qd2? is met by the fantastic 15... Qe7!!+- and White

cannot avoid his queen being trapped after Nf7!]

15...Nxa2+! An important intermediate move with the idea to close the d-file. [15... Qxh5? loses to 16. Qxh7+ Ke8 17. Qh8+ Qf7 18. Qd8!+-]

16. Qd2 Qxh5 17. Qxh7+ Kf8 18. Qh8+ Kf7 19. Qh7+ Kf8 Black is slightly ahead materially with his two minor pieces against the rook, but his king's position is quite unstable. White might hope for more than a perpetual check. Nakamura stays true to his style and continues the game!

20. Nf3!? e5! Black wishes to complete the development of his queenside pieces and he opens the diagonal for his bishop.

21. Qe1 The human move, opening the rook's file. [

21. h3!? The computer's suggestion has two ideas. The main

one is the direct threat of g4, whereafter the queen cannot protect the knight on h6. The other one is simple prophylaxis against Bg4, the only possible development of the c8 bishop, since Bf5 could be met by Qh8 and Qxa8, while after Bg4-Qh8 Black has Ng8 and the queen is protected on h5. Black has to defend precisely to stay in the game! 21...e4! With the idea of having Qa5 check after g4. 22.♔c2 White has refreshed the threat of playing g4 and added a new one with Rd8! 22...♙e6!

We have reached a very interesting position, which is rich in possibilities. 23.g4 (

- a) 23.♖d6 23...♗b4+ 24.♔b1 (24.♔b3? 24...♙xc4+! 25.♔xc4 ♕b5+ 26.♔c3 ♕c5+ 27.♔b3 ♕xd6) 24...♙f7 25.♖xf6 exf3 26.♖xh6 ♕e5 27.♕h8+ ♕xh8 28.♖xh8+ ♙g8 Only Black could be better here.;
- b) 23.♗d4 is risky for White in view of 23...♙xc4 24.♕h8+ ♔f7 25.♕xa8 ♗b4+ 26.♔b1 ♕a5;
- c) 23.♕h8+ 23...♔f7 24.♕xa8 exf3 25.♕xb7+ ♔g6 This position is fine for Black. The roles have been switched again and he is the one attacking!)

23...♗b4+ (The problem of 23...exf3 is that after 24.gxh5 ♙f5+ 25.♕xf5 ♗xf5 26.♔b3!+- the knight is trapped.) 24.♔c1!

White can play for the win! (24.♔b1 24...exf3! already works: 25.gxh5 ♙f5+ 26.♕xf5 ♗xf5; 24.♔b3 leads to a spectacular draw after

24...♙xc4+! 25.♔xc4 ♕b5+ 26.♔c3 ♗a2+ 27.♔c2 ♕c4+ 28.♔b1 ♗c3+! 29.bxc3 ♕b3+ With perpetual check.) 24...♕c5 (24...♕a5 25.♕xh6+ ♔e7 26.♕h7+ ♙f7 The machine is not impressed and shows the win after 27.♖he1! ♕a1+ 28.♔d2 ♕xb2+ 29.♔e3 ♗c2+ 30.♔xe4 ♗xe1 31.♖xe1+-

And it is actually the black king who is in danger!) 25.♕xh6+ ♔f7 26.♕h7+ ♔f8 27.♕xe4 ♙d5 (On 27...♙xc4 28.♕d4! defends perfectly!) 28.♕d4 ♕xd4 29.♗xd4 ♙xh1 30.♖xh1 ♗d3+ (30...♔f7+= is probably better and Rd8 comes next move. It is difficult to assess whether White is winning or if Black's drawing chances are better.) 31.♔c2 ♗xf2 32.♖f1 ♗e4

(32...♘h3? loses to 33.♚h1!) 33.♚f4 ♚e8 34.b4!+= Followed by Kd3 after preventing the Nc5 check. White retains an advantage! This leads to a very interesting question from a theoretical point of view. This position or the one after 30...Kf7 might arise by force after 11.Bxf6 and in both cases White is doing better. We can be curious to see how this line will develop in the near future.]

21...♙g4! 22.h3 Trying to get rid of the queen's defender and also to open the g-file for the rook. However due to the pin, White is not threatening to play hxg4, so Black has a free move. [22.♚h8+ could be met by 22...♘g8!]

22...e4 23.♘d4 [23.♚h8+ was an alternative, although in the endgame after 23...♘g8 24.hxg4 ♚xh8 25.♚xh8 exf3 26.gxf3 ♚e8+ 27.♙f1 ♙g7 Black is not worse.]

23...♚e8! Activating the last piece and also covering the e6 square in order to threaten Bxd1. Nakamura was down to 1 minute at this point! [23...♙xd1?? did not work because of 24.♘e6+ ♙e8 25.♘g7+ ♙f8 26.♘h5+--]

24.♚h8+ [24.hxg4 also leads to a drawish position after 24...♚xh1+ 25.♙e2 ♘c1+! (But not 25...♚h4? because of

26.♘e6+! ♚xe6 27.♚d8+ ♚e8 28.♚h8+-- 26.♙d2 ♚h2 27.♙xc1 ♘xg4 28.♚f5 ♚h6+ 29.♙c2 ♘e5 Black consolidates his position and then he should not be worse.]

24...♙f7 [24...♘g8? now loses to 25.hxg4+--]

25.♚h7+ ♙f8 26.♚a1 Wow! I wonder how many players would not have repeated the moves with 1 minute on the clock!

26...e3 Black's counterplay is coming too fast. White is forced to give perpetual check now. He could have continued playing for the win with 0-0, but unfortunately for him this is an illegal move as he has already castled queenside in this game!

27.♚h8+ ♙f7 28.♚h7+ ♙f8 29.♚h8+ ♙f7 30.♚h7+ A great game! As we see, there can be a big difference between a draw and a draw. **1/2-1/2**

(2) **Alekseev, Evgeny(2710)**

- **Krush, Irina(2492) [B51]**

Baku Open 2013(3.4), 2013.09.21

[Balogh Csaba]

We are now going to see a brilliant game from the Baku Open!

1.e4 c5 2.♘f3 d6 3.♙b5+ Alekseev usually aims for less theoretical positions, where he can outplay his opponents later on.

3...♘d7 4.d4 ♘f6

5.O-O The previous move probably came as a surprise for Black and she takes the brave decision to accept the pawn. [5.♘c3 is the main line, but the text move involves a very tricky pawn sacrifice...]

5...♗xe4 [Black should play more carefully with 5...cxd4 6.♙xd4 and here he can choose between some playable options, like 6...a6 (6...g6 ; or 6...e5)]

6.♙e1 ♘f6 7.dxc5 dxc5 It is interesting that Irina Krush had already played this position once back in 1999. Her opponent then played 8.Bg5, but she managed to preserve her extra pawn and later won the game. Alekseev came up with a highly aggressive improvement, although it is not the novelty yet.

8.♗g5! The most direct way to make use of the undeveloped Black pieces. White prepares for sacrifices on the e6 and f7 squares!

8...e6 [8...h6 leads to similar positions as in the famous Deep Blue-Kasparov game in the Caro-Kann defence. White intuitively sacrifices a piece with 9.♗xf7! ♔xf7 10.♙c4+ ♔e8

11.♙f4 Followed by simple development with Nc3! Black is unable to solve the future problems around his king, nor can he try a simplification with 11...♗b6 because of the small tactical trick 12.♙f7+! ♔xf7 13.♙xd8+—]

9.♗c3 [GM Jones played the even more direct 9.♙c4!? 9...♙e7 10.♙xe6! O-O (10...fxe6 11.♗xe6 ♙b6 12.♙e2+— Black can hardly stop this attack.) 11.♙e2± With a big advantage, since the bishop cannot be taken because of Qxe6 and Qxe7.]

9...♙e7 White needs to act quickly now, as Black is ready to castle kingside after which his extra pawn would tell.

10.♖e2! White does not want to hide his intentions, he is further pressing the f7 and e6 pawns in order to sacrifice the knight effectively.

10...a6 [10...O-O is met by 11.♘xe6! fxe6 12.♖xe6+ ♖f7 (12...♙h8 13.♖xe7+- With an extra pawn and a winning advantage!) 13.♙c4 ♖f8 14.♖xe7!+- White wins by using the pin!]

11.♘xf7! There is no way to improve the circumstances! All the pieces are prepared for the attack!

11...♙xf7 12.♖xe6+ ♙f8 13.♙c4 Leaving from the attack with tempo. Black has only one move to prevent Qf7.

13...♖e8 14.♙f4! The most natural developing move. White wants to finish the game with Bd6.

14...♘b8 [14...b5 15.♙d6!+- is over.]

15.♖d6!! I like this move a lot! White wants to eliminate the defender on e7! [Unfortunately 15.♖xf6+? does not work as after 15...♙xf6 (15...gxf6 16.♙h6# would have been a nice mate.) 16.♙d6+ ♙e7 Black holds.]

15...♘c6 [15...b5 is nicely refuted by 16.♖xe7! ♖xe7 17.♖e1 ♖xd6 18.♙xd6#]

16.♖xe7!! A great and consequent attack!

16...♖xe7 17.♖e1 ♘e8 Resourceful defence, but it does not help. [17...♖xd6 18.♙xd6+ ♘e7 19.♖xe7+- White is mating even without the queen.; 17...♙e6 also leads to nice variations: 18.♖xe6 ♖xd6 19.♙xd6+ ♙f7 White starts the haunt of the king with 20.♖e3+! ♙g6 21.♖g3+ ♙f5 The only move. Somehow there is no direct mate. White must be

satisfied with obtaining a winning position for instance by playing (21...♔h6 leads to mate after 22.♕f4+ ♔h5 23.♕f7+ g6 24.f3!+- followed by Rh3 mate.) 22.f4 Threatening Rg5 mate and after 22...h6 23.♖xg7+- the black king is in a mate net that he can hardly escape.]

18.♔d1!! From here, White can quickly switch his queen to the attack via f3 or h5. [18.♔d2 18...♔d7 is not so clear.]

18...♔f6 [18...♔d7 loses to 19.♔h5 With the simple threat of playing Qxc5 mate and after 19...b6 20.♖xe8+ ♔xe8 21.♕d6+ ♔e7 22.♔f3+ ♕f5 23.♔xf5+ mates.]

19.♔d5! Dark clouds are approaching the black king. White brings a new attacker.

19...♔g6 White can choose between several different wins here. [After 19...♔f5 the easiest win is 20.♖xe8+! ♔xe8 21.♔c7+ ♔f8

and here White has the following pretty finish: 22.♔d8+! ♔xd8 23.♕d6# Not bad! :)]

20.♔c7 This is one of them. White wants to deflect the e8 knight from the d6 square. [According to the machine, the most precise was 20.♕e3 which is quite an inhuman move. 20...♔d4 21.♕xd4 cxd4 22.♔f3+! ♕f5 (22...♔f5 23.♔a3+!+- is the point!) 23.♔a3+ ♔d6 (23...♔d6 24.♖xe8+ ♖xe8 25.♔xd6+-) 24.♔e7+- and Nxf5 next finishes the game.]

20...♕g4 [20...♔xc7 21.♕d6+-; 20...♕h3 was the best chance, although it loses quite easily too. White has different ways to win... 21.♔f3 (The simple 21.♕g3 is also good.; The most direct solution is 21.♔e6+ 21...♕xe6 22.♕d6+ ♔xd6 23.♔xd6+ ♔e7 24.♖xe6 ♔f7 25.♖e4! ♔f6 26.♖f4+-) 21...♔xg2+ 22.♔xg2 ♕xg2 23.♔xa8 ♕h3 24.♔c7+-]

21.♔d5! Qxc5 is a new threat and the end is near. Black decides to let White finish the game in style:

21...♖d8 22.♔xc5+ ♔d6 23.♕xd6+ ♖xd6 24.♔xd6+! ♔xd6

25.♖e8# What a game! Especially nice from a pure positional player like Alekseev! **1-0**

(3) Naiditsch, Arkadij(2710) - Kozul, Zdenko(2601) [B67]

TCh-CRO Ia Liga 2013(9.2), 2013.09.22
[Arkadij Naiditsch]

We are in the last round of the Croatian Team Championship. My team had to win in order to secure the 1st place so of course I was feeling quite ambitious with White against an opponent with a clearly lower rating. In fact, maybe not many are aware of this, but Kozul once became European Champion and is a very good player, just not very stable.

1.e4 c5 The Sicilian was not a surprise for me. It has been Kozul's main opening for all his life.

2.f3 d6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 Nc6 So we are entering the Rausser variation of which Kozul is basically the godfather. I cannot imagine that anybody could have played more games than him in the line we are going to see and achieving great results. But chess has changed, computers got stronger and so it became more and more dangerous playing forced lines where Black needs to be very precise.

6.g5 The usual move, another option is to play 6. Be2 but it is a much more calm line.

6...e6 7.Qd2 Of course White should not lose time and he goes for the very typical long castle.

7...a6 8.O-O-O

8...h6 [A couple of years ago the move 8...h6 was quite fashionable but it seems that after 9.Nxc6 bxc6 10.g4 d5 11.Qe3 White is getting nice play.]

9.f4 [9.f3 is also a possible move, but the move in the game is much more concrete.]

9...b5 10.Nxf6 White uses the fact that Black cannot take back with the queen.

10...gxf6 [10...Qxf6 11.e5! is the key move. 11...dxe5 12.Ndx5 Qd8 13.Nd6+ Nxd6 14.Qxd6 White is better.]

11.Qb1 b4 A slightly strange move order. [Black usually plays 11...Qb6 12.Nxc6 Nxc6 13.f5 b4 14.Ne2 which leads to the same position as in the game.]

12.Nce2 Qb6 Before playing 13.Nxc6 I was thinking for a while. 13.Nxc6 leads back to the main lines but 13.Qe1 with the idea of playing Qh4 next looks quite tempting too.

13.Nxc6 I finally decided to go for what I know.

13...Nxc6 14.f5

14...Nxe4?! This was a big surprise for me! I knew that playing 14...Bxe4 should be very dangerous and almost nobody does it. [14...e5 15.Ng3 h5 16.h4 Qc5 17.Qe2 would lead to the main line with a very sharp position.]

15.fxe6 Maybe not the best, but somehow I remembered this move, so I played it quickly. [15.♘g3! is probably the strongest move here. 15...♙b7 16.fxe6 fxe6 17.♙d3 Followed by Rhe1 and Black's position looks very bad.]

15...fxe6 16.♙f4 d5 The right choice! [After 16...f5 17.♘g3 ♙b7 18.♙c4 Black would almost be losing on the spot.]

17.♙xf6 Before playing this move, I thought for over 20 minutes because I could not decide whether to play 17.Ng3 first or to play Qxf6. [17.♘g3 was also interesting, trying to win half a tempo by developing the knight before playing Qxf6. 17...e5 18.♙h4 ♙g6 19.♙xd5 I think White should be better here as well.]

17...♙g8 18.♘f4 ♙e7 [It was maybe better for Black to try and escape into a worse endgame: 18...♙g7 19.♙xe6+ ♙xe6 20.♘e6 ♙d7 Of course White is a clear pawn up, but Black would keep some chances of making a draw here.]

19.♙h6 Now I of course keep the queens on the board. The black king on e8 is quickly getting into trouble.

19...♙g5 This doesn't look great, but it is hard to give Black any good advice. The position already looks very dangerous.

20.♙h5+ 20.Qxe6 was again possible, but I wanted to play for more than an endgame advantage.

20...♙e7

21.♙d3! This move was the key of my previous ones. I am getting rid of the "position holder" bishop on e4 and Black's defence is practically falling apart.

21...♙af8 [A nice variation could appear after 21...♙xf4 22.♙xe4 dxe4 23.♙h7+ Many other moves are also winning for White, but this variation is just the most pretty one. 23...♙f6 24.♙hf1 ♙e5 25.g3 ♙e3 26.♙f7 ♙af8

27.♙f5+ exf5 28.♙d5#]

22.♙xe4 ♙xf4 I now had a wide range of moves again, which all seem to be leading to a big advantage for me.

23.♙xd5 Probably the most human and practical move. [23.♙h7+ was also very strong. 23...♙f8 24.♙hf1 dxe4 It seems like Black is holding but 25.h4!! is crushing all of Black's hopes. White should be totally winning here.]

23...exd5 24.♙he1+ Before playing 23.Bxd5 I tried to calculate as many lines as I could, but in such a position this is not an easy thing to do. So I said to myself, in the worst case I will have 3 pawns plus an attack for a piece, which is already not too bad...

24...♙e4 [24...♙f6 was not saving Black either. 25.♙xd5! With many different threats. Once again we could face a beautiful mate after 25...h6

26. ♖xg5! hxg5 27. ♗h6+ ♔g6 28. ♗f8#; 24... ♕d6 leads us to the same idea as before: 25.h4!! And Black's position is falling apart.]

25. ♗xh7+ ♕f8 26. ♖f1+ ♕f6 27. ♖xd5 So White has 3 pawns for a piece and continues attacking the black king. The position looks pretty winning, but of course some calculation is still needed to finish the game.

27... ♖d4 [After 27... ♖e7 28. ♖d8+ ♗xd8 29. ♖xf6+ White is also winning.]

28. ♗h6+ When I saw this rook endgame, I didn't look for anything more direct.

28... ♕f7 [28... ♕e7 would lead to the same thing. 29. ♖xf6 ♖xd5 30. ♖xb6 ♖d1+ There is no mate! :) 31. ♗c1 ♖xc1+ 32. ♕xc1 With a totally winning endgame.]

29. ♖xf6+! The most simple.

29... ♗xf6 30. ♗xf6+ ♕xf6 31. ♖xd4 ♖xg2 I am in a rook endgame with 2 pawns up. It is a totally winning position.

32. b3 a5 33. ♖d5 [33.h4 followed by Kb2, Rc4 and a3 would also win the game very easily.]

33... a4 [33... ♖xh2 34. ♖xa5 ♖h4 35.a3 and with connected b+c pawns the win is just too easy.]

34. bxa4 ♖xh2 35. ♕b2 As we know, the position with a+c pawns in rook endgames is a draw, but I will have an extra a-pawn, which would give me a rook endgame with 3 pawns up.. . This is just one too many!

35... ♕e6 36. ♖d3 ♖h1 37. ♖d8 ♖h3 38. ♖d4 ♖h1 I was not in a hurry with winning the b4 pawn, as Black cannot do much anyway.

39. ♖xb4 ♕d5 40. a5 ♕c6

41. ♕b3 Now it is already a matter of minimal technical skills.

41... ♖h8 42. a6 ♖a8 43. ♖a4 We managed to win the match 4:2, a nice finish of a hard fought tournament! :) 1-0

(4) Hou, Yifan(2609)

- Ushenina, Anna(2500) [B90]

WCh Women 2013(7), 2013.09.20

[Arkadij Naiditsch]

We are in round 7, which was already the last game of the match and actually the first win by a player with the white pieces. Hou won all her previous games with Black.

1.e4 c5 Ushenina continued to play her Sicilian, which is a great opening if you are looking for a fight.

2.♘f3 d6 3.d4! It seems a bit strange to me that Hou is not playing for a draw! A move like 3.Bb5 is well known to be very safe for White, with most probably a drawish outcome.

3...cxd4 4.♘xd4 ♘f6 5.♘c3 a6 6.♙e3 We are in the main line.

6...♘bd7 A rare move. The main ones are 6...e6 or 6...e5.

7.♙e2 A multifunctional move. White is giving herself a big choice. To play 0-0 next, or maybe go for g4 or for Qd2, followed by 0-0-0.

7...e6 8.g4 Once again Hou chooses the most aggressive continuation which shows big confidence and is of course totally deserved after a lead like +3 out of the first 6 games.

8...h6 Black can of course not let White play g5.

9.f4 This move is directed against the g5 threat. White wants to keep the center as strong as possible, which is very typical in such positions. Another option was to play 9.h4.

9...g5!? Black is fighting for the very important e5 square. This is also quite typical for the Sicilian.

10.f5 [I think it was the wrong moment for White to get greedy: 10.fxg5?! 10...hxg5 11.♙xg5 ♙e7 And Black will get excellent play on the dark squares.]

10...♘e5 11.h3 Preparing to play Qd2 next and long castle. The g4 pawn was hanging before.

11...b5 12.a3 This move is also needed.

12...♖e7 This move looks a bit strange to me. The e7 square should be a nice place for the black bishop.

13.fxe6! I like this move a lot! White tries to handle the main problem of the position, the very strong knight on e5.

13...fxe6

14.♘f3 This was Hou's idea.

14...♘fd7 Of course Black needs to fight for the e5 square.

15.♖d2 ♘xf3+ 16.♙xf3 ♘e5 17.♙e2 We can now take a fresh

look at the position. White is better developed and will have a safer king after castling queenside. Black has a great knight on e5, but nothing more. In my opinion Black's position already looks a bit dangerous. If White managed to play 0-0-0 and maybe h4 next, Black's whole structure could fall apart.

17...♘g7 It doesn't look good to get the knight back from e5 to f7, but what else to do. .. To stand with the bishop on f8 is not an option either.

18.0-0-0 ♞f7 19.♙d4 White continues playing in a very logical way. Exchanging the bishop is clearly good for White.

19...♙e5 20.♙xe5 dxe5 So now you can see that Black is in trouble. White has a better pawn structure and a safer king, but Black's position is still pretty solid.

21.h4?! There was no reason for this move at all. Black is getting the nice g5 square for her passive knight on f7. [21.♞hf1 looks much more easy and stronger. Next White can play Rf3 followed by Rd3 or Rdf1, with a big advantage.]

21...gxh4 22.♚e1

22...♞a7 Black wants to exchange the rook, but why to make it so difficult?! [22...♙b7 23.♞xh4 ♞d8 would have been the much more natural way to go on.]

23.♞xh4 ♞d7 24.♞h5 ♞g8 25.♙b1 White's position is better,

but it is nothing special.

25...♞c5 26.♞h3 ♞b6 The black queen is well placed on b6.

27.♞h4 ♞xd1+ 28.♙xd1 ♙b7 The black bishop is finally out and targeting the e4 pawn.

29.♞c3!? Once again Hou is playing very aggressively. It would have been more solid to simply play 29.Nc3 with a slightly better position.

29...♞d8 30.♞f2 ♞d4? This is already the decisive mistake... [30...♙g5 was the only move and after 31.♞a7 ♞g7! Black's position is of course looking very dangerous, but it is hard to find something concrete for White and the e4 pawn is hanging. I think that from a practical point of view the game would have been very open here.]

31.♞f6! Now White's attack is becoming very dangerous.

31...♞d6

32.♙f2 The white knight is finally coming back into the game. Now Black often has to think about a move like g5!

32...♙f8 A clear sign of despair...

33.♞f3 The most easy move. Why not take a pawn if you can...

33...♞g7 34.♞xh6 ♙g8 35.♞f6 White is a pawn up and the black king is still not feeling much better. I guess that by now

everybody understood that the match is over.

35...♘c6 36.♖d3 ♔c5

37.g5! Hou is regaining her WCC title in a nice style!

37...♗xg5 38.♗g4 Whites has too many threats: Rd8, Nh6 or just Nxe5.

38...♗f7 39.♔xe6 Another cool move. Nf6 next is deadly.

39...♔g1+ 40.♖d1 And Hou Yifan very deservedly became the new World Champion, showing great nerves, good preparation and very practical play. Congratulations from us to her! **1-0**

Endgame section

(15) Efimenko, Z.(2661)-Solak, D.(2615)

Baku Open, 2013.09.23

[CE Team]

We have reached this endgame. It is interesting to analyze whether White can win, or if the black knight is able to stop the h-pawn. Black cannot sacrifice his knight in order to run to the corner with his king, since the color of the bishop fits the one of the h-pawn.

70. ♖xb6 [White cannot go all-in with sacrificing the bishop as after 70. ♖e5 70... ♖e6 71. ♖g6?? Black easily stops the pawn and even wins the game. 71... ♖xe5 72. h5 ♘d6 73. h6 ♖e6 74. h7 ♘f7 +-]

70... ♘c3 [70... ♖e6 was also possible. 71. ♖g6 ♘d6 72. h5 ♘f5 leads us back to the game.]

71. ♔g6 ♘d5

72. ♔g7! A very tricky move! The white king is leaving from the f4 check in order to advance the h-pawn. [After 72. ♔f7 Black has to find the only defence, which is 72... ♘xb6! 73.h5 ♘c4 74.h6 ♘d6+ 75. ♔g7 ♔e7 76.h7 ♘f7= Just in time!]

72... ♔e6! The only move! [72... ♘f4? was tempting, but it loses to

73. ♔f7! Preventing the black king from approaching the pawn. 73... ♔d6 74. ♕e3 ♘h5 (74... ♘g2 75.h5 ♘xe3 76.h6+- The pawn promotes.; 74... ♔e5 75. ♕xf4+ ♔xf4 76. ♔g6!+- The only move, but it is enough!) 75. ♔g6+- And the knight is trapped.; After 72... ♘xb6? Black cannot stop the h-pawn. 73.h5 ♔e7 74.h6+- The knight cannot reach the f7 square in two moves.]

73.h5 ♘e7! Another only move! It is better to stop the pawn as less advanced as possible. [73... ♘f6

74.h6 This is a theoretically winning position and the technique is easy: 74... ♘h5+ 75. ♔f8 ♘f6 76. ♕d8!+- Taking the f6 square under control, so that Black can no longer stop the pawn!]

74. ♕d8 ♘f5+ 75. ♔g6 ♔e5! Yet again the only move! Black must keep his knight on f5. White should try to create a zugzwang position in order to kick out the f5 knight from its outpost.

76. ♕g5 ♔e6

77. ♕f6! Good technique! White finds the only possible zugzwang. The king cannot move and the knight has no

checks on h4 or on e7, which could be followed by returning to f5 next move. What to do as Black?

77...♖h6! Great defence and of course another only move! That was basically all that Black had to know, from now on the defensive task is easy. White obviously keeps on trying.

78.♙c3 ♜f5 79.♚g5

79...♜d6! The only move again, but this it quite an easy one! White cannot advance the pawn because of Nf7.

80.♙b4 ♜f7+ Black decided to change the defensive method. [80...♜f5 was also good enough.]

81.♚g6 ♜e5+ 82.♚g7 ♜g4! Logical defence. White needs to retreat his king in order to disturb the knight. [82...♜f7

83.♙f8!! White needs to control the h6 square! (83.♙a3 would

allow Black to survive after 83...♚f5!! 84.♚xf7 ♚g5) 83...♜g5 (83...♚f5 84.♚xf7 ♚g5 85.h6+-) 84.h6+-]

83.♙c5 ♚f5 84.♙e7 ♚e6 85.♙g5 ♚f5 86.♙h4 ♚e6 87.♙e1 ♚f5 88.♙d2 ♚e6 89.♙g5 ♚f5 90.♙c1 ♚e6 91.♚g6 After several waiting moves, White comes back with the king, but now Black is also able to change the defensive method.

91...♜e5+! 92.♚g5 Now all moves are drawn, the easiest being

92...♚f7! Heading to the corner!

93.♚f5 ♜d7 94.♙e3 Solak finds a direct way to eliminate the h-pawn.

94...♜f6 95.h6 ♜g8 96.h7 ♜e7+ 97.♚g5 ♚g7 98.♙d4+ And a draw was agreed! An instructive endgame for any level of players. Solak held the draw precisely, but it is unclear whether he was able to find all the only moves or if he just knew this theoretical position... In any case a deserved save! **1/2-1/2**

(16) Dominguez Perez, L.(2757)-Giri, A.(2737)

FIDE GP Paris(4.5), 2013.09.25
[CE TEAM]

White's position looks pretty good. He is a pawn up and he has control over the d-file, which should clearly give him very good winning chances. But sometimes things are not as easy as they seem and the rook endgames are known to often be much more tricky than they look. Dominguez will show us very convincingly how to convert White's advantage!

28...♔g6 29.♖d5! An excellent move, cutting the black king on the 6th rank and paralyzing the black rook.

29...♖f6+ 30.♔e2 c6 31.♖c5 Now both rooks almost cannot move!

31...♔h5 32.e4! It is time to bring the king and the pawn one line closer to queening!

32...♔g4 33.♔e3 ♖e6 Black is still hoping to create some sort of fortress, but it is only a dream...

34.h3+! Another very accurate move. White is getting rid of the active black king.

34...♔h4

35.g3+! Once again Dominguez finds the best move! By taking the g5 pawn, White is getting the extra f4 square for his king and the g7 pawn is becoming very weak.

35...♔xh3 36.♖xg5 g6 37.e5 The Black king is out of play and the rook on e6 is completely out of moves. White is pushing his pawn and king in direction of the 8th rank.

37...♔g2 38.♔e4 ♔f2 Black seems to be moving in direction of White's b-pawn, but it is of course too late.

39.♖g4 The last precise move! White brings his rook over f4 to g4, after which Black is going to lose all of his pawns on the 6th rank.

39...♔g2 40.♖f4 And this was even too much for Giri. A short, but very good lesson from Dominguez! **1-0**

Clash of the Titans

(17) Ragozin, Viacheslav-Botvinnik, Mikhail[C56]

Leningrad-ch, 1930

[Miton Kamil]

1.e4 e5 2.♘f3 ♘c6 3.♙c4 ♘f6 4.d4 [4.d3 ; 4.♘g5]

4...exd4

5.O-O A rare line which is not dangerous for Black. More often White plays [5.e5 Now Black has 3 different ways to play: 5...♘g4 (5...♘e4 With the idea of pushing d6 at some point and equalizing the position in the center.; 5...d5 6.♙b5 ♘e4 7.♘xd4 ♙d7 8.♙xc6 bxc6 9.O-O Objectively Black should be fine but the position is very complex. White's idea is to try and take control of the dark squares (d4 and c5) or to create an attack after f4-f5. Black should try to activate his light squared bishop after c5-d4 or play over f6. Recently on the top level Carlsen played this structure against Harikrishna during the Tata Steel tournament.) 6.♙e2 (6.O-O 6...d6 7.exd6 ♙xd6 8.♙e1+ ♙f8 With complex play too. Black is a pawn up but his king is not well placed on f8. 9.♙g5 doesn't work now because of 9...♙xh2+!) 6...♙e7 7.♙f4 d6 Black needs to hurry to take out the pawn from e5 otherwise it will be not easy to

finish the development. (7...f6 8.exf6 ♘xf6 (8...gxf6 9.♘bd2 With the idea of Nb3 and recapturing the pawn on d4, when thanks to his better structure White can try to get a small advantage.) 9.♘bd2 d6 10.♘b3 ♙g4∞) 8.exd6 ♙xe2+ 9.♙xe2 ♙xd6 10.♙xd6 cxd6 11.♘a3

11...♘ge5 A very strong move. Black will lose the d4 pawn anyway, but is important to do that in the correct way. 12.♘b5 d3! And Black avoided a worse position with an isolated pawn. Miton-Bruzon, Havana 2006]

5...♘xe4 6.♙e1 d5 7.♘c3 A better option for White is [7.♙xd5 7...♙xd5 8.♘c3 ♙a5 (

a) 8...♙h5 9.♘xe4 ♙e6 10.♙g5 h6 (10...♙b4 11.♘xd4 ♙xd1 12.♙exd1 ♘xd4 13.♙xd4 ♙e7 14.♙e1 White has the initiative thanks to his active pieces.; 10...♙d6 11.♘xd6+ cxd6 12.♙f4 ♙d5! A strong move with the same idea as we saw in the previous comment, to not let White get a better structure.)

11. ♕f6! Thanks to this move the queen is now badly placed on h5. 11... ♖g6 12. ♗h4 ♕g4 13. ♖d3†;

b) 8... ♖d8;)

9. ♗xe4 ♕e6 10. ♗eg5 (10. ♕d2 10... ♕b4 11. ♗xd4 ♗xd4 12. c3 ♕e7 13. cxd4 ♖d5 14. ♕b4 ♕xb4 15. ♖a4+ ♖c6 16. ♖xb4 O-O-O Black doesn't have any problems.) 10...O-O-O 11. ♗xe6 fxe6 12. ♖xe6 ♕d6 or Be7, with the idea of putting the bishop on f6. Black is fine.]

7...dxc4 [7...dxc3 also looks good for Black. 8. ♕xd5 ♕e6 (8...f5 9. ♗g5) 9. ♕xe4 (9. ♖xe4 9... ♗e7 And White is losing a piece.) 9... ♖xd1 10. ♖xd1 cxb2 11. ♕xb2 f6 White has nothing more than some compensation here.]

8. ♖xe4+ ♕e7 [8... ♕e6 9. ♗xd4 ♗xd4 10. ♖xd4 ♕d6 11. ♕f4 (11. ♗e4 11... ♖e7 12. ♗xd6+ cxd6 13. ♖xd6 O-O 14. ♕f4 White has a symbolic advantage because of his better bishop and structure but in general Black should not have any problems to make a draw. 14... ♖ad8) 11... ♖e7 12. ♕xd6 cxd6 13. ♖d2 O-O 14. ♖d1 ♖fd8 15. ♖xd6 ♖xd6 16. ♖xd6 ♖xd6 17. ♖xd6 ♗f8=]

9. ♗xd4

9...f5! A good move which chases the white rook from the e-file and allows Black to escape with the king.

10. ♖f4 O-O 11. ♗xc6 ♖xd1+ 12. ♗xd1 bxc6 13. ♖xc4 We have an interesting position. White has the better structure but on the other hand Black has the bishop pair and a better coordination between his pieces.

13... ♕d6 14. ♕e3 [14. ♕f4

The idea of exchanging the dark squared bishops is logical but black can play 14... ♕a6 15. ♖d4 (15. ♕xd6 15... ♖fe8 trick) 15... ♖fe8 16. ♗e3 c5 17. ♖a4 ♕b5 18. ♖a5 ♕xf4 19. ♖xb5 ♕xe3 20. fxe3 ♖xe3 21. ♖xc5 ♖d8! With complex, but more or less equal play.]

14...f4 15.♘d4 [15.♙c5 15...♖e8 And White is not on time with consolidating his position: 16.♗c3 ♘e6 17.♙xd6 ♘xc4 18.♙xf4 With a more or less equal position.]

15...♖f5 Black is preparing c5, with the idea of putting the pawns on dark squares in order to limit the white bishop.

16.g4!? An interesting move. More simple was [16.f3 with the idea of transferring the knight to e4.]

16...♖g5 17.f3 h5 18.h4 ♖g6 19.g5 The structure has changed.

19...a5 20.♗f2 ♖e6 21.♗e4 ♙a6

22.♖c3?! With this move White give the exchange. A better move was [22.♖xc6 22...♙b7 23.♗c5! ♙xc6 24.♗xe6 ♙xf3 25.♗xg7 ♙g4 It looks as if the white knight is in trouble but after 26.♖e1 ♙f7 White has a trick which was maybe missed by Ragozin: 27.♗e8!]

22...♙b4 23.♖b3 ♙c4 24.c3 ♙xb3 25.axb3 ♙f8 26.b4 a4 Black has a material advantage but it will take a long time to convert it because of the strong white pieces in the center.

27.♙f1 ♖ee8 28.♙e2

28...c5 Black is trying to open some files in order to improve the position. An alternative was [28...♙d6 29.♙d3 ♙e5 30.♙c5 ♙f7 31.♙c4 ♙e6 With the idea of giving back the exchange on e4 at some moment.]

29.bxc5 ♖eb8 30.♖a2 ♖b3 Preparing a3.

31.♗d2 ♖b5 [31...♖bb8 Not allowing b4, but after 32.♗e4 White's position is very solid. 32...♙f7 33.♙e5]

32.b4 g6 33.♙d3 ♙g7 Black finally managed to get rid of the bishop on d4, but he already lost one pawn and a lot of time.

34.♗b3 ♖bb8 35.♗a5 The position is becoming a bit complicated as White is going to win another pawn.

35...♙xd4 36.♙xd4 ♖e8 Black is winning the f-pawn but White is on time with his counterplay.

37.♖xa4 An interesting option was not lose any time and immediately try to promote the b-pawn. [37.♘c6!? 37...♖e3 38.b5 a3 (38...♖e1 39.b6 cxb6 40.cxb6 ♖b1 41.♘b4 Black's position is very risky.) 39.b6 cxb6 40.cxb6 ♖a4+ 41.♙d5 ♖d3+ 42.♙e5 ♖e3+ 43.♙d6 ♖d3+ With perpetual check or 44.♙c7 ♖xc3 45.b7 ♖b4 46.b8=♙+ ♖xb8 47.♙xb8 ♖xc6 48.♖xa3= And after 48...Re6 with the idea of playing Re3, then 49.Ra4.]

37...♖e3 38.b5 ♖xf3 39.b6 cxb6 40.cxb6 ♖d8+ 41.♙c4 ♖e3 42.♘c6 ♖e4+ 43.♘d4 [43.♙b3 43...♖xa4 44.♙xa4 ♖a8+ Followed by f3 and Black is winning.]

43...f3 44.♖a2 ♖c8+ 45.♙b4 ♖e1 The rook is placed well here because it can stop the white pawn over the b-file.

46.c4 ♖e4 [46...♖b1+ 47.♘b3

47...♖d8! With the idea Rd3. (47...♖e8 48.b7 f2 49.♖a8 ♖e1 50.♘d2 This why the rook is more accurately placed on d8.) 48.b7 (48.♙c3 48...♖e8 Re3 is coming.) 48...f2 49.♖xf2 ♖b8± And the most dangerous b-pawn is stopped.]

47.♙c3 ♖e3+ 48.♙b4 ♖e4 49.♙c3 ♖d8

50.♘c6? This move looks very natural but it is a mistake! White should have played [50.♘xf3 50...♖e3+ 51.♙b4 ♖xf3 With a very complex position. It seems like the white pawns should not be worse than a rook.]

50...♖e3+! And now Black is promoting the f-pawn very quickly. Less accurate was [50...♖e2 51.♘xd8 ♖xa2 52.b7 f2 53.b8=♙ f1=♙ 54.♘e6+ And White will mate or win the queen. 54...♙f7 55.♙f8++-]

51.♙b4 ♖e2 52.♖a1 f2 53.♘xd8 [53.♖f1 53...♖f8 54.b7 ♖b2+-+]

53...♖e1 54.♖a8 [54.b7 54...♖xa1 55.b8=♙ ♖b1+-+ This is why 50...Re3 was very important.]

54...f1=♙ 55.♘c6+ ♙g7 56.♖a7+ ♙f8 57.b7 Black will very easily stop the b-pawn and win the game.

57...♖b1+ 58.♙c5 ♙f5+ 59.♙d6 ♖d1+ 60.♙c7 ♙d7+ 61.♙b6 ♖b1+ 62.♙c5 ♖xb7 63.♖a8+ ♙g70-1

Editorial Preface

The women FIDE Grand Prix was won very convincingly by Koneru with 8/11. 2nd and 3rd places were shared by Khotenashvilli and Lagno with 7/11.

In the men FIDE Grand Prix in Paris, Nakamura is leading with a very nice result of 5,5 after the first 8 rounds, followed by Gelfand and Caruana with 5/8. The situation is very interesting, because in case Caruana became the unshared winner of the Grand Prix he would qualify for the Candidates. The last 3 rounds are going to be very exciting.

The very strong Baku Open was won by Smirnov with 7/9.

As usual we bring you an annotated selection of the best games of the past week. Enjoy!

Arkadij Naiditsch & Csaba Balogh

4 best games of the past week

(1) Laznicka, Viktor(2677)

- Topalov, Veselin(2769) [D31]

Topalov-Laznicka m 2013(6), 2013.09.25

[Balogh Csaba]

We are in the 6th and last game of this friendly match. The score is 3-2 to Topalov. Laznicka has the White pieces and tries to level the match.

1.c4 e6 2.♘c3 d5 3.d4 ♙e7 Topalov plays the Queen's Gambit, one of the most solid openings against 1.d4 nowadays. His intentions are clearly to build a safe position for a draw and if White pushes too hard, he might use his chances.

4.cxd5 exd5 5.♙f4 c6 6.e3 ♙f5

7.g4 This ambitious move is White's dangerous extra option when they spare the 4.Nf3 Nf6 pair of moves. White takes ground on the kingside.

7...♙e6 8.♙d3 [8.h3 and; 8.h4 are the two main theoretical lines. This one is considered to be the most critical one. Nakamura had just won a nice game against Bacrot with it a few days ago.]

8...♘d7 9.♙f5 This is the novelty. According to the speed at which Laznicka played it, it was a prepared one, but after this game I doubt that anyone is interested in repeating it. [9.h3 was played in the previous games, with the idea to be able to finish the development with Nge2 or Nf3-e5, but Black launches a quick counterplay with 9...g5 10.♙g3 h5 and Black is fine according to the theory.]

9...♙xf5 10.gxf5 Black has various playable options here.

10...♙b4 Topalov decided to develop the g8 knight to e7, directly attacking the doubled pawn. [Trading the bishops was also logical: 10...♙g5 With the same idea of putting the knight to e7. 11.♙g3 ♘e7; 10...♘b6 is a common idea in this kind of positions. Black wants to play Bd6 here. The most natural reaction is 11.♘f3 with the idea to play Ne5 after Bd6, but here for instance Black could try 11...♘c4 12.♙c2 ♙d6 and after 13.♘e5 ♙c7! forces White to leave the nice e5 square with his knight. Black is going to develop his knight to e7 here as well.]

11.♘e2 ♘e7 12.♙c2

12...b6 A multifunctional move. Black frees the d7 square for the queen in order to further attack the f5 pawn. He also prepares the trade of the dark squared bishops with Bd6, which is a favorable exchange for him in this structure and sometimes Black might transfer his knight to its ideal square on d6 through c4. [12...g6 was good immediately as well.]

13.f3 With the idea to play e4, supporting the f5 pawn. [13.g1 13...g6 14.e5 g8 is also fine for Black. He is intending to castle queenside anyway.]

13...g6 [13...d6 was also good.]

14.fxg6 [14.f6? looks nice, but it drops the pawn after 14...g8+ White is not in time to protect it with e4-e5.]

14...xg6! I like this move a lot. After this it is much easier for Black to finish the development. The main idea is to free the e7 square for the queen followed by castling queenside. [14...hxg6 It was more principled to take towards to the center, open the h-file for the rook and to have only two pawn islands, but Black might have some problems in creating safety for the king. 15.O-O-O The last preparation before pushing e4. 15...d7 16.e4 The game is very unclear as Black cannot play 16...O-O-O? because of 17.b5!±]

15.O-O-O [After 15.g3 the easiest is 15...g5! with the point that after 16.e4 O-O-O White cannot castle queenside.]

15...e7 Developing with tempo as Black is now threatening to take on f4 and then on e3.

16.d3 White protects the e3 pawn with the idea to save his bishop with Bg3. [16.e4 leads to a clear advantage for Black after 16...xc3 17.xc3 xf4 18.xf4 O-O-O Black is well prepared for the central break. He is also threatening with the unpleasant pin of Qg5.]

16...c4 [16...xf4 17.xf4 O-O-O=+ was also better for Black.]

17.b3?! This is a serious weakening in front of the king. White was annoyed by the c4 knight. [17.b1 was better, but Black is fine anyway after 17...O-O-O=+]

17...a3 18.b2 xf4 Black chooses the right moment to get rid of the bishop, as it was threatening to run away.

19. ♖xf4

19... ♖g8! One more very useful move before castling. Black occupies the open file first.

20. ♖f2 O-O-O 21. ♖b2

21... ♖b8 Obviously not a necessary, but a good prophylactic move against any kind of checks. Black has a big advantage. All his pieces are excellently placed and his pawn formation is also perfect. He is well prepared against the only active idea of White, to push e4, which would only destroy his own position. White is forced to maneuver inside his camp, but Black has a more free game.

22. ♖b1 ♖de8! Further improving the pieces.

23. ♖xa3 ♖xa3+ 24. ♖b1 ♖d6! Topalov plays great! The bishop is much more useful on d6, as Black cannot create

an attack, which could have been well supported by the a3 bishop.

25. ♖e2

25... ♖e6! Small and strong moves! Black improves his queen by driving it to f5!

26. ♖c3 ♖f5 27. ♖d1

27... ♖g6! Topalov doubles his rooks on the g-file in order to penetrate on the second rank. Black might also threaten to play Rh6 or Rf6, provoking another weakening in White's camp.

28. ♖d2 ♖h3 29. f4 A sad move, but what to do, there was nothing better. This destroys the flexibility of the central pawns. [29. ♖b2 simple loses to 29... ♖eg8+ and Rg2 next.;

29.e4 would have strongly be met by 29...♙f4! 30.♖e2 dxe4 White cannot take back with the f-pawn and after 31.♘xe4 ♖eg8—+ wins.]

29...♙f5! The queen has done its job by provoking f4. Now it leaves from the pin and the e4-e5 threat.

30.♘e2 White tries to lock the g-file to avoid the penetration of the rooks, but Topalov simply sends the g3 knight away with his h-pawn.

30...h5! 31.♘g3 ♖g4 h4 is coming next. The knight is really poor and there is no outpost it could occupy in the position.

32.♖e2 h4 33.♖xg4 ♖xg4 34.♘f5 White at least tries to make an active move, but it leads to the trap of the knight. [34.♘f1 34...♙b4 35.♖f2 ♖eg8—+ Rg2 is coming next, White's position is hopeless.]

34...♙b4 35.h3 [35.♖f2 is met in the same way as in the game: 35...♖h8!—+ Protecting the h-pawn and threatening Rh5, winning the knight, which White cannot prevent.]

35...♖g6 36.♖e2 [After 36.♘h4 the easiest win is 36...♖g1+ (36...♖h6 37.♘f5 ♖f6 38.♘g7 ♖h8—+ also wins.) 37.♖d1 ♖xd1+ 38.♖xd1 ♖xe3 39.♖h1 ♖e4—+ Grabbing all the pawns.]

36...♖h8! Rh5 is coming next. There is no way back for the knight.

37.e4 ♖f6 Black takes on e4 next. [37...♖h5 would have led to the same result after 38.♘e3 dxe4 39.♖d1 ♖g3—+]

38.♘g7 ♖g8 [White resigned in view of 38...♖g8 39.♘h5 ♖h6 The knight and the game are lost. A great positional achievement by Topalov, who deservedly won the match 4-2 with this neat finish.] **0-1**

(2) Ivanchuk, Vassily(2731) - Grischuk, Alexander(2785) [D83]

FIDE GP Paris(5.6), 2013.09.27

[Arkadij Naiditsch]

We will see a strange game where White very quickly got into trouble and finally lost the game to a beautiful regrouping of the black pieces.

1.d4 ♘f6 2.c4 g6 3.♘c3 d5 At the moment the Gruenfeld is probably the most popular opening on the top level. Carlsen, Anand, Caruana, Grischuk, Gelfand, Vachier Lagrave are just some of the players who are playing it as one of their main openings. As we can see from the latest games, the White players don't manage to find some global line to get a nicer position, so they keep on trying many sidelines, trying to test Black's memory as well as preparing some small improvement which can be quite unpleasant to solve during the game.

4.♗f4 Not the most ambitious line for White to try and reach something out of the opening.

4...♗g7 5.e3

5...0-0 [5...c5 is the other main line.]

6.♖c1 [In case White tried to win the pawn, Black would

quickly get equal play: 6.cxd5 6...♘xd5 7.♗xd5 ♗xd5 8.♗xc7 And now the very strong 8...♘a6! 9.♗xa6 Anything else leads to a very dangerous position for White. 9...♗xg2 10.♗f3 ♗xf3 11.♘xf3 bxa6 With an equal endgame.]

6...♗e6 We are still following the theory.

7.c5 Not a new move, but a rare one. It was played on the highest level for the first time by Wang Yue against Carlsen in 2009, but all in all it somehow does not look too scary for Black. White's idea is simple: to be solid on the kingside and try to get some play on the queenside, where he has a space advantage.

7...c6 The most logical move. Black consolidates the center. He wants to play Nbd7 next and sometime in the future try to play e5.

8.b4 ♘bd7 9.♗d3 [9.h3 would maybe have been a more careful move...]

9...♘h5! A very nice move. Without the black bishop I cannot imagine White having even a theoretical chance of being better.

10.♘ge2

10...f6! Another very logical and strong decision. Black brings the bishop to f7 to play e5 next.

11.h4?! This move looks very strange. White is weakening his pawn structure too much. [11.O-O would have been the more normal continuation.]

11...♟f7 12.♟h2 White defends against the direct e5 move because of the strength of g4 next and the knight on h5 would be caught.

12...f5 Well played! Black continues trying to play e5, as the h4 pawn would then be attacked.

13.f4? This move is just shocking! White makes a pawn out of the bishop and he totally destroys his structure. Black is just much better now.

13...♞hf6 Black's idea is simple, to bring one knight to e4, the other one maybe to g4 and open the queenside by playing b6 and a5. He would then be getting great play because of his much better pieces and the bad white bishop on h2.

14.♟g3 ♞g4 15.♞d2

15...♞df6 Black is putting his knights to perfect positions.

16.♞d1 ♞e4 17.♟xe4 White already doesn't have anything better, but now the black bishop on f7 is becoming a monster piece.

17...dxe4 Black has all the white squares under control, so what is left is to open the a-file.

18.a4 Ivanchuk is trying to have b5 after a5.

18...b6 But Black is first opening the b-file. It seems like the game will not last too long, but White finds a little bit of counterplay.

19.h5! Well, this move doesn't improve the position much, but at least White is going to die with a smile. In case of some waiting move Black would just play bxc5 and Rb8 followed by doubling on the b-file.

19...gxh5 Why not take a pawn if you can?!

20.♟h4 ♟f6? I think this is a big mistake by Black. I don't understand why it was necessary to exchange these bishops. [20...♞d7 looks much more simple after 21.♞f2 ♞f6 the knight will find a perfect position on d5!]

21.♟xf6?! White helps Black to get the knight to d5, but there was no reason for it! [21.♞f2! It is very important for White to exchange the knights as soon as possible. 21...♟xh4 22.♞xh4 ♞f6 23.b5 And maybe White is still more or less in the game.]

21...♞xf6 22.♞f2 ♞h8 Black is also trying to be strong on the kingside, but I think there was no need for that, and Black should just have stuck to the plan of crushing on the queenside.

23.O-O ♞g8

24.b5 White is looking for exchanges, which is correct. His

only chance is to exchange as many pieces as possible.

24...♖c8 25.cxb6 ♖xb6 26.a5 [Maybe a better practical try for White would have been to play 26.♖c5 26...cxb5 27.♖xb5 ♖e6 and of course Black is better, but at least White has a strong rook on the 5th rank.]

26...♖b7 A solid move, not falling into any traps.

27.bxc6 ♖xc6 28.♖xc6 ♖xc6 29.♖c1 It looks like White is not doing too bad, but in fact the game is almost lost! Black is a pawn up and the open g-file plus the possibility of having a monster knight on d5 make things very easy for him.

29...♖a6! A very nice move! Black is not only fixing the a-pawn, he also wants to play Nd5 followed by Qg6.

30.♖c5?! The last mistake in a very difficult position.

30...♗c4! And the dream idea of Black is coming true... The g2 pawn is falling!

31.♗c3 ♗f1 White cannot defend against Rxc2. All in all it was of course not the best game Ivanchuk ever played but it was quite interesting because of the pawn structures which we don't see too often... **0-1**

(3) Caruana, Fabiano(2779) - Ivanchuk, Vassily(2731) [C11]

FIDE GP Paris(6.5), 2013.09.28

[Arkadij Naiditsch]

Before the game it was clear that this game was going to be very interesting. Caruana needs to win the Grand Prix to take the qualification place for the Candidates and with Ivanchuk, as we all know all too well, anything can happen.

1.e4 e6 Before the game it is really very hard to predict which opening Ivanchuk is going to choose as he plays almost everything.

2.d4 d5 3.♗c3 ♗f6 4.e5 The main move. Another option is to play 4.Bg5.

4...♗fd7 5.f4 c5 6.♗f3 ♗c6 7.♗e3 And we are in the main line.

7...♖b6 A rather rare move. Not so long ago in the game Caruana-Meier from Dortmund 2013, Black continued with 7...a6 and got quite good play, but Black's position was looking really dangerous at some moment, so Caruana was clearly ready with some nice improvement there.

8.♗a4! The best reply. White is getting clearly better play in my opinion.

8...♖a5+ 9.c3 c4 This is still theory, but I would personally not advice anyone to go for this position with Black. It looks like it is simply better for White.

10.b4! Another important move. Black wanted to play b5 next.

10...♔c7 [10...cxb3 11.axb3 would of course lead to a much better position for White.]

11.♙e2 [11.g3 followed by Bh3 next was also possible. The idea is not to give Black the option to play f6 or f5 next, because White would have immediate pressure on the e6 pawn.]

11...♙e7 12.O-O O-O 13.♔c2 Now Black has to decide what to do next. White's plan is easy, to block everything on the queenside and start his play on the kingside, where White has much more space.

13...b5?! looks like a wrong decision to me. Now White is going to be better in any case. [13...f5!? would probably have been an interesting try for Black. 14.exf6 ♜xf6 15.♙e5 And of course White's position looks better, but maybe Black could try to play against the bad position of the white knight on a4. 15...b6! And the game is quite open.]

14.♞c5 Of course to c5, not to b2!

14...♞xc5 15.dxc5 15.bxc5 was of course not looking good for White, as Black would have kept the idea of playing b4 in the future.

15...a5 16.a3 ♙d7 17.♞d4 ♞xd4 18.♙xd4 I think that by now it is clear that White has gained quite an opening edge. The c5 pawn can become very strong in the future and Black doesn't really have a plan. White's ideas stay the same, to play f5 at some good moment.

18...axb4?! Another strange move by Black. [At least Black should have tried to win the a-file: 18...♖a6 19.♔b2 ♖fa8 And of course White's position is better, but Black could have the plan of playing Bc6 followed by Qa7 next and winning the a-file.]

19.axb4 ♖xa1 20.♖xa1 Black has no space and no counterplay, which makes it very difficult for him to defend this position.

20...♔b7 21.♔a2 White is provoking Black into playing Bc6 to draw the bishop's attention away from the f5 square.

21...♙c6 22.♔b1 White wants to play f5 or maybe Bd1-Bc2 first and then g4 followed by f5.

22...f5 Black is looking for some play, but there is simply none.

23. exf6 ♗xf6

24. ♔d1 Black's position is not improving. The bishop on c6 is just horrible, White is controlling the a-file and all endgames should be very close to lost for Black.

24... ♖a8 25. ♖xa8+ ♗xa8 26. ♗g4 White is not looking for an immediate win, and there is of course no reason for that. Caruana is aiming for the endgame.

26... ♗d7 27. h3 With this move, White is avoiding all future e5 pushes, which might work by accident at some point.

27... ♗e8 28. ♗d2 Again White does not hurry!

28... ♗f7 29. ♗e3 Now White just wants to play Be5 next, followed by Qd4.

29... ♗xd4 30. ♗xd4 ♗f6 Black tries to cover the dark squares, but it does not help.

31. ♗xf6 gxf6 32. ♔f2 The white king is going to d4.

32... ♗f7 33. ♗e3 It is slightly surprising that Black already resigned here, but of course White's position should be winning. The idea is quite simple, to put the king to d4, play Bf3 and start moving the pawns g4-h4 and g5, winning control over the e5 square and the game. A very nice technical win by Caruana and a big step in view of a qualification for the Candidates. 1-0

(4) Grischuk, Alexander(2785) - Nakamura, Hikaru(2772) [D37]

FIDE GP Paris(6.4), 2013.09.28

[Balogh Csaba]

Grischuk was pressing very hard in all his games - especially in the White ones - in order to qualify to the Candidates tournament, but Nakamura managed to neutralize all his winning attempts really convincingly.

1.d4 d5 2.♘f3 ♘f6 3.c4 e6 4.♘c3 [4.g3 4...♙e7 5.♙g2 O-O 6.♘c3 (However in this move order the main and most critical move is 6.O-O)]

4...♙e7 The Queen's Gambit is considered to be one of the safest openings.

5.g3 A relatively rare line, White transposes to the Catalan opening. The main lines are 5.Bg5 and 5.Bf4.

5...O-O 6.♙g2 dxc4 7.♘e5 Before this game it was quite unclear whether 7... Nc6 or 7...c5 is the best reply, but Nakamura's opening handling seems to give an answer to this question.

7...c5! 8.dxc5 ♖xd1+ 9.♘xd1 ♙xc5 10.♘e3 White would like to get a typical Catalan endgame advantage with his superior minor pieces on g2 and e5. Black also has some technical

problems with finishing the development of the queenside. Black must react accurately. [The other option is 10.♘xc4 but in this case Black can develop his knight to c6. 10...♘c6 11.♙e3 And Black equalizes after 11...♙b4+! 12.♙d2 (12.♘c3 12...♘d5=) 12...♙xd2+ 13.♘xd2 ♙d7=]

10...♘bd7! 11.♘5xc4 Grischuk would like to keep all the pieces on the board in order not to ease Black's task in solving the development problems. [11.♘3xc4 is met by 11...♘xe5 12.♘xe5 ♙d4! Forcing the strong knight to leave its position. 13.♘c4 ♙d7 Black finishes the development and equalizes, as after Bxb7 Black gets strong compensation. 14.♙xb7 ♖ab8 15.♙f3 ♖fc8 White suddenly becomes the undeveloped one with his c1 bishop.]

11...♖b8! Very precise play by Nakamura. He leaves from the bishop's diagonal with the aim to play b6 and Bb7.

12.♘a5 White knows that if Black manages to play b6 he will solve his opening problems, which is why he fights against it as much as he can. This time he would like to jump to c6 with his knight. Nakamura makes a great prophylactic move again!

12...♘e5! Refreshing the b6 idea by taking the c6 square under control. Black uses the fact that the e3 knight blocks the bishop's way and he cannot pin the e5 knight with Bf4!

13.♘ec4 White would like to put his bishop to f4 with tempo.

13...♙b4+! An unpleasant check! White either has to trade his bishop, which was intending to go to f4, or to move to f1 with the king, but then he could not connect his rooks.

14.♙d2 ♙xd2+ 15.♙xc2 [15.♘xd2 15...b6 is also fine for Black.]

15...♖d8+ 16.♙c3 That kind of march with the king is only possible if the queens are off the board. Black could still have created dangerous threats. 16.Ke1 would have been safer to keep equality.

16...♙xc4 This spoils Black's chances to overtake the initiative. [16...♙eg4! was very strong, using the fact that the king has left the f2 square. 17.♖hd1 (17.f4 is met by 17...♙d5+ 18.♙b3 ♙d7+ Suddenly the a5 knight is trapped. Black threatens to play b6 and all his pieces are also excellently placed.; 17.f3 is ugly as it locks the g2 bishop. 17...♙d5+ 18.♙b3 ♙ge3 19.♙xe3 ♙xe3 20.♙h3 Black has several ways to increase his advantage. Probably the best is 20...♖d4 21.♖ac1 ♙d7 The e3 knight is a beast. The h3 bishop and the a5 knight are completely out of the game. 22.♖c3 does not work because of

22...♙a4+ 23.♙a3 ♙c2+ Winning an exchange.) 17...♙d5+ 18.♙xd5 is met by the strong intermediate move (18.♙b3 18...♙xf2 19.♖d4 ♙d7 20.♖f1 b6+ Trapping the knight.) 18...♙xf2! 19.♖f1 exd5 20.♖xf2 dxc4 21.♙xc4 ♙e6 Black has the better pawn structure and his bishop is also superior to the knight.]

17.♙xc4

17...b6! 18.♙c6 ♙b7! A nice tactical idea by Nakamura! He never misses such moments.

19.♙b3! White had to be careful to avoid the problems. He leaves from the threatening Rac8. [19.♙xb8 loses a pawn after 19...♙xg2 20.♙a6 ♙xh1 21.♖xh1 ♖d2+; The whole point was that after 19.♙xd8 19...♙xg2 20.♖hd1 Black wins the knight with 20...♙d5+!+]

19...♟xc6 20.♟xc6 White might hope for an advantage with the strong bishop if he had his rook on d1 and his pawn on h3 to prevent Ng4. However the lack of these tempi allows Black to generate counterplay in time.

20...♞g4 21.f3 ♞e3 White cannot get to the d-file anymore and Black threatens to play Rd2.

22.♟e4 Grischuk tries to neutralize the invading on the d2 square by settling his bishop to d3. Afterwards he intends to occupy the c-file and the game becomes balanced. Nakamura decided to force the matters.

22...♞f5 23.♟xf5 [If White tries to keep his bishop by playing 23.♟d3 23...♞d4+ he now has to play 24.♞c3 since otherwise Black takes on f3 and the d3 bishop is unprotected! 24...♞d5 25.♞hd1 ♞bd8=+ Followed by e5! Black is very active and only he can be better here.]

23...exf5 24.♞ad1 ♞e8 Grischuk was already down on time, which is why Nakamura decides to try a bit more, but it does not change the final outcome. [24...♞f8 was also a dead draw.]

25.♞he1! [25.♞d2 25...♞e3+ was Black's plan.]

25...g6 [Now after 25...♞e3+ White plays 26.♞d3=]

26.e4 fxe4 27.♞xe4 ♞xe4 28.fxe4

28...♞b7! The game is drawn now. The players could not agree on it because of the Sofia rules, but after some further moves the result will be the same.

29.♞d4 ♞f8 30.a4 ♞e7 31.♞c3 h5 32.b4 ♞e6 33.♞d3 a5 [A last interesting moment. Let's check what happens if Black simplifies to a pawn endgame. 33...♞d7? 34.♞xd7 ♞xd7]

It seems like White is winning after 35.e5! ♞e6 36.♞e4 ♞e7 (36...a6 37.b5 axb5 38.axb5 ♞e7 (38...g5 39.h3+- Kf5 is coming next.) 39.♞d5 ♞d7 40.h4! And the game is over. 40...♞c7 (40...♞e7 41.♞c6+-) 41.e6 f6 (41...fxe6+ 42.♞xe6+-) 42.e7 ♞d7 43.e8=♞+ ♞xe8 44.♞c6+- wins.) 37.♞d5 ♞d7 38.b5 g5 39.h3+- Black finds himself in zugzwang. The king invades either on c6 or through e6.]

34.♔e3 f6 35.h4 ♖a7 36.♔f4 ♖a8 37.♖c4 axb4 38.♖xb4
 ♖a6 39.♖d4 ♖a5 40.♖b4 ♖a6 41.♖d4 ♖a5 42.♖b4 Finally
 the players found a repetition and they agreed to draw.

Endgame section

(15) Lagno, K.(2532)-Muminova, N.(2293)

FIDE WGP Tashkent(8.5), 2013.09.26

[CE Team]

Muminova, who is rated only 2293, got a clear advantage against her much stronger opponent with Black, which is already a great achievement, but how to convert this advantage into a full point?!

25.axb4 ♖d8?! Not the best move. [25...♗e8! would put White in front of possibly unsolvable problems! 26.f3 f5 The black rook will enter the 3rd rank, after which White simply doesn't have any more moves. Black's position should be close to winning here.]

26.♖c3 ♘d2 [26...♗d1? was of course not possible because of 27.♙xc4+ bxc4 28.♗xd1]

27.f3 ♘xf1 28.♗xf1 ♗d3+ 29.♖b2 Black managed to achieve a much better rook endgame, but rook endgames often have a tendency to be drawish, so Black needs to be very precise.

29...♗b3+ [29...♗d2+ would probably lead to a draw: 30.♖c3 ♗xg2 31.♗a1 The white rook is getting active very quickly.

31...♗f2 32.♗xa7+ ♖e6 33.♖d4! The activity of the white king secures the draw. 33...♗d2+ 34.♖c5=]

30.♖c2
